PHILADELPHIA, FIRST MONTH 5, 1889.

{ JOURNAL
Vol. XVII. No. 1 }

THE NEW YEAR.

THE year's bright dawns have melted into noon ;
The blazing noons have slowly burned away
To ashen twilight. Thou, the heir, for whom
The rose of morning opens its sweet bud,
The day prepares its fires, the mystic night
Makes starry silences, is thy account
For this day ready? As a king thou'rt housed ;
Thy powers are royal. Like a golden door
Each day swings back for thee, disclosing space
For noble actions. Dost thou meanly crouch
In some dim corner of thy lordly hall,
A-weaving webs to catch the unwary guest?
Or in its low-chill cellar art thou held.
In serpent-folds of sin? Hark! through the clear
And resonant azure of thy palace roof,
Voices as sweet as silver bells make speech.
Put on the cymbals of thy state, O prince!
Thine is the new year's opportunity.

—M. F. Butts, in *S. S. Times*.

For Friends' Intelligencer and Journal.

THE STABILITY OF CHRISTIAN FAITH.

PERHAPS our first inquiry should be, What do we understand by faith? According to the standard definition, faith is reliance on testimony,—that which is believed on any subject; in connection with religion it is “that trust or confidence exercised towards the moral character of God.” In the Epistle to the Hebrews,—formerly ascribed to Paul, but now believed to have been written by other hands,—the definition of Faith was: “The substance of things hoped for, the evidence of things not seen,”—or, as the Revised Version gives it: “The assurance of things hoped for, the proving of things not seen.” This is purely an ethical conception, and in full accord with the testimony of Jesus, who introduced no new religion, but preached that which was from the beginning, the communication of the Divine will to the inner consciousness of man. This will had been known and acknowledged, and as far as comprehended it had been obeyed. There are no loftier utterances of spiritual truth, no finer expressions of trust and confidence in the moral government of the world than are to be found in the oldest records of religious experience. Summing these up and uniting with them the best thought of his own and of preceding ages, Jesus gave forth a few simple but fundamental precepts, at once so clear and convincing that they commend themselves to the acceptance of the sincere seeker, unbiased by tradition and false ideas, whenever found. It is only as we separate these precepts from

the masses of creed and interpretation which have gathered around them that we become conscious of how few they are, yet how strong and full, meeting every condition of spiritual life with a freshness that like the manna which gathered every day, gave nourishment to the body, brings daily renewal of confidence and trust to the watchful soul. Covering as these precepts do the whole range of moral action, adapting themselves to every new unfolding of the germinal truths upon which they are founded, we can conceive of no future condition of the human family in which they will cease to be the spring of moral action.

Nothing in the three years of his ministry, so emphasizes the declaration: “In him dwelt all the fullness of the Godhead bodily” (Col. 2:9) as the far-seeing wisdom with which Jesus met and silenced the cavilings of Scribe and Pharisee over his rendering of the Law of Moses, and the utterances of the old prophets. “Because of the hardness of your hearts these things were suffered,” said the Teacher, and so in the ages that have followed his advent, some other way than simple obedience to the divine word heard in the inner chamber of the soul has found acceptance as the will of God.

While Jesus gave no final verdict except for the hypocrite and the blasphemer, he taught on all occasions that the Father's love was sufficient to meet and satisfy the spiritual want of the whole human family,—that the wrong-doer had only to forsake his evil way, ask for this love and live in its light, to become one with him. No “outward sign of the inward grace,” no observance of rite or ceremony did he attach as a requisite of the divine favor, the forsaking of the wrong, not the conforming to some ordinance, was the evidence of discipleship. “If ye have love one for another” was its sign.

Much is said about “the truth as it is in Jesus,” and every branch of the Christian Church, has its own definition of the term. Yet on that memorable occasion when he stood arranged before Pilate, who queried of him concerning himself, Jesus made answer: “To this end was I born and for this cause came I into the world, to bear witness of the truth.” This was his own testimony concerning his mission. The other question, “What is truth?” was left unanswered. And this again shows the deep knowledge that Jesus had of the human heart as it was said of him, “He knew what was in man and needed not that any should tell him.” No man or set of men can on the authority of Jesus claim absolutely “We have the truth.” It is not confined within

lines of measurement,—it is arrived at through the unfolding of knowledge as to the rightfulness of thought respecting what we see and what we experience in our relations to one another and to the great Ruler of the Universe.

A menace to Christianity comes from its own adherents, who insist on statements and interpretations concerning what has been written, that the enlightenment of the age no longer accept as the Gospel. The difficulty lies with the Church which still insists upon floundering in a sea of tradition and speculative thought, which for nearly two thousand years has invested God with attributes altogether unworthy of his fatherhood, and has made acceptance with him to depend upon belief in canons and articles of human construction that have no warrant in the teaching of Jesus, who said of those who heard, and turned away from his message: "Ye will not come to me that ye may have life."—this life of God in the soul to which he called them.

It could scarcely have been otherwise in the first few centuries of the Christian Church. The philosophy of Greece and Rome and of the Grecian cities of Asia into which the Gospel was carried, together with the social conditions under which, outside of the Hebrew Nation it was first promulgated, were all against the simple faith set forth by Jesus. The old mythologies had indeed lost their hold upon the conscience, though the forms of worship were still observed. Speculative thought engrossed the attention of scholars and teachers, and while there was much learning, and some knowledge of God as the revealer of truth, there was little faith among the mass of the people in the intuitions of the soul that lead to communion with him. The thoughtful, reverent mind had outgrown the myths and fables, the oracles and sacred groves, of an earlier time, just as those who think for themselves, untrammelled by the myths and allegories that have formed the swaddling clothes of the gospel—are asking that the Christianity offered by the Church for their acceptance shall have a stronger and more abiding foundation to rest upon than dreams, visions, angelic apparitions, or miracles of healing.

The Divine Son, except in two instances, never claimed to be received as the Messiah, upon the wonder-working power ascribed to him,—a power that was commonly believed in at that time and finds many adherents in our own day. The words that he spoke to the people, *they* were life and power, and to these he cited them. He called them to find God not in groves and temples but within themselves. He taught that only as they were obedient to this divine power could harmony with God be experienced. He said to the erring: "Go and sin no more." They who were healed must have faith in the healing power, that the wholeness which it promised might be acknowledged as a gift from the Father in heaven. Throughout his entire ministry the constant appeal of Jesus was to their sense of obligation to God, who he declared was ready to hear and answer all who called upon him in spirit and in truth. There is hope for the permanency of the Christian faith in the earnest inquiry and re-examinations that now

engage the highest minds in the church. The literal rendering of many of the symbols and illustrations used by Jesus and the apostles, and embodied in the dogma of evangelical Christianity is giving place to the more spiritual views which a critical study of Bible literature and times is bringing into prominence, and the result must be to place the religion of Jesus,—the Christianity of the future,—again on its first foundation, the revelation of the Divine will,—that rock upon which he declared his church would be built. "Flesh and blood hath not revealed this," said Jesus, "but my father which is in Heaven." And this is ever a fresh revelation, which is given to meet the present need of the earnest seeker. It is in harmony with the spirit of the Gospel and with the experiences of faithful witnesses for God in our own and in past ages.

On this foundation the stability of the Christian faith is assured. No philosophy, no ethical culture, however pure or refined, that stops short of the revelation of the Divine will to that spirit in man which makes him the child of God, can meet and satisfy the needs of the soul. Only as it thrills with the consciousness of his presence and his power, is realized the fullness of the Gospel message. He who is satisfied to seek the highest truth in reason, independent of revelation, to look for the Eternal Good in *any* attribute or faculty of the mind however exalted, may, when the end of all that is perishable approaches, find himself without God and without hope. We can conceive of no greater wrong a man can commit against himself, and against the race, than to rest all that is most precious to the soul upon a basis which cuts off the unlettered from a participation in the hopes and aims divinely given and equally open to all men whatever their condition.

"It is the spirit that quickeneth," was the testimony of the Master. "Though I speak with the tongues of men and angels, and have not love I am become as sounding brass and a tinkling cymbal," said the devout apostle. Wherever this love finds a lodgment there will the faith of Jesus have expression in the life of the recipient. Whether he be learned in all the wisdom of the world, or without that knowledge, he knows of "the peace that passeth understanding" and satisfies every longing desire of the soul. This is that which is "hidden from the wise and prudent," and revealed to such as are compared to babes;—not that men are condemned for being wise and prudent, but for seeking to come into the divine relationship by other means than through loving obedience to his voice, that speaks to every intelligent listener, saying, "This is the way; walk ye in it." L. J. R.

SUGGESTIONS FOR 1889.

SUPPOSE we think little about number one;
 Suppose we all help some one else to have fun;
 Suppose we ne'er speak of the faults of a friend;
 Suppose we are ready our own to amend;
 Suppose we laugh with, and not at, other folk,
 And never hurt any one "just for the joke;"
 Suppose we hide trouble, and show only cheer—
 How sure we shall be of a Happy New Year!

—St. Nicholas.

For Friends' Intelligencer and Journal.

NOTES FROM PALESTINE.—I.

JAFFA—THE PLAINS OF SHARON—THE TOWER OF RAMLEH—JUDEAN HILLS—ENTRY INTO JERUSALEM.

ON a rounded hillock, about one hundred feet above the Mediterranean shore, stands the ancient town of Jaffa, looking somewhat like a fort. Long ago it was a Phœnician colony in the land of the Philistines. In the Greek mythology, Andromeda was here chained to a rock to be devoured by a sea monster, but was rescued by Perseus. During the Crusades the town was subject to many vicissitudes. Its walls are still standing.

Jaffa has the only harbor in Palestine of sufficient size to admit large vessels; even there it is often difficult to effect a landing, and passengers may wait hours in sight of the promised land before being able to enter it. Sometimes they must be carried part of the way to shore on the backs of men who have learned to breast the waves. This is the harbor where Jonah encountered the mighty tempest, when he was fleeing to Tarshish, where the rowers cast him into the sea, after vainly trying to bring the boat to land, and where he was swallowed by the great fish.

Both wind and tide were favorable when my friend and I approached the shore, in a steamer of the French Messagiere Line from Alexandria. With other passengers we were able to go to land immediately in the small boats.

About seven o'clock in the morning we climbed the steep and narrow streets of the little town, passing bazars containing a few eastern goods, and markets piled with oranges and lemons. Many of the houses were of stone, and although small when contrasted with our houses in America, were well built when compared with those in some other parts of Palestine.

After securing rooms at the hotel, we went to see the mission school kept by Miss Arnott and other English ladies. The Syrian children were reciting their lessons or sewing. They sang for us "Poor Cock Robin" and "The Letter Song," acting the stories while they sang, as children do in our kindergartens. Each little one, on entering the room, kissed the hand of the teacher, and then raised it a moment to her own forehead in the pretty Syrian fashion; they greeted us in the same way.

Two little girls, Anesa and Sophia, who could speak English, offered to walk with us. They first took us to the orange and lemon groves, which are considered among the finest in the world, and where some of the fruit grows to an enormous size. The owner bade us walk on his land where we liked, and to help ourselves from the boughs and ground, just as at home one might do in an apple-orchard. The air was heavy with the delicious fragrance of orange blossoms, and we could pick ripe fruit and flowers from the same tree. After we had tasted many varieties and eaten all we wished, our host asked us to hold the upper skirts of our dresses while he filled them with luscious, golden fruit to carry away, since we had no baskets.

Anesa and Sophia led us along the seashore, where the air was cool and refreshing, and we hunted for shells in the sand. They showed us some very tiny pink ones, hardly larger than a pin's head, which would have escaped our attention, if not pointed out. On the water's edge we saw now and then jelly fish of a beautiful blue color, called "the light of the sea;" but when we picked up one the little girls bade us throw it away, saying it was poisonous, and would injure our eyes if we touched them after handling it.

A Syrian woman was sitting on the beach with half a dozen little children about her. I stopped a moment to speak to the youngest, a baby just old enough to sit alone and play with the sand, which it allowed to slip through its fingers in a feeble way.

"You have a pretty baby," I said to the woman.

"Yes," she replied; "don't you wish to buy it?"

I inquired the price, and she named a sum in liras, the coin of the country, about equal to forty-five dollars. When we returned to the school and I told the ladies of this offer, they said no doubt the woman would have parted with the child had I paid the price, and that she had asked an unusually large amount for it.

We were shown a house by the sea-side where they said once lived Simon the Tanner, where the Apostle Peter lodged when he saw the vision of the vessel descending from heaven, wherein were all manner of beasts and creeping things and fowls, and where the messengers of Cornelius the centurion found him.

On the top is a little observatory or lighthouse. Entering by a curious doorway, we climbed an old narrow staircase, and found within a small Mohammedan chapel.

It is only thirty-four miles from Jaffa to Jerusalem. We made the journey in one day, by starting at six o'clock in the morning. Palestine has no other carriage road, and even this is not in good repair. Two English ladies from Miss Arnott's Mission School, went with us, and we had a lunch for four stowed away in our carriage box. Along this road the wood for Solomon's temple was brought, having been cut on the mountains of Lebanon and sent to Jaffa by sea.

Our way at first was bordered by cactus hedges and lemon and orange orchards. Now and then we saw a primitive water-wheel. We passed the ancient site of Lydda, where Eneas was cured by the Apostle Peter, and where the disciples came for him to go to Jaffa, upon the death of Dorcas. Then we crossed the plains of Sharon to Ramleh and wandered for half an hour among the ruins of an extensive mosque, tracing its outer walls and going down into its subterranean vaults. In the midst rose an old tower, still firm enough for us to ascend. From its top we looked across the entire plain, from the sea to the mountains of Judea. Palestine is usually a colorless country, but we saw it in the early spring, when the grass was of vivid green and the wild flowers were in full bloom. Fields of golden buttercups, groups of white anemones, masses of scarlet poppies, and roses of Sharon varying in hue but

commonly purpleish pink, glistened with dew in the April sunlight. The trees were olives, sage-green in color. Several small towns and a few round watch-towers, all built on slight elevations, were scattered over the plain.

At mid-day we spread our lunch on a rock under a fig-tree, at the narrow entrance to a valley. This spot is called Báb-el-Wády, or Gate of the Valley.

In the afternoon we drove along the side of the Valley of Ajalon, in which Joshua commanded the moon to stand still, after his conquest of the five kings. Soon we began to ascend the mountains of Judea. We saw in the distance the traditional birth-place of John the Baptist, and passed a hill on which lies the town of Kolonieh, supposed by many to be the ancient Emmans, though others claim that this was further from Jerusalem, where now is the modern village of Kubelah.

The last of our way among the Judean Hills was very rough and steep, reminding us in its general character of some of the stony places of New England. The mountains of Moab were in sight and the mountains round about Jerusalem. The sun set and the moon rose. On the last hill-top before the sacred city we stopped and looked down upon its tessellated walls and towers, lying white and still in the moonlight. There is a large settlement outside of the walls. As we approached this, the lights gleamed from the houses, and we heard the sounds of active life. No carriages ever enter the narrow streets of Jerusalem; we left ours at the Jaffa Gate and went into the city on foot.

We walked towards a modest sign over a gateway, "The Mediterranean Hotel." This is the usual resort of tourists, and we found every room occupied. We arranged to take our meals there, however, and were assigned apartments in a spacious building close by, called the Bishop's Palace, of which we were the sole occupants. From our window we looked out upon David's Tower, a fine ruin still imposing, and, from our house-top, we saw, below, the Pool of Hezekiah, a rectangular sheet of water, two hundred and fifty feet long and one hundred and fifty feet wide, beyond which extended the flat roofs and domes of the city.

At the hotel every one spoke softly, for a young clergyman, who had come to visit Palestine, after taking holy orders in the Church of England, was dangerously ill with fever. He died in the night. The only relative with him was his brother, who was also a clergyman. On the following afternoon, we went to the little Protestant cemetery outside the city walls, where a few English and Americans were gathered together, full of sympathy for the sorrowing brother, while the stranger was laid to rest in a foreign land.

In the evening we saw the celebration of the Passover in a Jewish house. A father and two sons recited by turn from the Talmud, in droning voices, and at intervals passed around wine and unleavened bread.

The Jews are rapidly increasing in Jerusalem, chiefly through fresh accessions from Russia and Poland. In 1880 the Jewish residents numbered 5,000,

now there are 30,000. The Mohammedans, Christians, and Jews live, for the most part, in separate quarters of the city.

CORA AGNES BENNESON.

BARCLAY OF URY¹

It is difficult for us who live in a Republic where good manners, mental culture, and integrity of character command admission to the best society, to understand the great importance attached by the English people to rank and to title. It is so with very many of them, however unwilling they might be to confess it even to themselves. And yet, perhaps, this should not excite our surprise. For centuries this estimate of rank and of title has been transmitted from father to son. No biography of an Englishman has ever been written in which, if there existed any relationship, however remote, to "noble" blood, this fact has not been carefully noted. Nor are rank and title without their seeming value. So sharply defined are the lines which socially separate royalty from nobility, and nobility from gentry, that whatever may be the wealth or the local influence of the latter, their usefulness as citizens, and their real worth of character, unless they have held some high office under government they must, in many instances, yield precedence to others, who may be, in every other way their inferiors, but who have this potent charm of knighthood or of nobility.

If such a state of things exists now that democratic principles are supposed to have made such growth in England as well as in America, what must have been the value attached to rank, title, and family influence two centuries ago? With a king restored to the throne, a court crowded with flatterers eager to destroy all traces of the simplicity of the Commonwealth, preferment eagerly sought; what courage—far more than human—must it have required to forego the advantages which social position, the favor of the court and alliance with distinguished families then gave. And yet this is just what, in the early history of the Religious Society of Friends many of its members did without hesitation, and apparently without regret.

Among these early Friends were men who had been officers of the army, clergymen of the Established Church, favorite preachers who renounced their pulpits and gave up "their living." There were men of culture, like Isaac Penington and Thomas Story, the latter of whom writes in his journal, that he was brought up as a gentleman and was skilled with the sword, with firearms, and other manly accomplishments. In Wales, many of those who became Friends belonged to families tracing their ancestry back to the ancient Welsh princes, and had been taught, almost from their cradle, as all such Welshmen are, to pride themselves on their birth and lineage. In Scotland, the Baron of Swintoun, and the Provost of Aberdeen, Andrew Jaffray, were men of mark and influence. The son of Sir William and Lady Margaret Penn, the prospective Viscount Weymouth, and the daughter of Sir William and Lady Mary Springett, had an enviable social posi-

¹ By James J. Leveck, M. D. From *The Friend*, Philadelphia.

tion, while even gentle Thomas Ellwood was not without the advantages of birth and noble connections, as he tells in his quaint autobiography: "My mother was nearly related to the wife of Lord Wenman of Thame Park." For him Ellwood was named, and he had stood as his sponsor at the font. "I think," he adds, "I should have received from this lord some advantageous preferment in this world, as soon as he found me capable . . . had I not in a little time after been called into the service of the best and highest Lord, and thereby lost the favor of all my friends and relatives." That this loss occasioned him no lasting regret, is told in the next paragraph where he speaks of it as "a most happy change."

But that this renunciation of the world, with the social sacrifices it involved, required a more than human strength to bear, there can be no doubt. We do not now fully measure it. Seen through the mists of two centuries the picture is dim, the reality obscured. Or, as sometimes happens, the very love and reverence we have for these early Friends casts a glamor about their sufferings which makes them seem light or unreal. We read of months or of years of imprisonment, but we fail utterly to comprehend what this means. It is only when we bring home to ourselves what for ourselves or for those we love, months and years of imprisonment would mean, that we begin to understand the terrible meaning it had for them. They were human, as we are; they had their strong home-ties, warm affections, social enjoyments, even, it may be, their social ambitions. Human nature, two centuries ago, was much what it is now, and humanly speaking, the sufferings which they endured were just as hard for them to bear as they would now be for us. This we should never forget; nor should we ever forget that as there was something more than human required, so, in great mercy, there was a strength more than human granted them.

Tried with cruel mockings and scourgings, with bonds and imprisonments, their faith in the immanence of the Holy Spirit, the companionship of Christ never failed them; and however much, as men and women, they suffered, they found in this faith a companionship which cheered them in the solitude of the dungeon, protected them in the cell of pestilence, saved them when the fire of persecution was at its height. They knew, as only such as they could know, the full meaning of the words of the Babylonian king—"Did we not cast three men, bound, into the midst of the fire, and lo, I see four, and the form of the fourth is like the Son of God."

My thoughts have been turned in this direction from having lately visited the home of two men, the descendants of an ancient and honorable family, themselves in every way worthy of such an ancestry, the one a brave soldier, the other a polished scholar; the one the owner and the other the heir to a noble estate, a house which the people of Aberdeen loved then, and love now to honor—David and Robert Barclay of Ury. And yet these two men in obedience, as they deemed it, to the call of duty, put in jeopardy social position, preferment in Church and

in State, all, indeed, that most men think of value in life.

And when, later in life, "time, which maketh all things even"—or rather He who rules in the affairs of nations and of individuals, had so wrought that much of what seemed forever lost to them was restored; it was not until they had known much loss of substance, personal insult, and long imprisonment.

I cannot, perhaps, better describe this visit than by quoting from a letter written in Eighth month last by me to my sisters: "The drive from Braemar, a favorite summer resort in these highlands, to Ballater, is a delightful one, through long avenues of trees, over an excellent road, and by the sparkling river Tay. Six miles brought us to Balmoral, the Queen's highland home, a pretty home-like palace in a most picturesque situation, commanding a fine view of the surrounding country, hills and all. On the high hills are great cairns or heaps of stones, memorials of the Queen's friends; one immense one is called the Albert memorial. As we approached the palace, the first conspicuous object we saw was a large marble cross to the memory of the Princess Alice, and then the palace, to which there is a beautiful drive through a long avenue of trees. Then the grave of the Queen's faithful John Brown was pointed out, and his home in his latter years. We left our coach at Ballater, and thence by rail to Aberdeen."

If you ask me what led me to Aberdeen, I shall tell you Whittier and the Barclays—or, to put it more correctly, the Barclays and Whittier. I wanted to walk—

"Up the street of Aberdeen,

By the kirk and college green,"

where that bravest of early Friends, who probably made greater social sacrifices for his faith than any other of them, had lived, suffered and died.

And so, just so soon as I had brushed away the dust of travel, I asked my kind and attentive host of the "Imperial" if there were "any Quakers in Aberdeen." He could not tell me of one: thought they were all dead; but his good wife brought her wits to bear upon my question, and at last put me in the way of finding their meeting-house and its care-taker. It was a plain, comfortable house, on a side street. From its care-taker I learned that meetings were regularly held there, that next day would be their Monthly Meeting, that with few exceptions most of their members lived out of the city. After this, I went to look for

"—the Tolbooth prison,

Where thro' iron grates he heard

Meek disciples of the Word

Preach of Christ arisen."

I had a hard time to find it, the great town hall having lately been built on the site of its main building, though the old tower of the prison is left. I had a letter to the Chief of the Police, which my landlord had given me, and he took much trouble to find an old, old, disused key, and then, in the darkness, we climbed up into the old tower. The iron grated windows are still there, and in these rooms, doubtless, the Friends had been imprisoned. We were be-

grimed with dust when we came down, but we had seen the Tolbooth.

Next day I went to the meeting-house, where were about twenty Friends, and the meeting was a silent one. The Friends were very kind, and after meeting two of them went with me to several places of interest: the University, the ancient meeting-house of Friends—now much decayed—and to the stone-yards where granite is polished. For this city of Aberdeen is built almost entirely of granite, and here the art of polishing this stone is brought to great perfection. Queen Street, though not equal in beauty to Prince's Street, Edinburgh, is yet a handsome street, with many imposing structures in it. But the universal use of granite gives the city rather a cold, sombre appearance. We passed by the old "kirk," which is a kirk no longer, and "the college green" is now an enclosure with but little that is green in it.

After I had parted from my kind friends, I took the train to Stonehaven, the station nearest Urie or Ury, as it is indifferently written. There was no difficulty whatever in learning where Ury was. It is as familiar to the people of Aberdeen now as it was two centuries ago. Indeed it is one of those great houses in which they take much pride. I took up the morning paper, and almost the first paragraph I saw was, "Floral fair at Stonehaven," at which the laird of Ury had made some pleasing remarks, which were reported in full. But the laird of Ury is no longer a Barclay, but a gentleman of wealth, having large interests in iron and coal, by name Baird. The ride to Stonehaven is a beautiful one. It is alongside the sea-coast and so far as the eye can see is the Great German Ocean, while the rocky coast is indented with little bays which give shelter to boats and are a pretty feature in the scenery. Fancy a railway along the cliffs at Newport and you have some idea of this. I could but think how, in their young days at least, the Barclays must have enjoyed this grand old ocean. Ury is about two miles or less from Stonehaven. There was a livery stable close by the station, and I tried to get "a trap," but in vain—every one was out or engaged. This was most disappointing; to be so near and yet so far, was indeed tantalizing. There was an omnibus from one of the hotels in Stonehaven, which is some distance from the station, and in the opposite direction from Ury, and I hired it. I know the driver took advantage of my necessities, but I could not be penny wise and pound foolish, and so, mounted on top of this empty 'bus at a good pace, we started off for Ury. It was a beautiful, bright, sunny morning—one of the very few which the British people had during the past summer. Driving by a high stone wall, we soon reached the lodge, and were admitted without hesitation to the park. And here began a series of surprises. We entered by a handsome gateway into a magnificent park, through which we drove, as it seemed to me, for nearly two miles. To my great surprise, I found the hall of Ury to be not merely a handsome country house but almost palatial in its character, at least much more like a palace than anything I had seen in Scotland, excepting Balmoral.

I drove up to the door of this palace, seated on top of the 'bus, then rang the bell and sent in my card. The house seemed full of guests, and I own I was a little nervous while I waited in the library. Presently a gentleman came in who gave me his name and excused the laird of Ury, who was entertaining his friends at luncheon. I told him I was a Philadelphian, a Friend, and much interested in David and Robert Barclay. He was very kind and polite; told me that the Hall was modern, and though he kindly offered to show me through the house, because it was modern,¹ I declined. "But," said he, "you must see the grave of Robert Barclay, the Apologist," and so, calling a lad who was passing by, he gave him the key of the little house which has been built over the graves of the Barclays.

My coachman had galloped back to the station with his 'bus, and there was nothing to do but to go on foot, which with my young guide, I did. It was a long, long, walk, through the park. We passed by the dove cotes, the kennels, even a bear house, with a bear in it, by pretty tenant houses, and other appointments of a grand estate. Then we had to climb a fence and walk a long distance through the fields before we reached the top of a high hill on which is built this house of the dead.² The sun had now become very hot; I had to hurry for fear of being too late for my returning train, and was really almost exhausted when, at last, I reached the summit of the hill.

In an enclosure of considerable extent is a house, looking not unlike a Wesleyan chapel. The lad unlocked the door and I entered the room, which, with its earth floor and stone walls, looked very bare and unattractive. The first half of the house is used as a place of burial for the family of Baird; then an inner door was opened, and I stood by the graves of David and of Robert Barclay. It is not a pleasant looking place; the floor is of earth and levelled. There are memorials telling of the antiquity of the house of Matthers and of Ury; but in the wall are two very plain and simple tablets which interested me much more. The inscriptions on these read thus:

"The grave of Colonel David Barclay of Urie, son and heir of David Barclay of Matthers, and Elizabeth, daughter of Livingston of Dunsbary. He was born Anno 1610, bought the Barony of Urie 1648. Having Religiously abdicated the world, he joined in 1666 the Quakers, and died 12th of October, 1686."

Close by this another tablet reads:—

"The grave of Robert Barclay of Urie. Author of the Apologie for the Quakers, son and heir of Colonel David Barclay of Urie, and Katherin, the daughter of the first Sir Robert Gordon. He was born Dec. 23: 1648, and died October 3: 1690. Also

¹It is nearly forty years since Ury ceased to belong to the family of Barclay. An engraving of the old hall and meeting-house, by Wm Miller of Edinburgh, is still extant, and it is said that these were taken down A. D. 1855.

²On the 12th of the month called October, 1686, David Barclay's body was borne to a new burial place, selected as such by himself, situated on a rising eminence, near a mile to the north-west of his house.—*John Barclay, in Journal of Alex. Jaffray.*

his wife Christian, daughter of Gilbert Molleson, merchant in Aberdeen. She was born Anno 1647, and died Feb. 14, 1723."

The hill commands a view of highly cultivated country, and in the distance were glimpses of the great North Sea. I had to hurry back, through the magnificent park, to the station, but I had seen where had lived and had died two of the bravest and noblest of the early Friends.

SCRIPTURE LESSON, No. 2.

FIRST MONTH 13, 1859.

A SABBATH IN THE LIFE OF JESUS.

GOLDEN TEXT.—"And he entered, as his custom was, into the synagogue on the Sabbath day"—Luke 4:16.

READ Mark 1: 21-31.

OUR lesson passes over several important incidents in the life of Jesus that are related by the other Evangelists. The "Temptation in the Wilderness" after his baptism, preceded his going with the four disciples whom he had called into service, to Capernaum, a city of Galilee, on the northwest shore of the sea of Galilee.

On the Sabbath day, etc. All over the land of Judea, the Sabbath was observed, and houses were built in which religious services were held; these were plain edifices, not unlike our meeting-houses. In any place where ten men would pledge themselves to keep up the services, these houses, or synagogues as they were called, were built. As readers were appointed to read or expound the law and the prophets, it is believed that Jesus had become known to the people in that capacity long before his more public appearance in the ministry. After the reading of the law, the elder or ruler in charge invited any who desired to address the audience, to do so, and we find that Jesus frequently availed himself of the privilege, and although not of the priestly order, he spoke as one "having authority."

An unclean spirit. It was the power of Jesus over the unclean spirits that so profoundly impressed the people with his authority. A belief in demons and spirits of evil, that took possession of men, and unfitted them for the society of others, was current in the time of Jesus, and has continued to be held by a large proportion of the human family down to the present. There were many bodily afflictions that, for want of a knowledge of the organs of the human frame, and the wonderful net-work of nerves and arteries which give it force and vitality, were believed to be the results of demoniac power. As we become better acquainted with the laws of being, and the adaptations of life to its surroundings and know more of the phenomena of nature, we shall see that these beliefs were in harmony with the low state of knowledge that then prevailed, and realize how great was the spiritual power that Jesus must have been endowed with, and how clear his insight into the motives and action of those over whom his healing power was exercised.

He never lost the opportunity to benefit those who gathered about him, whether it was to help them by his counsel, to lead purer and happier lives, or as a good physician to minister to the afflictions

and diseases to which they were subjected. In whatever light we regard the numerous cases recorded of his power over the various "ills that flesh is heir to," we must see that himself was the most stupendous miracle of all. It has taken the best minds of these centuries that we call the Christian era to unfold in its beautiful harmony the life and character of this divine man, and we are only now beginning to discover its true place in and its meaning to the whole human family.

There was a great contrast between Jesus and the Scribes; they dwelt upon the outward ceremonies of the Sabbath, he on the greater matters of justice, mercy, and faith that go home to the heart to quicken and to help; he taught men to love the good and flee from the evil.

From the earliest times the Sabbath was set apart as a day not to be employed in secular business. The seventh day of the week among the Jews was dedicated to the entire cessation of labor; and whether it was instituted by Moses or of Ante-Mosaic origin is a controverted point. An intentional violation of the Sabbath was at first punished by death, but lately the laws respecting it were greatly extended by the Jews.

Stated meetings for religious worship seem now to have been connected with the Sabbath until the time after the exile of the Jews. Jesus reproached the Pharisees for the stress they laid on a mere external strictness in observing the Sabbath, without a corresponding purity of life. While we believe that all days are alike good, it does seem essential to our intellectual and physical, as to our moral and spiritual natures, that we spend one day in seven in cheerful resting from secular employments and recreation, and devote a portion to attending meetings for Divine worship, and not to neglect works of necessity or mercy. Any work that will advance the cause of truth and righteousness in the world is lawful and desirable, for Jesus says it is lawful "to do good on the Sabbath day." The growing tendency to disregard the Sabbath in many parts of this country is much to be regretted, as such a course cannot fail to lower the moral standard of any people, and weaken us as a nation! Then the lesson is plain, it should be a day of rest, a true Sabbath of the soul.

Some things in the life of Jesus are not told in all the four gospels; but the preaching of John the Baptist is so closely connected with that of the Master that it is given considerable prominence by them all. Long before had the prophet Isaiah spoken through God's power of "the voice of him that crieth in the wilderness, Prepare ye the way of the Lord, make straight in the desert a pathway for our God," Isaiah had also prophesied in many beautiful ways of the future coming of Christ in the form of a king who should be a saviour to his oppressed and enslaved people. He was to free them, to bring them good tidings, to open the eyes of the blind, and many other things, all of which Jesus of Nazareth truly and lovingly fulfilled, though often only in a spiritual sense. His kingdom was to be the kingdom of God. But in spite of all these fulfillments, great

numbers of the Jews did not accept him as the Messiah whom they expected, since he did not appear in earthly pomp and power. Some, however, waited hopefully, and when John appeared declaring the Word of God, they sent to ask him if he were the Christ. He replied that he was not; that he was come to prepare the way for Christ's acceptance, according to ancient prophecy, to prepare a path in the wilderness for the coming king whose shoe latchet he was not worthy to stoop and unloose. John preached and baptized in the wilderness, which is barren, stony, uncultivated ground. Brambles and briars grow there, and an easy pathway was not readily found. But he spoke of the wilderness of the Jews' hearts, into which the spirit of good could not easily pass because of the brambles and stoniness of their self-righteousness and pride, which obstructed its progress. He had come to do what he could to clear these away, by preaching repentance and forgiveness of sins, and all who heard him willingly were prepared to receive the Christ when he should appear.

PROFITING BY THE PAST.

How shall our past experience be made of value in the future of our lives, is a question that must often force upon us serious thoughts of life, its opportunities, its disappointments, and its failures.

Of very few, perhaps of none, can it be said "they have nothing to regret." Some word spoken thoughtlessly or in haste, has left a mark that time fails to obliterate. Some seed of bitterness has fallen in the rich garden of the affections that we find it hard to uproot. Thought and word and action all have their part in this complex life of ours, and that we do not profit more by our failures is due rather to the difficulty of setting a just estimate upon the consequences resulting therefrom than from any real intention of deceiving ourselves or others.

How often we find ourselves thinking, possibly saying, of some action of another, "I could not have done it," while at the same time something in our own conduct is passing under adverse criticism of which we are entirely unconscious. Very many of us in the little things that enter so largely into social intercourse are constantly liable to harsh and illiberal judgment. Often in the home, less care is given to these small matters than the details of social and domestic life at their best demand. There

are courtesies and amenities that have their root in the affections, and must spring up and grow in the genial atmosphere of a well-ordered home, to be all to us that they are capable of; and they have much to do with the estimate in which we are held by those with whom we have intercourse; if our early training has been deficient a loss is sustained that we find it hard to retrieve in mature life.

Everyone owes it to every other one with whom he associates, to present only that phase of his inner life, which will reflect the best that is in him; we gain nothing by obtruding upon others the angles and corners that make our own happiness incomplete; that which is best in ourselves will touch and thrill the best in him to whom it is offered.

Many of our most sorrowful experiences come from a failure to appreciate the value of "a word fitly spoken,"—or the importance of a generous deed when it is in our power to render such kindness; we say "if I had only thought," yes, it is for want of a thoughtful regard for the feelings or the needs of others, that we lose so many opportunities of being twice blessed.

While there is need of constant watchfulness that we offend not in *the word or the deed*, the better way for us all is to cultivate those fruits of the Spirit that make for peace, and let the spontaneity of action,—the overflow of the heart,—bear testimony to that condition of soul which "thinketh no evil." With this as the rule of life we shall find, as we pass the mile-stones of our journey, and look back over the road along which we have traveled, that there has been much to make the heart glad,—bright spots have opened where we least expected to find them; and as we have eased ever so little, the load, or made less heavy the burthen of a fellow traveler, we have had our compensation in the remembrance that another toiler along the world's great highway has found the road less rugged for our endeavor. To make the best use of our experiences we must examine our motives, and try ourselves by the standard of impartial judgment to which the final appeal must be made. And even then it is not always certain that we see the wrong in its wrongfulness since he who is in the wrong, is usually so from some deficiency in self-government or in moral perception, rather than from any wilful intention. This is a phase of the human mind that is not sufficiently taken into account when we judge of motives; but after all the adjustments in society by which each eventually finds "his own place," decides for us, better than we can for ourselves, however much we may dissent from the judgment.

It is but human to make mistakes,—to err in our estimates of persons and things may lose us valuable

friendships and golden opportunities, but our failures may be our best lessons if we examine carefully the ground of our defeat, and let our experience have due weight in deciding for the future.

A NEW BEGINNING.

NOTWITHSTANDING the conviction that every day is a new beginning, and that every night we should settle our accounts with the past hours, there is still an inspiring halo around the period that ushers in the New Year. And it is well to have such a distinctive point from which to date our new hopes and to send up our supplications for help in the coming months; our petitions for strength to grow nearer the high ideal which we should all hold in our hearts; something that may serve as a spur to us to renew our aspirations after the good and true; a convenient season when we can resolutely turn our backs upon the "hindering things," remembering them only to avoid them in the future time.

Recalling the past year with its anxieties and excitement, we have cause for deep thankfulness that there has been so much of good will, and so little of the spirit of bitterness and sectional strife that have in former times characterized such periods. True, we regret that the gain in national righteousness has not been greater, but let us hold fast to the faith that if the growth be slow it is more likely to be permanent.

In the realm of religion there are constant signs of greater toleration and a broader charity everywhere. A contemporary journal writing on this subject says:

"Men's creeds are not so different as they appear on the surface. In thoughtful men of all churches and all parties one finds the same ideas at work. One idea advancing everywhere is that Christian fellowship is not to be limited by theological agreement. Another steadily advancing thought is the recognition, throughout the universe of order, unity, harmony of administration. . . . On the part of scientific thinkers, there is a growing impression that the unvarying order of the world means something more than a mechanical order; that back of physical phenomena lies some higher power,—whether to be regarded only with reverent awe, as the agnostic thinks, or with filial trust and aspiration. These leading lines of thought do not meet, but they converge." That after all the misunderstandings, the same principles are at work, the same gospel underneath, "the same call to manly living, the same trust and aspiration toward God, and essentially the same recognition of Christ's leadership." This of itself is encouragement to move forward into a New Year with a hope that the Spiritual

life of the future will deepen, and the moral life will strengthen, lifting the physical and material to as time advances "the new cycle will not shame the old."

FRIENDS in different parts of the country who have interested themselves in past years for the circulation of the INTELLIGENCER AND JOURNAL continue to show their kindly feeling in that direction, and a good number of subscriptions are already renewed for 1889. Among them are a fair proportion of new names, to take the places of the old patrons who year by year are removed by death, and to give the list a further increase in its proportions. We think the paper was never more interesting than now, and perhaps never more available for good uses. The matter which we print from week to week is, we think, of real value to those who are interested in the Society of Friends and its principles.

MARRIAGES.

MOON—BALLINGER.—Twelfth month 20th, 1888, under the care of Alexandria Monthly Meeting, Va., John Moon, son of Henry B. and Martha D. Moon, and Caroline Ballinger, daughter of John and Rebecca Ballinger, all of Fairfax county, Virginia.

TRUMAN—SCRANTON.—On Fourth-day, Twelfth month 26th, 1888, under the care of the Monthly Meeting of Friends of Philadelphia, Howard J. Truman, son of Dr. James and the late Mary A. Truman, and Elizabeth Garrigues, daughter of Frederick and Mary M. Scranton, all of Philadelphia.

DEATHS.

MATHER.—In Philadelphia, Twelfth month 27th, 1888 Lydia T. Mather, of Tenlyu, Montgomery county, Pa.; a member of Gwynedd Monthly Meeting. (Interment at Gwynedd Friends' ground.)

PEIRCE.—Twelfth month 26th, 1888, at Brandywine Summit, Delaware county, Pa., Thomas J. Peirce.

PETTIT.—At the residence of his brother, Jonathan Pettit, Moorestown, N. J., Twelfth month 25th, 1888, Lewis Pettit, in his 70th year.

RUSSELL.—On Twelfth month 31st, 1888, at his residence near New Market, Frederick county, Maryland, Joshua Russell, in the 95th year of his age, a member of Pipe Creek Monthly and Bush Creek Preparative Meetings.

SMEDLEY.—On Twelfth month 15th, 1888, Emmor Smedley; a member of Little Britain Meeting, Lancaster county, Penna., in the 72d year of his age.

After passing through the very depths of adversity, he was for months a patient sufferer from a cancer on his neck, which finally terminated his life. Throughout all he manifested a true Christian spirit and not a murmur escaped his lips.
L. K. B.

WILLIAMS.—Twelfth month 24th, 1888, Hannah C. Williams, in her 65th year. Interment from Rancocas Meeting-house, N. J.

WOOLMAN.—At the residence of her son-in-law, John W. Stokes, near Medford, N. J., Twelfth month 25th, 1888, Rachel E. Woolman, in her 82d year. Interment at Rancocas, N. J.

MARY T. HOLLOWELL.

In memory of Mary T. Hollowell who departed this life First month 23d, 1888, at the residence of her daughter, Martha H. Lindley, after a lingering sickness of one hundred and twenty days, in her 81st year; a member of Blue River Executive meeting of Friends.

She was born in North Carolina, in 1807, and with her parents removed to Washington county, Indiana, and settled near Blue River, in 1815. Her suffering was intense most of the time during her sickness. Yet she seemed to be led beside the "still waters" of life, for she was never heard to murmur at her lot. She often said, "When it is the Lord's will I am ready to be called home." She expressed her confidence in God by such Scripture texts as: "The Lord is my shepherd, I shall not want," "Yea, though I walk through the valley of the shadow of death, I will fear no evil for thou art with me, Thy rod and thy staff they comfort me." And many times she repeated the whole of this beautiful psalm.

As she sat in our midst toward the close of her life, we felt her power for good in our little meeting, for she came in that spirit of devotion to the Master which is requisite in order to receive the baptism into oneness with Him.

She loved little children, and drawn by that love, her grandchildren gathered reverently around the coffin to take leave of the earthly form of one who had been a dear companion to them in childhood's days. Interment at Blue River burial ground, First month 24th, 1888.

S. H.

EDWARD MERRITT.

I have been interested in reading the tributes of others to this Friend and I will offer a few words in addition, however feeble they may appear. It was my privilege to be present at the funeral services, where much testimony was borne to his many Christian virtues, which were all true. His parents, Daniel and Martha A. Merritt, were both estimable members and elders of our Society; both of staid and sound mind, who could not instill into the minds of their children anything approaching the weak and frivolous natures. The subject of this article was one zealous of good works, fond of disseminating Friends' books, and visitings, and on all proper occasions would willingly exchange views with others not of our fold, to the advantage of our Society, and to their own edification. A beautiful trait in his character was when strangers came amongst us he was the first to approach them, and in the social circle where any were not much noticed he would single them out and especially interest them—noble trait, a portion of which was inherent and intuitive. Of his interesting family only one sister remains, still occupying the lovely home of her cherished parents, now left nearly alone to bear the loss of a beloved brother. A devoted wife and two children survive him, one the wife of a missionary in a far Eastern city. The parting with this loved daughter is thought to have been the first breaking of his hitherto well balanced mind.

As we viewed the remains the quiet placid expression suggested the thought, "Mourn not for me, I am resting, but mourn rather for yourselves and your children." "Blessed are they who die in the Lord, yea, saith the Spirit, they rest from their labors and their works do follow them."

Plainfield, N. J.

The good things of life are not to be had singly, but come to us with a mixture, like a school-boy's holiday, with a task affixed to the tail of it.—Charles Lamb

THE CONDITION OF DUBLIN YEARLY MEETING.

[A contributor, "I." in the *British Friend* (Glasgow and London), for Twelfth month, under the title "Twenty Years of Our Life," gives some interesting details concerning the Yearly Meeting of Dublin. We give most of it below.—Eds.]

I HAVE been looking over the statistical returns of Dublin Yearly Meeting for the past 20 years, believing that the narratives of two decades should give a pretty correct statement of our actual condition, and I am sorry to find these figures reveal a continued tendency towards extinction, and they suggest that the above heading should be 20 years of *death* instead of *life*.

During the period under review our numbers have been reduced by "Removals out" exceeding "Removals into" 230, and by "deaths" exceeding "births" 153, making a loss from these two sources of 383 members. This, however, is reduced by "Admissions" exceeding "Disownments, Resignations, and Practically Withdrawn" 95, which results in a net annual loss of 14 members.

Removals are perhaps less under our control than any of the other items which affect our numbers, and I fear the adverse balance of 230, equal to 11½ annually, cannot be much reduced so long as Ireland is a poor country. I shall, therefore, pass on to births and deaths.

Our death-rate compares favorably with that of the general population of our island, yet it is in excess of our birth-rate 7½ annually. Our marriages, "according to rule" and "not according to rule," bear a higher proportion to our members and non-members than the marriages of Ireland do to the entire population, but the number of births to each marriage is barely one-half what it is for the whole country.

Admissions, also disownments, etc., are the next items claiming our attention—the former exceed the latter by 5 annually. It is, however, some satisfaction that the balance is on the right side. Probably these items are more amenable to the arrangements we make from time to time than are any of those already referred to, and they offer a wider field for the exercise of our Christian efforts. Admissions, also disownments, etc., are largely dependent upon the teaching we supply to those who come within our reach. The aim of that teaching should be retention of our present members, and enrolment as members of our non-members.

Our average annual official teaching power consists of 35 ministers, 81 elders, and 119 overseers, making a total of 235. Our average numbers are 2,883, less the 235 teachers, say 2,648 members and 754 non-members. Total 3,402 for the 235 teachers; or 14½ to each. This enumeration does not take into account that portion of the 80 "who speak in meetings," but not in any official position, nor those engaged in any approved Christian work, and not included in the above; nor the humble efforts of parents. Under this arrangement there are annually 35 non-members fitted for and admitted into membership, while there are 30 members lost (including

those practically withdrawn), giving the Yearly Meeting a net increase of five members each year as the result of the labor of all these teachers. And in connection with this, it is well for us to remember how often it is said of our older and younger members that many of them know so little of our distinguishing views. This cannot be considered a success, and should lead us to examine closely our various organizations with the view of finding out the cause of the defect, and boldly applying the remedy which appears needful.

In our honest searching we must not hastily say our teachers are the cause of such a failure; they did not apply for their present appointments, but after a time of probation we considered them to be qualified by the Great Teacher, and in open meetings we installed them. We must look beyond the teachers to the conditions under which they have to perform their duties if we are to discover the weak links. Ministers, numbering 35, are rightly regarded as our principal teachers; they were brought up amongst us; took part in the ordinary work of the Society, and, while under these circumstances, received their "gift" in the ministry. In due time they were "recorded," and then assigned particular seats in meetings, and now our written and oral advices tell them they are not expected to take so general a part in the working of our Church as they were accustomed to in the past. The meetings of ministers and elders embrace about one-half our appointed teachers; their duties are the care of the ministry and the shepherding of the flock. This work is of vital importance to our well-being, yet we tell the members that they need not report to the Church till the Yearly Meeting takes place, although they are to report to themselves in Monthly, Quarterly, and Yearly Meeting capacities. Overseers, who compose the other half of our official teachers, are not requested, nor even encouraged, to report on the trust we have committed to them, so that neither at our Monthly, Quarterly, nor Yearly Meetings do we know what they as a body have done. Is it any wonder that the result of the working of such an organization should be the annual increase of only five members to our Yearly Meeting? and need I apologize if I offer suggestions differing somewhat from the course of things which has prevailed so long amongst us?

Instead of the present arrangement developing the active Christian life of our teachers, and bringing them into closer sympathy with the Church at large, it produces an opposite effect, and reacts upon the unofficial portion, so that, wrongly or rightly, the latter have not in the former the confiding spirit that ought to prevail. In addition to this, the Church is burdened by the number of official meetings that ought to be held. There should be meetings of "Ministers and Elders" in Monthly, Quarterly, and Yearly capacities; of "Oversight," Quarterly; while overseers are recommended to have frequent meetings. Surely the time has come to reduce the number materially, and concentrate our energies on a few and work them thoroughly.

It has been long felt, both inside and outside the Meeting of Ministers and Elders, that it is not in

touch with the Church at large, and efforts have been made at various times to remedy the evil. We have encouraged that body to invite to some of its meetings overseers—"those who speak in meetings," and "those who take part in approved Christian work"—but we know there is reluctance in some places to give the invitation and in others to respond to it, so that it is unwise to look in that direction any longer for a solution of our difficulty. I would, therefore, venture to make the following few suggestions, which should, I think, in a great measure meet the necessities of the case.

We still need a body to have oversight of the ministry and of the conduct of our members and non-members, but instead of this being attended to by meetings of "ministers and elders, oversight, and overseers" as at present, I propose these three bodies cease, and that the duties be performed by a thoroughly representative body approved by the quarterly meeting, reports to be made to Monthly, Quarterly, and Yearly Meetings. Some members of this oversight body should sit in front of each meeting, as far as possible.

I also propose that we discontinue the present mode of "recording" ministers, but consider every member who is engaged in any approved Christian work as a minister or teacher; that a special meeting be held quarterly to consider approved Christian work; that all connected with such work be members in common of such meetings, and that reports be sent to Monthly, Quarterly, and Yearly Meetings.

Teachers who believe they are called by their Heavenly Master to work for a time outside their own Monthly Meeting, whether to preach the Gospel in general or some points of it in particular—such as peace and temperance—would lay the matter before the Monthly Meeting as ministers do now, and if they receive the approval of the meeting, would be liberated and their needful expenses paid.

MEETING AT THE COLORED HOME.

EDITORS INTELLIGENCER AND JOURNAL:

At the meeting at the Home for Aged and Destitute Colored People, on the 30th ult., a number of Friends and others were present. Arthur Middleton made some appropriate remarks, reminding his hearers of the nearness of the close of the year, and the necessity of making new resolves, at the beginning of the new year, which is so near at hand. After some other remarks which did not meet the witness for truth in the minds of many, Samuel S. Ash, in a very clear manner, showed the love and unity which should reign in the hearts of all, thus doing away with all intolerance. I think persons in addressing a promiscuous company, possibly of all denominations, should avoid any thing like controversy. But the Christ-like words of one brother, S. S. A., were like oil upon the troubled waters; and the feeling seemed to subside, as though Jesus had indeed been among us with his "Peace, be still." C. A. K.

With regard to manner, be careful to speak in a soft, tender, kind, and loving way. Even when you have occasion to rebuke, be careful to do it with manifest kindness. The effect will be incalculably better.—*Ballou.*

DECEASED AT 102.

THE Baltimore *Sun* of 12th mo. 24 has the following: Miss Rebecca Russell died on the 21st inst. at the home of Mrs. Henry Stabler, at Brighton, Montgomery county, aged 102 years. She had displayed no signs of illness, but was found dying in her room by one of the household, and breathed her last a few minutes afterward. Miss Russell was a relative of the well-known Levering family of Philadelphia, and came to Maryland fifty years ago with the late Mrs. Thomas Lee, who was her intimate friend and companion. After the death of Mrs. Lee at her home in Sandy Spring, Md., Miss Russell made her home with the daughter of Mrs. Lee, Mrs. Henry Stabler, where she lived until her death. Miss Russell was a member of the Society of Friends and attended the Meeting-House in Sandy Spring whenever the opportunity offered. She was known throughout Montgomery county. Not a wrinkle lined her brow, and she did not appear to be over 65 years old. She was a woman of fine intelligence, and possessed her activity of mind and retentive memory until her death. About a year ago her sight failed, which prevented her from indulging in her taste for reading. She was able, though, to go about the house without any assistance. She lived a quiet, unobtrusive, estimable life at the home of Mrs. Stabler, and was beloved by the young people for her bright disposition. On her hundredth birthday she received numerous callers, who congratulated her on her remarkable health.

SOMETIME, SOMEWHERE.

UNANSWERED yet? the prayer your lips have pleaded
In agony of heart these many years?
Does faith begin to fail? Is hope departing?
And think you all in vain those falling tears?
Say not the Father hath not heard your prayer;
You shall have your desire sometime, somewhere.

Unanswered yet? though when you first presented
This one petition at the Father's throne,
It seemed you could not wait the time of asking,
So urgent was your heart to make it known;
Though years have passed since then, do not despair;
The Lord will answer you sometime, somewhere.

Unanswered yet? nay, do not say ungranted—
Perhaps your part is not yet wholly done;
The work began when your first prayer was uttered,
And God will finish what he has begun;
If you will keep the incense burning there,
His glory you shall see, sometime, somewhere.

Unanswered yet? Faith cannot be unanswered;
Her feet are firmly planted on the rock;
Amid the wildest storms she stands undaunted;
Nor quails before the loudest thunder shock.
She knows Omnipotence has heard her prayer,
And cries, "It shall be done," sometime, somewhere.

—Robert Browning.

"DAY BY DAY."

DAY by day for every sorrow,
Day by day for every need;
Take no thought for each to-morrow,
God doth e'en the sparrows feed.

Day by day our bread He giveth,
Day by day our strength supplies,
And the same He ever liveth,
Watching o'er us from the skies.

Day by day for every pleasure,
Look not for the coming rain;
Love it was that gave the treasure,
Love that takes it back again.

Day by day for every duty,
Think not of to-morrow's task;
He will crown each work with beauty
If His aid we only ask.

Child of God, be this the token
Of thy love, that day by day
Thou wilt trust His faith unbroken,
For the promise still is yea.

Child of God be this thy glory,
Thus to trust him all the way,
And when ends thine earthly story
He himself will be thy day.

—Selected.

WILLIAM PENN'S PREACHING IN THE HOTEL YARD AT WELLS.

[Elizabeth Robins Pennell, of Philadelphia, (now resident in England), sends to *Harper's Basar* an article relating to the old Crown Inn, at Wells, and William Penn preaching there.]

In the guide-book of Wells one of the most prominent names is that of Bishop Beckington. Like many other Churchmen of his day, he was even greater as a builder than as a bishop. It was he who built the market-place, pretty still, though the turreted, statted gateways leading into Palace and Cathedral are defaced with large plate-glass windows, and only one of the houses has kept its gables and projecting stories, its diamond panes and carvings. Fortunately this is the very house to which associations as well as picturesqueness give a particular interest. From one of its wide bow-windows William Penn preached the grace of God to the people of Wells as it never before had, and indeed, it may safely be said, as it never since has been preached to them by the Lord Bishop or his canons. And now, when Americans—Pennsylvanians above all—who know anything of their country's history look at the old house, with its crooked gables and bulging windows, and its court, where the carving is so sadly weather-worn, it is of the man who here delivered one sermon they must think, rather than of Bishop Beckington, who made the place beautiful, but whose name is probably forgotten once the guide-book is closed.

The story of Penn's visit to Wells is worth remembering. The incident, insignificant as it is, compared to the greater events with which his life was crowded, is very characteristic of the man. It happened not long after the death of the wife he loved so dearly. His mind, however, for the first time in many years, was at peace, and his sorrow was easier to bear because of the two great consolations that had just come to him. Friends who had looked doubtfully upon the favor in which he was held at court had once more taken him back into their con-

fidence; the beloved province for which he had toiled so incessantly, and of which for a while he had been deprived, was now restored to him by the King.

Once more he went about the country, as he had gone in earlier years, preaching and exhorting, in hopes that his words might perhaps do for others that which Thomas Loe's had once done for him. He had been traveling between the hedgerows of Gloucestershire and along the deep-sunken lanes of Devon and Somerset, holding meetings on the way, now in open fields, now in town-halls, when he came to Wells, the little low-lying town of two long straggling streets separated by the Cathedral, with its Bishop's Palace to one side, its Vicar's Close to the other. The old house in the market-place hung out then, as it does still, the sign of the Crown; but in those times it probably had not come down in the world, but occupied the position the Swan does now, and was the inn of the town. The first thing the travelers had to do was to see the Bishop, for without a license there could be no preaching in peace. For all the modern restoration and destruction, the main features of Wells have changed so little that you can follow Penn from the market-place through the gateway called the Bishop's Eye, where the wall-flowers now make such bright bits of color on the crumbling stone-work, under the trees beyond, across the draw-bridge, where a great horse-chestnut drops its low-spreading branches into the water of the moat, and so to the Palace.

It was like Penn, who was not afraid to speak out his mind to kings and princes, to determine to hold a meeting in Wells, which has always been essentially a cathedral town, and nothing more. To-day you feel that if it were not for the Cathedral, upon which its interests centre, it would cease to exist altogether, or else quietly settle down into village life. It is a little hot-bed of Conservatism, where the Church, so necessary to fill the tradesmen's pockets, is as deeply respected as the State, and where not only are few Liberals to be found, but hardly a Dissenting chapel. The people explain the presence of the Carmelite Convent by telling you that the nuns came over from France when so many religious orders were banished from that country. The Salvation Army, though its officers make a great noise and daily besiege the town, has but a small following. It is easy, then, to imagine what the place was in the latter half of the seventeenth century, when Non-conformists were still being persecuted and imprisoned. To go there to preach the new gospel was to beard the Church lion in his den.

It was equally in keeping with Penn's love of peace and order that when he thought it his duty to preach in Wells he should first ask the Bishop's permission. No one could defend his own rights better than he, and perhaps for that very reason no one was more unwilling to put himself in the wrong.

But why should he hold a meeting in Wells where there were no Quakers? asked the Bishop; what truth had he to reveal to the people that they had not learned already from ministers of the Established Church?

"The grace of God," Penn answered.

"We preach the grace of God," said the Bishop.
"But not as the Quakers," Penn declared.

He did not leave the Palace, however, until the permission had been granted. It was because the Town-hall was not to be had for his purpose, those in charge sharing the prejudice against Quakers so general among people in authority, that Penn decided to address the meeting from a window of the inn. It is not difficult to picture him standing there, the wide casements thrown open, a man far to look upon in middle age, as he had been in youth, the beauty of his face and the sweetness of his words winning to him many hearts in the multitude below, just as they had out in the far West when he smoked the pipe of peace with his Indian friends, or in Holland and on the Rhine, whither he went to help those who were still seeking the light. It is by a curious chance that the window in which the man of peace stood now overlooks a cannon from Sevastopol! Two or three thousand men and women, it is said, crowded the market-place. One wonders how space was made for so many, for a few tents and vans and stalls in fair week will fill it to overflowing. And one cannot help contrasting those eager thousands with the insignificant handful of worshippers who barely fill the choir of the Cathedral during daily or Sunday service; for the people of Wells, if they do not join the ranks of the Salvation Army, or set up unorthodox chapels for themselves, do not, on the other hand, give very active support to their own Church. But, wherever he went, the eloquence of Penn always held his listeners, even if they had come together out of curiosity, and here in Wells from his window he looked down on a mass of upturned faces, the high gabled houses opposite making a pretty background, while above and beyond them he could see the tower of the Cathedral where the Bishop preached his sermons, which were so little like those of the Quakers. And as he spoke that which was in his heart, his earnestness went from him to the people, so that when constables came and arrested him there was much disturbance among them, and the magistrates were frightened. For Penn had secured his license from the Bishop, and there was no just charge against him. They were forced to let him go but they had done "just enough to manifest the keenness of their stomachs for the old work of devouring, in that they could not refrain from whetting their teeth again after the Act of Toleration had blunted them."

In reading about Penn one cannot but feel that it was the power of keeping his enthusiasm within bounds that added so much to the strong influence he exercised over his fellow-men. In Wells there were many people who must have remembered how different had been the coming of James Naylor, the fanatic whose conversion struck George Fox with a great fear. He had let himself be proclaimed the Everlasting Son, the Prince of Peace, the Fairest among Ten Thousand, and people had strewn their garments on the ground before him as the Jews had before Christ in Jerusalem. But Penn came as a man among men, no better or no worse than they. His faith was too strong, his knowledge of the world

too great, for him to fall into the folly of fanaticism. When I used to see the small detachment of the Salvation Army making its nightly rounds, the woman in front with flushed face turning to keep time, the man behind pounding his big drum, and all with wide-open mouths shouting their loudest, it seemed to me there could be no question that the man who, from the house by which these noisy Christians marched, once spoke with quiet sweetness, but with a love that made men listen, had chosen the better part.

LOVE AND WORK.

Love and work are often far apart in our thoughts, but it is only when they are united that the highest results are achieved. Duty and necessity will make men faithful, but never inspire them. Love, on the other hand, adds to absolute fidelity a glow and inspiration which are creative. Those who have studied Corot's morning skies, deep and tender with an unfathomable light, have often wondered why this artist alone of all his contemporaries has mastered the secret of the morning sky. But they have ceased to wonder when they read of the passion for the sky of dawn which possessed the great painter, and led him, morning after morning, year after year, into the open fields, to sit there absorbed and enchanted while the night slowly changed to day about him. Corot loved the dawn, and the dawn inspired him as it has inspired no other artist. It is the absence of love which makes most work drudgery. A good deal of that which is put by necessity into men's hands to do cannot of itself evoke this feeling; there is nothing in it which touches the imagination or appeals to the emotions. When the work itself does not possess these qualities, it can still be done in the spirit which inspires them. A man may love life and all that it brings him in the way of opportunity with such intensity and whole-heartedness that the meanest detail of it comes to have meaning and beauty in his eyes. All great workers, men who have achieved the very highest results and have stamped their performances with individuality and distinction, have been men of a mighty passion; they have been enchanted by the thing they were doing; and their devotion to it, their absorption in it, have betrayed the marks of a great affection.

There is a great deal of work, however, given to men to do which is capable of calling out the deepest sentiment of love, which has in it suggestions for the intellect, appeals to the imagination, outlooks for usefulness, sufficient to lay a spell on the greatest nature that ever handled tools. So, no one can doubt who looks at his canvases, did the work of painting appeal to Raphael; so, unquestionably, did the work of writing throw its spell over the great soul who passed through three worlds in order that he might see man in all the conditions of his estate. The same mighty passion is found in the achievement of every great worker, and every great man must of necessity be a great worker. The aged statesman who spoke a few weeks ago at Birmingham unquestionably loves the work into which he has put such tremendous and tireless energy. No mere sense of

duty, no whip of necessity, could ever have drawn out such a magnificent and unbroken activity as that which has made the history of Gladstone. We all need to come into closer contact with our work. It is not enough to make a sense of duty wait upon it, it is not enough to brood over it in thought, penetrating it with ideas and giving it the order of a new and fresher method; we must press it to our hearts if for ourselves and for others we would transform what might be its drudgery into the discipline that makes character, and transmute its hard materialism into something spiritual and satisfying.—*Christian Union.*

From the West Chester, Pa., Local News.

FORGIVENESS.

"My heart was heavy, for its trust had been Abused, its kindness answered with foul wrong; So, turning gloomily from my fellow man One summer Sabbath-day I strolled among The green mounds of the village burial place, Where, pondering how all human love and hate Find one sad level; and how soon or late, Wronged and wroog-doer, each with meekened face And cold hands folded over a still heart, Pass the green threshold of our common grave, Whither all footsteps tend, whence none depart; Awed for myself and pitying my race, Our common sorrow like a mighty wave Swept all my pride away and trembling I forgave."

—John G. Whittier.

The venerable and beloved author of the above truthful lines this day completed his 81st year. In a letter dated Seventh month 13th, of the present year, he uses this expressive language: "I have reached a period in life when new fame and notoriety are burdensome; and love, the love of God and our neighbor, is the one thing which makes life really worth living." This is the experience of one full of years and full of honors, and we may also add, full of "faith, hope, and charity." How beautiful it is that, as life here draws to a close and the shades of night come perceptibly on, to see these Christian traits shine forth like the rays of the setting sun gilding with radiance all surrounding objects!

The publication of the article on "Forgiveness" in the *Daily News* of the 22d ultimo has elicited the following: "I have the *Daily News* of the 22d containing thy contribution on 'Forgiveness.' It is one of the rarest and most difficult to exercise of human virtues. The incident in the lives of Webster and Benton was quite familiar to me, as I have read with much interest Harvey's book. We had, near home, a conspicuous instance of a similar kind. After a personal intimacy of many years between the late Eli K. Price and Henry C. Carey, of Philadelphia, an estrangement arose growing out of a misunderstanding of a business matter, in which Carey erroneously imagined he was injured. Strictly, it was an honest difference of opinion in regard to the value of a security. Carey took offence and was quite indignant, broke off all personal intercourse, and they met frequently without speaking for some years. At a social gathering one evening where Frederick Fraley, General Patterson, Morton Mc-

Michael, and other venerable men were present in a group by themselves with Henry C. Carey in the centre of the conspicuous circle, Eli K. Price approached. All except Carey welcomed him warmly with cordial hand grasplings, and, for a moment, there was an awkward, embarrassing silence, when, prompted by a sudden better impulse, Carey held out his and exclaimed, with much feeling: 'Price, my good friend, how are you? We are both getting old, too old to be anything but friends. Here is my hand, take it, and let us forget our differences.' Of course, the response was friendly, their old friendship was renewed, and in less than a year Carey was dead."

The late Samuel Bettle, Jr., of Philadelphia, a minister in the Society of Friends, related to the writer the following occurrence in his own life, and, as he has for some years been deceased, there seems to be no impropriety in making it public. One First-day morning he felt his mind strongly impressed with the belief that it was his duty to go to a certain house, the occupants of which were strangers to him, and slip under the front door a tract on "Charity and Forgiveness," published by the Tract Association of Friends. It was a humiliating act, being at the time of day when many persons were on the streets, returning from their places of worship, etc., but he did what he felt to be his religious duty. Samuel Bettle was afterwards informed that on that day a female member of the family on entering the door picked up the tract, carried it to her room, and read it. It appeared there had been estrangement toward some one, arising, perhaps, in the settlement of an estate, in which hard feelings had taken possession of her mind. On returning to the family she said she had read the tract on "Charity and Forgiveness," and had forgiven those who had injured her. Within twenty-four hours she was suddenly summoned into the presence of Him who said: "If ye forgive not men their trespasses neither will your Father forgive your trespasses." As the year is now drawing to its close, how desirable it is that all should realize the truth of the expression: "The noblest remedy for injuries is oblivion." W. P. T.

J. G. WHITTIER'S BIRTHDAY.

AN exchange paper has collared from various press reports some account of what our friend J. G. Whittier did and said on his 81st birthday, and we take from it what follows below:

Mr. Whittier says he is not engaged in any new literary work but has just done what he thought no other person had ever done or would do,—read carefully everything he had ever written for publication, in revising his poems for the new edition which Houghton, Mifflin & Co. have published. The correspondent of the *Record* quotes him as saying:

"I have not written much this year. The right words don't come to me easily now. When a man is getting old the range of his vocabulary narrows down to fewer and fewer words. I sometimes think it is because the dictionary of my youth was such a poor one that all I could do to correct the bad beginning was useless; and now my vocabulary has got back

where it started. I have quite a pile of letters every day, and yesterday I thought I would try and get some of them answered. But I find that it makes my head ache, even thinking of the words to write a letter. So I have thought that I couldn't write much. I did write the poem for the unveiling of Josiah Bartlett's statue at Amesbury last Fourth. He was one of the signers of the Declaration of Independence, you know. Then I wrote some lines on the death of my old neighbor, Mr. Spofford."

The etched portrait of the poet, which appears at the front of his new edition, is by Schoff from a painting made of him in his youth by Bass Otis. He heard a year ago that the portrait was in the hands of a relation in Philadelphia; it was sent for, and came in two sadly defaced pieces, but was restored and etched, as aforesaid. He confessed that he "got very tired of a good many" of his poems before he finished revising them, and could not be induced to answer the invariable question which he liked the best.

As to his health, it is quite as good as could be expected, although it requires that he should be careful of himself. The *Record* writer notes that "a tall, straight old gentleman came toward me with a decidedly brisk and firm tread. I remembered the portrait in F. H. Underwood's biography and thought it a good likeness; the long, black eyebrows scarcely touched with gray, the eye itself but little more dim, the lips though more sunken, not altered in expression. The dark-tinted skin revealed in the cheek some color." He told another visitor: "Oh, I am able to go about these grounds and split wood pretty well. I have never attempted to imitate Gladstone and chop down trees; but I like to split wood."

The most entertaining part of the *Tribune* letter is the following: "Mr. Whittier's attention was called to the lines from his 'Snow Bound':"

"Our father rode again his ride
On Memphremagog's wooded side;
Sat down again to moose and sump
In trapper's hut and indian camp."

We asked him if he had ever visited that beautiful lake, and he said he had not, for he was not much of a traveler. He had never been farther south than Maryland, farther West than Pennsylvania, and not so far North as Canada. His allusion to Lake Memphremagog, which lies one-third in Vermont and two-thirds in Canada, Mr. Whittier explained in this way:

"When my father was a young man, he joined a party of horsemen and they rode through the wilds up to Lake Memphremagog. There they met a tribe of friendly Indians. The country was wild. No settlement had been made there by the whites. On the day of my father's arrival there these Indians had gone on a big spree, and every man in camp was tipsy, with but one exception, and he was kept busy looking after his companions to prevent them from rolling into the lake, and getting into mischief. My father asked the sober Indian if he never got drunk. He replied, 'Oh, yes; me got drunk some time, not now; me keep watch this time; next time me get drunk.'"

The women of Mr. Whittier's household, who take the fondest care of the good old poet, are thus described in the *Record*. The three sisters, the Misses Johnson and Mrs. Woodman, are wholesome-looking women with strong faces, strong natures, strong wills. They dress plainly in black gowns, and crimp their gray-sprinkled brown hair and part it in the middle. Miss Phebe Woodman, the daughter of Mrs. Woodman, is a fine, tall, dark-eyed girl of 18 or 19, with a pleasant smile and quiet, housewifely ways. The mocking-bird in his cage on the table beside the porch-window kept silence. One of the cats had paid her respects to it of late and got away with its wing feathers. New ones were fast growing, but the bird, not forgetting yet the mishap, was too downhearted to sing. "You can't keep it long. It is a bird very difficult to rear," said a friend to Whittier recently. "No, I don't expect I can," was the reply. "We have only had it ten years!" "We could show you a side of Mr. Whittier with which the world is not familiar," said one of the Misses Johnson. "He has a great deal of humor to him—far more than anyone outside ourselves knows. Phebe, has he had some tea yet?"

THE TYPE OF THE TRUE MAN.

WE are in hearty accord with the following extract from a new book entitled "Jesus and the Men About Him," by C. F. Dole, a New England writer who "has ceased to be very deeply interested in questions of mere historical criticism. Larger and more important subjects demand the thought of the world. Men need to know that a beneficent God manifests himself in human life now no less than when Jesus walked in Galilee. Men need to have preached to them what Paul used to say,—that 'as many as are led by the Spirit of God are sons of God.' Men's faithlessness is not concerning the past, or about matters which may never be proved. Their most fatal want of faith touches the present. It is whether this world is so truly God's world that it is safe and only safe to do business, to treat neighbors, and to manage the state by the golden rule. Men wait to see the real and ever new miracles of faith, hope, and love. Show men these perfectly practicable miracles, already worked in certain divine lives, worked afresh in myriads of lives, and doubt and fear shall flee from the earth. . . ."

"The steel needle, so far as it is only of steel, will not point true to the north. It will point wherever you lay it down. Magnetize the steel if you want it to point to the north. So men's lives, so far only as they are of good material, will not necessarily hold true to the life of God. But Jesus's life was magnetized and possessed. The life and forces of God played through it. It gave itself utterly to their motion. Whither the spirit pointed there it went. It is not merely the goodness of the excellent material that the world wants. It wants vitalized goodness. It wants men like Jesus alive and awake in every city, village, and household. It wants not merely kindly-intentioned people, but people magnetized to a purpose, vitalized with love, committed to the Christ's kind of life. . . . The magnetized mate-

rial points the same way. *What does the voice of God bid us to do for the love of man?* Christ's way is the way that every soul asking this question instinctively takes. In the hour that I ask this question, I join hands with the true and noble of all lands and ages. . . . Finally, what gives our ordinary lives inspiration and comfort? Jesus's vitalized goodness, we answer, goes by contagion, as the flame kindles in the dry fuel. Like the old story of the beacon-fires that blazed from burning Troy, from headland to headland about the Ægean sea, carrying good tidings to ten thousand homes, so the fire of the Christ's light plays and kindles from century to century through history till it bursts out in a million homes. . . . For the type of Jesus is the coming type of the true man everywhere—a living man, a just, friendly, brotherly man, of wide, quick sympathies, of incandescent faith and hope."

WHEN I think of the friends by whose kindness and love my life has been enriched and blessed through all these years, I often feel that, if I have done no other good than to call out the kindness which I have experienced from them, I have not lived in vain. May we all lay up treasures of this kind, looking back upon the past, not with sorrowful regrets for what is gone, but with thankfulness for the richer gifts into which it has ever been transmuted by time, change, and death, our friends losing their lives only to find them transformed and glorified, laying down their dying members in the dust, and rising from them spiritual and immortal beings. As such, may we cherish always the remembrance of them from each new experience when it passes away, carrying with us the better thought and life to which it has helped us. So with every friend who passes from this to a more perfect form of being. May we cherish in our heart of hearts a new and dearer companionship as we advance in years, compassed about more and more by a cloud of heavenly witnesses. So may we live in them and they in us, our lives more and more hid with them in God. And, when this life of faith and hope is resolved into sight, and that which is in part is done away, then shall the shadows be removed from our eyes, and we shall know even as we are known.—*Dr. J. H. Morison.*

WHEN trouble is brewing, *keep still*. When slander is getting on its legs, *keep still*. When your feelings are hurt, *keep still*, till you recover from your excitement at any rate. Things look differently through an unagitated eye. In a commotion once I wrote a letter, and sent it, and wished I had not. In my later years I had another commotion, and wrote a long letter; but life had rubbed a little sense into me, and I kept that letter in my pocket against the day when I could look it over without agitation and without tears. I was glad I did. *Silence is the most massive thing conceivable sometimes. It is strength in its very grandeur.*—*Dr. Burton.*

"NOTHING can be very ill with us when all is well within."

A PET HUMMING-BIRD.

His name was "Dot," and he was the tiniest mite, not larger than a good sized bumble-bee.

I found him one morning last summer after a severe windstorm, lying helpless, with one of his gauzy wings injured in such a way that he could not use it for flying. He was not at all frightened when I approached and picked him up, but looked appealingly at me out of his very small, black eyes. I could not but admire the elegance of his dress, showing green and gold with a glowing patch of red on his breast, while his feathers were perfumed with the scent of many flowers.

Naturally, so small a bird did not require a mansion to live in. Indeed, "Dot" tried to tell me, in the way birds have of talking, that a cozy abode would meet with his approval. I found that a paste-board box would answer the purpose, and when I had strewn the bottom with sweet-smelling leaves, and put a twig across it, in the way of furniture, "Dot" was installed in his new home.

He would rest quietly on his perch, dreaming, as I imagined, of the days that were gone, of the blue sky, the sweet June breeze, until, recollection proving too strong, he would try to use his wings. Then, alas! instead of bearing him up as they were wont to do, they could give him no support, but left him to fall to the floor of his house, there to lie patiently waiting for some one to replace him in an upright position. Every morning "Dot" and I made a tour of the garden, his specks of feet resting confidently on my enormous finger. We visited every blossom in turn, and he took a little honey from each. Many a time I thought I had lost him, he went so deep down into the huge morning-glories. When the season of flowers was over, I made a mixture of sugar and water to take the place of his natural food. He did not appear to distinguish any lack in the flavor of this make-believe honey; and when I let a drop of it form on the end of my finger, he was always ready to run out his long tongue (which looked like a thread of silver) and sip it off. He seemed to thrive on this artificial diet, and would no doubt be living now had I not one fatal day placed the dish contain- ing it too near him. I left him musing in his quiet way over past delights, but returned to find his body floating on this sticky sea, with his dear little feathers in sad disarray.

Poor "Dot!" His trials were over, and I consoled myself by fancying that he was away in the humming-birds' heaven, happy in a garden of flowers of which we have never seen the like.—*St. Nicholas*.

SACRIFICE is the only possible bond of union between one heart and another. That our relations with one another do not grow more and more intimate every day is simply because our pride or disinclination to sacrifice ourselves continues unaltered. Parallel lines, ever so produced, never meet. Proud hearts never meet. Humility must blend them, or union is impossible.—*Selected*.

"ONE only can discern between infirmity and sin."

JOHN BRIGHT'S FAMILY.

According to a London correspondent, of Mr John Bright's sons, John Albert was always the "good" boy; Leatham, now an M. P., was the mischievous one, and Philip was the hard-working one. Not long ago Philip was employed in the fitting shed, having an aptitude for the making and mending of machinery. When he had gone through the grades in that shop he put in a year or two at Petrie's iron foundry in the town. He carried his breakfast "can," and shared the company and work of all the other men, every one of whom he seemed to think as good as himself. His brother Leatham was put through the drills at the mills, and so was John Albert. John Bright himself learned how to work before he began to speak for and represent workmen. His father, old Jacob, was a poor man with nearly as many children as he had shillings a week for his work as a weaver. At the present day the Bright Mills are scarcely to be surpassed in the country. Over 2,000 hands are employed in them.—*Exchange*.

"WHILE we repudiate emphatically the idea that Mohammedanism can be a substitute for Christianity in civilizing Africa," says the Rev. M. E. Striely, D.D., in the *American Missionary*, "yet it is only just that we should admit that Islam brings with it some influences for good into that benighted land—influences that strongly appeal to the higher instincts and aspirations of the people, and are, therefore, an elevating power. First of all, the One True God of Islam tends to lift the African above his idols, his fetich, his witchcraft, and his cannibalism. Then, the prohibition of wine and strong drink snatches the people from what threatens to be the vortex of their ruin—intemperance; while Christian nations are now, to their shame and infamy, swelling the floods and increasing the velocity of that vortex by larger importations of intoxicating liquors. Then, too, the followers of Mohammed are using the school of the prophets in the preparation of their missionaries. The great training school, the Old University of Cairo, is said to number at times as many as ten thousand students of the Koran, a number which may well challenge a comparison with the Protestant theological seminaries of Europe and America, not only by their numbers, but by the astonishing success of their pupils as missionaries. They run where we halt, they win where we fail."

SAYS Lew Wallace, (author of "Ben-Hur") in his preface to the new book on the "Boyhood of Christ": "Should one ask of another or wonder to himself why I, who am neither minister of the Gospel, nor theologian, nor churchman, have presumed to write this book, it pleases me to answer him respectfully—I wrote it to fix an impression distinctly in my mind. Asks he for the impression thus sought to be fixed in my mind, then I would be twice happy did he content himself with this other answer—The Jesus Christ in whom I believe was, in all the stages of his life, a human being. His divinity was the Spirit within him, and the Spirit was God."

THE INDWELLING GOD.

"THE man who finds not God in his own heart will find him nowhere, and he who finds him there will find him everywhere.

The reason why men are so often disappointed in their search for God is that they do not look for him first of all where he should chiefly be sought—in the manifestations he makes of himself in their own minds and hearts. They suffer the noises of the world to drown the "still small voice" that never ceases to plead with them to keep in the path of righteousness and peace.—*David Swing.*

NEWS AND OTHER GLEANINGS.

—The wood used in the manufacture of spools is an item of no small importance already in the forest-crop of some of the Northern States; and the demand for it is increasing rapidly. The wood of the Canoe Birch is used almost exclusively for this purpose, although the Gray Birch is used also in small quantities. Maine, and especially Piscataquis county, is now the headquarters of the spool-wood industry; and a large number of vessels loaded with spool-wood have sailed direct, during the summer, from Bangor to foreign parts. The wood for this purpose must be clear and entirely free of knots and other imperfections; it is sawed into squares, of different dimensions, four feet long, which are delivered to the spool-makers tied into bundles. Several million feet of Birch timber—probably twelve or fifteen—are cut annually in the Maine forests alone for this purpose. The amount of Canoe Birch lumber standing in our northern forests is still large, and as the trees grow rapidly up to a certain age, the supply will not be exhausted soon, although the consumption is now increasing much more rapidly than it ever has before.—*Garden and Forest.*

—Thread, from the fibre of the nettle, is now spun so fine that 60 miles of it only weigh about two and a half pounds.

—In the trial of a new steam street-car in Sweden, the cost of fuel is said to have been only about two cents per mile. The car will seat twenty-four passengers, the engine being in one end of the car.

—In some of the larger European botanical gardens—as, for example, the University garden in Berlin and the one in Heidelberg—the labels used for the trees are of zinc, with the name stamped in intaglio and then defined with oil paint. These labels are much cheaper than the porcelain ones, more commonly seen, and are equally durable, needing no care but the renewal, at long intervals, of the paint; and an additional advantage is found in the fact that they can be made on the spot by unskilled workmen.

—The assurance comes from the office of the Commissioner-General of the United States Exhibit at the World's Exposition to be held at Paris next year, that no bar or restaurant for the sale of liquor will be allowed in the United States section.

—The London correspondent of the *New York Tribune*, in a dispatch on the 29th ult., says: "Mr. Bright's prospects or possibilities of recovery are well described by one of his family as marvellous. Real recovery, unhappily, there can be none. His malady is incurable. But his condition has wonderfully improved. He even sits up, though a week ago he had no desire to rise from his bed. There is hope that his life may be prolonged for some months."

—Among the distinguished persons who died during

the year 1888 were Henry Bergh, Chief Justice Waite, the two German Emperors, Roscoe Conkling, James Freeman Clarke, Sydney Howard Gay, General P. H. Sheridan, and Prof. Richard A. Proctor.

CURRENT EVENTS.

A FIRE at Marblehead, Mass., on the night of the 25th ult., destroyed a considerable part of the business section of the town, including a number of manufactories. The loss is stated at about \$500,000, on which there may be insurance of \$300,000.

A NEWSPAPER statement that the Trustees of the proposed Williamston Industrial School had chosen a site for it is officially denied. The selection will be made, probably, in a few weeks. Numerous tracts have been offered, at from \$100 to \$250 per acre. The choice is restricted to Philadelphia, Bucks, Montgomery, and Delaware counties. The size desired is 300 to 500 acres.

A ST. PAUL telegram says that a vote has been taken by a newspaper in Deadwood, Dakota, on the question of single or double Statehood, and it is shown that a little more than five-sixths of those answering are in favor of division and admission as two States. The answers received are from various parts of Southern Dakota, and those voting are of all occupations and political faiths.

THE first engine and cars passed over the Poughkeepsie bridge, over the Hudson river, on the 29th ult. Connection with the New York and Massachusetts Railroad was made in the morning, and the train passed over in the afternoon.

THE steamer *Bristol*, of the Old Colony Line, was burned at her wharf at Newport, Rhode Island, on the 30th ult. The fire started near the kitchen. No person was injured, but several passengers had a narrow escape. There is an insurance of \$300,000, which will cover the loss.

THERE are conflicting opinions between the Senate and House upon some of the details of the bill to create a new Department of Agriculture, which may not be reconciled before the adjournment of Congress.

THE local steamboat inspectors at Memphis have nearly completed their investigation of the *Kate Adams* disaster. They find, from statements of the first clerk of the boat, that the *Adams* had 197 persons on board when she took fire. Of these 183 are known to have escaped, leaving 14 as lost.

THE number of deaths reported in this city last week was 340, being 18 less than in the previous week and 60 less than in the corresponding period of last year. The total number of deaths for 1888 was 20,372, of whom 2,795 were from consumption.

THE Pennsylvania Legislature met and organized on the 1st instant. The message of the Governor was read. The gross debt of the State is \$14,738,921, with assets in the sinking fund of \$10,062,607, leaving a net debt of \$4,676,313.

NOTICES.

* * * Friends' Charity Fuel Association meets this (Seventh-day) evening at 8 o'clock, in Friends' Parlor, 1520 Race street.

WM. HEACOCK, Clerk.

* * * John J. Cornell will address a meeting under the care of Philadelphia Quarterly Meeting's Committee on Temperance, on Third-day evening, First month 8th, 1889, at 8 o'clock, at Friends' meeting-house, 15th and Race streets. All are cordially invited.

BEHOLD what manner of love the Father hath bestowed upon us,

That we should be called children of God!

Beloved, now are we children of God,

And it doth not yet appear what we shall be.

For eye hath not seen nor ear heard,

Neither hath the heart of man conceived,

The things that God hath prepared

For them that love him.

Set your mind therefore on the things above,

Striving to be followers of that which is good,

And rejoice in the Lord always;

For all things work together for good to them

that love him.

—Paraphrase.

For Friends' Intelligencer and Journal.

THE BOYHOOD OF JESUS.

VERY little is known of the boyhood of Jesus; all that can be gathered up is comprised in a few words. Mark, whose gospel is the subject of the Scripture lessons for this Quarter, gives no account whatever of him previous to his baptism, which was immediately followed by his appearance as a public teacher. John, who from all we know of his intimacy with Jesus, must have been fully informed of his early life, has nothing to say of the human child, but he starts out with the history of the Divine Word from the beginning, and shows that the power,—the light as he terms it,—which made the man Jesus what he was came from the same eternal source of light and life that created the universe. Matthew relates a few incidents of the infancy of Jesus, of no value except as they were used to establish the claim of Messiahship and the fulfillment of prophecy. It is to Luke we are indebted for the little that is known concerning the life of Jesus until he had reached manhood; but a whole volume is outlined in the brief summary he gives. "And the child grew and waxed strong, filled with wisdom and the grace of God was upon him," is the first testimony we find. Then follows the incident in the temple, when Jesus, at twelve years old, was taken as the Law required, to Jerusalem at the feast of the Passover. Here he astonished all who heard him with the wisdom of his answers, and the questions that he put to the learned doctors of the law.

Then the beautiful record follows fresh as an inspiration "He went down with them, [his parents], and came to Nazareth, and he was subject unto them," "and he advanced in wisdom and stature and in favor with God and men."

This should be the model and pattern of life for every boy reared under the sanctities of a Christian home. To have such a record leaves nothing to be desired for the child that is not comprehended in its significant words. A boy's environment has much to do with the formation of his character. The fields in which he walks; the woods where he finds himself at home with the singing birds and the little creatures that climb and burrow in its quiet solitudes are educators of thought and feeling; and the brooks and ponds where his image is reflected,—where in the gay sunshine the rippling waters sparkle and dance to the melody of his own happy heart, give a zest to the young life that is at once pure and ennobling.

We can think of the boyhood of Jesus as associated with the quiet rural scenes of his Galilean home. The people of Galilee were less scholarly and refined than those living in more southern parts of Palestine; they were mostly farmers and fishermen. Nazareth, where he was brought up, was in one of the most beautiful and suggestive neighborhoods of all that region of country, and is said to have had a population variously estimated at between twenty and thirty thousand. A recent writer says of its surroundings; "One who has seen cannot soon forget." The city is built on the brow of a hill. As the summit is gained there suddenly unrolls a panorama equally beautiful and historic. On the west stretches the long line of Mount Carmel, crowned with a forest over whose depressions here and there gleam the shining waters of the Mediterranean sea; northward lies the valley of Kisbon, beyond are the mountains of Safed, rising one behind another, until they end at the foot of Hermon, which looks down in lofty majesty on the whole from under his crown of snow. To the eastward are seen long level floors of green, broken by lovely valleys which dissolve among the hills,—that is the plain of Esdraelon. Out of it rises Mount Tabor, rounded like a hemisphere, and little Hermon and Gilboa; south, towards Jerusalem are Ebal and Gerizim. All are points of great interest as associated with the striking events of Hebrew history. Nearer by is a vast stretch of intervalle land at once the granary and the battle-ground of Palestine.

Such was the charming picture Nazareth presented when the boy Jesus played with his companions in its irregular streets, or watched with them the sun as it crimsoned the snows of Hermon, or gathered "the lilies of the field" to adorn the simple home where the happy hours of his childhood were

passing. And as he walked and watched and doubtless wondered with the curiosity of inquiring boyhood, we may well suppose there was aroused in his pure, joyous heart a yearning tenderness towards the Jehovah of his people, whose worship he was permitted to participate in once a year, with his parents, in the distant city of Jerusalem, and as he grew and "waxed strong in spirit" how this love and tenderness overflowed to all about him, fitting and equipping him for the work that he came into the world to accomplish,—and let no boy say this is not true of his own coming into the world. Every boy worthy of being born has a feeling that some sphere in life awaits him, and as his thoughts are turned in one or another direction towards the pursuits of business, of labor, or of enterprise, there is a shaping of the mind in the direction that leads to his ideal, whatever it may be.

In this formative period of the boy Jesus' character there was very much to widen out his horizon and enlarge his views of life and its duties. Nazareth was on the great thoroughfare from Damascus to Jerusalem and southward; long caravans, carrying the rich products of Assyria and Phœnicia, and bearing the wealth of the Indias back to the famous cities of the old civilizations, passed and repassed before his wondering eyes. And then there were the husbandmen in the fields, the fishermen on the lake, the traffickers in the market-places, the mourners in some sorrow-darkened home. These, too, were a part of the lad's surroundings, and from each one of them he was getting something of that wisdom which girded him for his work. In through the gateways of the senses, day by day, his youthful soul was drawing truth that germinated there and bore immortal fruit.

The unrest of the religious thought of the time was everywhere felt and acknowledged. The promised Messiah for whose coming the Jewish people had been waiting in expectancy, was the theme uppermost in the mind of every believer. There was much, too, that belonged to the great world outside. The intermingling of Jew and Greek, and of all the idolatrous people who came and went upon the great highway of commerce, all then as now, had an influence in the development of character, not to the extent that we now see, but as far as it was possible among a people whose social life had crystallized centuries before.

We can scarcely suppose that all these influences were without their effect on the mind of this boy, who at twelve years of age had astonished the learned rabbis of his nation by the wisdom which he displayed in his intercourse with them. Nor was that insight wanting in his home-life at Nazareth that in his manhood gave him such power among men. Quoting from the same writer, "Sometimes, into our own lives, long after the years of childhood and infancy have gone from us, there breaks a note of that highest truth, which thrills and startles us by its tones. Some child in our house, with its eyes of awe and wonder, seems to have penetrated for the moment the curtain that hides the invisible, and in the question that it asks, in the few words

that it drops, reveals to us a spiritual vision, a heavenly insight, which at first seems wholly inexplicable. Do you suppose that that insight was wanting in the Child who grew up in that home of Joseph and Mary in Nazareth? How poor and mean and commonplace it must all have seemed to the casual passer-by; and yet, as the boy stood at his mother's knee, or wrought with his father, after the custom of his nation, at the carpenter's bench, how that far-off gaze which we sometimes see in children, must have come into those childish eyes, while he saw for the moment the things which "eye hath not seen," and caught for the moment the melody of those upper airs which "ear hath never heard."

Our First-day schools will not have fulfilled their mission among the children and youth of the Society, if in their work especial effort is not given to the formation of character,—to the cultivation of every pure and upright principle of thought and action; taking Jesus for the pattern and example, giving him the preëminence in all things that relate to life and duty. Let the youth of our time be made familiar with all that is known of Jesus and his times. Impress upon them the fact that the life he lived was a real life,—that his boyhood differed little from all other boyhood, except in the purity and gentleness of his demeanor. These are points that we have need constantly to keep before the children, that as a child Jesus may be to them what he has been, and is, as a man, to multitudes all over the world, who in his faithfulness to the work laid upon him by his and our Father, is a pattern in all righteousness, from whom our highest and noblest lessons of trust and confidence in God, and in the efficacy of his Holy Spirit to redeem from all evil, must be drawn.

From Friends' Quarterly Examiner (London).

MISSION OF THE SOCIETY OF FRIENDS.

BY EDWARD GRUBB.

THE great saying of Mazzini's that "*Life is a Mission*," is no less true of churches than it is of individuals. No church or religious society can truly live, except as it realizes that its existence is not arbitrary or accidental, but has, in the providence of God, a definite aim and purpose. It is essential for true life that there should be in such a society a settled conviction as to the reason for its existence, a clear understanding of the work it has to do, of the fragment or aspect of the great truth of God which it is commissioned to uphold before the world.

What then, we have to ask ourselves, is the mission of our own Society? why are we here? what is the central truth which it is laid upon us to enforce? what is the device that should float upon our banner as we move onward in the great procession?

It is hardly too much to say that for a long time past we have not had a banner to uphold. The spectators along the line of march have seen, indeed, that in spite of certain eccentricities of dress and language, in spite of our feebleness in point of numbers, we are eminently quiet and respectable; they have discerned a certain dignity and weight about us which has caused them to cease flinging jeers or more

substantial missiles, and to treat us with all respect; but at the same time scarcely one of them, unless he has taken special pains to enquire, has any notion why we are there, or on what principle we hold together. And this is hardly surprising, since the greater part of us would probably be puzzled to say ourselves. It is significant that some of us even object to speak of having any "distinctive principles."

But if we fail to give a rational account of ourselves, it is not likely that we shall long survive. This is not an age that greatly reveres what is old, if it has not other qualities than mere age for inspiring reverence. Now, as in the days of John the Baptist, the axe is laid to the root of the trees; if we are simply cumbering the ground we must expect to be cut down, that the fitter may survive. Particularly among the rising generation the spirit of inquiry is awakened, and whether for good or ill they will not long adhere to any institution that can only inspire an antiquarian interest, and has ceased to be adapted to the needs of the day. Nor is our position worth maintaining, if the truths we have to utter are mere negations,—denials of the doctrines or practices of others. The world has far too much already of denial and division; it wants reanimating and uniting by constructive truth and the fervor of positive conviction. Probably the dislike of some to speaking of "our principles" arises in part from this feeling.

Have we then a banner? Is there any great positive principle which we, as a Society, have been commissioned to uphold, and which needs upholding now as much as it needed it two centuries ago? I believe there is; I believe that it is one exactly suited to the wants of this day, and that it is capable of calling forth our enthusiasm and loyal affection, if only we truly understand it. It is, indeed, no new principle; it is as old as that which prophets and apostles, which Christ himself proclaimed, and in the over-mastering power of which they went forth to war, often single-handed, against the traditions of men.

The central truth that lay at the root of George Fox's teaching, was that of the *Real Presence of God in Man*. Fox saw God in all men; man made in the image of God; retaining still, in spite of hideous growths of evil, an imperishable Seed of the Divine nature. Like one of his best successors,

"He in the vilest saw
Some sacred crypt, or altar of a temple
Still vocal with God's law."¹

In the strength of this conviction, Fox and his friends went forth proclaiming what was indeed a gospel for the times. They said, in opposition to the theology of that day, that Revelation was not of the past only but of the present; that "God was not dead that he should speak no more;" that it was only as any had heard and obeyed his voice that they could be endued with power for teaching others; that this power was not confined to any order of priests or clergy, and could not be valued in money. They said that the Divine Father had not abandoned as hopelessly corrupt the children whom his hands

had made, but had implanted in each one of them a Seed of goodness, a spark of his own Divine nature, a Light which they might take heed to, and which would lead them to the truth. And this Divine gift they maintained was not confined to any select few, but extended as widely as the human race itself, to black as well as white, to heathen as well as Christian—

"Through ways unlooked for, and through many lands,

Far from the rich folds built with human hands,

The gracious footprints of His love they traced."¹

They said that God was indeed our Father, and all men brothers in him. They said that access to God did not depend upon the intervention of any human priest, or the performance of any outward ceremony, but was the privilege of all who would come to him in spirit and in truth. They recognized, with other Christians, that Christ had died for our sins, but denied that admission to heaven was to be gained by any process that did not involve real and practical righteousness of heart and life. And these things they showed were just what the prophets, what Christ and his apostles had ever taught. They based it all on the teaching of "the Spirit of God within" them, but showed its agreement with "the Scriptures of truth without," and that in a way that silenced all their adversaries.

"The importance," says Canon Westcott, "of this affirmation of the actual affinity of man as man to God, by the Divine charter of his constitution, is evident when we recall the character of the current theology of the middle of the seventeenth century. The doctrine of reprobation was then commonly preached with a crude violence which shook the very foundations of morality. In the face of this the message of Fox, given again and again with vigorous simplicity was the indignant answer of a soul touched by the love of God to human systems, whether of Pelagius or Calvin. And if it was met by the fierce denunciations of technical theologians, it was welcomed as indeed a gospel by many who 'had not heard the like before.' It opened once again the prospect of that universal kingdom to which Isaiah looked. It gave back to the world the idea of a Divine Fatherhood commensurate with the Divine Love. It offered to the preacher of the good tidings of the Kingdom an assurance sufficient to support his largest hope; for he knew that he could not approach any hearer without having God as his fellow-worker, and the secret voice of the Soul for his witness."

And the effect on the lives of those who embraced the idea was a witness to its truth. In another place the writer just quoted says of Fox that "he was able to shape a character in those who followed him, which for independence, for truthfulness, for vigor, for courage, for purity, is unsurpassed in the records of Christian endeavor."

"The Quaker of the olden time"

How calm and firm and true,
Unspotted by its wrong and crime,
He walked the dark earth through.
The lust of power, the love of gain,
The thousand lures of sin

¹ Whittier, "In Remembrance of Joseph Sturge."

J. R. Lowell.

Around him, had no power to stain
The purity within."

Nor was it only in the sphere of *being* that Quakerism proved a great moral force. In the sphere of *action*, too, the principle of the Real Presence of God in men became a mighty power, and sent forth its adherents to support effectually their claim for religious liberty, to battle successfully with negro slavery, with the cruelties of English prisons and the barbarity of the criminal law, and to raise a lasting protest in the name of Christ against the iniquities of War. For how could they who felt the Spirit of Christ within them rest contented under laws that trampled on his teaching? How could they, who believed that the same Spirit moved in the hearts of the most degraded, consent to see them bought, sold, and tortured by other men, even by some who professed themselves to be followers of Christ? How could those who felt that all men were brothers as sons of one common Father raise no voice against the system by which international jealousy and hatred is fostered, the treasure and life-blood of nations squandered in destroying one another, and every eviler passion roused until the very semblance of the Divine image is almost obliterated?¹

These are some of the things that in the course of its mission our Society has achieved, and we must not judge of its success or failure simply by its present numbers. For it cannot be said that the great principles of George Fox have failed; they have in truth spread far and wide beyond the limits of our little body; and there is probably not one of the more spiritual teachers of to-day who has not been largely, even if unconsciously, influenced by them. And yet, in a sense, the Society may be said to have almost failed. After its first brilliant rush of success a period of rapid decline set in. We are now a mere handful, and in proportion to the population are still declining.

The causes of this decline have been much debated; they are probably numerous, and form too large a subject for us to consider now. Apart from the question whether there was any vital defect in the teaching of George Fox, one chief cause of our failure has clearly been the same as that of the partial failure of Christianity itself,—the "loss of the first love." After any great spiritual wave has swept by, it seems inevitable that of those who have been raised by it into a new life a large portion should be left stranded,—the glow of enthusiasm cooled, the intuition of reality faded,—fancying they are carrying out the intentions of their leaders by a wooden and mechanical imitation of their methods, or a cut-and-dried repetition of their doctrines. The letter remains without the spirit, the form without the substance, the shadow without the reality. The new faith remains only as a tradition, devoid of living power.

This was strikingly the case with our own Society.

¹ It is not, perhaps, correct to imply that this energy for social regeneration marked the *official* action of the Society. I am told that it was long before even the anti-slavery movement was recognized with any favor by the higher powers in our Yearly Meeting. Nevertheless, it was, I believe, the Quaker view of life that stirred the *individual* reformers to the noble efforts alluded to.

Within a hundred years of the time when they had rejected all traditional forms, they were bound hand and foot in forms once more; and to be a "Friend" meant chiefly to practice certain peculiarities of dress and language. This "loss of the first love" is probably all there is of truth in the statement sometimes made both about Quakerism and also about Christianity itself,—that its doctrines are "too good to work,"—"all very well in theory but not adapted to practice,"—"the ideal too high for mortal men,"—and so forth. The ideal cannot be too high, if only there is the spirit to live up to it. It was the loss of this spirit, and not the height of the ideal, that was one chief cause in the decline of Quakerism.

In the face of such decline it was inevitable that a reaction should come. Fifty years ago a body of earnest reformers,—the so-called "Beaconite" party,— strove to recall some aspects of the truth that were thought to have been too much neglected; to awaken the minds of Friends to the supreme importance of the Scriptures, as the only safe bulwark against such exaggerations of the central principle of the Inward Light as had led to sad disruption among their American brethren. Like all reformers, they were opposed by the ruling powers, and, to the great loss of the Society, were driven out of its borders. But their work remained, and the Society of Friends in this country came over almost in a body to their views.¹ Those views have characterized the official utterances of our body for the last thirty years, and have produced a profound and almost universal change in the character of our public ministry, and in the habits of thought of our most earnest members.

It is hardly to be denied that these views have done good service in breaking up the hide-bound formalism of "the dead ages." It is hard to see how the great development of spiritual life and energy manifested in our Adult School and Mission movements could have come about had it not been for the Beaconite revival. While gladly admitting this, I must at the same time say that it appears to me to be in accordance with the maxim that "A living dog is better than a dead lion." A lower principle, embraced with heart and soul, is better than a higher principle embraced only in name. And I can hardly think that any impartial person would deny that the prevailing Quakerism of to-day,—the sort of Quakerism taught by our earnest mission-preachers and expressed with more care in our Yearly Meeting Epistles,—is *lower*, in the sense of being less profound and

[We think it best to note, at this point, our measurable dissent from the form of the statement made a few sentences earlier as to the cause of the "sad disruption" of 1827, while we remark that the extreme doctrine of the "Beaconites" opened the way along which the English body of Friends has gone back from George Fox Quakerism to the ordinary church views. Edward Grubb, though his language seems to extol the "Beacon" movement, himself shows this historical fact, a little further on, where he points out that the Light Within is little dwelt upon among English Friends, and "the letter of Scripture" is exalted. That was precisely what the "Beacon" movement tended toward, and the comparison of London Yearly Meeting's epistles of 1787 and 1887 (printed in this Journal, two years ago), showed what a transition had been made from the Spirit to the Letter,—from a dependence on Light to a reliance upon texts! What follows in E. G.'s paper states these facts very clearly.—EDS. INTELLIGENCER AND JOURNAL.]

spiritual than that of early times. It shows too often an imperfect grasp of the great principle of the Presence of God in man; it speaks but little of the Light of Christ within him, and hesitates to tell us, even if it does not deny, that this is the gift of all men. The Revelation of which it speaks is a thing rather of the past than of the present; it exalts the letter of Scripture and the importance of a correct apprehension of certain doctrines, more than it does the possession of a wise and understanding spirit by which alone the Scriptures can be judged and rightly interpreted.

In fact, Quakerism during the last half-century has reverted in no small measure to the popular theology. We have almost lost our *raison d'être*. There is but little, besides our mode of worship and our disuse of sacraments, to distinguish us now from the ordinary Evangelical dissenter; and even these points of distinction are being rapidly abandoned by some who are yet kept in countenance by our own Yearly Meeting. We have taken many steps backwards towards that theology against which the early Friends revolted. Those who speak of "Liberalism" and "Progress" in our body would do well to consider whether what they thus speak of is not really Reaction—reversion to a lower type.

[Conclusion to Follow.]

For Friends' Intelligencer and Journal.

THE NEW READING.

A LITERAL reading of the prophetic writings of Ezekiel had often taxed belief to the outer bonds of doubt, and had it not been for inward impressions of Truth that I could not define, the inclination to re-perusal would have been lost. But recently, taking it up again, I was led to look at all foresight as a vision, not of necessity belonging to time or duration. Foresight of a long series of years and events may appear in a moment. The trials prophesied of were to be made and endured in the order of time by the people to whom the message was sent. It is not naturally possible for one to lie three hundred and ninety-four days on one side: the vision of a moment sufficed. The prophet must be a seer, not of natural scenes really before him, but of times and events,—to occur it may be in ages to come. His field of view is not ocular nor tangible; hence his utterance is not the result of trial or experience. This tax on credence removed, we find others to which we cannot apply the tests of literal truth in the writings of the prophets. Venerable and inimitable men, they demand without consent or volition the homage of ages. The seal of Omnipotence is affixed to their writings. Relations to people and events not possible in our human sense appear on every page, and yet we feel that there must be a sense in which these rare writings are all wonderfully true. To pure desire there comes light. To one consciously blind to sights and scenes of beauty there must be a prayer for sight. The Power that endowed the vision of the prophet may endow ours. We may read in the same light that he had, and then we shall cease to doubt or undervalue his record.

We find it said as to the temptations of Jesus that the Evil One took him up unto an exceeding high mountain and showed him all the kingdoms of the world, and the glory of them with the promise of them all if Jesus would fall down and worship him. In a natural sense the Evil One could make no such promise, for he had no such kingdoms, yet in an ideal and imaginary sense he had. The "Get thee hence, Satan," of Jesus, "for as it is written thou shalt worship the Lord thy God and him only shall thou serve," with the temptations, involve the problem of our human destiny. As he was tempted so are we. Satan or self, whom we are to deny, lures us with false promises. He, the Immanuel, teaches us denial, and aids us in it. Thus in the great duties of life two kingdoms are brought into view: one the kingdom of God, the other the dominion of Satan. So far as our happiness or misery is involved these inner states of mind or soul affect our lives more than the external world. More real to our thought and perception is the unseen than the seen. And the impressions of the unseen are more vivid and real in the mind's eye than the objects of sense.

The prophetic sense of all Scripture cannot then be had in a natural, literal sense. It comes through the soul sight. Through this medium inspired writings are read with blessedness never known in the literal perusal. The exodus of the Israelites out of Egypt to the Promised Land through the Red Sea and the wilderness are made real to our inner sight and experience and form the most instructive lessons of life. So all the prophetic writings may be read with reference to the states of the soul; then the sudden changes from awful malediction to deep, pure, tender love may be felt and seen as states incident to dark sin and holy purity. In this light the Bible puts on its hallowed guise. The Jerusalem on its mountain promontory is seen in a soul sense to be more really the city of the great King. Jordan, the river of judgment, becomes a baptismal font in a spiritual sense. Babylon ceases to be mysterious, since they who obey the voice of the Lord leave it and flee to Bethel. Thus taught and thus seeing, we hallow the sacred page and honor its inspired authors. Chastened we feel that God's way is higher than ours, and that in his thought is hid the key to infinity.

SCRIPTURE LESSON, No. 3.

FIRST MONTH 20, 1889.

HEALING OF THE LEPER.

GOLDEN TEXT.—"Like as a father pitieth his children, so the Lord pitieth them that fear him."—Psalm 103 : 13.

READ Mark 1. 35-45.

WHILE the subject of our lesson is the healing of the leper, the main thought that concerns us is found in the fact that Jesus was dependent upon his Heavenly Father for the strength and power through which he was enabled to heal the sick and cast out demons. Again and again he declared that of himself he could do nothing.

In the morning and before men were astir; while it was yet dawn, He departed into a desert place and there prayed. This gives us the secret of his power,—

he prevailed with God through prayer and communion in the solitude,—away from the hurry and bustle of the haunts of men. Let us think of the strain of the day in Capernaum. First in the synagogue, then with his disciples in the home of Simon, who is better known as Peter; here he finds weeping and sorrow, his compassionate heart is touched, and through the wonderful gift which he possessed, the sick mother is restored to health. Then as the evening hour came on the multitudes, with all their pains and diseases, thronged around him, and one after another felt the restoring power of his sympathy. It was, doubtless, far into the night, when, with his chosen followers, he retired to the guest chamber for rest. When they awake he is gone, but they are not alarmed, they have been with him long enough to know that he has sought out a quiet place where he may meet and commune with his Father, and gain strength for the work that the opening day would bring him.

They follow after and found him. The concern of these men was that he should still further labor in the city of Capernaum,—they tell him “all are seeking thee.” But his purpose is not to settle down to one place, that the people may come to him; that was not the end of his coming forth, he must preach in the next towns. It is while he is going through the other parts of Galilee that the leper is healed.

Being moved with compassion, here again we learn that it was not to show the people what great works of healing he was enabled to do, but because of the pity he felt for the poor afflicted creatures left to suffer and to die, and in the case of this leper, cut off from the society of his own family, for the disease was so dreadful, so loathsome, and so contagious that even to touch his person was contamination,—Jesus knew all this, yet his love and tenderness reached out to the poor victim.

In the life of Jesus, everywhere, is very plainly shown his sympathy with human suffering, and his pity for the afflicted. When Martha and Mary told of the loss of their brother, the Scripture, in eloquent brevity, says: “Jesus wept.” He wept as we weep when our loved ones go from us, and when he went to the grave of Lazarus he went “groaning in himself.” Thus he made firmer the relation between himself and God’s children everywhere. We all have sorrows, we all must weep, and it is a comforting thought that our elder Brother was like ourselves. But when we so comfort ourselves in our afflictions we must strive in the afflictions of others, to be like him also, showing compassion, and “going about doing good.” Every act of kindness, every feeling of sympathy, every thought of love in us, makes us more like him. This is the way in which we should strive to be like him, in our every day duties to those around us.

An intellectual belief in the mission of Jesus, according to any particular theological creed, will profit us little, if we do not strive to make our lives like his.

“Not long prayers, but earnest zeal

That is what is wanted more.

Put thy shoulder to the wheel;

Bread unto the famished deal
From thy store.”

It is related of Stephen Girard that when standing amid a group of people, who were expressing sympathy with a man who had fallen and broken his leg, he exclaimed in his broken English, “I pity him five dollars, how much you pity him?” That was his method of showing his compassion for him, and it was a very effective method.

TO-DAY IN NAZARETH.

FROM an illustrated article by Wilson, the photographer, in the *January Century*, entitled “Round about Galilee,” we quote: “One of the best views of the city is to be had from the campanile of the Church of the Annunciation. In the distance is the brow of the hill to which Jesus was led by the enraged multitude who attempted to throw him from it. A modern house in the foreground brings to mind the time when they uncovered a roof and let down the bed whereon the sick of the palsy lay. This must be very much the same kind of house as that historical one at Capernaum. There is the peculiar roof, and there are the outside stairs leading to the roof. The Eastern householder makes his roof serve for more than a protection from the weather. It is the piazza, the quiet place of the dweller, and sometimes it becomes his summer residence. As a rule it is not very heavy or very strong. Rafters are thrown across from wall to wall, say a yard apart; then the whole space is covered with twigs such as we saw the women selling in the market-place. On these the slender limbs of trees are thrown and thickly coated with mortar. Lastly, a thick spread of earth is thrown on, rolled to a level, and oftentimes sown with grass-seed. Thus by care many of the roofs become as smooth and soft as a machine-mown lawn. They may be easily broken up and anything lowered inside from above. By some such process the four bearers of the poor palsied man managed to enlist the attention of the Great Physician in behalf of their friend. It is not hard to understand it all when viewing such a house as this one at Nazareth. It would not be difficult for four men to carry a lame friend in a hammock by the outer stairway up to the roof, and breaking through, let him down into the apartment or court below. Not far from this same house, in a narrow street, is a little chapel erected upon the site of Joseph’s carpenter-shop. Over the altar is a picture representing Mary and Joseph instructing Jesus, and finding that he knew more than they. Another painting represents the lad Jesus assisting his father at work. It contains no accessories of the carpenter’s shop, but there are enough of them in the shops close by. The web-saw, the glue-pot, the plane, and the hammer are the principal tools used in such shops, all without the modern improvements. Yet whatever the Palestine carpenter produces is from the fragrant cedars of Lebanon or from the eccentrically knotted and gnarled olive-wood. The operation of bargaining and waiting for any article of wood to come from a Palestine carpenter’s shop is a lengthy one. Articles of wood are a luxury there, and when the carpenter receives an order for one he usually employs the next

three days of his life in soliciting the congratulations of his friends upon his wonderful good fortune in receiving 'an order for something made of wood.'"

AGNOSTICISM.

THE New York *Independent* says: What is called Agnosticism, considered with reference to the religious truths taught in the Bible, is one of the forms of modern infidelity. Considered as a speculative philosophy, it antedates the Christian era by some four hundred years. Pyrrho, a Grecian philosopher, or rather, speculative lunatic, first preached it as the doctrine of absolute and universal doubt, so that nothing was certainly known, although his practice was a standing contradiction of his creed. The modern Agnostic, in relation to religion, is substantially a disciple of Pyrrho. He doesn't know, and can't know, and nobody can know, anything on this subject with a degree of certainty that excludes all he says reasons for doubt. He is here a doubter to an extent that cancels the power of religious ideas to influence and control his actions. If there be a personal God, that God, so-called, is necessarily to man the great "Unknowable;" and if there be a "hereafter" for man's soul, then this "hereafter" is in the same category.

It is quite true that our knowledge of God and of the future life, while in this world, is limited and partial, and hence far from being absolute and complete, even with all the aid afforded by the Bible. But it does not by any means follow that this knowledge is not sufficient for all the practical purposes of obligation and duty, or that we are in the state of total ignorance in respect to God and the life to come. Agnosticism is not a just conclusion from limited and partial knowledge. Some things we know, not the less really because we do not know everything, or indeed, anything, perfectly. There is no inconsistency between limited knowledge and the reality of knowledge. One may know by consciousness that he feels a pain in his body, and may locate that pain in reference to his body; and yet he may not know what caused the pain, or by what method it can be removed. So one may know that he sees an object, but not know what is the process of such vision. Ignorance in one respect does not discredit or disprove knowledge in another and different respect. The fact that God cannot, in this world, and perhaps not in any other world, be perfectly known, is certainly no proof that he cannot be known at all. There is a wide difference between the full *comprehension* of God and the positive and real *apprehension* of him, and that, too, sufficiently to make him an object of our worship and love. The doctrine of Paul and of right reason is that "the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead." The agnostic may refuse to accept this doctrine on the plea of necessary ignorance; but this will not make the doctrine the less true, or release him from the obligation to know and worship God. The human faculties, taken in connection with the evidence addressed to them, are competent to their task. The doctrine of a personal

God and that of a life hereafter are among the most universal thoughts of the race.

THE CONDITION OF JORDANS GRAVE-YARD.

A LETTER from Richard Littleboy, dated at Newport Pagnell, England, Twelfth mo. 17, and printed in the *Philadelphia Ledger* (First mo. 1), refers to some recent statements as to the condition of the ground at Jordans, in Buckinghamshire, near London, where William Penn and the members of his family were buried. R. L. is one of the Trustees for the meeting-house and grounds. The portions of his essential letter follow:

"Allow me to say that Jordans Burial Ground is situated in one of the most delightfully rural spots to be found in England, embosomed in luxuriant foliage, and, on a fine day in spring, summer or autumn, it has anything but a dreary aspect.

"Neither is it correct to say that it is dilapidated. The Trustees spare no expense in maintaining the building and fences in a good and substantial state of repair, and this fact can be testified to by many members of the Society of Friends from America who have visited Jordans. Among these I may give the names of Francis T. King, of Baltimore, and Charles F. Coffin, of Chicago (late of Richmond, Indiana), the latter of whom was there in June of the present year.

"The [reported] assertion [that Friends in England are growing fewer] is contrary to fact, statistical returns proving that membership in the Society of Friends in England has shown a progressive increase for some years past, and there never has been a time during the last century when so many among the masses of the population have been brought under its influence.

"It has not been the practice of the Society of Friends to erect elaborate monumental tombstones. We believe William Penn would have been one of the first to have objected to such a memorial in his own case. His place of burial was selected by himself, and for many years a plan of the graveyard was the only clue to the spot where the remains of himself and family were laid. About thirty years since the Trustees placed small headstones bearing the names of the deceased and the date of burial, and this simple record they believed to be in strict accordance with the unostentatious character of William Penn.

"In conclusion I may say that the Trustees have never entertained the plea of selling or abandoning the property. They feel a deep interest in it, and cherish the memory of the illustrious dead who are there interred."

"SPRAK a shade more kindly
Than the year before;
Pray a little oftener,
Love a little more;
Cling a little closer
To the Father's love;
Life below shall liker grow
To the life above."

SECTARIAN DIVISIONS.

The last half century has brought about a most encouraging change in respect to sectarianism. The walls that separate Christian bodies from one another, are crumbling away under the influence of the humanities, that, beginning with a fervent desire to extend the benefits of the Gospel to heathen lands; to fulfill the Master's parting injunction "Go ye into all the world and preach the Gospel," awakened the thought of the Church to the need of the Gospel of Christ in Christian lands as well.

And all that has grown out of this re-awakening has been brought about within the recollection of many whose hearts and hands are still active in the furtherance of so great a work in the world.

Believers in the gospel of love and good-will, when brought together in efforts for bettering the condition of the down-trodden and degraded, abroad and at home, were slow, indeed, to pass over denominational barriers; but the work came about we scarcely know how until only one separating line is left, that which divides the believers in the deity of Jesus from those who hold to his divinity,—the Evangelical and the Non-Evangelical. Yet even these, on lines of benevolence are found working together in the true spirit of Christian charity.

That there will always be differences respecting the interpretation of Gospel truth is clear, since our minds are so varied, and our acceptance of what has been written, is largely dependent upon our early training.

It is *sectarian prejudice* that divides the Church. Where the true spirit of Christ pervades and permeates the hearts of men, there is no room for aught but love and fellowship, and this is becoming more and more the animating spirit of those who are the leaders in all the movements that are drawing the various branches of the Church into a closer brotherhood.

The article by Edward Grubb in the *Friends' Quarterly Examiner*, of London, part of which we print in this week's issue, discusses with ability the situation of Friends in Great Britain, and must be read with interest, we think, by all concerned in relation to that subject. We have inserted a foot-note, at one point, lest it might be thought we fully agree

with the manner in which he alludes to the causes of the Separation of 1827 in this country, but what he says of the change in the attitude of English Friends toward the fundamental principle of Quakerism is so candidly and philosophically presented that this needs no expression of dissent. He speaks with truth of the changes which have taken place, by which the ruling element in the English body has reverted "to the popular theology," until "there is little besides mode of worship and disuse of sacraments," to distinguish its members "from the ordinary Evangelical dissenter." "We have taken many steps backward," says E. G., "towards that theology against which the early Friends revolted."

DEATHS.

COMLY.—At his residence, in Bristol, Pa., on Fourth-day, First month 2d, 1889, after a short illness, Emmor Comly, in his 78th year, an elder of Bristol Monthly Meeting, and formerly publishing agent of FRIENDS' INTELLIGENCER.

DEACON.—In Camden, N. J., Twelfth month 31st, 1888, at the residence of her son-in-law, Caroline, widow of William R. Deacon, of Burlington county, in her 66th year.

FAWCETT.—In Philadelphia, First month 1st, 1889, Isabella Fawcett, aged 77 years.

KAIGHN.—At the residence of her brother-in-law, Hamilton Haines, near Mt. Ephraim, N. J., First month 3d, 1889, Elizabeth Kaighn, aged 43 years.

MIDDLETON.—At Allentown, N. J., Twelfth month 31st, 1888, George Middleton, in the 80th year of his age.

SATTERTHWAIT.—At his residence, near Crosswicks, N. J., First month 2d, 1889, Nathan Satterthwait, in his 100th year.

SMITH.—Twelfth month 20th, 1888, Ella G., wife of J. Walter Smith, and daughter of Thomas and Elizabeth T. Brown, (member of Goose Creek Monthly Meeting), in the 27th year of her age.

SWAIN.—At her residence, Jacksonville, N. J., on Third-day, Twelfth month 18th, 1888, Meriba D. Swain, widow of Gilbert L. Swain, in the 83d year of her age; an elder of Burlington Monthly Meeting of Friends, and Old Springfield Preparative Meeting.

WATSON.—Twelfth month 28th, 1888, at his residence, 34 West Walnut Lane, Germantown, Philadelphia, Rudolph Justice Watson, in the 48th year of his age; a member of the Monthly Meeting of Friends held at Green street.

CALB MARSHALL.

Among the obituaries of recent date was noticed the decease of Calb Marshall, an old and well-known citizen of Philadelphia; and while we know that to his near friends this is all sufficient, it seems well, in view of the imperative need of this day throughout all communities of a higher standard of business integrity, if one may so distinguish between virtues, a more full and fearless *living* out of Christian principles, to make note of a few leading characteristics in the life of this Friend who was for many years essentially a man of business. In this connection his unblemished reputation for sterling integrity, straightforward honesty of expression, and a scrupulous observance of the Golden Rule as applied to the many-sided duties of

his busy life, have left a proud record to those who survive him, and a bright example for all travelling in the same road to success.

Disliking useless ostentation, he abounded in quiet, substantial comfort for his friends and without the knowledge of his left hand his right gave that which brightened many a home.

Although few business men perhaps could have been more diligent or attentive while engaged therein, he realized that the accumulation of wealth was not the true riches, and as one by one the home ties were broken, and wife and daughter with a blessing of love left him to return no more, he withdrew, not his interest, but that absorbing thought and attention from the busy cares about him, and centred his best affection where his treasure was, in the life to come. His free hospitality and cordial friendship made his home the scene of many a happy reunion, and while the genial presence will be sadly missed by a wide circle of friends, he gave such evidence of a clear title to the heavenly home, that we can but rejoice as he rejoiced, in the thought of the glad reunion there, saying to a friend, "I can scarcely wait the time." R.

For Friends' Intelligencer and Journal.

THE UNIVERSITY OF HALLE.

THE German Universities are all State institutions and resemble one another closely in government, purpose, and customs. Consequently what I have to say of Halle is true in general of all the rest. They are supported mainly at the public expense, and the government believes in spending the money for professors' salaries rather than on costly buildings.

The University of Halle, like the other Prussian universities is under the immediate authority of the Minister of Ecclesiastical, Educational, and Medicinal affairs at Berlin, to whom the Rector and Senate must report. The Rector, or President, is the representative of the university in all outside relations, and is elected every year by the whole body of ordinary professors out of their midst. The Senate is composed of a committee of ordinary professors under the presidency of the rector, and has the management of the general affairs of the university. The professors themselves are appointed by the Minister of Education and together with the Privat docenten compose the several faculties.

The extensive buildings of the Medical Department and the Agricultural Institute, the Royal Library, and the Botanical Garden are scattered in different parts of Halle. But the plain, rectangular building on School Hill, opposite the fine new City Theatre, is the main university building, where the lectures are held. When we enter the vestibule at nine in the morning, we find students loitering in the hall and on the stairway, reading the notices posted on the blackboard, the regulations governing the use of the different libraries, the applications for free board, stating meetings of missionary and scientific and other societies to which the students belong, various advertisements of booksellers, restaurants, etc. Every day the notice of the performance to be given at the theatre is posted up here, with the information that students can procure tickets from the Castellan (House Inspector) for less than half price. The four cases on the walls contain the an-

nouncements of the professors, stating the subjects and hours for their lectures.

But before we have read all of these notices, we had time to observe the red, the white, and the blue caps and ribbons which some of the students wear, the clock on the stairs strikes the quarter hour and the students seek their respective rooms ready for the lectures. We will enter Room 1. where Prof. Droysen reads lectures on early German history.

The room is very plainly furnished. There are no pictures or maps on the walls, and only one very small blackboard. The benches are hard pine boards, with no backs, and the desks are as simple in construction. The students hang their coats and hats on the hooks on the wall, get out their notebooks, their pocket ink-bottles, and prepare for writing. Many find the Latin script easier than the German and so employ it in their ordinary writing; others again mix the two kinds, writing some letters in Latin and others in German characters. Note-taking plays an important part with the students. The professors divide their material into parts, chapters, and paragraphs, and announce the beginning of a new division; thus enabling the students, who have followed with their notes, to secure a well organized treatise on the subject.

At twenty minutes past nine, the Professor comes in with a good-natured smile on his face and without ceremony mounts the *Kathedr*¹ and begins. "Gentlemen: With the death of Charlemagne's only son Louis, surnamed the Pious, this vast empire fell to pieces. Various attempts were made to divide it among his three sons. And it is especially profitable, as well as interesting, in these divisions to trace the growth of the national idea which finally separated the once united realm into three entirely distinct peoples, etc." The first words are spoken in a low tone, scarcely audible on the back benches; but as the lecturer proceeds, his voice gets stronger and louder. He does not spend time on battles and descriptions of wars, but rather in tracing the growth of ideas. He teaches the Past as the explanation of the Present.

Late students keep coming in, and disturb the lecture. The Professor takes no notice of it, however; he does not stop a minute in his discourse. He has nothing to do with the order, even in his own room. When he entered, a hush settled over the room; and any interruption from latecomers is reproved by an indignant hiss from the other students, which is more effectual than a reprimand from the Professor.

When the clock on the stairs strike ten, the Professor finishes and at once leaves the room. The students remain seated till he is gone.

The next fifteen minutes is the Academical Quarter again, and the students saunter through the rooms and passages and up and down the Grand Staircase in the center of the building, talking and getting rested ready for the next hour. It is really a lively scene that presents itself, when one is in the third story at intermission, and sees the hundreds of students promenade in groups through

¹ i. e. The Professor's platform and desk.

the arcades, and on the stairway. For the whole interior of the building is visible at once. Around the four walls, just above us, is a newly completed painting, representing the four faculties of Theology, Law, Medicine, and Philosophy. The German universities are really great professional schools for the Minister, the Lawyer, the Physician, and the Teacher. They have therefore a very definite aim, and they are excellent for the directness with which they pursue that purpose. They do not accept our idea of a university as a place where everything is taught; but on the contrary, refer to the origin of the term in the Middle Ages, when it meant merely a corporation or union. So the old designation, *Universitas magistrorum et scholarum* (corporation [composed] of master and scholars).

But the intermission is already over, and the staircase is deserted. We entered Room XI. on the third floor, and in a few minutes Prof. Ewald comes in and begins his lecture on the "History of Prussia since the Great Elector." This Professor believes in battles; for the whole course is nothing but a story of the wars in which Prussia has been engaged and how she has managed thus far to come out of the conflict so well.

There are never any questions asked during a lecture. If a student wishes to consult a professor further, he visits him at his home. I find this likewise the case in the Gymnasium, although of course it is not so strictly carried out there. Seminars, however, offer opportunities for discussion and original work under the oversight of the professors. If you inquire for the earnest students, you will find them nearly all in the Seminars.

No time is wasted by the professors in trying to make those work who will not. Any one who chooses can be absent from his lectures half the time and never open a book to read; he may speak to his professors only to ask them to enter their names in his "Anmeldebuch," and yet such a man could pass for a student. On the other hand, any one who endeavors to make the best of his opportunities, can hear the most learned lecturers on all subjects, have access to the stores of books in the great libraries, make the acquaintance of the foremost professors in all the different departments of human study; and if he shows any talent at all, is sure of being well received and cordially helped everywhere. Besides, he is pretty sure to find co-workers in almost every branch he may undertake.

HERMAN T. LUKENS.

Halle, a S., 12mo 22, 1888.

SWARTHMORE NOTES.

THE College is now fully reorganized after the brief holiday season, and several new students are added to the lists. The second semester begins on the 4th of next month.

—Swarthmore is now taking an honorable place among the colleges of our country. The following, clipped from the *New York Mail and Express* of the past week will be read with interest and satisfaction:

Institutions fitted to do well as intermediate colleges,

whether now called universities, colleges, and high schools, number already several hundred, and of these, the colleges carried on by the Society of Friends at Swarthmore, Haverford, and Bryn Mawr, are, of all within my knowledge, the best and most truly flourishing, because conducted with the most thoroughness, cleanliness, and intellectual honesty, and our other small colleges, even many so-called universities, would do well to profit by their example. A little "Quaker honesty" in calling things by their right names at several such institutions, would greatly increase the number of students and would raise them enormously in capacity for good work in the estimation of the country and in their own self-respect.—*Andrew D. White, in the Forum.*

—Prof. Cunningham is now fairly established in her new home, connected with the observatory. Her friends greatly enjoyed their social reunion there on New Year's day.

THE PAID PASTORATE AMONG WESTERN ORTHODOX FRIENDS.

THE definite and systematic paid pastorate system adopted by the Yearly Meeting of Iowa has occasioned considerable discussion in the several Orthodox journals. It appeared when the Yearly Meeting met this year (in 9th month), that there were 16 regularly supported "pastors," (as against 4 such the year before), and that there were about 20 others who spent "quite a portion of their time in pastoral work,"—though whether receiving a definite support in money or not, was not stated.

The *Friend*, (Philadelphia), disapproves of this very decidedly, as also does the *Western Friend* (Wilbur) of Varck, Kansas; and the *British Friend*, (Glasgow), approves the views of the *Philadelphia Friend*. The *London Friend* is disposed to regard the pastoral system as something very far removed from the English body, and probably justifiable, if not necessary, under the different circumstances prevailing in Iowa. We do not observe that it expresses a strong attachment to the principle of a free ministry. We give below some of the comments upon the subject, made by the different journals mentioned, and also by the *Christian Worker*, of Chicago, which represents the revival and paid pastorate methods.

The *Friend*, (Philadelphia), says:

"The whole statement discloses on the part of that Yearly Meeting a most sorrowful and rapid departure from the principles and practices of Friends—a departure which, if not arrested, must evidently deprive that body of any just claim to be regarded as a true representative of the doctrines and testimonies of our Society. There is perhaps no more characteristic feature in the system of Quakerism than that true worship consists in drawing near unto God in spirit, and endeavoring to feel the extension of his Divine life and power, which alone can qualify us to worship Him in spirit and in truth; that in meetings for worship it is the duty of every individual thus to feel after God, if haply they may find Him; and that this is a work which no one can perform for another.

"Vocal ministry holds but a second place in this system; and unless it flows from the fresh feeling of

Divine life, impressing on the mind of the speaker a sense of present duty to speak, it will be a hindrance instead of a help in the performance of spiritual worship. When it is stately exercised in a meeting, there is a strong tendency for the hearers to depend upon it instead of laboring for themselves to draw near to the Fountain of Life in their own hearts. The employment of persons to preach in our meetings, no matter under what plausible excuses the practice may be defended, is a radical departure from our principles.

"Scarcely less objectionable is the system of hiring a man to spend his time in looking after the spiritual interests of the individual members of a meeting,—which we suppose to be one of the objects contemplated in the appointment of a "pastor." It is the duty of *all* the living members of the Church to watch over one another in love, to caution a brother who seems in danger of going astray, to encourage those who are depressed, and to sympathize with those in distress. To those who are alive in spirit, services of this kind will be assigned by the Head of the Church, as He sees meet, and as their degree of spiritual experience may qualify. These individual duties cannot rightly be deputed to one another. We cannot hire a man to do them for us, and hope to receive the blessing which attends the faithful performance of duty. The extension of such a system of doing duty by proxy, when fully developed, ends in priestcraft—where a man is employed to attend to the spiritual interests of others, who in the meantime may give their time and thoughts to merely worldly pursuits, and yet vainly hope to secure the favor of Him who looketh upon the heart."

The *British Friend* remarks:

"It is not surprising that an announcement in such terms should give rise to widespread concern throughout London Yearly Meeting. We are frequently told by those who do not so seriously wish this and other manifest departures from the cherished principles and practice of Friends, that we in this country, are not in a position to judge our American brethren; that we are not sufficiently aware of their circumstances and surroundings to entitle us to condemn or criticise such of their actions or methods as may not commend themselves to our ideas of what is right. Our information may, to some extent, be imperfect, but for ourselves we can say that having paid rather close attention to the reports of several of the yearly meetings recently held in America, and while appreciating the earnestness of spirit which is so strikingly manifested, yet there are sayings and doings which we cannot regard without grave and serious misgivings."

The *Christian Worker* is disinclined to accept the plea of the London *Friend* that a paid pastorate may be justified in Iowa because of different circumstances. It says (Eleventh month 29): "But we think it is a delusion to suppose that the meetings of Iowa need pastors any more than they do in any other yearly meeting. Why should a meeting isolated a thousand miles away from the body of the

church need a pastor any more than a similar one ten or twenty-five miles away? What reason is there for providing a pastor over a meeting in California or Dakota or Wisconsin which does not apply as well to a similar meeting in Indiana or New York or Maine or North Carolina?"

"Within short distances from Friends' meetings all over our country there are places where the door is wide open for Friends. When evangelists hold revivals and start the work, pastors are needed to go and stay by it, and money is needed to sustain them in doing so, as much as if these meetings were in the far West. Hundreds of churches might be established yearly, within the limits of the yearly meetings east of Iowa, if provision were made for sustaining them. Some of the readers of this remember the appeal from southern Illinois made by Stephen Breed last summer; to a greater or less extent the same needs and opportunities exist in nearly every quarterly meeting in America, if there was the spirit of aggression to press out and take possession of the land.

"Iowa's cities need Quaker evangelists and pastors, and in some of them pastors are already established and doing a blessed work; but Des Moines and Pasadena need them no worse than Chicago, and Indianapolis, and Cincinnati and New York. The fact is, it is folly to talk about church extension without pastors; as well talk about revivals without evangelists, or schools without teachers."

These views of the *Christian Worker* awaken the *Friends' Review* (Philadelphia), the representative of the Gurney Friends in the East, to a protest. It says (Twelfth month 13):

"Without pastoral labor, no one thinks of church extension, or even of church preservation. Such labor, the function of pastors, in the apostolic meaning of the word, has been carried on since Christianity began. Where 'two and two' cannot go out, after the primitive manner, one may sometimes be called to go into a new field alone, and perhaps to sojourn there awhile in service. But to fulfill the *Worker's* scheme, what shall we have? A pastor, the pastor, suppose, of 'the Friends' church' in New York city, with a good salary, and a parsonage adjoining; three pastors (and parsonages) for Philadelphia, etc. How such an anticipated possibility would, if then conceivable, have appeared to George Fox, or William Penn, or John Woolman, or Stephen Grellet (eminently an evangelist), may be easily imagined.

"It seems to be implied [by the *Worker*] that those who are not convinced that a one man pastorate, away from missionary fields, and in settled meetings, is the best order of things amongst Friends, are not 'full of the evangelistic spirit,' and are opposed to pastoral work in the church. This is not so. We cling, instead, to the precedents of the churches established under the ministry of Peter, Paul, and the other Apostles, and under the later evangelists and pastoral work of those who founded the Society of Friends, in holding that 'to each one' of the living members of the church 'is given the manifestation of the Spirit to profit withal; ' 'dividing to each one

severally even as he will.' Thus only can all 'grow up in all things into him, which is the head, even Christ; from whom all the body fitly framed and knit together through that which every joint supplieth, according to the working in due measure of each several part, maketh the increase of the body unto the building up of itself in love.'"

The *Western Friend* says that it has "repeatedly denounced, as utterly without foundation in truth, the excuse that the difference in circumstances made necessary the changes in our Society in America, with which many English Friends do not agree. By this excuse English sympathizers with modern innovations have for years successfully—in too many instances—reconciled many sound Friends in England to the flagrant departures from Friends' principles and practices in America."

For Friends' Intelligencer and Journal.

LINES.

THERE is a power, all other powers above,
Whose name is Goodness, and whose nature Love,
In whom my soul relies in perfect trust,
Because I know His every law is just.

From mountain heights, to ocean depths serene
O'er hill, o'er vale, through every changing scene,
His spirit moves to-day, the same as when
His glorious works were first revealed to men.

From time's first dawn, until the same shall end,
Toward one wise purpose do His movements tend,
And though while here this is from us concealed
In all due season it shall be revealed.

Until that time, whate'er may be our creed,
Our thirsting soul must call on Him in need:
In perfect faith, that He who made will see
His children safe to immortality,

BENJ. HALLOWELL, JR.

Philadelphia, Twelfth month 11, 1888.

MY FRIEND.

AT set of sun,
Through musings dun,
A knock broke on my startled ear,
A voice said, sweet and silvern clear,—
"Open, a Friend is at thy door."

I answered slow,—
"No friends I know,
Nor trust in friendship any more,—
Friends sting and flay,
Friends go their way,
And leave one lonelier than before.
Better to dwell apart,
Keeping an empty heart,
Than see love's smile become hate's frown,—
Better a stralss gloom,
Shut in a silent room,
Than ghosts slow-gliding up and down."

Again the sweet voice came,—
"Yet open all the same,
For I have need of thee,
Though thou hast none of me,—

I hunger, thirst, am naked, sick, and poor;
The weary sun is set,
My locks with dews are wet,
My face with tears,—I pray thee, ope thy door."

Such plea I could not choose
Unpitying to refuse,
Yet half-reluctant still the bars I drew,
Gave food and wine,
Garments of mine
Mended and cleansed to look like new,—
Nay, more, as love with labor grew,
And patient use brought skill,
Turned nurse with right good-will;—
Lastly, my scanty purse did part
With him who so had won my heart.

Oh, wondrous change and rare!
In royal garments drest,
Not suppliant, but King, stood there,
And clasped me to His breast,—
Not guest, but Host,
Who, in his turn, fed me at dearest cost—
Not pensioner, but Friend,—
A Friend at sorest need,
Of kindest word and deed,—
And best of all, a Friend,

Whose love flows on and on, and knows no end.

—W. M. L. Jay.

THE POPULAR POPLAR TREE.

WHEN the great wind sets things whirling
And rattles the window-panes,
And blows the dust in giants
And dragons tossing their manes;
When the willows have waves like water,
And children are shouting with glee;
When the pines are alive and the larches,—
Then hurrah for you and me,
In the tip o' the top o' the top o' the tip o'
the popular poplar tree!

Don't talk about Jack and the Beanstalk—
He did not climb half so high!
And Alice in all her travels
Was never so near the sky!
Only the swallow, a-skimming
The storm-cloud over the sea,
Knows how it feels to be flying—
When the gusts come strong and free—
In the tip o' the top o' the top o' the tip o'
the popular poplar tree!

—Blanche Willis Howard, in *St. Nicholas*.

It is said that photography has recently been employed in some cases in this city with telling effect in a new sphere of usefulness. An agent of the Society for the Prevention of Vice, baffled by police intervention and otherwise in obtaining conclusive evidence of the bad character and illegal practices of certain doubtful places, has managed to take "instantaneous views" at several concert-halls and other disreputable places, and it is said that even the officials who, from some consideration have been disposed to shield the proprietors, find it hard work to contradict these pictures and the story they tell. All hail the photographer in the new character of philanthropist and reform.—*National Temperance Advocate*.

OBSERVATIONS OF THE SOLAR ECLIPSE.

SAN FRANCISCO, Jan. 2.—Professor Pickering, of the Harvard University party, telegraphs from Willows regarding yesterday's eclipse that the sun was perfectly clear during totality. Over fifty photographs were secured. The party consisted of four observers from Harvard and twenty-nine local assistants. Fourteen telescopes and cameras were employed and eight spectroscopes, besides miscellaneous apparatus. The first contact was lost through clouds. The three were observed at a duration of 11.8 seconds. Eight were secured with a thirteen-inch telescope, giving images two inches in diameter before enlargement; nine were taken with an eight-inch camera, one being erythrisina plate through stained gelatine.

Twenty-five negatives were taken to measure the brightness of the corona and surroundings; five negatives to search for inter-mercurial planets; twenty to study the spectrum of the corona to determine its composition. These will reach from yellow rays to extreme ultra violet. For the latter purpose a spectroscope was employed with lenses and prisms composed exclusively of quartz. Seven observations were made with photometric measure. General illumination during totality was found lighter than the eclipses of 1878 and 1886. The corona was similar to those of 1868 and 1878, but showed much more detail than the latter. It was an exceptionally fine corona extending usually on one side to two solar diameters. A striking characteristic was two forked wings of light Polar ray well defined and considerably shorter. The meteorological observations were under the direction of Winslow Upton, of Providence, R. I., and A. L. Blotch, of Blue Hill Observatory. The photography and spectroscopy were under the direction of Professor W. H. Pickering, chief of the Harvard College party, assisted by S. Bayley, E. S. King, and Robert Black, of Harvard.

At Cloverdale the eclipse was observed with great accuracy by the Pacific Coast Amateur Photographic Association. The weather was favorable, no apparent wind and a cloudless sky, excepting a few floating cirrus clouds. The eclipse was first noticeable at 12.23; the totality began at 1.46 and lasted one minute, 44 seconds, time, Pacific standard. Shortly before totality the cirrus clouds were all tinged with the most brilliant colors of the rainbow. Venus appeared early in the eclipse and Mercury and other planets were plainly in view.

A party of observers from Carleton College, Northfield, Minn., consisting of Professors Payne, Pearson, and Wilson, were located on an open plot on the famous ranch of General John Bidwell. The party used a six-inch photograph telescope and other photographic apparatus and a two-inch zenith telescope. Professors Wilson and Pearson exposed nine plates during the period of totality and six between the first and last contact observation.

* Sketches of the corona were made by Professors Wilson and Payne and Surveyor Brown. The sky was not perfectly clear. Four long streamers were seen from prominences and the chromosphere was strong for a full quadrant distance of the west side of the sun. The northern and southern limbs of the

sun showed a great number of fine radiating filaments. At Anaheim the eclipse was plainly visible. No photographs were taken, but it is claimed an intermercurial planet was seen during the period of the sun's greatest obscuration.

At San Jose observations were taken by the Normal School observing party, which consisted of Prof. Kleeberger, Holway, and Randall, with a four-inch refractory telescope and smoked glasses. At the time of the greatest obscuration "Barby's heads," the corona, and prominences were carefully looked for but were rendered invisible by floating clouds and the unobscured portion of the sun. Venus was plainly seen with the naked eye. Among the incidents of the phenomena observed was the effect of the eclipse upon the images of the sun formed where its light shone through apertures. A beam of light showing through a crack in a shutter formed innumerable interlaced and overtopping crescent-shaped images of the sun.

The University of the Pacific has a fine transit instrument and a six-inch refractory telescope in its observatory. Observations were made by Professor Wilbur W. Thoburn, assisted by Professor A. H. Briggs. During the first quarter of the eclipse the sky was obscured by clouds but from that time on was comparatively clear. At the moment of greatest obscurity the sun was almost hidden except a very thin crescent on the southern edge. The mountains of the moon were clearly outlined against the sun. The sharpness of the moon's edge on the disc of the sun was especially marked. During the last half of the eclipse the obscurity seemed to be that of twilight. Three of the planets were visible. Venus and Mars in conjunction were easily distinguished with the naked eye.

At the observatory of Professor George Davidson in San Francisco, under the charge of Professor R. A. Marr, of the United States Coast and Geodetic Survey, the path of the eclipse was closely noticed. During the early stages of the transit complementary colors were visible. The first contact was marked at 12.23 and the last at 3.09. The sun's edge, owing to atmospheric conditions, seemed to be throwing off numerous columns of vapor.

WOMEN'S CAPACITY FOR GOVERNMENT.

THE layman who labors under a feeling of essential inferiority to scientific men because their work is beyond his comprehension, may take comfort on seeing how little the work of scientists differs from that of ordinary men when they address themselves to general questions. The latest illustration of this is furnished by Prof. E. D. Cope's article on "The Relation of the Sexes to Government," in the *Popular Science Monthly*. The article opens with some observations on the antiquity of the difference between the sexes, and on the great advance which was made in the possibilities of progress when sexual reproduction first made its appearance among living things; but the unwary reader who is led to expect that this exceedingly ancient history is going to throw any light on the question, will find himself completely disappointed. In point of fact, the author himself

soon leaves this "scientific" point of view, and rambles in a very inconsecutive manner over the familiar ground of woman's disabilities, as disclosed by what he calls "ordinary observation." The arguments of the article depend essentially on the unquestioning acceptance of the results of such observation, which are embodied, in the main, in the following passage:

"We find in men a greater capacity for rational processes, a capacity which is not always exercised to its full. We find in men a greater capacity for endurance of the activity of the rational faculty. We find in men a greater capacity for work in the higher departments of intelligence which require mechanical skill of a high order."

Prof. Cope not only accepts, without so much as the insinuation of a doubt, these results of a kind of observation which if a scientific man were to accept in his specialty, he would be supposed to have lost his senses; he does not for a moment consider how great may be the degree of this incapacity, but takes it for granted that it must be sufficient to be fatal to the claims of women. He says elsewhere that most men have had to steel their minds against the aimlessness and pettiness of women, and have observed in them "a pronounced frailty of the rational faculty in thought or action." It is to be hoped that a very respectable minority among men have been more fortunate; but in any case, does Prof. Cope think it scientific to assume, as he does throughout his article, that if women should take part in government, all the beautiful qualities for which he gives them credit will take flight, while the aimlessness and pettiness and irrationality will remain unaffected? Whichever side one may take on the question of women's political aspirations, one may regret that scientists should not set an example of clear and consecutive thinking when discussing a subject upon which plenty of loose writing has been done. And the sooner scientific writers learn that the catchwords of evolution and of physical science are not sufficient to give authority to their utterances on subjects which require chiefly sound judgment and knowledge of human affairs, the better it will be for their influence in the world.—*N. Y. Nation*.

EDUCATION BY ANNEX.

It seems to be a wonderfully difficult matter to settle in what sort of a school a woman should be educated. The two extremes have their strong advocates, the one, education in the seclusion of a convent, the other in the same college with young men. Between the two extremes there are two means, the one of which is separate colleges for women, and the other an annex to the existing masculine university. Convent : women's college : annex : : coeducating university.

We have many times expressed our opinion that the coeducating university has on its side reason and what brief experience there is, and we do not doubt that the example of Oberlin, followed by Michigan, Cornell, and many other universities and colleges, especially in the West, will finally be followed by all. But the East moves slowly and must

be patiently wooed by this reform. Meanwhile the East sees well enough that women's education must not suffer; perhaps we had better say that the young women will not allow themselves to be left behind. Hence such admirable institutions as Bryn Mawr, Smith, Vassar, and Wellesley colleges, in which, as far as possible in young institutions, the appliances and privileges of colleges for men have been duplicated. They have won their own place, and women flock to them, earnest for all the learning the best teachers can supply. They have different plans, but whether they approach now the fitting school and now the system of university research, or not, they certainly provide for obtaining an admirable education.

The Annex system is now receiving great and admirable development. Here Harvard led the way, and has provided a curriculum as complete and thorough and with as many elective courses as the young men themselves have. . . . Of the 103 students, 88 come from Massachusetts, showing the importance of providing school privileges within easy reach. To these students, on their graduation, there are not given diplomas certifying to degrees, but only certificates that they have honorably pursued the full course which would have given them the degree of A. B. if they had not unfortunately been born of the less-privileged sex.

What Harvard has thus been doing so admirably for eight years, Columbia College, with her magnificent equipment, now offers to do, and an excellent scheme of study has been announced. The women were already besieging the doors of the college, and asking for equal admission. Not ready to grant this, the trustees and faculty have lent their aid to this compromise between coeducation and conventualism.

Princeton has a similar scheme, and only Yale, in a State which has no college for women, still confines to the less numerous sex the opportunities for higher education which she is so well able to offer to all. Believing as we do that coeducation is to be the ultimate achievement, we heartily welcome these halting, imperfect and discriminating, but, so far as they go, admirable steps, in the direction of the desired result.—*N. Y. Independent*.

FROM the earliest glow-worm glimmer of life on this planet, man has been growing upward, angelled. Religion was at first fear and depression, the worship with the downward look. Then it became introspection, then self-castigation. Finally, it became union,—union on the basis of love. John rested on Jesus' breast. Jesus said, "I dwell evermore in the bosom of the Father." Then inspiration became possible. Inspiration is simply breathing in. We must stand erect, morally and believably. We must open all the avenues of our souls, every street, way, and cell of thought and feeling, and the Infinite will greet us. Every occurrence which makes a man more straightforward, more simple and direct in his manner, more conscious of moral responsibility, fits him for inspiration.—*Selected*.

"JAMAICA GINGER" AS AN INTOXICANT.

THE *Boston Traveller* in a recent issue says: A somewhat peculiar case was tried before Judge Sherman in the Superior Civil Court at Dedham during the past week. William H. Doble, a grocer, was arraigned upon the complaint of Henry H. Faxon for violating the liquor law, the offense specially charged being the sale of Jamaica ginger as an intoxicant. It appeared from the evidence that the defendant had been doing a rushing business in this article, his sale at retail at times reaching two cases a week. One customer, a woman, was cited in particular as consuming inordinate quantities of this article, it being stated that she had in one instance been known to purchase two bottles during a day,

It was alleged by the prosecution that this demand for Jamaica ginger was not of a medicinal origin, and that many of the grocer's patrons were Jamaica ginger drunkards, a species of inebriates by no means uncommon. State Assayer Sharples was put upon the stand and testified that the Jamaica ginger sold by Doble was pretty good Jamaica ginger as Jamaica ginger goes, but he created something of a sensation when he furthermore added that it contained 69 and a fraction per cent. alcohol, but 3 per cent. being purely Jamaica ginger extract and the balance water. Ordinary grades of whiskey, he said, did not contain over 50 per cent. of alcohol, so, according to expert testimony, Jamaica ginger was 20 per cent. more of an intoxicant than the common run of tangle-foot.

The Jamaica ginger, moreover, not only served to increase the strength of the alcohol, but when the whole was used as a habitual beverage had an effect upon the stomach that was pernicious to a superlative degree. Lawyer John E. Eldridge, counsel for the defendant, was not abashed by this expert evidence, and asked that the court instruct the jury that his client could not be convicted, as he had sold simply Jamaica ginger, which was not a beverage, but a medicine, whereas he was charged with selling intoxicating liquor. The court refused to rule as requested, but told the jury that it was a question of fact that they were called upon to consider and not of law, and they were to decide whether or not it was intoxicating liquor.

That portion of the statute defining intoxicating liquors was read, as follows: "All porter, strong beer, lager beer, cider, all wines, and any beverage containing more than three per cent. of alcohol by volume, at 60° Fahrenheit, as well as distilled spirits, shall be deemed to be intoxicating liquors within the meaning of this chapter." After being out some hours the jury disagreed, and were discharged, and the much-mooted question in Dedham of whether or not Jamaica ginger is an intoxicating liquor remains undecided. But this case will doubtless serve to draw attention to the large number of people who have become addicted to its habitual use other than as a medicine.

It is said by medical authorities that those who have once contracted the habit of using it as a beverage find themselves afflicted with a craving of whose intensity none but a sufferer can form the

slightest conception. The deleterious effect of the ginger when constantly taken into the stomach is sufficient to render the habit fatal in a very short time. In fact, it is one of the most dangerous forms of inebriety known. It has found but few victims in large cities where stimulants are easily obtained, but in the rural districts where Prohibition is in force it is said to have filled many graves.

ADVERTISING FOOLISH WOMEN.

THE press is always turning up the whites of its hundred eyes in sorrow and amazement at the frailty of women, the littleness of their thoughts and aims, the uselessness of what they read and write and do. Yet what sort of pattern does the press hold up for women's emulation? The woman who is pretty and vain, or notorious and vicious in an interesting way, may quickly rise to some kind of celebrity, for journalists build newspaper columns beneath her, and raise her on a shaky pedestal of glory. But the good women who win fame, win it more slowly, and without assistance from the fourth estate. The women who inaugurate, manage, and support a hundred schemes of charity and good, even in this city, win the reward of their own consciences merely. The voice of the world says nothing to them in commendation or encouragement. The noble deeds that are done by women, are done in silence and obscurity. How many works which need publicity to secure success can get gratuitously so much as a cold notice in small type in any Sydney daily? Think of the wasted time of the reporters, correspondents, and compositors, the expense of cablegrams and "special wires" to register the latest freak of vanity, the skillful accomplishment of something evil, or to procure the minutest evidence of some indecency or murder! Would they but spend the same time and money, and give the same publicity to the worthy deeds of good women, the world, in face of so much recorded nobleness, might in time see fit to raise somewhat its standard of thought and action.—*The Sydney Australia Dawn*.

TOWN-LIFE AS A CAUSE OF DEGENERACY.

THE general unfitness and incapability of the dwellers in our large hives of industry to undergo continued violent exertion, or to sustain long endurance of fatigue, is a fact requiring little evidence to establish; nor can they tolerate the withdrawal of food under sustained physical effort for any prolonged period as compared with the dwellers in rural districts. It may be affirmed also that through the various factors at work night and day upon the constitution of the poorer class of town dwellers, various forms of disease are developed, of which pulmonary consumption is the most familiar, and which is doing its fatal work in a lavish and unerring fashion. Thus it may be conceded as an established fact that the townsman is, on the whole, constitutionally dwarfed in tone, and his life, man for man, shorter, weaker, and more uncertain than the countryman's. I hold the opinion that the deterioration is more in physique, as implied in the loss of physical or muscular power of the body, the attenuation of muscular

fiber, the loss of integrity of cell-structure, and consequent liability to the invasion of disease, rather than in actual stature of inch-measurement. The true causes of this deterioration are neither very obscure nor far to seek. They are *bad air and bad habits*. To these may be added a prolific factor operating largely to produce degeneration of race, and that is, *frequent intermarriage*, often necessitated by religious affinities.—*G. B. Barron, M. D., in Popular Science Monthly.*

ANNOUNCING OF THE EMANCIPATION PROCLAMATION.

THE meeting to commemorate the issue of the Proclamation of Emancipation by President Lincoln, held at Association Hall on the 2nd instant, was largely attended. It was held under the charge of "The Pennsylvania Society for Promoting the Abolition of Slavery and for the Relief of Free Negroes Unlawfully Held in Bondage and for Improving the Condition of the African Race." At the afternoon session, at 2.30, William Still presided. Among those on the platform were Frederick Douglass, Gen. S. C. Armstrong, principal of Hampton Institute; Frances E. W. Harper, Passmore Williamson, Bishop E. T. Tanner, Charles Wise, Ex-Mayor King, Henry M. Laing, Dr. H. Wayland, Dr. R. J. Allen and Robert Purvis.

In his opening address, Wm. Still mentioned the institutions that have been aided by the Pennsylvania Society. Among them are Lincoln University, Pennsylvania; Howard University, Washington, D. C.; Wilberforce University, Ohio; New Orleans University, Louisiana; Stover College, Maryland; Berea College, Kentucky; Hampton Normal Institute, Virginia; Schofield Normal Institute, South Carolina; Councils Normal Institute, Alabama; Institute for Colored Youth, Philadelphia; Home of St. Michael, Philadelphia; Home for Destitute Colored Children, Philadelphia; St. Mary Street Kindergarten, Philadelphia; Schools at Christiansburg, Virginia; Beaufort, S. C.; Eagles, N. C.; Orangeburg, N. C.; Austin, Tenn.; Mt. Pleasant, S. C.; Brooks, Va.; Park, Ga., and Franklin, S. C.

The speakers in the afternoon were B. F. Lee, editor of the *Christian Recorder*, and ex-President of Wilberforce University, Ohio. He spoke on "The Moral Progress of the Negro Race in Twenty-five Years of Freedom." The address dwelt mainly on the influence of Christianity in the development of the negro character. He thought the development of the moral character of the American negro was largely due to the negro himself.

The second speaker was Dr. R. J. Allen, secretary of the General Assembly of the Southern Presbytery. He is the son of an ex-slave owner and comes from the "black belt." He thought the only way to solve the negro problem was to put in the hands of the race the Bible and spelling-book, and teach them the responsibility of American citizenship. He said: "You can't find dynamite, or an Anarchist or a secret society among these people."

General S. C. Armstrong, president of the Hampton Normal Institute, followed in an interesting talk

on the moral and intellectual advancement of the race. His speech was largely historical, and at the end the orator declared that at the close of the war the colored man was in a better condition to take care of himself than the man that owned him.

At the evening session, after Bishop Foss, of the M. E. Church, had spoken, Frederick Douglass was the principal speaker. He addressed the large audience with much of his old-time spirit and eloquence. He said among other things: "I listened this afternoon with much interest to the words of the speakers—a most encouraging picture of the vast change in the condition of the colored race. There are two sides to the question. The truth is so large that it requires a great many people to tell it: white men are required to tell it; black men are required to tell it. . . . I object to anyone calling our relation to the white race the negro problem. It is not true—it is misleading. I object to it because it exceptionally tends to obstruct the path of duty—the growth of truth. I object to it because it shifts the burden from the shoulders of the whites to the negroes; it puts the dealing with this problem not with the native white but with the native black. It proceeds with the idea of the negro's inferiority; his lack of intelligence, his lack of education. . . . The question is not so much the negro, but the nation. The solemn question is this: Whether the American people, under the influence of their civilization, their Christianity, extending over hundreds of years, have virtue enough to adjust the Constitution of the country to what it pledges to all men alike, a free exercise of citizenship. I only ask that the black man be treated as you treat the people who fought against us. We love our country, and only ask to be treated as those who hated it.

"Slavery continues to exist in the South, where the highest wages paid the negro in his fluttering rags, is \$8 per month, with which he must clothe and support his family, and which he must take in store orders from his employers. He never sees a dollar of it. The motto down there is, 'Work for me or starve.'"

After Frederick Douglass concluded his address a daughter of F. E. W. Harper read a poem, which was well received. Fanny W. Coppin and Mrs. Harper also made addresses.

THE man who sides with God against the world and himself feels the power of the future in him. He only is alive who is inspired. Unless born of the Spirit, you cannot be saved. Wordsworth knew what it was to be thus enlivened. He said,

"Such animation do I often find,

Power in my breast, wings growing in my mind."

Believe that inspiration is ahead of you and within. It is a messenger of God. It is the crown of effort and of purity. It does not descend with family heirlooms, mental or moral. It is the gift of God to the individual.—*Exchange.*

As God is in the universe, and the universe in God, it is clear that the divinity in us is the universal mover of man's mind.—*Aristotle.*

SCHOOL EXAMINATIONS.

It can not be too often insisted on that examination is a good educational servant, but a bad master. It is a useful instrument in the hand of a teacher to test his own work, and to know how far his pupils have followed and profited by his teaching. But it necessarily exerts a fatal influence whenever it is made of such importance that teachers simply conform to an external standard, lose faith in themselves, sink into the position of their own textbooks, and give but little of their own personality to their work. It is true that it is necessary to test the work of teachers; but it is not necessary, for the purpose of doing so, to take the whole soul out of teaching. If examinations are to be defended on the ground that they test the efficiency of teachers, then we reply that other and better ways of doing this are to be found. We admit quite frankly that they can only be found and pursued at the price of some trouble and experiment on the part both of parents and those responsible for the conduct of teaching; but if trouble and thought and experiment are to be spared in this great matter, we had better at once resign the hope of attaining any moral and intellectual results of real value from what we are doing.—*Popular Science Monthly*.

NEWS AND OTHER GLEANINGS.

—“Some years ago,” writes John G. Whittier to a friend, “I destroyed a large collection of letters I had received, not from any regard for my own reputation, but from the fear that to leave them liable to publicity might be injurious or unpleasant to the writers or their friends. They covered much of the anti-slavery period and the war of the rebellion, and many of them I know were strictly private and confidential. I was not able at the time to look over the manuscript, and thought it safest to make a bonfire of it all. I have always regarded a private and confidential letter as sacred and its publicity in any shape a shameful breach of trust, unless authorized by the writer. I only wish my own letters to thousands of correspondents may be as carefully disposed of.”

—A late number of the *Pall Mall Gazette* (London), remarks: “Lord Salisbury gave the deputation yesterday but sad comfort which asked him to use his influence to prevent the wholesale poisoning of the natives of Africa with trade rum. He would do what he could, he said, but that was not very much. Considering the extent to which we are poisoning the natives of India for the good of the Excise, and also bearing in mind the millions reaped from the opium trade with China, it can hardly be said that John Bull can go a crusading with much hope of success against selling strong drink in Africa. If Germany were to say, We will give up poisoning the Africans with potato spirit from Hamburg if you will give up poisoning the Chinese with opium from India, what could we say?”

—Corn is one of the most important articles of our export trade. In 1887 we sent out over 40,000,000 bushels, the total value of which was \$19,374,361. In other years we have nearly doubled this amount. It would surprise one unfamiliar with the facts to know that practically all of this export is used abroad to feed cattle. Of the use of corn in the preparation of table food the foreigner knows nothing. At the present moment the German peasant is paying nearly double the usual price for wheat loaves, or

else starving himself on a diet of coarse rye bread. Within his reach is this cheap food, one of the most delicate and nourishing known to the American epicure. He does not use it because he has never been taught to do so. No doubt the obstinate dislike to accepting new ideas, so strange to an American but familiar to every observer of European habits, is largely responsible for this curious fact.—*New York Commercial Advertiser*.

—Harriet Hosmer says that Elizabeth Barrett Browning and Lord Brownlow (the son of Lady Marion Alford) are the two persons she has known in her life, who had that peculiar elevation of nature which seemed to prohibit an unworthy thought when in their presence.

—Helen Gladstone, vice-president of Newham College, (England), after eleven years' experience at Cambridge, says she is convinced that the “full cultivation of women's intellectual powers has no tendency to prevent them from properly discharging domestic duties.”

—The *New York Tribune* says: “Women are studying medicine in England in thorough earnest. At the recent examinations at London University, ten of the nineteen passes for honors were taken by women. In anatomy they took three of the six honors. In physiology they secured four out of six. In materia medica only did they fall behind, and even there they got three of the seven honors.

—Nearly 19,000 women voted at the recent school election in Boston, (Twelfth month 11). All the members elected to the school board this time are Protestants. Eight Roman Catholic members hold over from last year. There are twenty-four members in all.

—An attempt to have the anti-saloon and beer section of the Knights of Labor constitution abrogated in the general assembly at Indianapolis failed. This is one of the good fruits of the Powderly régime.—*Woman's Journal*.

—Two women have recently been regularly licensed as captains of vessels, one in New York Harbor, the other on the Mississippi.

—Several hundred Indians on the Chippewa Reservation in Minnesota were this year allowed to vote for the first time under the provisions of the Dawes bill.—*Pipe of Peace*.

—Owing to the springlike nature of last week in England, birds are in full song, green peas have been gathered in an open garden at Ventnor, and ripe wild strawberries, violets, cowslips, and primroses are plentiful in Dorset.

—The deepest ocean soundings were recently made by the British surveying ship *Egeria*, the one depth being 4,295, the other 4,430 fathoms (about equal to five English miles). The first sounding was made in latitude 24° 37' south, longitude 175° 8' west, the last sounding some twelve miles to the south.

—This year's Florida orange crop is described as “unprecedented.” De Land alone, it is said, will ship over 75,000 boxes. The other day a Mr. Houston brought into Sanford an orange (“Washington Naval”) which measured 14 x 14 inches in circumference and weighed 12 pounds. He has shipped a great many boxes of this variety from Belair at \$6 per box, running mostly ninety-six to the box.

—The question of opening museums, art galleries, etc., on Sundays has been brought very prominently into notice in England lately by the discussion over it at the Art Congress in Liverpool. An effective point was made by Alderman Samuelson, who said that the chief opponents of the scheme in the Liverpool Common Council were the publicans, who employed 2,000 portmen to carry beer on Sundays and employed 800 policemen to look after their drunkards. The advocates of Sunday opening won a very decided victory.—*Exchange*.

—One family of about five persons to a dwelling is the usual Philadelphia rule. Taking that as the average, Philadelphia built dwelling houses in 1888 for 7673 families or 33,365 people. It would be considered something very remarkable if a city of nearly 40,000 inhabitants should grow up in a year in some heretofore unsettled place, but this thing is going on every year in Philadelphia and scarcely attracts attention. That the love of home—a separate dwelling for each family, holds its own in Philadelphia is shown by the increasing proportion of two-story dwellings erected in 1888—nearly six thousand of these little houses, provided with “modern conveniences,” having been erected during the year.—*Phila. Ledger*.

CURRENT EVENTS.

A SERIOUS controversy has arisen, involving the English and German diplomatists and newspapers, over the accusation in a German journal that Sir R. D. Morier, now the English Minister to Russia, but who, during the Franco-German War, was Consul at Darmstadt, used his official position at that time to convey information of the German military movements to Marshal Bazaine, the French commander. Sir R. D. Morier wrote to Count Herbert Bismarck, asking him to use his authority with the German “official press” to have the charge withdrawn, which the latter refused to do. The peculiarity of the whole proceeding is that it is regarded as really an attack by Prince Bismarck, (Count Herbert's father), on the late Emperor Frederick, and his English Friends.

W. E. GLADSTONE the English statesman and Liberal leader, is in Italy for his health, and has spent some time at Rome. It is said that he has been suggesting an arbitration of the controversy existing between the Pope and King Humbert of Italy. The report caused some feeling in England, as it is believed the claims of the Pope, (for temporal authority), are such as cannot be conceded in any form.

PROFESSOR GEFFCKEN, who has been held in custody on the charge of being responsible for the publication in the

Deutsche Rundschau of the diary of the late Emperor Frederick, has been released, the prosecution by the German Government having been abandoned.

An important election is to be held in Paris on the 27th inst. for Member of the National Chamber of Deputies. General Boulanger, who has been active in leading the elements of opposition to the present form of government, is a candidate, and his election is feared. If he gets this endorsement from the capital city his power for mischief will be much increased.

THE President-elect, General Harrison, remains at his home at Indianapolis, where many persons have been calling upon him, in reference to the composition of his Cabinet, and other matters. Great interest is felt in the Cabinet, but no announcement whatever has been made by Gen. Harrison in regard to it.

LAST week's death rate in New York City was 31 above the average for the past five years. More than half of this increase was in scarlet fever, which continues prevalent and fatal.

ADVICES from Russia say that 175 persons were frozen to death at Ekaterinburg, in the district of Perm, on the 27th of last month. The Black, Azof, and Caspian seas are frozen. Railway disasters are reported at Baku and other places in the Caucasus. Heavy snows in the south of Russia have engulfed several trains and stopped all kinds of traffic.

NOTICES.

. The Joint Committee on Temperance and Intoxicating Beverages of Philadelphia Yearly Meeting of Friends, will meet at Race Street Meeting-house, Philadelphia, on Seventh-day, First month 19th, 1889, at 11 a. m.

JAMES H. ATKINSON, } Clerks.
ANNIE C. DORLAND, }

. A Conference on the subject of Temperance, under the care of the Committee of Concord Quarterly Meeting, will be held at Darby on First-day, 20th inst., at 2.30 o'clock p. m. Friends and others interested are cordially invited to attend.

MARY McALLISTER, Clerk.

ROYAL

BAKING POWDER
 Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

TEA AND COFFEE.

If \$3.00 is sent to me I will send 2lb real good Tea, Black, Green, Japan, or mixed, and 8lb of fine Coffee, roasted. Express charges prepaid in the following states: Pa., New York, New Jersey, Del., Md., Va., W. Va., D. C., Ohio, Ill., Wis., Ind. And I will refund the cost of registered letters when the goods are shipped.

DO THOU THY WILL.

Do Thou thy will with me!

I am convinced that thy mysterious ways
Lead ever up to goals of peace. I see
In looking back o'er discontented days
When I rebelled at paths Thou led'st me in—
I see how for my good it all has been.

Do Thou thy will.

Do Thou thy will. I find

That when I wept because some barrier stood
Between me and my longings, I was blind;
For Thou hadst placed it there for my own good;
And when in chosen paths I could not go,
It was to guard me from some needless woe.

Do Thou thy will.

Do Thou thy will. I feel

The calm of realms toward which my feet are led
Across my fevered, restless spirit steal.
The blind rebellion of my heart is dead.
Or in the valley or on the heights above
The hand that leads me is the hand of Love.

Do Thou thy will.

—Ella Wheeler Wilcox, in the Independent.

THE ORIGIN OF WOMEN'S MEETINGS.¹

WOMEN in the Society of Friends, as we know, occupy a different position from women in other religious denominations; for in the administration of the affairs of the Society they have an equal place with men, conducting the business of their meetings, notably in their yearly meeting, with such dignity and decorum as to elicit the admiration of those not Friends. Women, at times, have also been sent upon important missions to legislative and executive assemblies. Few of us can forget the impression made in Washington by the noble women, distinguished for their simplicity and weight of character, who formed a part of the delegation bearing credentials from our yearly meeting, to convey to those in authority the sense of loss and sorrow which we shared in common with the nation, when it was overwhelmed with grief by the assassination of our honored and beloved President, Abraham Lincoln; and afterward the visit made by some of the same women to the wife of President Hayes to offer encouragement to her for the independent stand she had taken in the cause of temperance during her husband's administration.

Friends have also recognized that a gift in the ministry may be committed alike to men and wo-

¹ Read in a Conference at Race Street Meeting-House, Philadelphia, First month 6, 1889, by Annie Cooper.

men, and many of our ablest and most eminent ministers have been women.

It is true that a large part of the labor in other sects devolves upon women, such as ministrations of charity, instruction in their Sabbath-schools, and work in various moral reforms, but none of these have any place in the church organization. Within the last decade or two a few women have been ordained as regular pastors of congregations, these, however, are very exceptional cases. When, in 1654, Edward Burrough, that "son of thunder" as he was called, with his eloquent friend and co-laborer in the ministry, Francis Howgill, and George Fox, who joined them a little later, went up to London from the midland counties of England, full of zeal to proclaim the gospel as they had received it, they found among women their most sympathetic listeners. Many of these women opened their dwelling homes as places of worship before regular meetings were established.

In the large and promiscuous, and often boisterous companies, attracted to the meetings held in the early days, there was little opportunity for women to use their gifts, and we find from the minutes of the meeting of men who had care of the ministry, women were discouraged from public speaking. Not until quieter times came, was any provision made in the galleries of their meeting houses for women to take part as ministers. A few old pictures of Friends' meetings are still in existence, and in these women are represented as addressing the assembly from a stool, tub, or bench. A few women, however, from the first had a recognized place in this important service in the Church, and were regarded as acceptable ministers. One of these was Anne Downer who afterwards became the wife of George Whitehead, one of the most distinguished men at the time of the rise of the Society, and one who found full exercise for his varied talents in its affairs, as he was the chief adviser of Friends in all matters relating to the development and maintenance of their liberties, and such was his courtesy of manner and address, he was well suited to plead the cause of his suffering fellow members before his king. He stood firm as the unflinching champion of religious freedom in the presence of four sovereigns in succession.

Isabel Battery, spoken of as a member in Israel, also was in the habit of speaking a few words to the edification of her hearers. She and her companion distributed in the first meetings held in London a tract written by George Fox to those who were willing to receive it. The Mayor of London as a result of this

an offense worthy of punishment, they were both committed to Bridewell,—the first instance of Friends suffering for conscience' sake in London.

More social and practical duties early opened a field of usefulness for women, and they were actively engaged in looking after the welfare of the poor and those suffering from persecution and imprisonment in Bridewell and Newgate.

In order that their charitable work might be more systematically done, and their funds judiciously distributed, at a very early date two meetings, the "Box Meeting" and the "Two Weeks Meeting of Women Friends" were organized.

As no minutes were kept at the start of these it has been difficult to ascertain which was first organized, and some controversy has arisen on the subject. Probably the Two Weeks Meeting of Women Friends has the prior claim. Here women were accustomed to assemble for conference at least once a fortnight. Gilbert Latey, in his old age, gave this account of its origin: "On one occasion, some fifteen men Friends were met in their usual fortnightly gathering in an upper room at the Bull and Mouth, there providing for things concerning the Church, when, 'our hearts were opened and we enlightened so as to see we wanted helpmeets for carrying on the service,' and they saw clearly 'that the women being added to us as helpmeets would answer' . . . 'for we could no longer do without their help and assistance.' So it was agreed two of their number should go off to the house of Gerrard Roberts, where they knew some ministering Friends were assembled, and open up to them this new idea; there they found George Fox, with Edward Burrough, Francis Howgill, and Richard Hubberthorne, who on hearing the proposal, 'very well approved and fatherly consented.' Forthwith names were taken down of all women Friends thought suitable, embracing 'some from every quarter,' and thus, as *supposed*, the Women's Two Weeks Meeting was formed, the special business being to look after and visit the *sick* poor, also the general poor of their own sex; to which was *subsequently* added a care over marriages, so far as for the parties intending to live together as man and wife to come and declare their intentions before them; but no record was made, that being left to the men's meeting."

Meanwhile as persecution increased, the list of those needing assistance grew larger, and added means of relief became necessary. To quote from the authors¹ from whom these interesting facts are gleaned: "Distress and want existed so greatly as to move Sarah Blackberry to see whether something more could not be done. George Fox realized the needs, and himself meets alone sixty women called together within five hours of Sarah Blackberry's visit, and then and there, at Samuel Vasses' house in Basinghall street, a meeting exclusively of women, and unallied in any manner, like the former meeting with men Friends, was established, their object being to meet special cases of distress rather than those on the list for a regular allowance. As to funds, they were to get contributions where and how they could,

from Friends, at meetings, or otherwise, to put all thus received into a common box, and distribute out of it according to the needs of the cases brought before them, when they met *once* a week. Such will, it is suggested, be the explanation that most readily meets the difficulties of the case in accounting for the origin of that Women's Meeting commonly known as the Box Meeting—entirely independent of any other—accounting to no superior body—making no statement of its income or expenditure, and jealously guarding its traditions of complete independence to the present day."

An account of the Box Meeting which exists as an institution among Friends in London, and is still managed exclusively by women, who own the valuable funds and freehold property belonging to the meeting, may have some interest. "There are those mingling in the general society of the London Friends who may often hear a meeting familiarly spoken of as the Box Meeting, a name that sounds peculiar at first, but becomes associated with a pleasant sense of help, if the party may happen to be at all interested in some case of affliction or distress. To such it is not an unrequent answer, on mentioning the circumstances, to say, 'Oh! I will get so and so a gift from our Box Meeting.' Gratiified in thus obtaining some £2 or £3 for the object of his care, it is possible there may remain a curiosity to know more of this source of relief coming under so peculiar a name. If so, it will be found that it is regulated both as to time and mode of dispensing and class of objects; that once a month on Second-day morning, the meeting is in session; that the object to which its care is especially directed are those members of any one of the six London Monthly Meetings, who not being in the receipt of monthly meeting allowances, may have become through sickness, or other trial subject to temporary difficulty; the sums given are confined to £2 or £3 each, and must not be had by the same party oftener than once in the twelve months. Should inquiry be pushed further, it will be found that women Friends alone are members of the meeting which conducts the affairs of this charity, and that they possess considerable funded property and freehold estate, from which the income is derived that enables them to make such acceptable disbursements, and neither as to income or expenditure have they to give an account to any other meeting as their superior. Any woman Friend, if a member of one of the London meetings, may attend. It used to be a custom for each to drop a shilling into the box before taking her seat, but this practice has now fallen into disuse, owing to the invested funds furnishing sufficient income without this contribution. These funds, arising from legacies and bequests, have accumulated during a long course of years."

The Two Weeks' Meeting had the recognized right to gather collections from Friends at any of the meetings, and it seems to have been the custom for women to be appointed to stand at the doors to receive contributions at the close of all the meetings, even yearly meetings. The sums thus received were allotted among the different monthly meet-

¹London Friends' Meetings, by William Beck and F. Frederick Ball.

ings. "In 1796, it was thought by placing the box in the large passage, for Friends to drop their collection as the meeting gathers, it might tend to separating more quietly and satisfactorily than on the former method. But the men would hardly seem to have taken kindly to the alteration, for four years after men Friends are asked by minute to drop contributions previous to coming out of meeting, so as to let the amount be ready for distribution."

At a joint meeting of the Women's Two Weeks Meeting and the Box Meeting, held in Fourth month, 1790, it was agreed to unite the two meetings and "to try for a more general and regular attendance."

About twelve years after the organization of the Society of Friends in London, by the advice of George Fox, monthly meetings were established and it was the practice for the women to sit with the men in these, taking part in the administration of the discipline in joint session with men. They had no separate meetings.

A report from London Quarterly Meeting to the Yearly Meeting, dated 1755, says: "In these meetings the men and women met together, so that all present making one monthly meeting, might take his or her proper share of the discipline and necessary business of the Church . . . but there being of late years pretty great declension in the attendance of the women Friends, it became our concern, in the year 1749, to recommend to the several monthly meetings to stir up the women Friends to the continuance and support of such of their ancient and commendable practice, which had some good effect for a time, but is since dwindled and in some monthly meetings is not in practice." The report then gives the condition of the six monthly meetings, in two of which "the women sat with the men in their meetings, and were jointly concerned in carrying on the business thereof." Three meetings had established women's meetings for discipline in response to the recommendation of the yearly meeting. One meeting says, "that with respect to women's meetings for discipline they are not in the practice of it."

When women's meetings were established as distinct meetings, the custom which still prevails was adopted by holding a joint meeting for worship before the meetings separated for the transaction of the business of each. About a century ago, after repeated requests for a period of eight or nine years from Women's Quarterly Meetings in England, the men's meetings finally gave their consent for women to have their own yearly meeting.

We have not been able to ascertain from any data accessible, at what time yearly meetings for women were established in this country. In the records of Women's Meetings of Merion, Haverford, and Radnor, the oldest meetings in Pennsylvania, bearing date from 1684 to 1746, we find an address from women Friends in Lancashire, England, "to be dispersed abroad among women's meetings everywhere." After giving advice upon various points in regard to the business which should claim the attention of women in their meetings, there is this quaint para-

graph: "Let some faithful, honest woman or women Friends that can read and write keep the books, and receive the collections, and give a just and true account of the disbursement of them in the book, according as the meeting shall order, which must be read every monthly meeting day; and to give notice what is in stock, when it is so near out, to give notice that it may be supplied." For a series of years the minutes of the meetings are only a record of the collection of funds or more frequently of the contributions of corn or wheat and their distribution to those Friends who were in need of assistance.

Within the last twenty-five years, by the decision of our different yearly meetings, women may be appointed as members of their Representative Committees, the conservative body, which represents the interests of Friends during the recess of their respective yearly meetings; and, therefore, to-day women stand side by side with men, sharing alike the privileges and responsibilities of our religious Society.

From Friends' Quarterly Examiner (London).

MISSION OF THE SOCIETY OF FRIENDS.

BY EDWARD GRUBB.

[Conclusion.]

THE effect of the change upon the character of our Ministry,—in increasing its quantity far more rapidly than its quality,—I have spoken of in a previous article. I will only here call attention again to one of the most striking evidences of the feebleness of our present position,—the fact that, in spite of increased vitality, we appear to have no attraction whatever for the educated world around us. There are, indeed, enough new members added to rather more than make up for those who leave us, and for the balance of deaths over births; but these are enrolled almost exclusively from the least instructed classes of society. It was not so in early times; among the first Quakers were some of the finest minds of the day. Nor would it be so now if we were worthy following in their footsteps, and faithfully working out our true mission.

The character of that mission, as I conceive it, is now, I hope, tolerably clear. It is to uphold once more before the world the banner of the Real Presence of God in man, with all that this implies. The implications are two-sided,—spiritual and social. It is the spiritual side alone that I deal with now; the social I hope, if the Editor will allow it, to deal with on a future occasion.

On the spiritual side our mission is, in other words, to deepen in the world the conception of the Spirituality of religion. By Spirituality I mean the view of the nearness of the human spirit and the Divine; the conviction that man has that in him whereby he can be brought into personal communion with the Spirit of God; that true and vital religion consists in this direct and individual communion, which does not involve the intervention of any church, or priest, or book; and that it manifests itself not in the recitation of dogmatic creeds, nor in outward forms of ritual observance, but in a state of

inward sincerity, and faithfulness in following the convictions of duty. There is further involved in our conception of Spirituality the view that no one order of men has the exclusive call to the exercise of public ministry, but that this is the privilege of all, of women as well as men; that a true and living ministry cannot be professional, to be had to order on payment of a salary, but must be such as comes forth under the power and direction of the Spirit of Christ; and that for free scope to be given to this Divine directing, our meetings for worship must be held on a basis of silence.¹

For such teaching as this there is, indeed, an open field among the better-educated classes of our country; and it is here chiefly, I believe, that as a Society our true calling lies. Far be it from me to find any fault with those who believe themselves called, and with zeal and self-devotion obey the call, to "preach the Gospel to the poor;" yet it is not the only or necessarily the highest form of service, nor is it, I am absolutely convinced, the special and distinctive work for which, as a Society, we are set apart. Our small success in this field, as compared with that of the Methodists and the Salvation Army, might teach us this; as also the extent to which it is thought needful to modify our mode of worship to make success possible. Important as the work undoubtedly is, little good can come of mistaking our mission, and leaving our own work to do that of someone else; still less of giving up all that properly distinguishes us, for the sake of succeeding in a sphere that is not ours.

Experience appears to show that the Quaker view of life is more adapted to those who possess some degree of education and some power of abstract thought, than it is to those who have had but little mental training. There are, of course, some few among the poor, as among other classes, who can thoroughly appreciate and profit by our mode of worship; but I believe their numbers are and must be small. The undeveloped mind craves something more external and tangible,—something that is more easily grasped and that makes less demands on the individual,—than Quakerism; and it is at our peril that we lower our standard to meet this craving. Far better to leave it to find satisfaction elsewhere. We do not doubt that in the training of mankind the Divine Spirit has worked in past times through lower forms: why, then, should we doubt that he can also work through what appears to us as lower forms in the present? Our duty is to be faithful in discharging our own mission, and not to hinder others in the discharge of theirs.

Those who know anything of the thoughts pass-

¹ I must ask particular attention to the fact that in this summary, and throughout, I am not attempting to define our mission as *Christians*, but only as *Friends*. It must not, therefore, be supposed that because I do not deal at length with all the aspects of religious belief that are considered to be most distinctively Christian, I think them unimportant. We are, of course, Christians first and Friends afterwards; and though it is impossible to enquire into the true nature of Quakerism without going somewhat deeply into the essential character not only of Christianity, but also of religion itself, it would yet needlessly encumber my argument were I to attempt a detailed answer to the broader questions as to what constitutes a Christian.

ing in the minds of educated people generally, know that there is, particularly among men, a profound and widespread dissatisfaction with the theology of church and chapel, and with the whole system of professional ministry. The extremely small attendance of men at many of our leading places of worship is a proof of this.¹ It is often supposed that this arises entirely from religious indifference; but this is by no means the case. It is not an age (so far as England is concerned) of general indifference, but of increasing interest in religion. Never was there a time when books treating of religious questions in a broad and thoughtful manner had such a sale as they have at present. Many of those who have ceased to attend at public worship, and who are in danger of losing (if they have not already lost) their spiritual life, have been disgusted with the hollowness and want of reality in much of the prevailing religion; with the shocking inconsistency in the lives of some who are zealous in the observance of outward rites; with the fossil creeds that can find no room for new additions to the stock of human knowledge; with the presentation of an absent God who is reported on testimony (into the actual value of which they are warned not to enquire) to have revealed himself to men in the past, but who cannot be expected so to reveal himself any longer. Multitudes of such there are,—earnest, upright, seeking souls,—who would not now be "in the cold" had there been presented to them such a Gospel as that of the early Friends,—a living and spiritual religion, the power of which was manifested in the lives of those who professed it.

To such we should go, with the Gospel of a present God, who speaks to us still by his Spirit as he spoke to men in days that are past, and gives us a living Witness of his presence and power in our lives; who does not require of us the acceptance of elaborate creeds, or the observance of outward rites; who demands only that we should yield ourselves a living sacrifice to him, uniting ourselves with Christ his Son, who sacrificed himself for us, and dedicating ourselves to the service of our brothers here on earth.

For years I have seen, with increasing clearness, that if we are to be a living and growing church,—if, indeed, we are not to sink into rapid extinction,—it must be by realizing once more our true mission, and carrying on the work of the founders of our Society. The Quakerism of to-day is but a pale reflection of that of early times, just as the theology of the churches is but a pale and cold reflection of the radiant thoughts of Christ. Just in so far as there has been of late a growing disposition to crave an infallible outward standard of truth and morals, has there been a loss of the power that comes from a vivid realization of that *inwardness* which is the great secret of genuine Christianity. Like other Protestant churches, we have been trying to find that in-

¹ A Friend told me recently that he had just been in intimate conversation with a number of thoughtful men at a seaside boarding-house, not one of whom was in the habit of attending a place of worship. All gave practically the same reason—the want of depth and reality in a professional ministry; the feeling that the performance was simply gone through as a matter of business.

fallible standard in the Scriptures,—but in vain. In the light of the new investigations of science and historical criticism, infallible standards, as such, are everywhere breaking down; and can only be upheld by a wilful closing of the eyes to the supremely important light which such investigations, when reverently conducted, throw upon their real meaning and value. These investigations may and must change our point of view; but their effect is to render Scripture not less but more “profitable for teaching, for reproof, for correction, for instruction in righteousness.”

Amid the change in our conceptions as to the nature of the outward witness, the great need of the times is that men should be called once more to that Inward Witness to which they were so powerfully summoned by Christ and his Apostles, and by the founders of our own Society. What the world wants to-day is the *genuine article*.—Christianity (as nearly as, in the inevitable imperfections of the records, we can reach it) as it was taught by Christ himself. It wants an apprehension such as the best of the early Christians possessed of the spiritual nature of his teaching, which, from his own day till now, has been continually clogged and fettered by a gross materialism that can never understand the Spirit. It needs to be set free from the theological subtleties and ecclesiastical traditions, bred in an age that had lost the Spirit, which have usurped the name of Christianity. It needs, in the powerful language of the Apostle, to “put on the Lord Jesus Christ.”

Is there not here sufficient work for us to do? Is it not here that we must find our mission? Is there not room here for a new development, on the lines of old-fashioned rather than of new-fashioned Quakerism? They who know the world and the modern phases of thought know that indeed the harvest is plenteous, but alas! the laborers are few. Those of our number who are most zealous and devoted too often know little or nothing of the real wants of the day, or the thoughts that are passing in the minds of the rising generation both within and without our borders. Those, on the other hand, who know, too often seem but little inclined to act. Who are they who, seeing and knowing these things, will arise in the spirit of the prophets, and filled not with self-sufficiency or “pride of intellect,” but with the Spirit of God, will seek once more in the power of that Spirit to lift up the Quaker banner,—to prove by their lives and by their words the Real Presence of God in man,—the Spirituality of true religion?

For Friends' Intelligencer and Journal.

THE SPIRITUAL SUN.

THE following extract is from the *Inter-Ocean* of First month 7, 1889:

“Mr. Monroe, the author of *Mansill's Almanac*, having made a long study of all kinds of atmospheric disturbances, believes he has evolved a new science. In his science he recognizes only two elements, matter and electricity, and ascribes to electricity the motive and productive force of all things. It is electricity that binds the universe together and keeps the planets in motion and in place.

“The sun is the electric store-house, so to speak, and while moving toward the sun the planetary arcs absorb electricity, and when they are sufficiently charged they reverse their course and recede, throwing off electricity until they are in apogee, when the attractions again control their motion toward the sun. The entire planetary system being governed by the one law, peculiar interfering positions of certain planets cause variations in the electric influence, and disturbances more or less severe occur.”

Reading the above just after the article in the INTELLIGENCER AND JOURNAL of the 5th instant, entitled “The Type of the True Man,” extracted from C. F. Dole's new book, I was impressed with the likeness between the two ideas, the material and spiritual. I have often thought that the “Sun worshippers” had great foundation for their religion. The more we dwell upon, and the more we discover of the nature of the sun and its relation to the universe of matter, the more typical it seems of God, the Spiritual Sun. The theory of the sun being the source of electricity and that this is the vital force which animates and propels all the heavenly bodies, corresponds with Dole's idea of the spiritual force which magnetizes and possesses the hearts of men, and impels them to do God's will. He says, “the life and forces of God played through Jesus. He gave himself utterly to their motion. It is only as the steel is magnetized that it points to the pole.” He implies that man may be negatively good, but he is only positively good and useful when magnetized and possessed by the spiritual forces; vitalized, made alive, energized. Even then men may be affected as the planets by disturbing forces, but return true to the pole when unimpeded.

“A million torches, lighted by Thy hand,

Wander unwearied through the blue abyss;

They own Thy power, accomplish Thy command.”

So may we all seek and receive this Divine energy this vitalizing force which alone makes life worth living. So let us waste no time in looking back, or in unprofitable speculation about the future, but go on our way as the stars in their courses,

“With a present mind, intent on pleasing Thee,”

or doing the *present* will of our Father, for this hour, and this day, giving it all into his hands at the close of the day, and then whether “our waking finds us here or there,” it does not concern us. If here we rise unburdened by the impediments of the day before, “Look upon each day as a clean sheet of paper given us to fill up,” see that it contains nothing that at night we may wish erased. I would not be understood as urging constant action, but that we may be in that active spirit that approaches the sun until we are charged with vital force and sent on our way, to accomplish his command. There must be this going and returning of the heart for supplies of light and heat and power, this receiving and giving out. It may be and ought to be a continuous process. Madame Guyon calls it “recollection,” not always visible or apparent, but always *felt*. As Dole says, “a contagious goodness.”

How much we miss by allowing our minds to wander idly, aimlessly over the world and its trivial

affairs, not keeping the "loins of the mind girded" and ready for action when our stroke comes! We may be allowed to "rest on our oars," but we must be attentive and alert, fulfilling the injunction, "Abide in me."

Lew Wallace's faith as expressed in the preface of his book, "The Boyhood of Christ," seems to me worth emphasizing. "The Jesus Christ in whom I believe was, in all the stages of his life, a human being. His divinity was the Spirit within him, and the Spirit was God." H. A. P.

Chicago, First month 8.

THE IOWA PAID-PASTORATE: LETTER OF WILLIAM POLLARD.

[The following letter by William Pollard, (one of the three authors of "A Reasonable Faith"), is printed in *The Friend*, London, for Twelfth month. Our readers will recall the statement made in last week's *INTELLIGENCER AND JOURNAL* (First mo. 12) as to the attitude of *The Friend* on the paid pastorate system.

We also give with the letter, the remarks of *The Friend* upon it, both as a matter of fairness, and because their tenor is of interest as disclosing the attitude of that journal and of the London Friends who largely control the English body's action.—EDS. *INTELLIGENCER AND JOURNAL*.]

IOWA YEARLY MEETING.

THE Editor's attempt in the last *Friend* to reduce the differences between the polity of London Yearly Meeting and that of Iowa to a minimum, is interesting, but not altogether successful. There will be a general agreement in this country in his denial of all claim on our part to any authority as the "Mother Yearly Meeting." One is curious to know when such a claim has ever been made. Our counsel, as a Yearly Meeting—often given very timidly—has been that of an elder sister to younger sisters, rather than that of a mother to her children, and if we have erred at all it has surely been in not being clear and definite enough in speaking the truth in love. Faithfulness of this kind, wisely carried out, might bring some compensation for the many disadvantages that attach to our Yearly Meeting correspondence.

If it were true, as the Editor tells us, that these yearly meetings, whilst coördinate bodies, are not only "bound together by love and union with our common Lord," but that this union is strengthened by "close fellowship in religious principle and practice," the real difficulties of the case which he is seeking to abate would never have arisen. But is this the case? Is there not too much evidence of grave differences, not only in methods and practice, but also in religious principle? Is not the following striking description of modern Quakerism, by a recent writer, specially applicable to the prevalent teaching in Iowa Yearly Meeting: "It shows too often an imperfect grasp of the great principle of the presence of God in man; it speaks but little of the light of Christ within him, and hesitates to say, even if it does not deny, that this is the gift to all men. The Revelation of which it speaks is a thing rather of the past than of the present; it exalts the letter of Scripture, and the importance of a correct apprehension of certain doctrines, more than it does the possession of a wise and understanding spirit by which alone the Scriptures can be judged and rightly interpreted."

But this is by no means the full statement of the difference. Not only is "the light of Christ within us, as God's gift for man's salvation" (to use William Penn's description of "the fundamental of our religion") undervalued, if not ignored, but the secret and progressive teaching of Christ by the Spirit—granted to individuals and to the Church—would seem to be greatly mistrusted. The principle that has always led Friends to hold their meetings for worship on a basis of silence, is in many cases practically abandoned and disbelieved. Faith in Christ is habitually confounded with faith in certain theological phrases and definitions, in a way totally opposed to the spirit of early Quakerism. Underlying all this there is a growing literalness in dealing with Scripture, which is steadily and naturally leading back to an uninspirited view of truth, and to types and ceremonies and words.

Quakerism, it is true, is broad and adaptable, and has many sides; but it is not contradictory. Its true developments run in harmony with its great fundamental principles. There are, no doubt, modern revelations of truth and duty which the early Friends did not see, but it is remarkable to note how naturally these fit in with the old type of Quaker teaching. Can this at all be said of the methods and teachings set up in Iowa and elsewhere? Do we not find there is a recurrence to a lower and less spiritual type; something more akin to the theology and methods of the so-called "Evangelical" Churches than to the sturdy common-sense teachings of George Fox?

In dealing with these divergent tendencies, we do not help matters by assuming that there is no radical difference between the old and the new. To put aside the duty of consistency for the sake of peace, is as unwise as it is wrong. This is not a question of charity. In a church that professes so fully to recognize the right of private judgment, we are bound to have great charity for one another. Further than that, we can hardly help admiring the zeal and dedication of these earnest Christian people in Iowa and elsewhere. They have a right to their opinion as to the best course of Church action. If they are convinced—as their actions seem to imply—that the principles and methods hitherto adopted by the Society of Friends, and which form its sole reason for existence as a separate Church, are impracticable and unsound, they are justified in abandoning them and adopting another system. But are they justified in still calling themselves Friends, or are we doing wisely in trying to keep up this delusion?

The teachings and methods adopted by many Friends in this country, in their home and foreign efforts, can hardly be brought forward as evidence in considering the polity of London Yearly Meeting. It is very natural for earnest people to say, "If we can't do our work in the best way, we will do it in the second-best way;" but it is still true that the best way is the best. Nor can it be said, in face of

the intense activities of Friends in the early days of the Society, that old-fashioned Quakerism is not capable of earnest and consistent mission work both at home and abroad.

It cannot be doubted that there are methods and openings for doing all our Church work—the building up, the gathering in, and the testimony-bearing—on lines altogether in harmony with our great principles. If patience were but combined with zeal and unswerving fidelity to the truth as we are permitted to see it, we might yet be enabled to develop and to unfold consistent and far more effectual methods of operation and service, that might prove to be rich in blessing to the Churches and the world.

WILLIAM POLLARD.

Eccles, near Manchester.

COMMENTS BY THE LONDON FRIEND.

[Our readers will not suppose that by the insertion of this article we express agreement with the author. We much regret that our friend William Pollard has believed it his duty thus to write; but we have not felt at liberty to refuse him a hearing, though decidedly differing from the views here expressed on many points. The fact is, we evidently look at things from different standpoints, and, it might appear, do not measure by the same rule, and therefore must agree to differ. W. P. seems to regard Quakerism as Christianity itself, in its simplicity and spirituality; a sort of essence of Christianity, by which it is always safe to measure. We, on the other hand, prefer to go back to first principles, and to make the teaching of Christ and His apostles our measure though very conscious of the need of enlightenment by the Spirit of Christ, in order that we may rightly understand Him.

This is to us infinitely more simple than making Quakerism our rule. Where shall we find it?—in the writings of George Fox, William Penn, and Robert Barclay? in yearly meeting documents? or in tradition? We don't know how to grasp it, neither can we ask for Divine illumination that we may understand it. No! Whatever may be our regard for Quakerism, or our belief in its general accordance with the teaching of Christ, it would be something like treason to His Kingship to take it as a rule, and in this we think we are only walking in the steps of George Fox and William Penn.—Ed. of *The Friend*.]

SCRIPTURE LESSON, No. 4.

FIRST MONTH 27, 1889.

FORGIVENESS.

GOLDEN TEXT.—“Who forgiveth all thine iniquities; who healeth all thy diseases.”—Psalm 103: 3.

READ Mark 2: 1-12.

AFTER going through the cities and towns of Galilee, one of which he was not permitted on his return to re-enter, (Mark 1: 45.) Jesus and his companions came again to Capernaum, which for a time appears to have been his home. It was soon noised abroad that he had returned, and the people gathered to give him welcome and to crave the benefit of the healing power which he possessed.

There was no longer room for them. The crowd in

the house and around the door was very great, so that no more could find entrance or even standing room within hearing of him.

He spake the word unto them. Preached to them, and expounded the word of God, as it had been given him by his Heavenly Father to hand forth to the people, just as do the messengers of the same holy word, whom the Heavenly Father sends forth now to call the people to be obedient to his in speaking voice.

Bringing one sick of the palsy. This was an incurable affliction; we see many cases of it in our own time. The patient becomes quite helpless at the last in severe cases.

They uncovered the roof. This is a perplexing statement to those unacquainted with the construction of the houses in far Eastern lands, but is easily understood when we are told that they were built square with one door opening from the street into a small room where the master of the house transacted his business, and received his visitors; this opened into a large central hall, surrounded by a gallery or covered walk, from which doors opened into the other apartments of the house. The central hall, or court, was not roofed in, but covered with an awning that could be rolled up or removed. Jesus must have been preaching in this hall, and when the four men who bore the palsied man on his couch found there was no entering in by the door, they turned to the staircase that led to the roof and, removing the awning, found ready access to Jesus.

And Jesus seeing their faith. “Faith is a vitalized affection which starts all our faculties into action, and sets us to work to accomplish something.” This work is of such a nature that “it requires and brings about fellowship and joint action. We are not only workers together with God, but with each other.” These friends of the sick man believed if he could but feel the touch of Jesus he would be healed, and they allowed no impediment to hinder them. Such faith is greatly needed in the church to-day.

Son, thy sins be forgiven thee. Here again it is evident that it was the common belief that disease was the punishment inflicted on man for sin, hence the forgiveness of sin meant cure of the disease. And do not modern investigations show that errors of living are the main cause of the physical suffering that afflicts the body?

Certain Scribes. These had come with the multitude, not alone to hear the “word,” but to criticise the new teacher, who was drawing the people to him in all the regions round about. They were amazed, and with the rest glorified God for what was done.

One of the religious principles of the Society of Friends is that no human being is born sinful; but that the condition of the little child, until it does some act which it knows is wrong, is pure and good. Jesus so represented it when he said of little children, “of such is the Kingdom of God.” Another fundamental principle of Friends is, that the Divine will is made manifest unto every rational human being, so that no person can *unconsciously* trespass against the law of God, or commit sin without his own volition. That this is true, is proved not only

by our individual experience, but by the testimony of the wise and good in all ages. "This is the condemnation, that the light is come into the world, and men love the darkness rather than the light." The sin is that men depart from the light, act contrary to the intimations of the Divine Spirit, and fall short of the fulfillment of duties that they know they ought to perform. "All have sinned and fallen short of the glory of God." It may be safe to say there is no man so good, as never to have consciously done wrong, there is none so evil as to have never done some good act. In this respect human experiences differ only in the degrees of faithfulness.

But, "if we confess our sins, God is faithful and just to forgive us our sins." This, too, we know in the lives of our own experience. If we can judge by the feeling of inward peace and satisfaction, that follows when we repent of a wrong act, and make confession of our faults, and strive to correct them, then are we fully assured that Divine forgiveness follows such method of atonement. When we "cease to do evil," and "learn to do well," then do we fully realize the declaration of the prophet: "Though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool."

Thus in all human experience when the heart is kept open to the influence of Divine love, and a reliant trust is placed upon the impressions that are felt within,—forgiveness of sin is not a blessing to be looked for in the life beyond the grave, but is realized, and should be sought for now, and in this world. The Apostle says, "Dwell in love and so dwell in God," and as Friends—"friends of God"—let all who reflect upon the lesson, seek so to dwell, that there shall in every life be realized the declaration of the Psalmist: "As far as the east is from the west, so far hath he removed our transgressions from us."

SELF-FORGETFULNESS in love for others has a foremost place in our ideal of character, and our deep homage, as representing the true end of our humanity. We exact it from ourselves, and the poor answer we make to the demand costs us many a sigh; and, till we can break the bonds that hold us to the centre, and lose our self-care in constant sacrifice, a shadow of silent reproach lies upon our hearts. Who is so faultless or so obtuse as to be ignorant what shame there is, not only in snatched advantages and ease retained to others' loss, but in ungentle words, in wronging judgment within our private thoughts alone,—nay, in simple blindness to what is passing in another's mind? Who does not upbraid himself for his slowness in those sympathies which are as a multiplying mirror to joys of life, reflecting them in endless play?—*Andrew Peabody.*

TO-DAY is not a dead, land-locked pool, but a live, ocean inlet, which has its continuity, balance, and complement in an outlying glorious infinitude. Hallelujah to the morrow, when ideals of truth and righteousness will not go mourning about the streets for the realities because they are not!—*W. M. Bicknell.*

PHILADELPHIA, FIRST MONTH 19, 1889.

A RESTRAINING HAND.

IN the constantly increasing demands made upon the purse by the rapid advance in all that pertains to outward comforts and conveniences in living, together with the improvement in taste and growth in culture in every way, there is need for great watchfulness lest the indulgence in all of these things leads to an infringement upon one of the most important testimonies held by Friends, that of living "within the bounds of our circumstances." It is so easy for the luxuries of life to assert themselves as necessities, and so difficult to bring within wholesome limitations the variety of things that constitute a modern outfit for a home, that it is needful for both young and old to be strongly entrenched in a fortress of right principle in order to withstand the temptation to unwise expenditures.

The foundation of a just self-denial cannot be too early, or too carefully laid, for herein lies the great safeguard in after life against financial disaster and consequent trouble and unhappiness. Parents themselves well grounded as to character, and accustomed to a self-denying life, too often under-estimate its great importance when training their children, and upon feeling the pressure of necessity lifting by their efforts, give way to over indulgence in things not essential, and which lead to effeminacy, thus easily paving the way for extravagances that may be followed with bitter results. With the departure of the Puritanic or early Quaker severity as to the enjoyments of life, there has slipped from our grasp some of the wholesome restraints that are effective in keeping a proper balance; and it behooves us to cling close to the safeguards of moderation and simplicity, laying a restraining hand upon indulgences, even if amply able to supply them, for the sake of the struggling ones just about to enter upon life's journey with its numerous besetments tempting to lavish display. Many and various are the ways in which we can be each other's helpers, and in none perhaps more effectively than by being examples of true simplicity in living.

The fertility and activity of brain that creates and extends business facilities, the perseverance and persistence of tradesmen, all qualities excellent in their proper field, are sometimes to be resisted in self-de-

fense when they present themselves as tempters into the forbidden paths of unnecessary care and burdens in the shape of debts that rob the mind of its peace and the body of its necessary rest.

A helpful addition to the modern school curriculum would be a study that would teach how to reap the most natural enjoyment and lasting benefit from life, with the least expenditure of strength in the direction of money getting and money spending. In the meantime we can all perform good service by applying the admirable testimony above mentioned to ourselves putting aside superfluities, and becoming good examples unto others, that we shall not be counted amongst those that are "sinning against the brethren and wounding their conscience when it is weak," but "that others may be eased. . . . your abundance being a supply at this present time for their want, that their abundance also may become a supply for your want; that there may be equality."

THE PAPER FOR 1889.

At this season of the year, when a large part of our subscribers are renewing their subscriptions, we receive, often, some intimation as to the success or otherwise of our efforts to furnish a useful and interesting journal. Among the remarks upon the subject lately received is a note from a valued Friend, formerly connected with the conduct of the paper, in which she says: "Deprived of our paper for to-day, [by accident] we have been re-reading some of the former issues, and we have been so interested and edified we felt we wanted our dear friends who labor so persistently for our benefit and gratification to know how much we appreciate their efforts. . . . This is to convey to you the pleasure we derive from the weekly perusal, and to express a word of encouragement and a wish for the continuance in interest, and the increased success of FRIENDS' INTELLIGENCER AND JOURNAL."

In response to these kind words, we may say that there are, this year, some encouraging indications concerning the circulation of the paper. One of these is the apparently sustained interest of those who have been subscribers, and a second is the considerable addition of new names. These, we now think, will more than replace all losses, and make a definite, though not large, increase in circulation over last year, even considering the sad drain which we steadily endure by the removal of old subscribers by death. At the time of the union of the two papers in 1885, the subscription list of both, but especially that of the INTELLIGENCER, contained a large number of names of Friends advanced in life, many of whom had taken it for a long period of years. These, in the course of nature, are steadily passing

away; the list of losses, in less than four years would make an impressive array, in numbers and in character. Of course, the paper must replace these among the younger people, or must experience a decline. And, as we have said, it does seem that many are coming forward, a good part of them being among our younger membership. Interest in the contents of the paper seems to have reached them,—a hopeful sign, we trust, not merely for it, but, what is far more important, for our Society also.

MARRIAGES.

BIRD—WALKER.—According to the order of Friends, at the residence of the bride's parents, Chestnut Oaks, near Hammonton, N. J., First month 1st, 1889, Dr. Orpheus B. Bird, of Los Angeles, Cal., and Sarah M. Walker, daughter of Charles and Sarah C. Walker, all formerly of Germantown, Penna.

DEATHS.

BARNETT.—First month 11th, 1889, at the residence of her brother, Daniel Barnett, West Philadelphia, Hannah F. Barnett, aged 67 years; a member of the Monthly Meeting of Friends of Philadelphia held at Spruce street.

GILLAM.—At his residence, near Langborne, Pa., First month 12th, 1889, Simon Gillam, aged 67; an acknowledged minister of Middletown, Bucks Co., Monthly Meeting.

HOPKINS.—At his residence, Cincinnati, Second-day, First month 7th, 1889, Benjamin E. Hopkins.

Of a kind and generous nature, ardent temperament, and possessing many qualifications fitting him for much usefulness, he was wrecked by becoming entangled in the speculations of the day. May those who knew and esteemed him look with a charitable eye on his failings. "Let him that thinketh be standeth take heed lest he fall." J. M. T., Jr.

KALER.—On Fourth-day afternoon, First month 9th, 1889, killed in the paint-shop of the Railroad at Reading, Pa., which was destroyed by the cyclone, John U. Kaler; an esteemed member of Exeter Monthly Meeting held at Reading, Pa.

MATHER.—On Seventh-day, First month 12th, 1889, John Mather, in his 47th year. Funeral from Abington meeting-house, Pa.

STYER.—On First-day, First month 6th, 1889, at Concordville, Delaware county, Pa., John P. Styer, in his 76th year.

TATE.—On the 22d of Twelfth month, 1888, Elizabeth Tate, in her 75th year; a member of Goose Creek Monthly Meeting, Loudoun county, Va.

Her last days were full of suffering which she bore with marked patience; evincing by the warm pressure of her hand and sweet words of love that fell from her lips, her nearness to "Our Father." M. A. T.

WRIGHT.—Near Trenton, N. J., Tenth month 20th, 1888, Sallie, daughter of the late Robert S. and Annie C. Wright, in the 16th year of her age.

Again death has entered our home and taken from us a most promising bud that was about to burst forth into true and noble womanhood, one that possessed a remarkable degree of Christian virtues that tend to make a genial sunshine. Her quiet, gentle nature, her heart warm with affection, ever ready to forgive rather than ensue, had won for her the love of her associates. To the family circle

a sorrow is felt that nothing can allay but the belief that she now enjoys a heavenly reward. E. C.

ZELLEY.—First month 10th, 1889, in Philadelphia, Mary B., widow of Clayton Zelley, in her 61st year. Funeral from her residence near Jacksonville, N. J.

EMMOR COMLY.

In connection with the death of this dear friend, which occurred on the 2d inst., it is fitting to offer a few lines commemorative of his exemplary life and excellency of character as estimated by his nearest friends and the community in which he lived. Modest and retiring in disposition, entertaining a humble opinion of himself, he sought not the notice or applause of the world around him, rather shrinking from contact with its customs and forms, content to pursue an even tenor of life, with now and then scattering by the wayside a seed for good, and inculcating correct principles by the force of example as well as precept.

He was an esteemed elder in our Religious Society, though ever feeling a diffidence of qualification for the important services devolving upon him. Kindness, affection, tender regard for the feelings of others, cheerfulness, equanimity of temperament, and true hospitality, with a charity that thinketh no evil, endeared him to all with whom he had intercourse.

With pity and commiseration for the sufferings of all living creatures, he was often in a mild though firm manner successfully engaged in endeavoring to mitigate and suppress the evils of cruelty and oppression. All his proceedings were marked by a humility and integrity of purpose which secured due attention and respect.

His was truly a Christian life that diffused light and love around him, and the influences for good emanating from his meek and gentle spirit will long encircle the memory of his virtues. C.

First month, 1889.

THE YOUNG FRIENDS' ASSOCIATION.

THE meeting of the Young Friends' Association, at the Parlor, 15th and Race Sts., on Second-day evening, (as announced in the notice in the INTELLIGENCER AND JOURNAL), was well attended, the room being filled. This Association is just organizing, and nominations of permanent officers were made at this meeting; temporarily, Howard J. Lukens presided, and Mary Whitson acted as Secretary. The principal feature of the evening was a paper read by Isaac Roberts, of Norristown, on "The Objects and Aims of Work" of the Association. This paper we cannot conveniently print this week, but it is in our hands for publication. Some interesting discussion followed its reading.

The meetings of the Association are to be held on the second Second-day evening of each month. Due notice of the next will no doubt be given. As a better explanation of the object of the organization we print herewith the preamble to the Constitution. It says:

"Believing that a thorough knowledge of the history and testimonies of the Religious Society of Friends, together with a closer acquaintance and association among the young people connected with it, either by membership or community of feeling, is essential to an active interest and participation in its

affairs, and to an intelligent promotion of its principles, we, the undersigned, for the attainment of this object, hereby form ourselves into an association under the following constitution."

We also print the following further clauses of the Constitution and By-Laws:

Membership. "This Association shall be composed of members of the Religious Society of Friends and others, over the age of seventeen (17) years, interested in the objects of this Association, who shall be approved by the Executive Committee, and shall subscribe their names to this Constitution, and pay the sum of one dollar (\$1), and a like amount annually thereafter. Any person making a single payment of twenty-five dollars (\$25), shall thereby become a life-member, and shall be exempt from any further dues."

Officers. "The officers of this Association shall be a President, two Vice-Presidents, a Secretary, and a Treasurer, who shall hold office until their successors are elected. None but members of the Religious Society of Friends shall be eligible to these positions. Officers shall be elected at the Annual Meeting in each year."

Standing Committees. "The Executive Committee shall appoint annually the following Standing Committees:

1. History of the Religious Society of Friends.
2. Literature of the Religious Society of Friends.
3. Discipline of the Religious Society of Friends.
4. Current Topics of Interest to the Religious Society of Friends."

Committee on History. "The Committee on History shall take into consideration, with a view of eventually completing a consecutive and accurate outline, all matters pertaining primarily to an historical knowledge of the Religious Society of Friends, and to it may be referred for answer questions of an historical nature."

Committee on Literature. "The Committee on Literature shall take into consideration all matters pertaining to the literature of the Religious Society of Friends, with the view of completing an accurate outline thereof, and to it may be referred questions of this nature."

Committee on the Discipline. "The Committee on the Discipline shall have for its duty the preparation of a complete history of the formation of the Discipline of the Religious Society of Friends; the changes made therein from time to time, and a comparison of the various codes of Discipline now in use. To it may be referred questions pertaining to these subjects."

Committee on Current Topics. "This Committee shall have an active care to bring to the notice of the Association such current topics as have an especial interest for, or bearing upon, the Religious Society of Friends. To it may be referred all questions not naturally belonging to the other Standing Committees."

It is the heart that makes a man rich. He is rich or poor according to what he is, not according to what he has.

THE CHARACTER OF SAMSON.

EDITORS INTELLIGENCER AND JOURNAL:

I HAVE been a diligent reader of your interesting weekly for some years and in all that time I have never seen anything in its columns in which there appeared to be anything of a hurtful or doubtful tendency until now. In the number of 12th month 22d appears a communication signed "W." on the "Character of Samson," in which that man of violence and blood is held up to admiration and is finally spoken of as a "martyr." His conduct on one occasion is compared, not unfavorably, with that of Christ himself.

Nothing, it would seem, could be imagined, more utterly opposed to the Spirit of the Gospel teachings or the character of the Divine Master, than the career of Samson. Like too many of the heroes of the Old Testament he was animated by the savage spirit of revenge, a spirit entirely at variance with Christian ethics, and whatever Divine sanction may be supposed to have existed for conduct like his under the Mosaic dispensation, was expressly repealed and withdrawn by Jesus who laid down an ethical code in all things the very reverse of it. When Samson was disappointed in marriage with a woman of the Philistines he avenged himself by burning their crops and their vineyards, and then smiting them hip and thigh with great slaughter. Soon after he slew a thousand more of them with the jaw bone of an ass. It appears also that he consorted with lewd women. A careful examination of his history fails to disclose a single commendable trait of character. The final scene was what might have been predicated of such a life. He was a suicide who sacrificed his own life solely that he might be avenged upon his enemies, slaying vast numbers of them with himself. Yet this is spoken of in the communication referred to as martyrdom. Surely, this is not the life nor this the death which can properly be held up to admiration in this enlightened age, especially in the columns of a journal devoted to the propagation of the mild and humane principles of Friends.

N. C.

Brooklyn, N. Y.

[On the same subject, the *Sunday School Times*, replying to a correspondent who had objected to its unfavorable estimate of Samson, has the following remarks:]

"The Bible record is plain and explicit that Samson was licentious, was a liar, was disobedient toward God, and that he misused the great power and high privileges accorded to him in the plan of God. It is true that God used Samson, as God has used many another sinner, for a great work, in spite of his sinning. And it is also true that at the last Samson showed high faith in turning trustfully to God in his helplessness, and showed a spirit of noble self-abnegation, when he put himself unreservedly into God's hand to be made a means of showing that Jehovah was above Dagon. But Samson is to be abhorred as an example of conduct, even while he is an illustration of the grace of God toward a chief of sinners. And as it is in Samson's case, so it is in the case of Abraham, and Jacob, and Moses, and Caleb,

and David, and Peter, and Paul, and all the other Bible worthies. They all show that they were sinners, and that their only hope was of salvation as sinners. In this light their histories may be studied by us with profit. But if we seek to find excuses for their specific immoralities, we are in danger of being led away from the right by their evil example."

For Friends' Intelligencer and Journal.

REBECCA RUSSELL.

THE notice of the life and death of Rebecca Russell which appeared in the *Baltimore Sun* and was copied into *FRIENDS' INTELLIGENCER AND JOURNAL* was written and published without consulting any of the family, and contains some errors. The following from a member of the family is intended to convey the facts in regard to this well-known and excellent woman.

She was the daughter of Hugh and Margaret Russell, of New Garden Township, Chester county, Pennsylvania, near the boundary of Pennsylvania and Delaware. At the age of seven years she said she was taken from her parental home by her uncle Joseph Shallcross, of Wilmington, Del., and lived with him, nursing him in his last illness, till he died, in all thirty years. After his death she was with his daughter Mary Lovering, in Wilmington, and her son Joseph S. Lovering, of Philadelphia. Born on the 24th day of Twelfth month, 1786, she was within three days of the age of 102 years when a short illness of four days caused her death,—a period of time almost equal to the life of the nation. From her account of her life as told by herself, it appears that she moved from Wilmington and Philadelphia to Sandy Spring, at the request of Deborah Stabler, who had been acquainted with her grandmother. She lived several years with Deborah Stabler, assisting that good woman in her house, and in others where her services were needed especially in the care of the sick.

We next hear of her at the house of Samuel Brooke, of Washington City, D. C. He maintained a plentiful and hospitable home, entertaining traveling ministers and other friends who came to Washington.

From Samuel Brooke's she went to Baltimore to aid Elizabeth Harvey in a dry goods store. From there, about the year 1827, at the request of her friend, Elizabeth E. Lea, she returned to Sandy Spring, and to the home of Elizabeth Lea, taking the care of and nursing her husband, Thomas Lea, who was at the time ill with consumption. She nursed him faithfully for four months, enduring the loss of sleep, and performing great labor for his comfort and relief until he died. She was now an indispensable member of this family, and she remained with them until the younger members were grown. The third daughter, Mary Lea, was married in 1842 to Henry Stabler, of Alexandria, Va., and in 1844, when they moved to their home at Roslyn, Rebecca made her home with them. Here she lived just forty-four years, a life of industry, a model of unselfish devotion to duty, a faithful servant of God, proving her faith by her works. She excelled as a nurse in sickness, comforting many by her services in times of trouble. In the last eight or ten years of her life her

sight and hearing became impaired, but her memory and interest in passing events, and in her friends, was as bright as with younger people. She continued her active physical labors as long as she had sight to perform them, and thought that the continuance of power of the body and the mind was dependent upon their exercise. She retained all her mental faculties to the hour of her close on the 21st of Twelfth month, 1888. H. S.

REBECCA M'GIRR.

A CORRESPONDENT, J. G. McGirr, writes us from Beallsville, Washington Co., Pa., to make some corrections in a recent paragraph concerning her, taken from a newspaper of that locality. He says she was born Tenth mo. 16, 1790, so that she is now in her 99th year. The statement that she once shook hands with Santa Anna, the Mexican general, is not true. "Again, 'Aunt Beckie' does *not* look forward to the celebration of her 105th birthday with confidence, but on the contrary thinks she will not live another year; but some of her friends think she may."

For Friends' Intelligencer and Journal.

JOHN U. KALER.

THIS Friend was one of the victims of the appalling disaster in the paint-shop at Reading, Pa., caused by the tornado which swept over a portion of the city about 6 p. m., on Fourth-day the 9th inst., and from which the death of about 25 persons resulted. He was at work on a car outside of the shop, when the walls were thrown down and the car turned over, and his head was crushed between fallen timbers, so that he was instantly killed, and it must have been a painless death. His body was not returned to the family for several hours, leaving them in dreadful anxiety. His funeral took place on Second-day the 14th inst., at 1 p. m. The interment was at the "Charles Evans Cemetery." Henry T. Child, Lukens Webster, and Samuel Jones spoke to the large company who had assembled at the house.

John was a man highly esteemed; he pursued his labors quietly and with great industry. He was a kind husband, a loving father, and a devoted friend. He leaves a widow and five children.

He was peculiarly gifted as a gardener and florist. He found

"Tongues in trees, and good in everything."

He had the faculty of drawing from the vegetable kingdom the finest flowers and the best fruits, and was a benefactor to humanity in this.

He was a regular attender of the meeting at Reading, and will be very much missed by the few Friends who remain. C.

"In studies, whatsoever a man commandeth upon himselfe, let him set houres for it. But whatsoever is agreeable to his nature, let him take no care for any set time; for his thoughts will flie to it of themselves; so as the spaces of other business or studies will suffice. A man's nature runs either to herbes or weeds; therefore let him seasonably water the one and destroy the other."—*Bacon*.

NEWS OF FRIENDS.

A MID-WEEK MEETING AT GIRARD AVENUE.

THE mid-week meeting at 17th St. and Girard Avenue, Philadelphia, on the 8th instant, was well attended. Among those present was John J. Cornell, who spoke. His remarks were listened to with marked attention, and were in substance as follows: "When Jesus was asked what was the greatest commandment, he answered 'To love the Lord thy God with all thy strength; and the second is like unto it. He then spoke in a plain, practical manner, on obedience through that love; that we all, both old and young must, to be happy, give the Heavenly Father our supreme affections. The many blessings we enjoy were referred to, and because of these we should love him with our whole nature. God has never dealt with us in anger: when adversity visits us we must remember the loving kindness of the Heavenly Father, and this love will bring all the happiness that the heart is capable of. We who are older must learn to give up our wills, as well as the little children. God is Love, and only a God of Love, instead of Fear. Only once did Jesus speak of fearing God. Just as a little child depends on his earthly parents, so we will find peace and rest for our souls if we give up our own wills to God. The movings of the Spirit work in the minds of very young children. We come to learn to love our fellows if we first love our Father. This will then turn into Charity, and not like those spoken of, who look at the efforts put forth by others with dissatisfaction, and then say 'I am holier than thou.'

Rachel Hadley, from Miami Meeting, Ohio, spoke very feelingly to the children, at some length.

John J. Cornell spoke the same evening on Temperance to a large audience at 15th and Race Sts., at the invitation of the Quarterly Meeting's Committee. He divided the subject under three heads: Socially, Religiously, and Politically. He anticipated returning to his home the same evening. C. A. K.

SWARTHMORE NOTES.

—John J. Cornell spoke in the morning collection on Third-day, the 8th inst., upon "Religion a Study, Its Object and Effect." A report of the address, which was heard with deep interest and satisfaction, will be given in another issue.

—A number of Friends from New York attended the meeting on First-day morning last. Among them were William M. Jackson, of the Board of Managers, and Aaron M. Powell. The latter addressed the students earnestly, and at considerable length, upon topics touching closely upon their daily college life. Such words cannot fail of producing the most beneficial effects upon the minds of the young.

—Friends will regret the loss of the hoped-for opportunity to hear J. R. Lowell this month. The following letter has just been received:

BOSTON, Jan. 12th, 1889.

Dear Sir: I have so grateful a memory of the kindness to me of Friends more than forty years ago that a letter in the "plain language" appeals to me with peculiar force.

But I have been obliged to renounce the half formed intention of lecturing in Philadelphia by the care I am obliged to take of my health just now.

Faithfully yours,
J. R. LOWELL.

For Friends' Intelligencer and Journal.

NOTES BY THE WAY.

IN the INTELLIGENCER and JOURNAL of Twelfth month 29th, was an article on "The Working Classes," in the course of which it is stated that standing armies are not the principal cause of the misery of the masses of the people in Europe. Supporting this view, the writer says that Belgium has a very large army in proportion to population, one hundred thousand soldiers out of six millions of people, and he adds that though its population is the densest in Europe, "yet there is little actual pauperism."

The *American Cyclopaedia*. (1873), article "Belgium," says: "Various pernicious influences have produced a vast amount of pauperism. In 1857 the 908,000 families of the kingdom were, by official report, divided into 89,000 wealthy, 373,000 living in straitened circumstances, and 446,000 [nearly one-half] living in a wretched condition. Of the latter class, 266,000 received support from the state." Thus it will be seen that of the whole number of families, (908,000) more than one-fourth were wholly or in part paupers.

The *Encyclopaedia Britannica* (1876), gives the number of people in Belgium to the square mile as 461. Whereas, in Pennsylvania, by the census of 1870, we had 95.2 to the square mile, just about one-fifth as many as in Belgium.

* * *

The recent publication of details in relation to the Williamson School of Industrial Trades has no doubt attracted very general attention. Those who attended our last Yearly Meeting and were present at the evening meeting on the Education of the Colored People of the South, may remember Fanny Jackson Coppin, one of the speakers, well-known to many as the principal of Friends' Institute for Colored Youth, under the charge of 'Orthodox' Friends. She was born a slave in Washington, D. C., was bought by her aunt; and has for many years, (both before and since her marriage), been a successful teacher. Her passionate desire has been to obtain Industrial Schools for the colored people,—and now this immense gift of Williamson's, perhaps in the end twelve millions, is to be open to them as well as to whites. But more besides this, the Friends in charge of the Institute of which she is the head have become interested, probably in a measure through her labors, in the same subject, and are establishing an Industrial School for Colored Youth. It is small, of course, compared with I. V. Williamson's great plan, (it does not board and clothe pupils), but yet calculated to be of great use, and remarkable in that its benefits are to be extended to girls; (the sexes are also equally treated in their other school.)

Stephen Girard's immense bequest established a college here for orphan white boys, I. V. Williamson's gift is to found an Industrial School without

that distinction, an entirely free school, like Girard College, for boys between 12 and 18. But how little is done, in comparison, for girls!

In his plan for his school, I. V. Williamson says that for nearly 30 years he has cherished a plan of endowing an institution where "poor and deserving boys could be gratuitously instructed in the rudiments of a good English education, and what is of equal, if not greater importance, trained to habits of industry and economy and taught mechanical trades or handicrafts." A young Friend of this city in a newspaper article, speaks thus of this plan:

"Throughout all this is able to be seen the old-fashioned and excellent idea that labor is honorable and that every man should be to earn his living by the work of his hands in some specific occupation. All right minded persons in the community, and more particularly that part of them to whom has been given the inestimable privilege of learning a useful mechanical trade in youth, and who appreciate, as all of them do, the great aid that such an experience is to a man in any walk in life he may afterward adopt—all these will feel a kindlier glow in their hearts for Isaiah V. Williamson."

P. E. GIBBONS.

For Friends' Intelligencer and Journal.

A FEW WORDS ABOUT SNAKES.

IN the early autumn of the year just closed, while making a brief visit among Friends in the country, the conversation turned upon the sights and sounds and curious things in nature of which little has been written, and very little is really known outside the range of the student or specialist. Those whose lives are spent in association with nature, whose occupations bring them constantly in contact with the denizens of wood and field and streamlet, have a fine opportunity to familiarize themselves with the habits of these, and for the sake of the children if there are any in the family, some study of this kind ought to be undertaken that the leisure from work may be attractively and profitably employed.

Nothing gives more pleasure to the children than to find father and mother interested in the things that interest themselves, and there is no better way to awaken the interest of children in nature, than by setting them to find out something about which very little is known.

On the occasion referred to, the question was asked, "Do snakes lay eggs, or are they viviparous?" No one could give a positive answer. Eggs had been found buried in rubbish of various kinds, but were they not more likely to be turtle eggs? As the same question had arisen in my own mind and was yet unsettled, I undertook to find a solution. And I have been able to gather is very meagre indeed, but I give it with the hope that some one equally interested in the subject will have more to communicate, and our knowledge in regard to the habits of these creatures will be increased thereby.

The study of the branch of Natural History called Herpetology, the order to which we find snakes is Ophidia, embracing "vertebrae omnia destitute of feet or fins, and having e— and head."

They are all oviporous, but some species hatch the young within the mother: in others, the eggs as they are extruded are joined together by a slender thread-like membrane, and are not hatched until the following spring. Whether this is true of all, or only of individual species, I have not been able to settle, there is really so little known about them; they are so retiring and nocturnal, and less interest appears to attach to them than to any other portion of the animal kingdom. Snakes are found in every quarter of the globe and in every country yet discovered excepting Ireland. It is related that an attempt was made at one time to introduce a non-venomous representative of the order into that country. There was no evidence of want of adaptation, but the people would not allow them to live long enough for a successful test. In a few weeks every one, (there were about twenty) disappeared. Snakes hybernate in cold climates, but in the tropics are said to remain torpid in the dry season. They swallow their food without mastication; the teeth, of which they have many rows, are used to seize and hold their prey. Their jaws are so constructed that they separate in the act of deglutition: the skin and muscles of the throat and gullet are capable of enormous expansion, enabling them to swallow creatures much larger than themselves. They would be liable to suffocation in the act of swallowing were it not provided against by the protrusion of the larynx beyond the edge of the lower jaw, during the operation. Snakes are divided into five groups. The first are Burrowing; they are harmless and attain no great size. The second are Ground snakes; they include the Ring Snake, Vipers, Cobras, Moccasins, and Boas, to which is added the Python. Some are venomous and some are harmless. The third group are Tree snakes. They are both venomous and innocent. The poisonous ones abound in India. Fourth group, fresh-water snakes, are all harmless; many belonging to the second group spend much time in water. Sea snakes compose the fifth group. They are all highly venomous. Of those which bring forth their young alive, the viper is an example: it is said that when alarmed the young creep into the throat of the mother, where they remain until the danger is past. The Python is found in India, Africa and Australia. It was an object of reverence among the Canaanitish tribes and divine honors were paid to it by other eastern people in the earlier times. The Boa was regarded as sacred by the Mexicans, and human sacrifices were offered upon its altars. Both the Boa and the Python attain an enormous length. One instance is recorded of a Python which was found coiled up around her eggs in the act of incubation, but there is really little known in regard to the process of hatching. The field of investigation in this department of nature awaits the coming student, who will do for these wily, unsocial, and in most cases unattractive creatures what an Audubon has done for the feathered tenants of our woods and marshes.

THE APPLE.

Prose and poetry are combined in the apple. Everybody praises it. The editor of the horticultural department of your farm paper expatiates on the merits of his favorite variety and discusses scientifically the modes of grafting and cultivation. The artist portrays on his canvas the beauties of its flowers and fruit. The poet sings of the—

"Sweets for a hundred flowery springs
To load the May-wind's restless wings
When, from the orchard-row, he pours
Its fragrance through our open doors,"

and tells how on winter evenings—

"Between the andiron's straddling feet,
The mug of cider simmered slow,
The apples sputtered in a row."

But to fully realize all the poetry there is in an apple one must eat it, not by the fireside in the winter, but out in the orchard on a summer morning before the world has fairly waked up to the heat and toil of the day. A juicy Duchess, picked up and eaten under the tree while the dew glistens on the meadow rosy with clover blossoms, and the fields of ripening grain lie bathed in the morning sunshine has a freshness of flavor which a winter apple never attains, and there is a charm about the whole situation which, I fancy, the orange groves and vineyards of more genial climates could scarcely rival.

The apple, as we have it, came from Europe, and is a descendant of the wild crab-apple of the Old World. It has long been under cultivation. Pliny mentions its use by the ancient Romans, who called it *ponum*. The native apple of the New World is the American crab-apple, *Pyrus coronaria*, with its fragrant pink blossoms and small, yellow-green fruit. Though it has never had the advantage of cultivation bestowed upon its European sister it is by no means to be despised. The blossoms are beautiful, and exceed in fragrance those of the cultivated apple, while the larger and yellower apples are very palatable and were highly valued for cooking before our orchards began bearing.

Numerous relatives of the apple are scattered over all parts of the world; indeed its family, *Rosaceae*, is so large and has so many dissimilar branches that one does not always recognize the members at first sight, though there is always a family resemblance to identify each individual if one will but stop to examine. For instance, there does not appear to be much resemblance between the apple and the rose, and the strawberry seems quite different from both of these. The difference, however, is only generic, and we find in each the distinguishing family marks—alternate, stipulate leaves, regular flowers with five sepals and five petals, numerous stamens inserted with the petals on the edge of a disk that lines the calyx tube, seeds without albumen and containing two thick cotyledons, and other less apparent characteristics.

There are about one thousand species of herbs, shrubs, and trees in the rose family, and it contains besides the three plants mentioned, nearly all our common fruits, the peach, the plum, the cherry, the

raspberry, the blackberry, and the pear, as well as the mountain-ash and numerous smaller plants.

A prominent characteristic of the tribe of the order *Rosaceae*, to which the apple belongs, is the fleshy fruit surrounding the five thin parchment-like cells containing the seeds. After the blossom falls, the parts below the corolla thicken up around the ovary until at last the seeds are entirely enclosed in the little green spheres and we have—

"Fruits that shall swell in sunny June,
And redden in the August noon,
And drop when gentle airs come by,
That fan the blue September sky,
While children, wild with noisy glee,
Shall scent their fragrance as they pass,
And search for them the tufted grass
At the foot of the apple-tree."

ANNA L. NICHOLS.

State Centre, Iowa,

THE TAPESTRY WEAVERS.

[A friend at Norristown, Pa., sends us the following, which had been published in a newspaper of that place, with the note that it had "been ascribed to several writers: among others to a Catholic priest."—EDS. INTELLIGENCER AND JOURNAL.]

LET us take to our hearts a lesson,—
No lesson can braver be—
From the ways of the tapestry weavers
On the other side of the sea.
Above their heads their pattern hangs;
They study it with care:
The while their fingers deftly work,
Their eyes are fastened there.
They tell this curious thing, besides,
Of the patient, plodding weaver;
He works on the wrong side evermore,
But he works for the right side ever.
It is only when the weaving stops,
And the web is loosed and turned,
That he sees his real handiwork,
That his marvelous skill is learned.
Ah, the sight of its delicate beauty!
How it pays him for all its cost!
No rarer, daintier work than his
Was ever done by the frost.
Then his master bringeth him golden hire
And giveth him praise as well,
And how happy the heart of the weaver is,
No tongue but his own can tell.

The years of man are the looms of God,
Let down from the place of the sun,
Wherein we are weaving away
Till the mystic web is done.
Weaving blindly, but weaving surely,
Each man for himself his fate:
We may not see how the right side looks,
We can only weave and wait.
But, looking above for the pattern,
No weaver need have fear;
Only let him look clear into Heaven
The perfect Pattern is there.
If he keep the face of our Master
Forever and always in sight,
His toil shall be sweeter than honey;
His weaving is sure to be right.
And at last when his task is ended,

And the work is turned and shown,
He shall hear the voice of the Master.
It will say unto him: "Well done!"
And the white-winged angels of Heaven
To bear him thence shall come down,
And God for his toil will give him,
Not coin, but a golden crown.

POESIES.

Oh, for the dear, old-fashioned posies
Growing close by the kitchen door;
Poppies soft that will bring forgetting,
Balm and mint for a spirit sore.
Heartsease sweet for hearts that are aching,
Ragged ladies and four o'clocks;
Marigolds with wealth uncoupled,
Cabbage roses and hollyhocks.
Old-time pinks with their spiey odor,
Tiger lilies and columbine,
Honey-sweet in its golden chalice,
Humming birds in the climbing vine.
Sunflowers tall that turn their faces
Out to the west as the sun goes down;
Morning glories which close and cower
Under the rays of his burning frown.
Clover fields with the bees a-humming,
Drowsy grasses that sway and nod;
Busy reapers the ripe grain cutting,
Fragrant breath of a new-mown sod.
Oh, for the dear old-fashioned posies,
Growing close by the kitchen door;
And for the loved familiar faces,
Gone from our sight forever more.

—*Louise Phillips, in Good Housekeeping.*

DOING, NOT DREAMING.

It is doing, not dreaming, that makes one a man.
If the plan is not followed, what good is the plan?
You may think till you seem, in your rapturous zeal,
To rise as if borne upon pinions; to feel
The stars sink beneath you; and, fanning your face,
Elysian zephyrs surround you in space.
That will not advance you,—no flame of desire
Has ever sufficed to lift any one higher.
But doing, and doing, and doing again,
Though little each day, yet each day all one can,
With courage and patience, to God ever true,
'Tis wonder what wonders a person can do.

—*I. E. Dickenga, in S. S. Times.*

NEW LIFE IN THE FAR WEST.

J. T. Duryea (Boston) in The Andover Review.

THE Western farmer, on the prairies, has the earth, the air, and the sky. The rest he must bring or create. With hand-tools he can do nothing. Usually he must dig for water, and find it poor often at that. He cannot find a twig large enough to serve as a whip with which to discipline a lap-dog. Happy is he if there is a watercourse, with its fringe of trees and shrubs, anywhere in sight. For the first year, at least, he must subsist on what he brings, and find his shelter in a dug-out (a hole in the ground), or a sod house, or a hut, and supply his fuel from the dry grass from his fields.

If he has money, and has "taken a claim," and so reserves his money for capital, happy is he. If not, he must borrow. For to break up the soil, he must supply horse power and use machinery. And when he begins to plant, so far is he from market, and so great is the cost of transportation, that he must cultivate large tracts, gather vast crops, to make out of small profits a moderate aggregate of gains. His horses, cattle, and machines make a demand for additional shelter, or the degree of waste is relatively to his estate enormous. For all he borrows he must pay a high rate of interest, since he has little security to pledge.

In the newer States, the percentage of profits from the product in grain is so small, that he is compelled to double it by turning his grain into beef and pork, and hence he must borrow again, as soon as "improvements" enable him to offer better security in stocking his land. Meanwhile he must be busy providing a permanent home, setting out trees for protection, fuel, and such fruits as are suited to the climate. His children are coming on, and must be educated while their minds are forming and are capable of acquiring knowledge. He cannot defer the provision for their needs, for the golden period is passing. They must have school-buildings, teachers, books. In the Territories he can have no help from grants of public lands set apart for the support of schools. Not until the State is founded will these be available. Accordingly the farmer must suffer himself to be taxed, and at a high rate. To his honor be it said, this he does, and very cheerfully too.¹

Let us turn from the farmer to the dweller in the town. His experience is peculiar and very recent, inasmuch as the conditions of his life are novel. Once the pioneer went out in the caravan, and when the worst was over the railway came up to him. Now the railway is the pioneer, and the settler follows. Civilization is on wheels. A station is located, a hotel is built, a store is established. Here is the new centre. A town will appear soon with its shops for the repair of the farmer's tools and wagons, and the shoeing of his horses; with its warehouse for his products and the goods he needs; with its real-estate offices to manage the occupation of lands, and its lawyers' offices to search titles, as lands exchange owners, and prepare deeds; its bank to make loans, keep deposits, cash drafts, and provide currency for small transactions. And all this takes place with amazing rapidity. In northwestern Nebraska, three years ago, such a railway station was marked out. To-day there is about it a town of seven thousand five hundred people.

This rapid growth makes imperative demand for all the appliances of engineering skill to make the place safely habitable, not to say comfortable. Prairie

¹It will be noticed that no account has been taken of disasters from fires on the prairies, and floods on the river bottoms; of the deterioration and destruction of cattle insufficiently housed during the severer winters before the farmer has been able to provide better shelter for them; of the loss of crops by drought, of the occasional failure of oversight and efficient labor from such sickness as is common everywhere, and is exceptional during the early periods of settlement owing to lack of variety in food and unusual exposure to the weather; of the wholesale ravages of gales and blizzards.

soil four feet deep, and in the rainy season "soft as tar," and as sticky, too, does not make good sidewalks and thoroughfares. Paths must be made of planks, streets must be paved with stone. There is not a stick or a pebble within miles. The highways must be lighted at night, surface or under-drainage must be secured, and sanitary methods must be applied under difficult conditions, since there is no natural "waste-way" pushing the accumulating débris to distant points and discharging it in harmless deposits.

Then all the institutions of organized society must be founded and steadily extended. And, alas! the community must protect itself from vice and crime, and bear the burdens of impotence, infirmity, insanity, and wickedness.

If the townsman is more prosperous than the farmer, he is proportionally taxed in manifold ways. And so the few great bankers, railroad managers, speculators, of whose rapid rise and great fortunes we hear so much, perforce take their due share of the common burdens, and indirectly if not directly sustain all good institutions by providing and maintaining the necessary physical and social basis and environment. And many of them do give and give largely (if not liberally, considering their wealth), to enterprises which are humane and beneficent in their immediate and remote effects upon all the interests of the communities.

When I sat in a carriage with the noble President of Yankton College last summer, and looked out from the height on which it rested, and saw the graded streets, the planked sidewalks, the columns for the electric lights, the public buildings, the reservoir of pure water on one hill, the college halls and dormitories on another, the asylum on a third, and then gazed on the squares of home-like dwellings, with the schools, and the churches at the corners, I could not repress the thought, "What Aladdin's lamp did all this?" The answer was, no other magic is here displayed than the courage, energy, and toil of earnest men and women. And this was the Yankton of the cowboy, the adventurer, the desperado. I think it has two or three constables now, one or two of whom a citizen told me he thought he had once seen. And for this many thanks are due to the man who sat beside me, once a home missionary, now a wise educator, and no mean statesman, the sure, faithful, and trusted counselor of the men who are making Dakota a State and mean to bring her into the Union, thanks to the last election.

It is the delightful way of love to spread itself all abroad, that it may touch and flame at every point,—in the flower, in the sparkling wave, the starry sky, in baby's laugh, in sport and dance, in the subdued joy of faith, the wisdom of age, in the ascent of reverence and worship.—*W. M. Bicknell.*

The greatest obstacle to being heroic is the doubt whether one may not be going to prove one's self a fool; the truest heroism is to resist the doubt; and the profoundest wisdom to know when it ought to be resisted, and when to be obeyed.—*Hawthorne.*

THE EARTH AND ITS MATERIALS.

At the monthly meeting of the Delaware County Institute of Science, at Media, on the 5th instant, the lecture was delivered by Graceanna Lewis. She took a general view of the constituents of the crust of the earth, all of these constituents being derived from substances either in the *solid, fluid, or gaseous* condition. The most abundant and important elements are Carbon, Hydrogen, Oxygen and Nitrogen, and these four elements enter into the chemical constitution of every plant and animal on the globe. Substances familiar to us are found to exist in meteorites, comets, and irresolvable nebulae, as well as resolvable nebulae, stars, and suns, so that a community of origin is established between the different orbs with which we are made acquainted by the study of astronomy. She quoted the opinion that "but one system of matter prevades the immense spaces of the visible universe; it being a dream of physical philosophy that all recognized chemical elements will one day be found but modifications of a single material element." In furtherance of this view, she dwelt on the suggestions of Sir Isaac Newton, Faraday, and the later studies and experiments of Prof. Crookes, F. R. S., who believes in a "Fourth State of Matter" as far beyond the gaseous, as that is beyond the fluid and the solid. Numerous estimates, from different data, were given as to the time required for condensation before our earth had its birth; and of the immense length of the Geologic Period, the conclusion being that there had been ample time for the observed changes in vegetable and animal life, since the deposition of the sedimentary rocks of our globe. The direct line of development from the lowest forms was traced, in the vegetable kingdom, to the apple and the rose; and in the animal kingdom, to man, the whole being regarded as a system of Divine Order, having for its purpose progression towards Divine Perfection.

The idea was especially dwelt upon, that we are dwelling in a universe which is *living*, and not dead, and which, in every portion of it, is obedient to general laws, which are fulfilled, not in years, but in countless eons of time; and that our minds are penetrated by the Divine Light as the earth is filled by the Light of the Sun. Charts of Geology, and of the Vegetable and Animal Kingdoms, illustrated the subject with clearness. *

ORNAMENTAL TREES: CHANGE OF TASTE.

From a nurseryman's standpoint, whose practical knowledge of the wants of customers enables him to understand what is most in demand, it is seen that a revolution has been quietly going on in the matter of ornamental planting. It may surprise many people to learn that the trade in evergreens has gradually dwindled until it scarcely pays to grow them. This is particularly noticeable in the class known as rare conifers. The demand for these twenty-five years ago was so encouraging that many enterprising firms increased their collections by introducing every novelty of merit from the various markets of the world. To-day the sales on such are so limited

that many nurserymen bewail the necessity for destroying an accumulated overgrown stock. One may reason with some degree of certainty as to the cause of this change in public taste. Americans, as a rule, differ from the English in this feature of horticulture. While we care only for effect in landscape gardening, they love their trees for the individual merit of each. In place of a lavish display of a few thoroughly hardy and cheap conifers, such as the Norway spruce, as seen on most of our lawns, the English gentleman prefers as much variety of tint, form, and character as it is possible to obtain. In short, our national characteristic is economy, even to the sacrifice of originality in our trees and plants, while they show a disregard of cost provided a new feature may be added to the collection. These views are forced upon us when we examine the various European catalogues, and note the exorbitant prices at which rare trees are listed. Especially is this the case when finely formed specimens have been grown with marked care. This system extends even to fruit trees, and pays the owner for his trouble; but with us customers could not be forced to recognize the added value of trained plants.

Regarding the cause of abated interest in the older, well-known, and cheaper evergreens, such as American arbor-vite, hemlock spruce, Norway spruce, the various pines, firs, etc., the answer becomes more difficult, and yet there can be little doubt that these are in much less demand than formerly. Are evergreen hedges going out, and is there less need of windbreaks and clumps of glorious old conifers? I cannot see that there has been any change in the requirements, although there has been in the views of our planters. This lack of appreciation does not apply with equal force to the deciduous trees, notwithstanding the number of these sold, too, has perceptibly fallen off. There are more of the leading popular species sold for avenues, streets, etc., at present, while there are fewer of the rarer forms disposed of, such as purple, fern-leaved, and weeping beeches, magnolias, salisburias, etc. In fact, there seems to be very limited sale for all novelties in deciduous trees, and comparatively none for new conifers. I am loth to believe that this is owing to degeneration in American arbor-culture, and that our people are losing interest in tree-planting, but it certainly looks that way. In ornamental shrubs, on the contrary, all the most valuable kinds are more sought for than ever before; and as soon as confidence is gained any new shrub of merit is sure to be disposed of as rapidly as it can be increased. In this we have an apparent contradiction of the theory of degeneration in horticulture, and it merely shows the vacillating taste of planters. That their choice is gradually undergoing a change from tender bedding-plants to the hardier and more economical herbaceous flowers, reflects favorably on the judgment of our flower-loving people, but in the decided abatement of interest in ornamental trees, and especially in the evergreens, we are to be censured.—*James Hoopes, in the New York Tribune.*

NEWS AND OTHER GLEANINGS.

—In regard to the injurious consequences upon the nervous system entailed by residence in cities amid continuous noise, the London *Invention* says: "It is doubtful if any nervous system ever becomes so indurated to this incessant strain as to feel no harm. The yelling of steam whistles, the hiss of steam pipes, the rattle and clash of wheels on stone covered streets, the rumble of street cars, the clangor of bells, the howling of hucksters, keep up a condition in which a healthy nervous system of natural strength and sensitiveness is impossible. And there is not one of these agencies that is not suppressed more or less completely in most of the great cities of the world. In Berlin heavy wagons are not allowed on certain streets. In Paris any cart-load of rattling material must be fastened until it cannot rattle. Munich allows no bells on street cars. In Philadelphia, church bells have been held a nuisance in certain neighborhoods by judicial ruling. Steam whistles are forbidden in nearly all the larger cities of this country and Europe. Our city might make a trial of one or two cases as an experiment."

—Of the sixteen Republican members of the Delaware Legislature it is stated, (in a dispatch from Dover) that only two ever tasted intoxicating liquors, fourteen being "teetotalers."

—Since 1871 France and Germany have been increasing their respective navies as rapidly as they have been adding to the effective force of their armies. And they have not only built ships and furnished them with the most powerful armaments, but they have similarly constructed the most effective defensive works along their seaboard. At the present time the French navy is actually superior in regard to physical force to that of England, and the navy of Germany is only a little inferior to it.—*Exchange*.

—A newspaper paragraph says that Anna E. Dickinson has gone back to Pittston, Pa., to spend the winter with her aged mother and only sister. She has improved in health, but is still under the doctor's care.

—A Virginia City, (Nevada), newspaper says that a Piute, now in jail on a charge of murder, displays great skill in drawing, and has made a picture of the prison, as seen from the yard, that is really fine. The newspaper further says that the Piutes have a natural taste for drawing and that many of them are able to draw very good pictures of railroad trains and the like. The children made all kinds of animals in clay, as naturally as white children model mud pies; and even the stupidest looking of the men will with a pencil dash off without the slightest hesitation a map of any portion of country with which he is acquainted, putting all the rivers, lakes, and mountains in their proper places, and giving the whole proportional dimensions.

—Six hundred thousand acres of land were conveyed to 4,000 actual settlers in Manitoba last year, increasing the population of that province by 17,000. The prospects indicate a larger increase this year. The weather throughout the Northwest has been mild.

—The yield of the Baldwin Locomotive Works, Philadelphia, during 1888 eclipsed that of any previous year, the number of locomotives erected having been 737. Taking the average length per engine and tender at 45 feet, the year's output of 737 locomotives coupled together would make a train 61 miles long, and under steam would weigh over 50,000 tons. The average size and weight per locomotive and tender is greater than in any previous year.

—The municipal government of New York city is to increase its contribution to the annual income of the Met-

ropolitan Museum \$10,000, making the total amount \$25,000 yearly. The condition of this additional gift from the city is that the Museum shall be kept open two evenings in each week, free, that the people who are at work during the day may have an opportunity to study the collections and share in the benefits of the institution.

—The English newspapers contain accounts of what, when it is completed, will be the largest electric light plant in the world. The London Electric Supply Corporation contemplates a station which will have the capacity to supply 1,000,000 lights with electricity. Engines of 13,000 horse power are being constructed, and the dynamos (each supplying 25,000 lights) are the largest ever in use. The main cable leading from the station has a diameter of 2½ inches. There are a number of central distributing stations where the potential is lowered to that necessary for the lamps.—*The American*.

—The shipment of table grapes to Eastern cities and the manufacture of raisins is more profitable than wine and brandy-making. The price for wine grapes in the State this year is very low. Raisin-making is an industry which has entirely grown up during the past decade. The pioneers in the business were made the target for a great deal of ridicule. The laugh is on the other side now. A more profitable, safe, and agreeable business cannot be named. A Riverside (San Bernardino county) gentleman sold the crop on his vines for \$10,000. He has 105 acres, and the price named gives him about \$100 per acre. The cost of caring for the vineyard has been about \$25 per acre. The purchaser assumes all risks. The yield of this vineyard has been about 8,000 boxes of raisins per annum. It would be difficult to find a more intelligent, prosperous and progressive class of people than the California raisin-makers.—*Exchange*.

—When the rosewood tree is first cut, the fresh wood exhales a very strong roselike fragrance, which soon passes away, leaving no trace of the peculiar odor. There are several varieties of rosewood trees. The best, however, are those found in South America and the East Indies and neighboring islands.

—"I wish the women of the world would call on the men to give up this wild, ungovernable chase for more money, and the women govern themselves accordingly. Who is the happier for such extravagance in dress, furniture, useless decorations, grand equipages, etc.? Are they not more or less procured at the expense of the moral and physical nature? What is there that many men, and women too, will not sacrifice for a few dollars more to be spent for that which enriches them not, but makes them poor indeed? Are they wiser, better, or in any way happier for having gained this surplus sum? In my experience I have found more health, more contentment, more kindly feeling among the laboring class, than I have ever seen among that class who make money merely for the sake of display. There is more truth than poetry in the saying that 'enough is as good as a feast.' Few realize the true significance of industry and economy. But why do I talk? I am so weary of words, words, words, and yet some good may come of words. Are not all great and good things simple? And might it not be well for more people to set the example of a simple and well-ordered life, that the young might not be tempted into such extravagance as is now the bane of life?"—*Elizabeth Thompson, in Union Signal*.

CURRENT EVENTS.

A TERRIBLE cyclone storm visited the cities of Pittsburgh and Reading, in this State, on the evening of the 9th instant. At the latter place, it occurred shortly before six

o'clock, its most serious damage being the complete leveling of a large silk factory, in which some two hundred persons, mostly young women, were employed. The building was probably not over strong in its walls, for the load of machinery, etc., which it carried, and when the storm struck it, there was a perceptible trembling for an instant, and then a complete collapse. About one-half of those in the building were badly injured, and about twenty killed or since have died. At the same time a paint-shop of the Philadelphia and Reading Railroad was blown down, by which five men lost their lives.

At Pittsburg the main damage was done to an unfinished high building, whose walls caught the force of the wind, and were blown down. The loss of life by this accident was from twenty-five to thirty, several not killed being injured beyond hope of recovery.

News from Africa is now reported to have been received in London positively announcing the safety of Stanley, the explorer.

The electors of the several States all met on the 14th inst., at the several State capitols, and their votes were cast according to the decisions of the election in the Eleventh month last: for Benjamin Harrison, 243; for Grover Cleveland, 168.

It is rumored in Canada that the British Government will compel Sir John Macdonald to recede from his policy of restricting Chinese immigration, for the reason that such restriction is inconsistent with treaty obligations.

The deaths in this city last week numbered 360, a decrease of 6 from the previous week and a decrease of 29 compared with the corresponding period last year. Among the principal causes were: Consumption 44, scarlet fever 9, typhoid fever 10, pneumonia 50.

A PASSENGER train collided with one portion of a freight train, which had broken in two, on the New York, Pennsylvania and Ohio Railroad, at Tallmadge, Ohio, on the morning of the 14th inst. Eight persons were killed and twelve injured.

In Georgia the elections of 1888 have been rather less favorable to the Prohibitory movement. In October, 1887, there were 38 "wet" and 100 "dry" counties. There are now 64 "wet" and only 74 Prohibition counties.

NOTICES.

* * A Conference of parents, teachers, school committees, and others interested, will be held under the care of the Committee on Education of Philadelphia Yearly Meeting of Friends on Seventh-day, First month 26, 1889, at 15th and Race streets, Philadelphia, commencing at 10 o'clock a. m.

The subjects for consideration are: 1st Vocal Culture. 2d Incentiveness.

All interested are invited.

Prompt attendance is desired.

WM. WADE GRISCOM, Clerk.

* * The Committee of Philadelphia Monthly Meeting have arranged for a social reception for members and attenders of their meetings.

Especially would we solicit the company of young Friends from the country, and other strangers in our midst.

It will be held in the parlor and library room, at Race street, on Sixth-day evening, First month 25, between 7.30 and 10 o'clock.

* * The Visiting Committee of Philadelphia Quarterly Meeting will attend Merion Meeting on First-day next, 20th inst., at 10.30 a. m. Elm Station is the nearest on the Pennsylvania R. R.

* * A Temperance Conference under the care of a committee of Western Quarterly Meeting of Friends will be held in their meeting-house, in Kennett Square, on First-day, the 20th of First month, 1889, at 2 o'clock p. m. All are invited.

ELENA M. PRESTON, } Clerks.
E. MICHENER, }

* * The Joint Committee on Temperance and Intoxicating Beverages of Philadelphia Yearly Meeting of Friends, will meet at Race Street Meeting-house, Philadelphia, on Seventh-day, First month 19th, 1889, at 11 a. m.

JAMES H. ATKINSON, } Clerks.
ANNIE C. DORLAND, }

* * A Conference on the subject of Temperance, under the care of the Committee of Concord Quarterly Meeting, will be held at Darby on First-day, 20th inst., at 2.30 o'clock p. m. Friends and others interested are cordially invited to attend.

MARY McALLISTER, Clerk.

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

SOME DAY.

SOME day all doubt and mystery
Will be made clear.
The threat'ning clouds which now we see
Will disappear.

SOME day what seems a punishment
Will prove to be God's blessing sent
For very gain.

SOME day our weary feet will rest
In sweet content,
And we will know how we were blest
By what was sent.

And, looking back with clearer eyes
O'er life's short span,
Will see with wondering, glad surprise,
God's perfect plan ;

And knowing that the path we went
Was God's own way,
Will understand His wise intent,
Some day ! Some day !

NOTES FROM PALESTINE.—II.

JERUSALEM AT "EASTER"—CHURCH OF THE HOLY SEPULCHRE—THE HOLY FIRE—VIA DOLOROSA.

At the time of "Easter," the population of Jerusalem is swelled by crowds of pilgrims and visitors, who jostle against one another in the narrow streets until they are almost impassable. Now and then a train of camels, marching with solemn tread, or a party on horses and donkeys, push aside the foot-passengers, forcing them to take shelter against the walls of buildings or in the contracted booths by the way. We met Europeans of every nationality, Armenians with broad red sashes, Turks in wide trousers and Zouave jackets, Jews in Oriental costume or with fur caps, long-haired Greek monks, Bedouins in striped mantles and yellow turbans, Syrian ladies with flowing white draperies, a Russian princess in riding habit embroidered with gold, her attendants wearing knee boots and padded robes.

The centre of attraction for all Christians is the Church of the Holy Sepulchre. We reached its entrance by leaving the narrow streets and descending a flight of stone steps to a small paved square. Both steps and square were thronged with people. Amidst the multitudes were many beggars and vendors of rosaries and relics. They offered for sale souvenirs of olive wood and mother-of-pearl, olive-oil soaps, and attar of roses. The church itself is so

hemmed in by other buildings, that from no single point could we get a view of the whole, but the fine dome which crowns it can be seen from many places in Jerusalem.

Turkish soldiers guarded the door. They allowed us to enter unquestioned. The land and church are under the dominion of the Sultan, although the chapels within the church are owned by five different sects, the Greek, Latin, Armenian, Syrian, and Copt. The Turkish government permits all nations to worship here except the Jews.

One who wishes to see all things truthfully finds her credulity severely taxed and her feelings of reverence repeatedly shocked, in the Church of the Holy Sepulchre. Under its roof the custodians attempt to point out the exact spot of every scene connected with the crucifixion and entombment of Jesus, although the belief is now current among scholars that the real site was on a hill just north of the city walls, where to-day are to be seen only a few Mohammedan graves.

As soon as we had crossed the threshold we found ourselves standing before a marble slab which pilgrims were devoutly kissing, beneath a circle of lighted lamps. This marble covers the "Stone of Unction" on which, it is said, the body of Jesus was laid for anointing by Nicodemus after the crucifixion. To mark the spot where Mary stood at that time, a small circular enclosure has been built about another stone.

Passing into a spacious rotunda, we turned our eyes upward to the interior of the lofty dome, which is sixty-five feet in diameter and richly decorated with mosaics. From a circular opening at the top the sun's rays slanted downward through the vast space, and rested finally, in a halo of light, on a small temple of white marble beneath. It was like a little church, twenty-six feet long and eighteen feet wide, supported by eighteen piers, and surmounted with a crown-shaped dome and cross. This temple is called the Chapel of the Holy Sepulchre. The interior is encased with marble, and contains two rooms. The first, a tiny vestibule, is named "The Angel's Choir," because it contains a stone said to be that the angel rolled away from the tomb ; in the second is a plain white marble slab raised a few feet above the floor and built over a rock-hewn cave. This is called the Tomb of Jesus. The marble is worn by the kisses of many pilgrims ; above it hang forty-three ever-burning lamps, and the room is fragrant with incense. Only a few can enter at a time, and people are constantly filing through the narrow door-way—one going in, another out. Some

have made long pilgrimages and walked weary miles to worship here.

The chapels of the different sects open into the rotunda. They do not confine their worship each to the part of which it has special charge, but take turns in making processions to all of the shrines and consecrated places within the church. The chapels of the Armenians, Copts, and Syrians are dark and small, those of the Latins and Greeks are more spacious and elaborate.

Procurring candles, we entered a short, narrow passage leading from the chapel of the Syrians and descended one step into a gloomy, rocky chamber containing two tombs and traces of others. It is claimed that here were the sepulchres of Joseph of Arimathea and Nicodemus.

After returning to the rotunda, we noticed two rings traced in the marble pavement. These were to indicate where Jesus and Mary Magdalen stood when he appeared to her and she thought him the gardener.

As we approached the Latin chapel we heard a constant tapping, like hammering. It proceeded from the toes of shoes, repeatedly knocking against the rise of a short flight of wooden steps, up which people were crowding in close succession to kiss the "Column of the Scourging of Jesus," a broken shaft which stood at the top. Opposite was a painting of The Last Supper. The Latin chapel is frequently called the Chapel of the Apparition, from a legend that here Jesus appeared to his mother after the resurrection. In the sacristy adjoining, a monk showed us the sword, spurs, and cross of Godfrey de Bouillon, the Crusader, which are still used in the ceremony of receiving knights into the Order of the Sepulchre, which has existed since the Crusades.

The Greek Chapel is gorgeously decorated with gilding, statuary, and paintings, and contains seats for the Patriarch and other dignitaries of the church. Noticing a short column in the centre of the marble pavement I asked our guide, "What is that?" "It marks," he answered gravely, "the centre of the earth, and is also the spot from which the dust was taken of which Adam was made. His tomb is in another part of the building."

Among other shrines were pointed out to us the chapel of St. Longinus, the prison of Christ when awaiting his crucifixion, a broken column where he sat while the soldiers plaited the crown of thorns, the chapel of the Division of the Vestments, and the station of the mother of Jesus and the beloved disciple at the crucifixion.

To reach the portion of the church called Calvary or the Chapel of Golgotha we ascended eighteen steps. It was paved with marble, and the decorations were of great richness, the pictures being set in diamonds and other precious stones. Under an altar are three holes, drilled in the rock six feet apart, where, it is claimed, the crosses were planted. Near this altar a long brass cover has been placed over a rent in the rock which can be seen best by entering a chapel under Calvary and removing the brass.

The Church of the Holy Sepulchre was built by

Constantine on its present site because his mother, Helena, believed that this had been revealed to her in a vision as the place where the cross stood. The legend records that she watched the excavations until three crosses were found with nails and crowns of thorns. To ascertain on which Jesus was crucified she sent for a noble lady on the point of death, who was miraculously cured when she touched the Holy Cross. This event is called in the calendar of the Greek Church "The Invention of the Cross." The remains of the ancient Basilica of Constantine are still beneath the present structure. To see them, we descended from the main floor of the church twenty-nine steps. The stairs sent back a hollow sound from under our feet, as if built over an old cistern. We found a chapel containing altars to the memory of the penitent thief, to St. Helena, and a seat in which the empress is said to have sat while the cross was being sought. Above was pointed vaulting, evidently of the time of the Crusades. Then we descended thirteen more steps, the last being made of natural rock. In a cavern below was a marble slab in which a beautiful cross was inserted. Near was a bronze statue of Helena of life-size, holding a cross.

At Easter most gorgeous ceremonies take place in the Church of the Holy Sepulchre; first those of the Roman Catholics and, a week later, the Greek. The interior of the church is then hung with banners and tapestries, is illuminated with candles and swinging lamps, and is fragrant with burning incense.

Processions headed by the Greek or Roman Patriarch, clad in white satin embroidered with gold and silver and glittering with rich gems, followed by bishops, monks, choir-boys, and a motley crowd of pilgrims, wind round and round the Chapel of the Holy Sepulchre, with solemn chant. All carry lighted candles, and many have Bibles. We joined these processions sometimes, and if by chance our tapers went out, they were sure to be lighted again by some friendly pilgrim with a bow and a smile. On Palm-Sunday all carried waving palm-branches.

Some of the ceremonies are realistic to an extent that is revolting. The night before Easter the Latins nail to a cross a wooden image made with joints. Another religious rite is the "Washing of the Feet," that service being performed by a high dignitary in the Latin Church for a few of the pilgrims who have come a long distance. The most brilliant ceremony is called "The Holy Fire," celebrated by the Greek church. To see this we waited in the church seven hours. There was an audience of twelve thousand people, who stood closely packed. We were obliged to go early to find a place, and it would have been impossible to leave had we wished. At 2 o'clock, p. m., all persons were excluded from the Chapel of the Holy Sepulchre, and the Greek Patriarch entered it alone. Suddenly fire flashed from a small window of the chapel, while a triumphal chorus sang, "Christ is Arisen." The people rushed forward in wild excitement, pushing and even leaping upon one another's shoulders, to light their tapers from the flame. So quickly was this done that the whole church was suddenly illuminated, the fire traveling with great speed, as one communicated it to another. Soon,

however, the flames of the burning wax became suffocating. In 1834, when there was an immense audience like this, a panic arose. The Turkish guards outside thought the Christians were about to attack them. The confusion became a battle, and three hundred pilgrims were killed.

A succession of streets roughly paved lead from the supposed site of Pilate's Judgment Hall, a gloomy building with high walls, now used for Turkish barracks, to the Church of the Holy Sepulchre. This way is called the Via Dolorosa, although there is no historic evidence that Jesus passed along it when bearing the cross. There are fourteen prayer stations on the route, according to the canons of the Romish Church. The first is a chapel within the Turkish barracks. The second is where the cross was laid upon Christ at the foot of the steps which led to Pilate's Hall; the so-called "holy stairs" have been transferred to Rome and may be seen there near the Church of St. John Lateran. The arch of Ecce Homo spans the street above the spot reputed to be where the Roman governor uttered the words: "Behold the man!" The third station is near a broken column where Jesus is said to have sunk under the weight of the cross; the fourth, where he met his mother; the fifth, where Simon of Cyrene took the cross from him; the sixth, where, according to a legend, Saint Veronica wiped his brow with a napkin upon which his features became imprinted; the seventh, at the intersection with another street at a point called "The Gate of Judgment;" the eighth, where Jesus said, "Daughters of Jerusalem, weep not for me;" the ninth, where he sunk again under the cross. The remaining five stations are within the Church of the Holy Sepulchre.

So many waves of destruction have swept over Jerusalem that it is not strange it is difficult to locate historic spots. It has been sacked, burned, and razed probably more than any other city in the world. Even Mount Zion itself can scarcely be distinguished at the present day from other parts of the city, the valley between it and Mount Moriah having been nearly filled with debris.

CORA A. BENNESON.

ESSAY ON MUSIC.¹

In the subject chosen for an essay, I only propose to discuss it as associated with the Society of Friends. I do not propose to enter the privacy of the home life and discuss its appropriateness there, but only as a factor in our First-day school as a means to build up society and advance the cause of truth and righteousness in the earth, compatible with the great central principle professed by us. In presenting my thoughts upon this subject I do it with deference and with the utmost kindness to all who may differ with me.

What is music? I answer, harmony of sound, and were it not for one of the five senses through which a sense of this harmony is communicated to the mind we could have no conception of music. It enters thereby into the physical economy of man,

and is not one of the pillars in the great spiritual building. Its effects upon us are emotional and evanescent. It deals wholly with the passions, possesses no convicting power, establishes no principle, convinces of no truth. It sways the multitude through the emotions of the human mind, and thus becomes a source of entertainment or amusement. The great work of progress in righteousness depends on the application of a correct principle to human life; a wrong here and there must be given up, must be sacrificed, and the beautiful principle of love and mercy take its place; thus we grow in the simplicity of the Christ-life. Christianity is a principle. It seeks not to entertain and amuse, but to instruct in all the duties of life. It leads away from sensuality as a means to happiness. It seeks to do good at any sacrifice. While it adores the Author of all good with a warm, loving heart, it seeks the uplifting of humanity everywhere, it touches our hearts with sympathy for the suffering of every clime, and thus our hearts are attuned, not by harmony of sound, but by the silent touches of a divine power that heaves all into its own nature; and thus all the powers of the soul realize that divine harmony which harmony of sound can never produce. A stream can not rise higher than its fountain. The source of all good, of all spiritual life, of the development of the God-like powers of the soul is God. To be a recipient of this blessed spirit and have our lives moulded by it, is to submit ourselves to its guidance and open our hearts to its indwelling power.

All great reformations have been wrought by the truth. As men and women have been true to their convictions and proclaimed them to the world, even when it has endangered life and property, how it has swept over the world compelling conviction! Jesus of Nazareth was raised up by a divine power and spake as never man spake. Enemies were arrayed against him; they saw his armor was truth, his Father was with him. They felt the searching words he uttered, and said if this man is allowed to rule he will take away our place and nation. Kings and priests were made to tremble; they feared him as a great power for good. We have no account of his resorting to music to make his work more efficient. He did not amuse or entertain the people by gratifying their senses. So down through the ages whenever and wherever error has been enthroned and consequent unrest followed because of the exercise of despotic power over the consciences of men, God in His might has raised up instruments who have fearlessly through His power alone gone into the battle, and often through a long, tedious struggle, perhaps of many years, have succeeded in supplanting the enemy. The fire thus kindled has never ceased to burn until it accomplished the object whereunto it was sent.

Those of us who are familiar with the history of the Society of Friends know what they endured for the sake of truth, the convicting and searching testimonies which they bore amid a world-wide opposition, with implacable cruelty in its heart. Notwithstanding this formidable power arrayed against them, the truth gained ground and a complete vic-

¹By Thos. E. Hogue. Approved by Representative Committee of Illinois Yearly Meeting of Friends, 1888.

tory for the religion of Jesus came, liberty was granted to all to worship God according to their own highest conception of him, and soon was gathered a large society, bringing into its fold men of high rank in church and state. Music performed no part in this great reformation. I believe whatever good is done not only for purification of the individual soul, but also the uplifting of humanity, that underneath all is a power mightier than man at work. If we could only rely entirely upon this divinity within us, what grand results would bless the world! A looking to anything else as a means to accomplish a great good is to distrust our Heavenly Father. I believe it is as true now as the day it was uttered, "Without me ye can do nothing."

Again it is asked, How shall we get our children interested in the affairs of Society, that we may educate them in its principles? How shall we draw them to us? I am aware I am dealing with a difficult problem. Music is suggested as the attractive power. In order that Christianity be made attractive and acceptable to the young mind they must see its loveliness. They need the helping hand of the parent, who must feel the importance of this religious or Christian training. To teach aright we must be imbued with the Christ spirit, must feel that immortal spirits are committed to our charge and upon us rests in a great measure the future of their lives. We should watch closely all wrong manifestations, reprove and show wherein the error lies. In our relations to the child we must meet it on the plane of real life and make our principles practical. Infuse as much as possible the kind, loving spirit in their hearts. Create a reverence for our Heavenly Father, a love for truth and right. These seeds sown in early life will in due time bring forth fruit. This labor will never be lost, and in after years they will recur to this instruction and counsel, timely given, with gratitude. The child and parent will realize a precious nearness and sympathy. The hearts of both will be centered in life's great work. Thus we deal with principles, and as they become infused in the child's life they build up a noble character that is felt wherever known. Such a child, man or woman, is at home wherever it breathes the atmosphere of purity. In this sweet communion with all that is good it is cheerful and happy—happy in the consciousness of that power innate in the human soul that leads into the kingdom of heavenly experiences the grandest harmony we can have any conception of. Then that which underlies all real excellence in morals and religion is of infinite value to the child and all the intermediate stages to old age. Music in itself is innocent, but liable to abuse; and more credit, I have feared, is given it than it deserves as a potent power for good, thereby detracting from the real worth of that principle which does give efficiency to the real work of life.

THE persecution of Christians in Jerusalem that began immediately after the martyrdom of Stephen, was designed for suppression and destruction; and yet it had just the opposite effect, since those who were thereby "scattered abroad went everywhere preaching the Word."

OBJECTS AND METHODS OF WORK OF THE "YOUNG FRIENDS' ASSOCIATION."

THE objects of the Young Friends Association, as set forth in the Constitution recently adopted, are "the attainment of a thorough knowledge of the history and testimonies of the Religious Society of Friends, together with a closer acquaintance and association among those connected with it either by membership or community of interest," and further, as is also intimated in the same article, the awakening of "an active interest and participation in the affairs of the Society, and the intelligent promotion of its principles."

That these purposes may be better understood, a few words explanatory of the origin of the new organization seem to be in place. In the new interest in the affairs of our Religious Society which has been developing during the last few years, and which has found its best expression, perhaps, in First-day school work, there has been experienced by some, possibly by nearly all, of those interested, a lack of thorough knowledge of the history and principles of the Society of Friends,—a knowledge which seems to be an essential qualification for accomplishing the best results in that work. At a meeting of a few members of our Society, (all of them, I believe, interested in First-day school work), it was found that this need of a more thorough knowledge was felt by all; and it was also discovered that each Friend had formed the purpose to make as thorough a study as possible of our history and principles, and thus satisfy this need. When it was suggested that an organization be formed for the systematic study by all of what each one desired to have a knowledge of, and through such combined effort allow each to profit by the labor and research of all the rest; and also as opportunity might be afforded, promote a like knowledge among those even outside of our membership—when this was suggested, the proposition was promptly approved, and has since met the cordial approval and support of other Friends. Meetings for the drafting of Constitution and By-Laws were held; that instrument was completed and adopted, and the new organization, under the name of the "Young Friends' Association," is about ready to begin active operations, and extends an invitation to all members of the Society of Friends, and all others interested in its objects, to join it and aid in its work.

From the foregoing it will be seen that the objects of the new organization are three-fold:

First: to attain for its members a thorough knowledge of the history and principles of the Religious Society of Friends.

Second: to disseminate such knowledge among others as may open.

Third: to promote a closer acquaintance and association among those connected with our Religious Society either by membership or community of interest.

Lest there should arise in some minds a misapprehension as to the membership of the new association, based upon the name which has been selected,

¹Paper read by Isaac Roberts, at the meeting First mo. 14, 1889, at 15th and Race Sts., Philadelphia.

it seems right to say that that name, "The Young Friends' Association," is not intended to exclude any one from membership, and it is sincerely desired that it may not do so. It was thought that the objects of the new organization would at once meet the approval of the middle-aged and elder Friends among us, and secure their hearty cooperation as members,—and the name adopted was chosen chiefly that it might be a standing invitation to the other class of younger Friends, whom it is especially desired that we should reach and interest in our work. But we need both: we want our older Friends, because many of them have the knowledge we desire and can direct us to the proper original sources, and otherwise aid us; we want our young Friends, those inside the strict line of membership, both because they can aid us in our work, and because we hope as we believe that this work and study will do us all good.

The methods of work which have been adopted are similar to those of like organizations. The general direction of the affairs of the Association will be in charge of an Executive Committee of ten members, including the five officers of the Association. This Committee will arrange for all public meetings, publish such articles as the association may direct, and in every way advance the work of the organization. The regular meetings will be held once a month—on the second Second-day of each month, (excepting Seventh and Eighth months) at such places as the Executive Committee may select. It has been thought that meetings of this Association if held in the various meeting-houses of our Society might in certain localities awaken the interest of old and young and thus tend to strengthen our religious body. The truths embodied in our principles and proclaimed to the world in our history, have still the power to reach the heart and convince the judgment of the honest seekers after truth, when properly presented to them.

Much of the practical work of the Association will be in charge of four Standing Committees, as follows:

- 1st. Committee on History of the Society of Friends.
- 2nd. Committee on Literature of the Society of Friends.
- 3rd. Committee on Discipline of the Society of Friends: and
- 4th. Committee on Current Topics of Interest to the Society of Friends.

The work of the first three of the Committees (as outlined in the By-Laws) seems very important. The Committee on History is to "take into consideration, with a view to eventually completing a consecutive and accurate outline of all matters pertaining primarily to an historical knowledge of the Society of Friends." The Committee on Literature is to "take into consideration all matters pertaining to the Literature of the Society of Friends, with the view of completing an accurate history thereof;" and the Committee on Discipline is to prepare a "complete history of the formation of the Discipline of the Society of Friends; the modifications and

changes made there from time to time, and a comparison of the various codes of Discipline now in use." The work of these Committees as thus outlined seems so great as to be almost impossible of accomplishment by busy people burdened with other duties and interested in other pursuits. But we should remember that it is not expected that these Committees will accomplish their great work in a day or in a year, but that they can take time to accomplish it, (as indeed they must), and that much of the best work they can do may be accomplished with the expenditure of comparatively little effort at the monthly meetings of the Association.

These standing Committees have not yet been chosen, nor is their work for the immediate future yet marked out in detail. It has been intimated by the present Executive Committee that suggestions as to this part of their work would be welcomed, and might be of aid to them. The suggestions given here are therefore only offered as such, and are the expression of the hope of what may be accomplished by the new Association.

To all of these standing Committees questions relating to their several departments of research may be presented, and by them will be assigned to individual members for investigation and answer. It will at once be seen how interesting a meeting of our Association may be made by carefully prepared answers to questions relating to the history, principles, testimonies, literature or biography of the Society of Friends. As these questions occur to our minds let us write them down and present them for answer to the proper Committee. Subjects relating to the various departments of work may also be assigned by these Committees to individual members, and valuable papers which may be of great aid to the future historians or students among us may be the result.

As these Standing Committees pursue the work outlined for them in the Constitution, they will doubtless report from time to time the progress they are making. This should especially be done when anything of particular interest claims their attention and this will be frequently the case. If they could adopt some definite plan of work and report it to the Association, they might be greatly aided in their work by members of the Association desiring to follow their plan of research. For instance, if the Committee on History should decide to study the history of the Society by short epochs, and would report its plan, many members might adopt it and study with it; and so, also, with the Committees on Literature and Discipline.

Another feature of our work for which provision has not yet been made, but which would doubtless accomplish good results, and which can readily be arranged for, is the systematic reading of valuable works relating to the history and principles of the Society of Friends. If the Executive Committee would select some standard work, and suggest some plan of reading to our members, many of them, perhaps all, would be glad to adopt such a plan. Then additional interest might be awakened in such readings by having two or three short reviews, or sum-

maries, or criticisms of the portion last read presented at the monthly meetings of the Association by members who have been appointed to prepare such papers. In this way the members of our association might read and become thoroughly familiar with such works as "Barclay's Apology," Tanney's "History of the Society of Friends," George Fox's "Journal," and other standard works which have, or should have, an enduring interest for members of the Society. It would be of especial value to our members, I believe, if the former work, "Barclay's Apology," should be selected and read slowly, and in small monthly portions, and discussed in papers at our meetings. We could spend a year on such a work with great profit and interest. Succeeding that, we might take up that late work written by Three English Friends entitled "A Reasonable Faith," which John G. Whittier says "is Quakerism pure and undefiled." We could see then for ourselves how near the Society of Friends of to-day is to the truths from which it started.

The second object of our Association—"the dissemination of the views of Friends"—can be accomplished in many ways: by public meetings, by publication of papers approved by the Association, and by the distribution of literature. If we are really in earnest in our efforts to attain this object we will probably be surprised by two facts; first, that there is a broad field of labor here; second, that the principles of our Religious Society will meet with a ready acceptance. And if we should hesitate about doing such missionary work in some directions, there is at least one in which it seems to be a plain duty; that is in the direction of our First-day schools. The scholars in those schools ought to know all we can teach them (and we ought to be able to teach them a great deal) of the principles of our Religious Society; they should know what it stands for now, and what it has done for the world in the past. We neglect a part of our plain duty if we do not teach them these things,—and also, if having the opportunity to become better acquainted with them, we neglect it.

In conclusion, there are two thoughts which we should carry with us as we go forward in our proposed work. The first is the debt which we individually owe the Society of Friends for what it has done for us. We all have a right to be proud of membership in this religious body; not arrogantly proud, as of something of which we may boast, but rather gratefully proud as of something for which we should be sincerely thankful. If we enjoy and prize the blessings of civil and religious liberty to-day, we should remember that these have been made possible for us largely through the fidelity and sufferings of the early members of the Society of Friends. One of our American poets has said that "Thoughts which great hearts once broke for, we breathe cheaply in the common air," and it is true that we are too apt to forget the debts we owe the noble souls of the past, who have left for us rich legacies of freedom of thought, and action. We can best show our appreciation of their work for us by using rightly and prizing highly that which they have bequeathed us, by imitating their virtues, and by sharing with others whatever in their example and teaching is helpful to us.

The other thought is that of a charitable consideration for others. In our meetings it is not at all likely that we will all think alike on all subjects. There is no rule of the universe that we should. It is necessary therefore that we bear constantly in mind that a view differing from our own may be just as sincerely held as is ours. The right rule would seem to be to accord to others the same right to the frank and friendly expression of honest thought as we each claim for ourselves; remembering that such expression of views adverse to our own may be just as much a duty to the one holding them as is like expression of our views a duty to us. We have nothing to fear from the courteous, yet free, comparison of differing opinions, while there is danger in harsh and unfriendly criticism of them. The Society of Friends has learned from experience the necessity of tolerance and charity as guiding principles in its treatment of widely divergent opinions. Let us remember Whittier's words referring to the early history of our Society, and try to make them apply to us:

"There was freedom in that wakening time
Of tender souls; to differ was not crime;
The varying bells made up the perfect chime."

From THE AMERICAN, (Phila'da.)

THE BURIAL-PLACE OF PENN'S REMAINS.

[From a London Correspondent.]

Two hundred years ago the people of Philadelphia did all they could to embitter the life of their great founder; to-day they will not even let him rest in peace.¹ His grave is to be desecrated that his ashes may be "in the midst of the people he loved so well" and who proved so sadly ungrateful; until the sacrilege can be committed a monument is to be set up in his honor in the remote little graveyard at Jordans. This is the way in which the Bi-Centennial Club and patriotic Philadelphians would show their respect for William Penn.

It requires but a slight consideration of the matter to realize that the truest respect would be shown by leaving his grave exactly as it is. It has been already explained by those who are not in favor of the sacrilege that the graveyard at Jordans is not neglected as it was said to be, and that a simple stone now marks the spot where Penn lies buried. When there are no longer Friends in England, when the descendants of Penn have forgotten the mightiest of all their ancestors, then the time will have come for Philadelphians to step in and keep others from doing that which they are now so eager to do themselves. But at present there is no reason for interference, and every reason against it. It was at Jordans Penn's grave was made by those who were dearest to him in life, and who were later to be brought to rest at his side. Here lie Guli Penn, the wife of his youth and early love, and Hannah Penn,

[We print this as our correspondent has sent it, but we are obliged to note our dissent from the severity of the indictment against "the people of Philadelphia." Certainly, as a body, they never exerted themselves to embitter Penn's life. And as to the removal of his remains, there would, we think, be a much more general approval of leaving them where they now rest.—Editor of THE AMERICAN.]

the wife and comfort of his darker years of old age and mental ill-health. Springett Penn, the son of fairest promise, of whose death just as he was beginning to really live, Penn himself has told the pathetic story, sleeps close by. Here too are the Penningtons, mother and devoted step-father of Guli Penn, and Thomas Elwood their friend, once Guli's lover, and for a time reader and secretary to Milton, whose cottage is in the nearest village within a short walk. After George Fox and the Fells of Swarthmore Hall there is no more interesting group among the early Friends.

Of course the first place must be given to Fox their prophet. But because he was a prophet and concerned mainly with the things of the soul, he cannot appeal to us, in our skeptical age, as strongly as the men and women who were more really in the world, though like Fox they were not of it. Few places even in storied England, are more full of history and romance than this little plot of ground hidden apart, far from the railroad and the highway. Not even in Westminster Abbey does there sleep a greater hero than William Penn, or one whose history will count for more in future generations, when the development of human freedom out-balances in interest the making of kings and the bloodshed of warring nations. Not even in fiction can there be found a sadder tragedy than that of the first marriage of Mary Pennington, and a more heart-breaking scene than her last parting with Sir William Springett, wounded unto death in the struggle for liberty; while for a simple love tale, which also has its touch of sadness, what could surpass the story of Thomas Elwood, yielding daily more and more to the charms and sweetness of Guli Springett, as he sat with her at lessons, or rode with her alone through the pleasant country lanes, and yet never once telling her of his love, because he saw that her heart was not his? How would the memory of William Penn be honored if his ashes were removed from this little out-of-the-way corner, hallowed by so many associations, even were it to carry them to the city which in his love for man he founded? And what need is there for a monument other than the plain stone which marks his grave, when so long as that city stands he will be remembered as one of the bravest leaders in the battle of freedom for mankind?

Besides, Jordans is the most appropriate burying-place there could be for the man who was the hero he proved himself, because he was first of all a Quaker. In life he and those who believed with him had been, as it were, a separate people. Their genuineness, their what would now be called altruism, had marked them as men different from all others. Moreover, their simplicity, their plainness, their hatred of shows and shams made them hold aloof in a measure from the life around them. It was only when his needs and the interests of his colony forced Penn to live at court that he took an active part in public affairs in England. It was his own people who followed him to Pennsylvania, where because of the laws he made for them or rather helped them to make for themselves, they were distinguished from all other colonists. Jordans is difficult to find; it is

several miles from a railway station, or large town, two or three from the nearest village. I understand Mr. J. E. Johnson is having a sign board put up at Slough where the station is, to show the way; but hitherto it has been almost impossible to find any one who could direct you to it. The very fact that it is in so retired a corner, it seems to me, would have made it the spot of all others Penn would have preferred.

There is something very characteristic in the graves of the great Friends. In East London is the burying ground of Bunhill Fields where the nonconformists sleep their last sleep. Here you can find the tombs not only of Bunyan and De Foe and Watts, but those of the men or the descendants of the men who fought on the side of liberty in the Civil War. More than Westminster Abbey does it deserve to be a place of pilgrimage for all Americans who understand the true history of their country. The graves lie so close together I doubt if space could be found for a single new one. Not far away, within a minute's walk, is the factory of the Delarues. Behind it is a little open space with grass plots and gravel walks and benches. Like the old Friends' graveyard on Arch street, and others in and near Philadelphia, the mounds have all been leveled by time, and when from the street you look through the high railings that enclose it, you see only one lonely gravestone, its inscription either worn away or else turned from the street. I have always found the gates closed and have never been inside. This stone, plain and gray, like those one often sees in all Friends' burying grounds, is the only monument that has ever been raised to George Fox, and he who has read the "Journal" of the great Apostle of Light and came to know and love him, would rather see the simple stone than the finest and most costly, and therefore the ugliest, monument, to be had from the modern stone mason.

If a railroad or some other modern improvement were to desecrate this little open space under the shadow of a factory, or the cemetery at Jordans in the midst of quiet country, as old St. Pancras in London was desecrated by the Midland railway, then indeed there might be reason for removal. From old St. Pancras the remains of Mary Wollstonecraft and of Godwin were carried to far Bourne-mouth. And so when Jordans also becomes a scene of ruin, William Penn's may be carried still farther and across the ocean. But until then who would be justified in breaking in upon the peace of the Friends who sleep together in death even as they dwelt together in life?

THE whole essence of true gentle-breeding (one does not like to say gentility) lies in the wish and the art to be agreeable. Good-breeding is *surface-Christianity*.—*Oliver Wendell Holmes*.

OUR standing army, small as it is, is large compared with that of Canada, which has 950 regulars well scattered in military schools and skeleton regiments. But there are 36,783 men in the militia.

PHILADELPHIA, FIRST MONTH 26, 1889.

IN EVERY AGE THE SAME NEED.

As generations come and go, the observing ones that are permitted to live through many of them, are constantly reminded, by the recurrence of the self-same questions arising for settlement, of the fact that human nature is alike in each needing the same counsel, the same discipline, the same self-control, one being an advance on the other only as it absorbs and makes its own the accumulated wisdom of the past, while at the same time are kept open "the windows of the soul" for the entrance of that "light" which is ever ready to shine when there is preparation to receive it.

In religious circles every day brings up for discussion the old, old question of "the letter" and "the spirit;" and happy is the group that can so far profit by the experience of the past as to permit the gospel of Divine *love* to outweigh the spirit of *self-will*, gathering in place of scattering those whose province it is to work together for the advancement of truth. In the matter of morality all adown the ages the same lessons must be taught, the same experiences undergone.

Since the publishing of a short editorial one week ago in reference to large expenditures in our families and the unwise incurring of debts, our attention has been directed to Thomas Shillitoe, a Friend of the olden time, whose concern on this subject moved him to address Friends in Great Britain and Ireland; showing that the need of caution was felt then as now. He seems to have realized that the influence of women in this respect was essential. The following is extracted from his address as being of great value to us of this generation:

"I am afraid, my dear sisters, to close this subject without adding another hint as essential to our being the better able to keep our family expenditure within its proper bounds; having myself experienced its salutary effects, when I had a numerous family around me. It is, to determine to purchase *with ready money* the various articles consumed for family use; and that we resolve to perform this, however mortifying it may prove, by depriving us of many things the natural disposition may crave in ourselves and children. I believe great advantage will be found to result from such a practice, both to parents and children; more particularly to such as at times feel themselves straitened to carry on their business reputably.

For when these difficulties are felt by an honest mind, it becomes obligatory on such, if they get through them, closely, to inspect the manner of their expenditure, and this will afford an opportunity of timely checking any unnecessary expense that may have crept into the family. But when things for family consumption are mostly, if not all, had upon credit, this opens a wide door, both for parents and children to greater indifference, both as respects expediency and cost, than Truth at all justifies; and the children of such parents are in danger of being brought up ignorant of the real use or value of property. When numbering my blessings, I esteem this as not one of the least that my Heavenly Father has bestowed upon me, that He kept me in a little way of business, and a care to keep my family expenses within proper bounds; and taught me the lesson of contentment with little things; because now I am advanced in life, I am satisfied I escaped manifold perplexities, which would at this time have been my attendants, had I sought after greater things as to this world. One of the diadems with which our first Friends were decked—one of the many jewels that shone in their character, and adorned their profession, was the care they manifested to have nothing but what they could well pay for; so that should reverses come, from the many perils they were in various ways liable to, none might be losers by them. This, in due time, with an uniform, consistent, upright conduct in other respects, procured for them that confidence in the minds of all ranks, and that respect which they so long maintained."

In these closing remarks there is implied a falling away even in that early day from the integrity of life that had characterized "our first Friends." But certain it is that true Friends wherever found even down to the present time have largely enjoyed and have merited the respect of the business community; and it is to the continual practising of the virtues here enjoined that we can only look for a perpetuation of noble characters that shall reflect honor on themselves and on their Society. Let us all as Friends heed well the lesson.

DAVID COPE, of Emporia, Kansas, has sent out circulars announcing a proposed re-issue of the Works of Job Scott. These, as he mentions in his circular, are almost out of print,—so scarce and high in price, in fact, that they are substantially beyond the reach of current purchasers. He proposes to print an edition of one thousand copies in a single volume, making seven hundred to eight hundred pages, to be sold to subscribers at \$1.20 each, transportation not included. This will make a very cheap book, though the type, (brevier, the same used for the ordinary reading matter of this paper), is regrettably small. Subscription papers will be supplied by him, as above, to any who are interested in the undertaking, and we heartily wish him success in it. Job Scott was one of the true Friends to whom stu-

dents of the essential principles of the Society have been accustomed to turn. He lived, labored, and died before differences upon points of doctrine caused the numerous divisions of the last sixty-five years, and he is therefore available as a counsellor to all who are sincerely attached to the fabric of religious fellowship which George Fox's labors established.

MARRIAGES.

HAINES—COLES.—At the residence of the bride's parents, Woodstown, N. J., on Fourth-day, First month 2d, 1889, by Friends' ceremony, Chalkley Haines, of Mickleton, N. J., son of Rachel M., and the late Samuel G. Haines, and Laura May, daughter of Lippincott and Mary Coles.

PRATT—OGDEN.—At the residence of the bride's mother, under the care of Chester Monthly Meeting, Pa., First month 17th, 1889, Dr. Trimble Pratt, of Media Pa., son of Enos L. and Lydia T. Pratt, of West Gosben, Chester county, Pa., and Elizabeth Levis, daughter of Martha H. and the late J. Henry Ogden, of Springfield township, Delaware county, Pa.

DEATHS.

ATKINSON.—At his home, near La Jara, Colorado, First month 13th, 1889, John Atkinson, late of Philadelphia, and formerly of Gloucester county, N. J., in his 75th year; a member of the Monthly Meeting of Friends of Philadelphia, and formerly clerk of Salem, N. J., Quarterly Meeting.

BANCROFT.—On First-day, First month 20th, 1889, of pneumonia, Esther Bancroft, in her 76th year; a member of the Monthly Meeting of Friends of Philadelphia, and for some years Treasurer of Women's Yearly Meeting.

BEARSS.—On the 10th of Tenth month, 1888, David M. Bearss, aged 74 years, 7 months, 10 days; a member of Norwich Monthly Meeting, Canada. His end was peace.

BROWN.—First month 17th, 1889, Mary C. Brown, in her 83d year. Interment from Byberry meeting-house, Pa.

GILES.—At their residence near Poplar Ridge, Cayuga county, N. Y., First month 6th, 1889, Elizabeth L., wife of Amos Giles, in her 77th year. She was born at Westbury, L. I., and was for many years a member of Scipio Monthly Meeting.

LIPPINCOTT.—On Seventh-day, First month 19th, 1889, Joshua Lippincott, in his 83d year, for many years an elder of the Monthly Meeting of Friends held at Green street, Philadelphia.

MECONNAHEY.—First month 13th, 1889, Joseph Meconnahey, husband of Elizabeth Meconnahey, of Philadelphia, in his 82d year. Interment at Fair Hill.

PEART.—In Philadelphia, First month 11th, 1889, John Skirrow Peart, aged 47 years.

UNDERHILL.—In Seneca, Lasalle county, Ill., at the residence of her nephew, L. D. Carpenter, First month 4th, 1889, Emmeline C. Underhill, aged 80 years, two months, and 15 days; for many years a consistent elder of Clear Creek Monthly Meeting, Putnam county, Ill. This dear Friend was born in West Chester county, New York, Tenth month 20th, 1808, came to Illinois from New York City, 1840, and was married to David C. Underhill in 1842, crossing to Lasalle county, where they lived 40 years. In 1882 they moved to Manatee county, Florida, where she buried her husband in 1887, and returned to Illinois in 1888.

For several years her eyesight had failed; her afflictions were severe, but they were borne with a Christian fortitude that is worthy of imitation. There were no children born to them, several however had at different times received her kindly maternal care and hospitality. It having been my privilege to be intimately acquainted with her for forty years, I can realize that she was a mother in Israel, giving evidence that she closed her eventful life with the assurance that she received the welcome plaudit, "Well done thou good and faithful servant, enter thou into the joy of thy Lord."

ABEL MILLS.

WALKER.—At Doylestown, Pa., First month 10th, 1889, Amos Walker M. D., formerly of Philadelphia, in his 95th year.

SCRIPTURE LESSON, No. 5.

SECOND MONTH 3, 1889.

SOWING AND REAPING.

GOLDEN TEXT.—"The earth beareth fruit of herself; first the blade, then the ear, then the full corn in the ear."—Mark 4: 28

READ Mark 4: 26-35.

WE pass over many events of the most stirring character in the life and ministry of Jesus. The multitudes follow him from place to place, bringing their afflicted ones, and evidencing their faith in him as the Messiah for whose coming the fathers had so long waited and prayed. They crowded so upon him that it was with difficulty that he found time or place to eat on some occasions. The Great Teacher sent from God was in their midst, and they left everything else that they might hear his voice and receive his blessing. It was to them "the time of refreshing from the presence of the Lord." Such periods come to the church still, when by faith and watchfulness the people are prepared for the heavenly visitation.

The kingdom of God. The divine life in the soul of man is as the seed which is sown in the ground.

The earth beareth fruit of herself. The earth—the soil—represents the soul into which the seed of divine life is sown by the Great Sower; this must be good soil if the seed springs up. Life is in the seed, and not in the soil. No amount of self-culture can, without the word of truth, "the incorruptible seed," develop the life of God in the soul; yet the growth is in secret, it is only as the good soil contributes the nutrition that the seed requires, that its germ springs to the surface a tender blade, ready to absorb the light and air, through which its plant-life grows and grows and fulfills the order of its development.

Then the ear, then the full corn in the ear. It is only as the plant is nourished from the soil that the light, the air, and the rain are helpful,—these are the influences that are seen and felt, but beneath all in the soil of the heart the roots must be nurtured, and find the elements that give to the sap its vitalizing power. No amount of outside influence can make the plant strong, healthy, and vigorous, if it fails to draw its needed supply from the soil in which it is planted. "Out of the heart are the issues of life," is the testimony of the wise man.

The gathering time of the full corn, ripe and ready for the use of the great Husbandman is to be known here. It is seen in the ripened experience, the faith and trust in the power of good over evil,

and the ultimate restoration of man to his true place in the economy of the universe. It is shown by the willingness of these to be gathered into the heavenly storehouse ready for such use as can be made of them in the furtherance of the Divine purposes in the redemption of the whole human family from the thralldom of error and sin.

The mustard seed. This is another illustration of the same lesson, and there is great encouragement in the assurance that the smallest seed, if nourished in a good soil, will, in its full maturity of growth, not only yield its fruitage, but its spreading branches may give shelter and repose to the weary and fainting.

Probably all who consider this lesson are familiar with the old-time story, prettily told in verse, of the pebble and the acorn. The pebble boasted that "nor time, nor seasons can alter me," and the acorn in modesty, quietly sank in the earth, away from sight. After a time, the soil was broken by the head of a tiny oak, and then the pebble realized, with a feeling of humiliation, what a power was enclosed in the cup of the acorn. This is a useful story to recall in the study of the parable of the sower. Many things seem to us great and worthy of reverence, but it is only those which have the power of growth that can, of themselves, increase in value, and only such things as have spiritual significance that have lasting value. If, in this life, we choose those things which may be represented by the acorn—things small and weak, perhaps, in appearance, but with the life in them the yield in the future will be great, "some thirty-fold, some sixty, and some an hundred."

But if our choice is for what, like the pebble, seems attractive, but is without growing power, for something we cannot plant in our heart, but must hold only as an earthly possession, we shall find, in the end, we are no richer. We have only at last what we had at first, something hard and cold, only a pebble, though perhaps, to our youthful imagination, it had appeared as of great value.

Our first memory gem in homely rhyme, gives us another serious thought. We cannot neglect the garden of the heart, for if we do the weeds will grow. The Great Sower will give us good seed. If we will care for it, and nurture it, it will bring forth an abundant harvest. If we neglect it, and allow the cares of this world, and the deceitfulness of riches to enter in and choke it, our harvest will be only tares, which must be gathered into bundles and burned.

KING SAUL has been characterized as "a bad man who had occasional fits of piety," and King David as "a good man who occasionally committed acts of wickedness." The history of both fully justifies this characterization. The same may be truthfully said of a great many other men.—*Independent.*

O DAY of rest! How beautiful, how fair,
How welcome to the weary and the old!
Day of the Lord! and truce to earthly cares!
Day of the Lord, as all our days should be!

—J. G. Whittier.

THE LIBRARY.

OLD WESTTOWN. A Collection. Edited by Frances C. Tatum. Pp. 151. \$2.00. Philadelphia: Ferris Brothers.

PROBABLY none of our readers are unaware that the Boarding School at Westtown, some twenty-five miles west of Philadelphia, is one of the institutions of learning established by the Friends. It is for both sexes, admission has always been limited to members of the Society (since 1827 exclusively those of the "Orthodox" body), and the course of study is what we should now call a "Preparatory School," though in early days it was regarded as giving a "finishing touch" to the young person fortunate enough to get so far.

The present volume relates to scenes and experiences connected with the old building which was torn down three years ago to make way for the new and greatly modernized one now in use, and the several chapters of reminiscences are very pleasantly and entertainingly told. They relate, without consecutiveness of arrangement, to various periods of the school's history, but there is enough of exactness in them, with names, dates, etc., to give the volume value to the student of educational progress, and social conditions, as well as to those whose personal association with Westtown creates for them a special interest in the subject. In the beginning, Westtown was meant to be strictly plain, and severely economical. It was to afford the advantages of "a guarded education" at a moderate cost,—fixed at \$100 a year for a long time; now, since the erection of the new building, at \$180. Many of the methods, therefore, now seem to us very old-fashioned and primitive. Of one of the early Superintendents (about 1800, when the school was established), it is related that he "possessed that desired attribute, a genius for economy, and we have been told of the coffee and chocolate sweetened with molasses to save the price of sugar; of the children's plates of unfinished food being put in the cupboard and saved for them meal after meal; of the rebukes which he administered for complaining of their living."

There were, then, no vacations at all: the school continued open throughout the year. If children visited their homes, or teachers went away at any time, it was for but the briefest period. The living was very plain, and so also the furniture and appointments. On one floor, in a large room, the girls' beds were all placed, and on the floor above, in similar fashion, the boys lodged. (This continued until the erection of the present new building.) The dining-table had no cloth except for the mid-day meal, and the ware upon it was mainly of pewter,—plates for dinner, porringers for supper. For drinking, (at dinner?) large yellow mugs, filled with water, circulated around the table, each one taking a sip as it passed. "How well one fastidious girl is remembered, who always turned the mug and put her lips to the part of the rim next the handle, where she thought no one had preceded her!" There were many strict rules: the idea of the time was that children should be "brought up." As one of the chapters in this volume says: "Their homes were not so luxurious, their

wants not so many, and their parents' duty to restrain had much stress laid upon it, especially in our Society. Young people were expected to keep in the background, before their elders, and it was thought salutary for them to grow accustomed to some hardship and disappointments. . . . School was looked upon not only as a place of learning but of discipline."

Among these rules were some peculiar to the institution, and which elsewhere than among Friends would be thought rather odd. "Five different prohibitions," says one writer in this volume, "were mentioned each morning, with the request that any who had broken these rules should stand up. If my memory serves me rightly, they were, Speaking in the [bed] chamber, Going out of bounds, Marking premises or furniture, Singing, and Using the plural pronoun to one person,—'Plural Language' was the common name of this transgression." And another adds: "Some of us who had been brought up in strict plainness of speech' hardly appreciated the struggles of others to attain perfection in this last requirement. One little girl [of recent time] is well remembered who finally schooled herself to saying 'thee' to the people around her, but had to sorrowfully confess with tears that she did say 'you' to the croquet balls." Language, in fact, was always a subject requiring assiduous attention. There were "companies" organized among the students, at times, to promote a better habit in regard to it amongst their number, and "privileges" were given as the rewards for their success. "At one time we hear of a girl being shut up in a room for a week for giving way to what seemed like detraction; on another occasion she was deprived of watermelons at a time when they were in season, because she cried out 'Mercy!' when roughly treated by one of her comrades."

Some of these details give the impression of a pretty strict restraint, and we observe that one or two of the old scholars speak of the school as "monastic" in tone. The girls, another says, used to head their letters at "The Convent." Of course, with both sexes lodged in the same building, there were strict requirements as to the parts of it to be used by each. "The 'parlor' was sacred to the visits of relatives, or the 'meeting' of cousins, and into the precincts of 'the family parlor' there were many students who never entered during their whole term at the school. The girls went no higher than their own bed-room floor except when acting as guides for parties of visitors, and there were various parts of the basement regions which were never seen but by special permission." When parents came, and stayed over night, they were lodged and entertained at "the farm-house," whither the child or children visited, went to spend the time in their company.

The dress required has always been of uniform plainness. The rules of 1796, when the opening of the school was looked forward to, provide that "if children are sent with clothing not sufficiently plain as to color, or which shall require washing, it shall be returned; but if the make only be exceptionable, it shall be altered and the expense charged." Some

one has thus described the early Westtown girl's dress: "Take a girl of the present, put a cap on her head and a vandyke around her neck, cut off the sleeves of her dress to about the elbows, and you approach the style of 1800." The "caps" were "clear-starched," with much clapping of hands, by the girls themselves, each Seventh-day morning, and perhaps the inhibition of white clothing that would need to be washed was requisite in order to make room for this. (It should be added that a "vandyke" is defined in Webster as an "indented and scalloped cape for the neck, worn by females.") In 1851, as a scholar of that date writes: "White collars, white stockings, and white handkerchiefs were not allowed, nor plaited hair,—nor pink and red in our fancy work."

The punishment of offenders in the older time included the use of the rod, the culprit being sometimes sent himself to procure it. "Returning, he was desired to take off his coat and seat himself on the floor, while the switch was applied with no gentle touch." It is suggested in one of the chapters that the difficulty experienced in keeping the larger boys in first-rate discipline was the underlying reason for the changes repeatedly made in the rules respecting the age of pupils. "The first enactment was to the effect that no pupil under eight years was to be admitted. In 1800 no new scholars under ten nor over fifteen. In 1802 girls of any age above ten were allowed. In 1803 boys might stay until seventeen. In 1805 . . . it was judged best not to allow boys to remain longer than fifteen. In 1809 they might remain until sixteen."

The dignity of Westtown has always been well preserved. It has had, at different times in its career prominent educators in its charge. Among these were Enoch Lewis and John Gummere. An interesting figure was Davis Reece, who was governor, or superintendent, for nearly thirty years, and who was a model of method and precision. He "did the same things, and lectured, punished, drilled, in the same room and in the same manner, year in and year out, and yet never seemed to tire or fail." He could read a boy's thoughts at a glance, and this was a Westtown conundrum: "Why is Davis Reece a greater man than George Washington? Because George couldn't tell a lie, but Davis can tell one the moment he hears it." The volume before us has interesting allusions to many other of the teachers, including Dubré Knight, who died in the midst of his duties at the school, in 1868.

Our already extended notice scarcely has space to say more of this interesting book than that it is admirably manufactured mechanically, the printing being of the best, and the binding in excellent taste. There are several illustrations of the buildings and points of interest at the school, the designs for these being original, and showing in several cases quite an artistic taste. The extracts we have made by no means indicate the full contents of the book, which relates to a great range of topics, and presents much curious and interesting information.

"The more we know, the better we forgive,
Whoe'er feels deeply, feels for all who live."

—Madame de Staël.

THE COLORED SCHOOLS IN THE SOUTH.

THE work of education among the colored people, at the two schools especially aided by Friends, at Aiken and Mt. Pleasant, S. C., is proceeding this winter, as usual, and is in some respects on a more satisfactory basis than heretofore. The new school-house at Mt. Pleasant, for the want of which Abby D. Munro has worked under so great difficulties since the destruction of the old one by the storm of 1885, is now entirely finished, and is probably, by the time this reaches our readers, in use.

The Friends in this city and in New York, who for some years have been endeavoring to extend adequate pecuniary aid to the two schools, have been at work within the past three months, and those of New York have already made helpful remittances. In Philadelphia Yearly Meeting the work is backward, and aid is much needed, at once, in order that the teachers in charge may not suffer serious inconvenience. Sarah H. Peirce, Secretary of the Executive Committee of the Philadelphia Association, has sent out several hundred circulars, stating the character and progress of the work, giving a report of the receipts and expenditures of last year, and inviting a renewal, annually, of subscriptions heretofore made. It is hoped the responses to these appeals will be as prompt and liberal as possible.

It is proper to mention that Martha Schofield has suffered for some months very severely with a neuralgic affection of her right arm and hand, and has been obliged to use her left hand entirely in her extensive correspondence. Her condition, recently, is regarded as improving, but she is still seriously disabled.

The following letters and reports from the Aiken School will be read with interest:

LETTER FROM MARTHA SCHOFIELD.

AIKEN, S. C., First mo. 10, 1889.

DEAR FRIENDS: On account of the very poor crops and late cotton picking, school was not as large as usual at the beginning, but we have now filled up and are busy with the work before us. A number of families have moved into the neighborhood, and as they come from where there were no schools, the children go in the lower classes, even when quite large. This floating population keeps the lower grades over full, and yet many move nearer on purpose to get their children in school. A widow whose husband died when her youngest child was three weeks old, moved from her own land on purpose that her *six little girls* could get an education. She finds it hard work to clothe and feed the five that come to school but refuses to hire the oldest out, as she had never been to school. We help her with funds raised by a First-day school class. Some go to the free school the two months it lasts and then walk four or five miles here.

On Thanksgiving Day we made our usual visit to the Old Folks' Home, marching over in order, then singing and reciting a psalm in concert, then each passing by the old men and women, and putting in their laps, or at their feet, a little package of meal, meat, rice, tea, head of collard, or bundle of wood

brought from their homes for the purpose. Many blessings were bestowed upon us, and grateful tears ran down the aged cheeks. These old people have to earn their living, only having their rooms free of rent. Last year Auntie Gibbes was quite sick, but I found her up, by the fire, and very trustful was her voice when she said: "Since it turn so cold I 'spected I'd had to stay in bed to-day, but las' night when I down on my knees I told Master Jesus he knowed I had no wood, and now dis morning, there's two arms full!"

The churches help them and they help each other.

Our Friends have been so kind in sending barrels that we gave notice of a Fair to be had just before the Holidays. They saved up their money and came ten and eighteen miles. One woman said: "I was up all night, and we started at three o'clock." She bought ready-made clothing for all her seven children, husband, and self. A part worn garment, or hat, ready to wear is worth more than new material to such people, as they are often field hands and have to hire them made. We had mended up all broken toys, dressed dolls, and had a penny and two penny tables where the crowds of children made their own selection and spent their Christmas money. Arranging for this, unpacking and acknowledging barrels, consumed much time, and required a large amount of correspondence in which E. Criley has been a great helper. My left hand cannot write as long or fast as my right did, and with other duties I have not been able to raise as much by correspondence as usual, so that there is now less than a hundred dollars in our treasury.

We cleared \$118.78 at the Fair, but want to use part of it to help a young girl who was here last winter. Her mother died soon after she went home, leaving an infant and six small children, but she is very anxious to return here and can if we help her pay board. Another part of the proceeds is being used in building in a boiler for heating water and boiling clothes.

E. Criley has written of the school work. Some information can be had from Clement M. Biddle who paid us a very instructive visit and saw the workings of the classes.

There is continued gratitude to the Author and Finisher of my faith that I have been enabled to keep at my post of duty, through physical disability and suffering. My absence would have lain heavy burdens on those whose shoulders are not hardened by the weight of years in the work. . . .

M. SCHOFIELD.

REPORT BY ELIZABETH CRILEY, PRINCIPAL TEACHER.

AIKEN, S. C., January 11, 1889.

The third month of our school term will close January 14, and we now number two hundred and seventy pupils—fourteen of them being boarding students. At this time last year, the number in the boarding department was somewhat greater than now, but owing to the cotton crop in some sections being very small, some of our patrons were unable to send their children back this year.

Our day pupils have been somewhat slow about coming in, owing partly to the lateness of the crops, which detained many children away picking cotton until late in December, and also last term Miss Schofield took a firm stand in regard to the matter of delinquent dues for tuition charges, and decided that this term none should be admitted who were in debt for any portion of last year's charges. There was a large number on that list, who were compelled to remain out until the "cotton was sold," when they paid up and are now back in school, and we find that this year the charges are paid much more promptly than formerly. The school is graded in nine classes with five teachers. The primary room is full to overflowing and we intend next month to begin having the session in that room divided,—half to come in the morning, and half in the afternoon. It seems the only suitable way, as there are too many pupils for one teacher to manage altogether. Both teachers and pupils seem to have entered with renewed spirit into their duties, and the school is in a flourishing and encouraging condition.

In the Industrial Department the pupils have been doing the usual amount of work. The boys have built a new woodshed at Carter Hall, and done quite a number of odd jobs of carpentry. In the printing-office a number of boys are engaged all the time they can spare from school. They have now considerable work on hand. The girls are all learning to sew,—making new clothing, patching, piecing quilts, and doing all work necessary to teach them the use of the needle and economy. In the Saturday class of boarding students the girls are given pieces of calico or other cloth and required to cut and make some garments for the store, thus learning to do such work and at the same time earning a trifle for themselves.

Our holidays extended from the Friday before Christmas until January 1. On New Year's day we distributed the presents so kindly sent to the children by Northern friends, and there were many happy hearts that day; they were very much delighted with everything. It made us glad to see their happy faces.

ELIZABETH CRILEY.

NEWS OF FRIENDS.

THE Newtown, (Bucks county, Pa.) *Enterprise*, of the 19th inst., says: "At Wrightstown monthly meeting, held on Fourth-day of last week, it was decided to charge all people not members of that Monthly Meeting \$1 for each interment in their grave yard, and also \$1 for the use of the meeting-house when needed for funerals by those not in membership. This was proved necessary, to create a fund to help keep up the yard, pay the caretaker, etc. This is a move in the right direction. So many have sought free burial there it has grown to be a tax on the Friends of that meeting, and no one would object to paying a trifle for these privileges."

The interments in this ground, one of the oldest of those belonging to Friends in Eastern Pennsylvania, have been very numerous. The venerable John Knowles, who had been caretaker of the meeting-house and grounds, for about thirty-five years,

and who, (we believe), has within a year or two been released from service, on account of his advanced age, had records of thirteen hundred burials in the ground during that time. Many of these were of remains of persons brought from a distance, and many were non-members. Friends, where the meetings are not large, are beginning to consider seriously whether their liberality in the matter of interments has not reached a point where some aid in the proper maintenance of the burying ground must be expected from those not members.

A meeting of the Committee on Temperance of Philadelphia Yearly Meeting was held on Seventh-day, the 19th inst., and proved to be very interesting. As the several reports and subjects were commented on, more life was evinced than on some former occasions. The subject of the near prospect of the submission of the Prohibitory Amendment in Pennsylvania engaged considerable attention. The report of the Book Committee showed that a large number of tracts or leaflets had been purchased, also some bound volumes, for distribution among the "Young Temperance Workers."

The following was among the minutes made by the clerks:

"Since our last meeting our hearts have been saddened by the announcement of the death of our loved friend, and we may truthfully say, pioneer, in this form of work in our Religious Society, Elizabeth P. Conly. As we revert to her earnest, conscientious opening of this subject in our Yearly Meeting more than seven years ago, we acknowledge having felt through all that time the inspiration of her devoted spirit, and deem it a fitting time to propose the preparation of a suitable tribute to her memory and the value of her labors; to be placed on the minutes of this Committee. To assist the clerks in framing the same, Lydia A. Schofield and Matilda Garrigues are appointed."

The Committee adjourned to meet again on Second month 9th.

SWARTHMORE NOTES.

THE meeting on First-day morning was attended by a number of the neighbors. The size of the meetings seems likely to so increase that increased accommodations will be needed in the meeting-house. Elizabeth Lloyd, Principal of Friends' School at Easton, Md., was present, and spoke acceptably.

—The classes in Gymnastics under Dr. Shell, and those under Mary Murphy are doing excellent work, and do much toward preserving the general good health of the college. A separate gymnasium for girls will be one of the necessities of the college in the near future, and with it there should be connected a natatorium. Has not Swarthmore some friends who will look toward the erection of such a building?

—Prof. Appleton has been giving a brief and successful course of lectures on English Literature in Trenton, N. J.

—Dr. C. Herschel Koyl, Professor of Physics, who

recently resigned to attend to his newly invented semaphore, has got it adopted by the Lehigh Valley, the Old Colony, and the Boston and Albany railroads. He will visit Europe in the Spring for its general introduction there, having already had it patented in England, France, Germany, and Italy.

—A new programme of studies is prepared, and will take effect on the 4th of Second month, when the new semester begins. Fewer studies at a time, and more thorough work in each, is now the watchword.

—A warm discussion upon the "Educational value of Examinations" is now in progress here and abroad. We hope soon to present some of the views of the authorities at Swarthmore upon this interesting subject.

THE IOWA PASTORS DISCUSSED BY JOEL BEAN.

[Joel Bean, now of California, but formerly from the older States, is one of those who were disowned by the Iowa organization of Orthodox Friends, on account of difference in views, Joel and his family being old-fashioned believers in the Inward Light. He sends a letter to the *British Friend*, for First month, most of which we give below.—Eps.]

AND what is the pastoral system thus pressed upon the Society? Many may suppose it to be a missionary adjustment for the teaching principally of a new membership. Instead of this being the case, the leading pastors are in the largest meetings, in the centers of influence, and where there are the most resident ministers. One of the largest Meetings for Worship, having *very few new members*, has at least nine recorded ministers, not one of whom is expected to speak in the First-day Morning Meeting, except the supported pastor; or could do so, without invitation or intrusion. The subject of the discourse is sometimes (I know not whether usually) announced beforehand in the daily paper. Another of the largest and most influential meetings, with several prominent ministers, has for some years been conducted similarly, and often referred to as a model.

With this practical working of the system in view, another reason for the silence of dissent may be appreciated. Our ideal of worship has been so little held up, and is now so lost, that the people come to hear the preacher, not for individual waiting upon the Lord, and so they know not what to do with silence. There must, therefore, be the regular sermon (and order of exercises), and of course the best preacher is sought. Ministers set aside, and made to feel that others are preferred, have little strength or place to speak. The feelings of these do not appear on the Church's written records.

I may not pause here to do more than ask—"How long the pastors of Iowa Yearly Meeting can be expected to maintain successful competition with the cultured clergy of other denominations, when the Quaker idea of worship has so far died out that to hear the discourse is the chief object in going to meetings?"

The power and aim of personal leadership as exhibited, especially in Ohio and Iowa Yearly Meet-

ings, is an unprecedented factor in the church government of the Society of Friends. In the one yearly meeting it seems to be successfully suppressing opposition within its borders to the demands, not merely for *toleration* of outward ordinances, but for the *endorsement* of those who practice and preach them; in the other it is pressing with equal insistence the establishment of an order of clergy.

I think Friends at a distance are very liable to be misled by the reported results of the new movements. In the last ten years Iowa Yearly Meeting has greatly extended its borders to states and territories further West, and to the Pacific Coast. Four new quarterly meetings have been set up, and another asked for this year. The greatest gain of numbers is said to have been where pastors are settled. And yet the total gain in the last ten years is 281 less than during the previous ten years. . .

No comment on these statistics is needed except to say so far as they are affected by removals to and from the yearly meetings, the emigration of the former ten years was largely to Kansas Yearly Meeting; of the latter time it has been almost wholly within its own territory.

This communication is rather for information than argument, in order that our English Friends may better understand the subject as it is developed here.

May wisdom be given them so to deal with it that they may help us to turn back from an impending ecclesiastical bondage to the liberty wherewith Christ makes free, and from an outward-bearing current to those spiritual realities which can alone give us as a Church the strength of deep conviction, and the compactness of a *uniting faith*. J. B.

San Jose, Cal.

THE CUT OFF FRIENDS AT SAN JOSE.

[As a subject of interest in connection with the above, we also copy from the *British Friend*, the following notice of the situation of the company of Friends at San José, who were cut off by the Honey Creek Monthly Meeting.—Eps.]

In San José, California, U. S. A., is a company of Friends whose position is unique in the [Orthodox] Society. A few Friends had settled here, and a small meeting held previous to 1870. In 1873, the first monthly meeting on the Pacific Coast was set up at this place. The records show a membership at that time of eighteen adults and a few children. A few Friends, however, resided here, who obtained certificates from their respective meetings a year later, increasing the number to thirty-six, including minors. For nine years the meeting was held under many discouragements. Some of the original members died, and others moved away, or ceased to attend. By birthright, however, and certificates received for Friends who had moved to various places on the Pacific Coast, but never seen at San José, the *nominal* membership had more than doubled. In 1882 Joel and Hannah E. Bean, with three other families, fourteen in all, removed to and settled in San José. Great rejoicings were expressed at this addition to the meeting, and the attendance was increased. At

this time most of the *attending* members were Friends who had been associated from childhood in the same meeting on the Atlantic Coast, and now, after many years of separation, re-united on the Pacific, their relations were most pleasant socially, as well as closely united spiritually. At no time had the meeting been as strong or more united than it was thirty days before steps were being instigated by non-residents for laying it down. The unique proceedings of Honey Creek Quarterly Meeting in accomplishing the result, are known to those who read the Society papers. It is going on four years since the monthly meeting was discontinued; and no care, counsel, or encouragement has been extended by Committee, or otherwise, from any superior meeting. Yet the meeting has been held as before, both on First-day and Mid-week, without a single omission. The First-day School has grown to an average attendance of about thirty-six. The meeting is somewhat larger. England, Ireland, Scotland, and France, have contributed to its attenders. Seven of the little colony of Friends in Southern France, including Samuel Brun and family, have lately cast in their lot with them. Including these, there are fifteen members of London Yearly Meeting, and others whose membership is scattered in seven American yearly meetings. Some of them feel their isolation and lack of church fellowship, as once enjoyed in larger meetings for discipline. But as Honey Creek Monthly Meeting, to which the members here were attached by the Quarterly Meeting, has refused to transfer their membership to a nearer meeting, there is no meeting in which they can concentrate their membership nearer than about 2,000 miles, even if Iowa would receive them. The principles of Christianity as held by George Fox, Barclay, Penn, Woolman, and Grellet, are the doctrines held and taught. "That the Light and Spirit of Christ is in all men as God's witnesses, is believed and taught," was the answer given to one of the test questions sent them by the Quarterly Meeting's Committee. This answer was pronounced by the Quarterly Meeting as "directly opposed" to the doctrine held by the Yearly Meeting, and the Yearly Meeting sustained the Quarterly. Hence, they are represented as a people calling themselves Friends, but "not recognized" as sound Friends. One of them not long ago attended the Quarterly Meeting at Honey Creek, and was pointed out to strangers as an "*inner light man*." Joel and Hannah E. Bean and Benjamin H. Jones, are ministers beloved by all the people. They are frequently invited to meetings outside of their circle, and to speak for peace, temperance, and other reforms.

It has been a thousand times said that Mohammedans are inaccessible to Christian missionary effort. This is practically true in countries where one who accepts Christianity must suffer death, but it is not true in India. The first ordained native Protestant minister in Northern India was Abdul Masih, assistant to Henry Martyn. The Anglican missions have now seven converted Moslem Pastors in Northern India, and many licentiates, catechists and converts. —*N. Y. Independent.*

HE KNOWETH BEST.

WHAT if the way seems long and weary,
Thy tired feet are forced to tread?
Some day thou shalt look back with wonder
And say, "My steps were gently lead"
"The way was short."

WHAT if the rough stones wound thee sorely,
And to thy pathway offerings lend?
'Turf soft and green thou wilt find only
When thou hast reached thy journey's end,
Where thou shalt rest.

WHAT if thou see'st more of shadow,
Upon thy path than sunshine's light?
The days that are so gray, and cloudy,
End sometimes, with a radiance bright,
At sunset time.

WHAT if the work be very heavy
Thou doest now with many fears?
When all thy work slips from thy fingers,
Thine own shall say with falling tears,
"They were brave hands."

WHAT if the things thou most desirest
Be given to those who prize them not,
Perhaps thou shalt some day see clearly,
That they would not have blessed thy lot.
He knoweth best.

WHAT if thou fain wouldst shift the burden,
In sorrow thou hast born so long?
Before thee lies the crystal pavement,
There shalt thou cast it, with a song,
Thou canst but wait.

WHAT if the blessing of God's favor
Seems held from thee, thy work to crown?
Some day thou shalt see His mercy
Did for aye, on thee shine down,
To strengthen thy faint heart.

—*Anon.*

AT THE OLD MEETING HOUSE.

In fair old Dutchess county, where the air is ever sweet,
Stands a landmark of the ages, where the quiet people
meet,
Each recurring Sabbath morning, as the seasons come and
go,
Bringing summer's warmer breezes after winter's chilling
snow.
'Tis the old Crum Elbow meeting-house, the worshippers
are Friends—
A name that through the world a peaceful feeling ever
sends;
And Friends they are, as you can see, as each his neighbor
greet,
From the youngest to the occupants of high-backed "facing
seats."
On a sunny summer morning as you spend an hour inside,
You can hear upon the fragrant air, through windows open
wide,
The songs of feathered dwellers in the near-by locust trees,
Commingled with the buzzing of the Sabbath-breaking bees,
As they gather in the sweetness from the wild rose bushes
near,
Or among the leaves and blossoms now appear and disappear.
While within the silence hovers till you almost feel it
throb:
Yet an incident untoward, may this soul-communing rob
Of its gentle, calm serenity, as rolling o'er and o'er,
Goes a walnut, set in motion, on the sloping upper floor,
For a family of squirrels 'mid those rafters hide their store

And they oft disturb the meeting, doing up the morning chores.
 Then smothered childish laughter, tells of hearts grown quickly lighter,
 While even sober elders close their lips a little tighter;
 And maternal side-long glances, cast in gentle admonition,
 Recalls the graceless reveler to his perilous position—
 If you wander from the portals to the pretty yard outside,
 You're reminded, though but gently, of the Leveler of Pride,
 By the little mounds, grass-covered, with a stone at either end—
 The larger one, the passing tells, of some respected Friend,
 And it doesn't seem so terrible to rest 'mid scenes like these,
 Surrounded but by goodness in its different degrees.
 In Winter, though the whiteuess covers many beauties here,
 Yet the famous Quart'ly Meeting draws the Friends from far and near
 And the wealth of wisdom welling under scanty gray-grown locks;
 And the hearts so full of goodness, under straight-cut coats and frocks;
 And the quaint old speech and gestures, and the voices soft and clear,
 Come like a benediction on the work of all the year.
 While over all the purring of the wood-consuming stoves,
 Beguiles the time with music till some gentle spirit moves.
 Then the interest grows and gathers with the swift, *ex tempore* words
 Rising higher, falling lower, like the songs of many birds;
 Then it ceases, and in silence you can count the falling sands,
 Till the mystic spell is broken by the shaking of the hands.
 —Harry David.

WHERE ROBIN GOES IN WINTER.

Of all our birds probably not one is known better than the robin, nor is any other more generally a favorite, unless it be the sweet-voiced blue-bird. The robin comes to us with the first warm spring days, soon becomes a familiar tenant of our lawns, gardens, and orchards, nesting confidently in the shrubbery of our yards and gardens. His summer life; his rude but substantial nest of mud and dried grass; his blue eggs, and his melodious song,—all this is well-known to every one. But his winter life—who can tell us of that? In our Northern States little is seen of Robin from November till March. But just where and how he passes the long winter—how many can tell? "Oh," says every one, "he goes South." Yes; but how far, and where? Unlike many of our summer birds, which leave us in winter, the robin is able to bear a severe degree of cold. With him it is the food question that determines his winter wanderings. It is not generally known that little flocks of robins regularly pass the winter in various parts of New England,—even as far North as Maine and the British Provinces. They seek out sheltered haunts where cedar and other winter berries abound, and bid defiance to snows and a degree of cold we should little expect them to be able to endure. Probably they never seriously suffer from the inclemency of the season so long as food is plenty. But the localities which furnish this in winter in the Northern States are not numerous, nor are they usu-

ally often visited by man. It now and then happens that when their accustomed wild fruits fail them, the robins visit our towns and the outskirts of cities, where they regale themselves on the berries of the mountain-ash, till, the supply exhausted, they are forced to seek new feasting-grounds. They are not the untimely and foolish visitors from the South that they are generally supposed to be. They have simply left their winter resorts in the swamps, or the sheltered glens of the mountain side.

The robin is, however, a truly migratory bird. The little parties which now and then we see in winter are not those which lived in summer in our lawns and orchards. The latter are far away in the sunny South. These winter visitors are the summer robins of the far North; for in summer the robin spreads over the whole northern part of the continent, almost to the Arctic regions. The robins that first come to us in the spring have spent the winter in the Middle States. They make us but a transient visit, and pass on northward to their own summer homes, while their place is filled later by our own summer birds, which may have spent the winter far south.

In their winter haunts in the South the robins gather at times in immense flocks, particularly at their favorite roosting-places in the dense cane-brakes. Nor are they at such times always exempt from persecution from human foes. At those cane-brake "robin-roosts" the birds assemble,—many of them coming from long distances,—between five o'clock in the afternoon and dark, till the cane-brake is alive with them. At night, under cover of darkness, the "roosts" are visited by parties of men and boys from the surrounding country, armed with sticks, by whom hundreds and even thousands are sometimes ruthlessly killed in a single night. No bird-laws here afford the robins protection, and the slaughter goes on unchecked till the birds seek safety at other resorts.

Such, in brief, is the winter history of one of our best-known "early-birds." With us at the North the robin is generally and wisely protected, not only by statutes in nearly every Northern State, but also by a sentiment of love and respect for one of the most useful and attractive tenants of our towns and city suburbs, as well as of the farms and the highways. Not the least of its attractions are its loud, clear, sweetly modulated and inspiring matin songs, which greet our ears with the first break of day during the later spring and early summer months. Robin's appearance in early spring-time is hailed with delight as the assurance of the return of milder days, and of that joyous season when all Nature awakens to new life and beauty.

The robin was so named by the early English settlers in this country, from its fancied resemblance to the favorite robin redbreast of Old England. Like that bird he is familiar and confiding, and has also a "red" breast. But here the resemblance in reality ceases. The *bluebird* is the true representative of the Old World robin redbreast; and is in every way better entitled to the honored recognition the name implies.

But our robin has won a nearly equal place in the affections of our people.—J. A. Allen.

THE FAUNA OF BEACH HAVEN, N. J.

At a recent meeting of the Academy of Natural Sciences, Philadelphia, Professor Joseph Leidy spoke on the fauna observed at Beach Haven, N. J. He had spent the last two summers there. The place is situated on the island of Long Branch, a sand bar but a few feet above the ocean level, 22 miles long and little more than half a mile wide, off the New Jersey coast, from which it is separated by Little Egg Harbor and Barnegat Bays. The island consists of the ocean beach, flanked by long low sand hills and meadows extending to the bays. It is treeless, but produces frequent patches of wax-myrtle, *Myrica cerifera*. While the variety of marine animal life in the vicinity is comparatively small, a few forms adapted to the special localities are abundant. The ocean beach, consisting mainly of fine silicious sand without pebbles, between tides, swarms with the mole crab, *Hippa talpoidea*, and the little mollusk, *Donax fossor*. Above tides, the beach oft-times is lively with sand-fleas, among which are conspicuous the *Talorchestia macropthalma*, and less commonly the *T. longicornis*. Still higher extending to the sand-hills, the sand-crab, *Ocypoda arenaria*, is frequent. The mud of the bays and sounds swarms with the scavenger snail, *Ilyanassa obsoleta*, while the meadows abound with the marsh snail, *Melampus bidentatus*. The borders of the meadows are thickly planted with the horse-mussel, *Modiola plicatula*, or are honey-combed by the fidler crab, *Gelasimus pulgulator*. The bays supply the market with abundance of the oyster, which is extensively cultivated for the purpose. The clam, *Venus mercenaria*, also occurs in the greatest abundance, and is constantly gathered for the market. The squirt-clam, *Mya arenaria*, is likewise supplied from mud flats of the bays. The edible crab, *Callinectes hastatus*, often occurs in the bays in great numbers. The previous summer, the bottom appeared to swarm with them, but the last summer they were less numerous, in consequence, as the fishermen report, of great numbers having been destroyed by the severe cold of last winter. In a visit to Beach Haven, in February, I observed many recently dead crabs thrown up on the ocean beach, and feasted on by multitudes of the isopod crustacean, *Cirolana concharum*.

In the bays the spider crab, *Libinia canaliculata*, the shrimp, *Palaeomonetes vulgaris*, and the hermit crab, *Pagurus longicarpus*, are in abundance, and the *P. pollicaris* is not infrequent. The shrimp is infested to a wonderful degree with a parasitic crustacean *Boypyrus palaeomoneticola*. The horse-shoe crab, *Limulus polyphemus* also occasionally occurs on the ocean beach.

The sand of Beach Haven is remarkably sonorous; when scraped in walking, it emits a sound like that produced by sliding a rubber shoe on the pavement.

The condition of the ocean beach varies with the direction of the winds and violence of the waves. Mostly, it is remarkably uniform and free from organic debris, and is composed of fine, white quartz sand without pebbles, and with streaks and patches of black sand, which from its greater specific gravity is incessantly sifted from the white sand by the winds and waves. On one occasion, during the prev-

alence for several days, of a strong north-east wind, the beach above high tide was covered with a broad stratum of black sand from a fourth to an inch thick, over which the white sand was blown like columns of smoke and accumulated at the base of the sand hills where it looked by contrast like snow drifts. The organic debris cast ashore mostly consists of materials carried out from the bays, commonly, masses of eel-grass, *Zostera marina*, and bunches of bladder-wrack, *Fucus vesiculosus*; the latter often attached to a horse-mussel, on which the plant grew. Frequently attached to the plants are various animals, especially *Bugula turrita*, *Obelia commisuralis*, *Perophora viridis*, *Lepas fascicularis*, etc. Occasionally there are thrown ashore a live beach-clam, *Maetra solidissima*, a dead shell of the same with attached branches of *Sertularia argentea*, the collar-like sand egg cases of *Natica* and the chaplet ones of *Fulgur*. In the experience of two summers medusæ were rarely wafted ashore, and these were in fragments and pertained to *Cyanea arctica* and apparently *Aurelia flavidula*.

Goose barnacles, *Lepas fascicularis* occasionally are not infrequent; and more rarely *L. anatifera*, attached to fragments of timber, is thrown on the sands. High up on the beach, at the base of the sand-hills, and often extending into the valleys between them are multitudes of bleaching shells, the remains of occasional severe storms. Most of the shells are those of the beach clam, *Maetra solidissima*, which, everywhere on the open coast of New Jersey appears to be the most common lamellibranch, except the little *Donax fossor*. The younger shells of the *Maetra* are often observed along shore, with a circular hole through the umbo, made by *Natica*. Some years since, at Atlantic City, I observed a number of beach clams, in the sand between tides, which were in possession of *Natica heros* in the act of boring the shells.

Among the occasional shells on the beach, fragments of large ones of *Pholas costata* are not infrequent, and yet an experienced clam catcher, who is familiar with the ordinary animals of the locality informed me that he had never found a living one.

Several attempts were made at dredging in Little Egg Harbor, but with very little result of interest. Near the mouth of the bay we drew up great quantities of *Mytilus edulis*, less than half grown, accompanied by many star-fishes, *Asterias arenicola*. In some positions we took numerous dead shells of the oyster and clam, *Venus mercenaria*, preyed upon by the sulphur colored boring sponge, *Cliona sulphurea*. This, after drilling and tunnelling the shells in all directions, continues to grow into masses from the size of one's fist to that of the head, in which condition it is known to the clam-catchers as the "bay pumpkin." The skeleton of this sponge is constructed of calcareous pin-like spicules. It also attacks and preys on the shell of the living oyster, but appears not to do so on the living clam. The sedentary habit of the former, no doubt, facilitates its attacks. The shell of the oyster and clam, *Venus*, bored in a sieve-like manner, and freed from the sponge, are frequently thrown on the ocean beach, and with them rarely the shell of a *Maetra* bored in the same manner, but I could not ascertain whether the *Cliona* lived on the shore of the open ocean.

Another sponge frequently observed growing on living oysters and dead shells of the same and of the clam, *Venus*, is called by the catchers the "red-beard," *Microciona prolifera*. It is bright vermilion color when alive, but brown when dead, and masses of it in the latter condition are often found on the ocean beach. It is a silicious sponge and does not prey on the shells of mollusks.

PUBLIC FUNDS FOR SECTARIAN USES.

UNDER the head of "Sectarian Appropriations," *The Independent* gives some figures concerning the use made of part of the taxes paid into the treasury of New York City. The sum to be loaned for the current year is stated at \$33,800,000, of this amount \$13,000,000 go for State purposes, and \$1,142,232.61 towards the support of charitable and benevolent institutions. After giving the name and amount appropriated to each non-sectarian charity a list of those which are entirely sectarian that are aided, is given. Of these, three are Protestant Episcopal, and receive on the aggregate \$31,814.63. One is Hebrew and receives \$60,000, and five are Roman Catholic receiving \$540,325.60.

It will be readily seen that more than half of the whole sum appropriated for charitable and benevolent institutions will go to institutions originated and managed by religious sects, in which their peculiar religious tenets are taught. Commenting on this use of moneys raised by taxation the *Independent* says:

"We have no objections that Catholics, Episcopalians, Presbyterians, Congregationalists, Jews, and even infidels should organize as many private charities as they choose, and in the same teach their own religious tenets, provided always that they will be content to foot the bills thereof out of their own funds. This is their unquestionable right. But when religions sects seek to use the funds raised by general taxation for the support of their sectarian charities, either in whole or in part, then they in effect ask the people, through the system of compulsory taxation, to aid them in their work of special religious propagandism. To this we do most decidedly object, and would not appropriate a single dollar of public money for any such purpose. Every dollar thus appropriated in aid of a private sectarian charity, or in aid of a private sectarian school for the education of children, is misused and diverted from the purpose for which it was raised by taxation. The fundamental principle of our institutions is that the friends of religion must pay its bills by voluntary contributions, and that the public money shall be used only for purposes in which all the people have a common interest.

"To compel a taxpayer to help support Catholicism, whether he wishes to do so or not, by using for this purpose a part of the money collected from him as a tax, is to him a gross injustice. This injustice is avoided only by leaving all the religious sects to pay all the bills of their special propagandism. There should be no departure from this rule in a solitary instance or to the amount of a dollar."

NEWS AND OTHER GLEANINGS.

—The *New York World*: The official report of the imports of wheat and flour into Great Britain for the eleven months ending November 30th shows a great falling off in the receipts from the United States. For the corresponding period in 1887 the imports of wheat from that country amounted to 23,700,000 bushels. During the past year they aggregated only 14,100,000—a decrease of over one-half. The Russian imports of wheat into Great Britain in the same period were 3,877,000 bushels in 1887 and 10,000,000 bushels in 1888.

—It is announced that Harriet Beecher Stowe continues to improve in health and spirits, and is, physically and mentally quite as well as before her very serious illness of last summer. She is by no means strong, however, and requires the continual oversight of her physician.

—A fresher on the south branch of the Potomac, near Romney, Hampshire county, W. Va., has laid open a great Indian cemetery. Hundreds of skeletons, according to a despatch, have been found in a good state of preservation. All were lying on the left side. With the skeletons were found beads, arrow, spear, and tomahawk heads, and what is believed to have been Indian money made of bone and ivory. Some of the beads were of bone, others of small stones, and all were beautifully colored. Among the trinkets were many bone fish-hooks, and copper articles used by the Indians for some purpose unknown at this day. The trinkets were all perforated with very small holes.

—The *Baltimore Sun* says: Oranges are now being moved from Florida in bulk the same as potatoes. The cars are piled about three feet deep with oranges. Paper is run around the sides of the car, and the floor is covered with fine marsh grass. These carloads of loose oranges now come regularly to Baltimore from Orlando station, on the South Florida Railroad. They have attracted much attention at Calvert station, where they are unloaded. This new method of moving them does away with the old idea of wrapping in paper and excluding the air as much as possible. Several varieties come in a car, partitioned off thin board being put up. The last car to Baltimore contained 42,000 oranges, and had been six days making the trip. The freight on the cars was \$155.

—Premises have been leased by the Committee on Aid and Employment of Discharged Prisoners, acting for the Pennsylvania Prison Society, in which it is proposed to inaugurate a "Home of Industry" where discharged prisoners may find a shelter and temporary employment.

—Secretary Vilas has made an allowance of \$600 a year out of the appropriation for the Indian Bureau in aid of a civilizing agency established and thus far carried on at her own expense by Miss Grace Howard, of New York, a daughter of the well known writer, Joe Howard, Jr. Miss Howard's enthusiasm for the aborigines induced her to go to Dakota and devote herself to teaching the Sioux how to live. In the spring of 1887 Secretary Lamar gave her permission to build a house near the Crow Creek Agency and there she has since lived and taught the Indian women how to sew and take care of their children. The Indian men also came to her house for instruction in the arts and manners of the whites. Miss Howard has an allowance from her father and on this she has lived and carried on her Indian missionary enterprise.—*Chicago Inter-Ocean*.

—On the 23d of last month the Dutch Parliament agreed to the ratification of a Treaty between France and Holland, referring to Arbitration the settlement of some outstanding disputes concerning the boundaries of the re-

spective colonial possessions of the two nations in Cayenne and Surinam.—*Herald of Peace.*

—Nebraska will shortly enter upon the manufacture of beet root sugar on a scale which promises the greatest success. The German farmers are skilled in the raising of this vegetable, and a large sum has been subscribed to secure the production of the best sugar in the market. The soil is adapted to the cultivation of beets, the climate is favorable, and it is confidently expected that a revolution in sugar-producing is about to take place. There is no question of the high quality of beet root sugar.—*Boston Journal.*

—The Castle Garden report shows that the immigration of last year from the kingdom of Sweden and Norway was over 7 000 greater than that from Ireland. It ran as high as 51,649. The great mass of the Swedes and Norwegians, as soon as they landed, struck out for the West, a large proportion of them going as far as Dakota, which within recent years has become a favorite region of settlement for them. It is their desire to procure land for cultivation, and they like to settle closely together, but they quickly become Americanized. Wisconsin, Kansas, and Minnesota used to be their chosen States, but the price of farms there is now too high for them. The small population of their native kingdom has suffered a very heavy depletion during the last quarter of a century by the constant outflow to the United States, and there have been many projects for retaining the people at home, but all efforts to do so are nullified by the letters sent there by the immigrants who have secured prosperity in this country.—*Ez.*

—The latest issue of the *Journal* of the Franklin Institute of this city contains an article read by Prof. C. H. Koyl, of Swarthmore College, before that body in November last. The paper describes an invention made by Prof. Koyl, which looks toward greater surety in signalling railroad trains at night. The ordinary semaphore, or signal-arm, with its lamp attachment, is generally regarded as imperfect for night-service, as it is liable to be confused with other lights of the same kind. In Prof. Koyl's invention the arm is inlaid with a glass reflector and is bent in a paraboloid shape, thus reflecting the light from the lantern at the axis in straight lines up or down the track. By colored glass adjusted at the lantern the arm gives a bright band of red when set at "danger," and a clear white band when set at full or "go ahead." To enable the band to be seen around curves, the surface of the reflecting glass is corrugated. During the day as well, the parabolic semaphore is also a color signal, for when horizontal, nothing is seen but the red frame; and when dropped, nothing but the glass lighted by the white sky. Dr. Koyl's invention has, we understand, been patented in this country and abroad, and its advantages are so obvious that its extensive introduction seems only a question of time.—*The American.*

CURRENT EVENTS.

A CAUCUS of the party majority in the Pennsylvania legislature has determined to pass a joint resolution to submit the Prohibitory Amendment to a vote of the people of the State, at a special election to be held on the 18th of Sixth month. Provision will also be made, probably, for a special session of the Legislature, next year, in case the Amendment should be adopted. (Without a special session no laws enforcing the Amendment could be adopted until the regular session of 1891.)

UNDER a new law for the government of the City of London, and the municipalities which have grown up

around it, (much greater in extent and population than the City proper), popular elections were held on the 16th inst., for members of a governing Council. Among those chosen are two women, one of them the daughter of Richard Cobden. Some doubt is expressed whether, under the law, women are eligible to the place, but it is expected that they will take their seats, and the question will be considered afterward.

TROUBLES at Samoa, (formerly known as Navigator's Island), in the South Pacific have threatened a collision between the United States and Germany. The agents of the latter country in the island have pursued an aggressive course, in the interest of German trade, and a civil war among the native people has been caused. The United States representatives have opposed this course, and the straits have become so great that several ships of war have been ordered there.

THE Delaware Legislature has elected Anthony Higgins, (Rep.), of Wilmington, U. S. Senator. This is notable because he will succeed Eli Saulsbury, a Democrat; and is the first member of his party ever chosen from that State.

THE U. S. Senate, on the 22d inst., passed the Tariff bill which it has had under consideration, it being a substitute for the "Mills bill" passed by the House. The measure now returns to the House. An agreement is not generally expected; it is probable that Congress will end without any legislation on the subject.

NOTICES.

*A Conference of parents, teachers, school committees, and others interested, will be held under the care of the Committee on Education of Philadelphia Yearly Meeting of Friends on Seventh-day, First month 26 1889, at 15th and Race streets, Philadelphia, commencing at 10 o'clock a. m.

The subjects for consideration are: 1st Vocal Culture. 2d Lectivities.

All interested are invited.

Prompt attendance is desired.

WM. WADE GRISCOM, Clerk.

*The Committee of Philadelphia Monthly Meeting have arranged for a social reception for members and attendees of their meetings.

Especially would we solicit the company of young Friends from the country, and other strangers in our midst.

It will be held in the parlor and library room, at Race street, on Sixth-day evening, First month 25, between 7.30 and 10 o'clock.

PUBLISHERS' NOTICES.

*We particularly ask that when money is forwarded to *renew* subscriptions, care be taken to give us the name of the person to whom the paper is now being sent. Sometimes, instead of this, the name of another member of the same family is given, in which case, the new name not appearing on our list, we suppose it to be a new subscription, and send two papers.

Where it is a *new* subscription, please say so, and this will also help avoid mistakes.

*As a definite number of copies of the INTELLIGENCER AND JOURNAL is printed each week, we would suggest to any of our friends who may wish extra numbers of the paper to inform us of the fact previous to the publication containing the particular article wanted, that we may have the required amount of extra numbers printed.

*Matter intended for insertion in the INTELLIGENCER AND JOURNAL should reach us by Third-day morning, though notices or advertisements relating to affairs of immediate importance may be used as late as the morning of Fourth-day. In order to reach our distant subscribers, the paper is now mailed on Fifth day and must be sent to press at noon of the day preceding.

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. *Sold only in cans.* ROYAL BAKING POWDER Co., 106 Wall-st., N. Y.

"IN SILENCE AND ALONE."

If thou wouldst draw near to God
And wouldst hear him inly speak,
Far from tumult and from crowd,
All alone his presence seek.
Let thine incense burn apart
Till he heed its sweet perfume ;
For the silent, reverent heart
Is the Master's audience room.

When the air is filled with song,
Thou wilt sing, nor question why,
Though the tide which rolls along
Leave thy parched spirit dry.
Words which entered at thine ear
From thy careless tongue have flown,
Ere thou couldst the witness bear
That their comfort was thine own.

With the still, small voice he came,
Not in earthquake, wind, or fire,
When thou callest on his name,
Purely, mightily aspire.

Lift thy hands his clasp to meet,
Still thine earthly nature's strife,
Till celestial accents sweet
Speak to thee the words of life.

—Catharine S. Holmes, in the *Christian Register*.

RELIGION: A STUDY.¹

RELIGION, as generally understood, is regarded as something apart from the acquirements which man may possess himself of as he does of things material or intellectual,—something like a concrete spirituality, that comes instinctively, or as a special gift from our Heavenly Father. And by a large class it is considered as only to be found or obtained during a period of emotional excitement, when an abnormal condition of the mental or physical conditions, or both, is reached, so that the mind may be more susceptible to religious impressions. And it has long been the custom of religionists, or evangelists, as they are often called, to work upon the fears of men, by portraying the terrible judgments of the Almighty One, upon sinners, as a means of arousing this susceptibility, that as a resulting consequence, they may experience a change of heart, experience religion, get religion, etc.; and to these no doubt the idea that religion is a study, that like all mental attainments it is of gradual growth, and in proportion as its lessons are digested and incorporated into our lives, do we come to possess it so as to really call it ours, will seem strange and perhaps incongruous.

¹Extracts from the Address of John J. Cornell to the students of Swarthmore, on Third-day morning, First month 8, 1889.

In speaking of religion as a study it is not my purpose to call your attention to the varied doctrines which have been and which are being taught as religious truth, but to that which seems to me to embrace all that is essential when divested of the surroundings which long ages of superstition have allowed to accumulate.

What religion really is, and in what it consists, may therefore be a proper subject for our inquiry. I would define it to consist of a cheerful and willing obedience to all the laws of God as far as we are able to comprehend them, whether those laws relate to our physical, intellectual, or spiritual life. Hence, while there are many different forms of Religion, and many dogmas called religion, there is in reality but one religion. Though there are many different names given to the various professions, such as the Hindoo, the Brahmin, the Jewish, the Christian, and their devotees are divided into many different sects, still all that is valuable in either or all of them, is that which induces such a daily life in obedience to the laws of God as I have defined true religion to be.

With this thought before us, it becomes more easy to understand why religion should be a study, and why it must be learned gradually as in school, by lessons adapted to your capacity to receive and comprehend. As fast as these lessons are properly learned and made your own, other and more advanced ones will be given, and so on while you are permitted to remain in the present life; for unlike your attainments in school, there will come to you no day of graduation in religion until this life shall close. If you are faithful and earnest students, you will be continually learning something new; nor need this be a cause for discouragement, as I shall endeavor to make clear.

Among the first lessons given by the great Teacher are those which are intended to discipline us, to prove us, to ascertain how far we will implicitly follow the directions given, and these are often to some minds the hardest lessons to learn. This is exemplified in your school work here; no doubt some of you have found it much more easy to commit to memory the lessons given you by your teachers, than to curb and restrain your inclinations to disobey the rules prescribed for your deportment, particularly when these conflict with some previously formed habit. The more willing you are to confide in the judgment of your teachers, and the more you allow your affections to go out to them, the less inclined you will feel to disregard their counsel or commands. While you are acquiring a knowledge of Science and Literature you are at the same time acquiring a discipline over

yourselves; this you will find important as you enter upon the active arena of life, and this is in fact a part of the religious study to which I am endeavoring to call your attention. The first lessons in this study are in the form of discipline to teach obedience, and you will find the more willingly you allow yourselves to be governed by these impressions which teach you what is right, the more easily will you overcome those inclinations which prompt you to disobey or disregard these impressions.

I think it will appear clear to you that all this will not come intuitively, nor can it be fully apprehended and comprehended amid scenes of emotional excitement. You must bring your reasoning faculties into action, and ask yourselves mentally, Are these impressions of duty reasonable? If so, why can they be required of me? What is the object to be effected? What was the result of either following or rejecting former impressions? Did they aid me in the enjoyment of life, or did they mar it? Was that enjoyment the result of obedience to them, and was the disturbed condition of mind the result of rejecting their dictates? As you thus carefully study this problem, as you would one in Mathematics, or seek to interpret it as you would a passage in the Classics, you will find you have added to your knowledge of the motives, and results of them as they apply to your every-day life. Thus you will become better able to grapple with the more abstruse problems of life as they may be presented to you.

As you thus enter upon life, you will find your path beset with many difficulties; some of your most cherished plans will be thwarted; some of your most ambitious hopes disappointed; that upon which you may place your hopes for happiness will fail you; from where you see only a reasonable ground for success, there will come a failure. The friends on whom you have placed your affections will not always prove true to you, some may be removed by death when you think you need them most. Some one or more of these experiences you will unavoidably meet in your life's journey, and that too when you may have thought you had used every effort human foresight could suggest to avert them, and the natural tendency of such occurrences is to depress and discourage, and often to induce a murmuring against the operation of laws that are designed for the general good, though they may seem to have worked only evil for you. The indulgence of such feelings always tends to disturb our happiness, clouds the life with gloomy forebodings, weakens the reserve forces of our nature, and thus hinders and retards our recuperation from such experiences. If then you shall have made a proper study of Religion, so as to apply it to or incorporate it in your daily life, you will be fortified against such a depression and discouragement. It will keep you from making calculations that admit of no allowances for failure. It will teach you to regard all things of an earthly nature as evanescent, and therefore liable to change. It will limit the indulgence of your ambition. It will preserve you from regarding your affection for any earthly object as the supreme, and thus will

teach you to look to the great Teacher within you in these hours of trial for the needed strength to bear them without depressing you or disturbing the peace and happiness of your mind, and to continue to press onward in the performance of the duties of life.

It will not only deepen your love for the Author of your being, but for your fellow men. It will check the selfishness of your nature, and direct its exercise in such channels as are proper and right. It will inspire in you a willingness and a desire to be useful to others while pursuing your own vocations. And thus from it you will derive a happiness not known to those who reject its teachings.

It is by these means or this manner of life you will experience this Christ, or Son, or Grace of God in you to become your Saviour from the commission of sin, or from transgressing such Divine laws as you understand you are required to observe; and your religion then becomes practical and not merely theoretical, becomes incorporated into and a rule to govern your daily life, instead of being a mere profession; it becomes a motive for action instead of a belief in dogmas and doctrines, and will therefore better fit you to fulfil all the duties and obligations of this life, with honor to yourselves, good will, good actions, and good influences towards your fellowmen, and to the praise and glory of God. And while thus preserving you amid the trials and temptations of the present life, furnish you all the assurance you can need or desire of a welcome to such enjoyments in the future life as your immortal natures can enjoy and appreciate.

But you must not defer this study of religion for your mature manhood, or womanhood, or until after you have completed your school life; for like all other studies, it can best be pursued, and greater proficiency be made therein, by commencing it early in life. Nor need it or will it interfere with your other duties, or impose on you such burdens as to unfit you to attend to them; but on the contrary it will be one of your most efficient aids, because it will inspire you to make the best and proper use of your time and talents from a higher motive than mere self-interests. The love of doing right which always follows such a study when the lessons become incorporated into our lives, will give you a keener appreciation of the sacrifices your parents are making to give you such opportunities as you are here enjoying, and induce you by your love for them to do all you can to accomplish the end for which they are making these sacrifices. It will give you a more just appreciation of the efforts of your teachers in imparting to you the knowledge you are seeking to obtain, and while it will impose upon you a self-discipline, it will give you a clearer understanding of the reasons for the adoption of the code of rules to maintain good conduct among you, and hence render it more easy for you to observe these rules, and thus lighten the burdens of those who have you under their care.

When you have by such a course of study laid the foundation, and erected thereon a structure of religious faith; while you will find some form necessary to give its expression to others, you will of your own volition adopt that form which is at once the

most simple and expressive, manifesting that it is from the communion of your spiritual nature with the Christ or Teacher within you, that you are expecting to be taught what further lessons are needed for you to learn, and when, where, and how you are to put them into practice, or in what field of labor you can most promote the best interest of the human race. I do not propose in this paper to enter into an explanation, description, or defense of what are termed the principles of Christianity further than I have already outlined them, for as I understand it to be one of the duties of a teacher to induce his pupils to think for themselves, so do I believe it to be one of the duties of a public speaker in the presentation of his subject to give as clearly as he may be able the outlines of his thought to make them fully understood, leaving for his hearers to do the elaboration or filling in, so they may the more readily make his thoughts their own.

And yet I would not be understood by you that in this form of study to which I have cited you, you are to discard the evidences which have been left on record by the writers of the past, whether those records be the Bible, or other works of a religious nature. But while you closely study the lessons immediately imparted to you by the inner Teacher, you may compare those lessons with the experience of others, and derive therefrom much that will be corroborative of what is unfolded to you now. And as you use them as such a corroboration and not as authority, you will be able to detect what there may be in them that bears the stamp of the human, and what the Divine, where the superstitions men in former ages embraced have been taken for truth. And so you can make an intelligent use of all these records as valuable auxiliaries in the pursuit of this study, enabling you often to persevere when you may become doubtful, and cheering you by their evidence that others have had similar experiences with your own; and as they were faithful to their light were able to overcome their life's besetments, so you too by an equal faithfulness will be able to overcome all that stands in the way of your advancement under your Great Teacher.

May each of you enter upon this study now with an earnest desire to learn the lessons it will teach you, divesting your minds as far as may be of the association of mere forms and doctrines called religions, with this study of religion. Seek earnestly for that knowledge of what is right for you to know and do, which knowledge you will receive from these impressions with which many of you are already familiar, but upon which you have not been accustomed to look as lessons of religious study. Make that right your groundwork of action in every movement in life, and you will then discover that the source of happiness lies within and not without you, and is not dependent either upon success or failure in the secular concerns of life. Success will be pursued by you not alone for the benefits which will accrue to yourselves, nor will you be deterred by failure from putting forth still more energetic efforts. The consciousness of endeavoring to do what you understand to be right will bring you greater joy, will furnish you

greater power to withstand adversity than anything else will bring you; and so you will learn that it is the practical application of such a knowledge as such a study of religion will give you, that will best promote your happiness in this life and fit you for an entrance to the companionship of the blessed in the life to come.

NOTES FROM PALESTINE.—III.

THE MOSQUE OF OMAR—WAILING PLACE OF THE JEW.
THE VALLEYS AROUND JERUSALEM—THE COEN-
ACULUM—POOL OF SILOAM—MOUNT OF
OLIVES—GARDEN OF GETSEMANE.

ON the summit of Mt. Moriah, where once stood Solomon's Temple, is now the Mosque of Omar, regarded by the Mohammedans as the holiest of all places after Mecca. It is built over a bare, rugged piece of rock, 57 feet long and 43 feet wide, from which they believe Mohammed ascended to heaven on his good steed, El-Burak. This rock has been consecrated to sacred use from the earliest times. In the days of Abraham it was a place of sacrifice (Gen. 22:2), and here tradition says Ornan had his threshing floor and David reared an altar and interceded for the plague-stricken people, charging his son Solomon to build on the spot a temple (I. Chron. 21:21-30; I. Chron. 22:1-6). After the return of the Jews from exile, a second temple was erected on the site of Solomon's, but was far inferior to his in magnificence. The third temple was built by Herod and was still in progress during the lifetime of Jesus. It was never completely finished in the style originally designed. From the castle by which it was guarded and with which it was connected by two passages, Titus watched its burning in 70 A. D. The Emperor Hadrian afterwards built a temple of Jupiter here. Omar found it necessary to clear away much rubbish to make room for the present mosque.

The summit of Mt. Moriah has been leveled into a broad platform and surrounded by a wall. We entered one of the eight gateways on its western side and found ourselves in an irregular quadrangle with buildings scattered over it, the two largest being the Mosque of Omar and the Aksa Mosque. The former is octagonal, is crowned with a dome and is decorated on the outside and inside with handsome porcelain tiles, on which are inscribed passages from the Koran. The interior is divided by two courses of massive piers and columns into aisles which follow the octagonal shape of the building. Windows of colored glass admit a dim and uncertain light, producing a rich but somewhat gloomy effect. Beneath the dome the sacred rock rises about 6½ feet above the surrounding pavement.

The Mosque El Aksa consists of seven arcades leading into seven broad aisles between rows of noble columns, with four different styles of capitals. It was built by a nephew of Saladin in 1236, on the site of a basilica founded by Constantine. Just before the portals of the Aksa Mosque is a cistern, called "the leaf fountain," from which we drank. According to a Mohammedan legend, one of the companions of Mohammed, having let the bucket slip from his

hands, went down after it. He found a door leading into a beautiful garden, whence he brought back a leaf that never withered. The door has not been found since, but the Mohammedans still regard the Well of the Leaf as one of the entrances to Paradise. A stone slab in the pavement of the Mosque is pointed out as the tomb of the sons of Aaron. The pulpit is exquisitely carved from cedar of Lebanon, and inlaid with ivory and mother-of-pearl. It is near the so-called "praying place of Moses." Two of the pillars are so close together that it is extremely difficult to pass between them, but it is a popular story that those who succeed are sure of a place in heaven.

Beneath the Mosque El-Aksa are extensive vaults formed by a double series of arches resting on piers. At a little distance from this Mosque we went below the surface again and walked through a vast succession of pillared and vaulted avenues said to have belonged to Solomon's stables. They were used for stables by the Templars and Frank kings in the Middle Ages, and some of the rings to which they fastened their horses still remain.

To see all that is left of Solomon's Temple, we descended to the streets of the city and entered a narrow lane, below the Mosque of Omar, where we found a fragment of a wall 52 yds. long and 56 ft. high, composed of huge blocks of stone, some being 15 ft. long and three or four feet deep. Flowers and creeping things grew in the crevices. This spot is now called "The Wailing Place of the Jews," because they come here every Friday afternoon, before going to their synagogues, to mourn the destruction of the Temple and the loss of their city. They chant responsively, swaying their bodies and holding the Jewish Psalter in their hands. Many of their hymns are grand and impressive. Two are given below :

FIRST CHOIR.

Reader.—Because of the place which is deserted,

People.—We sit alone and weep.

Reader.—Because of the temple which is destroyed; because of the walls which are broken down; because of our greatness which is departed; because of the precious stones of the temple ground to powder; because of our priests who have erred and gone astray; because of our kings who have contemned God;

People.—We sit alone and weep.

ANOTHER CHOIR.

Reader.—We beseech Thee, have mercy on Zion!

People.—And gather together the children of Jerusalem.

Reader.—Make speed, make speed, O Deliverer of Zion.

People.—Speak after the heart of Jerusalem.

Reader.—Let Zion be girded with beauty and with majesty.

People.—Show favor unto Jerusalem.

Reader.—Let Zion find again her kings.

People.—Comfort those who mourn over Jerusalem.

Reader.—Let peace and joy return to Jerusalem.

People.—Let the branch of Jerusalem put forth and bud.

It has been thought probable that the stones for Solomon's Temple were taken from the vast subterranean quarries which now lie beneath the city. We entered these by a small cave under the north wall and found ourselves in very dark and spacious caverns, with long passages leading from one chamber to another. Their extent is not known, but everywhere about us the light of our candles revealed the mark of the pick-axe in the rocks.

One afternoon we walked entirely around Jerusalem, outside the walls. Our path lay through the valleys at the foot of the height on which the city is built. Going out the Jaffa Gate, which is on the west, we descended into the Valley of Gihon, where Solomon was proclaimed king amidst great rejoicing of the people, 1015 years before Christ. Crossing this valley is a wall, containing an ancient aqueduct, built originally to carry water to Solomon's Temple in Jerusalem, from the Pools of Solomon seven miles away, but now not used for any purpose.

Following the Valley of Gihon, we came to a point where it turns eastward in a narrow ravine with steep, rocky sides, on the west and south of the city. This is the Valley of Hinnom, on account of its unpleasant associations often called by the Jews "Gehenna," a place symbolic of torment. Before the reign of King Josiah idolatry was frequently practiced here; after he forbade this, the valley was used for receiving the drainage of the city. Pilgrims who died in Jerusalem during the Middle Ages were buried in Hinnom. High in the rocks are old tombs. One is called "The Apostles' Cavern," from a legend that here the disciples hid themselves when they forsook Jesus and fled. Within Hinnom is a small plot of ground said to be "Aaldama," the potter's field bought by the chief priests with the thirty pieces of silver which Judas returned after his repentance, when he saw that Jesus was condemned. In the fissures of the crags above are growing a few gnarled trees.

During this walk we were followed by troops of beggars, most of them lepers, with features and limbs half-eaten away by the loathsome disease. We were not far from the almshouse and leper hospital.

The story of Ruth was suggested to our minds by meeting a bright-eyed young girl carrying a sickle and sheaf of grain.

On the brow of the hill above us, a shepherd was leading his flock of sheep and goats. They knew his voice when calling them by name. He had a mantle of skin thrown loosely over his shoulder and was carrying his crook and a lamb in his arms.

Near Zion Gate, in the midst of a series of buildings resembling a village, is a small mosque, called the Tomb of David. It adjoins the Coenaculum, or Room of the Last Supper, a chamber fifty feet long and thirty feet wide, divided into two parts by columns. A portion of the ceiling is vaulted, and half pillars with curious capitals are built into the walls.

Not far away is a monastery, where the Armenian Patriarchs of Jerusalem are buried. One portion of its buildings is supposed to be the House of Caia-

phas. The spot where Peter stood when he denied his Master, and the court where the cock crew are reverently pointed out by the monks, who apparently have implicit faith in their own statements as to the identity of the places.

Towards the foot of Mt. Zion lies the Pool of Siloam half hidden amidst shrubbery. Near it, long ago, was the King's garden, and the stream now irrigates some grounds containing fruit trees. We found this retreat cool and inviting, after the stony places in which we had been walking. The water is in a rectangular basin fifty-three feet long, eighteen feet broad, and nineteen feet deep. In its bed are lying some broken columns and other fragments, showing that once a building had been erected over it. Among the bits of marble and along the banks were growing lovely wild flowers.

At the junction of the valley of Hinnom with Jehoshaphat is the spring of En-Rogel, called by the Arabs Job's Well. The water is still excellent. In the moist places about the well we picked some delicate ferns.

The Valley of Jehoshaphat forms the bed of the Brook Kidron on the southeast of the city. The Arab village of Siloah clings to the steep hillside opposite Jerusalem, its houses scattered among old tombs and caverns, some of which indeed serve for dwellings. Most prominent among these tombs are those of Absolem, Jehoshaphat, St. James and Zachariah. The first is a conspicuous and interesting monument. It consists of a cube about twenty feet high, hewn out of the solid rock. On this rests a smaller square of masonry, above which is a singular round, tapering roof of stone. No one now supposes that this tomb is identical with the pillar of Absolem's grave in the King's Dale mentioned in 2 Samuel, xviii., 18, although it may stand on the same site. The Tomb of St. James has a veranda cut out of the rock with two Doric columns supporting an entablature. Within are several chambers containing tombs. The monument of Zachariah is a square structure of stone with pilasters and pyramidal roof. It is solid and is not properly called a tomb, although usually spoken of as such.

Under the rock of the Valley of Jehoshaphat a spring gushes and collects in a basin called St. Mary's Well. This is reached by descending sixteen steps through a vault to a level platform and by fourteen steps more to the water. The spring is intermittent in its flow.

On the east of Jerusalem is the Mount of Olives, highest of all the hills which encompass the city, and the one of most sacred associations. Its long slopes are barren and stony, except where the surface soil gives sustenance to a few ancient olive trees and a scant growth of vegetation.

Three roads lead over the Mount of Olives towards Bethany; one a little above the base, another half way up, and a third across the summit. Near the beginning of these roads, at the foot of the mountain, is the Garden of Gethsemane. It is a third of an acre in size, and is surrounded by a wall so high that the garden cannot be seen from without. The Franciscans have care of it. One of the monks turned

the key in the gate for us. The enclosure is divided into flower-beds neatly kept and bordered by rows of lavender. It contains eight very old olive trees.

Opposite the Garden of Gethsemane is the traditional burial place of Mary, Joseph, and her parents. A church is built over it, only the porch of which appears above ground. We descended forty-seven marble steps to enter the building and listened to Easter services conducted in this subterranean church.

It is extremely interesting to climb the Mount of Olives and look back, as you ascend, upon the city below, which can be seen better from these slopes than from any other point. The view is fine by moonlight. On the summit is a beautiful marble church, on whose interior walls the Lord's Prayer is painted in thirty-three different languages. It was erected at the expense of a French princess, whose tomb is within. Near is a small octagonal chapel belonging to the Mohammedans. From the top of the mountain, on a fair day, one may look far across the country and catch a glimpse of the Jordan and the Dead Sea.

On the southeast and north of Jerusalem are extensive tomb-chambers, containing many loculi, or shelves for caskets. These have long been known popularly, as the tombs of the prophets, kings, and judges, but it is not likely that they were devoted to the use indicated by these names. It is now generally accepted on the testimony of Josephus that the Tomb of the Kings so-called is the sepulchre of Queen Helena of Adiebene. The entrance has fine mouldings representing wreaths, fruit, and foliage.

CORA A. BENNESON.

MATERIAL SUPPORT FOR THE MINISTRY.

It is often a question whether more good or evil will result from practices in themselves lawful. The application of principles to conduct must be left to the individual judgment, but the principles should be held clearly in mind. This is true of lending material aid to the ministry. In general there can be little doubt that, where available, such aid should be given as will make the service most efficient for the work of promulgating the Gospel. But this leaves a number of important questions undecided. For example, is what, for convenience may be styled the "one man ministry" more effectual for good than that where several participate? Again, will one do more real good by devoting all his time and energies to spiritual labors than by a more general exercise of his powers of body and spirit? These are far-reaching questions whose answer must depend on circumstances. There can be no doubt that the spirit of Christianity, as best exemplified in its early manifestations, encouraged great freedom in the exercise of spiritual gifts—a freedom limited only by the presence or absence of a true inspiration—and a healthy church ought always to have not one, but many concordant voices in testimony to the truth. It may therefore be truly asserted, that limiting the ministry to one person, even mainly, is proof of weakness. At the same time the weakness does ac-

tually exist, and must be provided for when it occurs, and if one is to do the work of several he will need the time of several to do it in. This is probably the origin of the salaried ministry. As it comes from a weakness of the church it should be only temporary and local,—an expedient for correcting a disorder rather than a settled rule of practice. By making it a rule rather than an exception, the church is degraded and impoverished. The injury is also increased by the manner in which the minister is provided for. Instead of being freely supported while freely giving time and strength to the common cause, he is given the rank of a hired laborer, or a salaried officer, and is expected to make the value of his services correspond with his compensation. So he must be industrious, and cultivate and use his talents to the utmost: he will then be in the line of progress and promotion. This leads directly to the assumption of other people's duties, the subordination of the Spirit's influence, to the demands of human desire and expectation, and the serious curtailment of the people's liberty. These evils often outweigh the advantages gained by a more regular and attractive service, and therefore although it has come to be the common practice of Christians, the foundation is intrinsically unsound and contrary to the genius of Christianity. It has lowered the ministry from a sacred calling, supported by the power of Him who calls, to a learned profession sustained by the wisdom of man.

Nevertheless the day of human weakness and the need of extraordinary efforts to provide for it is not past. If any will work where so much needs doing let them work—may give them all possible help and encouragement consistent with truth and safety. With a world on fire from sin, if firemen will not work without pay it is better to pay them than suffer loss. It appears as though God may act in this way, sending the waters of life to burning lips and hearts, not infrequently by hired laborers and methods good only in the absence of better. Love places a higher value on life than on the methods of preserving it.

God seems not like some physicians who would rather lose a patient than have him cured by "quackery." It is an excusable kind of quackery that saves life, and a hireling ministry that saves souls and feeds the starving is better than a free ministry that lets them perish. Jesus trod on the letter of the law and exceeded the bounds of his commission to show mercy to the sick and sorrowing. Thus the higher law of love abrogates the lower law of order when life is in peril, and though "reckoned among transgressors" the Son of God ever rises from the grave where the wisdom of man has condemned him, to the justification of faith and immortality at the right hand of God the Father. Before all else God is a Father, and counts nothing so dear as the life of his children.

Here we see where human wisdom and righteousness often fall short of the Divine standard. That is what the apostle meant when he asserted that "the weakness of God is stronger than men and the foolishness of God is wiser than men." God

does not regard ceremony or legal technicalities, like human reformers or human conformers. With Him "the life is more than meat and the body than raiment." It this principle were carefully borne in mind it would afford a safe guide through many difficulties. Perhaps it gives the best solution of the present problem. The ministry is valuable for its uses. That which effects the most good is the best ministry, whether it be of one or more. Make everything subsidiary to the salvation and edification of men and you will not go far wrong.

The true principle undoubtedly is for every one to do his work under the immediate direction of Christ and receive what is needful for his assistance when freely offered. This course is sanctioned by both the example and precepts of Jesus, who, while devoting his time to the ministry of the gospel, despised not the free-will offerings of those whom grateful affection moved to share his good work by contributing what lay in their power. In the case of his disciples, when sending them forth to preach in his name, he made this voluntary support of the people a proof of their divine commission. On their return he significantly inquired of them, "Lacked ye anything?" and they answered, "Nothing, Lord." Doubtless in many cases the modern disciple goes forth at the bidding of man, or of his own desires, and must therefore look to man for his support. In other cases the fault may lie with the people, as was shown in the direction given to the seventy, "Into whatsoever city ye enter and they receive you, eat such things as are set before you, and heal the sick that are therein; but into whatsoever city ye enter and they receive you not, go your ways out into the streets of the same, and say, 'Even the very dust of your city which cleaveth on us do we wipe off against you.'" Then followed that terrible rebuke to those who failed to respond to the gospel message: "It shall be more tolerable for Sodom and Gomorrah in the day of judgment than for that city." There is proof that an unresponsive spirit on the part of those to whom the Gospel is preached is, in the sight of God, a grave, and even deadly sin. Indeed the sin of not doing that which we ought is always the equivalent of doing that which we ought not. Therefore the fact that the gospel is freely preached to us, instead of bringing exemption, rather increases our responsibility to see that such magnanimity receives its proper reward by the manifestation of a kindred spirit. If we are assured that enough has been done, or that the servant of God has resources of his own and needs no assistance, it becomes our duty, not to do nothing, but to direct our gifts where there is real need. True love desires no exemption from doing all it can for the object beloved.

If the above principles were faithfully adhered to by Christians, including the Society of Friends, is it not reasonable to suppose that the kingdom of God would be much nearer its establishment in the world than it is at present? It is no doubt possible to err on the side of careless and superfluous giving; but in general the danger is not imminent from that quarter. On the other hand, the changed conditions of society may increase the need of such as have a gift

in the ministry being so far relieved from pecuniary want that they will not suppress the motions of the Spirit urging them to the heavenly harvest-field because their family must have bread and clothing. Grant that having the Master's promise, they should go forward nothing doubting, all have not the faith that makes martyrs. Even Jesus himself, at times, had not "where to lay his head." Thousands who would not shrink on their own account hold back on account of their families and do not listen for the Lord's call; and, perhaps, the Good Father above is also tender toward his little ones and does not call so often as he would do if the answer did not demand a strength of faith not often found. As a rule, the number of men that will yield to temptation is proportioned to the force of the temptation; nor is it desirable that all should be tried to the utmost of their endurance. The early days of reform are heroic days, but as the reform advances the cross and burden should grow lighter and the yoke more easy to bear. Why should not the Christian who has means say to his brother, poor in purse but rich in faith, "Let us unite our gifts and together do the work of the Lord, thou with tongue and I with hand, so that much good may be effected." If a number should be found of one mind and freely unite to the same end, how would the principle differ? All aim at one object and all are doubly blest in the exercise of brotherly love and confidence. Evil appears only when selfishness, pride, or assumption mars the harmony of the body of which all are fellow members. When distrust and bargaining take the place of mutual trust and affection, clouds begin to gather and the wintry winds break forth, and the frosts destroy the tender plant. The perfect law of love is all that is needed to make the path of duty in this important matter plain.

At the same time I would say to those who desire more freedom to do the higher works of faith, "Covet no man's gold or apparel." In religion, the quality of the service is of more importance than the amount. Spiritually, the widow's mite is often more valuable than the abundant words of the learned. Religion suffers oftener from too much than from too little talking, though frequently from both. The weakness of men is so great and their willingness to let others do their part so prevailing, the temptations are so numerous and the tendency to lower the Christian standard so strong, that all who can do a wholly voluntary service are to be congratulated. Still it is not independence or comfort that a Christian should seek, but the kingdom of God and the good of his fellow-men. EDWARD RYDER.

Brewster, N. Y., 1st mo. 20.

[Our correspondent above, formerly a frequent contributor to THE JOURNAL, and occasionally, later, to the united paper, writes so clearly and intelligently, and says so many things with which we agree, that we publish his paper, but desire to reserve the understanding that we do not follow him at all points. For example, his logic seems lame between his demonstrations, at the outset that the true minister must be divinely called, and his assertion, later, that "that which effects the most good is the best minis-

try." Can we think that a minister not properly qualified can effect more "good" and therefore be better than one who is truly sent?—EDS. INTELLIGENCER AND JOURNAL.]

SCRIPTURE LESSON, No. 6.

SECOND MONTH 10, 1889.

THE FIERCE DEMONIAK.

GOLDEN TEXT:—"Go to thy house unto thy friends, and tell them how great things the Lord hath done for thee, and how he had mercy on thee."—Mark 5:19.

READ Mark 5:1-20.

Our lesson is another illustration of the Divine love over the fiercest and most ferocious of human passions, when it is exercised under the sanction and through the agency of the divine word, spoken with the authority that our Heavenly Father bestows. It avails nothing for us to go into the particulars of this curious story, which by many earnest seekers after truth has been and still is regarded as an allegory. That it can be explained on probable natural causes, does not lessen the interest in the cure effected by Jesus. The man was evidently suffering one of the worst forms of insanity—a raving mania, dwelling apart from his family and friends. In those early times physicians were scarce, and their knowledge of disease was very limited; there was no classification, and no asylum in which to "minister to a mind diseased." We cannot be too thankful for the privilege of living in an age of great inquiry and investigation, when we need not be ignorant of many things that were among the mysteries of ancient times.

To the country of the *Gerasenes*, called in the old version the *Gadarenes*. This was a border region belonging to Palestine, largely peopled by the Gentiles living adjacent to the eastern boundary. They were a mixed race, not adhering to the Hebrew religion, as the raising of vast herds of swine gives evidence; that animal being unclean according to the Law, and never eaten by the Jews.

There met him out of the tombs, etc. As there was no place provided for such cases, they were often found among the tombs, where they were not brought into contact with their fellow-men, and were sheltered from the inclemency of the weather. The whole thought fills one with pity, and we are not surprised that Jesus's compassion was moved toward the poor outcast.

Worshipped him. Bowed down before Jesus in the attitude of worship.

Come forth. This was the answer Jesus gave, and it was all that the case needed. Our Heavenly Father in his helpfulness to his human children never goes beyond the need, and herein is a lesson that we may make profitable, in the dispensing of our gifts to meet the necessity and no more and leave the individual an occasion of self help, while a superfluity in giving robs him of the stimulus to effort.

Clothed and in his right mind. This is what the restoration did for him. The Divine Power operating upon the soul of the most debased sinner, will, if obeyed, transform him into a willing follower of the Divine Master. "No man is in his right mind until he finds his true centre in God."

Depart from our coasts. The great destruction of the swine which is connected with this circumstance, made the people unwilling that Jesus should remain. They were more anxious about their worldly possessions than they were to hear Jesus.

Often the lesson we must learn is mercy, not justice. It seems so natural to feel that the evil doer must bear, and should bear, the whole weight of suffering that his evil deed has caused. But the whole testimony of the teaching of Jesus is on the side of mercy. After repentance for sin is shown, the great Father is ever ready to receive his children with love and mercy. The parable of the Prodigal Son, of the Lost Piece of Silver, of the Lost Sheep, the story of Mary Magdalene, of the Woman taken in Adultery, and so many, many more all go to show the mercy which Jesus constantly taught to be one of the attributes of God. Not stern justice, and a turning away from the sinner, but a merciful reception of the repentant one, was his constant theme.

If God can forgive and show mercy, what are we that we should be stern and severe to our fellow-creatures? Can we not try to forgive till seventy times seven, if necessary?

When we know of one who has offended, let us try to consider the trials and temptations to which he has been subjected; let us try to look with charity upon the physical disabilities, or mental weakness, or the inherited tendencies that made it easy for him to sin. An aged grandmother, now passed from works to rewards, when hearing any one remark: "Well, they deserve to suffer; they brought it all on themselves," would quietly reply, "My dear, that makes it all the harder to bear."

"When thy gaze

Turns in on thine own soul, be most severe,
But when it falls upon a fellow-man,
Let kindness overrule it."

For Friends' Intelligencer and Journal.

ASPIRATION.

"A word fitly spoken is like apples of gold in pictures of silver." So say careful observers, wise in application, clear in judgment, and judicious in choice;—each one in its right place, the principal motive being that the subject treated be made clear to the reader, ever aiming to convey truth in its best form. O, may the spoken word not be so prolix as to confuse the hearer! May the prayer ever rise in the heart of us who are called into public; Guide me, O my Father, by thy Holy Spirit, in word and deed, that I may not the work assigned me. Make me fruitful in the field of offering, and joyful in the house of prayer.

SARAH HUNT.

A LITTLE bit of Patience,

Often makes the sunshine come,

And a little bit of Love

Makes a very happy home.

A little bit of Hope

Makes a rainy day look gay,

And a little bit of Charity

Makes glad a weary way.

COURTESY.

THE old apostolic injunction, "Be courteous," can scarcely be regarded as improved by the newer rendering. It stands in our King James' edition of the Bible among the homely truths and requisitions of earnest men whose hearts were in the work of building up a homogeneous Christian Society gathered from all classes and conditions of life, among whom, from their own testimony, "Not many wise,—not many learned," were to be found. It seems to be the one fine touch of social manners that could be insisted upon as not incompatible with the solid foundation of substantial worth, upon which all nations, tongues, and peoples could stand firmly together.

The word from its derivations might seem to suggest a life not in accord with the simplicity of the Gospel, which these chosen apostles preached. To be courteous,—to conform the manners to courtly usages, savors of flattery and undue deference,—a leaning towards class distinctions, incompatible with the religion of Christ. Dr. O. W. Holmes expresses a thought that comes in just here, and is worth making a rule of conduct. He says, "The nearer you come into relation with a person the more necessary do tact and courtesy become." Civil, obliging, well-bred, of condescending manners, are some of the definitions which its observance implies. All of these are in harmony with the lessons of the Great Teacher, and with what is written of his own social life. We can scarcely associate his name with any other thought than is implied in the term "be courteous." The precepts he enunciated as the rule of conduct of those who accepted him as a teacher are all in consonance therewith. There is nothing in our intercourse with those who claim to be his disciples that seems more incongruous than a want of courtesy.

The rudest and most uncivilized peoples to whom the first missionaries of the Gospel carried its glad tidings, were touched and softened by its message of love and good-will and, while slow to yield to its influence, a growth was begun in the direction to which it pointed, that has leavened the entire social fabric, until throughout our whole Christian civilization the preponderance is on the side of all those qualities of heart and mind that vitalize the human-

ities. How sweetly persuasive are the words of the scholarly but devout Paul in his letter to the converts gathered from among the cultured Ephesians, "Be ye kind one to another, tender-hearted, forgiving one another," citing as an incentive the example of the Heavenly Father, who, because of the compassion and tenderness of the Christ willingly forgives all who are influenced by the Christ-Spirit. He writes again, to the Romans, "In love of the brethren be tenderly affectioned one to another; in honor preferring one another."

These are lessons that can never grow old. Each generation, as it comes upon the stage of action, finds the need of their teaching. Long before, however, as little children in the nursery and in the school-room, the foundation must be laid. Children who are taught to be respectful and obliging, to treat with deference those to whom they are indebted for any favor, and to be ever ready to confer the same, will not find it a difficult task to be courteous and obliging in the years that follow.

Good manners and the usages of society require as much from all who take a part in the varied interests and amenities of life, and our Christian profession emphasizes the duty of courtesy, not only towards those with whom we are religiously associated, but to every one with whom we have social relations.

MARRIAGES.

BAKER—WHITE.—At the residence of the bride, near West Chester, Pa., on First month 19th, 1889, by the order of the Society of Friends, Dr. Alfred L. Baker and Anna Bradley White, both of East Bradford, Chester county, Pa.

EVES—HORNER.—Near Harrisonville, N. J., Twelfth month 19th, 1888, under the care of Pilesgrove Monthly Meeting, Hiram P. Eves, V. M. D., of Wilmington, Del., son of Wm. and Letitia Eves, of Delaware county, Pa., and Mary H., daughter of George and Emma A. Horner.

PANCOAST—COLLINS.—At the residence of the bride's parents, First month 17th, 1889, under the care of Chester Monthly Meeting of Friends, Thomas J. Pancoast, son of Josiah D. and Sarah M. Pancoast, and Katharine R. Collins, daughter of John S. and Rachel A. Collins, all of Moorestown, Burlington county, New Jersey.

DEATHS.

BARNETT.—In West Philadelphia, First month 21st, 1889, Hannah H., wife of Daniel P. Barnett, aged 62 years.

CHILD.—First month 7th, 1889, Richard S. Child, Sr., in his 75th year; a member of the Monthly Meeting of Friends of Philadelphia, held at Spruce street.

COATES.—At her residence, near Oxford Pa., on Seventh-day, First month 5th, 1888, Eliza Coates, in the 75th year of her age.

From the teachings of her life we feel that the living may draw lessons of profit. As a wife and mother she believed that her first duty was the care of her home and the proper training of her children; but she was not unmindful of the claims of others less fortunate or less provident than herself.

She was faithful in her attendance of meetings, when her strength permitted, but was not so active in this work as some others—believing that the example of a practical Christian life would be of more value to her children and those around her than any form or ceremony could be.

She looked upon her home as her garden, which had the first claim on her thought and attention, and that no amount of labor in other fields would atone for neglect of its responsibilities.

The daughter of George and Lydia Bernard Darlington, she inherited a share of that clearness of perception and promptness in action shown by others of her family. One incident in her life exhibits this quality very clearly.

In the celebrated Parker kidnaping case it was largely through her counsel and influence that a pursuing party was organized, and by following plans suggested by her the girl was found in a slave pen in Baltimore, and by due process of law lodged in jail for trial. This case was one of the few, if not the only one, where such a victim was able to sustain her claim to freedom before the courts in a Southern State. She has since shown her grateful appreciation of this act by thirty years of faithful service in the family of her friend and benefactor.

By unusual caution and forethought the frail body was preserved through a long and busy life, and as failing strength showed that care and prudence would not much longer avail, she was calm and cheerful in contemplating the future. As was befitting the close of such a life, her end came without suffering or disease. The physical gave out, and the spirit returned to Him who gave it.

II.

JONES.—In West Philadelphia. First month 24th, 1889, Mary E., aged 4 months, daughter of Samuel and Anna G. Jones, members of the Monthly Meeting of Friends held at Green Street, Philadelphia.

OGDEN.—At Mickleton, N. J., First month 23d, 1889, Anna V., daughter of William M. and Rebecca V. Ogden, aged 19 years and 3 months, a member of Upper Greenwich Preparative Meeting.

Hers was naturally a quiet, reserved manner, and perhaps to many unattractive, but to those who knew her truly she showed a warm, affectionate disposition. She was a good, conscientious girl. May we all profit by following her good example.

R. L.

SAILER.—At the residence of her son-in-law, Keesbey Pancoast, Camden, N. J., Twelfth month 10th, 1888, Hannah, widow of Thomas Sailer, M. D., in her 79th year. Interment at Fair Hill.

WEBSTER.—On Third-day morning, Twelfth month 18th, 1888, of pneumonia, Sarah M. Webster, in her 75th year; an elder of Chester Monthly Meeting of Friends, Penna.

A VISIT TO THE BIRTH-PLACE OF GEORGE FOX.¹

In that Journal which Sir James Mackintosh says is one of the most extraordinary and instructive documents in the world, which no reader of competent judgment can peruse without revering the virtue of its writer, George Fox, says of himself: "I was born in the month called July, in the year 1624, at Drayton-in-the-Clay, in Leicestershire. My father's name was Christopher Fox. He was by profession a

¹At the meeting of the Historical Society of Pennsylvania, on the 11th instant, Dr. Jas. J. Levick read a paper describing his visits, last summer, to the birth-place of George Fox, Drayton, in Leicestershire, and to Swarthmore Hall. The account of the former visit is here presented.

weaver, an honest man, and there was a seed of God in him. My mother was an upright woman; her maiden name was Lago, of the family of the Lagos, and of the stock of the martyrs." Twenty-five years later, in the year 1649, it is written in the same journal:—"from Coventry I went to a place called Atherstone, and it being their lecture day I was moved to go to their chappel to speak to the priests and the people, and they were generally pretty quiet; only some few raged, and would have had my relations to have bound me. I declared to them largely how God was come to teach his people himself, and to bring them off from all their man-made teachers to hear his Son. And some were convinced there."

Two hundred and thirty-nine years later, the railway train brought me by Coventry to this same Atherstone—a little town, distant from Birmingham about twenty-one miles. Some friends at Birmingham, where I was passing a day or two, learning that I wished to visit the birth-place of George Fox, had kindly marked out the route for me. So I left Birmingham at 9.10 a. m., having bought my ticket for Atherstone. At Coventry, that quaint old town, we changed trains, and went on to Nuneaton—another old town, famous for the manufacture of ribbons, and situate on the direct line of railway travel from Liverpool to London; thence to Atherstone. I did not ask for "Drayton-in-the-Clay," as this name is now unknown, but I found there were few of my fellow-travelers who could tell the exact situation of *Fenny Drayton*, as the birth-place of George Fox is now called. But I followed the route marked down for me at Birmingham to Atherstone, and learned there that a drive of four miles from Atherstone would bring me to Fenny-Drayton.

Just in the rear, or perhaps more properly, just opposite the station, is a neat little inn—"The White Hart"—and here I found a bright, pleasant landlady, upon whom, as usual in these English inns, the duties of the house devolved. I told her I was a Philadelphian, a Friend, and that I could not go home without seeing the birth-place of George Fox. She entered at once into my wishes, but, as is too often the case, when they are wanted, all the "traps" and their drivers were out for the morning. Seeing how disappointed I was, she brought her womanly wits to work, and after a short absence came to me with the information that her husband had a pony which he valued very much, and which he did not hire, but which, under the circumstances, she thought he would be willing for me to have if a driver could be found. I am used to horses, but I was not used to the road to Drayton. Fortunately, a young man happened to come in,—and, to make a short story of it, in a little while we were driving through the high street of Atherstone.

The pony, which my driver told me was the fastest trotter in the neighborhood, and could go over a five-bar fence without difficulty, did credit to his reputation. He fairly dashed along, while the youthful Atherstonians, to whom he seemed no stranger, cheered him as he passed them. Fortunately, the weather was, for the hour, perfect; it had rained

early in the morning, and it rained again in the afternoon, as it had done every day for a month or more; but, for my visit, nothing could be more favorable. Like all English highways, the road was excellent. It is the old road made by the Romans, and it does credit to them and to those who have cared for it after them. In a little while—too soon it seemed to me, so enjoyable was the drive—we were at Fenny-Drayton. As we drove away from "The White Hart," my kind hostess called out, "You must be sure to see the monument," and so my driver, an intelligent young fellow, at once drove to George Fox's monument, of the existence of which, up to this visit, I had been ignorant.

It is a plain pyramidal shaft, of light colored stone, twelve or fifteen feet in height, having this inscription:

TO THE MEMORY OF GEORGE FOX,
THE FOUNDER OF THE SOCIETY OF FRIENDS.

Born near this spot—Fenny-Drayton,

A. D. 1624. Died A. D. 1690,

And was interred in Bunhill Fields

Burial Ground, London.

Erected 1872.

It is placed close by the roadside, in a pretty little grove of oak trees, and near it were growing bushes of hawthorn and the rose. The monument, I was told, was erected by a gentleman named Bracebridge, himself not a Friend, but an admirer of George Fox. He was the last representative of a family who held the Lindley Hall estate, which includes all the parish of Drayton. The estate is said to be charged by him with £5 per annum to care for the monument.

Across the field, opposite, are two brick houses, built together, in one of which, it is said, George Fox was born. They are three stories high—plain, unpretending buildings, with floors of brick, and deep, old-fashioned fire-places. The people living in them were simple cottagers, who had, however, heard of George Fox—the Quaker.

Then we drove to the Rectory of the parish church to which George Fox's parents belonged. The Rector was not at home; but a clergyman acting as a substitute was very kind, and gave me every facility for seeing the church building itself. This is very old—the doorway is said to be Norman. There are many old tombstones in the chancel, and an elaborate monument of recumbent figures at the side of the aisle. On one the inscription was rather an odd one, saying that he to whom this was erected had *for forty years suffered from the gout*, and that his age (or the age of the gout, it was not quite clear) rendered vain all medical skill!

Here for many years Christopher and Mary Fox had worshipped; here their grave and thoughtful boy—grave and staid far beyond his years—sat and pondered over the mysteries of life, and perchance, his own mysterious future. The old walls, with the same tablets, the tombs which were here two, and even three centuries ago, are here now, but whatever there may have been in the olden time, there are no pews here now, but plain rush-seated chairs, which the poorest may freely occupy.

I shall always retain pleasing recollections of my

visit to Fenny-Drayton, but why it is called *Fenny* I cannot imagine; I certainly saw no fen or marsh near it. It is indeed a small hamlet with a few houses widely scattered,—very rural, very pretty, and in the heart of beautiful England.

The long-continued rains had made the grass luxuriant in its growth, and it seemed to fairly rejoice in the unvoiced sun-bine. There are noble trees and pleasant lanes in this, "my own country," as George Fox calls it; but where, as he tells us, "in great sorrow and trouble I walked many nights by myself." The very sheep in the fields seemed as though they might be the lineal descendants of the flocks he had tended, and I felt largely repaid for the effort I had made to find and to visit the birth-place of him of whom our great founder, William Penn, his younger friend and associate, has written: "*Many sons have done virtuously in this day, but thou, dear George, excellest them all.*"

Our little rat of a pony brought us back in a hurry to Atherstone, scarcely giving us time to see the old church building of Mancetter, where young George Fox had once vainly gone for counsel. As we drove through the street of Atherstone my attention was arrested by familiar names on the houses and the shop windows,—*Underhill, Pickering, Sawery*, and, on one of them, the name of *Fox*. I made careful inquiry, but failed to find anyone who could trace his ancestry back to "righteous Christer."

A pleasing surprise awaited me on my return to "The White Hart." It was not yet quite time for luncheon, and, in the coffee-room, on the table, I found a large Encyclopædia open at the biography of George Fox! There was not much in it with which I was not familiar, but it was deeply interesting to me to be thus reading it close by his birth-place, and in the very street, if not the very house, where as a boy he had often visited.

My host of "The White Hart" was now at home, and gave me much interesting local information. From him I learned that Mancetter had witnessed, some centuries before, the execution of Christian martyrs. I wondered then, and I wonder now, if this was "the stock of martyrs" to which Mary Fox belonged.

A little later in the day we had such a good luncheon served, and so nicely served, that I cannot but recommend those of my friends who may make a pilgrimage to Fenny-Drayton, to stop, as I did, at "The White Hart" inn, even though it may not be the greatest house of its kind in Atherstone.

NEWS OF FRIENDS.

WESTBURY QUARTERLY MEETING.

This meeting was held in New York, First month 26th. The large meeting-house on Rutherford Place was well filled by the members of the meeting and many Friends from other quarterly meetings who were in attendance. The meeting for worship was opened by a brief supplication by Robert S. Haviland. There were also addresses by Charles M. Robinson, Isaac Hicks, Robert S. Haviland, Thomas Foulke, and others. The remarks covered a considerable range of Christian testimonies, prominent among which was the exhortation to maintain the

established order of our meetings, and not to be discouraged if the meetings are small and silent. We shall know the will of God by getting into stillness and listening to the still small voice that speaks in the soul. We should remember that our meetings are not lecture seasons, and should not expect carefully prepared sermons.

In the meeting for business the committee in charge of the educational fund of the Quarterly Meeting made a report, and was continued. The five queries to be considered at this time were read, with their answers. The Query in regard to plainness and simplicity called forth an earnest exercise from several Friends that we should not allow the testimony to degenerate into a traditional formality. We should adopt in dress a style that is simple and avoid needless expense; but not encourage the wearing of any particular shape of garment.

In the afternoon there was a meeting of the Yearly Meeting's Committee on Philanthropic Labor. The attendance was large, and a lively interest was shown in each of the subjects brought to the consideration of the Committee.

The sub-Committee on Temperance reported that conferences had been held which were beneficial especially in the direction of bringing more prominently before the public our testimony in relation to this important subject. One of our quarterly meetings, Shrewsbury and Railway, has a standing committee on the subject which has held a conference at the close of each meeting. Purchase Quarterly Meeting also maintained a standing committee. The recommendations of the Executive Committee of the Union for Philanthropic Labor were presented and read. Each branch of the recommendations was referred to the sub-committee having charge of the special subject.

The sub-committee on Arbitration presented an account of the visit to Washington that its delegation made in company with representatives from New York Yearly Meeting and from the Baltimore Yearly Meeting's Committee. (A narrative of this visit was published last summer in the INTELLIGENCER AND JOURNAL.)

William M. Jackson, chairman of the Sub-Committee on the Education of the Colored People of the South, described the character of the work carried on at Aiken and Mount Pleasant schools, and spoke of the means employed by New York Friends to aid those that have consecrated themselves to this work.

Stephen R. Hicks recalled the minutes that were contained in the records of early quarterly meetings stating the number of pounds, shillings, and pence that were contributed by the Friends in attendance, for furthering benevolent and charitable works. He expressed the opinion that it is desirable to renew this ancient custom, and named the work of aiding the schools in the South as a proper channel into which these contributions be directed.

Aaron M. Powell directed attention to the prospect that, at the session of the new Congress, probably to be held in a few months, the measure originated and advocated by Senator Blair of New Hamp-

shire, providing for National Aid to Education, would be urged upon the consideration of the law-making power. He asked that Friends be active in the exercise of their influence in behalf of this important and valuable measure.

The consideration of the subject of Prison Reform showed that there are many directions in which the work of Friends is called for. The unfortunate condition of idleness existing in the prisons of the State of New York in consequence of the recent passage of the Yate's bill, which forbids the sale of the products of convict labor, calls for active work in securing the early repeal of the law. Influence is also needed in favor of securing a separate prison for the detention of women convicts of New York City and Brooklyn, and in enforcing the law lately passed for the appointment of matrons in police stations.

While the consideration of the other subjects comprised within the range of the Committee's work was not extended; it was shown, in the brief time that could be given, that no subject referred to a sub-committee failed of earnest consideration and timely labor as the opportunity was presented.

J. M. C.

SWARTHMORE NOTES.

THE engineering students in the senior and junior classes went to Phoenixville on last Fourth-day afternoon and inspected the great iron works there. They were accompanied by Professor Arthur Beardsley and had an interesting and instructive trip.

—Dr. John K. Shell, the director of Physical Culture, is giving excellent satisfaction in his work with the boys. While athletics at Swarthmore are well regulated, and are not carried to the extremes characteristic of some institutions, the college has a high standard and is much respected in athletic circles. The motto of the college Athletic Association, "*Mens sana in corpore sano*,"—a sound mind in a sound body,—well expresses the aims and ends of the athletics at Swarthmore. Besides three hours of required exercise in the gymnasium each week, the young men in special training take bi-weekly runs over the country, which are very beneficial to them.

—Margaretta Walton addressed the meeting on First-day, and appeared in supplication.

—Professor Seymour of Yale College, the Secretary of the Association of Colleges contributing to the support of the American School of Classical Studies at Athens, has invited Swarthmore to join in the work. Only about twenty of the best colleges and universities in the country hold membership in the association, and the invitation to join is a compliment to Swarthmore. Professor Appleton, whose connection with Greek literature naturally interests him in the project, is making efforts to enlist the college in the association as he considers that it would incidentally be of advantage for Swarthmore to do so.

—Professor Ferris W. Price, having been granted a year's leave of absence, will start for a year's study in Europe shortly after Commencement, in Sixth month. He will make his headquarters with his

family at Leipsic, Germany, but he expects to travel in that country and England.

—On Seventh-day evening the students held a very pleasant college reception, which was attended by nearly all of the members of the college classes and several of the Faculty. An agreeable innovation was introduced in the shape of attractive little cards, dividing the time of the reception into periods of a few minutes each, and the spaces were to be filled out with the names of conversational partners for the evening. These cards were an idea of the committee in charge, and were given to each guest. They caused a pleasant variety and prevented too much monopoly of attentions, also making interesting souvenirs of the occasion.

—Dr. William C. Day, Professor of Chemistry, contributed several valuable articles to the recently issued reports of the U. S. Geological Survey. Dr. Day has recently been elected Secretary of the Chemical Division of the Franklin Institution, Philadelphia.

ORTHODOX FRIENDS.

In his paper in the *Friends' Quarterly Review* (republished in this journal), Edward Grubb says of "modern Quakerism" that it "hesitates to say, even if it does not deny" that the "Light Within" is a gift to all men. By "modern Quakerism" he means, of course, that of the English body, and of the Friends in the United States whom it recognizes. The *Western Friend*, (Wilbur) commenting upon this statement, says that "modern Quakerism" does deny the principle of the Light Within, "and has laid down meetings and has disqualified ministers for service because they believed it."

Friends' Review says: "The bane now threatening us is the adoption and carrying out of the idea of *clergy and laity*; there is no Quakerism, no primitive Christianity in this."

The *Western Friend* (issued at Varck, Kansas, by Cyrus B. Harvey), in its issue for Twelfth month, appeals to those interested in its publication to make some exertion to maintain its subscription list. It has been issued nine years, and is the organ in the West of those who have withdrawn from the revivalling Orthodox bodies. In the course of the article it says: "No doubt we have often erred, but we can say in truth, that from first to last, we have always said just that which we believed ought to be said, entirely independent of the thought of whether it would be approved by friend or enemy. In several cases, this course has lost us the support of 'influential' Friends, who made their contributions and support contingent upon conformity to their individual views. We have preferred the loss of these, rather than the freedom of the *Western Friend*; and the steady support of more than a thousand Friends for eight years is a gratifying evidence that far the larger part of our conservative Friends approve of this untrammelled course. But our greatest loss is by death. As the death roll grows longer it becomes

more and more apparent that their places on our subscription book can hardly be filled by new names."

The *Christian Worker*, of Chicago (Revivalist), in its issue of First month 24, says: "Gospel work in Iowa has assumed large proportions; a great number of meetings are in progress. Our business letters and private letters, the many straws as well as the more powerful evidences, show that the yearly meeting is remarkably active in soul saving service, by both evangelistic work and the settlement of pastors."

A TRIBUTE TO MARY L. ROBERTS.

EDITORS INTELLIGENCER AND JOURNAL:

IN the departure of Mary L. Roberts (whose death occurred Sixth month 18th, 1888, and was then noted in the INTELLIGENCER AND JOURNAL), I am carried back half a century to the time I entered her city home a boy from the country, a stranger with neither friends nor relatives. She and her husband, B. Rush Roberts, had been recently married, and she at that time was even more afflicted than in after life, requiring constant watchfulness on his part. Seldom have I met a couple presenting evidence of a more loving, and congenial, or more unselfish attachment for each other; it may truly be said they were one in spirit. During my stay with them, and it lasted several years, none but the kindest words ever passed their lips,—and it is the home, with its daily and hourly communications, that reveals the true characters of men and women.

At this time their means were limited, but they were so perfectly united in view that everything worked nicely, and both made every effort to make their visitors comfortable, and they were many, for a meal was seldom eaten without the presence of friends, who were treated in a manner that nothing but genuine hospitality could dictate. Especially at quarterly and yearly meeting times Friends always found an open house with the best their means permitted and kind thought suggested, at their service. Young as I was, I could not help observing the contrast between this home and too many others, and this was most forcibly impressed upon me, and I have often said the few good qualities I possessed could be traced to their example. From the time I entered their house, a perfect stranger, I felt at home and happy, nor can I recall a single incident that gave me the slightest pain. In the years that have since followed, scarcely a day passes that I do not recur with pleasure to my life there, recalling many a pleasant incident prompted by her kindly thought for her family.

It is useless for me to refer to her great value in the Society of Friends, of which she was a devoted member as well as her husband; all who knew them know it, but as she often said, I was one of her boys, and I cannot pass her death by without some expression of my regard. Friends, relatives, and the public have lost in her one not to be easily replaced.

A. P. SHARP.

Baltimore, First month 15.

AN IMPORTANT CORRECTION.

EDITORS INTELLIGENCER AND JOURNAL:

IN the article on the "Objects and Methods of Work of the Young Friends' Association," published in the last issue, there are two slight errors which I desire to correct.

In reference to the membership of the new organization I am made to say (in regard to young Friends) that we want "those inside the strict line of membership." It might be inferred from this that we wanted those *only*. What I intended to say (and what was probably in part overlooked by the typographer) was that "we want those outside, as well as those inside the strict line of membership." It is not the intention to limit membership strictly to members of the Society of Friends. While those interested in the new Association desire that all Friends, both old and young, should join it and aid in its proposed work, it is also hoped that all who approve of its objects, and are in any way interested in the Society of Friends may also become active members.

The work referred to in the published article as "Tanney's History of the Society of Friends" should of course be "Janney's History,"—a typographical error.

Very respectfully,

ISAAC ROBERTS.

Norristown, Pa.

EXPERIENCES OF PIONEER LIFE IN CANADA.

[Samuel Haight, of Yarmouth, Canada, a Friend well known and esteemed there, has contributed to *Young Friends' Review* his recollections of the pioneer days in Canada, seventy years ago. They contain many details of a personal nature, but these serve to make the account more vivid and real. It will be interesting, we think, to our readers generally, as well as those of the northern communities.—EDS. INTELLIGENCER AND JOURNAL.]

I HAVE had it on my mind to write, from personal recollections, a brief narrative of the various trials and afflictions as well as of the joys and blessings of my parents and their family, from the spring of 1817, at which date my father and mother moved from Westchester Co., N. Y., with nine of their children, viz: Daniel, Mary, James, Rebecca, Esther, Reuben, Samuel, Ephraim and Hannah, leaving my eldest sister, Phebe, married to Henry Powell, and settled in Poughkeepsie, N. Y. My parents' names were Reuben and Sarah Haight, formerly Wright. Father bought 1,000 acres of land, mostly pine land, with a small grist and saw mill, also a carding and jolting mill, located where it is now called Otterville in South Norwich. At that time there was a scarcity of provisions, and prices were very high, and my father commenced building a grist mill and making improvements, which caused a large outlay, and very hard labor almost day and night, until a reaction took place in prices, which caused him in 1820, to turn everything over to his creditors. At that time the assets were more than the liabilities, but the creditors hoping to realize more, kept the property for a time, but it declined in value, and was disposed of without satisfying their claims. There is a grist mill now

standing on the same site—a monument of remembrance of their losses and trials.

A little prior to 1820, John Moore and Elias Moore had located and settled on lands in the Township of Yarmouth. They were special friends of my father's and had bought a lease from Government of a clergy Reserve lot in the Township for nine dollars, which they presented to father. One-seventh of the land at that time was Clergy or Crown lands which Government leased for twenty-one years at a nominal rent—the first seven years \$3.50 each year, doubling every seven years. In the spring of 1821, the said John Moore engaged Merritt Palmer and my brothers, Daniel and James, to chop and clear land on his farm on the following terms: He, John Moore, was to find team and board and they to do the work, each to have one-quarter of the crop.

Previous to Father's leaving Norwich my sister Mary was married to a young man by the name of John Weeks; this Weeks being a millwright entered into partnership with Jacob Birdsel and built a grist mill one-half mile south of what is now called Richmond, on the Otter Creek, in the Township of Bayham, in the year 1822; and in the fall of 1821 my father moved to Yarmouth, into a part of the log house owned by Isaac Moore, who was a very hospitable man. I can truthfully say that all who became acquainted with my father's situation and that of his family showed great kindness and sympathy. We now lived $1\frac{1}{2}$ miles from the lot father's lease covered, so we commenced to build a log house in the winter of 1821 and '22,—brothers Daniel and James assisting. It was one mile in a dense forest. We brought what lumber we required for flooring and window frames from Norwich, a distance of forty miles, mostly through woods almost impassable at this time. I was near twelve years old. The house was built near a tamarack swamp connected with a long black ash swale with a spring proceeding from the swamp, which made it a very favorable resort for the wolf and wild cat which seemed to think we were intruders on their domain, and during the night particularly they were heard almost without cessation, and if we look at it unselfishly we can hardly blame them. To return to my narrative, in the fall of 1822, after the crop matured on the above named John Moore's farm which was to be shared equally, my brother Daniel being very homesick, sold a hundred bushels of wheat to Elias Moore for one York shilling per bushel, to realize means to return to our relatives in Westchester Co., N. Y. I can well remember that, at that time, it was a rare thing to see a shilling for a circulating medium, we used our productions, such as 20 bushels of wheat and 15 of corn for a cow, or four bushels of wheat for 6 or 8 yards of cotton. We mostly manufactured our own clothing from flax or tow. A lady's dress of such material would outwear four or five such as we now see, and many a pair of coarse, striped linen and tow pants I have worn. A few products would demand one-quarter or one-third cash. In this way we were enabled to pay our taxes, which were very light—no court house to build, no officers to pay. The nearest court house was at Victory

village, seventy miles east. Brother Daniel returned to New York state, remaining there about one year, then came back with a one-horse wagon, old-fashioned. Elliptic springs were not known here in those days. He also brought a box of second-hand clothing for the family's use. The horse and wagon was especially to enable mother to get out to meetings, she being a public minister amongst Friends from the time I can first remember her, and father was an elder until his death. They were both birthright members. I shall never forget how rich I felt, yes, the richest day I think I ever experienced, when we received the box of second-hand clothing and the one-horse wagon, donated by our relatives.

In the spring of 1822, sister Mary was taken sick at the Otter, near Richmond, and mother was there waiting upon her. I remember of going with a horse to bring her home—walking a part of the way and sometimes riding on the horse behind mother. Mary was soon after brought home and died of consumption the 7th of 11th mo. 1822, aged 23 years, 2 months and 17 days. Her husband came and was with her until she died. She left one child named Phebe. In 1823, I cannot say in which month, father's creditors appeared to justify themselves in sending officials to take whatever they found worth taking, and also took my father or rather left him with the promise that he would meet them at a designated place on Talbot street, as they told him they could not bear to see him part with his family. He met them as agreed upon, and was nearly two years in Victory jail, at Long Point. At that time imprisonment for debt was lawful, even for a very small debt. He did not remain very long in close confinement before there were bondsmen offered to bail him out on limits. I have often heard him relate that there was a school in the village, and there was a report circulated that there was a white-headed Quaker in jail, which came to the ears of the children and excited their curiosity to see what kind of a creature it could be. Accordingly they slowly approached his room, and he mildly and pleasantly spoke to them and told them he wanted to write them some pretty verses and wished them to come again to get them and commit them to memory and recite them to him. They did as requested, and this opened the door for multiplying his friends in the village in so much that the cupboard was filled with abundance of the delicacies for the physical man. He was soon allowed as much limit as his peculiar condition admitted for his comfort. He was very expert in catching pigeons, which were very numerous then, and he furnished the neighborhood with an abundant supply. During my father's confinement in jail my mother went and stayed with him for seventeen months, during which time she had a severe attack of bilious fever. Dr. Troyer of Long Point Bay doctored her without money and without price. I trust he received his reward.

Father was given his liberty I think in the fall of 1824. During the four years previous to this we made but little progress in clearing land. Two more children had been added to the family since our leaving New York State, viz: William, born in Nor-

wich, and Sarah E., who was born in Yarmouth, both of whom were delicate. Brother Renben C., next older than myself, was always troubled with a cough, and was able to do but little. The other members of the family had to work out to get the necessaries to live, so it seemed very hard to make much progress in clearing land. In the year 1826, brother Renben was taken more poorly and departed this life the 3rd of Fourth month, 1826, aged 17 years, 10 months and 9 days, which was a great trial to all of us, especially to me, he being next older than myself.

The following year, 1827, brother James took the horse and the one-horse wagon that our friends had sent us, and took mother back to visit her friends in New York. While there James went to one of his uncles who was a hatter by trade, and was put forward learning the trade. Shortly after the yearly meeting in New York, in 1828, being the time of the separation, at which they both attended, they started again for Canada, James bringing a journeyman hatter with him. He commenced the hatting business in the log shop on the same lot we occupied, and but a few rods from the house, the material for which Brother Ephraim and myself had prepared before he came, and after he came it was put together. Brother Daniel, after his return from New York State, took jobs of chopping in the neighborhood until he was taken with hemorrhage of the lungs, after which he lived only about a year, dying the 3rd of Eighth month, 1827, aged 30 years, 9 months and 22 days. My sister Rebecca had been slowly going into a decline for three or four years prior to her death, which occurred the 30th of Twelfth month, 1823, in the 24th year of her age. This sister was very dear to us, as we were deprived of all opportunity of getting school learning; she wrought hard in her delicate state of health to teach us all she could.

These were dark days to me, and I am well aware they were to other members of the family. Ephraim and myself were young, I being sixteen and Ephraim fourteen years old. Brother James found it was no place in the woods for his business, where it was hard to be found by the public, so he removed to St. Thomas, opened a shop, and carried on the manufacture of hats there, and being anxious to learn the trade, and father willing I should, I went with James in the year 1828. My sister Esther came and kept house for us in St. Thomas. This left the family still more helpless all being more or less feeble, except brother Ephraim. I was away nearly one year when father became discouraged and proposed to break up house-keeping, and he and mother go and live with brother James where he could do more in the shop than he possibly could in clearing land, leaving the other members of the family to find homes as best they could. This proposition of father's seemed to take very great hold of sister Esther's mind, and she sought some other way to pursue. She spoke to father of how hard it would be not to have a father's home to go to, even if they, the children, worked out. Father seemed willing to do anything possible to keep a home, and proposed that if I would come back he would give all up to Ephraim and myself if

we could pay for the farm, make a comfortable home for them, and some provision for the two youngest children.

James married Sarah, daughter of Isaac and Charity Carman, I think, in the spring of 1829, and sister Esther had gone home. I trust I never shall forget the conflict of mind for three days and nights before I was decided to return home. It presented itself as a duty I owed to my parents, brothers, and sisters. Brother Ephraim and myself accepted this responsibility in the year 1829, I being nineteen and Ephraim seventeen years old.

In 1832 Sister Esther was married to Merritt Palmer, and in 1834 we parted with our beloved sister Hannah, beloved by all who knew her, who died of consumption, aged nineteen years, seven months, and five days.

Thus we see the afflictions that our parents passed through as well as their children in thus having them removed in the bloom of life. I was blessed to be with them all, and enabled to help alleviate their wants, as far as poor, frail man could do, for which I have received a rich reward.

From 1834 we were blessed to be longer without serious illness in the family than for many years previous to that date. We were six in family. Ephraim and I wrought hard. One year we chopped and cleared twenty-six acres of heavy timbered land, sowed it with wheat, and fenced it. The same year we gave a job of chopping and clearing ten acres more. This we also sowed with wheat. That made quite an opening for one year.

Thus we continued until I was married, which was on the 17th of First month, 1839, to Phebe, daughter of Cornelius and Matilda Mills.

We had in possession at this time a farm of 300 acres, part paid for. This property was equally divided, also all goods and chattels except a crosscut saw, broad axe, a five-pail kettle, and a large pair of steel-yards, which both wanted occasionally. These articles are with us at the present time (1886). I then moved on my part of the farm. Father, mother, and Sarah E. remaining with Ephraim.

On the 27th of Seventh month, 1839, we were again brought into a deep baptism by the death of our sister Esther Palmer, aged 33 years, 9 months, and 23 days. My brother William not being able to do any hard work, and our brother-in-law, Henry Powell, wishing him to go as clerk, he being a merchant in Poughkeepsie, he went in the spring of 1840, remaining there about two years. Ephraim and myself had previously agreed to give him a clear deed of 50 acres of our land, by his staying with us until he was twenty-one years of age. Yet he preferred to go, and sold his land to us. On his return he lived with me one year, then married Mary Ann Taylor, daughter of Elis a and Elizabeth Taylor, and settled on a fifty-acre farm near here. My father, mother, and sister Sarah had a great desire to visit their relatives in Westchester Co., N. Y., and Ephraim and myself feeling anxious they should, though financially we were poor, we put forth every energy and succeeded in raising means for them to go. They started in the spring of 1841 and were gone over a year.

Ephraim and myself mortgaged our wheat on the ground to raise money to bring them home on their return in 1842. They remained with Ephraim until after his marriage to Elizabeth, daughter of Amasa and Phebe Chase, in 1848. After which time they lived a part of the time at my house, until father's death which took place the 2d of First month, 1851, aged 81 years, 11 months, and 29 days. He gave satisfactory evidence that he had overcome the world, and was fully prepared for the rest of the righteous.

After father's death, mother and Sarah E. moved into a house very near ours and got along nicely. Ephraim and myself furnished them with all the necessaries of life until mother's death, caused by paralysis, which carried her away in two or three days. She departed this life the 25th of Fifth month, 1853, aged 78 years and 3 months.

After mother's death Sarah E. married Randolph Johnson, who owned a farm near here, with whom she lived until his death, which occurred some years after.

Brother James, at his marriage in 1830, was very prosperous in business but became a heavy loser by endorsing papers for a company in York State, who were doing a heavy business in wheat and other produce in Canada, but who failed to redeem their papers and left him with \$40,000 of bank debts to pay. This caused him and his family a great deal of trouble and anxiety. His health was not good at the time, yet he was enabled to satisfy the banks and save a sufficiency to make himself and family comfortable up to his death which occurred on the 22d of Second month, 1877, aged 76 years and 5 months.

In 1854, sister Phebe, who married Henry Powell, who remained in Poughkeepsie over 40 years in the mercantile business, with her husband moved to Canada, and bought a farm of me, across the road from our farm. They built a house on it, but before moving into it, sold the farm, returned to Poughkeepsie, retired from business, but remained there until his death. They were in Canada about two years.

Sister Phebe, after her husband's death, lived in Poughkeepsie with her son, Henry, for many years but later moved to Brooklyn, N. Y., and there lived with her daughter, Sarah C., until her death, which took place on the morning of the 16th of Twelfth month, 1883, aged 89 years, 2 months, and 19 days.

Brother William died at his home in Union more than two years previous to this—on the 24th of First month, 1881, aged 62 years, 4 months, and 14 days.

We see how changeable and perishable are all material things, in which myself and wife have had a great share of experiences, and I trust we feel thankful to the All-Wise Father, the Sustainer and Upholder of all those who trust in and obey him, who stilled the troubled waters until there was a great calm. This Power ever did, and ever will, I am satisfied from a degree of experience, sustain and raise the desponding mind, and enable it to bear up under the most severe trials that may be meted to us, for the trial of our faith. Persuaded I am, if we faint not, there will be a deliverance experienced, that will cause the soul to rejoice even in the furnace of affliction

which burns all that is consumable until the pure life reigns victorious. Then can we kiss the Rod that chastiseth us, saying, "Thou doest all things well."

In a measure we know how to be abased, and also how to abound, to rejoice, and to mourn, but in all conditions of life we hope to rejoice that we have thus far been spared. At this time my age is seventy-six, Phebe's nearly sixty-eight. We are living on a part of the farm that was taken up by us sixty-four years ago. Brother Ephraim also remains on the other part.

I feel thankful, I trust, that I can say that all of the above relatives are in easy circumstances financially, a blessing among many other blessings that should be prized by all considerate minds, yet to be in obedience to the Author of all our sure mercies. Feeling that my sun was fast nearing the western horizon caused me to leave this tribute to the memory of my parents, brothers and sisters who have passed on a little before me, also that our descendants in after time may have some knowledge of what their predecessors passed through in their pilgrimage, and in their day and time.

JOHN G. WHITTIER.

GREAT master of the poet's art!

Surely the sources of thy powers

Lie in that true and tender heart

Whose very utterance touches ours.

For, better than thy words that glow

With sunset dyes, or noontide heat,

That count the treasures of the snow,

Or paint the blossoms at our feet,

Are those that teach the sorrowing how

To lay aside their fear, and doubt,

And in submissive love to bow

To love that passeth finding out.

And thou for such hast come to be

In every home an honored guest.—

Even from the cities by the sea,

To the broad prairies of the West.

Thy lays have cheered the humble home

Where men who prayed for freedom knelt.

And women, in their anguish dumb,

Have heard thee utter what they felt.

And thou has battled for the right

With many a brave, and trenchant word,

And shown us how the pen may fight

A mightier battle than the sword.

And therefore men, in coming years,

Shall chant thy praises loud, and long;

And women name thee through their tears

A poet, greater than his song!

But not thy strains, with courage ripe,

Nor holiest hymns, shall rank above

The rhythmic beauty of thy life.

Itself a canticle of love!

—Phebe Cary.

We know in part; the other part

Is hid in God, and only shines

In points of Glory on the heart

That moves towards him in Love's straight lines.

—Benjamin F. Larrabee.

LONGING.

THE thing we long for, that we aro
 For one transcendent moment,
 Before the Present, poor and bare,
 Can make its sneering comment.
 Still, through our paltry stir and strife,
 Glows down the wished Ideal,
 And Longing moulds in clay what Life
 Carves in the marble Real.
 To let the new life in, we know
 Desire must ope the portal;
 Perhaps the longing to be so
 Helps make the soul immortal.
 Ah! let us hope that to our praise
 Good God not only reckons
 The moments when we tread His ways,
 But when the spirit beckons,—
 That some slight good is also wrought
 Beyond self-satisfaction,
 When we are simply good in thought,
 Howe'er we fail in action.

—J. R. Lowell.

"WEST" AND "EAST."

If there is, as legend says there is, such a thing seen through Western eyes as an "eſtete East," what are its precise territorial limits? In other words, where does such an East really end and the West begin? Or, to state it still differently, at what point on the map may one, if so disposed, put one's finger confidently down and say, "Here is the spot where the eſteteſs of the arrogant East abruptly ends, and in its stead is the unexpended fecundity of a liberal, untrammelled West?" While the matter is not one that will, apparently, in the immediate future give rise to serious international complication, it is, nevertheless, of no little domestic moment, and may, at some distant day, even call for state interference and adjudication at the hands of a boundary commission, to be chosen from the impartial outlying districts in the extreme north and south.

In reality, the problem of geographical separation would be one extremely difficult to solve to the complete satisfaction of all concerned. It is, for instance, not merely a broad question between Maine and Oregon, between Eastport and Portland, or even, possibly, between New York and San Francisco. On general grounds, it might be admitted that somewhere in the intervening space the line would certainly fall. On a somewhat closer examination, however, it will be found that facts other and more minute than mere latitude and longitude must be seriously taken into consideration. It may even be not unfairly assumed that the fundamental idea of East and West itself is only relative, and cannot be thus recklessly applied. Schenectady is west of Jersey City: and we all know that Oshkosh lies far to the westward of Kalamazoo. If, in the inquiry thus set on foot, the reasons for the necessary distinction were still more closely inquired into, it might even be shown that they who have thoughtlessly used the epithet in question themselves may fall under its ban.

When the division is finally made, it must be wholly irrespective of any mere sectional prejudice,

to which it should rise superior. The West, it may be supposed, will accept the judgment joyfully; while the East, from the very nature of the case, will be sure, wherever the line is drawn, to regard it with its accustomed equanimity. Only those who, in a possible re-distribution, may now for the first time be included under the term "East" will become even a little more intolerant than they who have longer borne the name. For purely practical reasons, apart from mere sentiment, the distinction here suggested ought soon to be made. It was on the island of Grand Manan, down in the Bay of Fundy, last summer, that a comment was made upon the scarcity in the community of young people of both sexes. "How is it," we asked, "that we see so few young men and women here?" "Well," the captain replied, "a great many have married and gone west." "West?" we said. "To what part of the West?" "Well," said the captain, "mostly to Boston."—*Atlantic Monthly*.

THE SUFFRAGE RIGHT OF THE COLORED MEN.

It was alleged in a newspaper report that Senator Hoar of Massachusetts had admitted, in an interview with ex-Senator Mahone, of Virginia, that it was a mistake to allow the colored men to vote,—as by the provisions of the Fifteenth Amendment. A colored man in New York thereupon wrote to Senator Hoar, calling his attention to this interview, and the latter answered as follows:

SENATE CHAMBER,
 WASHINGTON, Dec. 31, 1888.

My Dear Sir: I have never seen the alleged interview attributed to Gen. Mahone until this moment. I have never uttered the sentiment therein attributed to me, and never entertained it in my inmost thought. I don't believe it was a mistake to make the negro a participant in the functions of the Government or to clothe him with all the rights of citizens as fully as they are vested in his white brothers. I do not believe that Gen. Mahone ever said what is attributed to him. I join with him in saying that the colored race ought not to be urging their claims to office, even if they be put on the ground of their race or color. But I am also of the opinion that the white people ought to do the same. In selecting persons for public office those who have the appointing power should have regard to personal character and to public sentiment. In recommending a candidate to the appointing power regard should be had to the same qualities, but that is equally true with whites and blacks.

If colored people are here, they are here without their fault or even their choice. They are here to abide. They and the whites, in my judgment, will live together in harmony, each contributing their share to the welfare, the greatness, and the glory of their country, if only justice and education become the standing policy of the republic. If these shall not be the standing policy of the republic it will fail, whether white men or black men compose it. The chief object of ambition for our colored fellow citizen to day is to afford as many examples as possible of

personal worth. If they are industrious, temperate, chaste, seeking to bring up their children in all household virtues, in the love of country, in the fear of God, they will command the respect of all men, and will take quietly but surely their proper place in the republic. But neither of the three great constitutional amendments was a mistake, unless the republic itself, unless divine law itself was a mistake.

I am faithfully yours,

GEO. F. HOAR.

To John E. Bruce, Esq., 102 West Eighty-seventh street, New York.

WEBB.

THE CHILDREN'S AID SOCIETY.

THE seventh annual meeting of this Society was held on 23d inst. Those present could not fail to be interested in its report which stated that the number of boys and girls in the society's care on First month 1st, 1888, was 354, since which time 370 were received. Of the total number, 383 passed out in various ways, a large number going with their mothers at service, leaving 341 at present under the Society's sheltering wing. Since its organization 1,545 boys and 1,498 girls have been left in the charge of the society.

In a more detailed notice of this meeting and of the work of this Society the *Public Ledger* says: "The Children's Aid Society announce that they have organized forty counties of the State and that others are gradually falling into line. This means that neglected children, instead of being left with improper, intemperate, or abusive parents, are likely to be removed into other families, where they are welcome and where good care is expected and required to be taken of them, so far as the supervising committees in those countries do their duty. There is a certain sort of ability for work of this kind, which, while it is rare as a gift, may almost be made contagious in its spirit. The general agent of the society, at 127 South Twelfth street, Mrs. Wilson, is considered by the Society to have great ability for the work, and communicates much of her spirit to the branch societies organized, so that capable women throughout the State soon take up the ideas requisite for carrying on the work. 'We are only limited,' writes Mrs. J. Peter Lesley, one of the early organizers of the society, 'in the undertaking for want of public appreciation and support.'

"This society does not separate young children from their mothers where the mother has any good stuff in her at all. She is encouraged to keep the little creature with her, instead of boarding it out. There are many good places where a child of the domestic is not considered in the way, and lower wages are, of course, acceptable, in view of a good home under such conditions. The Society by its local branches asserts the idea of near-home regulating of these matters. It empties the almshouses by placing young children in individual homes, and it gives a real object in life to unfortunate mothers and a chance to make themselves respectable and useful, with better prospects for the child and better chances than they themselves have had. Such a society as the Children's Aid is a good insurance against misfortune and thriftlessness by setting their protégés on their

feet, instead of leaving them dependent on the public's gifts. The public in contributing to its support is thus saved considerable of other outlays for taking care of the improvident and thriftless. It is money in the city's pocket and in the State's treasury if such societies are aided to carry out the good and large aims they so thoroughly understand."

THE SOURCE OF STRENGTH.

BEHOLD a tempest tossed sea; fierce winds sweep down upon it, its rocky shores look uninviting and its breakers perilous to yonder man in his frail boat. He is striving toward a point; how he labors, gaining no headway it seems, yet in his face there is a fixed look that shows a purpose.

As the eye scans the coast line more closely a narrow opening appears, and beyond it, a land locked bay. Here the water is calm, and upon its surface the weakest bark may ride in safety.

But see! the boat is gaining. The elements offer less resistance as the oarsman nears the point where his only refuge lies, and with trembling hand he guides his craft into the peaceful water. Here he may rest and take courage; here his strength will be renewed, and his almost nerveless hand find its power again. As we behold him silent, calm and trustful a new life is coming to him, a power that he lacked before. But does he need renewed strength for so quiet a place or is this not his scene of labor? We see that his duty lies outside, where the conflict is, and thither he must go after a brief season of helpful quiet.

When he returns to his appointed place how is it that all seems so changed? He appears to have power to say to the elements "be at peace," and his strength has grown superior to that with which he battled almost hopelessly before, so that he conquers easily. Would that every mariner on the stormy sea of life knew of the entrance to the quiet haven?

Do the mists and the fogs hide from our eyes this secluded entrance? They shall be cleared away. Does our appointed task seem greater than our strength to perform it? In the brief stillness, when the spirit goes apart, strength equal to every emergency is found. Do the waters of affliction threaten to swamp our frail craft? Turn to the inner life for consolation. No power without us is equal to that Power within, which is standing ready to help us when we appeal to it, but like the boat on the stormy sea, we must turn the head in the right direction, and, if need be, struggle to enter the narrow way in our own souls.—*Selected.*

NEWS AND OTHER GLEANINGS.

—The Friends of Rising Sun, Md. and vicinity, members of West Nottingham Particular Meeting, have organized a social circle which meets bi-weekly at the homes of the members. A late meeting was held at the home of E. R. Bullington with 31 members present, together with several visitors. The object of the Circle is to encourage literary and religious thought and cultivate our social natures by offering an opportunity for free mingling of the old and the young. The last meeting was held on the evening of the 25th ult., at the house of Ellis P. Passmore.

—A correspondent of the INTELLIGENCER AND JOURNAL, at Lumberton, N. J., sends us a paragraph to chronicle the observance, on First month 14th, of the twentieth anniversary of the marriage of Caleb and Keziah R. Wilkins. A certificate was read and signed by those present, and words of exhortation and encouragement were handed forth by Joseph Hornor and Rebecca J. Cowperthwait. A part of the evening was devoted to recitations, after which, at a seasonable hour, the company separated.

—One of the most obvious of the advantages of the electric light is that it can be put in use when a flame of gas or oil would perish from lack of oxygen. The Hoosac Tunnel, on the Fitchburg Railroad, Mass., has hitherto been unlighted, all signalling of trains being done by means of explosion of torpedoes. The tunnel is, moreover, continually full of smoke, gas, and sulphur. About a month ago, trial was made of an electric plant which will furnish the tunnel 1,200 large-sized lights. These are placed 40 feet apart on both sides, and alternating, thus making one lamp for every twenty feet. A small building at the west portal contains the engines, dynamos, and other necessary machinery.—*The American*.

—On December 25th there died at Naples the eminent statesman, Signor Mancini, formerly Prime Minister of Italy. He will be honorably remembered, also, as a principal leader in efforts for humanity. Probably no statesman of modern times has labored so perseveringly and spontaneously to incorporate the principle of International Arbitration into practical diplomacy. Mainly through his interposition, an Arbitration Clause has been inserted in about twenty Treaties concluded on various occasions between the Italian Government and other countries.

M. Mancini was also the most influential leader of the movement which has finally resulted in the total abolition of Capital Punishment in Italy.—*Herald of Peace*.

—The Babylonian expedition of the University of Pennsylvania, according to latest advices, have commenced making excavations at Bagdad in search of archeological wealth. The labors of the expedition will be limited to a month, as the hot season will commence shortly, when the rise in the river inundates the low lands and makes exploration impossible.

—The Abbe Genthal, a professor of philosophy, who died in France the other day at the age of 83 years, directed that his body should be carried to the grave by six poor men, two of whom should be Protestants, and all of whom should be fathers of families. In closing his will he exhorted his heirs and friends to practice religious toleration, for although dying in the faith of his fathers, the lessons of life had taught him that toleration toward persons of every creed was an essential condition of Christian charity.—*N. Y. Evening Post*.

—A colored woman, Mrs. Whetsel, supplies ice to St. John, New Brunswick, to the town of Carlton, and to all the great vessels and steamers in port. Her husband, in company with white men, carried on the business. He died about four years ago, and the widow could not secure a fair adjustment of affairs. With four children to support, she determined to engage in the ice business herself. She managed to get a ten-year lease on the nearest lake, built her ice house, and she is now the sole dealer in St. John, employing eight men, all white—in winter she employs sixty; runs five teams, handles over ten thousand tons of ice, and does more than a \$10,000 business annually.—*Public Ledger*.

CURRENT EVENTS.

THE want of understanding between this country and Germany concerning the course of the latter country in the Samoan Islands continues. Recent expressions by the German Chancellor, Prince Bismarck, are regarded as aggressive and not calculated to smooth the trouble.

SAMUEL M. FELTON, for many years a railroad president, and deeply interested in the steel manufacture, died at his home near Philadelphia, on the 24th ult., in his 89th year. He was the brother of Chas. C. Felton, who was President of Howard University.

IN the election, in Paris, on the 25th ult., (the first day of the week), General Boulanger, the revolutionary candidate, was elected by an immense majority, (reported at 80,000), to represent that city in the National Chamber of Deputies. This evidence of his popularity, in a contest with the present government, has caused great excitement in Paris, and created apprehension generally in Europe. A revolution of some sort, it is feared, may be impending over France.

INFORMATION has been received from Seward county, Kansas, to the effect that many of the residents are on the verge of starvation. Appeals for help have been sent to various places. Seward county is in that part of Kansas that has suffered from crop failures, and many of those who went there with little money lost their all and are now forced to appeal to the charitable for help.

THE *Farmers' Review* says that in the winter wheat belt the condition of the crop is slightly below that of the corresponding date last year. Still the returns indicate that as yet nothing serious has transpired, and that the crop condition is a good deal better than might have been expected under the circumstances.

NOTICES.

MAXIMUS.

I HOLD him great who, for love's sake,
Can give with generous, earnest will;
Yet he who takes for love's sweet sake,
I think I hold more generous still.

I bow before the noble mind
That freely some great wrong forgives;
Yet nobler is the one forgiven
Who bears that burden well and lives.

It may be hard to gain, and still
To keep a lowly, steadfast heart;
Yet he who loses has to fill
A harder and a truer part.

Glorious it is to wear the crown
Of a deserved and pure success;
He who knows how to fail has won
A crown whose lustre is not less.

Great may he be who can command
And rule with just and tender sway;
Yet is diviner wisdom taught
Better by him who can obey.

Blessed are they who die for God
And earn the martyr's crown of light;
Yet he who lives for God may be
A greater conqueror in His sight.

—*Adelaide Proctor.*

THOMAS CHALKLEY.¹

THE venerable poet Whittier, in his essay upon Thomas Ellwood, says of the journals of early Friends, "Little, it is true, can be said as a general thing of their literary merit. Their authors were plain, earnest men and women, chiefly intent upon the substance of things, and having withal a strong testimony to bear against carnal wit and outside show and ornament. Yet, even the scholar may well admire the power of certain portions of George Fox's Journal, where a strong spirit clothes its utterance in simple, downright Saxon words; the quiet and beautiful enthusiasm of Pennington; the torrent energy of Edward Burregh; the serene wisdom of Penn; the logical acuteness of Barclay; the honest truthfulness of Sewall; the wit and humor of John Roberts, (for even Quakerism had its apostolic jokers and drab-coated Robert Halls); and last, not least, the simple beauty of Woolman's Journal, the modest record of a life of good works and love."

To these we would add the Journal of Thomas Chalkley. As we turn over the pages of the old and

time-worn volume, we cannot fail to admire the uprightness of character, and the earnest zeal of this ancient worthy, whose life was spent in devotion to the work of his master.

Thomas Chalkley was born in Southwark, London, in 1675, and was carefully nurtured by pious parents at a time when the Society of Friends was still in its infancy and its members had the enthusiasm of recent converts. He had a deeply impressive religious nature, and early dedicating his talents to the church, he became an honored and acceptable minister of the gospel.

He makes this record of himself, "There was a great concern on my mind, rightly to distinguish between the voice of Christ, and the whisperings of Satan; and thus it opened to me: that Christ, the Truth, always speaketh good and for a good end, and that there is a divine life to the soul in this speaking. Keeping under this exercise, the Lord appeared to me again and many times refreshed my heart with his goodness. And when I was in my business among men, I did witness the Holy Ghost, —the Comforter—to be near me; which was more to me than all the world, or the riches, glory, and beauty of it; the love of God being so sweet to my soul and spirit, my breathings, prayers, and supplications, were to the Lord, that my neighbors, acquaintances, and relations might also partake of the like precious faith and love which I enjoyed. In this concern I felt the gospel power of our Lord Jesus Christ to work upon my soul, and the word of God was a seed in my heart, growing and opening in me, speaking to me, and making my understanding fruitful in the things of his kingdom; and in that ability which was given to me of God, through his grace and spirit, I exhorted people to repentance and amendment of life; and I always humbly desired the help and divine influence of God's external word therein.

"On the expiration of my apprenticeship, having served my father seven years, I entered more strongly into covenant with my Heavenly Father and Master, to serve him all my days, through his assistance; and was soon after drawn forth, in the Spirit and love of Christ to visit the meetings of Friends westward from London.

"After I had visited the churches of Christ in divers parts of England, and had many sweet seasons of God's love, and many good opportunities with my friends and others in this nation, and after I had been at my father's and at my calling, a little after this north-country journey, I found myself engaged in the love of the gospel to visit Friends in America;

¹ A paper read Second month 2d, 1889, in a Conference, after meeting, at 15th and Race Sts., Philadelphia, by Annie Cooper.

and having acquainted my friends and relations of my mind (they being willing to give me up) in order for the voyage, Friends of the Monthly Meeting gave me a certificate, and I had another from the meeting of ministers in London. My father, and several other Friends with me, took boat from London, and accompanied me to Gravesend, on the 21st of Tenth month, 1697, and I went on board the ship Josiah."

After a tempestuous voyage of three months in the wintry season, he and his companions found themselves within the Capes of Virginia early in the year 1698, and they immediately began their journey northward, visiting in turn Friends' meetings in Maryland, Pennsylvania, and New Jersey, going as far as Boston. He gives this account of his visit to Nantucket. "A minister (so called) had some discourse with me and asked, 'What induced me to come hither, being so young a man.' I told him that I had no other view in coming there, than the good of souls, and that I could say with the apostle that a necessity was laid upon me, and woe would be to me, if I did not preach the gospel. The chief magistrate of the island desired that I would have a meeting at his house, there being no settled meeting of Friends before I came; and after meeting he disputed about religion with me. I thought we were both poor disputants; and I cannot remember all that passed between us; he said 'I disputed with your Friends in Barbadoes, and they told me, that we must eat the spiritual flesh, and drink the spiritual blood of Christ: and,' said the governor, 'did ever any one hear of such flesh and blood; for is it not a contradiction in nature, that flesh and blood should be spiritual?' 'Oh, surely,' said I, 'the governor has forgotten himself; for what flesh and blood was that which Christ said, except ye eat my flesh, and drink my blood ye have no life in you.' 'Why,' said he, 'I do not think they were to gnaw it from his arms and shoulders.' I then told him, he had answered himself. Thus our dispute ended. And from that time forward they had a continued meeting."

Thomas Chalkley quaintly tells us of his marriage soon after his return to London from America in 1699. "I thought it my place to enter into a married state, and I acquainted my father of my design, and that I inclined to make choice of Martha Betterton, a religious young woman, whom I entirely loved for that piety, virtue, and modesty, which I beheld in her: I was in the twenty-fourth year of my age, and she in her twenty-first. I likewise acquainted her father and mother of my intentions to which both our parents consented; her father saying, when I spoke to him, go together, and the God bless you together. And my father said, if I was worth my weight in gold, she deserved me. The heartiness of both our parents in the matter was more to me than a portion of silver or gold, of which we had but very little; but our love to each other was very great, and being well and honorably grounded it was not easily shaken. So after consent of parents, we proposed our intentions of marriage to the monthly meeting to which we belonged. After twice publishing our intentions we had liberty to proceed to the solemnization of our marriage.

"Soon after I was married, I had a concern to visit Friends in the counties of Surrey, Sussex, and Kent, which I performed in about two weeks, and came home and followed my calling, and was industrious therein. When I had gotten something to bear my expenses, and settle my wife in some little business, I found an exercise on my spirit to go over to Ireland.

"After some months, I acquainted my wife and my father, with her father and mother that it was my duty to go over and live in America. To which proposal my father consented, though with tenderness of heart, considering that I must be so far separated from him. I also laid it before the monthly meeting at Horsley—down in Southwark, who consented to it, though somewhat unwilling to part with us, and gave us their certificate to let our brethren know that we were in love and unity with them and walked according to our profession. And when we were ready, and in order for going, we agreed for the freight of our goods and servants with John Suoudon, and shipped on board the Josiah."

Purchasing a lot of ground on the Delaware river, he made Philadelphia his permanent residence, and devoted himself to business; this, however, was frequently interrupted by religious visits which he felt called upon to make to the Bermudas and Barbadoes, and to meetings nearer home. In 1706, he writes: "A weighty concern came upon me to visit friends in the West Indies and some parts of Europe, as it might please the Almighty to open my way. As it was a long travel both by land and sea, and hazardous, by reason it was war time, and many privateers out at sea, I settled my affairs by will, and otherwise, that if I should not live to come home again, things relating to my outward affairs might be done honorably and well."

With the approval of his Friends at home he went to the West Indies and traveled through Great Britain and Northern Germany. The visit, embracing a period of three years, appears to have been a source of satisfaction to him. On his return he says: "I was kindly and tenderly received by my friends, who longed to see me, as I did them, and our meeting was comfortable and pleasant."

As master of a vessel, Thomas Chalkley made frequent voyages to the Bermudas, the West Indies, and Great Britain, and during these long and often perilous journeys, he felt it right to hold religious meetings regularly on shipboard and at the places of his temporary sojourn. These meetings were often interesting occasions, and we could wish he had given in his journal, details of the many incidents which must have occurred in his visits to these foreign countries.

At length, for the sake of more retirement, in 1723, he removed to a small plantation near Frankford, and established himself at Chalkley Hall. John G. Whittier, during a temporary residence in Philadelphia, in 1838, wrote an interesting poem upon this now historic place. [Several stanzas of this the speaker here recited.]

The rural life, so grateful to one whose days have been passed in activity, was soon disturbed by un-

usual misfortunes. He says: "To add to my afflictions, I lost a vessel, in which I supposed I had upwards of five hundred pounds; and another vessel came in almost a wreck, in which I suffered in my interest several hundreds more, and a third I heard of, in which I had the like loss, and about the same time I had also a good new barn burned to the ground in a few minutes, so that I was exceedingly stripped in that way; and to add yet more to my exercise, I was sorely afflicted with sickness."

Domestic afflictions, too, of no ordinary character were also his allotment. By the death of his wife and children he was left alone in early manhood. Later, he married again, and for the second time, one by one he lost his children.

In order to retrieve his fortune and to pay his debts, he commenced his sea-faring life again and went as supercargo to Barbadoes in 1727. He afterwards became master of a ship and made a number of voyages across the ocean. As he grew older he felt very keenly the separation from his family and friends. During one of his voyages he writes in his journal: "About the beginning of Eighth month, being in the latitude of Barbadoes, the thoughts of leaving my family and habitation, and many of my loving friends (as at divers other times also) made me pensive and sorrowful; but it being on a principle of justice, and sometimes meeting with the presence and goodness of God, I was enabled to do my affairs and business, and forbore to appear sorrowful as much as I possibly could, or to be of a sad countenance in the sight of men; but to Him who knows all things, and sees in secret, I poured out my soul in all my afflictions, for he only is able to help me."

The time came at last when he could sell his vessel in London, and he could say: "I settled all my affairs to general satisfaction, so far as I know, on which account I had labored for several years, and was joyful that Providence had favored me so far as to see it accomplished; so that I wholly intended to leave trading by sea, the which I never inclined to only on a principle of justice, so I was fully resolved in my mind that my creditors should be paid their just debts, though I might lose my life in the pursuit of it, about which I had no anxious guilt because I was never extravagant or indolent, but met with divers casualties by fire and water; by the latter I lost many hundred pounds for several years together."

Like other early Friends, Thomas Chalkley held enlightened views upon many reforms, which now claim the attention of the world. It is interesting to find recorded, a century and a half ago, a paragraph upon Temperance such as the following: "As I was meditating in my closet on the duty and beauty of that great virtue of temperance, it appeared very bright to the view of my mind, and the great benefit of it to those who loved and lived in it. 1st. As to religion, it tends to keep the mind in an even temper, which is a help to devotion, and the practice of religious duties. 2d. It is a great preservative of health and a good constitution. 3d. It is a blessing to posterity in many considerations. Whereas intemperance destroys the healthy constitution of

body and estate, ruins many families, brings to poverty and disgrace, and what is yet worst of all, it is a great let to religion and the true fear of God."

The remaining years of this good man's life were past in the retirement of home at Frankford, except when he was called by impressions of duty to visit the meetings of his Society in various parts of his own country. Broken in health but still strong in spirit to be about his Father's business, in the autumn of 1747 he bade farewell to his wife and daughter and set sail for the island of Tortola, one of the West Indies, carrying with him a certificate from his monthly meeting. Two weeks after his arrival on the island, he was stricken with illness, and died in a short time, aged sixty-six.

The few incidents connected with his illness and death were sent to his family by a Friend living on the island, and are appended to his interesting Journal.

INCENTIVES.¹

Necessity was man's first incentive. "In the sweat of thy face shalt thou eat bread," is the inexorable law which applies as well to the food that nourishes and sustains the mind and the spiritual life, as to that which supplies the physical structure.

Labor, effort, thought are the watchwords, and the reward becomes the incentive to toil. In whatever relates to the care and sustenance of the body,—how we shall be fed, or wherewithal we shall be clothed, social conditions enable one individual to escape or evade the law by laying additional burdens upon another, yet the law remains. Men work by proxy,—the abundance of the one becomes the motive-power to him whose want makes labor an essential factor of his human existence.

Whatever the transaction it has its equivalent; and so men toil and barter and buy and sell, in the field and workshop, and in the market-places of the world's activity, while the fulness of the gain, which is the incentive, seldom finds its way to the hands made hardest by the toil.

But this can only be said of the things that "perish with the using,"—those things that connect us with the visible creation of which we are a part and from which we cannot separate ourselves. "Made of the earth," the tenement we inhabit when it has served the purpose of its existence falls back into the atoms out of which it was constructed, to be remoulded into other forms of manifold beauty and workmanship.

The mind which dominates and controls the physical being,—through which the will and the understanding are manifested, is the true self and the true worker. By no possible device can it delegate to another its own portion of labor. Here the law is indeed inexorable. He who will not work cannot have the gain. The vast store of the world's knowledge has been gathered bit by bit through patient, persistent, individual effort,—each one makes it his own through corresponding effort; and to increase this store—to add some lasting treasure to the accumula-

¹ Paper read at the Educational Conference, under care of the Yearly Meeting's Committee, at 15th and Race streets, Philadelphia, First month 25, 1889.

tion already made—becomes the motive, the incentive to other minds to continue the labor.

This desire for knowledge is inherent in the human mind; centuries ago, it was written of the Athenians and the strangers sojourning with them, that they "spent their time in nothing else but either to tell or hear some new thing." The same is true of our own period; turn where we may, in every field of thought or effort, there is the same desire to hear, to know. The activities of the age are leading us along,—only that which is worthy to endure will stand the crucial test of the investigator. This is as true of what has been written of the relations of man to the spiritual life as of what science and philosophy have disclosed. Only as we enter into and become partakers in the world's work, can we be helped and have our own sphere of knowledge enlarged. This broad, full culture of the mind is a noble incentive, one that appeals to the finest and best qualities of the intellect, and when once awakened, will not be satisfied until some enduring gain is secured.

But do we find our highest incentives, the limit of our aspiration here, and forget that the mind, with its unbounded capacity for development, lies mid-way between that which is "of the earth" and that divine principle inbreathed by the Creative Power, through which man became a living soul? To possess,—to make our own,—to be able to say, "I know, I have investigated, have made myself familiar with the laws upon which these conclusions are based,"—these are incentives constantly urging to increased effort; and did we make the storing of the mind with the treasures of knowledge the ultimate aim and end of life, great and worthy as the acquisition might be, we would find ourselves lacking in the *one thing without which* all other possessions and attainments are unsatisfying. The learned apostle knew this from his own experience which emboldened him to write, "Though I speak with the tongue of men and of angels, . . . and understand all mysteries, and all knowledge, it profiteth me nothing without love,"—without that divine principle which regulates and controls the spirit, and brings all that is acquired,—whether in material things or in the treasures of the mind,—into harmony with the Divine Intelligence, and they become subservient to him who, as the refiner and purifier, watches for the moment when the baser elements with which the fine gold of our life is alloyed, are consumed that his own image may be reflected therefrom.

The things of the Spirit bring peace and rest to the life over which they have control; there may be poverty and little intellectual culture, but the lack of these cannot take from that life its highest and holiest incentive,—the privilege of communion with the Father of all spirits. It is this communion that transfigures common things, and makes of toil and want stepping-stones to the fulness of the Infinite.

In this three-fold existence each part has its relative place in the economy of life, and the claims of one cannot be set aside or neglected without loss to the whole. Three in one! a trinity of forces minis-

tering to the *completeness* of the whole,—finding its highest and best expression, not in the perfect workmanship of the lithe and pliant form, nor in the marvelous power, the expansive wisdom of the mind, but centering in the emotions, the affections, the aspirations, which become richer, fuller, and more abounding, as they overflow in blessings to other lives.

And inasmuch as the life of the Spirit is more than the perfections of the body,—more than the acquirements of the intellect,—it becomes of the highest importance that its training and development shall be in the direction of all that tends to build up and strengthen the mind and hold in check the appetites which if left without control can only lead to the debasement of the whole being.

It is just here that the incentive to action becomes the turning point in character. If it is pure and noble, the life will correspond; if it seeks only the things that "perish with the using," the end will be unsatisfactory and delusive.

Ambition, the greed of wealth, the thirst for intellectual culture, are all incentives that lead thought and effort into channels of activity, which too often absorb the life to the neglect of the duties that we owe to the Divine Being and to humanity. Loss, gain: these represent the two extremes; if the incentives are pure, wholesome, and ennobling, the gain is assured thirty, sixty, or an hundred-fold. If they are selfish and find their satisfaction in earthly good alone, the loss is represented in the words of the Great Teacher: "From him shall be taken away even that which he hath."

NOTES FROM PALESTINE.—IV.

BETHANY—JERICHO—THE DEAD SEA—THE JORDAN.

The traveler in the interior of Palestine is expected always to have a guard who carries fire-arms. If he neglects this, he is liable to be robbed by the natives for violating one of their time-honored customs, if not for his possessions. The government grants to different sheikhs the right of providing escorts for travelers. Accordingly, when we started on horseback from Jerusalem for a three days' excursion to the Dead Sea and the Jordan, a guard marched on foot before us, though the rusty musket which he bore on his shoulder looked as if it had not been fired for twenty years. We were attended also by a dragoman, Isa, who had made all necessary arrangements for the journey and who served us faithfully. He was assisted by a servant. They carried on their horses our provisions and such luggage as we were likely to need.

Following the road near the base of the Mount of Olives, after a short ride we came to Bethany. We met several Syrian families traveling on donkeys. Sometimes the wife rode with a child in her arms, while her husband went on foot behind. Often two hampers or wicker baskets were balanced across the donkey's back and from each peered the heads of the younger children, while the older ones walked with their parents. Their garments were not very

neat, and were thrown upon them carelessly, yet, at a distance, they looked graceful. A peasant offered us some green almonds from his orchard. They were so tender that we could eat the shell as well as the kernel, and found them very palatable.

Bethany is a poor village, with wretched houses and no drainage. We were shown there the Tomb and Tower of Lazarus, and the site of the house of Martha and Mary. We descended the tomb of Lazarus by twenty-six steps, our lighted candles serving to show how deep and dark was the cave below. The Tower, in another part of the town, is a crumbling ruin. Just beyond Bethany our route ascended a hill where Martha is said to have met Jesus when she told him of the death of Lazarus.

On our way to Jericho we passed a valley in which white camels were pasturing. We saw the site of an inn associated with the story of the Good Samaritan, and rode by the side of a deep gorge, in which flows the brook Cherith, where Elisha was fed by the ravens. After crossing the Valley of Achor, we came to the Sultan's Spring, a pretty brook flowing over rocks. It is also called Elisha's Fountain, from a tradition that this is the water which the prophet healed with salt. It is still pure and sweet. A group of Syrian girls were gathered about it, singing and dancing in honor of one of their number, who was a bride. In the vicinity of the fountain extended a range of steep cliffs, comprising a lofty peak called the "Mountain of the Temptation" or "Quarantana." This name was first given it by the Crusaders, who believed that it was the scene of Christ's Temptation and of his forty days' fast. In the rocky sides of this cliff are many small artificial caves, which from below look hardly bigger than the holes which birds make for their nests in clay-banks. These caves are large enough, however, for people to inhabit, and here many anchorites dwell, secluded from one another and from the world, and spending their time in prayer and penance.

Where once stood ancient Jericho are now only a few mounds of earth. We rode beyond, to modern Jericho, and passed the night at the Austrian Hospice. The town is a collection of squalid huts and has no buildings of interest, except an old tower, probably erected for the protection of crops from the Bedouins. It is said to be on the site of the house of Zaccheus. In the village gardens are vines on which grapes ripen abundantly.

The region about Jericho is overgrown with thorny underwood, amidst which our horses unwillingly made their way. This is partly composed of the *Zizyphus Spina Christi*, of which Christ's crown of thorns is said to have been made. The gum Arabic plant and the Balm of Gilead are found here also, the latter with fruit resembling small unripe walnuts, from which the balm is made which pilgrims buy.

The Rose of Jericho does not grow in the city of its name, but further south, on the banks of the Dead Sea. It is not like a rose, nor does it belong to the same family, but to the *Crucifera* or *Mustards*. Its stem is very short, with branches a few inches long spreading in all directions. It has a small white flower, and when in blossom presents no unusual ap-

pearance, but after it begins to ripen, the branches become hard and woody and curl inward to protect the pods containing the seeds, until the whole plant looks like a ball of curious wickerwork. Whenever it is put in water, its branches slowly unfold again and spread out as if it were living. For this reason it is sometimes called "the resurrection plant," and is brought away by travelers as a curiosity; it does not, however, resemble the evergreen moss of that name which grows in Mexico.

From the Plain of Jericho may be seen, in the distance, Mt. Nebo, whence Moses looked upon the promised land. We had a sultry ride through the desert to the Dead Sea. The ground in its vicinity was sprinkled with a fine, white, nitrous dust, a deposit from the water and vapors. The sea itself has a peculiarly dreary and desolate appearance. It lies in a deep basin, 2,601 feet below the Mediterranean level and has no outlet. It is nearly shut in by high hills, but on the north side, where we approached, it has a flat, sandy beach, opposite a small island. We were glad that we had brought our bathing-suits, and, after the heat of the sun, found the water refreshing. It felt smooth and oily and was pleasant to float in, but not as easy for swimming, as our feet were continually borne to the surface by its buoyancy. Indeed, it was difficult to regain them when we wished to stand. The water has a very bitter taste, it contains 25 per cent. of solid substances, one-half of which is chloride of sodium or common salt. It will not support life of any kind. Fish, carried to it by the river Jordan speedily die, and it contains neither shells nor coral. The air about it is peculiarly dry and oppressive. It is not true, however, as has sometimes been asserted, that no bird can fly across it, and that no living thing exists on its banks.

Many parties were hurrying along the road from the Dead Sea to the Jordan, in order to secure a camping ground on the banks of the river, before the crowd there became great. When we arrived, nearly every space had been taken by Russian pilgrims and we could scarcely find room to spread our table-cloth. The river at this point is not more than forty yards wide. It has low muddy banks, shaded by willows, cane, and tamarisks. Where a large tree bends far out over the water is the traditional place of the baptism of Jesus. The pilgrims were standing in the river, bathing, drinking, or washing their garments. Some were filling jars and bottles to carry home with them, others were spreading their linen on the ground and bushes to dry. They had so soiled the water that we were unwilling to enter it and only dipped in our toes. Afterwards we saw the river nearer its source, where it is bright, clear, and sparkling. In a straight direction its length is one hundred and thirty-six miles, but its many windings make it actually much longer.

The Monastery of St. John, a large square stone building, has been built over a grotto, in which it is said John the Baptist dwelt, near the Jordan. Not far from this we noticed, in a rocky hill, the cave of an anchorite, and were impelled to visit it. The excavation was just high enough to permit us to stand. It opened into another room even lower. Here we

found a man lying very ill, in a space so small that he could not move his body. It was apparent that he could not live long. We reported his condition at the Monastery, and the Greek monks at once went to his assistance, intending to bring him back with them, should he be able to be carried.

On our way back to Jerusalem, we passed the Muslim pilgrimage shrine of Neby Mûsa or the Tomb of Moses, which the Mohammedans have built on a hill-top west of the Jordan, notwithstanding the well-authenticated records of his death in the region east of that river. Each pilgrim on first coming in sight of the shrine erects a small heap of stones and many such are to be seen along the way. An annual pilgrimage is made to this spot in April. We saw the procession start one morning from St. Stephen's Gate in Jerusalem and wind over the Mount of Olives. Without the walls, the hillsides were brilliant with gay tents and crowds of moving people; some had been waiting for hours; others were just arriving. The procession was headed by music and banners. Then followed Turkish soldiers, some Mohammedans richly dressed, many pilgrims and beggars. In the midst were some dancing dervishes, scantily clad, who whirled in a religious frenzy, while they still kept their places in the ranks. One was eating poisonous cactus.

A few hours after leaving Neby Mûsa, we arrived again at the Mount of Olives and followed the road midway between its foot and summit. At a sudden bend, Jerusalem came into view, presenting a very striking and beautiful appearance far below us. This is believed to be the spot where Jesus wept over the future fate of the city when entering it for the last time.

CORA A. BENNESON.

THE GRAVE OF GEORGE FOX.

EDITORS INTELLIGENCER AND JOURNAL:

In a late number of the INTELLIGENCER AND JOURNAL (First mo. 26th) is an article on the burial place of Penn's remains, in which mention is made also of the grave of George Fox. The few particulars given by the writer accord with my recollection of a visit made to the spot in August, 1882, but whereas he had seen the grave only through the bars of an iron gate and was unable to get in, I was more fortunate. I stood reverently at the side of the grave, and plucked from it some spears of grass, a few of which I enclose. The author of the article in question moreover says that the solitary tombstone is the only monument that has ever been raised to him of whom it was said he "never feared the face of living man." That is a mistake. There is near the grave a monument which more than any device in bronze or marble could have gratified the stout but tender heart that rests under the "plain grey stone." It is described in the following lines which I borrow from a letter written home by a friend of my daughters, a Presbyterian, who accompanied them and me on our first excursion abroad. I preserved no notes of my own visit. My friend says:

"We went this morning to visit George Fox's grave. We took a bus to Moorgate street, and then walked quite a distance to Finsbury Square, and further still

to Bunhill Fields Cemetery. Coming at length in sight of it, we hastened on and found there a janitor or guide. We came first upon the grave of John Bunyan, which has an appropriate monument. It is a group containing the figure of Bunyan, and on either side of him a figure of Christian, the pilgrim, representing two stages of his progress. In the one he bears on his shoulders the well known bundle: in the other the bundle has fallen to the ground, and he bears the cross. Thus the wonderful allegory is told to every passer-by, and he who runs may read. We then continued our search for the grave of the indomitable George, and finally found a small tombstone but no mound; yet it is certain that he is really interred at this spot, though from a considerable part of the cemetery the bodies have been removed, and the ground built upon. The Friends have built here a mission chapel and in connection with it a coffee tavern, with a number of clean, well-aired beds, and they maintain also a night school and reading-room, all for the workmen. We went through these buildings and drank a cup of the uninviting coffee which Mr. McP. required me to drink as a test of my devotion to temperance principles. I swallowed it, as he did his, and found it very bitter. The tavern is, of course, conducted on strict temperance principles. Our guide told us it is always crowded at meal times, and every night a temperance meeting is held which is fully attended though the place is in the lowest and most degraded part of London. The man seemed to take pleasure in showing us about. He gave me some flowers from the grave, a spray of which I send you. It is one of the commonest wild flowers in England, the Lobelia, and makes such a pretty border."

There is a growing disposition on the part of religious bodies, which the Friends in England have caught, to connect with each congregation some work of practical benevolence. Such works were enjoined upon believers in the first days of Christianity and have always been carried on by the Catholics. They have been taken up by Protestants only in comparatively recent days. It is to be hoped that from its nucleus at the grave of George Fox the good work may spread wide and far.

I am very sorry that none of us can remember what was the inscription on Fox's tomb-stone or whether in fact there was any.

February 1, 1889.

J. D. M.

[We may say that we understand the author of the letter from London, in *The American*, referred to in our friend's letter, above, is an American woman, now residing abroad, and not a Friend, though her husband is,—or was,—of the Orthodox body. She has, however, shown much interest in localities connected with the labors of the early Friends, and is an admirer, as her letter (on the removal of Penn's remains) showed, of their earnest spirit.—EDS. INTELLIGENCER AND JOURNAL.]

No man has a prosperity so high or firm but two or three words can dishearten it. There is no calamity which right words will not begin to redress.
—Emerson.

SCRIPTURE LESSON, No. 7.

SECOND MONTH 17, 1889.

THE TIMID WOMAN'S TOUCH.

GOLDEN TEXT:—"Fear not, only believe."—Mark 5:36.

READ Mark 5:25-34.

JESUS found a great multitude gathered to receive him wherever he went. Those who had been instructed, or fed, or healed of their diseases, carried the good news to their friends, so that throughout the whole land of Galilee the people went out to meet him whenever they heard of his coming.

So we find that he had no sooner crossed over from "the country of the Gerasenes," where he had cured the demoniac, to the other side of the sea, than the multitude gathered to give him welcome.

It is while they throng about him that the sweet, simply incident of our lesson occurred—one of those tender passages in the story of his life that, like his own presence,—“drew all men unto him.”

A woman,—an invalid, who by the nature of her disease was accounted unclean according to the law (Lev. 15: 25,) and separated from social intercourse.

Had suffered many things. Had been under treatment which was very painful, and with the disease had caused her great suffering.

Came in the press behind. She had heard that he had healed others who were afflicted with incurable disease, and her faith encouraged her to believe that she too might be cured by him. Real faith is always active; it sets about to accomplish that which it believes can be done. Faith makes substantially real in ourselves the things believed or taken hold of.

Touch but his garment. It was not the touch of the hand that won the healing; it made known to Jesus that one was there who needed his help, and so was the bond of sympathy between the timid woman, who shrank from presenting herself before him, and himself—that bond which makes the whole world akin. The faith that said and acted out the word, "If I may but touch his garment"—in the old version the hem, the loose fringe that bordered the outer garment—"I shall be made whole" wrought the cure.

Go in peace. How comforting to this woman was the assurance that her plague had indeed been healed and she could return to her family and friends and peacefully enjoy their society. They who have known the torture of some bodily affliction and been permanently relieved know how to understand the peace that fell upon the life of this daughter of Israel.

We cannot get a profitable understanding of these miracles, as they are called, and in reality were to the people among whom they occurred, unless we take into consideration the low state of knowledge in relation to sickness and physical infirmity that then prevailed. It is hardly possible for us in our day of great research as to the cause of disease, to do justice to many of the statements which are found recorded in the life and ministry of Jesus—were they occurring here and now they might be explained according to known laws. Let us be willing to accept the verdict of those who saw and believed, and were made willing to accept Jesus as their promised Messiah, because of the mighty works which he did.

We who read may see farther, and need not the

evidence of the senses to enable us to find in him the manifestation of a perfected humanity, pervaded and permeated by the Spirit of God—in whom the union of the human and divine was so complete that he could say of himself, "I do always the things that are pleasing to the Father." "I and my father are one."

In the many accounts given in the gospel narratives to show what faith is, and what it has accomplished, there is impressed upon us one great lesson—that we need to cultivate it in ourselves—in order that we may have peace and happiness. Illustrations of faith can be drawn from every age, and one of the most beautiful in modern times is clothed thus in rhyme by W. H. Burleigh:

Restless, and oft complaining, on his bed
Tossed a fair child, as burned along his veins
The fire of fever with consuming pains;
And ever and anon he raised his head
From the hot pillow, and beseeching said—
"Water! oh, give me water!" By his side
The healer stood, and tenderly replied—
"Wait yet awhile, this potion take instead;"
"No," cried the child—" 'Tis poison, and will kill!"
His father took the cup—"My son, be sure
This is a nauseous draught, but it may cure,
Will my boy drink it?" Then said he, "I will—
I'm not afraid 'tis poison now—I know
Thou would'st not give it, father, were it so."
O trusting childhood! I would learn of thee
This lesson of pure faith, and to my heart
So bind it that it never may depart—
Therefore shall thou henceforth my teacher be,
For in thy perfect trust, the sin I see
Of our own doubts and fears. The cup of life,
Drugged with the bitterness of tears and strife,
Shall I not drink it when 'tis proffered me?
Yes—for 'tis mingled by a Father's hand
And given in love—for, rightly understood,
Trials and pains tend ever to our good,
Healing the soul that for a better land
Thirsts with a deathless longing! Welcome, pain,
Whose end is bliss and everlasting gain.

For Friends' Intelligencer and Journal.

EXHORTATION TO ENCOURAGEMENT.

"THE Father worketh hitherto, and I work," So said Jesus Christ in the outward advent, when performing his glorious mission amongst men. May all who enter the waste places of human intelligence seek the same guidance, the same holy assistance; then they will not be in vain, but will win souls to Christ our Redeemer, the Rock of our strength and our portion forever. His promises are "yea and amen" forever. "Ask and it shall be given unto you; seek and ye shall find." Knock at the door of this treasury, and you will find it has never been exhausted. O, that I could inspire confidence in one discouraged mind! "Fear not, Jacob, for I am with thee; be not dismayed, I am thy God." Keep the faith, and the everlasting patience till the end of thy journey here; and thou shalt reign with Christ in the kingdom of Heaven.

SARAH HUNT.

EQUALITY IN ALL THINGS.

THERE is, at all times and in all classes of society, constant friction as to the true adjustment of individual rights and privileges, and most persons are on the alert to see that no infringements on these occur. But inside of the sanctuary of the home there is not kept such a close censorship, as here all are conceded to be on a par, and we are not so careful to fill out in every particular our claim to this equality, by giving of our strength to supplement the weaknesses of others. It is so pleasant to have one place in which we can fall back and indulge our propensities. It is so easy to keep the smile and the cheery word for the outside world. Here, at least, we can be allowed to throw off restraint, and say our own say without let or hindrance. Yet nowhere is the demand greater for the practice of courtesy and self-forgetfulness. And nowhere is there larger returns. Here if anywhere is confirmed the truth of the affirmation "it is more blessed to give than to receive." For true happiness springs from this equalizing of our gifts in the home circle, each one bringing to the home altar that which God has granted him, and receiving in turn from others the varying gifts thereon bestowed. This fact should never be omitted in child culture as being the very foundation stone upon which a home is built—the mutual self-denial, the equal giving and receiving—thus making a happy home the ideal aim as to this life. Properly trained as to the giving of the gifts and graces of the spirit in the home, there is less friction when out of it. In the social circle it becomes easy to minister to others and we unconsciously gain advantage over those who selfishly wait to be entertained. A contemporary writer on this point says: "One scorns the thought of being a beggar for money, but is not the guest who sits waiting for the generous donation from another mind a social beggar?" A somewhat startling question, yet who has not felt it a truth upon many a social occasion, when compelled to give, give without any responsive gaining on the other side? To again quote, "we cannot all be wits but we can cultivate the grace of saying pleasant things; of reading, and thinking enough about what we read, to talk intelligently; and think about what we see and hear, so

as to be able to bear our share in the general contribution. Is there anything more depressing than one sitting apart and waiting to be entertained? We cannot all stand as shining lights, but we can brighten the social world by carrying into it our own lamps trimmed and burning.

And not in the home and social circle alone is this equalizing needed. In religious circles we need to be more willing to share our experiences that these perchance may help others. If we feel our portion to be meagre let us modestly share it in the quiet hour with a friend. Our religious fire may kindle at the touch of another flame and grow brighter for both. It often happens that those united in the same religious fold feel that there is not equality, that some more than others are favored by the Divine touch, forgetful that "God is no respecter of persons: but in every nation he that feareth him and worketh righteousness is acceptable to him." This glorious declaration of equality before God, should be to us all as a promise sweet and precious, and should forever silence in us any feeling that there can be preferment. But the selfish nature must be watched and kept under control while we should ever cultivate the grace of sharing our divine sustenance, however small it may seem. To this end are we incited by the example of Jesus of whom the record speaks so plainly of preferment, He being the "beloved Son," and yet so willing, for the sake of their uplifting, to place himself on an equality with all men.

WE regret very much the confusion caused last week in the mailing of a portion of the edition of the paper. The packs for a number of offices were placed in the wrong wrappers. We have corrected the mistake as far as it has been brought to our notice.

MARRIAGES.

MATTHEWS—COALE.—At Deer Creek meeting-house, First month 17th, 1889, by the order of the Society of Friends, Joshua H. Matthews, son of Samuel H. and Ruth H. Matthews, and Mary E. Coale, daughter of Walter S. and R. Margaret Coale, all of Harford county, Md.

DEATHS.

BUDDY.—At the residence of her brother, Dr. Samuel E. Haines, Philadelphia, Pa., First month 25th, 1889, Annie H., widow of Isaiah Buddy, aged 44 years.

CLEAVER.—At his residence, near Curwensville, Clearfield county, Pa., First month 7th, 1889, Nathan Cleaver, in the 79th year of his age; for many years a member and elder of West Branch Monthly Meeting.

He leaves a wife with whom he had lived in near unity for 56 years.

HILTON.—On 20th of First month, 1889, Annie, daughter of Joseph J. and the late Hannah S. Hilton, aged 23 years. Interment at Colestown, N. J.

MITCHELL.—At Glenolden, Delaware county, Pa., on

First month 13th, 1889, Charles T. Mitchell, aged 33 years, 1 month, and 17 days, eldest son of Abner and Jane T. Mitchell; a member of New Garden Monthly Meeting.

His death was the result of an accident, which occurred a few hours before, being thrown by his horse with great force upon an iron track. Although he seemed sensible he was fatally injured he did not appear alarmed, but calmly gave his brother, a partner in the business they were just commencing, information relative to it, which was known only to himself, asked his devoted wife to kiss him, and soon after slept his last sleep. Startling indeed to his many warm friends was the sad intelligence of this unexpected change. Cut off in the midst of bright earthly prospects, the "pleasant picture" is indeed marred as to these, but there is comfort to the bereaved in the thought that their loved one is forever happily landed, and by his translation, their hearts will be lifted more from the earthly to the Heavenly home. His mother-in-law, (who was one year an inmate of his home), bears this tribute in a letter to a friend: "We loved and looked up to him as a good son, and help in every needful time, and we have lost more than the world knows, and though we cannot yet see the purpose of this sad, sad dispensation, we know, as he knew, where to look for help, for he did believe that our Heavenly Father would heal, saying often to me, 'Cheer up mother dear, all things work together for good to those who love the Lord.' He never forgot my affliction of deafness, and took so much pains to have me know what was being spoken of. Ah! how I miss him, and how I shall as the days go on." That there were many, many others not thus connected, who valued and loved him, was manifest by the very large company that assembled to pay the last solemn rites, and take a last look upon his face, which was so happily expressive in death. Very impressive were the testimonies borne upon the occasion, tending to stir the hearers to heed the Scripture injunction "Be ye also ready, for in such an hour as ye think not the Son of Man cometh."

H.

STICKNEY.—At the residence of his son-in-law, Isaac Wilson, Bloomfield, Ontario, First month 21st 1889, Walter H. Stickney, in his 84th year; a life-long member and an elder for many years of West Lake Monthly Meeting. He was seldom absent from his place in the house of public worship, and of him it can be truly said, "Mark the perfect man and behold the upright, for the end of that man is peace."

JOHN BARNARD.

[A paper read by Augustus Brosius, in Loudon Grove First-day School, on Tenth month 28th, 1888.]

How prone we are to delay giving expression to feelings of affection and regard until the object upon which we would bestow them shall have crossed the dark river to be seen of men no more.

A short time since we consigned to the embrace of Mother Earth one who has been long and prominently identified with our First-day School work. Over fifteen years ago, when Loudon Grove First-day School was organized, John Barnard was one of the few older persons who not only gave it his sanction, but joined hands with the younger element, and by his cheerful presence and unswerving fidelity contributed very much to its success. Since that time although having reached nearly the age of four score and ten, his kindly greetings in our weekly gatherings, and prompt response with some fitting thought or sentiment at roll call, gave evidence of continued interest in this labor for the young. By such devotion to duty, made manifest through the labors and sacrifices of one so greatly revered, is there not an incentive to greater

diligence on our part to faithfully carry on a work which so deeply elicited his sympathy? John Barnard was one of those generous charitable characters whose sympathies ever go out to the unfortunate; being willing to lend a helping hand to the needy and friendless. Any reform which to him seemed destined to produce good results secured his sympathy and aid; believing in the Fatherhood of God and brotherhood of man he espoused the cause of the weak and lowly when to do so was to appear fanatical and render himself unpopular; large hearted, conscientious, living as I believe near to the Light as revealed to him, and although subjected, doubtless, to many tribulations he wore the same genial smile and spoke in the same cheerful tone; whatever of trial and sorrow he knew was hid from the world at large. Is there not an inspiration in such a life as this; will not the impress of such a character be for good; and will not those of us who knew and talked and labored with this dear friend be imbued with a greater zeal to press forward in such laudable work as our hands find to do? For almost ninety years he bore with cheerfulness the heat and burden of the day; yet his was a mellow old age, often showing the vivacity of youth, as he was a lover of the youth, for whom he mostly had a pleasant word. For a large part of the time during this long earthly pilgrimage he lived where he died. Many of you have known him for one and perhaps some for two generations, and the record he bears attests his fidelity to principle, his conscientious life, and that this tribute of praise is no fulsome eulogy, but is, as was the testimony borne on the day of his burial, truly merited. The genial presence of our aged friend will be felt no more, the friendly handshake, pleasant smile, and cheerful voice are things of the past. We can only retain the memory of this pleasant intercourse, but we can profit by very much that was made manifest in his life; and we feel assured that his earthly close was as of one who

"Sustained and soothed

By an unflinching trust, approached his grave,
Like one who wraps the drapery of his couch
About him, and lies down to pleasant dreams."

THE PROHIBITORY CONSTITUTIONAL AMENDMENT.

THE Pennsylvania Legislature has now reaffirmed the action of two years ago, in approving the proposal of an amendment to the State Constitution, prohibiting the manufacture and sale of intoxicating liquors. The resolution to submit such an amendment passed the House previously, and on the 30th ult. it passed the Senate. It is proposed to have the vote of the people taken at a special election, and this will be held, probably, on the 18th of Sixth month. A law, fixing the date, and providing for the necessary details of the election will, however, be necessary, and this the Legislature will next consider.

Most of our readers in Pennsylvania are probably fully informed as to the method of procedure in such a case, but for the sake of a clear understanding of this highly important and interesting matter, we give the following details. To amend the Constitution of the State it is necessary:

1. That the proposed Amendment be agreed to by a majority of the members elected to each house of the Legislature.
2. That it then be advertised for three months in each county in the State.

3. That it be then again approved by a majority of the members elected to each house of the next Legislature.

4. That it be again advertised, (as in No. 2.)

5. That it then be approved by a majority of the qualified electors voting thereon, at an election held on the subject.

The first, second, and third steps have been taken, the fourth (advertising the second time), will promptly follow. The election, as mentioned above, will very probably take place in Sixth month. By that time, no doubt, a deep interest and lively agitation will be aroused. It should be added that the Amendment when once made, will be very secure, for several reasons: the chief being that, as explained, the process of change is slow and difficult, and also the Constitution permits changes only once in five years.

—At Darby, (Delaware county, Pa.), Monthly Meeting, on the 21st ult., the subject of the Constitutional Amendment was introduced, and it was determined to appoint a committee on the subject "with power to act." Fourteen of those present were appointed on the committee, with a request to nominate additional Friends to act with them as members of the Committee. They then adjourned to the close of the following First-day morning, meeting when the younger members generally might be expected to attend. At the latter time a session of the monthly meeting was held, in joint meeting, and the names of forty more were added to the Committee.

For Friends' Intelligencer and Journal.

DR. MARY F. THOMAS.

DR. MARY F. THOMAS was born Tenth mo. 28th, 1816, in Montgomery county, Maryland, and departed this life at Richmond, Wayne county, Indiana, on the 19th of Eighth mo. 1888. Her parents were members of the Society of Friends and resided in their earlier days in Bucks and Chester counties, Pennsylvania, where her girlhood was spent. Her maiden name was Mary F. Myers. Her father was the associate of Benjamin Lundy in organizing and attending the first Anti-slavery meeting held in Washington, at the risk of their lives. When seventeen years of age, her parents removed to New Lisbon, Ohio, where in the Seventh mo. 1839, she was united in marriage with Dr. Owen Thomas of that place, according to the order of Friends, both being members of the Society. A few years after her marriage, she commenced the study of medicine. She attended a course of lectures at Penn Medical College for women in Philadelphia, in 1851-52, another course in Cleveland, in 1852-53, and graduated from Penn Medical College in 1854. After practicing at Fort Wayne for two years, she came to this city (Richmond, Ind.), in 1856, where she continued to reside. She was elected a member of the Wayne County Medical Society, after being twice rejected on account of her sex. She became a member of the State Medical Society, in 1876, and was the first woman admitted to membership in that body. In 1877 she was a delegate from the State Medical Societies to the American Medical Association, and was the second woman admitted to membership in that

association. She was also a delegate to the National Medical Society at Chicago.

Her practice was very extensive among all classes. She was no respecter of persons, being as attentive to the poor from whom she never expected a farthing, as to those from whom she knew her compensation was certain. During the war, under the direction of Governor Morton, she spent considerable time in hospital service for Indiana soldiers at Washington, Nashville, Natchez, and Vicksburg, under the direction of the Christian Association, ministering to the comfort of the sick and wounded soldiers. When her services were no longer needed, she assisted General Farwell in bringing a large number of fugitives whom the war had rendered homeless and destitute to the North, finding homes and employment for them. In 1864 she was appointed superintendent of the hospital for refugees in Nashville, her husband accompanying her as hospital surgeon. This position they filled about eight months. She was the prime mover in establishing the Woman's Prison and Girls' Reformatory, at Indianapolis. She was one of the originators and constant promoters of the Home for Friendless Women, and for the last sixteen years of her life was its physician. She was always deeply interested in the care of the helpless and needy,—a veritable Dorcas, and beloved physician indeed to the poor.

To understand the foundation of this noble career, let us go back fifty-three years to those girlhood days at New Lisbon, Ohio. We find Mary and Hannah, her sister, aged eighteen and twenty, tilling the soil, harvesting the grain, tending the stock, and supporting the family in the illness of their father. They shared the labor and responsibility of men with the privileges of women. They observed, thought, reasoned, and formed a code of principles that governed them in after-life. Hannah, who married T. E. Longshore, of Philadelphia, was one of the first two women graduated at Penn Medical College. When she began practicing in Philadelphia only one physician would give her any recognition, and not a druggist would prepare her medicines. It was about this time the two sisters and one other woman, under the friendly branches of a noble tree, held what was, perhaps, the first woman's rights meeting in this country. Each agreed to write an article for publication, advocating that principle. Mary very soon concluded that woman's ballot was her only emancipation, and she ever after that was an ardent suffragist. Mary F. Thomas was one of the earliest advocates of woman's rights in Indiana. She was for two years editor of the *Lily*, established by Amelia Bloomer, and published in Richmond. She was a terse and vigorous writer, and her efforts as editor and public speaker did much towards sowing seed that is now beginning to bear fruit. She was found at the front of every movement the object of which was to elevate woman; especially desirous that the right of franchise should be given her. To this end she labored unceasingly with pen and voice.

For eight years she was president of the State Suffrage Association of Indiana, was the third president, and was first elected to that position in 1856. In 1859, Mary Birdsall, Agnes Cook, and Dr. Mary F.

Thomas presented a petition to the Legislature of Indiana, asking them to grant women the same rights in property that are enjoyed by men; also to take the necessary steps to extend the right of suffrage. This petition was signed by over one thousand persons, and was read by Dr. Mary F. Thomas. She was delegate to the National Convention held at Philadelphia, and president of our Suffrage Society of this place. She felt a great interest in the cause of Temperance, had been an active worker since the days of the Washingtonians. Her husband, Dr. Owen Thomas, survives her. She was the mother of three daughters, one dying at the age of fourteen; the youngest, a graduate of Cornell University, took the Greek prize at the inter-collegiate contest in 1874, and is now attending lectures at Leipzig, Germany. Her other daughter, Mrs. Pauline Heald, of Hartford, Michigan, was with her at her death. A large concourse of friends attended the funeral. The text, "She hath done what she could," was the subject of an impressive discourse on that occasion.

Richmond, Indiana.

JOSHUA RUSSELL.

AN exchange paper, (the *Telephone*, published at Hamilton, Loudoun co, Va.), contains a sketch of the late Joshua Russell, whose death occurred on 12th mo. 31, 1888, and has been duly noticed. (He was the father of our friend Henry R. Russell, of Woodbury.) The sketch in the *Telephone* says: Joshua Russell was born Eighth mo. 12th, 1794, in New Market, Maryland.

When he was eleven years old his parents moved to a farm, two miles north of that town, where he spent the remainder of his life. Six years after moving to the country, his father died, leaving ten children. His mother survived her husband forty-nine years, all of which were spent under the same roof with her eldest son, the subject of this sketch. From the seed sown in caring for his mother he reaped a rich harvest in the loving ministrations of his children and grandchildren. On Fourth mo. 21st, 1824, he married Rachel Steer, of Waterford, Va. Five of their six children are married and, with one exception, live in their native State. One died at the age of six years. A Union man during our late war and living in a neighborhood where his views were extremely unpopular, he maintained his principles in a manner that won the respect of the opposing party.

As a member of the Society of Friends he was ever faithful in the performance of duties connected therewith. A close observer, he kept himself well-informed, until his eyesight failed, upon the leading topics of the day. For more than a year before his death he was totally blind, which privation he patiently bore, until, as the old year was drawing to a close, his spirit took its flight from the time-worn tenement, that was no longer a fit abiding place for aught so pure.

On 5th day, 1st mo. 3d, 1889, his remains, followed by all of his living children and grandchildren, together with many other relatives and friends, were borne to Bush Creek burying grounds, where

they were laid to rest besides those of his wife, who had passed from works to reward more than sixteen years before.

So has ended a well-spent life, embracing the greater part of a century. Few, indeed, are permitted to enjoy so long and so thoroughly, as his unusually bright mind enabled him to do, the blessings of this life. Although his eyes were closed a comparatively short time to the beauties of nature, it was, perhaps, that the spiritual eyes might see more clearly the beauties of His Kingdom. L.

For Friends' Intelligencer and Journal.

OUR EVENING SKY.

VENUS has for some time past been a brilliant and conspicuous object in our western sky. It has been moving away from the sun; and will continue to do so until the 18th of the present month, when it will attain its eastern elongation or the position furthest east of the sun. After that date it will approach the sun for about seventy days, when it will come into the position in which it is nearest the earth and in the line between us and the sun. To one who looks at Venus through a telescope, it presents the same changes in phase as the moon, and is now of a shape like the waning gibbous moon. At the elongation it will be a luminous half-circle, and afterwards a crescent. While on successive nights smaller portions of the surface are turned towards us, the brilliancy will nevertheless increase until the 24th of next month. This growing brightness is due to the rapid approach of Venus to the earth.

Saturn is the only other planet now in a conspicuous position in the sky. As it is now nearly directly opposite to the sun, it is nearest to the earth and most favorably situated for observation. Owing to its great distance from the sun (about 875 millions of miles) it is comparatively dull, and the degree of light we receive from it varies but little.

During the present season the portion of the sky turned towards us in the evening presents a more brilliant array of stars than at any other time of the year. At about eight o'clock, Orion, with its nine bright stars directly to the south; the two most brilliant stars, Betelgeuse, Rigel, with Sirius and Aldebaran form a great rhomb; while Betelgeuse with Sirius and Procyon forms in the south-east a vast triangle with sides apparently equal. Higher up in the sky shine the twin glories of Castor and Pollux, the latter the brighter and lower; while over towards the east appears Saturn now close to Regulus and the sickle that marks the constellation Leo. Almost immediately overhead is Capella, while to the north-west Cassiopea and to the south-west the Pleiades and Arctis add their light, and lower in the west shines the brightness of Venus.

A number of easily-found objects like these affords us an excellent opportunity to observe the eastward motion of the moon. On the 3d inst., it was close to Venus, on the 8th it will be between the Pleiades and Aldebaran, on the 12th it will be near Castor and Pollux, while the 14th will bring it into conjunction with Saturn. JOHN M. CHURCH.

New York, Second mo. 4th.

SWARTHMORE NOTES.

The lecture at the College, by Mary A. Livermore, announced for some time as to take place on *Sixth-day* evening of next week, will be given on *Fifth-day*. The error, we believe, was originally due to the agent for her lecture engagements. Her subject will be "Women of the War."

—Professor Arthur Beardsley has recently been elected Vice-President of the Engineers' Club, of Philadelphia, and presided over the first session of the new year. The Professor is quite prominent in engineering circles, and is also President of the Engineering Section of the American Society for the Advancement of Science.

—Professor Rolfe and Assistant Professor Price have made a change in their Latin classes. Professor Rolfe has taken one of the preparatory classes, and in exchange Professor Price takes the Freshmen.

—The Junior class is making arrangements to give its younger allied class, the Freshmen, a reception on next *Seventh-day* evening.

—The second semester of the college year began on *Second-day* morning. The programme of work is changed, just as at the beginning of a new year.

—It may be interesting to the Friends to know that *The Swarthmore Phoenix*, the magazine published by the students, has the reputation of being one of the very best college journals in the Middle States. The *Phoenix* gets probably more favorable comment than any other college paper in Pennsylvania.

—The elections for officers in the classes and literary societies will probably all take place this week. There is always considerable interest in them, and sometimes the contest for places is quite spirited. The results are especially important in the Senior class, as those now chosen will take part in the *Class Day* exercises at the close of the year.

—Our friend, Clement M. Biddle, of Philadelphia, spent all of *First-day* at the College. He spoke in the morning, after meeting, and gave an interesting account of his experiences of travel in the Holy Land, closing with a statement of some of the vital principles of the Friendly doctrine. In the afternoon Friend Biddle attended a large meeting organized by Professor Benjamin Smith to discuss the history and principles of the Society, and spoke upon the duties of young Friends. His visit was much appreciated.

—Professor Hoadley has started a class of Seniors in applied electricity. This promises to become a very popular course.

—The reports of the Board of Managers to the Stockholders, of the President to the Board, and the heads of departments to the President have been issued. The latter is a new feature, is very complete, and shows the encouraging progress of the institution.

It is a beautiful and fruitful thought of Victor Hugo's that a man need never be inwardly unhappy so long as he has two things, "something to do, and a sight of the sky."

EDUCATIONAL CONFERENCE.

The Educational Conference under the direction of the Yearly Meeting's Committee, a notice of which was unintentionally omitted last week, met at 15th and Race streets, on *Seventh-day*, the 26th ult., and was largely attended. The two subjects for consideration were "Vocal Culture" and "Incentives." The former discussion was opened by Prof. W. W. Batchelor, a teacher of classes in the Friends' schools, who made an extremely interesting, though informal, address. He strongly advocated the proper development of the vocal organs, and consequently of the voice. A general consideration of the subject followed, in which many participated, valuable hints and helps being given, which teachers will, no doubt, put to good use.

After a recess the subject of "Incentives" was presented by a paper prepared by Professor Wm. W. Birdsall. Louisa J. Roberts followed with an essay which we publish to-day. Henry R. Russell read the closing paper, after which there was but little discussion, as the time for adjournment was at hand. It was announced that the subject for the next conference would be "Reading."

THE CAUSE OF PEACE: HELP WANTED.

EDITORS INTELLIGENCER AND JOURNAL:

THE Pennsylvania Peace Society has issued an address to the citizens of Pennsylvania in relation to a law recently enacted, appropriating a large sum of money annually for the maintenance of military force, exposing its dangers and asking aid in endeavoring to have the law repealed. This is a subject of vital interest to every one wishing well to our people, and particularly to the members of our Society, who are taught to believe that every phase of the art of war must be discountenanced and condemned.

It is not my purpose to enter into any argument here on this important subject. But I wish to call the attention of Friends everywhere to the stronghold the war spirit is making upon our people, who are quietly consenting to all our Legislatures giving such large sums of money for its support.

Is it not time to cry a halt? The Pennsylvania Peace Society has prepared a remonstrance for the repeal of our State Law, has appointed a committee to call meetings and obtain all the signatures possible. Some of this committee are ready at all times to go where assistance is asked.

Let us not wait for another to move. Let all feel it their duty as well as privilege to join hands in this work. Let every meeting-house be thrown open as well as school-house for its consideration.

My heart is full on this matter. I do not want to encroach upon your space nor the time of your readers without an object. It is a call to work. The fields are white unto harvest.

I am glad to know that some are made to feel that "Eternal vigilance is the price of Liberty"—and will raise their voice of warning against the Sabbatarian movement, and glad to think of the hearts that are coming to save our land from the "worm of the still."

LUKENS WEBSTER.

3504 N. 16th St., Philad'a.

A PEBBLE AND LIFE.

DID you ever notice how smooth and round
Are the pebbles along the seashore found?
No angles sharp are on them seen
Though rough and ragged each one had been.

These pebbles have long been tossed and whirled
By the restless waves in the ocean world;
And many a storm has raged on the sea
When rasped and ground would the pebbles be.

But the waves and storms do not work for naught;
And soon in the pebbles a change was wrought;
The sharp, rough corners were rounded o'er,
And then they were left on the sandy shore.

So the bitter storms every life must feel,
A blessing for each of us doth conceal;
We are tossed about in God's ocean of Love
While storms of sorrow may surge above.

There are angles sharp to be worn away,
So rasping troubles come, day by day;
Sometimes we may need a heavy blow
That our characters rounded and fair may grow.

So patiently trust through trial and pain;
For God never bids thee to suffer in vain;
The surges roar and the waves dash high
To fit thee for quiet and rest by and by.

And when God's work is made perfect in thee,
Thou shalt toss no more in the restless sea;
But by life's ebb-tide be left on the strand
Of the happy shores of the heavenly land.

—*Ida G. Rust.*

HELP ONE ANOTHER.

"HELP one another," the snowflakes said,
As they cuddled down in their fleecy bed:

"One of us here would not be felt,
One of us here would not quickly melt;
But I'll help you, and you help me,
And then what a big white drift we'll see!"

"Help one another," the maple spray
Said to its fellow leaves one day;

"The sun would wither me here alone,
Long enough ere the day is gone;
But I'll help you, and you help me,
And then what a splendid shade there'll be!"

"Help one another," the dewdrop cried,
Seeing another drop close to its side;
"This warm south breeze would dry me away,
And I should be gone ere noon to-day;
But I'll help you, and you help me,
And we'll make a brook and run to the sea."

"Help one another," a grain of sand
Said to another grain just at hand;
"The wind may carry me over the sea,
And then, oh, what will become of me?
But come, my brother, give me your hand;
We'll build a mountain, and there we'll stand."

And so the snowflakes grew to drifts,
The grains of sand to mountains,
The leaves became a pleasant shade,
And dewdrops fed the fountains.

—*Parish Visitor.*

From *The American*, (Philadelphia).

A WINTER SUNRISE.

THE waning moon was scarcely visible in the western sky and not a star shone overhead, when I ventured out of doors, at the call of the gathering crows. These noisy scavengers of the river's shore had evidently slept with one eye open, and at the first faint glimmering of the dawn signalled in no uncertain tones, the coming day. Across the brown meadows floated their clamorous cries and roused me when my own slumber was most profound; but I responded promptly, willing at least, if not wildly anxious, to witness a winter's sunrise.

I have said the meadows were brown; such was their color when I saw them last; but now, every wrinkled blade of last year's grass was daintily feathered with pearly frost. A line, too, of steel-gray crystals topped every rail of the old worm fence, and capped the outreaching branches of the scattered trees. The glint of splintered glass filled the landscape.

Knowing the view there would be less obstructed, I walked leisurely to a high knoll in the lower meadows, leaving a curiously dark streak behind me where I brushed away the frost as I passed. Not a bird greeted me. The sparrows and chickadees of yesterday were still asleep. The crackling of brittle twigs beneath my feet was the only sound I heard, save, of course, the blended voices of the distant crows. The brightening of the eastern sky proceeded slowly. Cloud above cloud threatened to sbut out the light until the day had well advanced; while from the river rose a filmy bank of smoke-like fog that settled in huge masses over the intervening marshes. But still the crows were clamorous, and I had been told that their songs at sunrise argued a fair day; so, 'twixt hope and fear, I reached the high knoll in my neighbor's meadow. It was at the nick of time. Without a heralding ray in the whole horizon, a flood of rosy light leaped through a rift in the clouds and every cold gray crystal of the frost glowed with ruddy warmth. Then deafening loud was the din of foraging crows, as though they exerted at the fulfilment of their prediction; and from that moment on, the day was beautiful.

And if crows could be so enthusiastic over a bright winter day, why not other birds? What of that host of arctic finches that tarry with us until spring? I listened in vain for the foxie sparrow's warble, the call of the Peabody bird, and whistling of the purple finch. These were all here yesterday and making merry; now every one was mute. The ceaseless cawing of the crows may have drowned their voices, but I think not. However, in other ways and no less cheerful ones, the vivifying effect of sunrise was soon apparent everywhere about me.

My friends, the meadow mice, were in their glory. Their grass-walled run-ways were roofed with ice and not a breath of the chilly breeze that fretted the outer world could reach them. I quite forgot the increasing beauty of the eastern sky, in my eagerness to watch the mice. I could look down upon them, through the transparent roofs of their crystal palaces, and wondered what might be their

errands. Every one was in a hurry, and none stopped to nibble at a blade of grass or tarried at a cluster of seed-pods. Was it the mere pleasure of activity that prompted them? It was very warm beneath the ice and far from cold above it. But all the while I might be frightening the poor creatures, so I withdrew, at the thought, to the cover of a clump of bushes. Quiet then seemed partially restored and soon one mouse came from an opening in the roof, where many run-ways met. It picked its painful way over the frost, as though every crystal was a pricking needle. I moved and away it darted, but not to tell its fellows. Another and another came and like the one first seen, they simply ran from post to pillar and back from pillar to post. Perhaps a weasel was on their track—but, if we commence surmising, there never will be an end to it. Let me declare dogmatically, these mice were taking a sun-bath, and with this thought leave them.

As I looked about me, the crows again became the most prominent feature of the landscape. They hovered in a loose flock over all the meadows; literally, in thousands, and as the rays of the sun struck them, they too glistened as though the frost crystals had encased their feathers. Higher and higher they rose into the misty air and soon dispersed in every direction; but they will gather again as the day closes, for over the river, somewhere in the woods, they have a roosting-place. I have seen this knoll now thickly tenanted by mice, black with crows, day after day, within a fortnight. What then became of the mice? Surely their cunning stood them well in need to escape these ravenous birds, and yet they have done so. Stupid as they seem when studied individually, these mice must have a modicum of mother-wit, to thrive in spite of so many odds against them.

But now, as the day advanced, the wooded bluff a mile away, and the willows on the river-shore gave evidence that not alone were the crows and mice awake to the beauty and warmth of a winter sunrise. The feathered world was now astir and music from a hundred throats filled the crisp air. There was, it is true, not that volume of sound that greets the daybreak in June, and not one voice was as tuneful as a thrush. This mattered not. The essential feature of a pleasant stroll, evidence that I was not alone, was present; for I cannot keep company with meadow mice. I call it a dead day, when there are no birds, and he who would know what such a day is, should be on the marshes or the river, when not a sound rises from the wild waste about him.

I stood long listening to the afar-off choir, and then, turning my steps homeward, fancied I could distinguish the different birds that now made the woods fairly to ring. There was a ditch to cross before reaching the hillside, and right glad am I that I looked before leaping it, for I saw a lazy frog slowly responding to the increasing warmth of the sunshine. All night long, this creature had been sleeping in a cosy nook, a foot deep in the soft mud which was protected here from the north and west, and has never been known to freeze. One eye and a small

fraction of the frog's head was visible, but the former was bright and I was sure that no accident had happened to bring it even so far above the surface. I stood very still, expecting much, but it was like watching the hour hand of a clock. In time the whole head was exposed, then the fore-limbs, and this, for many minutes, was the extent of the frog's activity. I ventured finally, to assist, and lifting up the clammy creature, placed it on a floating fence rail, whereon the sun shone as in summer. The frog was happy. Its expression showed this, its pulsing sides proved this, and could I have heard it croak, my own satisfaction would have been complete; but this it would not do. But let it be remembered, the croaking cannot be forced, either in June or January, and the voices of frogs have been heard frequently during the latter month. Even when the winter has been very severe, a typical January thaw has led them to give tongue, to croak unmistakably, although in thinner tones than during a summer's night chorus.

There were hours yet before noon, and my little adventure with the languid frog prompted me to explore the ditch in a rude way. All forms of aquatic life seemed as active as in spring. Fish, salamanders, snakes, turtles, and insects were not only active but alert and as difficult to capture as I had ever found them. Actual sluggishness characterized the frogs only, and yet these creatures are supposed to be less susceptible to cold than all the others. The truth is, the winter habits of every form of life are little known, and what impressions, if any, most have upon the subject, are more or less erroneous. We have had no winter as yet, but the same conditions that I found to-day, were true of the ditch-dwellers, last year and the year before, when we had not only winter, but winter intensified.

I did not enumerate the many birds aright, as I approached the hillside. My attention was suddenly called from the ditch to the green-brier thicket beyond, by a familiar sound, yet which now, late in January, seemed quite out-of-place if not out of tune and harsh. It was the querulous cry of a cat-bird. This familiar thrush is no *rara avis* at such a time, although probably in Audubon's day, few if any remained in New Jersey during the winter. No author makes mention, I believe, of such an occurrence. The number seen each winter gradually increases, and the disposition to remain affects apparently these birds over a steadily extending area. So at least, from correspondence, I am led to believe.

I found but three flowers as I neared my home, a dandelion, a violet, and a pale spring beauty; but earlier in the month, a friend had been more successful, and gathered not only those I have named, but others. Doubtless these superlatively early blossoms have to do with the present extraordinary winter, now more than half gone, but not altogether, perhaps. Many a plant is more vigorous than we suspect and stray flowers are hidden beneath the fallen leaves more often than we know.

When, in the forbidding gloom of a winter dawn, I ventured out of doors, it was with the anticipation of a cheerless walk, if not fear of actual discomfort;

but the brilliant sunrise promptly dispelled all this; my fears giving way to hopes that were more than realized.

Near Trenton, N. J.

CHARLES C. ABBOTT.

THE TRAINING OF JEWISH BOYS IN THE TIME OF JESUS.

IN Farrar's "Life of Paul" we find much that is interesting and instructive; for instance, the training he received, which was the same that was given to Jewish boys in common. The prejudices of the Pharisaic house, it has been said, surrounded his cradle. His Judaism grew like the mustard-tree mentioned in the Scripture, and intolerance, fanaticism, national hatred, pride, and other passions, built their nests among its branches. At the age of five he would begin to study the Bible with his parents at home, and even earlier than this he would doubtless have learnt the Shema and the Hallel (Psalms 113 and 118) in whole or in part. At six he would go to his "vineyard," as the later Rabbis called their schools. At ten he would begin to study those earlier and simpler developments of the oral law, which were afterwards collected in the Mishna. At thirteen he would by a sort of Confirmation, become a "Son of the commandment." At fifteen his studies would become more minute and burdensome. It was in studies and habits like these that the young Saul of Tarsus grew up to the age of thirteen, which was the age at which a Jewish boy, if he were destined for the position of a Rabbi, entered the school of some great master. The one among whose pupils Saul was enrolled was the famous Rabbun Gamaliel, who like his grandfather Hillel, held the somewhat anomalous position of a liberal Pharisee. His liberality showed itself in the permission of Pagan literature, his largeness of heart in the tolerance which breathes through his speech before the Sanhedrim. There is no authority for the tradition that Gamaliel was a secret Christian, but we see from the numerous notices of his in the Talmud, and from the sayings there ascribed to him, that he was a man of culture, sufficient to elevate him above vulgar passions, and of wisdom, to act upon the broad principles that hasty judgments are liable to error; that there is a strength and majesty in truth which need no aid from persecution; that a light from heaven falls upon the destinies of man, and by that light God "shows all things in the slow history of their ripening." It was Paul's birth at Tarsus, which determined the trade in which, during so many days and nights of toil and self-denial the Apostle earned his daily bread. The staple manufacture of the city was the weaving, first into ropes, then into tent-covers and garments, of the hair which was supplied in great quantities by the goat flocks of the Taurus. The learning of a trade was a duty enjoined by the Rabbis on the parents of every Jewish boy. The wisdom of the rule became apparent in the case of Paul when the changes and chances of life compelled him to earn his own livelihood by manual labor.

C. A. K.

J. G. WHITTIER'S VIEWS ON COUNTRY LIFE.

DANVERS, Jan. 11.—J. G. Whittier sent the following letter to the Essex Agricultural Society in response to a congratulatory letter. It was read at the Farmers' Institute to-day:

OAK KNOLL, DANVERS, 12th mo. 30, 1888.

David Low, Esq., Secretary Essex County Agricultural Society. Dear Friend: Thy letter conveying the congratulations and kind wishes of the Essex County Agricultural Society at its meeting on the 28th inst. I have read with no common satisfaction. No birthday has ever given me more pleasure. My ancestors since 1640 have been farmers in Essex county. I was early initiated into the mysteries of farming as it was practiced 70 years ago, and worked faithfully on the old Haverhill homestead until, at the age of 30 years, I was compelled to leave it, greatly to my regret. Ever since if I have envied anybody, it has been the hale, strong farmer, who could till his own acres, and if he needed help could afford to hire it, because he was able to lead the work himself. I have lived to see a great and favorable change in the farming population of Essex county. The curse of intemperance is now almost unknown among them; the rumseller has no mortgage on their lands. As a rule they are intelligent, well-informed, and healthy, interested in public affairs, self-respectful, and respected, independent land holders, fully entitled, if any class is, to the name of gentleman. It may be said that they are not millionaires, and that their annual gains are small. But, on the other hand, the farmer rests secure, while other occupations and professions are in constant fear of disaster; his dealing directly and honestly with the Almighty is safer than speculation; his life is no game of chance, and his investments in the earth are better than in stock companies and syndicates.

As to profits, if our farmers could care less for the comfort of themselves and their families, if they could consent to live as their ancestors once lived, and as the pioneers in new countries now live, they could, with their present facilities, no doubt double their incomes. But what a pitiful gain this would be at the expense of the delicacies and refinements that make life worth living. No better proof of real gains can be found than the creation of pleasant homes for the comfort of age and the happiness of youth. When the great English critic, Matthew Arnold, was in this country, on returning from a visit in Essex county, he remarked that, while the land looked to him rough and unproductive, the landlords' houses seemed neat and often elegant. "But where," he asked, "do the tenants, the working people live?" He seemed surprised when I told him that the tenants were the landlords and the workers the owners.

Let me return my sincere thanks to the Essex Agricultural Society for the kind message conveyed in thy letter, and with the best wishes for continued prosperity and usefulness, I am truly thy friend,

JOHN G. WHITTIER.

"If we teach the children to merit happiness and success—they are near to both."

JOHN MORLEY ON BELLIGERENT ANTI-SLAVERY.

JOHN MORLEY, M. P., in a speech, on December 12th, said :

"The Queen's ships are at this moment blocking the coast of East Africa, and for what? In order to help Germans to invade and to attack natives. The latest news is—and it really is very grave—that places on the East Coast of Africa have been subjected to destructive operations, the effect of which falls principally upon subjects of the Queen. The destruction of this trade cannot be good for any of us. I know it is said that the blockade of the East Coast of Africa by the Queen's ships is in order to help put down the slave trade.

"I have followed African politics for some eight or ten years pretty closely, and whenever the Government is in a fix they say they want to put down the slave trade. But let us be sure that we really are putting down the slave trade and are not being made the instrument of other people's ambitions. There will be much more, I fear, to be said on this subject; for I think it is our duty to show the Government that Englishmen are watching these operations with very great interest and anxiety.

But we have another affair of our own on hand, exclusively our own; also nominally in the interests of the slave trade. We are now conducting warlike operations, as you all know, at Suakin. When I remember all that went on, I am sorry to say, under a Government of our own principles, in the Soudan in 1883-4-5, I confess that I look upon these operations with the liveliest misgivings.

"What did we do in those years? We slaughtered, put to the sword, I am told, 15,000 Arabs. Even if we had succeeded in putting down the slave trade, the slaughter of 15,000 men is a very considerable and a very terrible set off; and if you want to give employment to your teeming millions, to kill 15,000 customers is not a very hopeful way of improving your commerce. As far as the suppression of the slave trade is concerned, the evidence is conclusive, and cannot be denied, that we have not succeeded the least in the world, because there is a greater glut of slaves in the slave market than there was before the Soudan operations commenced, four or five years ago. But, now, is it supposed that you are going to make your trade and the employment of your teeming millions flourish and revive by killing more of your possible customers? What are we in the Soudan for?

"If we do not take care, if people like you and our friends in the House of Commons do not take care, we are in for another of these abominable, profitless, purposeless, Soudanese wars. I will tell you why: because—and it is no secret—there is a military party in Egypt which is urgent for extending operations. A great soldier is mostly a friend of peace; but a small soldier, who wants to be a great soldier, is generally in favor of war. Well, this is wrong, but it is quite natural, and we have got to deal with it."—*Herald of Peace, (London.)*

A MISINFORMED PROPHET.

PROF. GOLDWIN SMITH has written to the *London Times*, begging England to beware of woman suffrage, which, according to him, has worked very badly in this country. Englishmen, he says, should make themselves acquainted with the American experience. Woman suffrage has been tried in Nebraska (this will be news to the Nebraskans) and was abandoned there. It is still under trial in one Territory, and the result is a general refusal to try it elsewhere. The adverse verdict is the more significant because an almost fatuous woman-worship prevails in "the States." He prophesies that women would not be conservative but radical, and declares that woman suffrage would work more mischief than any measure ever proposed by Mr. Gladstone. This, from an ardent Tory, is the utmost possible expression of disapprobation.

Nebraska has never had woman suffrage. A municipal suffrage bill is pending in its Legislature at the present time. In Wyoming, the "one Territory where woman suffrage is still under trial," a formidable phalanx of governors, judges, and ecclesiastical dignitaries testify to its good effects, and the advocates of woman suffrage have had a standing challenge out for years to its opponents to find two persons in the whole Territory who will assert, over their own names and addresses, that it has had any bad results whatever. Prof. Goldwin Smith ought to acquaint himself with the American experience, before he undertakes to acquaint others with it.

Some years ago, another opponent, a member of Parliament, tried to make a point against woman suffrage out of "the recent defeat of a woman suffrage constitutional amendment in the great State of Ohio"—a State where no such amendment has ever been submitted. The friends of the movement in Ohio are seeking to secure the submission of one now. One is really tempted to say to these learned gentlemen, in popular parlance, that it would be better for them not to know so much than to know so many things that are not so.

Englishwomen have had municipal suffrage since 1869, and it has proved so unobjectionable that the same right was extended a few years ago to the women of Scotland. Hence, as the editor of the *Rutland (Vt.) Herald* well says, "The English will be likely to judge more by their own experience than by any experiments in Nebraska, or Wyoming, or Kansas, or Boston."—*Alice Stone Blackwell in the Woman's Journal.*

I ACT for, talk for, live for this world now,
As this world calls for action, life, and talk—
No prejudice to what next world may prove,
Whose new laws and requirements my best pledge
To observe then, is that I observe these now,
Doing hereafter what I do meanwhile.
Let us concede (gratuitously though)
Next life relieves the soul of body, yields
Parespiritual enjoyments: well, my friend,
Why lose this life in the meantime, since its use
May be to make the next life more intense?

—Robert Browning.

ELIZABETH FRY'S DAUGHTER.

THE name of Mrs. Frances Cresswell will probably be strange to nearly all my readers, but her death deserves to be recorded far more than do those of three fourths of the people who are the subject of elaborate panegyrics by the papers. She was the worthy daughter of the famous Elizabeth Fry, and from early childhood she was associated with the noble works of her excellent mother. Mrs. Cresswell, who has died in her eighty-sixth year, has lived at Lynn since 1825, and it would be impossible to convey in a few lines any adequate impression of the good which she accomplished there. Her sympathetic kindness and her charity to the poor were untiring and boundless. For nearly 40 years she educated a large number of poor children solely at her own expense at a school which she established as a memorial to her daughters, and she cared for them in all ways; moreover she devoted herself all her life to the amelioration of the condition of the Lynn fishermen, in whom her interest continued unabated to the last. Mrs. Cresswell, in conjunction with her sister, wrote the "Life" of her mother in 1847, and the work was sold both in this country and in America by tens of thousands. Mrs. Cresswell survived her husband and all her children, but she never recovered from the shock of the death of her eldest son, who was known in Lynn as "the fisherman's friend," although she continued her works of mercy and charity till within a month of her death.—*London Truth*.

SPOILING CHILDREN.

"THE worst injury any parents can inflict on society is to pet and spoil their children in such a way that when they grow up the world will regret that they did not die in infancy. A mother allows her boy to 'answer her back' and treat her rudely. Years after she has gone to her account another person will reap the bitter harvest of her weakness. The spoiled son will have taken to himself a wife, whom he treats in the same rude manner that he was permitted to adopt toward his mother. A spoiled boy may possibly become a worthy, religious man, but the effect of his having been spoiled will be seen in the large amount of dross that will overlie the gold. He will be ill-mannered, overbearing, selfish, and generally disagreeable. Mothers, you can prevent this! When a boy is given to you, accept him, not as a plaything merely, but as a most sacred trust—a talent to be put to the best account. Train him to be pure, truthful, unselfish, independent. Teach him to hate cruelty, to take the part of the weak, to recognize the special gentleness and respectful consideration due to a woman, particularly to his mother and sisters. In this way you may prevent your pets from ever becoming pests."

The above extract is from "The Five Talents of Women," and most heartily will it be indorsed by even those who offend against its ideas most. The need of care for children is an undisputed question; and sometimes one is forced to question if the results for the great mass of children would not have been better if we had learned to use the word culture in-

stead of care when speaking of their training. Caring for a child seems to be purely physical and financial, the two responsibilities of a child's guarding that can be trusted to honest servants. Culture recognizes more in a child than the body. It recognizes a mind and a soul; it recognizes a future for which the present is a preparation working to positive results.

Yesterday, that well dressed mother who quietly put a rugged, healthy boy in a vacant seat in a Fourth Avenue car, ostentatiously paying full fare—though the boy was under age—while an elderly gentleman stood up, certainly was taking a *care* of the child that was sadly lacking in culture. The possibility of gentle consideration for others in the future of a boy so trained is hopeless.

Culture means care, but far more than care. It means the study of the future citizen in all his relations; it means the constant pruning of disagreeable habits; it means the imposing of burdens that will develop thought and consideration for others. Bad table manners in a child are the reflex of ignorance or carelessness of the parents, and, when developed till they become habits, are bonds that were woven by the parent. Selfishness and disregard of the rights of others are but the natural fruit of a childhood that may have had care, but lacked that which is far higher, culture. The time to begin culture is in the cradle, when the baby lies plastic to every influence about him.—*Christian Union*.

THE SEVENTH DECADE OF LIFE.

IT is a favorite speculation of mine, that if spared to sixty we then enter upon the seventh decade of human life, and that this, if possible, should be turned into the Sabbath of our earthly pilgrimage and spent sabbatically, as if on the shores of an eternal world, or in the outer courts, as it were, of the temple that is above the tabernacle in Heaven. What enamors me all the more with this idea, is the retrospect of my mother's widowhood. I long, if God should spare me, for such an old age as she enjoyed, spent as if at the gates of Heaven and with such a fund of inward peace and hope as made her nine years of widowhood a perfect feast and foretaste of the blessedness that awaits the righteous.—*Dr. Chalmers*.

LEND a hand. When? Where? To-day, every day, just where you are. You have heard of the girl who sat down and sighed the morning hours away, longing to be a missionary and help somebody, while her mother was toiling in the kitchen, and looking after three little children at the same time. You can find a place to help brother, or sister, or friend, and you can help everybody in the house by your patient, kind, obliging spirit, "in honor preferring one another," self-forgetful and mindful of others. It seems a very little thing "to lend a hand" in these quiet home ways, but if you could see the record the angels make of such a day, you would see that it was a very great thing. Boys, girls, watch eagerly your chance. Do not be cheated out of your happy privilege. It is a great, noble, blessed thing to be able to "help a little," no matter how little it may be.—*Selected*.

THE BEST EXERCISE FOR CHILDREN.

Instinctive gymnastics is, from the hygienic point of view, the best adapted to the regular development of the child. It is not liable to any of the objections we have brought against gymnastics with apparatus. It cannot deform the body, for it is made up of spontaneous movements, and conformed to the natural office of each limb. It does not localize the work in a particular region of the body, for all the limbs are instinctively invited to take their quota of exercise and it does not seduce the child into efforts touching upon the limits of his strength. Instinct also invites him to the kind of work which is best adapted to his particular aptitudes for resisting fatigue. He has a natural disposition to perform light but frequently recurring acts, quick motions, which put him out of breath, while exercises with apparatus rather exact slow and intense efforts that bring on local fatigue. Now, all observers have noticed the wonderful facility with which a child recovers his breath, and his impatience of local fatigue. Finally, natural exercise, being the satisfaction of a want, is by that very fact a pleasure; and joy shines in the face of the child who is playing freely.—*Popular Science Monthly*

ANDREW H. SMITH of New York, recently read before the Academy of Medicine an interesting and very profitable paper, entitled "The Family Physician of the Future," in which he said: "The social custom, according to which, night after night, the young of both sexes give up a large portion of the night to revelry is responsible for an enormous sacrifice of health and life. That this custom continues in this enlightened age is sufficient proof that, though the schoolmaster is abroad, the doctor is not. If the medical profession exercised the influence which the nature of its calling implies, rational beings would adopt more rational methods of enjoyment. The same argument applies to the subject of dress, and particularly to the dress of women. The future student of history, when reading of the social customs and dress of the nineteenth century, will surely exclaim, 'Were there no doctors in those days?' And the more advanced student will reply, 'Yes: there were plenty of them, but they had very little influence in the community.'"—*Exchange.*

Thoughts that are quickly "thrown" by a writer or speaker, are likely to be quickly "thrown off" by a reader or hearer. It is only those thoughts that are dug for down deep in the thinker's mind, that are likely to be planted deeply in the mind of those to whom they are imparted. He who would impress others profoundly, must first be profoundly impressed himself.—*Select.*

STATISTICS show that, under the Divorce Act passed by the British Parliament some thirty years ago, there has been a very large increase of divorce cases in Great Britain, much larger than can be explained by the increase of population. This does not tell well for the people, or for the operation of the law.

NEWS AND OTHER GLEANINGS.

—A recent article in the *INTELLIGENCER AND JOURNAL*, stating some of the objections to secret societies, has drawn out some communications on the subject, both pro and con. J. C. Young, Custer City, Penna., writes to us that he is the treasurer of an organization, the Christian Anti-Secret Society Association, which has appointed a lecturer, and desires financial help. As we do not print his appeal for funds, we insert this paragraph, so that those who feel especially interested, if they desire to contribute, may correspond with J. C. Young.

—The President of Michigan University remarks in his annual report that "a larger proportion of women than of men are taking by choice the full classical course."

—A branch broken from a peach tree in Wethersfield, Conn., last week, contained, in addition to half a dozen largely developed buds, almost ready to open, two that were in blossom.

—The weather crop bulletin, issued Second month 1st, states that, during the month of January, the weather has been decidedly warmer than usual in the winter wheat States of the central valleys, and the general weather conditions have been favorable, probably resulting in a slight improvement of the crop conditions as compared with January, 1883. The ground remains bare, however, in the greater portions of the wheat region except in Southern Michigan and the northern portions of Indiana and Ohio, where from one to three inches of snow is reported. Although there is a deficiency of rainfall reported from the Pacific Coast States for the month of January, the previous heavy rains make the seasonable weather conditions, as a whole, favorable for crops in that section.

—It is over forty years since John Jacob Astor established the Astor Library. The last annual report just published shows that the number of the volumes (exclusive of pamphlets) in the Library is 239,592, of which 1,938 were added last year. The Library has an endowment of \$1,498,409. It is a permanent and ever increasing benefaction to the people of New York.—*N. Y. Cor. in Public Ledger.*

—A paper read before the New York Academy of Sciences by Mr. A. A. Julien, speaks of the decay of the building stones of New York City. Mr. Julien says that it is a pitiable sight to see new buildings being erected in soft and often untried varieties of stone, and often covered with delicate traceries which are sure to be nipped off by the frost before the second generation of the builder has entered the house. Some of the best building-stones, Mr. Julien affirms, have never been seen in New York. Worthy of mention among these are the hard sandstones of Ohio and westward, and those occurring near Lake Champlain, the latter of which offer remarkable resistance to disintegration.—*The American.*

—A movement has been started in Norway, says *London Nature*, for the despatch in the summer of 1890 of an expedition whose object will be to reach the North Pole. It is proposed that the leadership shall be offered to Dr. Nansen, the traveler who has just succeeded in crossing Greenland. Those who are arranging the plans maintain that no other country can furnish such a crew of hardy ice men and Arctic travelers as Norway, and that a winter or two in the arctic regions would affect these men very little. The intention is, that an attempt shall be made to reach the pole by way of Franz Josef's Land. Ski which played an important part in the Nansen Greenland expedition, will no doubt again be of great service.—*The American.*

CURRENT EVENTS.

RUDOLPH, the "Crown Prince" of Austria-Hungary, died suddenly, at the palace of Meyerling, near Vienna, on the 31st ult. At first, it was given out that his death was caused by apoplexy, but the surgeons who examined the body refused to sign a certificate to that effect, as he had evidently died by violence. Whether he committed suicide or was shot remains mysterious. He was heir to the imperial throne. His mental abilities were considered good, his moral character bad. His wife is the daughter of the king of Belgium.

JOHN M. CLAYTON, a prominent citizen of Pine Bluff, Arkansas, was assassinated at Plummerville, in that State, on the 30th ult., it is believed for political reasons. He was originally from Delaware county, Pennsylvania, and was the brother of Powell Clayton, at one time Senator from Arkansas. The event caused much public feeling, especially in that State.

THE Nebraska Legislature has passed a resolution providing that at the next general election the people of the State should vote upon the question whether prohibition or high license shall be incorporated in the Constitution.

THE excitement in Paris over the election of General Boulanger to the national parliament has somewhat subsided, and no serious results have followed. It is said that many of those who supported him are now afraid they have unsettled confidence in the stability of order in Paris, and so have injured the prospect for a large attendance at the Exhibition, the coming summer.

AN extensive strike among the street car employés was maintained in New York and Brooklyn, last week, and is unsettled at this writing, though some of the lines whose cars were stopped have resumed running.

IT is announced by authority that on the expiration of his term of office, March 4th, President Cleveland will remove to New York City and practice law there.

THE total value of the exports of merchandise from the United States during the year 1888 was \$690,766,462, against

\$715,301,041 during the preceding year. The value of our imports during 1888 was \$725,224,153, against \$709,818,478 during 1887.

NOTICES.

* * A Conference on Temperance and the Constitutional Amendment will be held under the care of the Quarterly Meeting's Committee, at Friends' meeting-house, School street, Germantown, on First-day, the 10th inst., at 3 p. m. All are invited.

* * An adjourned meeting of the Joint Committee on Temperance and Intoxicating Beverages of Philadelphia Yearly Meeting of Friends, will be held at Race street meeting-house, Philadelphia, on Seventh-day, Second month 9th, 1889, at 11 a. m.

IT SINGETH LOW IN EVERY HEART.

It singeth low in every heart,
We hear it each and all;
A song of those who answer not,
However we may call.
They throng the silence of the breast;
We see them as of yore—
The kind, the true, the brave, the sweet—
Who walk with us no more.

'Tis hard to take the burden up
When these have laid it down;
They brightened all the joys of life,
They softened every frown.
But oh! 'tis good to think of them
When we are troubled sore;
Thanks be to God that such have been,
Although they are no more.

More homelike seems the vast unknown
Since they have entered there;
To follow them were not so hard
Wherever they may fare.
They cannot be where God is not,
On any sea or shore,
Whate'er betides, Thy love abides,
Our God, forever more!

—John W. Chadwick.

For Friends' Intelligencer and Journal.

THOUGHTS ON THE ATTENDANCE OF MEETINGS.

THERE is much complaint wherever Friends' meetings are held, of their smallness, especially in the middle of the week. We know that in outward nature there is no effect without a cause; this rule will apply equally well to the moral and spiritual realms; therefore, to ascertain what causes are at work to produce the effect spoken of, to propose a remedy, and know how successfully to apply it, should be the desire of every rightly concerned Friend.

It is very evident that what are called "Friends' principles," are spreading throughout the earth, and we can no longer claim as our distinctive doctrines the direct revelation of God's will to the soul of man, and obedience to the Light within, since professors of so many other denominations now teach the same. Our own members have not lost faith in these, yet our organized meetings are fast dwindling in size and some have become entirely extinct. To be a society we must have a working organization, but that we cannot have without members, and those members willing to attend, and ready to work. The question may arise, is it the fault of the principle, of the nature of the organization, or of the individual

members? No Friend will call in question the character of those great truths that enabled George Fox and his noble compeers to come out of the bonds of priestcraft and superstition, and to proclaim to the people a higher type of religion than had been preached since the days in which Jesus and the apostles taught it in its purity. It will take a bold hand to attack our organization, even admitting that it is not perfect; neither should we asperse individual character, but it is evident there is fault somewhere. True there are extraneous causes, deaths, removals, etc., that cannot be ignored; but they are not sufficient to account for all these deficiencies.

It was said by the highest authority, that when two or three are gathered in the name of Christ, there will his presence indeed be felt, and there is no need to multiply evidence to prove the truth of the assertion; but these two or three, though feeling the power of this presence and living under its influence, cannot transact the business that necessarily arises in an organized body. If in attending our meetings, we become partakers of that spiritual food which nourishes the soul to eternal life, will we willingly absent ourselves therefrom? Will we not rather flock to them in such numbers, that our houses of worship would have to be enlarged? Ministers would be raised up among us to tell a listening multitude the "glad tidings of great joy," the young and the old would mingle their prayers and praises, "we would take sweet counsel together, and walk to the house of God in company," and "as the hart panteth after the water brooks" so would our souls long for these seasons of spiritual refreshment, and they would become a necessity to our spiritual life and well-being.

While the attendance of meetings is not a means to an end, but rather the contrary, and if our hearts are full of love to our Heavenly Father, we can and will worship Him in spirit and in deed, alike in a meeting-house, dwelling house, field, or garden; yet in fulfilling the first command to love the Lord, the second, to love our neighbor, will as surely follow as the night does the day, and we will heed the Apostle's injunction to "forsake not the assembling of ourselves together," but will "present our bodies a living sacrifice, holy, acceptable to God," considering it not only the "reasonable service" spoken of, but deem it a blessed privilege, to be denied which would be a loss to us.

If then these statements are correct, the work must begin at home, in our own hearts. See that they are fit receptacles for the spirit of love to dwell in, the spirit of obedience to manifested duty; of

good-will to all persons; of forgiveness to those who wrong us; of reconciliation towards those with whom we may have been at variance; of the peacemaker, to endeavor to heal differences between our fellow-beings, and watch over one another for good, covering, when in our power, the frailties of others, with a mantle of charity, practically exemplifying the working of the Golden Rule in our every-day life, remembering it has been said, "they that hunger and thirst after righteousness shall be filled." And while fulfilling these requirements we secure our own peace and our example has led others to seek and find the truth, we will have the blessed assurance that "they that are wise shall shine as the brightness of the firmament, and they that turn many to righteousness, as the stars forever and ever."

Holder, III.

NOTES FROM PALESTINE.—V.

BETHLEHEM—THE POOLS OF SOLOMON—TRAVELING WITH THE PILGRIMS—JACOB'S WELL—NABULUS—THE PLAIN OF ESDRAELON.

BETHLEHEM is a pleasant walk of six miles from Jerusalem by the most direct road, but we went a longer way in order to include in our excursion the Pools of Solomon. We rode tiny donkeys, and a boy ran behind to urge them forward with his stick. Their skins were so tough that they did not respond very quickly to his beating.

About half an hour after leaving Jerusalem, we came to a small square building covered with a dome. This is called the Tomb of Rachel. The present building is modern. For many centuries the spot was marked by a pyramid of twelve stones, corresponding with the number of the tribes of Israel, but the monument was altered in the 15th century, and since then has been frequently restored. It stands in a small cemetery. Some Mohammedan women had gathered about two of the graves, on which were flat plates of basket-work, containing a few kernels of grains and coins, as offerings to the dead. They joined hands in a circle and moved around the graves, dancing and wailing. The central figure in the group was a young girl, who with her friends was mourning for her parents.

The road to Solomon's Pools was very rough, but our donkeys jolted along, regardless of the stones. The pools lie at different elevations on the slopes of a small, green valley. They are three in number and consist of artificial reservoirs partly hewn in the rock and partly lined with masonry. The largest is 582 feet long and 48 feet deep. Around the brims were growing delicate wild flowers. Near the Pools is the Sealed Fountain of Solomon, which, it is said, once regulated the supply of water for Jerusalem. To see this, we descended a stairway of twenty steps to a dark, vaulted chamber. In a smaller room adjoining, the spring gushed forth. In the vicinity are extensive ruins, whose origin is not now known and which offer an attractive field to the explorer.

After leaving the Pools of Solomon, we rode through a cultivated valley, which may once have

been the Gardens of Solomon, over the mountains to Bethlehem. The town appeared attractive, as we approached it, being cleaner and more thriving than the places we had seen elsewhere in Palestine. It is built on an elongated hill, whose slopes are well cultivated in terraces, on which vines and fig trees abound. In the valley below are corn fields. Occasionally we met women of Bethlehem, who are noted for their beauty. We could always distinguish them from others by the white cotton squares they wore on their heads, the cloth being thrown back from the face.

We entered the Gate of Bethlehem by a steep inclined plane, paved with stone, and rode through narrow and slippery streets. In the shops people were engaged in making articles of mother-of-pearl, olive and Dead Sea wood. The population is four thousand, and the town has about five hundred houses, in general substantially built. Bethlehem is the most Christian town of Palestine.

We went at once to the Church of the Nativity, a fortress-like building, with three adjoining convents. Entering the narrow doorway, we found ourselves in a room of noble proportions, attractive for its simplicity as well as for its associations. It is paved with large slabs of stone and contains five rows of marble columns, some of which probably once formed a part of the Temple at Jerusalem. In the walls are mosaics faded, but still interesting. The room has, however, a desolate and neglected aspect. It is considered one of the oldest monuments of Christian architecture in the world, having been built by the Empress Helena, mother of Constantine, in 327 A. D. Here Baldwin was crowned king, on Christmas Day, 1101. The last repairs were made by Edward IV. of England. Two spiral staircases lead to the crypt, which is twenty feet below the floor of the church. Descending one of these, we came to a grotto encased with marble and adorned with pictures, tapestries, and lamps. On one side was a low recess with a silver star in its pavement, encircled by the inscription: "*Hic de Virgine Maria Jesus Christus natus est.*" Above hung fifteen silver lamps, which are always kept burning. The crypt contains various other chapels known as the Place of the Manger, the Altar of the Magi, the Chapel of St. Joseph, the Altar of the Innocents, the Tomb of Eusebius, the Chapel of St. Jerome, in which he made his famous translation of the Scriptures.

On leaving Bethlehem we turned aside to see David's Well (2 Samuel xxiii: 14-17) and the field which tradition has assigned as the one where the shepherds were "keeping watch over their flock at night," when an angel announced to them the birth of Christ.

After Easter many pilgrims were returning from Jerusalem to their homes in Damascus and the towns of northern Palestine. They traveled in separate parties by day, but at night, according to previous arrangement, all camped near the same spot for safety. We joined them. Our party consisted of eight persons. Besides a dragoon and four servants, we were attended by a Syrian gentleman, who had been connected with the American Consulate, and who spoke

our language. We bought our provisions and procured our tents and horses in Jerusalem. When all were ready, our little cavalcade rode out of the Damascus Gate and wound over the hills to the top of Mount Scopus, whence we looked back upon the Holy City for the last time, before turning northward.

Our horses were fine animals, remarkably sagacious and trustworthy. We rode them in the Syrian fashion, without stirrups, our blankets and bedding being arranged upon their backs to make a comfortable saddle. This gave us the greatest freedom of motion, and we traveled many hours a day without fatigue. We could change our position, and even lie down if we liked. It was our usual programme to rise before light and rest at mid-day. This was necessary owing to the heat. Frequently we started at three o'clock and were well on our way when the sun rose. I was so little accustomed to being up thus early that I was constantly falling asleep on my horse, but he carried me as faithfully as if I had been wide awake.

During the first day we passed several small villages, among them Rameh and Bethel. The latter is now a poor little town of five hundred inhabitants. It is one of the oldest places in Palestine. Here Abraham raised an altar, and Jacob dreamed of the ladder reaching to Heaven, on which angels were ascending and descending.

About an hour after leaving Bethel we entered the more fertile parts of Palestine, where there were vineyards and orchards, but they were not as luxuriant as we are accustomed to see in America. At dusk we climbed to the brow of a hill and saw the pilgrims already encamped in a pretty valley below. They fired us a salute as we descended. Their tents were gaily striped, and flags were flying. The people were gathered together in social groups, cooking or eating by their camp-fires. They gave us a kindly greeting and we pitched our tents among them, beside a running stream. Near us were ruins supposed to be the ancient Lebonah.

On the second day we came to Jacob's Well. It is a shaft nine feet in diameter, cut into the rock to a depth of seventy feet. Originally, it may have been deeper; a church had once been erected over it, and much rubbish has now fallen in. The mouth is funnel-shaped. The spot was to me one of the most sacred in all Palestine, for, although the well is not now used, the scenery about it remains unchanged since the day when Jesus sat resting there, and talked of the spiritual life to the woman of Samaria, who came to draw water. On the right is the parcel of ground that Jacob gave to his son Joseph. Around the well corn-fields are growing to-day as then; before it, is the valley between Mount Ebal and Mount Gerizim. To the latter the woman referred when she said: "Our fathers worshiped in this mountain." The Samaritans worship there now, still preserving the forms of service and sacrifice, which, as a people, they have used for nearly 3,000 years. Just beyond Jacob's Well is Joseph's Tomb.

The town of Nablus is on the site of the ancient Shechem, with Mount Gerizim behind it and Mount Ebal opposite. They form a natural sounding board.

A voice speaking on either mountain may be heard distinctly repeated from the other, if one listens in the valley between. Nablus has about twelve thousand inhabitants. We thought it attractive as we approached it. Many of the houses had white domes, and in some portions of the town, terraces with pleasant gardens rose one above another. But our opinion was changed when we entered the streets, which are narrow and dirty. Its people are discourteous, and the least civilized of any we met in Palestine. Until recently Christians were greeted with the cry Nozrani! (Nazarene) and pelted with stones. The staple manufacture of Nablus is soap, but one would not think so from the appearance of its inhabitants.

We first entered a mosque said to be built where Jacob sat when his sons spread before him the blood-stained coat of Joseph. Then we went into the Quarter of the Samaritans. Only one hundred and fifty are left, but these live separated from all other people. We visited their synagogue—a small, oblong chamber, in which services are conducted in their own dialect. Their priest showed us a celebrated old document, called the Samaritan Codex of the Pentateuch, which has given rise to much discussion among scholars. Some assert that it was written in the time of Moses, and others that it is a production of a grandson of Aaron.

From Nablus we journeyed towards Samaria, through a beautiful valley where the streams divide, those on the east flowing to the Jordan, and those on the west to the Mediterranean. Since Nablus has grown in importance, the town of Samaria has fallen into decay. It is surrounded by cactus hedges and ruins, and is now only an insignificant village. We did not stop there, but went to a neighboring glen to camp for the night.

In the morning we proceeded to Jenin, called En-gammin (Fountain of Gardens) in the Scriptures. It is a pleasant town of three thousand people, and has a fine spring and gardens. We breakfasted in a lemon grove, close beside a viaduct, which carries water to some mills. Then we rode nearly a day through a level, tedious, sun-baked region, called the Plain of Esdrallon. It is wholly uncultivated. Thistles and weeds grow upon it to an enormous size. Not a dwelling was to be seen. On the north were Mount Tabor and Little Hermon, on the east the Mounts of Gilboa, on the south the Mounts of Samaria. This plain has been a famous battle-field. Warriors of many nations have fought upon it, from Barak to Napoleon. We used the water in our leathern bottles sparingly, lest it should be exhausted before we could replenish them. Our horses were so weary of the heat that, when we came at last to a stream, those at the head of the line lay down in the water. My friend was rescued dripping from her saddle. Our baggage was saturated. As all of the horses seemed likely to follow the example of their leaders we dismounted; the men waded the stream, and one of them carried me on his back. On the other side we camped for a time, to dry wet garments and rest.

CORA A. BENNESON.

SWARTHMORE HALL.¹

A YEAR before seeing Fenny-Drayton, I had visited Swarthmore Hall,² another home of George Fox, frequent printed notices of which have made it more familiar to us than is Fenny-Drayton. There is indeed a great difference between the little brick house at Fenny-Drayton and the handsome old hall of Judge Fell, but the gap between the two is filled up by the span of George Fox's eventful life. The simple shepherd boy had become the acknowledged founder of a Religious Society which numbered its members by many thousands, and the weaver's son was now known in official deeds involving the transfer of property—though perhaps he would himself have refused the title—as “George Fox, gentleman.”

To reach Swarthmore, when visiting the lake country of England, is a very easy journey. The traveler coming from the north, who has visited Grasmere, Derwentwater, Ambleside, and other parts of this beautiful region, will take the little steamer at the head of Windermere, the largest lake in England, and pass the whole length of the lake to Lakeside, a little village at its foot. Here is a railway of nine and a half miles to Ulverstone, a town of 10,000 inhabitants in the direct route to Furness Abbey, six miles beyond, one of the finest ruins of its kind in all England. It is a pleasant walk from Ulverstone Station to Swarthmore Hall and Swarthmore meeting-house, and the visit will well repay the time and labor it involves.

Visits to Ulverstone are frequently mentioned in George Fox's Journal, and were generally synonymous with personal insult and abuse. Swarthmore Hall, the home of Judge Fell and his wife Margaret, a little more than a mile distant, was indeed a peaceful haven for these poor persecuted Friends. “Now when I came up to Swarthmore,” writes Fox (Journal 1st ed. page 86), “I found Friends there dressing the heads and hands of Friends and Friendly people who had been broken or hurt that day [in Ulverstone]. My body and arms were yellow, black, and blue with blows and bruises received amongst them that day.”

Margaret Fell, the great-granddaughter of Anne Askew, the martyr, was very early convinced of the truth of the doctrines preached by George Fox, as a little later were the larger number of her family. Religious meetings of Friends were now frequently held in the Hall, as Fox thus writes: “And while I was in these parts, Richard Farnsworth and James Naylor came hither to see me; and the family and Judge Fell being satisfied that it was the way of truth, notwithstanding all the opposition, let the meeting be kept at his house. And a great meeting was settled there in the Lord's Power, . . . which hath continued there nearly forty years, until the year 1690 that a new meeting-house was erected near it.”

¹Conclusion of a paper read before the Historical Society of Pennsylvania by Dr. Jas. J. Lewick.

²Swarthmore—Swarthmoor. I have no doubt that the correct mode of writing this name is the latter, *Swarthmoor*—the strong house on the moor; but as the name is always written *Swarthmore* in Fox's Journal, and has for two centuries been so written, I have retained this title. See “Fells of Swarthmoor Hall.” London, 1875.

George Fox modestly refrains from telling by whom this new meeting-house was built, but a letter written by him, under date 15th of Twelfth month, 1686, tells the story. In it Fox says: “I offer and give up freely to the Lord, for the service of his sons and daughters and servants called Quakers, the house and houses, barn and kiln, stable and all the land, with the garden and orchard, being about three acres of land, more or less, with all the commonage, great turfing, moss, with whatsoever privileges belonging to it, called *Pettys*, at Swarthmore, in the parish of Ulverstone. And also my ebony bedstead with painted curtains, and the great elbow chair that Robert Wlder sent me, and my great sea case with bottles in it. The land is free from all tithes, and it may keep the meeting-house in order and repair.”¹

This property of *Pettys* was one George Fox had some time before purchased; and on it was built what is now known as Swarthmore Meeting-house. The place is surrounded by a gray stone wall, inside of which is some pretty shrubbery. Over the doorway of the meeting-house is the inscription—

EX DONO G. F., 1688.

Within the stone vestibule is another doorway, the frame of which is made of two of the bedposts of his ebony bedstead; the great elbow arm chair, and another from Swarthmore Hall are here, and a long narrow chest is pointed out as that which George Fox carried with him when he crossed the seas. The interior of the meeting-house is plain, neat, and comfortable looking. The wood work is painted a light lead color. The preachers' gallery is somewhat elevated above the floor, and has its table for the Monthly Meeting. Meetings both for worship and for discipline are still regularly held here. But the most interesting object in the building is George Fox's old Bible and its chain, by which it is said it was attached to the gallery post in the early days of the meeting-house. The Bible is the edition sometimes known as the *Treacle Bible*, printed A. D. 1541. It is now on a table, and with its huge chain, is covered by a glass case. It was open at the text in the book of the prophet Jeremiah, and read “*Is there no treacle?*” in *Gilead*, no physician there?”

It is but a short distance from the meeting-house to the Hall, which has itself been a comfortable old-fashioned house, well suited, two centuries ago, to a family of wealth and position. The old hall or dining-room in which the “great meetings” were held is still there, as it was two centuries ago, and adjoining it is Judge Fell's study or library in which he was accustomed to sit, with open door and within hearing of what was said, but without compromising himself as being actually present in the meeting itself. For, however much Judge Fell may have been “convinced,” as George Fox writes, he never avowed himself one of the Friends. Perhaps in this way he was better able to help them when in trouble, than he would have been had he publicly joined in their meetings.

¹“Fells of Swarthmoor Hall.” London, 1875.

²*Treacle* is here used as synonymous with *theriaca*, a Latin word meaning a medicine capable of curing or preventing the effects of poison, especially that of the bite of a venomous animal.

The old walls have, many of them, carved oak wainscotings, and the place shows what it once "had been." But it is rather sad to see the decadence into which Swarthmore, Dolobran, Llaitighwm, and other homes of the early Friends have now fallen. Given up to tenantry, sometimes to simple farm hands, the contrast between what they now are and what they have been is anything but cheering. And yet in the great hall at Swarthmore on the table there was at the time of my visit a large folio volume. The book was open as if some one had lately been reading it. I was curious to see what was on the page, and my curiosity was gratified by finding that it was a sermon by Charles H. Spurgeon entitled, "*We must fight against sin!*" So that the old warfare is still waged at Swarthmore Hall, though by other hands and under other banners.

Eleven years after the death of Judge Fell, his widow became the wife of George Fox. Everything connected with this marriage shows the unselfish character of George Fox. The marriage did not take place until it had the full approval of Margaret Fell's daughters and their husbands; and it was well known both to Fox and to his future wife that by a second marriage the widow of Judge Fell forfeited her right to Swarthmore Hall. Fortunately by this forfeiture the estate went, not to her son, but to her daughters who, all her remaining years regarded their mother as mistress, and their "dear father," as they then always styled George Fox, as the master of Swarthmore Hall. But it was not until nearly six years after their marriage that George Fox came to Swarthmore to make any stay.

Here he remained for a year and eight months in feeble health, which gradually improved in the loving social atmosphere which he now breathed. But on the 26th day of First month, 1677, he again entered on his public service, crossing to Holland, and so far as can be learned, was rarely, if ever, again resting at Swarthmore. He died in London, A. D. 1690, and twelve years later Margaret Fox peacefully ended her days in this old hall, which will always be associated with much that is deeply interesting in the history of the Religious Society of Friends and of him who is so generally regarded as its founder.

GRANT, O Lord! that our varied experiences from day to day may prepare us for that higher life which impends over us. May we not shrink from it. May we labor so that we shall be accepted of God at whatever hour this life may end. May we not count it dear, nor seek to prolong it, nor dread its termination. May we listen for thy call. As men wait and watch for the morning through the weariness of the hours of the night, so it may be given us to long for our rest—to be homesick for heaven.—*Selected.*

WHERE Christ brings his Cross he brings his presence; and where he is, none are desolate, and there is no room for despair. As he knows his own, so he knows how to comfort them, using sometimes the very grief itself, and straining it to a sweetness of peace unattainable by those ignorant of sorrow.—*E. B. Browning.*

For Friends' Intelligencer and Journal.

THE TRUE SOURCE OF STRENGTH.

"Judge not according to the appearance, but judge righteous judgment."

We hold Jesus as the highest type of life: it was declared that "in his humiliation his judgment was taken away," and he suffered crucifixion rather than exercise any human will, setting us a perfect example. There we see that the first requisite necessary for us to come before the Lord is to humble ourselves, remembering that the little child has been pre-figured as the true condition, implicitly trusting in the All-Father as Director and Ruler Supreme. Let us all examine ourselves and see by what judgment we judge, not overlooking this truth: that by the same, God judges us. Our outlook upon others should be through the lens of our own spiritual condition; and if this be under the first proposition, it will be in mercy, even though a darkened life is the object of our care and watch. When John came preparing the way for the Messiah it was declared as "the voice of one crying in the wilderness;" and the prophet describes how it shall be: "Prepare ye in the wilderness the way of the Lord, make straight in the desert a highway for our God." Now the mere repeating of a scripture text, the casual thought of it as pertaining to a people who lived and had every function of a being like ourselves, is not sufficient. But the truth as it comes to our lives with an application, is the lesson we want to learn; and an experimental knowledge is the only availing medium whereby we can learn it in the true sense.

There remains to be an inward wilderness, and we individually hear the voice crying to us to "prepare the way for our God." Oh, let us not search the scriptures as did the Jews, thinking to have in them eternal life; but let us come to this "Me"—this Christ of God, and know of the way to eternal life. How prone we are to judge one another without mercy; that is, without the power of God's mercy upon us; and we call some conservative and reprove others for being discouraged, cut off a hearing from another, and so set ourselves up as the judge. Who doth direct the Spirit of the Lord, and who understandeth the will of the Most High, except the glory of the Lord shall be revealed and the sons and daughters bow down to him in the way of his appearing? Then the way of the Lord will be made straight, and all his directings will be in paths of peace; and we can exclaim with the prophet: "O thou that tellest good tidings to Zion, get thee up into the high mountain; O thou that tellest good tidings to Jerusalem, lift up thy voice with strength; lift it up, be not afraid; say unto the cities of Judah, Behold your God!"

Even the youth faint and are weary, and our elderly people fail us; because we wait not on the Lord as devotedly as we ought. While a conflicting judgment is extant, where is the tower for our children to watch from? Remember there is no place of safety only on the watch-tower, and if we are not in love with this position, we are not dwelling in the tent of the Lord.

MARY G. SMITH.

Hoopston, Ill.

SCRIPTURE LESSON, No. 8.

SECOND MONTH 24, 1859.

THE GREAT TEACHER AND THE TWELVE.

GOLDEN TEXT:—"And they went out and preached that men should repent."—Mark 6: 12.

READ Mark 6: 1-13.

THIS is believed to be the first time that Jesus visited Nazareth after he came before the people as a public teacher. It had been his home since his parents returned from Egypt, and fearing to go back to the ancestral home, had turned aside into Galilee and dwelt in Nazareth (Matt. 2: 23). Here he grew up, and became a carpenter, working with Joseph at the trade, and preparing himself for the broader field of usefulness which was opening before him. His name and his fame had been spread abroad as he journeyed from place to place through the provinces of northern Galilee, and doubtless had reached his own city.

He cometh into his own country. Into that part of Galilee in which Nazareth was situated, to the home where Mary, his mother, and her children were still residing.

And when the Sabbath was come. We find Jesus careful always to attend upon the religious services of the synagogue, in whatever city he might be on the Sabbath, or seventh-day of the week, which was the day of rest observed throughout the whole Hebrew nation. They were required by law to give one-seventh of their time to rest, to meditation, and to prayer. Besides, there were memorial or holy days, that called for ceasing from labor. These were commemorative of great events in the nation's history, and were observed either as days of fasting and humiliation, or with glad thanksgiving for some signal favor or deliverance. The custom comes down to our own times, and the memorial days of our nation are occasions of great rejoicings. Friends have never, as a people, observed these holy days; to them all days are alike holy. The Sabbath, or First-day, as it is set apart for rest from labor, is used by them, as by other Christians, for worship, but as a testimony to their belief that any day may be devoted to Divine worship, they have given one morning in the week to that service, wherever it has been possible to get Friends to gather at that time.

Went into the synagogue. Luke 4: 16 to 30, gives the account of Jesus on this occasion, which may be referred to.

And they were astonished. The people among whom he had spent all his life were not prepared for what they saw and heard. They knew that he was the carpenter, and they wondered where he obtained all his knowledge.

He called unto him the twelve. These were the disciples that had become intimately associated with him in his work and ministry, and had received his instructions.

He began to send them forth by two and two. That they might be helpful to one another, and in the lonely journeys they would make through desert and solitary places comfort and cheer each other in the way. The preparation for the work was very simple, but the authority under which they went forth was all-sufficient for the labor that lay before them. It

is the same now whenever the Heavenly Father calls us to some service; he suffers us not to take anything that may not be needed, no superfluity, but he gives abundantly as the need arises, and makes up every loss or want, so that even the spirits of evil are made to acknowledge the Divine Power.

Repentance has been defined as "the relinquishment of any practice from the conviction that it has offended God." There is a high court of judgment residing in the soul, before which all the acts of our lives are reviewed, and the decision given as to their character, whether right or wrong. Here, too, questions of right and duty are debated in reference to their government of actions yet to be performed. The decisions of this court are imperative. No argument of expediency is entertained. No speciousness of reasoning can alter the absolute verdict. The mandate is unmistakable, and, if obeyed, peace of spirit and quietude of conscience ensue; if disobeyed, remorse and anguish of spirit are the result. There is, however, no compulsory enforcement of the decrees of this judgment seat of duty. Man is not left in doubt as to what he ought to do, but still there remains with him a freedom to do or not to do, as he may choose. Were it not so, then could there be no sense of responsibility. We are well aware that there is a sense of responsibility resting upon us. We have the consciousness that we ourselves choose what course in life we shall pursue. The very struggle to decide between the conflicting influences of "the internal promptings and the external desires," makes our characters and tests the nobility of our lives. The soul grows strong by the victories it achieves. Failures to maintain our highest standard of right and duty bring regrets, compunction, remorse; if they end here the lesson has failed in the accomplishment of its purpose. Repentance alone brings spiritual strength. We may be sorry for a fault and still go on in our wrong doing; but when the conviction of our sin comes with such force to us as to lead us to relinquish the practice, then the victory is won that is met with the Divine blessing. To obey becomes strengthening and elevating when it is the obedience of our choice. When John the Baptist saw many of the Pharisees coming to him for baptism, he clearly outlined the character of true repentance and distinguished it from that which these self-righteous professors set forth as meritorious. "Think not to say within yourselves, We have Abraham to our father," he said unto them, but "bring forth therefore fruit worthy of repentance." It is the fruit, not the promise; ah, how prone we are to make the promise, though we know well enough that the Divine blessing rests only on the promise that is fulfilled.

Each one of us is bound to make the little circle in which he lives better and happier; each of us is bound to see that out of that small circle the widest good may flow; each of us may have fixed in his mind the thought, that out of a single household may flow influences that shall stimulate the whole commonwealth, and the whole civilized world.—
Dean Stanley.

For Friends' Intelligencer and Journal.

MIGRATIONS OF THE RAT.

The idea of migration did not originate with man. Long before his era, both plants and animals, driven by a change of climate, by the rise and submergence of continents, or by enemies of their own kind, had sought homes far from their native habitat.

But human agency has aided much in the present arrangement of the vegetable and animal life of the globe. Besides the domestic animals which have accompanied man in his wanderings and the various useful plants introduced by him, there have been other and less welcome companions of his travels both by land and sea; ships from the Old World have brought us immigrants who did not report at Castle Garden, and railways have furnished conveyance to many passengers who neither held a pass nor paid their fare. The European cabbage butterfly was introduced into Quebec and has spread from there into various parts of the United States. As a sort of return for this most unwelcome contribution the Colorado beetle has traveled eastward in grain cars to New England and from there has made its way to Europe.

But perhaps the most persistent and extensive traveler in man's footsteps is the rat. Originally a native of India and Persia, this rodent is at present almost as widely distributed as man himself. In their native land the black rat (*Mus rattus*) and the brown rat (*Mus decumanus*) exist together, each filling his own place in the fauna of the region. The former migrated first. Entering Europe, it soon spread over the continent, and according to the old German legend these pests had become so numerous in the town of Hamelin by the year 1284 that the magic art of the Pied Piper was called into requisition to free the town from vermin. The Piper, having enticed the rats into the Weser river, and being refused his promised recompense, again began his music, this time drawing after him the children of the town to Koppelerberg Hill, where

"A wondrous portal opened wide,

As if a cavern were suddenly hollowed;

And the Piper advanced and the children followed;

And when all were in, to the very last,

The door of the mountain-side shut fast."

So runs the legend, still popular in the old German town in Brunswick. For further particulars the reader is referred to Browning, who has told the story in verse and who draws from it rather a lame moral in regard to the keeping of promises—a moral which suggests the inquiry as to whether the motive for keeping promises should be a fear of the consequences of breaking them or a desire to conform to the inherent fitness of things.

As to the legend, though the anniversary of this mysterious event is still observed by the residents of Hamelin, one's faith is somewhat shaken when one reads that the rat was probably not known in Europe till at least two centuries later than the date given by the chronicle for the appearance of the Piper.

For many years after his introduction into Europe, the black rat continued his depredations unmolested.

But about the beginning of the eighteenth century the brown rat appeared in the half-European, half-Asiatic town of Astrakhan, and from there advanced westward over the whole of Europe, fierce as the savage hordes which swept down from the North upon Rome, driving his smaller and weaker kinsman before him. When he reached England he received two new titles, which, though not intended as marks of honor, at least go to show that he received considerable attention on his first arrival in that country. From a mistaken notion that this unbidden guest had come from Norway, he was styled by some the Norway rat—a most inappropriate name, since that country was one of the last invaded by him.

Others seized the opportunity to cast reproach upon their alien king, George I., who had left his German home in response to a call of a Protestant Parliament, and had come to rule over a divided country. They declared the hated house of Hanover and the brown rat had entered the land together, and the latter was thenceforth known to the Jacobites as the Hanoverian rat.

From India to the shores of the Atlantic this four-footed wanderer had come, but his pilgrimage was not to end yet.

The beginning of the last quarter of the eighteenth century brought to our shores two invaders—the British soldier and the brown rat. The first, after eight years of conflict, gave up the struggle and retired. But the second, while the last ship-load of troops sailed out of New York harbor, was still pursuing his victorious career of conquest. Here, as in the Old World, the black rat had preceded him, and here as there fell a victim to his rapacity. At the present day the black rat is a rare sight while the brown rat has become a true citizen of the world and calls all lands his home.

Living in the midst of filth, he is himself scrupulously clean. Omnivorous in his habits, a scavenger by profession, he is probably beneficial to some extent in devouring refuse. Indeed the disappearance of the plague in Western Europe has been attributed by some to the destruction of disease producing matter by this animal after its introduction into that region.

Hunted and despised, a parasite of civilization, an enemy of industrial growth and yet a part of it, this prolific animal continues to thrive and to make for himself a home wherever man establishes his dominion.

ANNA L. NICHOLS.

State Centre, Iowa.

FAITH is better than sight; for faith is trust in One who can be depended on more surely than even our own senses. Our eyes may deceive us; but He who deserves to be trusted implicitly, cannot prove untrue. The very idea of faith is confidence beyond the realm of the senses. It is the child's restfulness in the strong arms of the capable parent, in an hour when the child himself would be powerless for his guidance or his protection.—*Selected.*

"It is better to set ten men to work than to do ten men's work."

THE UPPER WINDOW: A PARABLE.

IN an eastern city may be seen, any day we choose to look, a compact residence, sufficiently roomy yet without waste spaces, symmetrically proportioned, built for service, but at the same time satisfying the desire for beauty. The sole occupant of this abode has resided here alone for many years, and it may be mentioned also, that the very day it was completed he took possession of it. To say that he dwells alone, may seem to convey an idea of loneliness, but such is far from the truth, neither can we admit that he feels like a prisoner, though he never leaves this dwelling-place.

We have spoken of the comely proportions of this house as it appears from the outside, and it is said, that within may be found every convenience and comfort that one could desire. Beautiful windows open from his living room, and through these he communicates with the outer world. But there is a certain use for each window, as for instance, from one he beholds the most attractive pictures of moving life; here a beautiful landscape is spread before him, and all the glory of sun and sky and the majesty of clouds and tempests fill his soul with wonder and delight. It must be confessed that there are, at times, scenes which swell his heart with distress, yet he would not voluntarily close his eyes upon the great panorama. Through one window come strains of music; the clamor of many voices, discordant or harmonious; melody of birds, and the wail or the shriek of the flying winds. Through another he is made conscious of the great sea's salty smell, or is greeted by the pine tree's spicy fragrance, but time would fail to tell one-half of the delights that are his to enjoy.

Thus in much joyousness the years wear on, our friend has been so fully occupied with the attractive sights and alluring sounds about him that he has scarcely noticed an upper window, small, rather difficult to reach, and through lack of use, dimmed and dusty. But there comes a day when the enjoyment of outside scenes seems to flag, and his heart grows more sensitive to sorrow; when the wail of grief drowns the strains of gladness; a sense of the unrealness of things takes possession of him and, withdrawing from the outer world, he stands in dark-

ness. Yet we cannot say in darkness, for, from the upper window a dim ray of light falls upon him, and, for the first time he consciously fixes his eyes upon it. How pure the light appears, though the glass is hazy through neglect; but he reaches up eagerly to brush away the obstructions to its clear shining. Patient now, and intent, he gives his whole attention to perfecting the upper outlook, and his heart is made glad by the purest ray of light that ever dawned upon him. Strange as it may seem, this light, so different from that which reached him through his lower windows, causes their light to give him new happiness, and changes his gloomy earth view into a grand picture, lighted by Heaven's own glow.

Have we kept our upper window clear and free for the passage of the heavenly light?

Even before the joyous sights of the lower world grow tiresome may we raise our eyes to the pure light above, and through its illumination, understand clearly the true value of the mingled and sometimes puzzling experience we call our human life.

MARRIAGES.

SMITH—DUELL.—At the residence of the bride's parents, Wenonah, N. J., Eleventh month 21st, 1888, under the care of Buckingham Monthly Meeting, Pa., Edgar A. Smith, son of Sarah J. and the late Benjamin W. Smith, of Holcomb, Pa., and Tacy, daughter of Chalkley and Mary G. Duell.

DEATHS.

BUNTING.—At his residence, near Edgewood, Bucks county, Pa., Second month 1st, 1889, of typhoid pneumonia, Blakey Bunting, in the 65th year of his age; for several years an overseer of Middletown Monthly Meeting.

EASTBURN.—At his residence, Newtown, Bucks county, Pa., Second month 6th, 1889, Aaron Eastburn, in his 85th year.

FAWCETT.—In Philadelphia, Second month 3d, 1889, Frances Fawcett, in her 83d year.

JACKSON.—At his residence, near Stephenson, Frederick county, Va., on the 6th of Second month, 1889, J. Fenton Jackson, in the 71st year of his age; a member of Hopewell Particular and Monthly Meeting.

PAINTER.—At Darby, First-day, Second month 3d, 1889, Emma T., wife of George B. Painter, and daughter of Garrett Thatcher, of Brandywine Summit, Delaware county, Pa., aged 44. Interment at Concord.

PALMER.—At the home of her parents, Spencer and Eliza W. Chandler, Hockessin, Delaware, First month 27th, 1889, Phebe H., wife of Norwood Palmer.

With a full realization of the outflowing tide of life, our young friend waited calmly the coming of the messenger whom we call death, often supplicating for patience after expressing her desire to be taken when the Master's time should have fully come.

Earth's twilight was endurable only as Heaven's dawn, and to her pleading question, You will not keep me, will you? our hearts responded, No, truly! and we rejoiced in her joy as she entered into rest.

R.

POWELL.—At Bethpage, Long Island, Eleventh month 16th, 1883, Sarah F. Powell, widow of Richard S. Powell, in the 86th year of her age.

This dear friend was for many years an elder of Jericho Monthly Meeting, and was loved by all whose fortune it was to know her. She loved to mingle with Friends, and felt a concern to regularly attend meetings, both for worship and discipline and to encourage her family to do so. She was simple in her tastes, modest and retiring in her nature, always industrious and faithful in performing the humble duties of her life.

The beauty of her life shone most fully in the home circle, where she was a loving and devoted parent. She showed a mother's unparalleled love in her tender care and sympathy for one of her daughters who has been an invalid for many years, and who still remains to mourn the loss of a mother who preached by example, performing every known duty, and endeavoring to live a truly Christian life.

The last few months she seemed to realize the end was near, sat calm and quiet, but cheerful, as if her work was done and only waiting.

H. W. C.

SHARPLESS.—In Philadelphia, Fifth-day, Second month 7th, 1889, Isaac Sharpless, of heart failure, in his 67th year.

SITER.—At his residence with his son-in-law, T. Morris Perot, Second month 3d, 1889, Adam Siter, aged 84 years; a frequent attendee of Race street Meeting, Philadelphia.

SMEDLEY.—Second month 8th, Albin M. Smedley, aged 54 years; a member of the Monthly Meeting of Friends of Philadelphia.

SMITH.—At her home, in Tinicum, Bucks county, Pa., Twelfth month 25th, 1888, Rebecca Smith, aged 71 years; a member of Buckingham Monthly Meeting, Pa.

WALTER.—At her home in Christiana, Lancaster Co., Pa., on the 18th of First month, 1889, Haona B. wife of Geo. H. Walter, in the 75th year of her age; a member of Sadsbury Monthly Meeting.

The death of this faithful wife and devoted mother has left an aching void in the hearts of those that loved her and looked to her for counsel and guidance.

Although having lived the time allotted to mortals, she desired to regain her health that she might assist in the care of her afflicted husband, whose faithful nurse she had been for over two years. But when she found her strength was not to be restored, she was eager to join those who had gone before and to be at rest in the Heavenly Home. She had a kindly and sympathetic nature that felt keenly for the sorrow and suffering of others and was ever ready to aid those in want, or speak a kindly word to those in trouble.

She was the mother of seven children, five of whom are left to miss her loving companionship.

The sweetest lives are those to duty wed,

Whose deeds both great and small,

Are close-knit strands of an unbroken thread,

Where love ennobles all.

M.

WILLS.—On Second month 2d, 1889, Zebedee M., son of Zebedee R. Wills, near Marlton, N. J.

WILLIAMS.—Second month 3d, 1889, at her residence in Willistown, Pa., after almost a lifetime of patient suffering, Amy H. Williams, in the 68th year of her age; a member of Goshen Monthly Meeting.

EDUCATIONAL.

SCHOOL INCENTIVES.¹

If we could make searching inquiry into the real causes of the energy and persistence with which, in varying degrees, our pupils pursue their studies, I imagine we should come upon some remarkable varieties of motives.

I would not be surprised to find inertia, pure and simple, the actual determining force in many cases; the pupil going on without much genuine interest, and with no real appreciation of the ends to be attained, going with the stream because he is in it; the smooth-working machinery of our modern school systems carrying him on much as Dickens's cab-horse, who though he fell down when taken out of the shafts, went very nicely all day by virtue of the extra high wheels, the tight check-rein, and the fact that amid such surroundings it is easier to go straight ahead than to do anything else. Let us hope that unlike the abused beast, such pupils may escape at least a portion of the reward of labor whose purpose they so little understand.

We would find many influenced by a kind of prevalent belief that education, in some way or other, is an excellent thing; many, determined to "get an education" because they are convinced that it will render them valuable assistance in "getting on"—an idea that while no branch of science ostensibly treats of it, the valuable part of education is the acquirement of the ability quickly and successfully to open that oyster, the world of business success.

We should be astonished, were the whole truth known, to find how much of the work done in our schools is well done, and persistently followed up, because of the mere pleasure which the pupil has in doing it.

Children are not the only people who do not always know when they are enjoying their greatest pleasures.

It is no matter of wonder that many a boy should be clamorous for vacations, which he really enjoys far less than school, and should rush out at recess and crawl back at the tap of the bell when if the truth were known, he enjoys his geography more than leap-frog. He is the father of the man. Do we not long with a genuine longing for a real vacation, and when we get it, wonder what we wanted it for? Do we not forsake our comfortable homes, exchanging their roomy apartments for the veritable confines of the seashore hotel, and their running water and ready gaslight, for the kitchen pump and occasional kerosene lamp of the ideal country house? And all apparently for the purpose of discovering how much we really enjoyed our own homes.

We are unhappy, frequently, because we do not know how happy we really are, and we must not, therefore, find fault with the boys and girls for not knowing that though some of them grumble a great deal and some imagine that they are suffering many hardships, they really are having a very good time after all.

¹ Read at Educational Conference, 15th and Race Sts., Philadelphia, First month 26, 1889, by W. W. Birdsall.

But the incentives which prompt the labor of our pupils are too various to be discussed; the point to which we should talk is by what means we may so supplement these incentives; what additional, or artificial inducements may be used in order that we may successfully interest the indifferent, stir up the sluggish, infuse earnestness into the careless; what wise words, or deeds, of ours shall be "as goods" to those who, comprehending not the purposes of the labor, and having studied too little to know the joys of study, "creeping like snail unwillingly to school," fail to make even snail-like progress there.

In the first place it would be well if we could reduce to a minimum the artificial hindrances inherent in our school systems.

I believe that one of the most effective incentives would be the opportunity, could it be offered to every child, of advancing in his work just as rapidly or slowly as his intellectual growth will allow. There can be no doubt that while our graded system is on the whole an immense advantage to the majority, and in certain ways to every pupil, it hinders some, diminishing their taste for study by making their tasks too light, while it hurries others beyond their ability, sacrificing them to the demand of the majority, making both the bright boy and the dull boy the slaves of their mediocre brother.

We have been prone to overlook intellectual differences, and to assume that the same results ought to appear from the work of every pupil, and in the same time; we have been prone to forget that different intellectual attainments may be equally good, equally high, capable of equal, though different, service; and so we have mourned over those who failed, and "would not be comforted," and, what is worse, have taught our pupils that when they fail to "get up" they have wasted their time, and disgraced themselves and us, so that their incentives are all gone, and they too frequently do little more in school.

Perhaps the nearest approach to the natural progress, is made in those schools where promotion is most frequent. If failure means the loss of an entire year's work, the idea of "passing" is likely to assume an undue importance in the minds of pupil and parent and teacher, and the result may be summed up in the significant word, "cram." If we could have more frequent promotions, so that failure should really mean an opportunity to deepen and broaden and *fasten* the work of the last few weeks or months, we could afford to be more honest in our judgment of candidates for promotion, and I believe that we should have fewer discouraged, mis-located, aimless pupils.

It seems to me that we have frequently gone far astray in this matter of incentives; substituting means for ends; setting up false standards and lowering our ideals; and while it is proper that we should in this matter be "all things to all men, if haply" we "might gain some," yet we should confine such doubtful and hazardous expedients to cases, I will not say *beyond*, but *below* the reach of higher and nobler springs of action. While all the machinery of the school will necessarily assist in

keeping our pupils up to the mark, it seems to me that there are two things which the teacher cannot do too constantly or too thoroughly. The first is, to impress upon his pupils their duty as responsible beings, to attain their highest development, to approach the limit of their endowments, to make of themselves the best, and, therefore, the most useful men or women that under their individual, limiting circumstances is possible. It is not necessary that the boys of my class shall excel or even equal those of any other class—they are responsible for their own possibilities. Every boy cannot lead his class, or be President of the United States, but he *can* do the best that is in him.

It may sometimes be wise to call John's attention to the fact that Henry is doing better work, but I believe a healthier and certainly a nobler ambition will be excited by showing him that John is not doing what John's own mind and character demand as their just due. We shall gain immeasurably if we can induce our pupils to attach less importance to comparisons between themselves and their mates, and instead, to compare themselves with themselves, "the actual with the possible," and to make this comparison the spur to noble effort.

And the teacher cannot too much or too successfully, show his pupils how, by doing it himself.

We talk about it a great deal, but I believe we do not really sufficiently value the personality of the teacher as an educating force.

"Hitch your wagon to a star" is an admonition that requires some imagination to be deemed practical, but it comes very near realization when a careless boy or girl takes to revolving in a more or less eccentric orbit round a genuine noble-minded, high-souled teacher.

Have I got my head in the clouds? Well, I'll say it another way. I know a man who can make a boy imbibe Latin and Greek with much the same kind of enthusiasm as the kindergarten children display in their work. I mean that his pupils advance rapidly, know that they are advancing, and are conscious of their enjoyment. I don't know many such men. So far as I know, he is able to do it for the following simple reasons: Every boy in school knows that his teacher has the entire respect and confidence of the intelligent portion of the community, and that he is a factor in the community outside of his school work. Every honest boy heartily likes him, because he is a frank, good-natured, likeable fellow—in short, because he can't help liking him. Every boy knows that, whether he does well or ill, he may expect justice at his teacher's hands. Every boy in that school has a profound respect for his teacher's varied and thorough scholarship. Each of his pupils has discovered that it is a delight to learn of one apt to teach. Does not one of these pupils "hitch his wagon to a star?"

Philadelphia, First month 22, 1889.

CREEDS and forms, and a literal faith, will do nothing for us. We must give up our own wills entirely, and become like little children; it is the only way we can enter the kingdom.

TEMPERANCE NOTES.

At the adjourned meeting of the Philadelphia Yearly Meeting's, "Committee on Temperance and Intoxicating Beverages," held on th 7th inst., the main business to claim attention was the consideration of the draft of an address, on the proposed amendment of the Constitution of Pennsylvania, prohibiting the Manufacture and Sale of Intoxicating Beverages. The address had been prepared by a sub-committee and claimed careful consideration. After a second reading and a few changes the paper was accepted. There was a diversity of opinion as to the proper method of bringing it before the people of this Commonwealth, which finally resulted in referring it to the committee appointed to assist the clerks in preparing a report of the work of the Committee during the year, to be submitted with that report to the next sitting of the yearly meeting.

On First-day, the 10th inst., a Temperance Meeting was held in Friends' Meeting-house, Germantown. The attendance embraced those who are usually present on First-day morning,—members of the Temperance Committee and others from Philadelphia and several interested workers of the vicinity, not Friends. The principal speakers were Dr. H. T. Child and Lewis D. Vail, who very ably presented the subject. Henry Bentley gave a brief yet interesting account of his experience in one of the principal cities in Maine, regarding the oft quoted testimony that "Prohibition does not prohibit." He found that the law may be evaded, by using the same secret precautions that the robber uses to accomplish his nefarious purposes. Several others spoke in favor of the proposed amendment to the Constitution, and encouragement was given to all present, to use their influence in its direction. The next Temperance Meeting will be held at Frankford, on First-day, the 17th inst., at 3 p. m.

A SUGGESTION TO THE PHILANTHROPIC.

EDITORS INTELLIGENCER AND JOURNAL:

SINCE the Santee Sioux Indians have had their land allotted to them in "Severalty" and the balance of the Reservation (in Nebraska), has been opened for settlement to the white people, I have often been exercised in my mind. When I look at the situation of the settlers near the Reservation I appreciate what heavy burdens must naturally arise for those in its vicinity, especially for those who are living so near to the Indian families that the children of the two classes must often mingle on the playground and in almost every department of social life, and in thus mingling imbibe more or less of the habits and character of those with whom they associate. We must confess to ourselves that these Santees, though far in advance of some other Indians, are not civilized up to a moral status that is desirable, and have not arrived at a civilization of moral culture which we could desire for our own children. I hold to the idea that civilization has a preëminent right to set her foot wherever she can; and wherever she obtains a foothold her right to do so draws to itself an accompanying duty or obligation. The Society of Friends

has been very active in advancing the civilization of the Santee Indians. Let us look at the condition of things as they most likely exist, and at the circumstances of those who are expected to aid in the furtherance of this civilization.

Those living on the frontier are generally a mixed class of people. Take first, our own countrymen who have left their relatives in the East, and who have scarcely sufficient means to keep the wolf from the door; but who, with brave hearts, strong limbs, and an energy which is worthy of success, came West and took up land near the Reservation and settled down with an earnest will to make a home for themselves and growing families in spite of the difficulties of frontier life. Then there are those from across the ocean, who have been attracted to the United States by our republican form of government and the great opportunity of acquiring land and making homes all their own, who may have settled down on land perhaps adjoining the Reservation and are working earnestly and patiently, although under many difficulties and privations, to make for themselves a home and a competence ere age overtakes them and they can work no more. There are growing families among these also. At the earlier part of the time in their struggles against the common inconveniences and hardships of frontier life, the education of the children is sadly, although not intentionally, neglected. Some grow out of childhood into manhood and womanhood with but limited literary advantages. In the earlier days it was difficult to organize school districts, owing to the distance families lived apart, although they were often organized, covering many miles in area. Thus, as time rolls on and these who are children assume the responsibilities of life, how can they be qualified without the helps and aids of education to do the work which has fallen to them to do, in maintaining and improving their own moral status and standing firm against the inroads of habits inherent in a semi-civilized race.

Friends have spared not time, nor means, nor labor for the help of these Indians; but should we as Friends—the world renowned friends of the Red Man—turn him out in the condition in which these Santees are, into the social circles, as it were, of our brothers, and not do anything to hold up their hands in the way of fortifying them with books, papers, or libraries? Some might question the feasibility or the propriety of such a movement as the gratuitous furnishing of these settlers with reading matter; but we have never tried it yet. There are, no doubt, philanthropists among them and public-spirited men who would be glad to see the rising generation growing up and gaining, as they grow, all the knowledge they can grasp to fit them for the increasing duties of life. I believe that much of the money spent for them would do the Indian more good, eventually though indirectly, by spending it on settlers adjoining the Reservation, especially the children, in the way of wholesome reading matter—children's papers for the little ones, and books and periodicals for the older ones and parents. There are already three institutions on the Reservation devoted to the instruction of the Santees in that place. That there is much

need of more philanthropic work round about Santee, no one can doubt, if they will but take time to consider the subjects I have barely hinted at; and I hope some abler pen than mine may set forth the necessity of work in this direction. M. K. H.

Genoa, Neb.

SUNDERLAND P. GARDNER.

EDITORS INTELLIGENCER AND JOURNAL:

I HAVE a note from our aged and esteemed friend, Sunderland P. Gardner, informing me he had a minute from his monthly and quarterly meetings to attend the quarterly and other meetings within New York Yearly Meeting, and that he expected to attend Duaneburgh Quarter, to be held at Albany on the 18th inst., and would probably not attend the others during the cold weather. S. C.

Albany, N. Y.

For Friends' Intelligencer and Journal.

FRIENDS' MEETING AT DEER CREEK, MD.

THE meeting at Deer Creek, Maryland, is known to have existed as early as 1737. As the records have been lost, it seems impossible to ascertain precisely when the first meeting was held. The meeting-house was burned down, and in 1784 was rebuilt. There was then a very large meeting; both ends of the house were generally full. A great many worthy Friends gathered there. The first ministers of whom we have knowledge were Joseph Jones and James Rigby; then Mary Mifflin and Betsy Coale; and later on were Susanna Jewett and Sarah Warner, both much beloved. The Jewetts had a large family. The children scattered to different parts of the country. One son, after an absence of many years, returned to Deer Creek, and bought his old home and improved the place by remodeling the house. Then he visited the old meeting-house and graveyard, where his worthy parents lay resting. He requested permission of the Friends to repair the meeting-house and grounds. They gave him permission to do what he wished; and he has made great improvements; he had all the inside of the meeting-house taken out, and now it is all new with the exception of the partitions and benches. The house is built of stone, and it has been "pointed," so that it looks like a new house. The ceiling and wainscoting is oiled and varnished. It is certainly both beautiful and neat, and we do most assuredly appreciate his kindness.

Then he had the grave-yard cleaned and a new fence put around it and the meeting-house. It shows what a kind, generous heart Hugh J. Jewett has.

A FRIEND.

THERE are a hundred things which you cannot do, and which you are not called upon to do, but you can always do what is your duty here and now. There are a thousand places which you might conceivably fill, but the fact remains that, at the present moment, you are only called to fill one place. Do the one thing; fill the one place; He who sees all things and all places will take care of the rest.—S. S. Times.

THE QUESTION OF MUSIC.

EDITORS INTELLIGENCER AND JOURNAL:

DEAR FRIENDS: The article signed by Thomas E. Hogue in a recent issue, on "Music," and the estimate placed thereon by Friends of the Fox type, is the most clear of anything I have seen in print. Music amuses the senses and no more; it does not aid in building up character; it does not strengthen manhood nor assist in awakening aspirations for higher spiritual attainments, but rather hinders them. With all expressed in that article I fully accord, having long had a concern on the same subject. Many years ago, when reduced to death's door in my chamber, I addressed an epistle to Philadelphia Yearly Meeting, where it was read, printed, and distributed to all of the members. Many of these may now be hidden away, and this may revive the concern.

O, for truth's testimonies blessed in all their bearings! God grant they may be maintained in their full force and power through all time to come; which must be if we abide in Christ. SARAH HUNT.

SWARTHMORE NOTES.

THE speakers for Commencement were announced to the Senior class on Second-day. The students who will deliver orations are as follows: From the course in Engineering, Howard A. Dill, Indiana, and Willis W. Vail, New Jersey; from Arts, Mary Kirk, Pennsylvania, and J. Carroll Hayes, Pennsylvania; from Science, Jennie F. Waddington, New Jersey; from Letters, Elsie D. Stoner, Pennsylvania.

—It is probable that the class of '89 will have a memorable commencement, as the close of this year will mark the second decade of the college's existence. It is proposed to have quite a celebration of the anniversary with as many of the alumni and former students present as possible. The executive committee of the Board of Managers has referred the subject of the bi-centennial to a special committee to confer with the Faculty.

—Alice M. Jackson, A. B., of the class of 1883, has applied to the Faculty for the arrangement of a course of study for her second degree.

—Dr. Shell proposes to have trial sports this year previous to the regular spring sports in Fifth month. This will avoid the entrance of poor competitors in the exhibition and will raise the standard of Swarthmore athletics.

—A bill is before the Legislature of Pennsylvania at present giving to college graduates desiring to teach and who have taken a regular course in pedagogics, the same privileges in respect to teachers' examinations that graduates of the State Normal Schools now enjoy. President Magill is deeply interested in the bill, which he himself drafted, and he is supported by President Knox, of Lafayette, President Atherton, of the State College, and other distinguished educators. As it now is, graduates of the State Normal Schools, many of whom are not even prepared to enter college, can receive permanent certificates as teachers while college graduates with the broadest general education, including the pedagogics, have to take the examinations.

—The Junior class gave their Freshmen allies a very enjoyable reception in the Reception Halls, Seventh-day evening last. Several new features were introduced and every body seems to have had a pleasant time.

—The Seniors have elected Ralph Stone, president; George Masters, vice president; Alice S. Palmer, secretary, and Willis W. Vail, treasurer. Besides the president, those who will take part in the Class-day exercises in Sixth month are: poet, Louelle Passmore; historian, Elsie D. Stoner; statistician, Horace B. Forman; prophetess, Clara Haydock, and presenter, Justin K. Anderson.

—The libraries of the literary societies of Swarthmore now consist of three thousand well selected volumes and in the college library are ten thousand more. One of the institution's greatest needs is an adequate library fund and a building for the library. Either one of these would go far to place the Friends' college on an advanced footing with the other great colleges and universities.

ORTHODOX FRIENDS.

Efforts are making to push forward the erection of the proposed John Bright University, at Wichita, Kansas. The foundations of the first building have been constructed at a cost of \$12,000. The resources of the institution consist of about 300 acres of land, (in or near the city), and it is proposed to issue bonds secured by a mortgage upon it. In a letter on the subject, in the *Chicago Christian Worker*, A. Rosenberger refers this plan in part to "the widespread financial stringency, and the consequent stagnation in business that has prevailed for some months."

—The principal institutions of education in this country, in charge of Orthodox Friends are: Haverford College, for young men, and Bryn Mawr College for women, both near Philadelphia; Wilmington College, at Wilmington, Ohio; Earlham College, at Richmond, Indiana; Penn College, at Oskaloosa, Iowa; Guilford College, at New Garden, North Carolina; and Friends' School at Providence, Rhode Island, all of the latter being coeducational. The two institutions in Pennsylvania, and that at Providence are financially strong, though, like the usual experience of such institutions, they continually find their wants outrunning their resources, but those in the West are comparatively new and have but limited foundations.

—David B. Updegraff's quarterly, *Friends' Expositor*, (representing the "ordinances" and paid-pastorate element among the Western Orthodox), gives a summary statement of the action of the several yearly meetings in regard to the Richmond "Declaration of Faith." There are twelve of these "affiliated" bodies, and their course was as follows: Canada (50 members present) adopted it, being the only one that used this exact expression; Indiana, Kansas, and Baltimore approved it; New York accepted it, as a true declaration of Christian doctrine, and New England used much the same formula; Iowa and Western accepted and approved it as a statement of faith, but "not as a compulsory creed;"

North Carolina adopted it, "as a valuable restatement," etc.; Ohio accepted the report as a faithful reflection of the Conference proceedings, and printed it "for information;" Dublin received it "as a valuable outcome," but declined to adopt it; and London declined to express any judgment upon it.

—Commenting upon the result the *Expositor* says: "All of these complimentary phrases and pious nothings that are said over its bier can mean nothing more than decent burial. . . . We will mention two reasons of great weight with the rank and file of the church everywhere. First, they believe in the coordinate rights and authority of the yearly meetings,—in other words the autonomy, or self government of every such meeting. They shrink from the thought of centralizing power. Second, they deny the ability of any man or body of men, to set forth doctrines to be believed or duties to be performed so fully and explicitly as it is already done by Christ and his apostles in the Scriptures."

AND FIND YE FAULT?

And find ye fault with this fair world that God
has given to us?
What have ye done to better it, that ye should
murmur thus?
This earth is very beautiful, a glorious place to live,
Rewarding very generously the labors that we give;
And very full of goodness, too, if goodness' ways
we seek,
And cherish with our cheerfulness those who have
proven weak.
For some few imperfections among the fruit,
would ye
Condemn the whole production, and eke the
graceful tree?
The sanctimonious croakers, as well as those who
seef,
Are keeping bright millennium days a very long
ways off.
Don't weep and wail and call the world a dismal
"vale of tears."
But verging to an end that fills your life with
gloomy fears,
But love it for the pleasures that were given to
lighten cares;
Let thanks for each day's blessings be the burden
of your pray'rs;
And your heart should be as light as merry sounds
of childish laughter—
Who finds but discontent on earth, I fear will find
it after.

HARRY DAVID.

For Friends' Intelligencer and Journal.

A SWARTHMORE INCIDENT.

ON a sunny, sloping hillside
Spread with grass all velvet green,
Looking far across the meadows
To the Delaware's bright shewn,
Stands our dear old Alma Mater—
Arms spread hospitably wide
Students new and old to welcome:—
Friends found true and friends untried.

Years ago within its bosom
Dwelt two children, twelve and ten;
Elder, boy, and younger, sister;
Orphaned, far from home; and when
On a bright, warm day in spring-time,
Visitors within the walls
Strolled in pleasant admiration
Of the homelike rooms and halls.

Seeing one sweet, brown-eyed maiden,
Round and rosy, bright and fair—
Asked "Who is she?" Low the answer:—
"She's our pet, an orphan rare."
"Art thou all alone here, darling?"
"All alone"—a scholar said
When with quickened step approaching,
Laying 'gainst his cheek her head—

With his left arm thrown about her,
Blue eyes wide and shining clear,
Spoke her fair-haired, noble brother;
Smiling "You forget; I'm here!"
Silver sweet his childish accent,
Strong and true his shelt'ring love;
And I know that speech stands written
In the Golden Book above.

A. L. D.

"HOW READEST THOU?"

Luke 10 : 26.

'Tis one thing now to read the Bible through;
Another thing to read, to learn and do;
'Tis one thing now to read it with delight,
And quite another thing to read it right.

Some read it with design to learn to read,
But to the subject pay but little heed;
Some read it as their duty, once a week,
But no instruction from the Bible seek.

Whilst others read it without common care,
With no regard to how they read our where,
Some read it as a history, to know
How people lived three thousand years ago.

Some read to bring themselves repute,
By showing others how they can dispute;
Whilst others read because their neighbors do,
To see how long 'twill take to read it through.

Some read it for the wonders that are there,
How Daniel killed a lion and a bear;
Whilst others read, or rather in it look,
Because, perchance, they have no other book.

Some read the blessed Book—they don't know why,
It sometimes happens in the way to lie;
Whilst others read it with uncommon care,
But all to find some contradiction there.

One reads with father's specs upon his head,
And sees the things just as his father did;
Another reads through Campbell or through Scott,
And thinks it means exactly what he thought.

Some read to prove a preëdopted creed,
Thus understand but little what they read;
And every passage in the Book they bend
To make it suit that all-important end.
Some people read it, as I've often thought,
To teach the Book, instead of being taught.

—Selected.

ARE AMERICAN WOMEN EXTRAVAGANT?

The *Christian Union*, (New York), alludes to some statements in a recent book on America, by a French visitor, Paul Blouet, who writes over the pen name of "Max O'Rell." It says:

He has made one criticism which must strike every American woman. "That which struck me most in America, from first to last, is the total absence of stupid-looking faces. All are not handsome, but all are intelligent and beaming with activity. In my opinion, it is in this that American beauty mainly consists. In the large cities of the East the first thing that caught my attention was the thinness of the men and the plumpness of the women. This seemed to hint that the former lived in a furnace of activity and the latter in cotton wool. This impression soon deepened into a conviction." Mr. O'Rell then pays American men the highest compliments on their treatment of women, saying that the men of France do not pay the chivalric homage to women that the American man pays. Our kindly critic pays full justice to the grace and intelligence of American women in social life, but surely takes much from her crown when he says:

"If an outsider be competent to form an opinion, I venture to say that the American woman does not render to man a tithe of the devotion she receives from him. The French wife repays a husband's devotion by protecting his interest; an American one too often repays it by breaking into his capital. But Jonathan complains not. To him it is only seemly that 'beauty should go beautifully.' If one fortune goes, he sets to work to make another, and the sweat of his brow is soon crystallizing once more upon the neck and arms of his beloved womankind in the form of diamonds."

This has been said before, and it is time for American women to stop and ask the questions: "Am I becoming selfish?" "Is it true that my diamonds, or even jets, are the crystallized sweat of the Jonathans' brows?"

Hardly a defalcation is discovered that is not traceable to social ambitions on the part of the women of the family. Almost every breach of trust is connected with family social ambitions. And the very ones who tempt, actively or passively, drift or sail on till destruction comes, without question.

A wise physician recently said: "I tell you I have to see it. There are men whose only relation to wife and children is that of banker. When they die they are mourned as the bankers, the ones who made the incomes secure; their death means a percentage of danger to income." Women shrink from such an arraignment, resent it indignantly, and many justly resent it. Yet too many American women do deserve it. Life is organized on too complicated a plan for the average income. The display at home and abroad shows the margin between income and outgo is too narrow. This is so evident that the social economist finds the family life of America threatened, and gathers statistics to prove that the higher the social grade the more the number of marriages decrease, and attributes this to the fact that the cost of supporting a family grows greater every year, and

this increase is in the form of luxuries chiefly for women. Surely it is a serious subject, and one worth the thought of women. The woman of limited income has her share in this reform. Every effort to excel in display, whether at a cost of one dollar or one thousand, is one more burden for someone to carry, and usually that someone is the man, who makes a double effort to meet the new demand and leave a margin of capital. Nor does the burden rest there. New standards of luxury are created for the children, who in turn refuse to establish homes on narrow incomes, because display, not happiness of the highest order, has become the object in too many families.

TOOL CHESTS FOR GIRLS.

PARENTS do not object to see saw and hammer, gimlet and screw-driver in their sons' hands at a very tender age. They look upon tools as a boy's birth-right. But a little girl is hurriedly told in a horrified tone to "put them down," "to not touch," that she will cut herself or pound her fingers, and "get hurt" generally.

But the time is not far off when there will be a room in the house set apart for the workbench and that bench and its tools will be as free to the daughters as to the sons. In their fashionable brass-hammering and wood-carving the girls have "got a taste" of it. We may expect to yet see the carpenter come to give lessons as regularly as the music teacher. Why not? That eight children out of ten would like it better there is no doubt.

A dozen years hence certain branches of many trades will be largely occupied by women. We shall see young women at study and work in architects' offices, in the wall-paper designing rooms, mixing paints and stains and finishes and fresco-washes. We shall see the student at the Harvard Annex emerge from her long companionship with the "higher mathematics" with the "plans and elevations" of a house in one hand and a "bill of lumber" in the other as "applied mathematics." At present the training, in geometry say, is so unappreciated that the "sweet girl-graduate" lays the tea-table with the cloth awry, and the plates at all angles and distances, and is serenely unaware that she has hung her water-color drawing crooked until some distressed occupant of the room points it out.

The modern female hand and eye are so far untrained that not one young woman in five can take shears and cut straight across a breadth of goods unless she fold and crease the cloth, or "slowly cuts by a thread."

For myself I have saved many a dollar first and last by being "handy with tools."

When I was a little girl and held a mortal objection to allowing my older brother any accomplishments which I had not, I conceived the brilliant idea, one summer's rainy day, of making myself a churn, which was to be an exact reproduction in miniature of an old-fashioned instrument my grandmother used and called "an-up and-down-churn!"

A gentleman called at our house and found me under the shed diligently boring a hole into a round

piece of wood. Wishing to make himself agreeable to me, I suppose, he inquired what I was making. I replied in the most matter-of-fact way, as if it were the most common matter in the world for seven-year-old girls to manufacture household tools, "a churn;" and great was my indignation when he went away laughing as if he had heard the greatest joke in the world. After that, I never met him, even after I had grown to the dignity of young ladyhood and trained gowns, but what he inquired with a most aggravating interest, if my churn was done.

It never was, I am bound to say; but I learned my lesson, just the same, and whenever I want a nail driven in, a shelf put up, or a window-shade adjusted, I do not wait for a carpenter. Instead I thank my stars that I ever practiced on churns and wooden sewing-machines; and if it were necessary, I think I could—with all the confidence I once began my churn—build a house—after a fashion!—
Helen M. Winslow, in Wide Awake.

"CHEAP" SHOPPING.

OF all the illusions of the present time, cheap shopping is the most wearisome, the most disappointing, the most dissipating. When once the idea of bargain-hunting takes possession of the female mind, it becomes a prey to feverish and wild expectations of wonderful chances. Like the gold-digger or the lottery-ticket buyer, there may be for the prowling shopper the greatest opportunity in a lifetime just at the next corner shop. So she joins the pushing, scrambling crowd of women who fill the sidewalk, to the despair of policemen and men who want to catch a train or get back to business, finally makes her way into the store, breathless and in disarray, to buy a wisk broom for ten cents, from which the handle flies at the first brush, a pin for fourteen cents, from which the glittering setting is broken at the first thrust for useful purpose, or it may be a cheap book, with type so fine as to put out the eyesight, where all the *r's* or *p's* or *q's* are blotted out through every page, or a shoddy silk made out of cotton and shorn of its proper width by three or four inches, sleazy woolen and cotton dress goods "marked down" to the price they were originally intended to be sold for, job lots of worthless trash thrown together, which, when bought, litter up the house and give it the air of an auction room,—all this and much more, and all a mere illusion and a snare.

The honest shop-keeper is driven to his wits' end to allure the buyer into taking his goods for "less than cost," or to take a present worth twice the cost of the purchase, thus allowing him to sacrifice money, time, truthfulness,—all to the happiness of his customer. Great factories are built, hundreds of men, women, and children employed in making shams,—jewelry measured and valued by the bushel, not as valuable as potatoes or apples, but sold by the piece for many times the cost of manufacture for a moment's poor adornment. There is no reason why people should not wear brass pins if they want them; but let them pass for what they are, and be strong enough for use. As to bogus ear-rings, there seems to be no excuse for their being. And why

should a woman buy a piece of tin four inches long, made into a poor imitation of a water lily and a leaf, and wear it as an ornament? It is not beautiful, and it is too frail to be useful.

In sane moments, we all acknowledge that shopkeepers must make profit on their goods, that we do not want to be benefited by another's loss, that cheap goods are dearest in the end, and that genuine simplicity is better than false display. . . .

We fall out of sweet, unobtrusive, domestic ways, and join a crowd scrambling for things. Our children suffer from our methods, and learn readily our cheap lessons. Let us get from under this yoke, and be anything rather than hurried, pushing, tinsel-loving bargain-seekers.—*A. E. H. S., in Christian Register.*

INNER VISIONS.

. . . WHAT do some people fall back upon in themselves, when the outer, active life is suddenly cut off?

Last summer I knew of a German, the wealthy owner of a stone quarry on the outskirts of one of our Eastern cities, who fell over the edge of the quarry with his team and wagon, breaking his leg. He was about thirty-five years old, vigorous, well, and had never been sick a day in his life. He could neither read nor write, nor could any of his family or friends. Here was this man with a compound fracture that would keep him in bed three months, with absolutely no mental resources, his family and friends so employed that he must of necessity be left much alone, and with untrained hands that had never known anything but stone-work. When he closed his eyes what must have been his inner vision? I cannot imagine. Can you?

In strong contrast to him comes to my mind an elderly lady of my acquaintance. For many years she has been unable to use her eyes to read or write or sew, and the action of the heart and brain are so peculiar that she can in no way employ her hands. Friends visit her, because she is delightful to visit; but, at the best, she is alone a great deal, sitting or lying with folded hands and closed eyes.

What are her inner visions? All that is rich and beautiful, for she has a mind well furnished and a memory richly stored. Poetry and prose are there to be recalled, and the old time intercourse with choice friends. Life is beautiful, and well worth living still.

There is but one lesson to draw from these two out of many instances about inner vision; we must furnish our minds while we can, give them the best to store away for future use, so that, when we have need of it, we shall find it, instead of looking in upon an almost empty room or a sad jumble of worthless rubbish.—*J. S., in Christian Register.*

As the ice upon the mountain, when the warm breath of the summer sun breathes upon it, melts and divides into drops, each of which reflects an image of the sun; so life, in the smile of God's love, divides itself into separate forms each bearing in it and reflecting an image of God's love.—*H. W. Longfellow.*

BIBLE SCENES STILL ENACTED.

In writing from Fayal, one of the Azores islands, a correspondent of the Boston *Transcript* says: "On the country roads and near the windmills you will see circular thrashing floors made of hardened pumice stone, where cows and oxen are driven over the grain, crossing and recrossing it. These are a distinct and frequent feature in the landscape, and remind one of Bible scenes. What is that strange noise I hear from afar? I say to my native companion. Why, it is an ox cart coming along the lane with a load of grain. I watch and wait, and within half an hour it passes, with its two or three yoke of oxen dragging this uncouth cart with its high encircling wicker front and sides. Its great solid wooden wheels creak and groan. One is impelled to be merciful and beseech the owner to oil the wheels. But no, I must not, and am told that this noise is a part of the equipage, and no farmer is satisfied unless his wheels have the proper amount of squeak. A law was once made by the Portuguese Government that no creaking cart should be allowed to enter a city, but the people rebelled, and the law was repealed."

ALL YOU have to do is simply your *duty*. I stood in a factory a short time ago, and learned a deep lesson. As I entered all seemed confusion—the buzz of machinery, the whirl of everything, dazed me. But I soon saw all was right, and that each one was doing the task assigned to her. I stood and looked at a young girl whose work was to untie knots in the threads as they were passing over the wheel. All day long she simply untied knots. Now, if she had said, "This is such a little thing to do, and I get so tired of it, I think I will try and do what the girl next to me is doing," she would have damaged the whole work. The simple thing of untying the knots had to do with the beauty and finish of this whole design.—*Selected.*

FINE MANNERS do code can teach. If they are conscious they become artificial and are fine no longer. A man indeed may be taught to avoid grossness and impudence and not mistake them for ease. The youth who puffs a cigarette when he is walking with a lady, who is free and easy instead of scrupulously courteous in his address and tone, may be told that he is merely ungentlemanly and vulgar; and if he choose he may correct his behavior; certainly he would correct it if the lady showed him that she required the correction. The impudence of young men generally reflects the weakness of young women. If they required courtesy, there would be little insolence on the part of their cavaliers.—*Geo. Wm. Curtis.*

OUR friendships ought to reach both ways, partly up and partly down, each person clasping a hand above him and each equally giving a hand to some one below. So shall our whole humanity be bound together by the golden ties of friendship, so a thrill from the hand of God clasped by the topmost soul of our race go down through all ranks and grades to that of the lowest sinner.—*J. C. Kimball.*

SAMOA.

WE have been hearing for the last few weeks a great deal about the "trouble with Samoa." No doubt many of us have wondered whether Samoa was a king or place. Samoa is the name of a group of nine islands in Polynesia, a little north of east of the Society Islands, a group much larger and better known. Samoa is also known as Navigator's Islands. The natives are negroes. All the islands of Polynesia are the tops of submarine mountains; the islands are, beneath the surface of the water, coral, which forms the basis of the soil; many of the islands have lagoons in the centre, and bear every evidence of being the result of volcanic eruptions. On some of the islands are high mountains. When these islands were first discovered we are in doubt, but undoubtedly they were visited by the earliest voyagers round the globe. The inhabitants of the several Polynesian islands all speak a language that shows a common origin—natives of different islands learning to understand each other in a short time. Their ancient religions were very like, and all practiced cannibalism. They tattoo the body; on some islands the people are rendered hideous by this practice, which they still keep up. The people of all these islands are indolent, but of a cheerful temperament, much given to pleasure. Wrestling and boxing are favorite pastimes. They have rude musical instruments. Before the introduction of Christianity, dancing was a species of state as well as religious ceremony; much of the dancing was of a degrading form. In Polynesia there are two distinct races; one very dark and somewhat dwarfed, the tallest of the men not being over five feet. The others are the color of the Malays and American Indians, many of them handsome and graceful. The ruling families or tribes are somewhat remarkable for their grace and dignity, so much so that some travelers have supposed them a distinct race that at some time had conquered and held in control the common people.

Originally the people wore but little clothing, and that woven from a fiber of a peculiar tree. Since early in the present century commercial relations have existed between these several groups and Europe and America. Missionaries visited the islands at the same time, and now civilized customs and styles of dress prevail, though in some of the islands a grotesque combining of the two prevails. These islands are under the protection and care of the different European powers, and of America. A few are under the direct control of European powers. The several civilized powers have, by treaty, agreed not to govern these islands, and to protect the property and citizens of each power against a common foe, whether a native or foreign one. Samoa was especially under the protection of England, Germany, and America.

Malietoa is the King of Samoa, but another chief, Tamasese, has risen in war and conquered Malietoa, who is now in exile on one of the small islands of the group.

Samoa has about 37,000 inhabitants, and is a Christian land.

Coffee, tortoise-shell, castor beans, arrow-root,

and ginger are exported from these islands. Fishing is the principal employment of the people. The foreign inhabitants are engaged in trade and commerce.—*Christian Union.*

THE ARMED EUROPEAN CONTINENT, 1889.

THE *London Daily News* says: During the past eighteen years—a period which, upon the whole, has been a peaceful one—the armies of the Continental Powers have assumed proportions such as were never dreamt of at any era in the previous history of the world. The increase in their strength, and also, of course, in their cost, has been steady and continuous ever since the days of the Franco-German war. It is now no exaggeration to speak of Europe as an armed camp. The following table, which has been prepared, after reference to the most recent official documents and declarations on the subject, shows (1), in the column headed "War strength," the approximate number of men disposable for offensive purposes in the event of the outbreak of war in 1889; (2), in the column headed "Second Reserves," the approximate number of men who in the event of the outbreak of war would join the colors, but remain at home unless their services were very urgently needed at the front; (3), in the column headed "Final Reserves," the number of men who, in addition to all the above, would be available for defensive purposes in case of their country being invaded. All the men in the first two columns are trained soldiers who have served with the colors. Many, but not all, of the men in the last column are also veterans.

	War Strength.	Second Reserves.	Final Reserves.
Germany,	2,520,000	1,520,000	1,860,000
France,	2,440,000	1,570,000	1,700,000
Russia,	2,495,000	1,980,000	2,200,000
Italy,	1,010,000	1,320,000	1,200,000
Austria,	1,145,000	1,470,000	1,700,000
Turkey,	620,000	310,000	340,000
Balkan States,	250,000	165,000	195,000
	10,480,000	8,335,000	9,195,000

Here we have a mass of men, in number equal to the population of a first-class State, who may at any moment be called upon to take the field. Over *twenty-eight millions* of Europeans, all in the prime of manhood, are liable to expose their lives in the next great war. More than two-thirds of them are at present engaged in civil pursuits; but war might drag every one of them from the office, the field, and the workshop, and thus, at a few hours' notice, the commercial, manufacturing, and agricultural interests of half Europe might be paralyzed by the withdrawal of all the best and most active workers.

Up and be doing!
 Nor wait for to-morrow;
 Never to-morrow
 May come to your hand;
 Who waits for its advent
 May find to his sorrow,
 That God shall to-night
 His one talent demand.

—*Treasure-Trove*

WOMAN'S EDUCATION IN GREECE.

AMERICA may well feel proud of the part she has played in this important advance in one of the oldest countries of the world. In 1830 two Americans left their native land to spend the remainder of their lives in the new-born kingdom of Greece. One was Dr. Jonas King, sent out by the American Board of Foreign Missions, and the other was Dr. John Henry Hill, under the auspices of the Protestant Episcopal Church of the United States. Dr. and Mrs. Hill were given careful instruction to establish schools, and to do nothing "which could justly give rise to the impression that another church, or another form of Christianity, would be introduced, but to labor to restore to that people the holy simplicity and glorious purity of that very gospel which St. Paul preached among them." In 1832 Mrs. Hill opened a school for girls in Athens, which, up to that time, had been an unheard-of thing in all Greece. Its beginnings were very humble, but soon the idea began to spread, and the number of pupils ran up to fifty, then to one hundred, and to three hundred. In a few years the average attendance was seven hundred, and continued about that for many years. Mrs. Hill carried on the school for nearly forty years, and was succeeded by Miss Marion Muir, who is still there. The management is very simple, the buildings are plain, the rooms small and crowded, but, by the testimony of a correspondent, "the results are of the very best."

This opportunity for the education of girls was so well appreciated that by request of several leading Greek families a school was opened for more advanced studies, and the result was "Hill Institute." This, like the first school, has always flourished. It is at present under the control of Miss Bessie Mason, a niece of Mrs. Hill. There are now sixty-four boarders and one hundred and ninety day scholars. The young ladies come from all parts of Greece, from Crete, Egypt, Asia Minor, and the Balkan region. The school is recognized as of great importance. "The Greek mothers of nearly all our homes were educated at Hill Institute," was said by a Greek orator at the grave of Mrs. Hill in 1882. It has also furnished teachers for girls' schools all over the kingdom, that have sprung up from time to time, as the idea that girls must be educated took possession of the people. To-day there are in Greece two hundred and seventy public schools for girls, with over 20,000 pupils.

The finest of these schools is the Arsakeion at Athens, founded by M. Arsakes. The money he left for this purpose was so fortunately invested that now the property consists of nearly a whole square in the best part of Athens. This school has a daily attendance of 1,500 girls, ninety of whom are boarders. The funds are in charge of "The Society of Those who Love Instruction." The instruction is graded from the kindergarten to the normal department, and the work done is said to compare favorably with the same grade of work done in Germany. The Greeks look upon the Arsakeion as a legitimate result of the Hill Institute, and the two schools work in harmony. By force of circumstances the priesthood has a part to play in this instruction, as a law

has been passed, and is strictly enforced, that no school can be carried on in Greece except the priest is allowed to come in to give religious instruction. Owing to the influence of Americans, the New Testament is used as a text-book in the elementary schools.—*Springfield Republican*.

NEWS AND OTHER GLEANINGS.

—The life boats round the English coast during the past year rescued no fewer than 617 persons, the great majority of whom, but for the efforts of the gallant crews, would have perished.

—Mary Hemenway and other philanthropic ladies are providing at their own expense special instruction in calisthenics to large classes of female teachers, in Boston, and it is proposed to extend these facilities. The services of Dr. Posse, the well known instructor in the Swedish system of gymnastics, have been utilized in this work.—*The Student*.

—According to Gaskell's New Family Atlas, Mount Hercules, in New Guinea, now claims the honor of being the highest peak in the world. Its height is given as 32,763 feet. The same authority gives Mount Everest 29,002 feet, so that Mount Hercules leads the world by 3,766 feet.—*Scientific American*.

—At a meeting in London of the Royal Botanic Society the secretary reported that the recent fogs had done much damage to the plants in the conservatories, causing many of them to shed both leaves and flowerbuds; more especially had this been the case with Australian plants, which, from enjoying in their own country a large amount of sunlight, were found less capable than any others of contending against the vicissitudes of London weather.

—Prof. Lodge, the eminent English electrician, has recently written a letter, discussing the possibility of dissipating fogs by means of discharges of electricity. He has himself made experiments, said to have been successful, in which smoke was condensed in a room, but nothing on a large scale has been attempted. The *London Electrician* has suggested the wide field for labor in the dissipation of the London fogs, and other applications have been mentioned, such as clearing of smoke from tunnels, of dust-particles from flour mills, and the abatement of the general nuisance of smoke in manufacturing towns. Prof. Lodge is said to be trying to raise funds to conduct experiments on a large scale.—*The American*.

—Science gives the following significant facts concerning the results of smoking by boys:

"In an experimental observation of thirty-eight boys of all classes of society, and of average health, who had been using tobacco for periods ranging from two months to two years, twenty-seven showed severe injury to the constitution and insufficient growth; thirty-two showed the existence of irregularity of the heart's action, disordered stomachs, cough, and a craving for alcohol; thirteen had intermittency of the pulse, and one had consumption. After they had abandoned the use of tobacco, within six months' time one-half were free from all their former symptoms, and the remainder had recovered by the end of the year."

—Last spring, in the time when daisies blow, a lady living on Mount Bowdoin went out to gather a bunch of the golden-hearted flowers. Seeing some exceptionally large and deeply-colored clover blossoms, she stooped to pick them, and discovered a four-leaved clover, and another and another, until she had discovered seventeen four and one six-leaved ones on the one plant, not larger than

her own hand. The plant was in a rocky spot, and its roots readily detached themselves from the scant soil and came up in her hands. She took it home, set it out in her garden, and it produced its kind through all the summer long. The plant never increased in size, its roots refusing to spread themselves, but she rarely visited it without being rewarded by from one to eight four-leaved specimens. In the autumn the lady transplanted the root to a small salt box, which it does not nearly fill, but since that time it has borne thirty-seven four and a dozen five-leaved clovers.—*Boston Transcript*.

—*The Woman's Journal* says that the Pundita Ramabai is lecturing in Japan to great audiences. In Tokio, the largest lecture hall in the city was so crowded that the doors had to be closed half an hour before the meeting began, every inch of room being already occupied. Ramabai, of course, speaks through an interpreter.

—An interesting account is given in the *London Pall Mall Gazette*, by Mary H. Garnet Barboza, (a daughter of the well-known New York minister, Henry Highland Garnet), of a school for girls which she has established in Liberia, (Africa), at Brewersville, an inland town. She says the girls show an ardent desire to learn, and that her school was quickly crowded. Good provision had been made for the education of young men, but the other sex were without such opportunities. Mrs. Cardeza taught housework, as well as the ordinary elementary branches of study.

—Dr. Elizabeth Thalberg has within the past year been appointed resident physician at Vassar College, with a handsome salary. In spite of her German name, Dr. Thalberg is an American. She was a Miss Burr, of Brewer, Me., and married a German physician, Dr. Thalberg, of New York.—*Woman's Journal*.

CURRENT EVENTS.

A NON-PARTISAN and non-sectarian convention of those in favor of the adoption of the Prohibition Constitutional Amendment has been called by the "State Constitutional Temperance Amendment Association" to meet at Harrisburg on the 19th instant, at 9 o'clock, a. m. The officers of the W. C. T. U. of Pennsylvania unite in the call.

A SERIOUS fire on Walnut street west of Broad, Philadelphia, on the afternoon of the 10th instant, destroyed the

drug store of Frank E. Morgan and the laboratory of John Wyeth & Brother, and damaged adjoining property. The loss was estimated at \$500,000. One fireman was killed.

EXTENSIVE storms were reported from Western Europe at the close of last week. The following telegrams give some details:

BERLIN, Feb. 10.—Reports of heavy snow storms come from all parts of Germany. In this city the snow is a foot deep, and in the Bavarian Highlands it has fallen to a depth of six feet. In the west and northwest thunder and lightning accompanied the snow. Traffic is almost entirely suspended in Schleswig and Jutland.

THE HAGUE, Feb. 10.—A storm of exceptional severity is raging throughout Holland. The rivers are greatly swollen, and Rotterdam, Dordrecht, Scheidam, Zwolle and Kampen are inundated. Many shipwrecks, with great loss of life, are reported.

LONDON, Feb. 10.—Snow continues to fall throughout the south of England and in Wales. On the coasts heavy gales prevail, and a number of shipping disasters are reported.

NOTICES.

. A Conference on Temperance and the Constitutional Amendment will be held under the care of the Quarterly Meeting's Committee, at Friends' meeting-house, Unity and Walk streets, Frankford, on First-day, the 17th instant, at 3 p. m. All are invited.

. A Conference on the subject of Temperance, under the care of Concord Quarterly Meeting's Committee, will be held at Friends' meeting-house, Chester, on First day, Second month 17th, 1889, at 2.30 p. m.

Friends and others interested are cordially invited.
MARY McALLISTER, Clerk.

. Quarterly Meetings in Second month will occur as follows:

18. Centre, Bald Eagle, Pa.
18. Duaneburg, Albany, N. Y.
20. Stillwater, Plainfield, O.
23. Blue River, Benjaminville, Ill.
25. Canada H. Y. M., Bloomfield, Ont.
25. Warrington, Monahan, Pa.
26. Burlington, Mt. Holly, N. J.
27. Southern, Camden, Del.
28. Bucks, Wrightstown, Pa.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

Association of Friends to Promote the Education of the Colored People of the South.

HOWARD M. JENKINS, Chairman, 921 Arch Street, Phila.
SARAH J. ASH, Secretary, 1717 Vine Street, Phila.
LYDIA A. SCHOFIELD, Correspondent, 1717 Vine St., Phila
HENRY M. LAING, Treasurer, 30 N. Third St., Phila.

EXECUTIVE COMMITTEE—Edward H. Magill, Swarthmore, Pa.; Sarah H. Peirce, Philadelphia; George L. Maris, West Chester, Pa.; Mary Ann Fulton, Wilmington, Del.; Amos Hillborn, Philadelphia; Alfred Paschall Doylestown, Pa.

WORK OF THE ASSOCIATION.

The work of the Association is chiefly to raise funds. These are sent to the support of two schools for colored youth in South Carolina.—the Schofield Normal and Industrial School, at Aikin, and the Mt. Pleasant School, near Charleston, in charge of Abby D. Munro.

PENN MUTUAL LIFE INS. CO. of PHILA.

This Company furnishes ALL DESIRABLE FORMS of LIFE and ENDOWMENT INSURANCE at actual NET COST. It is PURELY MUTUAL; has ASSETS of THIRTEEN MILLIONS and a SURPLUS of over TWO AND A HALF MILLIONS. THE SINGING HEART.

THOU Heart why dost thou lift thy voice?
The birds are mute; the skies are dark;
Nor doth a living thing rejoice;
Nor doth a living creature bark;
Yet thou art singing in the dark.

How small thou art; how poor and frail;
Thy prime is past; thy friends are chill;
Yet as thou hadst not any ail
Throughout the storm thou liftest still
A praise that winter cannot chill.

Then sang that happy Heart reply:
"God lives; God loves and hears me sing;
How warm, how safe, how glad am I,
In shelter 'neath his spreading wing,
And there I cannot choose but sing."

—*Danske Dandridge, in the "Independent."*

For Friends' Intelligencer and Journal.

A FORCED MINISTRY.

I quite agree with the editors of this paper in their dissent from the views expressed by Edward Ryder, on the subject of the ministry.

Within the past few months two other articles (the one a contribution, and the other a report of a Select Meeting) have expressly conveyed the idea that vocal ministry should be encouraged as a means of building up our meetings. To at least one of your readers the prevalence of such a sentiment, and the out-spoken expression of it seems rather alarming.

The elders,—if they are anointed for their station as well as appointed to it,—may by their spiritual discernment be able to discover when a word of encouragement is indicated, just as truly as when they find it necessary to caution or restrain; but if the idea is to prevail that vocal communication is to be encouraged in preference to silence, and that which entertains the multitude will build up the meeting, there is great danger of lowering the standard of our profession, and of losing sight of the Source whence true gospel ministry proceeds.

A friendly exhortation which the speaker may think is adapted to the assembly, is a very different matter from a gospel message which he is bound to deliver, however trying it may be to his natural inclination, or however contrary to human notions of the fitness of things. How many instances we find recorded among the experiences of our early Friends—would that those of the present day were more familiar with them,—of duties to be performed, and of messages to be delivered, that seemed to thwart their own purposes, and to be quite contrary to their ideas

of expediency or probability. Under these humbling dispensations they were required to disregard the outward vision, to look with the eye of faith only, and to sacrifice their own will on the altar of obedience. Blind, faithful, and obedient seem to have been their watchwords when duty called them forth; and after the performance of the service, if they were favored with inward peace they accepted it not only as their rich reward but also as a seal to the truth of the testimony which they had been called upon to bear. If they had reasoned with the presentation, or sought the approbation of their hearers, the true message would have either been withheld, or else so marred in its delivery as to fail of reaching the crying one for whom it was intended. Then would the messenger have had to suffer in a two-fold sense; first for his own disobedience, and secondly for a negative participation in the error of his brother because he had failed to point it out.

A vessel to be entrusted with these solemn messages must be both clear and empty before it can be ready to receive them. Pride and vanity can have no place there, and worldliness must be excluded. The strong will of man may tenaciously cling to these beloveds, and the self-asserting spirit may attempt to justify their retention; but unless and until they are given up, and the vessel is thoroughly cleansed, the gospel message cannot be conveyed in its purity.

A Friend,—one of the present century,—who was a deep minister, and who lived an unworldly life, gives in his journal an account of attending a meeting where for a long time he was "unable to feel them." How much better silence was than a verbal offering would have been during this season of inability may be inferred from the effect that his message produced when the proper time came to deliver it.

In "Friends' Library," of the other branch of the Society, and in "Friends' Miscellany," of ours, as well as in "Janney's History of Friends" may be found a rich storehouse of biography and experience that ought, as we peruse the many volumes, to make us feel both grateful and responsible for our right of membership, and also for the high standard of gospel ministry which those worthies maintained. The journals of John Woolman, Job Scott, Richard Jordan, William Evans, and many others furnish abundant evidence that they sought not to entertain their hearers (or those who had assembled expecting to hear them), but simply to wait for a clear presentation of duty, and then to "begin in the life, continue in the life, and quit in the life." While of James Simpson, Nicholas Wain, John Salkeld, and

Jacob Ritter, it may be said that they copied no man, but walked by faith rather than sight.

We are often reminded that the culture of the present day requires both intelligence and courtesy on the part of those who address assemblies; and that when people come to our meetings desiring and expecting to hear words, if they are not gratified they will not be likely to continue coming. So be it. If in the silence of a Friends' meeting they find nothing that they can appropriate, it is questionable whether their attendance is of much advantage to themselves or to the meeting. When those who are not of our fold avail themselves of the privilege of open doors and free seats to attend our meetings for worship, silent though they be, does it not seem pitiable that any of our own members should offer as an excuse for their non-attendance the flimsy pretext that there is *no speaking*? In such cases, parents, overseers, and other concerned Friends have duties to perform toward the delinquents; but the present article has reference to a superficial ministry encouraged, or forced, in order to attract our members, and thus induce them to attend meetings.

Of course we all value an *authorized ministry*, and when a gift has been conferred on one of our flock we should feel grateful for the *gift*, but not by flattery or otherwise spoil or mar the instrument. We should earnestly desire his or her preservation in the Truth, and when a message is delivered try to fix our attention upon the subject matter, and not upon the messenger. The more eloquent the discourse, and the more attractive the speaker, the greater is the need for us to look within and not without.

"Charms he may have, but he has frailties too;
Dote not too much, nor spoil what ye admire."

There are some among us who lay great stress upon the diction, the manner, or other individualities of the speaker. These it must be admitted are minor considerations when compared with the essential qualifications for Gospel ministry. If the command is positive, the opening clear, and the concern ripe, the message will be likely to flow forth in language adapted to the one who delivered it, and intelligible to those for whom it is intended. After such a communication there will be a covering of stillness spread over the assembly, which will be manifest in the looks and in the deportment of those present, which—if it be not dissipated by some untimely offering—will continue until the close of the meeting, and the effects of which will be perceptible even after Friends have separated and gone to their homes.

Our elders who are alive to their duties no doubt exercise a care both ways; being ready to give a word of encouragement to the timid little ones, and a timely caution to the forward spirits. It is to be hoped that both elders and ministers are duly impressed with the importance of a sound and a pure ministry; that they are firm in the conviction that the welfare of our Religious Society is deeply involved in this matter; and that they are ever mindful of the two risks to which our meetings are exposed:—it is "unprofitable to withhold more than is meet," and it is dangerous to "offer strange fire."

As a conclusion to the whole matter, we (who are not members of the "Select Meeting") may profitably read the following paragraph from the "Book of Discipline" of Philadelphia Yearly Meeting:

"It is our earnest desire that both ministers and elders may be as nursing fathers and mothers to those that are young in the ministry, and with all care and diligence advise and admonish them; and if they see occasion, reprove them in a tender and Christian spirit, according to the rules of our discipline and counsel of Friends in that respect; also exhort them frequently to read the Holy Scriptures, and earnestly seek the mind of the spirit of truth, to open the mysteries thereof, that abiding in a simple and patient submission to the will of God, and keeping down to the openings of love and life in themselves, they may witness a gradual growth in their gifts, and be preserved from extending their declarations further than they find the life and power of Truth to bear them up."

Second month 9, 1889.

For Friends' Intelligencer and Journal.
THE CHARACTER OF ELIJAH.

SOME weeks ago a sketch of the life of Samson appeared in this paper, eulogizing him: the desire came upon me, to present in contrast the character, as delineated in the Bible, of one who in my estimation is altogether far more worthy of emulation and imitation than Samson. While it is true, as the writer of the article referred to, says, that "to understand correctly the character of a man, it is necessary to study it in connection with the age in which he lived," yet there are traits of disposition and actions that in any age or country are intrinsically wrong and reprehensible, while others are equally praiseworthy under all circumstances.

In giving an epitome of the life of Elijah the Tishbite, it is impossible, within the limits to which I shall confine myself, to do full justice to such a noble and exalted character. His birth and early life are left in obscurity, the first account of him being when he appears before Ahab, the King of Israel, prophesying, "As the Lord God of Israel liveth, before whom I stand, there shall be no dew nor rain these years, but according to my word." Thence he goes to the brook Cherith, where he is fed by ravens. The next we hear of him, is in the house of the widow of Zarephath, who sustained herself, her son, and the prophet, on the "handful of meal and a little oil," which failed not until the day in which the rain was sent. Here he performed the miracle of restoring to life the widow's only son. The next great act in which he figures, is the test, if we may so call it, of the true God. We are all familiar with that remarkable passage which describes the trial before the King, and all assembled Israel, between the prophets of the Lord and those of Baal, in which the power of the Most High was so signally manifested, by the fire consuming the sacrifice, wood, stones and dust, and licking up the water in the trench. He then commands the destruction of the false proph-

ets, at the same time telling Ahab that the drouth would be broken, "for there is a sound of an abundance of rain." The killing of the prophets of Baal provoked the wrath of Jezebel, Ahab's wife, a wicked woman, who swore vengeance on Elijah, to escape which he departed for Beersheba, but had gone only a day's journey, when wearied in body and disheartened in mind, he slept in the wilderness under a juniper tree and an angel appearing unto him, said, "Arise and eat," and he found a cake and a cruse of water, after eating which he slept again. A second time the angel bid him eat, and "he went in the strength of that meat forty days and forty nights, unto Mount Horeb the mount of God." Then in the cave there came to him the word of the Lord, "What doest thou here, Elijah?" How pathetic and yet how loyal his reply! Then in obedience to the command of the Lord, he went unto the mount, and the whirlwind, and the earthquake, and the fire passed before him, and after "the still small voice," and again the query was put, "What doest thou here Elijah?" Again we hear his plaintive lament for Israel, in answer to which he is commanded to return to Damascus and anoint Hazael, King over Syria, Jehu, the son of Nimshi, King over Israel, and Elisha, son of Shaphat, prophet in his stead, and the encouraging assurance is given, that there were yet seven thousand in Israel, "all the knees which hath not bowed unto Baal, and every mouth which have not kissed him."

He then finds Elisha, casts his mantle upon him, and is shortly followed by him. The next we hear of Elijah, he is sent to Ahab and Jezebel to tell them the punishment of the Lord for their wickedness in the matter of Naboth and his vineyard. About two years after this we find him calling fire from heaven on the fifties and their captains who are sent out to apprehend and bring him before Abaziah, who was then king over Israel, Ahab having died on the battle field, as foretold by the prophet.

The next and last account we have of this great personage is that of his passage over Jordan, accompanied by his faithful and attached friend Elisha, who cannot be induced to leave him, and who prays, as a last boon, that a double portion of his master's spirit may be upon him when he is taken from him. This was after Elijah had rolled his mantle together, and smote the waters, and they were divided, so they could pass over on dry ground. No words of mine can improve on the description of his glorious translation from all the troubles and vicissitudes he had experienced to perfect rest. "And it came to pass, as they still went on and talked, that, behold, there appeared a chariot of fire, and horses of fire, and parted them both asunder; and Elijah went up by a whirlwind into heaven." This great, this noble character is thus as abruptly taken from our vision, as he was first introduced to us, and he has been well entitled "the grandest and the most romantic character that Israel ever produced."

This article has been prolonged already too much, but it seemed as if the merest, most shadowy out-

line could hardly be given in fewer words, yet please allow the following quotation: "The undaunted courage and fiery zeal; the brilliancy of his triumphs; the pathos of his despondency; the glory of his departure, and the calm beauty of his reappearance on the Mount of Transfiguration, throw such a halo of brightness around him as is equaled by none of his compeers in the sacred story." E. H. COALE.

Holder, Ill.

SCRIPTURE LESSON, No. 9.

THIRD MONTH 3, 1889.

JESUS THE MESSIAH.

GOLDEN TEXT:—"If any man would come after me, let him deny himself, and take up his cross, and follow me."—Mark 8: 24.

READ Mark 8: 27-38.

CESAREA PHILIPPI was the northern limit of the journeys of Jesus and his disciples. The city was enlarged by Herod Philip, and named after Cæsar, with his own name added to distinguish it from Cæsarea, which was on the coast of Palestine, in the line of travel from Tyre to Egypt.

In the way. As they were journeying from Bethsaida northward, while they were yet going, and talking as they walked, of the work in which they had been engaged, and all they had heard of what was said concerning Jesus and themselves.

Who do men say that I am? How natural that he should want to know what was currently believed concerning him. It was the human longing to be known and recognized for what he was. It was not enough that he felt within himself he was the Messiah so long waited for, or that the few whom he had gathered as disciples believed in him,—he wanted to be acknowledged by the whole people, and in the absence of the multitudes who thronged about him,—in the loneliness of his long journey, he finds opportunity to open to his trusted followers the future as it was presented to him. But before he does so he must hear from *their* lips, what not only the public say, but what they say concerning himself.

Thou art the Christ. This was the testimony of Peter. Matthew gives a fuller account, going more into detail, but it was enough to know that he was regarded by them as the *anointed one*, whom the Father had sent to seek and to save that which was lost,—to turn the hearts of his chosen people away from sin and evil, and lead them to a closer union with himself, through the teaching and example of this "well-beloved son."

And he charged them, etc. They were not to repeat the conversation. The people themselves must know him as the Messiah—he who should save them from their sins, through the manifestation in himself of the power that he possessed by which the Father was working for their help.

And he began to teach them. It is evident that at this time Jesus spoke more freely to them of what they must expect as his followers, and the manner of life they must lead, as teachers of the truths he was sent to proclaim. They must not be careful about their own ease and comfort,—they must expect to be opposed, and have many things to endure—but they

must be self-denying, and care more for the gospel than that they were commissioned to teach, than for their own lives, and in the promulgation of this gospel they must do it with courage and a steadfastness of purpose that accepts death rather than be untrue to that which they have received, and as messengers are commissioned to proclaim to others.

In studying the life and character of Jesus of Nazareth, the one point that stands out in such bold relief that we cannot but regard it as of paramount importance, is his continued denial of self or keeping under subjection his human will. The one grand purpose of his life was "to do the will of the Father that sent me."

Should not we who are partakers of the Divine nature, even as he was, emulate his example? May we not go forth to our daily labor with the thought that even as Jesus resisted temptation, so may we,—as he was able to forgive insult and injury—everything for truth's sake, so may we. The same Divine assistance that was given to him will enable us to follow in his footsteps.

It is a consolation to know that many noble men and women, since the days of Jesus, have in their smaller measure been able to obey the Divine impulse within, casting self aside and through sacrifice been able to lift the world nearer to the ideal standard pictured in the Sermon on the Mount. Many humble followers of the Master habitually practice self-denial in their daily lives, thus enabling loved ones to perform some greater service, content if they only receive reflected honor. When such are ready to pass inside the portal to the "city celestial," and their "book of life" is opened, the record of "well done" will be found therein written; for as did Jesus they have listened to the Divine voice within and rendered obedience thereto.

"WHITE'S INSTITUTE" INDIAN SCHOOL.

[Henry Stanley Newman, an English Friend of some prominence, (author of the "Autobiography of George Fox," and other works), recently spent some time in this country, chiefly among the Orthodox bodies in the West, but returned to England, (owing to the state of his health) some weeks ago. We find in the *British Friend*, (London and Glasgow), an account of his visit to the "White's Institute," Indiana, a school maintained by Friends for Indian children, and many of the details, we think, will interest our readers. The school is located at a place called Treaty, in Wabash county, "a little roadside railway station in the woods." It "originated in a gift by Josiah White, of Philadelphia, of \$20,000," and in 1852, a tract of 650 acres of land, part of the Wabash Reserve, was purchased of Meshingo, chief of the Miamis, for \$6,500. Later, 120 acres adjoining were purchased of another owner, in 1860 a house was built, and in 1861 the school was first opened.—EDS. INTELLIGENCER AND JOURNAL.]

At first many white children were admitted, but since 1882 the Manual Labor Institute has been almost exclusively confined to Indians. It is under the control of Indiana Yearly Meeting [Orthodox]. The property is held by trustees, and the Associated Executive Committee of Friends on Indian Affairs are responsible for part of the expense. This com-

mittee represents most of the yearly meetings in the United States, and meets annually at the Institute. Seventy-eight Indians belonging to 14 different tribes, with the officers, compose the household. There are 27 Sioux, 10 Seneca, 10 Wyandotte, 9 Potawatottomie, 5 Cheyenne, 3 Ottawa, 3 Shawnee, 3 Peoria, 2 Sac and Fox, 2 Comanche, and one each Modoc, Caddo, Uchee, and Miami. These children all come voluntarily with their parents' consent for a term of three or more years. The United States Government allows 167 dollars a year for the support of each Indian child.

We proceeded to explore the estate. As we turned from the central buildings we admired the fitness of all the surroundings. Two large ponds lie to our right, where the boys ply their boats. Roach and perch have a lively time of it. The Indians delight in the water, and in rowing, swimming, and fishing. Below, in the valley, is the creek, which affords scope for young anglers, while on the spacious lawns in front girls as well as boys have abundant room for base-ball and tennis. But it is not all play. There is a sprightliness and easy freedom everywhere, but the children really work. In the doorway we meet a robust young Uchee from the Indian Territory. He is quick with his hands, but slow to think. He is a good writer, and at last, after great pains, has learnt the multiplication table. Here is a Sioux, whose name is Nathan Lone Wolf. He is descended from a noted warrior chief, and is a born sculptor. The superintendent studies each child, and shapes his training accordingly. Here is a group of boys tending 30 cows and calves, and studying the art of managing the unmanageable. A row of ploughs and appliances for under-draining lies near by, for these young Indians must learn to handle all the belongings of a model farm if they are ever to settle down and farm on their own account. Near the ponds are piles of timber, with a "lizard" for hauling timber from the forest, and large saws, worked by horse power, for cutting up the trunks. A couple of stalwart young Indians are splitting logs for firewood with their axes. One of them is a Wyandotte sent out by our friend Jeremiah Hubbard; the other is White Wolf, a Sioux from Pine Ridge. In the gardens are long rows of raspberry bushes, strawberry beds, cherries, vines, and walnuts to reward honest toil in summer and autumn. "We accustom the children to everything that pertains to a farm," said Oliver Bales, "so that when they leave us they may know how things are cultivated and understand the advantages of industry. These Indians are good, faithful workers. They have no director to oversee them this evening, but they have been told what to do, and they will do their work unwatched. They learn readily and work cheerfully, habitually, and skillfully. But Indian boys have not such good constitutions for standing winter as we have, and their health requires care."

The hogs are out in the woods picking up the mast, and at this time of year they find abundance of hickory and beech nuts and acorns. In a spacious grove stands the school-house, surrounded by eight acres of playground, under the tall forest trees.

School teaching needs patience here, for many children move in and out every year, and all work as half-timers. This makes the classification of the children difficult, the little ones being often more advanced than the older boys. The unscratched desks speak well for their good order. In the rear of the buildings are rows of beehives, flocks of geese, a hundred turkeys mostly settled for the night in the overhanging branches, and a well-filled pop corn house. Pop-corn is to American children what roast chestnuts are to English boys and girls, and great fun it is to see the corn popping on the hot stoves. Beyond is the ash-hopper, with complete arrangements for teaching the Indians to make soap. The Sorghum factory is close by, where they manufacture abundance of molasses. There is also the blacksmith's shop, the carpenter's shop, and the shoe shop, where harness is mended, and all that pertains to leather, with a little group of boys detailed off to each department. There are also the milk-boys, gardeners, and broom-makers, sorted according to their various qualifications.

The "shades of eve were falling fast," and we gladly quitted our ramble among the well-stocked barns to see what was going on among the girls indoors. A plentiful meal was spread, and the Indian girls, with lady-like politeness, waited on us at table. There are twice as many girls as boys in the institute, and they are not one whit behind the boys in social culture and refinement. At the touch of a bell they rise from supper, each picks up her cup and plate, and all march out in single file.

Next morning I explored the household arrangements from altar to roof. Martha Bales has a gift for organization. Seven of the most trusty Indian girls are appointed overseers, but no girl is allowed to hold an office more than a month at a time. Thus there is an overseer for the dining-room, kitchen, bread and pie making, milk-cellar, laundry, sewing, and bed-making. Under these overseers range another group called "division girls." These change weekly, with one week each for dining-room, washing dishes, cooking, baking, dairy-work, sweeping, and mending for the boys, sweeping and bed-making for the girls, sewing, and two weeks' laundry. This makes 10 weeks' rotation for the "division girls." As we watched the girls methodically at work in the kitchen I saw one small child busy cleaning dishes, and I said, "Surely that fair-faced little one is not an Indian!" The reply was, "One year ago when that child came here she knew no English, and only talked Sioux."

Indians have little idea of the value of money or of taking care of their clothes. They do not like patched garments, and prefer frequent supplies of new clothes. They have their own ideas of being ladies and gentlemen. To correct some of these points of Indian character, a system has been adopted which merits explanation. The children have to buy their own clothing, and a regular monthly rate of allowance is made for clothing, and an accurate cash account kept with each child. This enables a careful child to save money and to obtain many little things desirable to child

life, while the slovenly and careless pay for their own wastefulness. Thus the young men who work on the farm receive about 3½ dollars a month for clothing. Second-class boys get 3 dollars; third-class, 2½ dollars; while little boys in the fourth-class get 2 dollars a month. An extra payment in every case is made during the harvest months, when they work all day on the farm. The young women in the first class get 1½ dollars monthly; the second-class, 1½ dollars; third-class, 1½ dollars; fourth-class, 1 dollar; and fifth-class, ¾ dollar a month. The younger ones can purchase second-hand clothing if they incline from the older ones. This is not all. In order to train the Indian thoroughly in habits of self-restraint, perseverance, and economy, a threefold record is made daily of every pupil for school, work, and conduct, and on the percentage of this daily record all additional allowance is made for pocket money. The standard of good conduct is taken at 90. Every child winning more than 90 per cent. is rewarded, and every child whose record is below 90 loses a proportion of clothing money. Oliver Balessays: "This method is found to be very effectual for discipline and instruction. The daily consideration of questions of economy, prudence, and business integrity cannot fail to make a good and lasting impression upon the Indian in his weakest points."

ELISHA DAWSON'S VISIT TO ENGLAND.

EDITORS INTELLIGENCER AND JOURNAL:

ALTHOUGH more than fifty years have passed since the dear friend whose name heads this article made application to the several meetings of which he was a member for their sympathy and judgment in his apprehended religious duty of visiting in Gospel love the inhabitants of Great Britain and Ireland, the care indicated, and the signers to some of the documents Elisha Dawson obtained, may awaken renewed interest in him, and in those who shared in the weighty undertaking. [Elisha Dawson went, as indicated in the papers below, on a religious visit to Great Britain and Ireland, in the year 1855. He was "not received" there by the Friends generally, on account of the then recent controversies of the "Separation," and since his visit, a period of fifty-four years, no Friend of our body in America has made a religious visit to Great Britain.—EDS. INTELLIGENCER AND JOURNAL.] The following is the Yearly Meeting's certificate:

To the Inhabitants of Great Britain and Ireland:

Our dear friend Elisha Dawson spread before us a concern which has accompanied his mind for several years, to pay a religious visit in the love of the Gospel, to the inhabitants of Great Britain and Ireland, as set forth in the Certificates of concurrence issued by the monthly and quarterly meetings of which he is a member, and which were produced and read in this meeting.

Much sympathy was felt for him, and after deliberate consideration his concern was united with, and he encouraged to follow the pointing of Truth in this arduous undertaking, as way may open. He is a minister in good esteem, and beloved by us, being of exemplary life and conversation.

We commend him to the guidance of Divine wisdom, and to the kindness and sympathy of all amongst whom

his lot may be cast, desiring that this aged servant may be enabled so to fulfill his prospect, as may tend to the promotion of the Gospel of our Lord Jesus Christ, your edification, and the relief of his exercised mind, and if consistent with the Divine will that he may be favored to return to his family and friends with the rewards of Peace.

Signed by direction and on behalf of a yearly meeting of Ministers and Elders of the Religious Society of Friends, commonly called Quakers, held in Philadelphia for Pennsylvania, New Jersey, Delaware, and the Eastern Shore of Maryland, on the eleventh, and by adjournments, on the thirteenth, fifteenth, and seventeenth days of Fourth month, 1835, by
WM. WHARTON, Clerk.

Another document, signed by eight prominent Friends, and citizens of Philadelphia, accompanied by a certificate from its Mayor, here follows:

We the subscribers, citizens of Philadelphia, have long been acquainted with Elisha Dawson, whose home is in an adjoining State. He is an aged man, and a member of the Religious Society of Friends, remarkable for his innocent and exemplary life and conversation, and justly entitled to the respect and kindness of all persons where his lot may be cast. He carries with him to Great Britain, among other documents, a certificate of Unity, given forth by the Yearly Meeting of Ministers and Elders, held in Philadelphia on the 11th, 13th, 15th, and 17th of the Fourth month, 1835; and signed by direction, and on behalf of said Meeting, by
WILLIAM WHARTON, Clerk.

We further certify, that we have known William Wharton intimately for many years. He is a man of great integrity and high standing in this community, having been remarkable from his youth up for his correct deportment and unblemished reputation. He is a native citizen of Philadelphia, and his word or signature are justly entitled to the fullest confidence.

Philadelphia, Fifth month 19, 1835.

Thos. Williams, James Mott, Peter Wright, Henry M. Zollickoffer, Clement Biddle, Jos. Parrish, Jonas Preston Richard Price.

CITY OF PHILADELPHIA SS:

I, John Swift, Mayor of the City of Philadelphia, do hereby certify to all whom it may concern, that I have been well acquainted with the within named William Wharton, for more than thirty years—and the testimony given of him by the gentlemen who have signed the subjoined Certificate, is just and true.

I am also personally acquainted with Joseph Parrish, Jonas Preston, Richard Price, Thomas Williams, James Mott, Peter Wright, Henry M. Zollickoffer, and Clement Biddle, whose names are signed to the within Certificate. They are all citizens of Philadelphia, of the greatest respectability, whose Certificate and recommendation are entitled to entire belief and confidence.

In testimony whereof, I have hereunto set my hand, and caused the corporate seal of the said city to be affixed this Nineteenth day of May, in the year of our Lord One Thousand Eight Hundred and thirty-five.

JNO. SWIFT, Mayor.

To all people to whom these presents shall come:

I, Caleb P. Bennett, Governor of the State of Delaware, do hereby certify that I have for many years personally known Elisha Dawson, a member of the Religious Society of Friends, and now about to embark for Europe—that he is a citizen of this State and has long borne and now bears, a high character as an upright, honest man and Minister of the Gospel in the respectable Society of which he is a member.

In witness whereof, I have hereunto set my hand this

Eighteenth day of May in the year of our Lord One Thousand Eight Hundred and thirty-five—1835.

Here follows the attestation }
C. P. BENNETT,
of the Secretary of the State, }
Wm. Hemphill Jones.

Elisha Dawson accomplished the religious visit, involving a year's absence. He deceased about three years thereafter. His second marriage was with the widow of Clement Laws, Mary Laws, who was the mother of Mary Rowland Caley, and grandmother of my wife, from whom the original documents came into my possession.

SAMUEL B. HAINES.

New York, Second month 13.

EDUCATIONAL.

INCENTIVES: A FURTHER ESSAY.¹

NOWHERE, probably, can the terms "good, bad, and indifferent" be more truly and forcibly applied than to the incentives used by parents and teachers at home and in school to induce children to do those things deemed important for their physical, mental, and moral development and growth; and to nothing perhaps can our attention be more properly turned than to the discovery of those things that best and most surely tend to "train up a child in the way he should go." If we thoroughly understood the nature of the child, comprehended the laws of its development, knew what was best adapted to each and every stage of its growth, and had clear and correct ideas of educational ends, we would be much less likely to make mistakes than we now are; and the greatly increased activity of late years in regard to the aims and means of education and training are hopeful signs. The discontent, too, so freely and widely expressed, while it tends to disorder at present, gives promise of a more orderly progress in the future; and even such works as Caroline B. Le Row's "English as She is Taught" and "The Young Idea," are throwing much light on many a dark subject, by showing the absurdity of not a few of our ways,—ways anti-pedagogical, anti-psychological, and sadly unfruitful.

The incentives that we want, or need, are those that permanently appeal to the highest motives of the soul, and not such as prizes and marks, which at best are but temporary means to an end, but which are too apt to become the end itself. Of prizes, little need be said here, for hardly in Friends' school are they given; but whether they be scholarships or fellowships or what not, if they be prizes, they are doubtless *bad*. We are not so clear of the evil effects of marks. Most likely they had their origin in a well-meant attempt to devise some simple method of keeping a record of the general progress and standing of pupils to be furnished to parents and guardians. For such a purpose they may have had their use, and they may have it still. They may be made to serve as powerful incentives; but their action is doubtless the greatest on those needing it the least, and there is great danger that they may be made the *end*, rather than the *means*. Pupils often seem more

¹ Read by Henry R. Russell at the Educational Conference, 15th and Race streets, Philadelphia, First month 26, 1889.

anxious to have good marks than good lessons; and even the teachers find it hard not to be unduly influenced by the marking system; and indeed they are sometimes subjected to the criticism of their own classes as seeming to attach great value to high marks; and when the marks of one school are compared with those of another of the same grade, they may and no doubt often do, stand in the way of good teaching and good studying.

Closely connected with the marking system is the examination furor. This has grown so serious that enlightened educators far and wide are lifting up their voices against it. In a late number of *The Nineteenth Century* there is a "Protest against the Sacrifice of Education," signed by four hundred Englishmen,—professors, teachers, members of parliament, clergymen, and others; and some of them make interesting comments on the system in vogue there,—much worse, no doubt, than it is here,—but everywhere it is all tending one way, and that way by no means the best way. One who formerly urged the necessity of examinations for admission to the Civil Service, now thinks "the time has come to examine the examinations." He says, "many years ago we wanted to have examinations for the sake of the schools and universities; we now seem to have schools and universities simply and solely for the sake of examinations." Another says, "that having been called in to aid education, examination has grown and hardened into the master of Education;" and he adds that he should encourage the student "to study for the sake of knowledge, for his own sake and the public good." "The Protest" is an earnest one, setting forth the dangers besetting all their schools "from the elementary schools to the university;" and the signers hope "there will grow up a more delicate appreciation of the subtle influence both for good and for evil of education, and that the easy credulity with which this generation has placed 'book learning' before a careful training of the senses and higher faculties may slowly give way to higher views."

The strongest and the best incentives that can be brought to bear upon the young must be found in the precept and example of earnest, enthusiastic and conscientious parents and teachers and in the inherent interest that can be awakened in the work of education and training. The healthy exercise of the activities of the young is pleasant to them: and if we adapt the work both in kind and amount to the growing child, he will delight in doing it. Children are interested in the life about them and they like to take part in it.

If we will quit feeding them on husks—on words, empty words,—words that convey no meaning to them; stop giving them arithmetical puzzles and grammatical conundrums; stop in fact trying to do many things we are now trying to do but are not doing, and try to do what we should do, put them into proper relations with the things and persons about them first, and with those beyond them afterwards, giving them something to do with their hands as well as leading them to observe, and the well-qualified, concerned teacher (and none but the concerned

teacher is well-qualified) will find that kind nature has given the child incentives that will lead him on and on, and that what he most needs is companionship, guidance, and encouragement.

Of course the *sense of duty* must ever be regarded and presented as the highest and the most important of all the incentives to education and training—to the formation of character; but this sense is best awakened by the pleasure arising from doing one's duty; and when correct habits are formed and will-power rightly developed, we may reasonably hope that duty will be a controlling influence. But we cannot expect the young to pursue their studies diligently and orderly in school, nor to continue them through life, unless they are interested in them; nor can we expect them to be as much interested in them, if they have no connection with the life and thought of to-day.

Whenever we find that any incentives tend to ignoble ends and to the employment of deceptive means, as marks and examinations undoubtedly do, it may be safely set down that they are not such as we should use: and whenever we find that our pupils are not interested in their work we may be sure there is something wrong in the work, or the teaching, or both.

In the last number of the *Popular Science Monthly* is "The Story of a School" that no thoughtful person can read without interest; and while perhaps none of us can accept all the conclusions of the writer, it is full of suggestions as to the possibility of having a school the supplement of the model home, in which it will be a delight for teachers to teach, and students to study and be trained in such a way that when they get old they will not want to depart from it.

H. R. R.

WHEN we have gone within the veil that hides
From mortal ken the lost of other days,
Amid the pure transparency of those rays
Wherein, unseen, the Light of Life abides,
Shall we, indeed, frem out the luminous tides
Of spirits surging through those mystic ways,
Full surely know—oh, joy beyond all praise!—
Each waiting friend? So heart to heart confides
Its secret pain. But one of clearest sight,
So questioned, answered: While we still are here,
Earth-pent, how often do we recognize
For what they are the spirits pure and bright,
Close at our sides? How not for heaven fear,
When mortal vapors wrap in such disguise!
—John W. Chadwick, in *Christian Register*.

THE mystery dimly understood,
That love of God is love of good,
That Book and Church and Day are given
For man, not God,—for earth, not heaven,—
The blessed means to holiest ends,
Nor masters, but benignant friends,
—J. G. Whittier.

AWAY, thou vain Philosophy!
Little hast thou bestead,
Save to perplex the head,
And leave the spirit dead.
—Arthur Hugh Clough.

PHILADELPHIA, SECOND MONTH 23, 1889.

THE REPRESENTATIVE COMMITTEE.

At the winter quarterly meetings in Philadelphia Yearly Meeting, there is usually appointed a number of Friends to bring forward names of suitable persons to serve as members of the Representative Committee, these names to be offered for confirmation or rejection at the spring quarters just previous to the annual assembling of the yearly meeting. The question is frequently asked at such times by members not active in the business affairs of our Society or very familiar with our "Rules of Discipline," "for what purpose is this Representative Committee?" The answer, "to represent this yearly meeting during its recess," etc., does not usually satisfy, the query being continued as to what official acts are performed during the interim. A rehearsal of these as reported in the minutes read in the yearly meeting, seems meagre enough for so large and important a body. In the various and important concerns that now claim our attention and which are promoted through the agency of committees especially appointed for the purposes, there would seem to be a diverting of labor from where it might properly belong,—i. e., to this Committee that represents the yearly meeting when not in session. But the limitations placed upon this body are construed to be such as not to admit of its entering upon such active work, and this work is doubtless better done by the special committees, as at present arranged. But there is a feeling existing with many Friends that this Representative body might perform greater service in promoting the best interests of our Society, especially in the line of providing tracts, pamphlets, and inexpensive books setting forth our views and testimonies in many ways. The little that is authoritatively done in this direction is so entirely inadequate to the demand in our First-day schools (and elsewhere) that these are constantly compelled to resort to the publications of individual Friends or outside organized bodies for their supplies. These supplies, to their credit be it said, are mainly satisfactory; but does not the Society, as a Society, suffer by permitting its cherished faith, principles, and testimonies to be thus constantly circulated without its sanction and approval? Is it not time for its Representative body to reconsider the scope of its duties and see if there

is not a greater work called for than is now performed? We are jealous of the high standing of our yearly meeting, well able as it is in a collective capacity to furnish to its members and all who seek moral and religious instruction at its hands, ample equipment for such instruction, historical or otherwise, from its foundation to the present time.

We are well aware of certain clauses in our Book of Discipline regarding the service of this body. 1st. "It is not to meddle with any matter of faith or discipline." This is plain enough, but the second is much broader: "To procure and distribute such books or pamphlets as may be a means of spreading the knowledge of our principles or testimonies; and to advise or assist any of our members, on their own application, who may incline to publish any such MSS. or work, as may tend to promote the cause of Truth, or be beneficial to the Society."

It is greatly to the credit of our younger members that they are seeking, many of them, to know more of the Society into which they are born and which though small as to numerical force has been and still is an important factor in the world's advancement towards moral and religious truth. But the age in which we live is so rich in knowledge to be acquired, that time is too valuable to be spent over great volumes of ancient writings, clothed in language far less concise than now obtains; these records of worthy Friends need condensation so as to take their proper place and rank with other historical facts, that by reason of their voluminous character they need not be dropped out of sight. But who is competent for so great a task? Who has the time, the skill and the wise judgment to select from this ancient table of Friends, food adapted to our present need? Have we not in this carefully selected Representative Committee those who seeing the want can devise the means to supply it? Surely here it could "advise or assist" and thus "promote the cause of Truth."

As the time is again approaching for its re-appointment let those who have the matter in charge think of their responsibility in selecting, and those selected dwell deep under the concern, that happily they may realize its importance and arouse to the duties required for the generation in which we are now acting, making our history to take its place and rank in the ages that are to follow.

THE Association for the Promotion of Education among the Southern Colored People is in serious need of aid. The receipts of funds this year, in Philadelphia Yearly Meeting, are much less so far than during recent years. Friends in New York Yearly Meeting have given substantial aid, as usual, but those of this section seem less interested than here-

tofore. The schools are open and doing good work: it is to be hoped they will not lack the very moderate amount of support they need.

THE title-page and index of the paper for last year, 1888, has been printed and ready for distribution for some days, and a notice to that effect should have appeared last week. Subscribers who desire to bind their numbers, and who have not already received the title-page and index, are desired to send us a postal card or other notice.

MARRIAGES.

WHARTON—SHOEMAKER.—At the residence of the bride's parents at Germantown, Philadelphia, by Friends' ceremony, Second month 14th, 1889, Joseph S. Lovering Wharton and Amelia Bird, daughter of Benjamin H. and Susan B. Shoemaker.

ZAVITZ—BROWN.—At the home of David Brown, Pickering, Ont., First month 24th, 1889, by Friends' ceremony and under the care of Pickering Executive Meeting, Edgar M. Zavitz, son of Daniel and Susan W. Zavitz, Coldstream, to Alzina, daughter of David and Phebe Brown.

DEATHS.

ABBOTT.—First month 24th, 1889, Margaret Abbott, aged nearly 89 years; an approved minister of East Hamburg Monthly Meeting of Friends, N. Y.

An earnest and faithful advocate of the principles and testimonies of our Society, she was ever ready to embrace opportunities for disseminating them among those unacquainted with them.

ALBERTSON.—Second month 12th, 1889, at the residence of his brother, Henry Albertson, Lansdowne, Pa., Charles Albertson, in his 56th year.

BASSETT.—On the evening of Second month 14th, 1889, Edward H. Bassett, aged 68 years; a member of Salem, N. J., Monthly Meeting.

BETTS.—In Philadelphia, Second month 15th, 1889, Hannah B., wife of Samuel Betts, in her 64th year. Interment from Buckingham Meeting-house.

HIBBERD.—In Willistown, First month 24th, 1889, Eliza Evans Hibberd, aged 89 years.

JOHNSTON.—In Philadelphia, on the morning of Second month 13th, 1889, Ellis Irwin Johnston, in his 26th year, son of the late Alexander and Mercy K. Johnston.

KING.—At her residence, Second month 5th, 1889, Phebe M., wife of Thomas r. King, and daughter of Joseph and Rebecca Preston (deceased), aged 61 years, 10 months and 3 days; a member of Little Britain Particular and Nottingham Quarterly Meeting.

Diligent in the attendance of meetings, her place was seldom vacant unless prevented by indisposition in her family.

She looked well to the ways of her household, exercising prudence and forethought, thus having time to minister to the wants of the sick and afflicted.

A week before her removal she bade all farewell as calm and resigned as though her way was clear, showing no fears of death.

Thus ended a pure, unselfish, and useful life and we feel the assurance that she has entered the rest prepared for the children of our Heavenly Father.

KOHL.—At Annelly, Kan., Second month 17th, 1889,

Mattie, wife of Milton S. Kohl, and daughter of Benjamin C. Rich, formerly of Horsham, Pa., aged 40 years and 3 months.

LUPFON.—On the 29th of First month, 1889, Lydia Lupton, widow of Jonah H. Lupton, aged 85 years and 9 days; a member of Ridge Particular and Hopewell Monthly Meeting, Frederick county, Virginia. For many years an Elder, she was one who took an active interest in our Society and was a regular attender of all its meetings to within a few months of her death. May her devotedness to the cause of Truth, and her example in upholding the testimonies of our Society be a stimulus to us all.

W.

MORRIS.—In Philadelphia, Second month 14th, 1889, Stephen Morris, aged 65 years.

TOMLINSON.—Passed from this life, Second month 6th, 1889, at the residence of her brother, M. Harvey Tomlinson, in Trenton, N. J., Rebecca T. Tomlinson, in her 61st year.

The deceased was a member of Makefield Monthly Meeting, and an earnest worker and sympathizer with the First-day school at that place.

In realizing that this dear friend has passed away, memory recalls from an intimate acquaintance with her from the days of her youth, the many sterling qualities of heart and mind, which she possessed.

The ever kindly sympathy extended to all in trouble and affliction, and the desire to look on the cheerful side of life, made her company and presence seem like a continual benediction of good-will to all.

Such lives need not the glowing eulogy of voice or pen. Their worth is embalmed in the memories of their good works. The noblest tribute we can give to the dear departed is to realize the beneficial influence of their lives in elevating and consecrating our own. S. E.

WARBASSE.—In Philadelphia, Second month 9th, 1889, Violetta L., wife of Elias Hicks Warbasse.

"OLD WESTTOWN" AND JOHN COMLY.

AN esteemed correspondent, in a note partly private and partly for publication, refers to some points in connection with Westtown Boarding School and the recently issued volume of its reminiscences, and especially notes a passage concerning John Comly and his Grammar. Our correspondent says:

"In the establishment of Westtown Boarding School near the close of last century, an advance in some respect was made in the cause of Education in the Society of Friends, though it was attended with a retrograde movement so far as the local schools, under the care of monthly and preparative meetings, were concerned. The energies of Friends were devoted to the building up of a yearly meeting boarding school, and being unable to grasp both objects at the same time, a declension and in several instances an *extinction* of schools nearer home was the consequence.

"The 'Recollections of Westtown,' by B. J. Leedom, has been recently followed by 'Old Westtown,' in which with one exception all the old teachers who after the Separation of 1827 did not take the 'Orthodox' view, have been ignored. That exception I quote as follows:

"John Forsyth was the author of the little Grammar called 'Comly's English Grammar made easy to Teacher and Pupil,' . . . published in 1803 . . . not caring

to venture the risks of publication, or not desiring to see his name in print, John Comly undertook the responsibility instead."

Our correspondent inquires why the reviewer of the book in the *INTELLIGENCER AND JOURNAL*, (First month 26), did not note this statement, and adds a strong protest against the likelihood of its being true, referring us to the statement at page 143, of John Comly's "Journal." He remarks, in substance, that at the time of the Separation John Comly's prominent position on the side of the large majority of Philadelphia Yearly Meeting made him the centre of the controversy, but that at this distance of time, it is to be expected that full justice should be done him. Our correspondent adds his regrets that in instances which he mentions books relating to historical and biographical subjects have shown a party spirit. He says: "The English editor of the *Memoirs of Stephen Grellet* omitted the name of the friend to whom Stephen owed the preservation of his life, during the yellow fever visitation of Philadelphia, in 1793, the apparent reason being that thirty years later this friend did not take the same doctrinal view that Stephen did. In the *Memoir of Rebecca Jones* the editor did not mention the name of the friend in the country with whom summer after summer, she was domiciled. This friend, too, was a Hicksite." When the matter was brought to his attention, the editor disclaimed knowledge as to the place she visited."

We answer to our friend's inquiry that the paragraph about the authorship of the *Grammar* did not attract the attention of the reviewer of "Old Westtown." It strikes us as a very remarkable statement, and we confess our surprise at its being now put forth. The school-books of John Comly were well known to educators and others, during the first half of the present century, and we are not aware that any of them were attributed to any one but himself.

The allusion in John Comly's *Journal*, p. 143, (this passage being among the matter written by the editors of that work), is as follows: "Among the early fruits of his literary labors were the compilation of an 'English Grammar,' and of a 'Spelling-book,' which through a long course of years have received deservedly the approval of experienced instructors, and been adopted in a vast number of schools in the United States. The publication of these claimed his attention soon after the establishment of 'Pleasant Hill Boarding School,' [Byberry] the name of the institution under his care."

Leaving the subject of the authorship of the *Grammar*, it may be added that John Comly was one of the teachers at Westtown soon after its establishment. He entered upon duty there Fourth month 9th, 1801, and remained until the Eleventh month, 1802. Another of the teachers during this period was Rebecca Budd, of Monnt Holly, N. J., who went to Westtown in the Fifth month, 1799, as a scholar, but was appointed writing teacher for the girls, in place of Ann Bacon, later in the year, and continued in that position until the Third month, 1803, when she was released, in anticipation of her marriage with John Comly, which took place in the Sixth month of

that year. A memorandum left by Rebecca gives her impressions of Westtown, when she first went there. She says:

"We had a pleasant ride to Philadelphia, where we stayed until next morning. Then . . . set out at 8 o'clock . . . and went in the West Chester stage with agreeable company. At four o'clock in the afternoon we arrived at cousin Jonathan Carmalt's, who received us kindly; and after tea he took us to the school. We were kindly received by the superintendent, his wife, and others, as an addition to the family which already might be called large. After sitting some time in the parlor, Phebe Cox came in . . . With her I went over the spacious building, and counted twenty-six rooms, one of which, intended for the boys' lodging-room, is the full size of the house. [Next day.] I am very much pleased with my new habitation. It is situated on an eminence, surrounded on three sides by a beautiful wood. The west side commands an elegant and extensive prospect of hills, valleys, houses, orchards, etc., presenting a great variety to the view. The house, including the whole establishment, is four stories high."

THE LIBRARY.

FRIENDS' BOOK ASSOCIATION, 15th and Race streets, Philadelphia, have just issued in a neat pamphlet of 29 pages, an address delivered by John J. Cornell, at West Chester, Pa., in Eighth month, 1888, on "Views and Practices of the Society of Friends." The price is seven cents a copy. The author, in his opening paragraph, says that while he endeavors to give, as clearly as possible, his understanding of the subject, he wishes to be distinctly understood that no one but himself is responsible for what the paper contains.

A convenient and valuable leaflet, for those interested in the Indian work, is sent out by the Women's National Indian Association, edited by Kate Foote, President of the Washing on Auxiliary, and contains a statement of the several bills passed by Congress in 1888, in relation to the Indians. These were twenty-five in number, and included the general appropriation bill, in which \$40,000 was appropriated to continue the allotment to the Indians of their "severalty" holdings; the bill to divide the Sioux reservation in Dakota, (to which, however, the necessary assent of the Indians could not be obtained); an act to pay the Omaha tribe \$70,000 due them for their lands in Nebraska; and one in relation to the marriage of white men with Indian women. "This will not tend to decrease the marriages with white men, which have become quite a branch of industry, as the Indian woman receives her share of land in allotment equally with the rest of her tribe, but it gives her the privileges of a white married woman." Among the bills that failed was that to secure the unhappy Mission Indians of California, in whom the late Helen Hunt Jackson was so much interested, the title to their lands. It passed the Senate early in the session, and was brought up by Mr. Vandever, of California, in the House, but was "objected off the calendar," and failed of consideration.

The Pennsylvania Forestry Association, an organization which is doing good work in promoting public interest in the preservation of living trees, and the planting of new forests, publishes a monthly periodical with the title of *Forest Leaves*, the conductor being John Birkinbine, 25 North Juniper St., Philadelphia. (Subscription \$1 a year.) The number for the present month contains, among other interesting matter, an article by Prof. J. T. Rothrock, of the University of Pennsylvania, an enthusiastic botanist, and known to many by his very interesting public lectures on botanical subjects in the "Michaux Course." Prof. Rothrock writes upon "Tree Growth as Determined by Location," and a handsome picture is given showing two great white-oaks, one of them of the open space and wide spreading type, the other a forest growth, with its branches pushing upward. The former, "a noble spreading individual, in full vigor, with hardly a trace of decline," stands on the banks of Mantua Creek, in Central New Jersey. It has a height of 80 or 90 feet, a spread of branches of 103 feet, and its trunk at three feet above the ground, has a diameter of six feet three inches. The other oak is smaller in all its proportions, and stands on the banks of the Brandywine, in Pennsylvania.

For Friends' Intelligencer and Journal.
PARENTS AND CHILDREN.

Among the many instructions left upon record in the Scriptures of truth, we find in the 6th chapter of the Epistle to the Ephesians an admonition to children that they obey their parents in the Lord "for this is right," which may seem to apply more especially to those who have righteous parents, who as much as in them lies, provide for their every comfort, and are concerned for their well being both spiritual and temporal. And they who are obedient to such parents as in the Lord, will reap the fruits of righteousness, peace, and joy, and "be like olive plants round about the table."

Another admonition occurs in the same chapter, "And ye fathers, provoke not your children to wrath: but bring them up in the nurture and admonition of the Lord." How often are the dear children asking as it were for the bread of kindness, love, and affection, which they so much need to strengthen their little hearts! "What man is there of you, who if his son ask bread, will he give him a stone? Or, if he ask a fish, will he give him a serpent? If ye then being evil, know how to give good gifts unto your children, how much more shall your Father which is in Heaven give good things to them that ask him?"

O, may the fathers and mothers to whom is given the care of the precious lambs of the flock, be qualified in the love of the Heavenly Father to teach them by example and precept the pathway to a blissful immortality when done with this probationary state, so that they may enter into rest and peace, with the purified spirits who surround the throne of God in praises forever.

REBECCA PRICE.

Second month, 1889.

THE PROHIBITORY AMENDMENT: THE DUTY OF FRIENDS.

EDITORS INTELLIGENCER AND JOURNAL:

IN considering this subject I do not deem it necessary to reiterate the familiar arguments in favor of Prohibition, and against the licensing of every form of crime. I take it for granted that very few Friends need, at this time, any such appeal. The point to which I wish to direct especial attention now is how shall the influence of Friends be best exerted to bring about the changes on our statute-book which we must so generally desire. Shall it be by individual labor only, or by earnest, well-organized, and well directed efforts as a religious body? While no opportunity should be lost to cast the weight of our influence upon the right side as individuals, whenever and wherever such opportunity is offered, we should certainly be derelict in duty, as members of a religious organization professing what we profess, were we to rest satisfied with this individual work alone. If there ever was a time when Friends were especially called upon, in their organized capacity, to work in any great movement of reform, this is surely the time. The approaching struggle is not to be compared with any mere political contest, from which Friends would naturally and properly feel that they must, as a religious body, stand aloof. This is not a strife between the great opposing political parties of the country, nor is it an attempt to organize a third political party, at variance with both of these; but it is a struggle of right with wrong: of light with darkness; of vice with virtue; of the lower with the higher nature of man.

Surely into such a struggle Friends may enter with heart and soul. And how shall they most effectually make themselves felt? Let all of the preparative and monthly meetings weightily consider this great subject, and appoint large committees of the young and active members of society to labor, in all possible ways, for the general dissemination of light. Let such meetings also instruct their Representatives by minutes to lay the matter before their quarterly meetings, and let quarterly meetings pursue the same course with reference to the coming yearly meeting. And when that great body of Friends assembles in the Fifth month, let it be prepared to send forth to the people of Pennsylvania a most earnest and stirring appeal. Such an appeal, from such a source, will do much to mould the public sentiment of the State. Although it is impossible to predict at this time the result of an election upon this new, distinct, and non-partisan issue, there is reason to believe that the vote will be so equally divided that the influence exerted by the yearly meeting of Friends of Philadelphia, properly directed during the last few weeks, will be sufficient to turn the scale. If this be the case, can Friends assume the responsibility for the continuance of a traffic which has been too well said to be more destructive of human life than war, pestilence, and famine combine; and what is far worse than that, is so utterly subversive of all that is good and true, pure and noble in human character.

But the course advised is something out of the

usual practice of Friends, aside from the general routine of the business affairs of our religious meetings. Is that a good reason why it should not be adopted? Did George Fox stand upon precedent in managing the affairs of the Society? If he had, would the Society of Friends ever have been born? And will Friends let our Society die of inanition for the sake of preserving the fixed routine? Rather let us go forward, interest our young people in the Society by giving them such work to do inside the Society, instead of compelling them to unite with others in advancing a good work. Think of these things, Friends, between now and next Sixth month, and put your thought into active operation in the various meetings to which you belong. A desperate effort will be made by the great liquor interest to defeat this most righteous amendment. But the Religious element will rise against it, and in this uprising, Friends, as the great standard bearers of the cause of Temperance, must not be in the back-ground. Have faith in your principles, and never fail heart. Do not believe that in any fair contest truth can be permanently crushed by error; virtue by vice; Christ by Belial. Appoint your committees; organize your forces; and in this peaceful warfare you will be victorious.

EDWARD H. MAGILL.

SWARTHMORE NOTES.

—There will be two prize oratorical contests in the college this spring. The first will be for *The Phoenix* prize, and will be held next month on a day appointed by the judges. The staff of Volume VII. of *The Phoenix* set aside the sum of \$92 from the year's earnings, to be devoted to the encouragement of oratory in the Junior classes of the coming four years. The prizes are gold medals valued at fifteen and eight dollars, which are each year awarded to the best competitors. The terms of the foundation only allow five contestants who are chosen on the excellence of the essays presented to the judges. The other contest is open to all members of the Sophomore and Freshman classes, and consists of five prizes of ten dollars' worth of books each. These prizes were founded by President Magill, and the contest for them will be held in Fifth month.

—The engineering students of the Freshman class, accompanied by Professor Beardsley, visited the great shipyards and other iron-works in Chester city, on Fifth-day last. Professor Beardsley has taken each of his classes on a tour of inspection this winter.

—The largest audience of the season greeted Mary A. Livermore, of Massachusetts, in her lecture "Women of the War," on Fifth-day evening. Her recital of her experiences while aiding the Union cause during the Rebellion, was very interesting.

—Professor Appleton has concluded his series of select lectures at Trenton, N. J. The course consisted of five lectures on English literature.

—Doctor Spencer Trotter, Professor of Natural History, will deliver a lecture at the Academy of Natural Sciences, Philadelphia, on Third month 1st.

—The students of the Preparatory School will

hold athletic sports on "Whittierfield," as the college grounds are known, on the Seventh-day afternoon previous to the regular college sports. There are some young athletes of ability among the "Preps" and Dr. Shell is encouraging them to hold a field exhibition.

—Members of the Somerville Literary Society intend to present a Greek play, the parts of which will be rendered in the original Greek language, as an entertainment for their alumni and ex-members on the occasion of the Somerville reunion in Fourth month.

FROM AN ISOLATED FRIEND IN OREGON.

EDITORS INTELLIGENCER AND JOURNAL:

. SINCE the through routes have been completed there has been a large emigration to this State; which is not to be wondered at, as the climate is delightful. We have not had ice half an inch thick this winter, and flowers are in bloom all around us. I still hope that some day we may have a settlement of Friends here. I have not attended a Friends' meeting for twenty years; and the INTELLIGENCER AND JOURNAL is my only connection with the Society in which I was born and raised. B.

Second month 7.

RESPECT THE BURTHEN.

GREAT Garibaldi, through the streets one day,
Passing triumphant, while admiring throngs,
With acclamations and exultant songs,
For the uncrowned kingly man made way,
Met one poor knave, 'neath heavy burden bowed,
Indifferent to the hero and the crowd.

His zealous followers would have driven aside
The sorry creature, but that good man said,
Laying a kind hand on the suffering head,
"Respect the burthen." Then, majestic-eyed,
He paused, and passed on, no man saying him nay;
The heavy-laden also went his way.

Thou happy soul, who journeyed like a king,
Along a rose-strewn road, whate'er thy lot,
"Respect the burthen." Thou mayest see it, or not,
For one heart is to another a sealed thing:
Laughter there is which hideth sobs or moans,
Firm footsteps may leave blood upon the stones.

"Respect the burthen," whatso'er it be,
Whether loud outcries vex the startled air,
Or in dumb agonies of loss, Despair
Lifts her still face, so like tranquility;
Though each strained heart-string break, she never
shrinks;
Says "Let this cup pass from me," stoops and
drinks.

Oh heavy burthen! why 'tis borne, or how,
None know—save those who bear, and he whose
hand

Has laid it on, saying, "My beloved, stand
Upright—and take this chrim upon thy brow,
God's own anointed. Sore thy load may be,
But know—with in it thou art carrying Me."

—Dinah Maria Mulock.

FIRST LOVE.

YEARS ago, on tender tiptoe, she would steal into my chamber

Softer than a song at sea, that dies upon the deep;
Then would bend and plant a flower of love upon my lips
in slumber,
Seeming, like a dream, half true, when I was half-asleep.

And at times, as I lay watching, for the fairies I believed
in,

If I heard her footfalls, how I slyly would pretend
I was fast asleep, and listen to her bosom heaving o'er me,
Like far music with whose echoes faintest perfumes
blend!

Years and years ago, how lovely! she would steal into my
chamber

Then would kneel and pray for me beside my trundle
bed,

And I used to think the golden stars, were eyes of happy
angels

Bending smiles of bright approval on her golden head.

Years and years ago, my first love often stole into my
chamber,

And how many a flower of love her warm lips planted
then!

But on one dark night—a shadow of the Night that is
eternal—

From my chambers low she went,—and never came again.

Often since those sights of childhood, I've been crowned
with thorns and roses;

Many falls have made me humble, some successes proud.
I have had the love of maiden, felt the glorious thrill of
friendship,

Drunk the poet-wine of nature under sun and cloud;

And yet now, within the twilight, as I think of all the
raptures,

All that have been mine, or may be in the future's keep,—
Sure, ah! sadly sure, it seemeth, all together they weigh
nothing,

To one light kiss from my mother on my make-believe-
asleep.

—Henry W. Austin.

DR. LYMAN ABBOTT says that early in his ministry he resolved—and still holds to the resolution—that he “would not profess religion for a man after death who had never professed it for himself when living.” No man ever made a more rational resolve. The orthodox preachers who are ready to find a title for every great, rich, or popular man to mansions in the skies, even though he never gave any Scriptural evidence of being born again, take back in the particular what they preach in the general, excite contempt among unbelievers, encourage neglect of religion, and strengthen the bands of loose thinkers in and out of the church.—*Selected.*

“THOUSANDS of men remain poor all their lives because they are bent on getting rich by means of some great business or large transaction. They might earn an honest and ample living in a smaller way, little by little, and even grow rich thereby, were it not that they are always hoping that they will accomplish their desire ‘at a jump’ or by means of large transactions.”

JOHN BARTRAM'S GARDEN.

THE “Bartram Garden,” situated on the Schuylkill river, just below Gray's Ferry bridge, presents an appearance of almost utter desolation, compared with that of a few years ago. It seems almost incredible that such a historical spot should be so sadly neglected, and so little interest taken in the preservation of such a large number of botanical plants as are to be found here.

John Bartram was born in a little village near Darby, in Chester (now Delaware) county, Penna., on the 23d of March, 1699, and belonged to the second line of descendants of John Bartram, of Derbyshire, England, who came to America with his family during the year 1682. Born in a country where civilization was yet in a primitive state, and where the facilities for learning were meagre, it is hardly to be supposed that his educational powers were developed to any large degree. However, being of a progressive and naturally intelligent nature, he aimed to get the best results of knowledge possible from the country schools he attended. Botany was his especial favorite, though he had some liking for medicine, and as doctors were scarce in those days, he helped many unfortunate ones in distress.

In 1728 he purchased the plot of ground now comprised in the garden, and erected thereon a substantial stone dwelling; here he began to carry out his scheme of a botanical garden, the first in America.

In the year 1741 a subscription was raised by some prominent men with whom he had become acquainted that he might be enabled to travel, and thus develop his botanical studies. He traveled all over the eastern part of America, from the Lakes to Florida, even undertaking, in his seventieth year, an extremely dangerous expedition into Florida.

To-day one of the most celebrated remembrances connected with the Bartram Garden is the cypress tree, and it has a most interesting history. John Bartram, while on his journey through the Florida swamps, lost his whip, and in looking for a switch caught sight of rather a peculiar little twig growing erect by the river side. He stopped his horse, got down on the ground, and pulled it up by the roots. He almost immediately discovered it to be a rare species of cypress tree, of Eastern origin, and, instead of using it for a whip, as was his intention, put it in his saddle-bag and brought it home, planting it in the northern part of his garden, predicting at the same time that it would grow to an immense height. His saying proved true; for, to-day, it stands nearly 175 ft. high, with a circumference at the base of 20 ft.

On leaving the house from the southern doorway may be seen a narrow gravel walk, closed in on either side by a row of rare specimens of fir trees, pines, English oaks, etc. There also may be seen two excellent specimens of the boxwood tree. These two trees were sent to John Bartram by the Earl of Bute, one hundred and fifty years ago, from Smyrna and Turkey respectively, and from them many smaller ones have grown in the vicinity. In the adjoining walks may be found the acacia, magnolia, buttonwood, Norwegian pine, English walnut, horse chestnut, maple, mulberry, balsam, etc.

Probably two of the most curious vestiges left to exhibit his peculiarities and eccentric manner is the old cider press, situated on the banks of the river, drilled out of a solid piece of rock, and the grotto such as we read about in fairy tales.

Much talk is now going on with regard to obtaining additional pleasure facilities for our city people; and while money is being annually expended for almost useless purposes by our city government, cannot some of it be spent in buying this place (which it is understood is for sale), and turn it into a park, or something similar, so that enjoyment may be derived from it, not only to those whose inclinations tend to pleasure, but also to those whose minds contain a love for science and nature. Although it may be too late to cultivate many of the various plants which so long have lain neglected, still it is worth the study of intelligent men to consider the advisability of such a plan. Cannot our philanthropists and public men be brought to notice and take an interest in this subject? Right here, in our midst, is a fertile spot of wide interest, for few, if any, places within a thousand miles of here contain so many interesting objects of nature as the "John Bartram's Garden."—*Philadelphia Ledger*.

THE CLIMATE OF DAKOTA.

THE mean annual temperature of the entire stretch of country extending north from the northern boundary line of Nebraska—more than 400 miles—to the southern boundary of Canada is 41.5°, an average higher than that of either the State of Minnesota or New Hampshire. In the section of the Territory situated south of a line extending westward through Huron, on the James River, north of Fort Sully, on the Missouri River, and thence to Deadwood, in the Black Hills, the mean annual temperature is 45°, or about that of Nebraska, Iowa, northern Illinois, southern Michigan, Pennsylvania, and New York. The coldest month of the year is January, the thermometer indicating in that month an average temperature covering the whole area of this vast country of 7° above zero. The mean temperature for July, the warmest month, is 72°. The average temperature of the three winter months is 11.8°; of the spring, 41.1°; and of the summer, 69.1°. The average temperature of the fall (September, October, and November) is 44.1°, or three degrees higher than during the three months of spring. There are really but two seasons in Dakota, summer and winter; the transition from snow to rain, from the cold of winter to the heat of summer, occurring with remarkable suddenness, generally in March, though sometimes as early as February. During the month of January the thermometer frequently registers a very low temperature, occasionally going 40° or more below zero; and yet, contrary to general opinion, these days of extreme cold are not the most trying. When it is the coldest the sky is cloudless and the sun shines with a midsummer splendor, the atmosphere is at perfect rest, and the crackling of the frost, the crunching of the trodden snow, together with the intoxicating effect of each breath of dry, frozen air, create an exhilaration almost indescribable. An act-

ual inspection of the thermometer is necessary to convince one that it is really so cold. The atmosphere, almost absolutely devoid of humidity, never penetrates and chills with that cold one feels in the damp, saturated air of the seaboard states. The most disagreeable storms of the winter occur when the temperature is but a few degrees below zero, and are accompanied by strong winds, blowing almost a hurricane, generally from the northwest, which swirl the dry powdered snow in whirlpools through the air, bewildering stock and blinding the traveler. On such occasions traffic is impeded, trains are halted, the farmer makes no attempt to feed his flocks, the wayfarer remains housed, or, if unfortunately caught out upon the prairie (and he is wise), he protects himself as well as possible, but stirs not a step until the storm has passed. Neither man nor beast can long withstand the facing of the keen, penetrating blasts or of the blinding particles of snow. All ideas of distance or of direction are lost in the confusion of the winds and the obscured atmosphere, and without these to guide him the traveler on the prairies is as a ship without a compass.

Fortunately storms of such severity are neither of long duration nor of frequent occurrence. The most disastrous one on record was the storm which swept over the Territory on the 12th of January, 1888, and the one concerning which the most woful exaggerations and distortions were circulated abroad.

The depth of snow upon the ground is light, when compared with the snowfall of the New England States, of New York, of Michigan, or Minnesota; and even though the season may be one of extraordinary severity, the total snowfall of a winter is less than four feet. Travel, overland or by rail, is maintained during the winter months, with but an occasional interruption from drifts of snow deposited by high winds in the depressions of the road.

The summer days are warm, made excessively so at times by the "Chinook wind"—that remnant of the Japan current which, blowing through the mountain passes of Montana, and distributed by the great valley of the Missouri over the plains of Dakota, so materially reduces the cold of winter and adds to the heat of July. But whatever the unusual heat of the day, the temperature invariably falls at night to a degree insuring rest and refreshing slumber.

From the report of the Chief Signal Officer for 1886 (the only report available) it is learned that in Dakota three hundred and two days of the year were classed as either fair or clear, leaving sixty-three days, or an average of only five cloudy or stormy days to a month.

The warmth of summer lingers through the months of September and October, and it is not until late in December, usually, that winter assumes the mastery.—*P. F. McClure, in Harper's Magazine*.

THE iceberg shows but one-third of its size above the ocean surface. So visible humanity is a fragment only. Underneath is the might of God buoying up its unconscious life.—*Unity*.

"TIPPING."

THAT this is a growing evil no one who is an observer of daily customs can deny. Hotel proprietors may willingly or unwillingly shut their eyes to the condition of affairs around them, and their patrons, selfishly benefited by the custom, may accept such as a decided necessity, yet the fact remains that what is known as "tipping" has no legitimate place in a nation founded on the principle of free and equal rights to all. It is an evil transplanted here from other countries, born and reared under wholly different conditions, and, as such, should not be tolerated a day. This, then, is the ethics, or, as some would say, the *morale*, of the matter. But there is another side—the practical or business side, which appeals with equal strength to the mind seeking fair dealing and honest play. Why should one fee a waiter in a hotel who is simply doing the duty he is hired to do, any more than the waiter in a large dry goods or other business establishment? If it is sound on business principle to pay the one, why not the other?

The incongruity, not to say falsity, of such action can be no better realized than by imagining all the waiters in every establishment constantly receiving fees at the caprice of the buyers. Where would be the foundation for true business development? Where would the relation between employer and employed find any secure basis? What would sooner produce confusion, false judgments, or even deceptive action? Who, even among those who regard "tipping" with indifference or even favor, would be willing to have it carried out thus far? Yet, if it is necessary on business principle to fee waiters of hotels, it is equally so to fee all waiters. This is the logical conclusion from which there is no escape.

Recognizing, then, "tipping" to be an evil foreign to the spirit of our best national life, what shall be done to root it out? Continually talk about it? That might raise public sentiment; but the trouble is not so much with public sentiment. Most people, even those who are partners in the evil, are recognizers of its injustice.

Shall, then, petitions be sent to the hotel proprietors? That would not be effective, for they are imbedded in what has already become a system, and so to a certain extent are helpless. All that most of them can now do is to forbid their waiters to solicit fees. They may take, but they must not solicit, fees. To this point of discrimination has the system brought them!

What, then, shall be done? Only one thing, and that is *individual* action. Let each man and woman visiting a hotel make it a principle never to pay a fee, and the whole thing is settled. This, with a complaint at headquarters if attention corresponding to the rates charged is not given, would insure, in a comparatively short time, equally good fare to all paying the prices asked. A good number of wealthy, prominent people whom I know, in taking this way to solve the problem, have already exerted an influence for good. Is not this a comparatively little thing to do for the sake of rooting out from our land an evil which has grown to be such a curse in foreign

lands? It most certainly is for those who, as "lights of the world," are seeking to hasten the coming of His kingdom of order and fair play on the earth.

Then there is individual action on the part of the employed. From the very nature of things, as much cannot be expected in this direction toward aiding the reform. But I remember seeing the effect one such had on a party. Upon being handed a quarter, he politely declined it, with the remark, "I am paid for my service here." The simple dignity with which the remark was made gently rebuked the gentleman who, as was his custom, had offered the fee-money. Such an act from an employee, who doubtless could have used with profit the extra money, was the cause of an extended conversation, the good influence of which he never dreamed.

To do this individual work in the present condition of affairs takes courage. "I feel mean," said a lady, lunching at a first-class hotel, "if I do not fee the waiter." But why mean? Had she robbed any one? Had she failed to pay the price asked for what the bill of fare offered? Was not its being served satisfactorily and on time the necessary lookout of the proprietor, the business manager, rather than hers? Were not the servants his, not hers? Would she care to have hers receive fees?

These questions drive one inevitably to the conclusion that the meanness consists in being a slave to custom rather than to what is right.

If, as individuals loyal to the truth wherever found, the American people take up this evil, it can easily become a thing of the past, for individual responsibility is not only the corner-stone of democracy, but it can be made a sure leveling power to stay the progress of evil.—E. P. G., in *Christian Union*.

THEORIES OF THE FORMATION OF CORAL ISLANDS.

CHARLES MORRIS at a recent meeting of the Academy of Natural Sciences, Philadelphia, spoke upon the theories of the formation of the Coral Islands. He remarked that there exist, as is well known, two theories of the formation of coral islands, the subsidence theory of Charles Darwin, and the recent theory propounded by John Murray and others, which claims that the phenomena can be explained without calling in the aid of subsidence. It was not his purpose to offer any argument on this controverted question, and he would simply say that the Darwin theory seemed to him much the most probable, the objections to it being, in his view of the case, far less cogent than those to the Murray theory.

If the subsidence theory were accepted, however, there was one consequence necessarily deducible from it which, so far as he was aware, had not yet been definitely considered, and which was not without scientific importance.

The area occupied by coral islands in the Pacific is, as stated by Dana, 6,000 miles in length and from 2,000 to 2,500 miles in width, thus covering from 12,000,000 to 15,000,000 square miles. This includes a blank central area of 1,000,000 square miles in which the subsidence is supposed to have been too rapid to

permit coral growth, beyond which is a region of small atolls, and outside this the region of ordinary atolls. Outside this again is a region in which barrier and fringing reefs replace atolls, and if this region be included the total area of subsidence must have been, according to Le Conte, about 20,000,000 square miles.

The depth of subsidence is variously stated. Dana considers that the extreme subsidence was at least 9,000 or 10,000 feet. Later authorities give it at about three miles. As regards the average subsidence of the whole area it may perhaps be safely assumed as not less than 5,000 feet, possibly considerably more. If the Darwin subsidence theory be accepted, then, an area of sea bottom equal to that of the largest continent must have sunk bodily to a depth of at least a mile.

This subsidence may have been correlative with a considerable elevation of the land surface, but there is no reason to believe that there was any equal elevation of other portions of the ocean bed. There are many evidences of local elevation, but all of them taken together are unimportant as compared with the great subsidence over the coral island area, and may have been balanced by local subsidence elsewhere. Yet such an immense subsidence, with no corresponding elevation of the ocean bottom, could not take place without adding greatly to the capacity of the ocean basin. It formed what we may speak of as a huge valley in the ocean bed, of 20,000,000 square miles in area and one mile in average depth. The filling of such a valley with water must necessarily have caused a marked lowering of the general ocean level. If the figures above given be assumed as correct it is easy to calculate the amount of depression of sea level.

The area in question is equal to that of Asia and Europe combined, and the effect of its sinking would be equivalent to that of the sinking of the Eurasian continent till covered with water to the average depth of one mile; since to fill such a valley in the ocean bed would require as much water as to cover a continent sinking to the same depth. The area named is very nearly one seventh of the whole ocean area, and to fill it to a depth of one mile would cause a general oceanic depression of one-seventh of this depth, or about 750 feet. If the average subsidence be taken at a somewhat greater figure, say 7,000 feet, the consequence would be a depression of the ocean level of 1,000 feet.

This is no fanciful conclusion. If the subsidence stated really took place, without important elevation of the ocean bed elsewhere, such a lowering of the general ocean level must necessarily have occurred to an extent governed by the average extent of subsidence. The effect on the relations of land and ocean altitude would be equivalent to an elevation of the whole land surface of the earth to a height of 750 or 1,000 feet, or some other height dependent on the real degree of subsidence.

Such an effect must have left its marks in the exposure of considerable areas of new land along sloping shores, in the draining of bays and estuaries, the possible conversion of bays into partly or fully land-locked seas, and other drainage results. In fact, if

such a virtual elevation of all the shore regions of the earth took place it would seem as if it must have left some generally traceable indications, which would furnish an argument in favor of the subsidence theory. Yet it may have been so complicated with actual elevations and depressions of the land surface as to destroy evidence of its existence in most localities. That land drainage and shore elevation did take place to a considerable extent during the Tertiary epoch is acknowledged, but whether these were due to actual elevation, or to a sinking of the ocean level, is a problem which cannot be definitely solved without much fuller evidence than we possess at present.

AN EDUCATED CONSCIENCE.

CONSCIENCE, like the body and the brain, needs training. It is not infallible, like animal instinct. If you think a certain course of action right because you have studied it carefully in its origin, its connections, its harmony with the Bible teachings as you understand them, it is well. You are responsible for your belief to God alone. If you say a thing is right simply because you want to do it, and have never taken the trouble to think about it at all, that is altogether another matter. It would be quite as sensible to turn your back upon a certain article of furniture, shut your eyes, and deny that it is there because you cannot see it.

It is so easy to do a convenient or a pleasant thing because a great many other people whom you know do it, apparently with no compunctions. There is such a plausible argument in saying: "They are better and wiser than I ever expect to be. It would be very presumptuous in me to declare a thing wrong, that they, by word and example, affirm to be right."

But conscience, like some possessions of lesser value, is plainly marked "Not transferable," therefore the responsibility of living according to your own, and not your neighbor's, is inevitable. Many actions involve absolute, inherent right or wrong. Others are simply questions of expediency,—right for some people under some circumstances, wrong for others differently envired. Prominently must the latter class be decided each one for itself. Many of them can only be dealt with by a very sensitive, highly developed conscience, one keen-eyed enough to detect very delicate moral shadings, and brave enough to face the truth, even when arrayed against some darling indulgence.

A year ago you honestly thought a certain course of action right, to which to-day, with your broader knowledge, deeper faith, and truer living, you could not commit yourself. Only by boldly challenging every such question, sifting it to the very bottom, and resolutely living up to our decisions, can we have strong, growing, educated consciences; only thus can we "come to the measure of the stature of the fullness of Christ."—*Kate L. Hamilton, in S. S. Times.*

THE end of all study ought to be to guide the mind to form true and sound judgment on everything that may be presented to it.—*Descartes.*

WINTER PICTURES.

THE past week has been a perfect opportunity for the study of trees in winter. Even a short railway journey affords such pictures from the train windows that there need be no selections of light novels or newspapers to pass away the time. No literature is needed to take the place of these rare delights and the pleasure and restfulness the eyes receive in noting these fine etchings by nature. Against a background of palest blue or even a leaden sky, with the engine contributing an occasional cloud wreath of smoke to complete the picture, what fine effects are seen in the February trees, with all their unadorned frankness of outline! Choose the shady side of the car, if you can, except when the sun is so low in the southwest that it merely gilds the outlines. Otherwise it is best to see these pictures without any dazzle on them, and a cloudy, leaden day is just as good as any. Already there are hints of the vitality that comes in early spring to the brown twigs and waiting branches. The tossing winds seem to have hinted there is soon a stir to be expected in these uplifted boughs; a stirring from within in response to this ruffling from without. And yet each exquisite outline shows like an etching against the pale background of sky. It was "Saxe Holme" who called the vineyards of Italy and France the "one-legged dancers," yet now all the apple trees between Jersey City and Philadelphia seem to be prancing a Sir Roger de Coverley—in merry lines—as seen from the car windows. There is a deal of grimacing and contorted hilarity about the apple trees, low-set, stocky fellows, apparently footing it with jollity and linked arms as the train speeds past. They are moving while you stand still, and the child's experience in a moving train, is revived as the rail fences and the wintry streams skip past the window. Then there are other trees the expert would name at sight, seeming to hold up their hands, and imploring heaven; despairing, graceful young trees, not hanging their branches low with a sentimental droop, but as though complaining or upbraiding, or mourning and struggling still. Sturdy little trees, in brisk phalanx with boughs like whipstocks, or like a sheaf of brushes, are thickly set about the few station villages that the line comes near enough to see. The tangle of low growths about the icy water courses, "candied with ice," rattle in the wintry air. "Aslant the brook" is it? ("*ascanti*" was one old rendering)—here be many willows, some fairly uprooted by the autumn gales. "The antique oak" and veterans all, how fine they show! The shivering row of white birches, like unwilling emigrants from a mountain side, needing the rocks at their back to give them an assured air, or the boulders at their feet, are rather thinly endowed for the open country where they stand. That mass of green, too far away for any safe pronouncement as to its quality, is probably an English yew. There is no evergreen tree except the cedar, that fits the surroundings so well as that shapely, vigorous, and wide-branching individual, "no name" authoritatively given.

Students of Pennsylvania forestry have been taught to know the sassafras, when they see it, by

the crooked elbows and the always assertively upheld branches and boughs. But surely there are too many of these independent and towering trees to be all of them great sassafras. There is no stopping for scrutiny and the car-window student makes resolve that to recognize a tree-shape on sight is at least as fine an accomplishment as to render a sonata on the same terms. Happy are the travelers who have a forester on the train with them to say: "yes—that is tulip poplar, that is white oak," and so weiter.

And it comes to this, that winter walking parties, in botany winter classes, could find abundant delights in studying the forms of trees, and to be permitted an introduction to their majesties at this season would be vastly attractive. For these do not alone hold drawing-rooms when green leaves are *de rigueur*, but at this very time are drawn up in state for whomsoever may approach to be presented.—*Philadelphia Ledger*.

WAR: SHE THAT SUFFERS.

You can hardly realize the horrors of war unless you have lived in a country like France, and have heard and known the village tales; the patient wretchedness of its women, its desolate homes, and its sons cast useless to the ground like fruit torn untimely off the parent tree. You see a happy home with a farm, all prosperous; the fine young son is content to labor and get in the crops, and is the delight of his mother, a widow. The time comes when he must be drawn for the army, and he goes. The farm falls to pieces; the mother cannot work it alone. The son becomes reckless; he is only now "number 56;" he tries to drown thought in a city and gets dissipated, and the change of life throws him into rapid decline. He gets leave. The mother, hearing a noise at her gate, looks up and sees the *ghost* of her son—she thinks; but no, 'tis he! come home to die in her arms.

I knew this woman. She lived in one room at my side—lived on the pence her neighbors gave. While I was there I gave her so much a week, ni pity. She goes out only to chapel and often murmurs, "Ah! once I had my home, my farm, my beautiful son—but *la guerre, la guerre*; took all from me: ah! when will the good God stop war?"

This is but one; yet as a straw can show the force a river runs with, so this shows the desolation in French homes under, it may be, a sunny surface. I am astonished at the progress made lately by the Peace Society. Reflect on all the wonderful strides which have been made in the last thirty years to pave the way for brotherhood and peace; all the communications opened up; all the inventions to bring men together. Was it not thirty years ago when Florence Nightingale arose? I look upon her as a herald of Peace, for Peace *versus* War. She rose up as an angel of light in the scenes of carnage, and showed the world better things. We guess not in a closed bud the beauty of a full-blown flower; so when Florence Nightingale went forth, who dreamed of "to-day" with all the world full of war notices? Yet so God works. Peace does not come in a day, but the utter absurdity of "war" now strikes our

higher civilization. God calls us to work and suffer for all that is worth having; so you work for Peace and the reign of woman comes. It is she who has suffered most.—*American Arbitrator*.

THE idea of Jesus Christ, rendered as it is with such rare freshness in the New Testament, must be vital, or it would never have taken such a hold, stronger than adamant, upon the world, never have so fixed itself with such distinctness and prominence in the world's history, especially when it had such obstacles to overcome,—mountains of ignorance, rivers and oceans of prejudice, partition walls heaven high of custom, temperament, and language, dividing the nations.—*William H. Furness*.

THERE are different views of economy of time. One man will use two minutes, three times a day, for six months, to adjust and secure a broken gate, because he has "no time to repair it;" while his neighbor would take one good hour for repair at the start, and so save at least a day and a half in the half-year.

THE real democratic American idea is, not that every man shall be on a level with every other man, but that every man shall have liberty to be what God made him, without hindrance.

NEWS AND OTHER GLEANINGS.

—A shock of earthquake was felt in Naples, on the 11th inst. Vesuvius is again active.

—Kennebec lumbermen are meeting with much better success in their operations in the woods this season than was expected. The winter's cut will be not less than 100,000,000, and may possibly run up to 115,000,000. The Penobscot lumbermen are also doing a good winter's work on the west branch. The cut will be over 40,000,000, or some 5,000,000 more than it was last year. The Androscoggin operators are doing their usual amount of lumbering.

—Several large English schools for young girls, not wishing, in a country governed by a woman, to be behind the school-boys, have organized corps of perfectly disciplined firewomen. The colleges of Newham (Cambridge), of Girtou (Oxford), and of Holloway (London), have given the example. Captain Shaw, commander of the London firemen, has announced his early intention of inspecting the drill of these firewomen, helmeted, booted, and metamorphosed into veritable *anges du foyer*—angels of the fire-side.—*Exchange*.

—Smith College has received a gift of \$5,000 toward a gymnasium. The donor was a woman.

—The Victoria Building, at Bombay, India, the terminal station for the Peninsular Railway of Hindostan, is considered the finest railway station in the world. The style is Venetian Gothic with Oriental modifications, and the principal feature is a large central octagonal dome of solid, cut masonry, which is crowned by a colossal figure of Progress, the principal front being over 1,500 feet long. This station was finished the latter part of last year, and took ten years to build, at a cost of nearly \$19,000,000.

—While we are talking about preservation of the forests, enterprising Europeans have come among us, and it is said, have bought up all the walnut trees in the Lebanon and Schuylkill Valleys at prices which insure a general

destruction of such trees. The question of forest preservation, now discussed chiefly by theorists, will soon begin to agitate the "practical" people who have cut down the trees and will have to grow others in their place or go out of business.—*Public Ledger*.

—Information has been received from Tokio, Japan, that the new Constitution was promulgated from the throne by the Mikado on the 12th of this month. The Constitution establishes a House of Peers, the members of which are to be partly hereditary, partly elective, and partly nominated by the Mikado and a House of Commons, of 300 members. The right of suffrage is given to all men of the age of 25 years and over who pay taxes to the amount of \$25 yearly. Liberty of religion, freedom of speech, and the right of public meeting are established. Parliament shall possess legislative functions and the control of the finance under litigations. Judges cannot be removed except by special legislation.

—The Secretary of the Franklin Institute, in his review of the general progress in the mechanical arts which has been made during the year 1888, makes mention of the principal engineering projects which are occupying the world's attention. The Panama and Nicaragua Canal projects are, of course, the first mentioned. The Manchester Ship Canal is being vigorously pushed, the work carried on requiring a force of 8,563 men and boys. The bridge over the Firth of Forth, the largest engineering work of its kind in the world, is also rapidly nearing completion. The opening of the Poughkeepsie bridge to railway traffic, is an important event in the commercial interests of New York and New England. It is said there is a project on foot to again span the Hudson from Anthony's Nose to Fort Clinton, the movement being made in the interests of several railroads for which such a bridge would make important connections. The same report has the following paragraph: "One of the oldest engineering projects in the world is now gradually approaching completion, and the work will probably be finished during the present year. This is the canal through the Isthmus of Corinth, in Greece. Work was actually begun on the canal under the Emperor Nero, so that over 1,700 years will have passed between its beginning and its final completion. As finally excavated, the canal will be four miles long, with a depth of eight metres, or sufficient for the largest vessels which usually navigate the adjacent seas. The total cost will be about \$9,000,000 or \$1,000,000 more than the original estimate. The work, it is stated, has been very substantially done, and the cost of maintenance will probably be very light. It has been carried out under the direction of French engineers."—*The American*.

CURRENT EVENTS.

At Hartford, Conn., a few minutes before 5 o'clock in the morning, the main portion of a five-story hotel, the Park Central, fell into ruins, burying the people within, most of whom were in bed. The ruins then caught fire. The number of persons inside was supposed to be about fifty, of whom more than half lost their lives. It is supposed that the steam boilers in the basement exploded and caused the wreck.

A DISPATCH from London, 18th inst., says that John Bright has suffered another relapse.

A DISPATCH from St. Petersburg says that a famine prevails in the interior of Russia. The distress is greatest in Orenburg.

THE Ministry, under the leadership of M. Floquet, which has been conducting the government of France for sometime, resigned last week, in consequence of an ad-

verse vote in the Chamber of Deputies, and a new Ministry has not, at this writing, been formed. There is great anxiety among business people in Paris, to keep order this year, during the continuance of the International Exhibition.

The iron industry is depressed, and notices of reductions of wages have been given in several manufacturing towns and cities in Pennsylvania, affecting between 3,000 and 4,000 workmen.

The State Convention of those in favor of the Prohibitory Constitutional Amendment was held at Harrisburg on the 19th instant. About 500 persons were present as delegates. Judge Harry White, of Indiana county, (who for several years has refused to grant liquor licenses,) presided. Resolutions were adopted, and a campaign committee of one from each county was ordered to be appointed, Henry W. Palmer, of Luzerne county, formerly Attorney-General of Pennsylvania being chairman.

NOTICES.

. The Quarterly Meeting's Committee to visit the smaller branches of Philadelphia Quarterly Meeting, expect to attend Spruce street meeting on First-day morning, Second month 24th, 1889, and Green street meeting, at 7.30 p. m. same day.

. A Conference on Temperance and the Constitutional Amendment will be held under the care of the Quarterly Meeting's Committee, at Friends' meeting-house, Merion, on First-day, the 24th inst. at 3.30 p. m. Train leaves Broad street Station, at 2.45 for Elm Station, and returns at 5.28. All are invited.

. Quarterly Meetings in Second month will occur as follows:

- 25. Canada H. Y. M., Bloomfield, Ont.
- 25. Warrington, Mowallen, Pa.
- 26. Burlington, Mt. Holly, N. J.
- 27. Southern, Camden, Del.
- 28. Bucks, Wrightstown, Pa.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER Co., 106 Wall-st., N. Y.

Association of Friends to Promote the Education of the Colored People of the South.

HOWARD M. JENKINS, Chairman, 921 Arch Street, Phila.
 SARAH J. ASH, Secretary, 1717 Vine Street, Phila.
 LYDIA A. SCHOFIELD, Correspondent, 1717 Vine St., Phila.
 HENRY M. LAING, Treasurer, 30 N. Third St., Phila.

EXECUTIVE COMMITTEE—Edward H. Magill, Swarthmore, Pa.; Sarah H. Peirce, Philadelphia; George L. Maris, West Chester, Pa.; Mary Ann Fulton, Wilmington, Del.; Amos Hillborn, Philadelphia; Alfred Paschall Doylestown, Pa.

WORK OF THE ASSOCIATION.

The work of the Association is chiefly to raise funds. These are sent to the support of two schools for colored youth in South Carolina,—the Schofield Normal and Industrial School, at Aikin, and the Mt. Pleasant School, near Charleston, in charge of Abby D. Munro.

A PRESENT-DAY FAITH.

COME back, O blessed Faith in all things good,
In manhood's strength and woman's tender love,
In human sympathy a world to meave,
In God's own written and unwritten word;
Come with the impulse of my childish mood,
Fresh with the thoughts that boyhood's fancy wove,
Before I learned too much to think and prove,
And ancient Faith unharmed by question stood.

Yet mingling with the riper fruit of years,
Let childhood's trust in manhood's strength be
strong,

E'en though the fiery trial of doubts and fears
Consume the creeds I held when I was young;
Come sanctified by all the spirit's tears,
Oh, greater Faith, to triumph over wrong!

—*Frances E. Hudson.*

For Friends' Intelligencer and Journal.

NOTES FROM PALESTINE.—VI.

NAZARETH—CANA—SEA OF GALILEE—TIBERIAS—THE
BEDOUIN COUNTRY.

NAZARETH is picturesquely situated in a basin on one of the slopes of several mountains which enclose a circular valley about a mile and a half broad. The mountains are barren, but the valley is fertile and cultivated in small gardens, with fig trees and hedges of prickly pears.

We climbed the road to the town, and, after riding through a few streets, pitched our tents in a shady grove near a school-house. Not far away was the Virgin's Fountain, where the water gushed by three jets into stone basins, and the women brought jars upon their heads, to fill. Often they stopped to chat with one another. They wore bright head-dresses, embroidered jackets, and gauzy robes, with coins for jewelry, for it was a holiday in the town. Many of them were very pretty, and their manners were pleasing. In all of the cities of Palestine there are numerous fountains in the public streets, from which the families in the neighborhood get their supplies of water.

Nazareth has a population of five or six thousand. Its houses are chiefly of stone. Where they are more than one story high it is the custom, as in many other parts of Palestine, for the horses, cattle, and goats to occupy the ground floor. Enclosed within the high walls of the Latin Convent is the "Church of the Annunciation," believed to be built on the spot where the mother of Jesus lived. In another part of the town is a small room called the "Workshop of Joseph," though only a bit of the wall, it is claimed, belonged to the original building where he

plied his trade as a carpenter. We were also shown a synagogue, where Jesus is believed to have taught, and in the Greek church, before the altar, a large stone called the "Table of Christ," from which he is said to have dined with his disciples, both before and after the resurrection.

We climbed to the top of the hill above Nazareth, and had a pretty view of the town below. Descending the other side of the mountain, we proceeded to Cana of Galilee. The little village has to-day no attractions, except its association with events in the life of Jesus. We entered two churches, the Greek and the Latin; both claim to be on the spot of the marriage feast and to have the jars used when the water was turned into wine.

After passing several other villages, we entered a plain and rode through wheat fields. Then our way became mountainous again, and led to a hill of singular shape, having two peaks called the Horns of Hattin. This is supposed to be the Mount of Beatitudes. Below the horns is a broad, level space where a multitude could have assembled conveniently, and it would have been accessible both to the peasants from the Galilean Hills and to the fishermen from the Sea of Galilee, who came to hear the Sermon on the Mount. According to tradition, this is also the place where the five thousand were fed.

Near the Horns of Hattin, in July, 1187, Saladin defeated the Crusaders in their last struggle.

Following for a considerable distance a ridge of hills, quite level upon the top, we came to a sudden descent, and, looking down from the cliffs, saw one of the most beautiful and celebrated views of Palestine. A thousand feet below us lay the Sea of Galilee, bright and blue, with its shore-line broken into little bays. From its banks rose irregular hills, with the mountains of Galilee behind, and, in the distance, snow-clad Hermon. Beneath us was the town of Tiberias, with its ruined castle and walls, which were nearly destroyed by an earthquake in 1837, when half of the inhabitants perished. It now has a population of over 3,000. As we descended from the mountains to the town, the temperature became rapidly warmer. We found the streets narrow and unclean. Few of the buildings are interesting. The Greek church is on the traditional site of the miraculous draught of fishes, which is represented in an old painting on its walls. In the cemetery are buried the philosopher Maimonides and some of the most celebrated modern Jews. South of the town are hot baths.

The Sea of Galilee is pear-shaped, its length being 16½ miles and its greatest width 7½ miles. The water

is warm and refreshing for bathing. It is much subject to storms, but we found it in a tranquil mood. As we rode along its shores, a gentle breeze was born to us from the surface, and from inland came the fragrance of wild oleanders. We passed Magdala, the birthplace of Mary Magdalene, where only a few houses now remain. Beyond this extends the Land of Gennesaret, which is cultivated with melons and cucumbers for the Damascus and Beyrout markets.

At dusk we reached the ancient site of Bethsaida, at the northern end of the lake. No trace is left of the town. Here we camped for the night. A train of camels joined us, and whenever I awoke I heard them munching their food just outside my tent.

At half-past four the next morning, we climbed a rugged and steep road to the Khan of Joseph's Well, a large building, now used as a cow and goat house. Within it is a well claimed to be that into which Joseph was thrown by his brethren.

As we proceeded, the Waters of Merom came into view with Mt. Hermon beyond. The lake is triangular, and has a broad margin of marsh covered with thickets of cane. Between it and the Sea of Galilee we crossed the Jordan, by the Bridge of Jacob's Daughters. It was here a clear, rapid stream, with a pebbly bottom.

We were now in the country of the Bedouins. Occasionally we saw their brown tents in the distance, with herds of black cattle feeding near. These people are a tribe of Arabs. They encamp, usually, in circles, about a fountain, and allow their herds to roam freely until the pastures are eaten off or trampled down, then move on. This route is seldom taken by travelers, and we proceeded cautiously, with our guard always ahead, for the Bedouins live by plunder, and often attack strangers. If, however, one in trouble approaches them, they hold the laws of hospitality sacred and give him the kindest protection. They also deem it a duty to protect their guest for three days after his departure from their camp. Their tents are woven of black goats' hair by the Bedouin women and are almost impervious to rain. They are stretched over poles, one side being left open to a height of five or six feet. The costume of the Bedouins is a coarse, striped mantle of native manufacture; on the head is a gay silk handkerchief with small tassels pendent. These garments are often worn with a native dignity and gracefulness of manner rare in civilized society, and belie our modern expression "street Arabs." Although the Bedouins live simply, some of them are very wealthy. The sheikh of the tribe in the region where we traveled was Mohammed ed-Dhūly. Two of his wives have separate tents, one entertains in European and the other in Arabian style. He furnishes a large number of camels annually to the Pasha of Damascus for the pilgrim caravan. On one occasion this sheikh was invited to speak in the Beyrout school, and he chose for his theme the advantages of education.

The Bedouin pastures were brilliant with wild flowers, growing in separate fields of color; in one spot the landscape was red, in another white or yellow, while the next meadows were blue and pink. Among the most familiar flowers were buttercups,

daisies, tulips, anemones, cowslips, convolvuli, mary-golds, poppies, and forget-me-nots. These were varied by long belts and groups of evergreen oak, shrubberies of hawthorn, ilex and myrtle. There were many remains of stone fences and walls of old terraces, indicating that this country has once been populated. Now and then we found traces of an old Roman road.

We were late in reaching Kuneitrah, where the rest of the caravan was encamped. Our dragoman went ahead, firing his pistol occasionally, to indicate to us the way in the darkness. We found the tents pitched amidst the ruins of a village containing tanks, stables, vaulted chambers, a mosque and portions of 100 houses. The pilgrims were enlivening the solitude with Arabic singing and merry-making. We were glad to seek the hospitable welcome of their camp fires and join in their festivities, after our lonely ride, although we could not sing in their tongue.

On the following day we came to the river Pharr which flows in a winding course between high cliffs, those on one side being limestone, on the other volcanic rock with basaltic columns. In a little glen beyond were heaps of small stones and thorn-bushes garnished with hundreds of rags. This is a favorite haunt of Druze and Arab robbers. The stones, it is said, mark the graves of murdered travelers, the rags are placed as offerings by those who escape unharmed.

At last the white minarets and domes of a beautiful city rose before us, from the midst of the greenest verdure. We were approaching Damascus, which the Arabs regard as an earthly Paradise, and were standing where a tradition as old as the Crusades fixes the scene of St. Paul's conversion, although there is nothing in the scriptural accounts to identify the spot. A little later we rode under the gateway of the ancient city, which appeared so attractive from without.

CORA A. BENNESON.

ADDRESS BY AARON M. POWELL.¹

We are just at the close of a season of joy in our own and other countries, wherever Christian influence has made itself felt; observed in particular and exceptional degree as a season of good will. It is an era in which we are accustomed, each in our own way, to celebrate the birth of Jesus of Nazareth. It is wonderful to think of the power this exerts over the minds and hearts of so many millions of people, diverse in language, diverse in many customs; unknown personally to each other, and yet all touched as with one accord, by this kindly love and Christian spirit of good will. It is an era of gift-making, an era of gift-receiving. How our hearts have been touched anew, I trust, by this manifestation which came to each and all of us recently in this era!

We knew we had this friendship-loving condition, but have we not, all of us, felt ourselves under renewed obligations to those loved ones by what has transpired? Some of these gifts may have been costly and precious in money value, some of them

¹At Swarthmore College, First month 13, 1889. From stenographic notes by George H. Bartram.

may not have been particularly noticeable in that respect, yet I think in the last analysis we have to acknowledge that they have been appreciated more or less, accordingly as we have felt the manifestation to represent the heart.

Christianity truly and practically is not a religion for the rich and well-to-do. It is a religion of the poor and needy. A feature of it which makes the Christmas time to these everywhere the period of so much significance and enjoyment. Oh! if the Christmas time could be made to cover all the time. If in spirit Christmas day could become every day, what a transformation indeed would be witnessed in man's life.

A beautiful little child was one day taking her lunch, when a bright ray of sunlight streamed through the window and fell across a dish in front of her. It attracted her attention. Directly she caught up her spoon and went through the motion of dipping up the sunshine and swallowing it, and then exclaimed: "O Mamma! I have swallowed a spoonful of sunshine." And her joyous laughter could be heard throughout the house. Suppose we could all swallow this sunshine of the spirit of the Master.

You who listen this morning are mainly students. You are working faithfully with lessons, some of them tedious and troublesome, I dare say, to master. But you are in earnest. I sympathize with you in this labor with all my heart. Standing at my point of view, farther on the journey of life, I think it may be possible for me to see how this work here in the environment of Swarthmore is destined to enlarge the horizon of your vision in many ways; and what the work of the world will be to you and your relation to it in the future, because of your sojourn and labor here.

From the beginning, before the college walls were completed, I have been an interested and sympathetic visitor here. And being a member of the society under whose auspices the college was founded, have had very great interest in the progress of its work. But I think if I were asked why, in contrast with other institutions equal in intellectual opportunities and provided especially with wealth, I should answer because I believe that with the intellectual training you are receiving here, you are also receiving this heart training, this spiritual culture in the natural and philosophical sense, which will give you in the journey forward in life the advantage over those trained simply in the technical studies.

I have great faith in education for the mind, but I rejoice in the spirit of Christianity that it has something in its power for the people who do not have your educational advantages. There is something in this power of Christian spirit employed by Jesus of Nazareth that is for everybody, of all races, nations, and conditions.

On the table of your reading room I saw the *North American Review*, and some of you may have found leisure for turning over its pages, within the last two or three months, and you may remember an article on college life at Harvard, the pioneer among colleges, entitled "The Fast Set of Harvard," and another an answer thereto. As I read them my thoughts

turned to the young men of Swarth more with gratitude, that here in college life was no place for a "fast set." And I rejoice that the Society of Friends has established here a college to which, with great moral safety, young men seeking an education can be sent. I do not know in detail, but I know enough to know of the record of Harvard that it has made, in latter years, wrecks of the lives of many young men, morally. College life ought not to do that. But college life will do it to the extent that the cultivation of the spiritual as well as of the intellectual power is omitted.

I was journeying, on one occasion, with my wife, over the Catskill mountains. We were overtaken on our way in the valley six miles from the mountains by one of those summer thunder storms. The doors of a farmer's barn being open it happened we drove in for shelter. The proprietor, a genial, kindly man, appeared and immediately entered into conversation with us. Incidentally we mentioned where we had been upon the mountain top, and how very much we had enjoyed it. Yet during all of his life this man had not been to visit it. To him it had no special significance. Just a few months before, there had been placed in the hotel at the top of the mountain a large range, which, as he told us, took six pairs of horses to take up the mountain side. He said he thought he would go up to see the range some time. We respected his reason from his point of view. But suppose in early life he had had the advantages which are yours how very different his surroundings would have seemed to him in so many ways. I only relate it to you to illustrate what a transforming power education in the wide sense has.

Among the sacred messages, some of which we had just now given to us in your sentiments, it is plainly stated that we individually are the temples of God, that his spirit abides in us. And such a message has wonderful import for us if we know that we are the temples of God and his spirit abides in us. Another message of great significance was given by a young man: "Young man, make your record clean."

When this college training of yours is ended, when you enter earnestly upon the work of the world, you will be needed not only and chiefly in the business of life, but much more in that sphere where in great and true feelings obtain the results. I look to Swarthmore for young men and young women who will be equipped not only for business purposes and the ordinary events of man's employment, but equipped with power for doing good in the world.

We are each architects, continually devising good or ill according to that which we cherish and encourage. If our thoughts are turned downward to the sensual and unclean, we are evil architects of our own characters. And we are shutting out the sunshine of life which may come in to calm our lives and strengthen our characters. There will come a time in the life of every individual when the calls seem to be many, when suffering and trials come. It is then more especially that we need this spiritual resource.

Some of you have plants growing in your windows at this mid-winter season. If you watch them

you will find them turning toward the light all the time. They are reaching toward the window, not to the centre of the room. There is the mighty, unseen, but very real power which is drawing these plants continually to the window. They turn to the light. God has not favored the plants over ourselves. As they turn to the light for strength and growth, it is His richest blessing to us that we also may turn our hearts to His light for strength and growth.

From Friends' Review.

SOME ACCOUNT OF FRIENDS IN THE SOUTH OF FRANCE.¹

Among the deeply interesting pages of French history are those detailing the struggles of the people of the Cevennes against the short-sighted and cruel policy of Louis XIV.

The people of this part of France have been characterized by a tendency toward what the Romanists call "heresy." They are descendants of the Albigenses and Waldenses, conspicuous for their opposition to papal assumption before Calvin and Luther began their work. During the darkest ages of Popery they were powerful; so formidable were they in the 11th and 12th centuries, that Pope Innocent III. planned an expedition against them. Having inherited a hatred of the idolatrous practices of the Church of Rome and a love of freedom of conscience which this Church denies, it was not surprising that the Edict of Nantes should have been a precious legacy.

Though this Edict, issued by Henri IV., granted to Protestants liberty of conscience, yet there was a suggestion that matters did not stand as that monarch hoped they one day might. In the words of the decree, it has "pleased God that prayer and adoration, if not given as yet in the same form, may be done at least in the same intention." Yet its nullification meant to all dissenters death, dissimulation, or recantation of their religious doctrines.

Those who would not submit to the will of the king were persecuted, some imprisoned, others killed in the most horrible manner. But these people in whose veins flowed the blood of the martyrs, could not be crushed or annihilated by persecution.

Denied liberty to worship openly they hold their meetings in secret places; are their children shut up in convents and instructed by Roman Catholics, as occasion allows the faithful parents seek all the more to instil in the hearts of their offspring a hatred of the idolatrous and infamous practices of their teachers. Legal enactments may close steeple-houses and disperse assemblies, but he whom the Truth makes free cannot be thus enslaved.

Not in patient submission, however, are these grievances borne. A strange drama is to be enacted. A handful of persons, mostly peasants, rise in arms against the powerful Louis XIV. with his trained officers, well equipped and disciplined troops. These revolvers, who came to be called Camisards, probably from the gown which they wore, felt that they were fighting for their just rights, and like the children of Israel, asked a blessing on their endeavors.

Did they succeed in battle they gave thanks, if conquered they asked that Divine help would not forsake them. They considered that they were led forward by divine guidance. If it were an occasion of great importance they knelt in prayer, when some one among them, as they believed, was given an inspiration. To this they listened and then obeyed, whether to go forward or to tarry. Yet, as one of their historians states, their religion was animated less by the love of Christ dying upon the cross to atone for the sins of the world than horror for the Pope, whom they call Antichrist. They chose the texts for their sermons oftener from the Old Testament than from the New, and led their followers to the foot of Sinai because they were too embittered to lead them to the foot of Calvary. They were at this time in the Cevennes what the Israelites were in the desert.

Among these people, so ardent and zealous for what they believed, were some who comprehended the inconsistency of taking up arms to obtain the right to worship the Prince of Peace. These wrote frequent letters to their brethren in arms which Court thinkers were the means of putting an end to the massacres by the Camisards and the real reason for which they spared the lives of four or five curates who were in their power. Very sympathetic, yet clear was the advice given. "We even confess," says one of these missives, "in long and excessive tribulations like yours it is very difficult to resist the impetuous feelings of our natures, which rise in the depth of our hearts in spite of ourselves and cause us to render evil for evil. We feel for you that you are thus proved, but you are Christians, reformed Christians, and if you have not entirely forgotten what the ministers of God have formerly taught you, you can remember that they preached to you continually that hypocrisy and lying are not right for the children of the God of truth; that the violence of your enemies does not excuse yours and that their crimes do not authorize you to commit the like. Perhaps you think that those who burn churches and kill priests destroy superstition and idolatry. Perhaps you expect your deliverance and the re-establishment of the service of God. Blind that you are, have you forgotten that it is never permitted to do evil for evil in order to attain the good; that you are not under the ancient law, which is severe following the murderous letter, but that you are under the new law whose author says that He wills not the death of a sinner, but that he should be converted and should live. It is from God's arm, and not from yours that we must hope for the end of your captivity. Try to obtain this by the sanctity of a good life and not by the works of darkness which you do."

These more enlightened Camisards were opposed to the use of oaths, believed in silent worship, and acknowledged that ministry only which comes from the influence of the Holy Spirit. During these perilous times they were obliged to meet in concealed places, and it was the easier for them thus to worship as they had no reverence for steeple houses. In common with other Protestants, as well as for their

¹Written for Friends' Lyceum, [O.], Philadelphia.

peculiar beliefs, they suffered persecution, some even martyrdom.

Very interesting and instructive is it to note the similarity of experience between these truly convinced, though unknown Friends, and that of Friends in England and America. One of their number, who was imprisoned because he had a gift in the ministry, being asked who he was, replied, "I am a messenger sent by Providence to call you to repentance and to renounce your vain wisdom, the corrupt fruit of your depraved imaginations. I am one of those ignorant people who have no other instruction, no other light than that with which God illuminates our spirits. I am one of those stones which cry out to awaken you from your slumbers in order that you may know the will of the King of kings who speaks in the inmost of your hearts." Another of these martyrs, in the midst of great agony, prayed for his persecutors. His sentence declared that his offense had been "that he had instructed young people in fanatical practices, and that he had impudently boasted that God had shed His Holy Spirit in his heart." To his friends he gave this advice: "The Lord has commanded us to quit the dark works of idolatry and to worship Him in the pure spirit of truth. And so far from authorizing murder, flames, and persecution, He has enjoined us by His Son to suffer violence without revenge and to rejoice when men speak evil of us falsely." The offense of another who was condemned to die was that he had preached by inspiration of fanaticism.

Persecution continued to rage, and the outraged Protestants remained in arms until Marshal de Montevault was forced to make terms with the chief of the Camisards, Cavalier. Since then these Friends have not been openly persecuted. Thus for probably more than a century this isolated band maintained their principles. Not until the time of the American revolution had they, so far as appears, any knowledge of the existence of a Society professing the same religious views as themselves.

At the time of the difficulty between France and England, during the American revolution, the owners of some vessels in which an English Friend had a share, determined to arm these ships. At the close of the war this Friend received his share of French prizes taken. He could not consistently accept such gain, and advertised in France for the rightful owners of his portion of the booty, giving his reasons as a Friend for so doing. The little body in France, it is said, thus learned of the existence of their brethren in England. Communication was opened between them, and George Dillwyn, Sarah Grubb, and Mary Dudley were sent as a deputation to Languedoc. Later, London Yearly Meeting took this company of French Friends into membership, and they now have the discipline of this yearly meeting. They have two quarterly meetings, one at Nimes, the other at Congenies. To the great satisfaction of some concerned parents, a school for the daughters of Friends has been opened, under the fostering care of English Friends.

Though the French Friends are not so numerous as formerly, being in the neighborhood of fifty, and

have fewer ministers than in early days, there are, however, concerned and earnest ones who through difficulties and discouragements give to the people the messages entrusted to them by the great Head of the Church. Very interesting and impressive was it to meet in an upper room with the little band of disciples at Fontanés, there to wait for the blessing of the risen Saviour.

Their meetings in this place are held in the house of one of their members—an historical abode. At the back part of this same house is a room without windows and with the entrance concealed as much as possible. Here the early Friends were accustomed to meet. The circumstances under which they assemble are changed. No longer do the troops of a king disturb their gatherings and force them to attend mass. Nevertheless persecution exists, not avowed, and perhaps for this reason more subtle and insidious in its workings, more difficult to combat and harder to withstand. Few in numbers, misunderstood even by their Protestant brethren, hated by their Roman Catholic neighbors, not an easy matter is it to be a true Friend. The same spirit which led the Romanists to persecute in early days, still lives. The priest at Fontanés harangues against the Protestants, so that those who would be friendly to their townspeople of another belief are constantly stirred to animosity.

One of the principles for which these Friends have had most to suffer is in regard to war. As is well known, all the young men when of age serve in the French army. Several young Friends have left the country to avoid conscriptions. This arouses the resentment of the neighbors, who do not understand the motive which prompts to this action. Formerly Friends paid for substitutes, but now they either leave France, or, as has been done in some instances, serve their time. One of those who entered the army stated that he would much prefer to suffer for his principles. Circumstances over which he had no control forbade him this alternative. Though they have served their time the trouble does not end here, as all Frenchmen are soldiers until forty years of age, and they are called out at certain times to drill.

It is interesting and instructive to note how firmly planted and how well comprehended, even by the young, are Friends' principles. Descended from a people who have been characterized by a dislike to religious forms and ceremonies and upholding a purer life and mode of worship, no wonder is it that they long for a land of promise—a land where they and their families may dwell together in peace, and where they may find those of the same household of faith, with whom they may take sweet counsel. To America some of these Friends look as their future home, one family having already come. Their American brethren have a privilege which comes to few in these days, to accord a hearty welcome to the descendants of a long line of martyrs and valiant upholders of Truth—a privilege to help them realize the hope for which they willingly leave home and friends and native land.

SCRIPTURE LESSON, No. 10.

THIRD MONTH 10, 1889.

THE CHILD-LIKE SPIRIT.

GOLDEN TEXT:—"Whosoever shall not receive the kingdom of God as a little child, he shall in no wise enter therein."—Mark 10: 15.

READ Mark 9: 33-42.

JESUS, pursuing his journey southward, teaching and healing, and comforting the people who throng about him out of all the towns and villages through which his route lay, comes again to Capernaum, where his home was, and where he was accustomed to teach those who came to him. Here he called the attention of the twelve to what had occurred among them during their journey, and querying as to the import of that about which they disputed, they were ashamed or unwilling to expose the weakness that they had yielded to. Doubtless the knowledge Jesus had imparted to them of the purpose and result of the work they were engaged in had developed some ideas associated with the establishment of a kingdom and the place each should occupy under Jesus as the king. That such questions were agitated among them is shown by the petition of Salome for chief places for her two sons, and from the inquiry addressed to Jesus, "Wilt thou at this time restore the kingdom to Israel?"

Took a little child. What a deep lesson was here given; the little child—so helpless, so dependent, so confiding. How could these ambitious men, striving between themselves as to where the place of each should be in the Messiah's kingdom, accept the meaning? How could they see that in being of no account, in leaving their future to the great Dispenser of all Good, and in child-like confidence trusting to his guidance and care, they would find their true places in his service? The lesson is as hard to understand now as it was then, and many have to hold their peace, as did these disciples, because they are self-condemned.

We saw one casting out devils. There were those then, as there are still in the world, who claim to do many things in the name of the Lord, who show but little evidence of their being under his direction. The reproof of Jesus teaches that whatever is done that is a good work must not be condemned, though he who does it is not one with us. It acknowledges that broad spirit of tolerance which only questions the motive when the result is evil. The smallest deed of kindness, if done for the love of doing good—for the Christ principle which is the spring of all goodness—shall not pass unrewarded. This is the basis of all good that we may do, one for another. It must have its beginning in the same divine love that sent the Beloved Son into the world, that all might learn the sweet lessons of charity and love from his self-sacrificing devotion to the welfare of the whole human family.

The natural characteristics of children are innocence and humility. Jesus teaches that the kingdom of Heaven is within us, and it is necessary to become as little children,—humble, trusting and innocent, before we can know this heavenly condition. As the

little child confides in and trusts its earthly parent, so must we our Heavenly Parent.

The child is entirely helpless without its parents, or other care-takers. It can not clothe or feed itself, and if left alone would soon perish. So the immortal soul is dependent upon the Almighty Father. It cannot of itself care for itself, but would be blind and famished without the Divine care. When the heart is kept in a state of child-like purity, the dependence upon the Higher Power is constantly felt, and daily is sent manna from Heaven for that day's nourishment. Thus the Heavenly Father feeds and cares for the soul, as the human parent cares for the body of his child. The perverse, froward heart that tries to act according to its own will, turning from the Father's care, must become again "like a little child," obedient and teachable, before it can enter into that condition of joy and peace which Jesus calls the Kingdom of Heaven.

Sometimes the study of an innocent child-life will help us to attain the likeness Jesus asks for; not only innocence, the perfect ignorance of evil, which causes the child to confide in all around it, with the supreme faith in its parents, but the child's ready acquiescence in the condition of affairs as they are, and its usual cheerfulness, its quick forgetting of sorrow, are all traits, that, if cultivated in us, will make us more readily yield ourselves to the Father's hand to do his will.

CRIME INCITED BY THE POSTER-BOARDS.

If we wish our youth to be law-abiding and our land to be freed from the rule of irregular violence shown in the acts of White Caps and Ku-Klux, we need to remove, as far as possible, those influences which tend to excite or increase the ready tendencies to revenge in the young. For this end, the following is worthy of attention by educators.

It is probably not often that the utterances of that comic paper, "*Punch*," are cited in behalf of public morals; but, a few weeks ago (as quoted in *The Christian*, of London) the journal in question remarked as follows, with much seriousness and wisdom, concerning the teaching of brutality as derivable from the bill-boards: "Is it not within the bounds of probability that to the highly-colored pictorial advertisements to be seen on almost all the boardings of London, vividly representing sensational scenes of murders, exhibited as 'the great attractions' of certain dramas, the public may be to a certain extent indebted for the horrible crimes in Whitechapel? We say it most seriously; imagine the effect of the gigantic pictures of violence and assassination by a knife and pistol on the morbid imagination of unbalanced minds. These hideous picture-posters are a blot on our civilization."

And if this judgment as to the picture-posters on the boardings be well taken, does it not equally or with greater force apply to the stage-boards themselves, whereon these very realistic blood-curdling and brutalizing dramas are enacted to the life?

But it is by no means necessary to go to London to be confronted with startling examples of these brutalizing representations. Here in the "City of

Brotherly Love," founded by Penn in deeds of peace and with many prayers, have been exhibited at one time and within a few days of the writing of this, advertisements of three of the theatres, which are of the brutal character referred to. Especially horrible was that which emanated from the Grand Opera House, North Broad street, in which a man, terribly excited, was shown clutching an opponent by the throat with his left hand, while, with the right, a dirk with a foot length of blade was held over the uncovered head of the antagonist, and beneath were the words, "Why don't I rid the world of this wicked man?" Similar ones, issued by the National Theatre, were to be seen on the extensive boardings on Broad street, nearly opposite the Central High School. Such representations have been common there, but they present by no means an elevating or refining spectacle for the contemplation of the hundreds of lads who are receiving their education over the way at the public expense, nor are they healthily suggestive to the multitude of operatives of the Baldwin Locomotive Works and other large manufacturing establishments in the immediate neighborhood. The same may be said likewise of the posters issued at the same time by the Standard Theatre on South street, where, in a neighborhood noted beyond most other localities of the city for drunken, disorderly, and murderous affrays, such portrayals must be well calculated to incite to bloody deeds.

It is well that our police should be vigilant in arresting all overt law-breakers, even though the offenders be very small boys who have precociously developed into burglars and pistol-pointing highwaymen. But when we read the startling record of the increase of crime, as recently compiled by F. C. Wines, and when we learn that, making the due allowance for improved methods in census taking, and for additions to population, crime has nevertheless increased in the United States, since the war, not less than 33 per cent., we can do no other than admit that most earnest heed needs to be given to the elimination of those things which tend to the making of criminals. This consideration appears to have specially animated the founder of "The Williamson Free School of Mechanical Trades," just endowed by a wealthy citizen of Philadelphia, it being his desire that, notwithstanding the practical lapse of the system of apprenticeship "having resulted in many young men growing up in idleness, which leads to vice and crime, and is fraught with great danger to society," the ways and means may be provided whereby "poor and deserving boys" may be "gratuitously instructed in the rudiments of a good English education," and in the knowledge of mechanical trades or handicrafts, and so be fitted to become useful and respected citizens, supporting themselves in comfort and decency, instead of being "condemned to idleness and often to dissipation, beggary, and crime."—*The Student.*

Sound over all waters, reach out from the lands,
The chorus of voices, the clasp of hands;
Sing hymns that were sung by the stars of the morn,
Sing songs of the angels when Jesus was born.

—Whittier.

For Friends' Intelligencer and Journal

HYMNS OF PRAISE.

WHILE reading over the essays read at the celebration of the Centenary of Easton Friends' meeting, N. Y., on Twelfth month 25th, 1885, the following lines in one of them struck me in a forcible manner, and called forth the words below:

"In looking at the backward track,
One feature grand it seems to lack;
No hymn of praise, or song of love
Rose to the great white throne above."

Dost think no hymn of praise,
In days long since gone by
Rose o'er those ancient, footworn aisles
To the majesty on high?

Dost think because no vocal sound
Nor organ's solemn tone
Struck on the outward human ear
No praise ascended to the throne?

Dost think those human hearts
Ne'er sang a hymn of praise,
Because no measured words
Their outward voice did raise?

In days of old the "still small voice"
Spoke to the heart of man.
Cannot the still small voice of praise
Reach up to Heaven again?

The prayer and praise of human hearts
Tho' ne'er in words expressed,
Will reach that ever list'ning ear
To whom they are addressed.

'Tis not the measured vocal words,
Nor yet the organ's tone,—
But 'tis the heart's sincere desire
Which rises to the throne.

First month 29.

E. J. KENYON.

"Trust in money and you will be poor, however much you own; trust in God, and you will be rich and the heir of all things, though you have not where to lay your head; trust in bodily health, and you will die, though you should have all the physicians and remedies in the world at your command; trust in Christ, the Prince of Life, and you shall live and be happy, though the light of the sun should go out, and the visible heavens should pass away. . . . If I were called upon to go out into the streets and highways, to stand in the noisy manufactory or the crowded market-place, to enter the saloons of fashion and the mansions of wealth, and teach men, as I might find them in either place, the first lesson of human happiness in the fewest words, I would say love thyself last, praise thyself never, try more to interest yourself in others than others in you, envy nobody, despise nobody, be willing to take the lowest place, and then strive to make it the highest by filling it well. Hear the voice which says 'Learn of Me, for I am lowly'; the good words of truth live and give life to the world; they may be shut up in prisons, but no fetters can bind them; they may be cast into the fire, but can't be burnt; they may be thrown overboard into the depths of the sea, but they can not be drowned. May God be with you all in my prayer."

PHILADELPHIA, THIRD MONTH 2, 1889.

SELF-RESTRAINT A PRESENT DUTY.

The denial of self is an essential of Christianity. There can be no doubt of this. Whether or not the renunciation is to be absolute, the sacrifice complete, there must be a distinct control and denial of the natural self-hood. It is, doubtless, "a hard saying" that this should be so. When Jesus, answering finally the rich young man who accosted him in the borders of Judea, advised him to sell his great possessions, give the avails to the poor, and follow him, he put the case in the strongest form, and made the cross of the heaviest, so that the questioner turned sorrowfully away.

Yet to the seeker after Truth a rule of self-restraint, and even of self-sacrifice, does not appear unreasonably harsh. To such discipline, indeed, the character which seeks the approval of its Inward Guide extends a welcome. It must be within the experience of every one that his better spirit shrinks instinctively from self-indulgence, and turns with readiness toward self-denial. The one seems like living for narrow and mean ends, the other for broad and worthy ones. One appears to bear perishable fruit, the other imperishable. One gives the promise of the pleasure of the moment, but the other of a loftier and more lasting reward.

It cannot be, therefore, that some measure of this Christian duty will be found unreasonably hard. It is not too much to expect, even in our own day, that those who strive and aspire should voluntarily renounce some part of the pleasures which lie at their feet, and so should help make for themselves a character and for their age an example that will tend to restrain mankind from slipping downward to the sensual and material, the selfish and unchristian. The response which the better spirit makes to the proposal of self-restraint is a power strong enough, even in the presence of pleasures and excitements, luxuries and indulgences, to sustain a sincere effort for a higher and worthier life.

Compared with a century ago, ours is an age of luxury. The amazing progress of the civilized world in all material things has revolutionized the conditions of life. Yet the restraint of self is the same duty as before, and the need of it is only increased by the outward temptations to its abandonment.

The following notice is sent us from the Friends of Baltimore:

The new Friends' meeting-house in Baltimore is now about completed. It is proposed to hold the first meeting therein on First-day the 10th of Third month at 11 o'clock a. m.; the following day at 10 a. m. being the time of Baltimore Quarterly Meeting. This notice is given with the view that Friends generally may have information on a subject of some interest to all of our members and also to many others who may be connected with Friends, and that any who may feel a concern to attend at this time will receive a kindly welcome by Baltimore Friends.

DEATHS.

BRADBURY.—Harriet A. Bradbury, of Farmington Monthly Meeting, New York, passed from works to rewards on Fifth-day, First month 31st, 1889, in the 84th year of her age.

It was not until the year 1883 when my husband and I were attending Genesee Yearly Meeting, that I became acquainted with this dear Friend. Arriving at her home late at night, entire strangers, the warm welcome we received stamped upon us the example of her genuine hospitality. And when in retrospect I contemplate the beautiful character of one whose whole life appeared to be that of labor and love, and a willing sacrifice for others, calling her out in loving sympathy to all, even to those in the by-ways and hedges; it seems fitting that this testimonial should be given that others may be encouraged to faithfulness to the calls of duty.

Being left a widow in early life, without children, a notable part of her beautiful work was that she immediately adopted four of her deceased sister's children, whom she reared with the Christian care that none but a true mother-heart could give.

But it was not to these motherless little ones alone that her efficient care extended; being in Toledo, Ohio, whilst the cholera was devastating that town, she devoted her time to the sick and dying, going from house to house until the scourge was stayed. And during the late war she was often found by the bedside of the sick and wounded soldiers, administering not only to their physical comfort but to their spiritual needs as well, sometimes taking them to her home for better accommodations, and to one who was severely wounded she gave shelter for two years until health was restored and she had procured a good situation for him.

A woman of culture, fine taste, and deep religious experience, twenty years ago she organized a F. D. S., her interest never flagging as superintendent and teacher until about a year before her death, when the infirmities of age disqualified her for the position.

At a suitable age, to suitable companions, her nieces married, and left their foster-home, whilst the brother remained a great comfort in her declining years, and her willing support with his strong arm until the peaceful close of her well-spent life. The children of her adoption were all favored to watch by her side in her last moments, proving by unabated love their appreciation of what she had been to them. Beautiful in life—serene in death.

"Blessed are the dead who die in the Lord, from henceforth, yea, saith the Spirit, that they may rest from their labors, and their works do follow them."

R. M. T.

Sandy Spring, Md.

CLOUD.—In Philadelphia, Second month 20th, 1889, at the residence of her son, J. Cooper Cloud, Sarah F., widow

of Benjamin Cloud, in her 67th year; a member of the other body of Friends.

HAINES.—At his residence, near Pendleton, Ind., Second month 17th, 1889, of consumption, Charles Haines, in the 80th year of his age; for many years an esteemed elder of Fall Creek Monthly Meeting.

KEYSER.—In Philadelphia, Second month 16th, 1889, James D. Keyser, in his 71st year, son-in-law of the late William Webster.

LUKENS.—Second month 19th, 1889, of diphtheria, Barclay Walton, child of Samuel C., and Adele E. Lukens, members of the Monthly Meeting of Friends of Philadelphia, aged 2 years. 10 months, 21 days.

MCCLUEN.—In Media, Second-day, Second month 18th, 1889, Mary Anna, wife of George R. McCluen.

NEWLIN.—At Roxborough, Philada., Second month 21st, 1889, Sarah A., wife of the late Jesse Newlin, in her 81st year.

PARKER.—On Seventh-day, Second month 16th, 1889, at his residence, near Mickleton. N. J., George Parker, formerly of Philadelphia, in his 76th year; a member of Woodbury Monthly Meeting.

PARRY.—In Philadelphia, Second month 22d, 1889, Jacob Parry, aged 83 years.

POTTS.—Near Fort Washington, Pa., Second month 22d, 1889, Elias Hicks Potts, in his 59th year.

WALTER.—Eliza V. Walter, aged 86 years, departed this life on 15th of Second month, 1889.

A brief sketch of the life of this Friend is well deserving a space in the columns of the INTELLIGENCER. She was born at Catawissa, Penna., and died at her residence on Ronnymede Farm, near Bear Gap, Pa.

Her father, Dr. Gilbert E. Hicks, was a prominent physician in his day, and had an extensive practice over a very large territory. In her younger days it frequently became her duty to compound many medicines for use in his profession, as there were no drug stores in those early days. She thus acquired a considerable knowledge of medicine which was a benefit to her in after years. She received an excellent education for those times and was well versed in English classics, and familiar with standard authors of that period. She was a life-long member of the Religious Society of Friends, and was liberal in her religious views but firmly settled in her convictions and consistent in her life, and placed but little value on display.

For many years and even up to a few days before her death, she kept a full diary of local events, and was a frequent contributor to the *Shamokin Herald*, the leading paper of the nearest town.

She was in good health until a short time ago, when she contracted a severe cold which turned into pneumonia and terminated her life. During the few days of her last illness she conversed calmly and cheerfully to those who called to see her and seemed perfectly satisfied to answer the summons when it should come, and passed away peacefully as if retiring to her evening rest. She was interred at the ancient burial ground of Friends at Catawissa, where a number of her kindred are at rest. O.

LYDIA T. MATHER.

A Tribute to the memory of Lydia T. Mather, who departed this life Twelfth month 27th, 1888.

Her bright and happy disposition drew toward her a large circle of friends, and the characteristics of her true and noble womanhood held them by the chains of unbroken love and affection. She always saw the silver linings to the dark clouds of affliction, and a word was ever ready upon her lips to cheer and encourage those with

whom she mingled. If at any time a slighting or slanderous word reached her ear of the absent she ever had ready a gentle reply to shield the accused and silence the accuser.

When in conversation with this dear Friend some few months before her death, in questioning why so great a sorrow had entered their family in the death of a near relative, she sweetly answered, "We must not question, all is for the best." Although we knew it had been a sorrow that had shed its mantle of loneliness around her heart, as well as others, yet it had drawn her nearer to her God. While in the waning months of her life the prayer of many dear friends was, "Oh spare her, Father, to us a little longer," her's was, "Not my will, but Thine be done." Sweetly and silently has her spirit passed through the dark valley to "new pastures" and a peaceful, happy home. M.

Gwynedd, Second month 18, 1889.

LITERATURE FOR THE STUDY OF FRIENDS.

THE following private letter, from which we omit names of persons and places, as far as possible, has been received by one of the editors of the INTELLIGENCER AND JOURNAL, and will be privately replied to. We think, however, its statements and inquiries are suggestive, and may be of interest to many others. The writer says:

"Feeling that thee is interested in isolated Friends . . . is my excuse for addressing thee. I am here with my two sons, who I hope will be able to go through a full college course, and entirely away from Friends, but for the first time in my life have found an incentive to study up the history and principles of our Society. It comes in this way: in the Sabbath School which we attended Mr. —, son of the distinguished Boston minister and author, has a class of students, and my son being one of the number my attention has been especially called to it. They are this winter studying a history of different Christian denominations, and spent two sittings on Friends, after which, to my surprise, I found from talking with a member of the class, a bright, intelligent young man, who is descended from generations of Baptist preachers, that they had really learned very little about our Society. He asked me more than one question which I felt far from able to answer and I at once determined if possible to get some books and study up the subject. Later, speaking to Mr. —, he expressed a great desire for further information and assistance in obtaining books. I have given him some late copies of the INTELLIGENCER AND JOURNAL, containing articles which I felt were representative of our body of Friends, and their work, and also Samuel M. Jauncey's little work, 'Summary of Christian Doctrines'. I want, most, to get an unbiased history of the Separation of 1827, and a condensed account of the Society before that time, and I thought thee might be able to advise me concerning different works, or send me copies of books on hand for distribution, and also tell me where to obtain others at least cost. I have learned that a copy of the Life of Thomas Edwood may be had for twenty cents, and I have sent for a copy of 'A Reasonable Faith.' I once had Benjamin Hallowell's inter-

esting Autobiography, but gave it to an acquaintance in the South, who wished to learn more of Friends.

"In selecting our books we must look to brevity, for these earnest students are the busiest of people, with a great variety of subjects claiming their attention, and also keep in mind that in this case it is *history* we want, not proselyting literature. . . . I suppose of course George Fox's Journal is the best work, but it is both voluminous and expensive. How about Janney's Life of Fox? Barclay's 'Apology' seems always to be highly commended, but I am not familiar with it."

Noting the inquiries of our correspondent, those implied as well as those directly stated, we make a few suggestions in response, which may have a general interest. As a doctrinal discussion of the ground held by early Friends, there is no authority superior and perhaps none equal, to Robert Barclay's "Apology." It has been frequently reprinted, both in this country and in England, and can be had, (of Friends' Book Association, 15th and Race Sts., Philadelphia), as low as 60 cents, by mail. The "Apology" is best suited for patient and laborious students, who have time carefully to read and consider its scholastic and logical processes. Written two centuries ago, in some points it has suffered something by the better and fuller understanding of the sources of the Scriptures, and by the more careful translations which have been made of them, but in most respects its perception of the truth is remarkable, and its treatment of the fundamental questions of religion is broad and able. In two particulars essential to the faith of Friends it is both sound and strong—*i. e.*, the universality of the divine principle in the soul, and the secondary, though confirmatory, authority of the Scriptures.

For a fair and concise statement of the circumstances of the "Separation" of 1827, the chapters devoted to that subject in the fourth volume of Janney's History of Friends are sufficient and satisfactory. They do not, however, throw a searching light upon the question as to how much of doctrinal divergence there actually was between the two bodies which date their separate existence from that time, and this can scarcely be ascertained very clearly from any printed works with which we are familiar. The views held by leading Friends of our body at that time, including Dr. Joseph Parrish, Dr. William Gibbons, and others may be learned from pamphlets which are in print and can conveniently be had. Much light is thrown upon the perils of extreme doctrinal disputation by acquaintance with the history of the "Beacon" controversy in England, (soon after the Separation here), and by the several divisions that have taken place in the "Orthodox" body in this country. But a good understanding of all these is only to be had by acquaintance with a large body of literature, including periodicals as well as books.

No one has better exemplified and defined the position of Friends, as understood by our body, than Samuel M. Janney, in his numerous books. His lives of Penn and Fox, his History of Friends, and his minor writings, are all marked by a catholic

spirit, a deep Christian earnestness, a liberal scholarship, and a good literary ability. Taken altogether, his contributions to the literature of Friends are the most important and valuable made within the present century, by any one writer, and their modern form and style render them valuable for reading and study in the present day.

We venture to add here, what has repeatedly been said in these pages, that the religious and devotional poems of John G. Whittier, especially those written in the last twenty years, are sound Quakerism, and should be acceptable, refreshing, and sustaining to every real follower of George Fox. A selection of these ought to be made in a volume for the use of those who love the principles of our Society. He is a member of New England Yearly Meeting, of the "Orthodox" branch, but he stands with a steady and serene faith upon the great foundation of Truth to which George Fox called the world, and which logically makes impossible a lapse into the outwardness and literalness of mere man-made theology.

NEWS OF FRIENDS.

DUANESBURGH QUARTERLY MEETING.

This meeting was held at Albany on the 18th of Second month. We were favored with the company of Sunderland P. Gardner, of Farmington, N. Y.; Thomas Foulke, of New York City; and Philip Dorland, of Saratoga; also one friend each, from Easton, Stanford, Purchase, and Shrewsbury quarterly meetings. The meeting of Ministers and Elders on Seventh-day afternoon, was well attended. Our dear aged friend S. P. Gardner gave to us in the fullness of Gospel love blessed truths overflowing from a heart rich in the experience of spiritual things.

On First-day morning at the usual hour the meeting-house was well-filled by a closely attentive audience. The solemn silence was broken by S. P. Gardner beginning with the thought that Love and Peace are attributes of God, not Anger and Strife, and speaking at some length touching upon different points of doctrine, as held by Friends, supporting by Scripture text and parable, every assertion made, and thus setting aside erroneous views concerning the life and mission of Jesus, and the relation he bore to his Heavenly Father, and the human family.

A meeting was held at 7.30 o'clock on First-day evening which was nearly as well attended as in the morning. Friend Gardner again bore precious testimony, one prominent thought being that the growth and development of our spiritual natures is carried on just in proportion as we are obedient to the revealings of Divine Truth in the soul, and as we are gradually led into the practice one after another of all the Christian virtues, there is prepared and opened up for us successive mansions in the Father's house, and his blessed presence continues to abide with us even here. He continued to speak for an hour with wonderful clearness and force, and it may well be said of him, as of one of old "The people heard him gladly."

Thomas Foulke followed, speaking earnestly of the manifest desire on the part of many to enquire and know the way of salvation, and he said the con-

ditions which Jesus gave to the young man in former times, hold true to-day. We are to part with all our possessions or whatever it be that comes between us and our soul's best interests.

On Second-day at the meeting-house it was snowing rapidly, yet very few even of the elderly Friends were absent for that reason. All thought of discomfort was soon lost in the kindly handshaking and cordial greeting of dear friends not often with us. As we gathered into the quiet, Philip Dorland arose with the strong, earnest desire that all hearts might be willing to come under the molding influence of the Holy Spirit, thus becoming instruments in God's hands for good. He spoke of his past life shadowed and darkened by blind and willful disobedience, now flooded with light and joy, through the blessed influence of a dear, departed mother, and the pure life and correct teachings of a noble father.

S. P. Gardner followed, and as this dear aged friend again stood before us, bearing the weight of more than four-score years, yet standing erect and firm, with voice clear and plain, with argument alike convincing and persuasive, like some apostle of the olden times, he bore a message of God's truth to every heart.

Thomas Foulke followed briefly in words of earnest exhortation, after which the business of the meeting was taken up in joint session and concluded in harmony, with an added feeling of deep gratitude that in our thus assembling we had been so abundantly blessed and strengthened.

M. J. HOAG.

CENTRE QUARTERLY MEETING.

This was held at Bald Eagle, (Unionville), Centre Co., Pa., Second month 18th. On account of the inclement weather the several meetings were not as large as usual, but we should not become discouraged, as the blessing is to the few as well as the many. We notice several standard bearers of the past of this meeting having passed on to their reward. There were several representatives from all the monthly meetings comprising this quarter. John J. Cornell, of Rochester Executive Meeting, New York, and Watson Tomlinson of Byberry, Pa., were in attendance and the presence of these Friends added greatly to the favored season both spiritually and socially. Their testimonies set forth the great needs of salvation, the way to obtain it, the many widely differing views contrasted with the views held out by the Society of Friends, and the duty to love God instead of fearing him. The three natures—physical, intellectual, and spiritual being so clearly allied were distinctly considered as relative to the great necessity of their proper care in order to develop; the highest, spiritual, and many other lessons were received from these friends and others. All seemed to kindle afresh the desire for a tending toward right thought and action.

The First-day School Association met on Seventh-day at 10 o'clock; the session lasted about two hours. The importance of the cause and the necessity for awakening a more general interest were presented. Friends find it is necessary to come prepared for the

work, and the exercises, consisting of essays, etc., seem to be what we need in times like the present, when so much is being done by all denominations toward creating a more general interest in the several labors of the church. It affords the young opportunity for participating in the exercises, and it has become a matter of grave importance that we should adopt such measures as shall secure to our own society the cordial sympathy if not the active working support of all our membership.

John J. Cornell delivered on Second-day evening an address, citing the importance of all to uphold the coming opportunity to put whiskey from our State. He presented the view that past measures to this end have failed. Although the address lasted for an hour and a half there was perfect stillness and attention showing the high degree of appreciation of the audience. The series of meetings here merit and receive from all, especially the young who were in attendance, an expression of appreciation, and we feel that it has been a special season of advantage for us all.

A. C. B.

Fishertown, Pa., Second month 25.

CIRCULAR MEETINGS IN FAIRFAX QUARTER.

EDITORS INTELLIGENCER AND JOURNAL:

I was directed to forward these appointments of the Quarterly meeting to the INTELLIGENCER AND JOURNAL with the desire if it be found convenient to have the announcements made at the beginning of every month of the meetings to be held within that month.

We appoint the meetings and depend on the interest of concerned Friends to secure a proper attendance without naming a committee for that purpose, and thus far the usage is satisfactory. We think it well that our friends all over the land should know of the times of these meetings, and it may be some will be called to come this way and meet with us.

At our quarterly meeting alluded to, perhaps the most significant thing done was to recommend to our monthly meetings that they hold their business meetings hereafter women and men together as one body. It will be remembered our yearly meeting in 1888, approved a minute to the same purport. Two of our monthly meetings, Alexandria and Goose Creek, have made the change, the former some years since, the latter since the present year began.

H. R. II.

Hamilton, Va.

Appointments of Circular Meetings within Fairfax Quarter:

At Washington, D. C., the 1st First-day in Third mo., 11 a. m.

" Woodlawn (near Alexandria), " " Fifth mo., 10 a. m.

" Ridge (near Winchester), 3d " " Sixth mo., 10 a. m.

" Back Creek, " " " " mo., 3 p. m.

" South Fork (Loudoun Co.), 1st " " Eighth mo., 11 a. m.

"Hopewell, 3d " " Ninth
 mo., 10 a. m.
 "Centre (Winchester), " " " "
 mo., 3 p. m.

FRIENDS AT DENTON, MD.

Editors INTELLIGENCER AND JOURNAL:

I do wish some of the dear Friends would be called to visit our little meeting. They could come Seventh-day p. m. and return Second-day a. m., if they could stay no longer with us. Of course, we would have to be apprised of the coming as we are six miles from the railroad station, and there is no stage to meet the afternoon train, but we could have any one met who felt like coming.

As the few who meet regularly at the old house came out this a. m. (Second mo. 17) there seemed to be a commotion among a flock of turkeys under the tree. We went to them and found one had a meadow lark tossing about as I have seen them toss a snake or a frog. The poor lark opened his mouth and did the best he could to defend himself against so strong an opponent. I think he must have been hurt so he could not fly. We drove off the turkeys and brought the lark home to nurse to a better condition if possible. S.

PROHIBITION IN KANSAS.

Editors INTELLIGENCER AND JOURNAL:

I SEE that Pennsylvania has now under consideration the adoption of a Prohibitory Constitutional Amendment. I sincerely hope it will be adopted. Governor John A. Martin, in his message to the present Legislature, speaks as follows concerning the remarkable result in Kansas:

"Fully nine-tenth of the drinking and drunkenness prevalent in Kansas eight years ago has been abolished, and I affirm with earnestness and emphasis that this State to-day is the most temperate, orderly, sober community of people in this civilized world. The abolition of the saloon has not only promoted the personal happiness, and general prosperity of our citizens, but it has enormously diminished crime, has filled thousands of homes, where vice, want, wretchedness once prevailed, with peace, plenty and contentment, and has materially increased the trade and business of those engaged in the sale of useful and wholesome articles of merchandise. Notwithstanding the fact that the population of the State is steadily increasing, the number of criminals confined in our penitentiary is steadily decreasing. Many of our jails are empty now, and all show a marked falling off in the number of prisoners confined. The dockets of our courts are no longer burdened with lists of criminal cases. In the capital district, containing a population of nearly 60,000, not a single criminal case appeared on the docket when the present term began. The business of the police courts of its larger cities has dwindled to one-fourth of its former proportions, while in the cities of the second and third class, the occupation of police authorities is practically gone. These suggestive and convincing facts appeal alike to the reason and conscience of the people. They have reconciled those

who doubted the success and silenced those who opposed the policy of prohibiting the Liquor Traffic."

JULIA E. N. THARP.

Chanute, Kansas.

From Friends' Quarterly Examiner (London).

THOMAS ELLWOOD.

It is interesting to learn that a new edition of Thomas Ellwood's "Journal" has lately been published at the popular price of 9d., containing its most salient and interesting features, and told in his own quaint and curious language, but omitting most of the controversial parts, which more concern the men of his own generation than ours.

Probably there are a good many members of our Society who have not had the pleasure of reading this or the original editions of the "Journal" of this excellent man, distinguished as much for his learning and piety, as for his devotion to the cause of religious liberty. His attachment to the Society with which he cast in his lot (thus throwing away his chances of earthly preferment, when to do this meant persecutions, fines, and imprisonments, with a despised and maligned people), was of no ordinary character. Possibly, indeed, its strength is explained by the price which he paid for it, viz., the opposition, persecution, and cruelty of his father, and the estrangement of all the companions of his own station with whom he was wont to associate.

The incident of the attack on his father by the enraged countryman because the Justice drove over one of his fields (mentioned in Dymond's "Essays"), where young Ellwood, who carried a rapier, so nearly killed his assailant, proves him to have been, speaking in the ordinary sense, no coward; but this fine quality was, by redeeming grace turned in after years to so good an account, that with the exception, perhaps, of George Whitehead, no man of his time was more instrumental, both by his pen and personal knowledge of the law and how to use it to the best advantage, in securing at last the religious liberty which is both our privilege and right at the present day.

His trouble with the two Justices at Rickmansworth, in Hertfordshire (at one time the residence of William Penn), on the writing of his pamphlet, "Advice to Well-meaning and Moderate Justices of the Peace," when he was put into such a "straight betwixt duty and friendship;" his firm refusal to give recognizances, sureties, or bail; and his fair, square, and conscientious answers to all interrogatories, must have convinced these magistrates that they were dealing with no ordinary man; and explain the fact that in the end they let him go, with nothing but his simple promise that he would come up to the assize when called upon. 'It is enough,' said they; 'we will take your word.' And desiring me to give their hearty respects to Madame Penn, they dismissed me with their good wishes for a good journey."

That Milton entertained a high opinion of his judgment is evident from his admission that it was at Ellwood's suggestion that he wrote "Paradise Regained." "Thou hast said much here of Paradise Lost, but what hast thou to say of Paradise Found?"

Thomas Ellwood wrote a good deal of poetry, mostly connected with the times and circumstances in which he lived, which can hardly be said to have survived him, though it is not without merit. One short and exquisite stanza, however, indicates the beauty, purity, and humility of his mind, and deserves to rank with Baxter or George Herbert. It is fitting that this short review of one of the most interesting "Journals" ever written, should conclude with a reproduction of the stanza in question.

"O that mine eye might closèd be,
To what becomes me not to see!
That deafness might possess mine ear,
To what concerns me not to hear!
That Grace my tongue might always tie,
From ever speaking foolishly!
That no vain thought might ever rest,
Or be conceivèd in my breast!
That, by each word, each deed, each thought,
Glory may to my God be brought!
But what are wishes! Lord, mine eye
On Thee is fixèd; to Thee I cry;
O purge out all my dross, my tin;
Make me more white than snow within!
Wash Lord, and purify my heart,
And make it clean in every part;
And when 'tis clean, Lord keep it too,
For this is more than I can do."

JOSEPH LATCHMORE.

SWARTHMORE NOTES.

THE next lecture in the college free course will take place on Sixth-day evening, Third month 15th, when Thomas Wentworth Higginson, the distinguished *literateur* of Cambridge, Mass., will discuss the subject, "How to Study History."

—John M. Child, principal of the Friends' Seminary, New York City, was a visitor at the college on Seventh-day.

—Swarthmore received a marked honor at the annual convention of the National Inter-collegiate Athletic Association, in New York, on Seventh-day. James W. Ponder, the delegate from our college Athletic Association, was elected Secretary of the National Association. When it is considered that this office is generally held by representatives of Harvard, Yale, or the other older universities, Swarthmore's rising position in the estimation of the under-graduates may be better realized.

—Professor Henry W. Rolfe and wife expect to take a trip abroad during the coming summer. They will leave in Sixth month, after Commencement, and will spend most of their time in Germany.

—President Magill is receiving much encouragement in his efforts to secure a change in the regulations of teachers' examinations. Nearly all of the colleges in the State have united in support of the bill now before the Legislature.

—A new code of rules for athletics has been passed by the Faculty, at the suggestion of Dr. Shell. The rules are similar to those used at Harvard University, and should raise the standard of athletics here considerably.

—The advanced class in English under Professor

Appleton has thus far this year been occupied with "early" English. The class began with English in its earliest form, *i. e.*, Anglo-Saxon, passed then to the consideration of Chaucer's works and have now begun to read and study Spenser's "Faery Queene."

CORRESPONDENCE.

THE GEORGE SCHOOL.

EDITORS INTELLIGENCER AND JOURNAL:

I WRITE to ask whether it is true, as reported, that the Committee on the George School have decided not to do anything at present, and have ceased active work in the matter? This statement excites much concern among Friends in my neighborhood, as they are looking forward to the early establishment of this school with much interest. Some have children of school age whom they desire to obtain the advantages of instruction in it, and the idea of an indefinite postponement is very objectionable. I think the Yearly Meeting, when it dealt with the subject last year, did not suggest delay, but action. S.

Bucks County.

PERSONAL: CORRECTIONS.

EDITORS INTELLIGENCER AND JOURNAL:

IN YOUR excellent paper of Feb. 9th, on the 90th page, is an article from Richmond, Indiana, "'In Memory' of Dr. Mary F. Thomas." While that which is written of her is mainly correct, I want to say that her sister, Hannah E. Longshore, M. D., graduated at the Female,—now Woman's, Medical College of Pennsylvania, in its first class in 1851, and that the suffrage meeting that "the two sisters and one other woman held under the friendly branches of a noble tree" took place at the old home in Ohio before either of them was married.

My attention has just been called to the article, and I shall be much obliged for these corrections.

JULIA A. MYERS.

1326 Arch St., Philad'a.

IN every character there is both good and evil. As a rule, the evil is easier seen than the good; but the good is better worth the seeing. If, indeed, the evil so predominates that the character is utterly unworthy of confidence or of companionship, it is a simple matter to turn away from it, or to counsel others to do so. But if the character is to be tolerated at all, then it is both wiser and noble to recognize the good in that character, and to give no prominence to the evil which is there. This recognition of the good in a character is an incentive to well-doing on the part of the one thus generously considered, and it tends to the developing of the observer's noble nature; while the giving of prominence to the bad side of another's nature and conduct tends to lower both the observer and the observed. In fact, he who is quick to perceive another's better side, is a means of good to himself and to another; while he who is quick to point out the evil in another, injures both himself and the one he criticises.—S. S. Times.

THE belief that all things are working together for some good end is the most essential expression of religious faith.—John Fiske.

AUF WIEDERSEHEN.

UNTIL we meet again! That is the meaning
Of the familiar words that men repeat
At parting in the street.
Ah yes, till then! but when death intervening
Rends us asunder, with what ceaseless pain
We wait for the Again!

The friends who leave us do not feel the sorrow
Of parting, as we feel it, who must stay
Lamenting day by day.
And knowing, when we wake upon the morrow,
We shall not find in its accustomed place
The one beloved face.

It were a double grief, if the departed,
Being released from earth, should still retain
A sense of earthly pain,
It were a double grief, if the true bearded
Who loved us here, should on the farther shore
Remember us no more.

Believing, in the midst of our afflictions,
That death is a beginning, not an end,
We cry to them, and send
Farewells, that might be called predictions,
Being fore-shadowings of the future, thrown
Into the vast Unknown.

Faith overleaps the confines of our reason,
And if by faith, as in old times was said,
Women received their dead
Raised up to life, then only for a season
Our partings are, nor shall we wait in vain
Until we meet again!

—H. W. Longfellow.

MY BROTHER.

I WILL not ask my neighbor of his creed;
Nor what he deems of doctrine, old, or new;
Nor what the rites his honest soul may need
To worship God,—the only wise and true,
Nor what he thinks of the avoined Christ;
Nor with what baptism he has been baptized.

I ask not what temptations have beset
His human heart, now self-debased, and sore,
Nor by what wayside well, the Lord he met
Nor where was uttered, "Go and sin no more—"
Between his soul and God, that business lies;
Not mine to cavil, question, or despise.

I ask not by which name among the rest
That Christians go by, he is named, or known,
Whether his faith hath ever been "professed,"
Or whether proven by his deeds alone;
So there be *Christhood* in him all is well;
He is my brother, and in peace we dwell.

If grace and patience in his actions speak
Or fall in words of kindness from his tongue,
Which raise the fallen, fortify the weak,
And heal the heart by sorrow rent and wrung:
If he gives good for ill, and love for hate—
Friend of the friendless, poor and desolate—

I find in him discipleship so true,
So full, that nothing further I demand,
He may be bondsman, freeman, Gentile, Jew,
But we are *brethren*—walk we hand in hand—
In his white life let me the *Christhood* see,
It is enough for him, enough for me.

—Anon.

For Friends' Intelligencer and Journal.

"MAUMMA": A SKETCH OF THE SOUTH
BEFORE THE WAR.¹

THIS is a plain, unvarnished story. Too simple it may be for some readers, being merely the outline of a character most rare in her condition, a character otherwise hidden in obscurity, too lowly for a pinnacle raised only for the ideal. Yet, if self-abnegation in its highest forms is the basis of heroism, then no heroine of romance better merits notice and approval, as an example worthy of emulation. She was but a servant, and, moreover, one of a lowly race—the negro.

A mere hireling, our "Maumma," as little Southrons were wont, in those far-off, slave-holding days to call the nurse in charge of them. Women who as a rule were fond and faithful; indeed, to find them otherwise was the exception; but, as one star outshines another in the sidereal heavens, so our "Maumma" was conspicuous above her kind.

She was born a slave in the low-country of South Carolina and had no better training than most household domestics of her day, reared immediately under the eye of a conscientious mistress.

The death of this mistress set her free by Will of the same, who warmly commended her, however, to the guardianship of her favorite grandson, then just of age. On this finding herself free she forthwith set herself to earn a living, though offered by more than one of Mr. T—'s family a home with them under very easy conditions.

Naturally, one would suppose her object now must have been to assert her freedom, and to enjoy it after the usual fashion of those just escaped bondage.

"No, my dear lady," said she, whenever kindly questioned, "for my life I can't stand idleness; and I'd be 'shamed to live off my best friends; and I'd be thankful to you, ma'am, if you can recommend me to any nice folks, for I'm going into service; and I love little ones so, I'd rather be a nurse than anything else."

It was in this way that she was introduced into our service. She was orderly, honest, industrious—in short, a treasure; and served us untiringly until I, her eldest charge was about eight years old; then like a stroke of lightning about our ears came her summons away from us.

Well can I recall the hour of her departure! Dissolving in tears we children clung to her, entreating her not to leave us. The boat was there below, the oarsmen in their places ready to shove her into the stream. Still we clung to our "Maumma," and she, clasping each in turn to that faithful heart, now wiping away our tears, now kissing our hands, our

[NOTE BY THE EDITORS.—In an account recently given in the INTELLIGENCER AND JOURNAL of a trip to Charleston, S. C., and vicinity, by one of the editors, allusion was made to the "unwritten stories" that abound in the Southern section of our country. This allusion led to a correspondence with one who had her full share of suffering during the trying times of the Civil War, and she has sent us a simple but graphic sketch of circumstances within her own experience. She gives a picture of her colored "Maumma," which we are sure many of our readers will read with interest. It will be completed in about two more issues of the paper.]

hair, our eyes, kept begging us not to grieve; but still never to forget her; and bidding us, "remember! 'twas a promise, and only that which could have torn her from us; my word, my solemn word, my da'lings, before ever I did know you, or how you'd wind about my heart-strings."

Then my father with moistened eyes came and unwound our arms, and almost bearing away the gentle creature placed her in her seat and gave the sign to the "hands" aboard. The boat glided off, the strokesman bent to his oar, and she was carried off crouching in the stern with her apron over her face, and her hands upon her ears, to shut out all sight and sound from us mourners upon shore.

Many a parting has rent us since; but none whose pangs were keener than those, our first experience in the discipline of life.

Mother, herself tearful, felt at a loss how to console us. Indeed she was at much pains for long days afterwards; and finding it next to impossible to place a substitute for "Maumma" in the nursery, had to fill the blank herself. So great was the loss that it was, in fact, the cause of our emancipation from the nursery, and a somewhat premature initiation unto school-room discipline.

It was by a promise given eight years before, that we had been thus unexpectedly bereft of our nurse. She had promised her "young master" to go into his service if ever he married, and had children; and now this had come to pass, and he had written to assert his need and claim, and so she was gone!

Some may seek a sinister motive in this desertion of tried friends for the untried. I am no cynic to dissect motives; or philosopher to speculate on acts seemingly inexplicable. Hers I have been accustomed to regard as rare evidence of the purest disinterestedness sometimes attained by mortals of our race. I state facts which the reader should bear in mind.

This woman had chosen of her own free will to cut loose from her former surroundings; yea, even to leave a daughter now grown, her only child and still a slave in her old master's service, to come to us, living then upon one of our sea-island plantations, full twenty miles away from the people she had known.

Now in going back again of her own free-will, to the "young master," who claimed her promise, she was not to return to her old home and people.

Mr. S. had sold out his interests there, and moved down to Charleston to set up business. He had married a girl from "a stranger family," as "Maumma" quaintly said, "and maybe she won't fancy me, but I must keep my word." This "young master" seemed on his part also to desire to fulfill those duties of guardianship enjoined by his grandmother's will, and promised by himself.

In his household she was like Joseph in Pharaoh's service, and equally like him did she preserve her integrity yet command the respect of her fellow servants, while she gained the confidence of her employers.

Mr. S. had many bounden slaves highly appraised in value, but not one to equal her, who was priceless.

Thus for some years she held her lowly way in all

simplicity, each new-comer handed over to her, giving new impulse to her affections; yet never weaning them from those who had first laid claim to them.

The S. family were entire strangers to us; as indeed to all of our own friends in Charleston, so that her chances in leaving us were slim as to keeping alive our youthful recollections of even so faithful a nurse. But her own heart devised means to hold ours in bonds.

She could neither read nor write, but she ever found some willing scribe among her new friends to convey us messages of love, and enquiries after our welfare. Not only these letters freighted with love, but besides came little tokens of remembrance—all of which our parents made us acknowledge in fitting terms. Again, on our frequent trips to Charleston, there would meet us either a written entreaty for a day's visit to the S. farm, which was on "Charleston Neck," and on which the family spent their winters, and where we were always welcomed like royalty itself; or, if it were summer time, by "Maumma" herself waiting upon the wharf to greet our landing, and bear us for a day at "young master's."

This "young master" was then a fine-looking specimen of manhood and was wedded to a young and beautiful creature as gay and worldly-minded as himself. Proud of her and his well appointed household, he encouraged her in seeking fashion, and she, not unwilling to please herself as well as gratify him, fell readily into extravagant expenditures. He commanded a fine business, being in those days known as a "master-mason," owning, as I have said, valuable "hands," to do the labor after the manner of his plans. Attentive and capable, his income was great, but it was spent lavishly as fast as earned.

With childish delight have I gazed at this young couple, driving off to the races. To me Mrs. S. was the personification of beauty. Her fair loveliness and delicate bloom, her grace of form, her soft graciousness of manner, captivated me anew every time I was entertained in her hospitable home. I do not know whether Mr. S. was a member of the "Charleston Jockey Club" of those times, or whether his charming wife was accepted as the cynosure of all eyes at any one of the balls given once a year by that exclusive set; but I do know that this young couple in their elegant turn-out were pronounced by best authority to be among the most stylish frequenters of the race-course, and as frequenters they fell into some of the snares there lying-in-wait for humanity.

Betting, for instance, among both sexes seemed always to be in vogue there. The lady fashionist must make up her "book" in kid gloves and sugar-plums; while her lord and master, with a soul above "bon-bons," must risk larger stakes.

I know also that he soon began to invest "spare capital" in the "thorough-breds" which are the attractions of the turf; and that presently he became noted for his "racing stud." More than once, as an indulged guest, have I been led by the hand on a visit to the stables, for a glimpse of those noble animals, which I admired to their full deserts. No wonder then that in a few short years business failed

him through neglect and all spare capital was squandered.

His education having been on a higher plane, he was all unsuited for his adopted line, and he failed. A sad letter came to tell us of a broken home and the purpose of its inmates to go forth with whatever they might find left to them out of the wreck, in search of another place of residence.

"As soon as we were sold out, young master went away, and we are to follow as quick as may be, so please kind friends bring my darling children to town so I may look on them once more before I'm gone." She was going with them then, and thus simply she said it. "But 'Maumma' shall not go!" we cried; "Father must not let her!"

In a few hours father, mother, and children had answered this letter in person.

Appeal was made by letter to Mr. S. He was true to his pledges as guardian. All her savings were to his disposal; and, if she preferred to stay in Charleston, she was free to do so. He released her from her promise. Then others came forward to dissuade her. More than one friend of ours, who, as frequenters of our house, had learned her worth, came to seek her services. An aunt of mine would have doubled her wages to secure them. "All I desire is for her to watch over my little ones, and set an example to her underlings," said she. We, her earliest nurselings coaxed and plead in vain.

"Don't beg so pitiful da'ling! You'll break 'Maumma's' heart! See here now!" holding up the infant on her lap, "what'll be done with this wee babe? Would you drag me away and see it go helpless? and 't'other little creetur sca'se any bigger. Be sorry for 'em, da'lings, more sorry than for giving up old 'Maumma!' Sich tender ones going off in a fur-rin place without a home, whilst you're in sich a snug one. Why, look 'e now! sich big ones don't need a 'Maumma'; 'specially you, Miss Mary! You've got a nice young lady governess, to learn you better'n me; and by'm-by you'll be a young lady like her. Yes, a grown-up, sweet, young lady! These yere will be needing their 'Maumma' still wherever they may be—God only knows! besides, my da'ling, don't you know my word can't be broken? No, no, I must stick close to 'em in these troubles."

This climax reached, we felt that, as before, neither prayers nor tears would avail; and so we were parted for a long good-bye. M. B. R.

[To be Continued.]

TO BE CONTENT.

FATHER, I do not ask
That thou wilt choose some other task
And make it mine. I pray
But this: let every day
Be molded still
By thy own hand; my will
Be only thine, however deep
I have to bend thy hand to keep.
Let me not simply do, but be content,
Sure that the little crosses each are sent,
And no mistake can ever be
With thine own hand to choose for me.

THE ORIGINAL HOME OF THE ARYANS.

When it was first discovered that most European nations spoke languages of the Aryan (or Indo-Persian) stock, the conclusion was at once drawn that these European Aryans must look for their ancestral home in the East. As no one doubted that all the nations of this stock had sprung from one source, it was natural to inquire in what place the primitive Aryan tribe had its original seat. It was natural also to adopt the view that this seat was to be found somewhere in that portion of central Asia to which the traditions embodied, however vaguely, in the earliest known compositions of Aryan origin, the Vedas and the Zend-Avesta, seemed to point. This region, which comprehends ancient Persia and Bactria, has, from the earliest times of which we have any knowledge, been the home of Aryan communities. The reasons for accepting it as the peculiar seat of the race seemed conclusive to ethnologists until a very recent date. Of late years some scholars of high rank, both in Germany and in England, have been led to adopt the suggestion, first made by the late eminent English philologist, Dr. Latham, that the Aryans may have been of European origin. Their arguments were well summed up in the interesting address delivered last year before the Section of Anthropology in the British Association by the president of the section, Prof. Sayce. They have since been fully considered and discussed by Prof. Max Müller in his recent work, "Biographies of Words, and the Home of the Aryans." His decision is that to which the great majority of ethnologists have long since given their assent, namely, that the preponderant weight of argument points to an Asiatic home for the race. Some of the the grounds for this conclusion will presently be shown, but, in the first instance, it becomes necessary to fix the locality of this primitive seat somewhat more definitely than it is placed in Prof. Max Müller's essay. He finds that the Aryan home must have been "somewhere in Asia," but declines to say more.

This conclusion, it is evident, is too indefinite for science; nor does it seem likely that the learned author, if he had cared to be more precise, would have had any difficulty in drawing a much narrower limit. The "method of elimination" is easily sufficient for this end. From the whole of Asia we strike out at once, by the common consent of ethnologists, its eastern third, comprising China, Japan, and Thibet, and along with it, by like consent, the three great southern peninsulas, the Indo-Chinese, the Indian, and the Arabian. With Arabia the rest of the ancient Semitic countries, Mesopotamia, Syria, and Phœnicia, will be erased from the problem. The immense expanse of Siberia will also disappear; for, though one bold speculator has sought a frigid home for the early Aryans in that region, he has, as might be supposed, gained no adherents to his theory. No one proposes Asia Minor; and Armenia and the Caucasus seem put out of the question by the fact that our earliest historical knowledge of those regions shows them inhabited mainly by non-Aryan tribes.—*Horatio Hale, in Popular Science Monthly.*

From the Bucks Co., Pa., Intelligencer.

DAIRYING IN CALIFORNIA.

WHILE natives here call it winter time, Eastern visitors would be apt to think we were having spring. The fall rains have come in great abundance, and that in itself means prosperity for the farmers and ranchmen. The grass on the highlands is growing abundantly and the winter butter dairies are getting into good working order. The summer dairies are located on the lowlands in the valleys and on the islands in the bay. They have just closed a profitable season, and their cows will now rest until the first of May, when they will all come in fresh. Every effort is made to favor the large farmers by the transportation companies and commission houses, and the dairies generally consist of about three or four hundred cows. The ranchman calculates to have his cows all begin milking at about the same time and keeps them fresh from seven to eight months. Dairymen are mostly Swiss, and for some reason they are not held in very high esteem by the balance of the community, being deemed little better than the Chinese. They are generally single men and are thoroughly reliable. The wages paid them will average thirty dollars per month and each man is expected to milk thirty cows morning and evening. Some of the ranchmen, in order to economize labor, milk their cows but once a day—half in the morning and half at night. The milk is then taken to the separator and immediately run through it. Separators have been but recently introduced. The California butter is not a superior article at best, and it has been found that it will sell for two or three cents a pound more when made from the separator cream. As a consequence, the ranchmen are all buying the machines. The butter is made into rolls which are supposed to weigh two pounds each, but which in reality weigh six ounces less. It is then sent to the commission man, who buys it in bulk, and who sells it to the grocer by the roll which he sells for two pounds. The price obtained by the farmer varies from 25 to 45 cents per pound. With the prices last summer dairy farmers realized a net profit for their year's work of about fifteen hundred dollars. If they live on their ranches, which most of them do, of course they have no household expenses to pay.

But this ranch life is a most terribly lonely one, though the work is not hard. The dairyman will have a herd of three hundred cattle on a two thousand-acre place. He gets out of his sleeping quarters at six o'clock in the morning, saddles his horse—for a countryman would not walk an eighth of a mile under any consideration—and generally starts his men to work and his separator to running. After breakfast he rides along the ditches to see that none of his cattle have fallen into them. These sloughs are of all widths, and generally very deep with mud. They are the only places at which the cattle can drink, and the poor beast that falls into one is indeed unfortunate. There it must stay until rescued. In the morning the owner will find it, if it has not already gone out of sight. He puts a rope around its horns, wraps the other end around the pommel of

his saddle and slides the animal out. Almost invariably, no matter how near dead a cow may be, after being pulled out of a slough she will jump up and charge on her rescuer in the most vicious manner. Sometimes the cow's neck is broken in the rescuing process, but this does not seem to trouble the farmer much. Cows are very cheap, selling for an average of twenty dollars each, and he usually has a large number. Another source of profit to the dairyman is in the calves and pigs. The former will sell for about five dollars each. All the milk from the separator is fed to the pigs and they get very fat on it and the grass.

There is no running water in the country and watering the stock is an important feature of the daily work. Windmills are in repute and are found at every building. The winters are so mild that of course no barns are necessary to winter stock and this is an item of expense which Western men escape.

For eight months in the year no rain falls, but in the other four nature make up for any deficiencies in this respect.

The uplands furnish pasture for winter dairies and it is here that most of the wheat and corn are grown. All over the Sacramento Valley the great drawback to wheat culture is the game birds. They come in immense flocks and will destroy the seed before it has time to grow. The geese are by far the most troublesome pests. They come in flocks which will make acres of ground white where they alight. They are mostly white, but there are two other varieties, the gray goose and the honker, so called from their cry. The latter are, however, not numerous and are most prized by sportsmen. Wheat farmers pay laborers thirty dollars a month and furnish the food and ammunition, while their only duty is to kill the geese which alight on the fields and feed on the wheat. The dead birds when in good condition sell for about ten cents each. The honkers will sell for much more.

All game is quite plentiful. Excellent ducks can be found on the water, and partridges, rabbits, snipe, etc., are numerous. If we had a colored population they could find a fine brand of ring-tailed coon in the tall tules grass that borders the salt marshes.

In the water are numbers of salmon, shad, sturgeon, and catfish. The shad is not very highly esteemed and has not the toothsome flavor of the Delaware river product. Sturgeon are taken in great abundance and retail from three to five cents per pound. They are caught by dagos, who have adopted the Chinese plan. A stout cord is filled with hooks about an inch long and without barbs. The hooks are not baited. In the evening the fisherman sinks his line in the salt water of the bay. The sturgeon goes nosing around and soon runs against a hook. He makes no effort to get away and quietly waits for the fisherman to haul him in. Of course, he is as apt to be caught by one part of the body as by another. This plan of fishing is illegal, though the law is never enforced. Sturgeon are frequently caught weighing 200 pounds and fishermen will average eight dollars profit a day.

R. P. SHARPLES.

San Francisco, Feb. 9th.

CASTING PLATE GLASS.

The casting tables, the most important pieces of apparatus in a plate-glass works, are nineteen feet long, fourteen feet wide, and seven inches thick. Each is provided with an iron roller, thirty inches in diameter and fifteen feet long. Strips of iron on each side of the table afford a bearing for the rollers and determine the thickness of the plate of glass to be cast. The rough plate is commonly nine-sixteenths of an inch in thickness; after polishing, it is reduced to six, or seven sixteenths. The casting tables are mounted on wheels and run on a track that reaches every furnace and annealing oven in the building. The table having been wheeled as near as possible to the melting furnace, the pot of molten glass is lifted by means of a crane, and its contents quickly poured on the table. The heavy iron roller is then passed from end to end, spreading the glass into a layer of uniform thickness. The whole operation of casting scarcely occupies more time than it takes to describe it. Each movement is made with almost nervous rapidity. Few industries offer such fine scenic display as the pouring of the molten glass. One feels like crying *Encore!* it is so very brilliant.

In contact with the cold metal of the table, the glass cools rapidly. As soon as possible, the door of the annealing oven is opened, and the plate of glass introduced. The floor of the oven is on the same level as the casting table, so that the transfer can be conveniently and quickly made. When, after several days, the glass is taken out of the oven, its surface is found to be decidedly rough and uneven. A small quantity is used in this condition for sky-lights and other purposes where strength is required without transparency. It is known in the market as rough plate. The greater part of the glass, however, is ground, smoothed, and polished before it leaves the establishment.—*Popular Science Monthly.*

NEWS AND OTHER GLEANINGS.

—The process of imparting to wood some of the special characteristics of metal has become of considerable industrial value in Germany; the wood surface, by this treatment, becoming so hard and smooth as to be susceptible of a high polish, and, on being subjected to a burnisher of glass or porcelain, the appearance of the wood is in every respect that of polished metal, having, in fact, the semblance of a polished mirror, but with this peculiar and advantageous difference, namely, that, unlike metal, it is unaffected by moisture.

—Thomas A. Edison has been making preparations for the last six months for an exhibition in the Paris Exposition Universelle, which it is believed will be the most extensive exhibit of the kind ever shown. He has been allotted 8,000 square feet of floor space in the main building, and here he will show models of all his inventions in telegraphy, telephones, electric lightning, and the phonograph. The principal feature of the exhibition will be an enormous model of an incandescent lamp, forty feet high, the globe being composed of no less than 20,000 incandescent lamp bulbs.

—A new and interesting application of the incandescent electric light has been determined upon by the Light-house Board of New York harbor. The channels leading to the harbor have been closed at night to ships of deep

draught, on account of the easy obscuration of the range lights on shore. The Board has established an electrical station on Sandy Hook, which supplies a strong current for six lights placed upon pole-buoys in the channel known as Getoey's, leading into the main channel. The connection with shore is made by cable laid down on the bottom of the sea. The lights are colored red and white on either side of the channel and give a clear course for ships entering the harbor at night. The problem of conducting strong electric currents under water was practically a new one, but this attempt has met with success.—*The American.*

—One of the most remarkable engineering feats appears to have been achieved in China, in the face of extraordinary physical difficulties, namely, the successful stretching of a steel wire cable of seven strands across the river Lunanu, this feat having been accomplished by the Danish engineer Delinde, assisted only by unskilled native labor. The cable extends between two points, at a distance of nearly 4,700 feet apart, the height of the first support being about 450 feet above the present level of the river, and the second about 740 feet. The cable in question is said to be the longest in the world, with a single exception, namely, the cable across the Kistna, measuring some 5,070 feet. There are also two cables across the Ganges, of 2,900 and 2,830 feet respectively.—*Exchange.*

—The ship canal from Manchester, England, to the sea is to be a little over thirty-five metres in length. It is a wonderful work. The contract price is to be £5,750,000; it is to be completed within four years from the date of commencement; it removes canals of olden date, such as that from Runcorn to Latchford; it alters the course of railways to some extent; it carries roads above its own course, and places water-supplies under it; it fills the beds of rivers and water-courses; needs vast locks and sluices, hydraulic machinery, many swing bridges (the steel work in the girders for the bridges is estimated to be more than thirty-three hundred tons in weight), and lifts, to lower and raise barges and boats to and from the canals.

—The United States Signal Office publishes accounts of eleven vessels which report that they used oil with great effect during the hurricane off the Bahamas in November. The following are some of the reports: Bark *Auburndale* "used oil with great success, safety of vessel and lives of all on board attributed to its use, only four gallons needed;" bark *Hale*, "fish oil used in bags at Catshead, vessel and crew saved by its use;" brig *Hussey*, "blew a hurricane, lay to, and used oil constantly, thus saving the vessel;" schooner *St. Croix*, "in constant danger, but all damage prevented by timely use of oil;" barkentine *Retriever*, heavy gale, "but rode it out without breaking a rope-yarn, thanks to the use of oil." The vessels seem generally to have used only a few gallons of oil each.—*Science.*

—Says Professor Lanciani, director of excavations, in his valuable work on "Ancient Rome": "Since it is impossible to turn up in Rome a handful of earth without coming upon some unexpected find, it is easy to understand what an amount of discoveries must have been made by turning up 270,000,000 cubic feet of that land of promise. A great wealth of archaeological treasures has been found, some of which are very remarkable, and go a long way toward revealing the details of life in the days of the Roman fathers. It may be interesting to read a few statistics showing what has been discovered since 1872. The number of objects is almost countless, but among other things are 77 columns of rare marble, 405 works of art in bronze, 192 marble statues, 18 marble sarcophagi, 47 objects of gold, over 36,000 coins, and an almost incredible

amount of other relics in bone, glass, enamel, lead, ivory, and stucco."

—A prize of £120 has been offered by M. Marceau, a Senator of Spain, for the best essay on the burdens on production caused by the taxation necessary to maintain the overgrown armies of the Continent of Europe. The prize is open to French, English, and Spanish competition. M. Léon Say, M. Jules Simon, and M. Frédéric Passy have consented to be the judges for French essays. The English judges have not yet been selected.

CURRENT EVENTS.

THE President-elect, General Harrison, left his home at Indianapolis on the 25th ult., and proceeded, by way of Pittsburg and Harriburg, to Washington, where he arrived next day. He was accompanied by his family and others. Extensive preparations are making for the ceremony of the inauguration, on the 4th instant.

SEVERELY cold weather was experienced in the North and Northwest at the close of last week, and in this region on the 24th ult., when the thermometer fell to zero.

THE bill to provide for the admission of four new States,—North Dakota, South Dakota, Montana, and Washington,—passed Congress finally last week, and was signed by the President on the 23d ult. Presuming that the successive steps provided for will all be taken, these new States will be fully in the Union when the regular session of Congress opens, in Twelfth month next.

A MISPLACED switch at Boyd's Mills, Maine, threw a train off the track, on the 23d ult., and caused the worst accident known in that State for many years. Three men were killed and two badly hurt.

At Plymouth, near Wilkes-Barre, Pa., on the 25th ult., a factory engaged in making "squibs" blew up, and eleven girls employed in it were killed. The disaster was caused by carelessness.

NOTICES.

*** Quarterly Meetings in Third month will occur as follows:

1. Nottingham, Little Britain, Pa.
2. Whitewater, Milton, Ind.
4. Prairie Grove, West Liberty, Ia.
7. Salem, Woodstown, N. J.
11. Baltimore, Baltimore, Md.
14. Haddonfield, Moorestown, N. J.

*** Friends' Charity Fuel Association meets on Seventh-day evening, 2d inst., at 8 o'clock, in Parlor, 1520 Race street. WM. HEACOCK, Clerk.

*** Circular meeting will be held at Chester, Pa., at 3 p. m., Third month, 3d.

*** Circular meetings have been appointed by the Western Quarterly Meetings as follows:
Kennett Square in the Third month.
Hockessin in the Fourth month.
To convene on the second First-day of each month respectively, at 2 o'clock p. m.

*** A meeting of the First-day School Union of Philadelphia will be held on Sixth-day evening, Third month 8th, at 8 o'clock, in Friends' meeting-house, at 15th and Race streets.

Superintendents of schools are requested to present reports of the conditions of their schools and appoint representatives to be in attendance.

DAVID L. LUKENS, } Clerks.
SARAH M. HOLCOMB, }

*** The Burlington First-day School Union will meet

at Trenton, Seventh-day, Third month 9th, at 10.30 a. m. All interested in the work cordially invited.

WM. WALTON, } Clerks.
SALLIE T. BLACK, }

*** A Conference of parents, teachers, school committees, and others interested will be held under the care of the Committee on Education of Philadelphia Yearly Meeting of Friends, on Seventh-day, Third month 9th, 1893, at 15th and Race streets, Philadelphia, commencing at 10 o'clock a. m.

The subjects for consideration are:

1. Primary Reading.
2. Reading in the Higher Grades.
3. Manual Training.

All interested are invited.

Prompt attendance is desired.

WM. WADE GRISCOM, Clerk.

PUBLISHERS' NOTICES.

*** WE particularly ask that when money is forwarded to renew subscriptions, care be taken to give us the name of the person to whom the paper is now being sent. Sometimes, instead of this, the name of another member of the same family is given, in which case, the new name not appearing on our list, we suppose it to be a new subscription, and send two papers.

Where it is a new subscription, please say so, and this will also help to avoid mistakes.

*** AS a definite number of copies of the INTELLIGENCER AND JOURNAL is printed each week, we would suggest to any of our friends who may wish extra numbers of the paper to inform us of the fact previous to the publication containing the particular article wanted, that we may have the required amount of extra numbers printed.

CELEBRATED GARDENS.

The celebrated "Hanging Gardens of Babylon," were within the precincts of the palace called "The Admiration of Mankind." They consisted of gardens of trees and flowers on the topmost of a series of arches 75 feet high and built in the form of a square, each side of which measured 400 Greek feet. The city of Babylon, with its famous gardens, was razed to its foundation, 690 B. C.

Two Thousand, Five Hundred and Seventy-Nine years later we find the celebrated gardens of James Vick in Rochester, New York. For description, Catalogue of Seeds, advice how to obtain free a copy of Vick's Floral Guide, and also of the famous new rose, called "Vick's Caprice," address James Vick, Seedsman, Rochester, N. Y.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

JARVIS-CONKLIN MORTGAGE TRUST COMPANY,

Capital Paid In, . . . \$1,500,000.

Six per cent. Guaranteed Mortgages on Farm and City properties.

Six per cent. Debenture Bonds interest payable half yearly.

Five per cent. Saving bonds in small or large amounts running six, twelve, eighteen, or twenty-four months.

These Bonds are issued under the supervision of the Bank examiners of the state of New York, with whom we have deposited 1-10th of our Capital in Government Bonds.

We issue instalment Saving Bonds, secured by real estate security, running 10, 15, and 20 years. Send for Pamphlet.

ADVISORY BOARD OF PHILADELPHIA DIRECTORS

WM. HACKER,

518 Walnut Street, Philadelphia.

AMOS HILBORN & Co., Furniture, Bedding, Curtains.

PARLOR, DINING ROOM, LIBRARY
AND CHAMBER FURNITURE, CUR-
TAINS AND FURNITURE COVERINGS
MATTRESSES, BEDS, FEATHERS,
SPRINGS, SPRING COTS, ETC., ETC.

No. 1027 Market Street, Philadelphia.

WM. H. JONES

The Dealer in Agricultural Im-
plements, Seeds and Fertiliz-
ers. Removed to 2043 and
2045 Market St., Philadelphia,
Pa. - Cheapest and largest variety.
Every conceivable implement of
farm use, harness, seeds and fertil-
izers. It is a curiosity, and of
great interest to every utilitarian
to see the establishment. If you
cannot get here, write for wants.
I am in communication with all
the Agricultural implement build-
ers in the U. S.

ALWAYS A SPECIAL BARGAIN ROOM.

Equitable MORTGAGE COMPANY.

S. E. Cor. Fourth and Chestnut Streets.

CAPITAL, . . . \$2,000,000.00
SURPLUS AND UNDIVIDED PROFITS, . . . 115,444.72

SIX PER CENT DEBENTURES,

secured by first Mortgages held in trust by The American Loan and Trust Company of New York, and further secured by the entire capital and assets of the Equitable Mortgage Company. Amounts \$200, \$300, \$500, \$1,000, \$5,000, and \$10,000.

SIX PER CENT. GUARANTEED FARM MORTGAGES.

FIVE AND SIX PER CENT. SAVINGS CERTIFICATES.

RUNNING FROM THREE MONTHS TO TWO YEARS.

Interest coupons payable semi-annually at our offices or through any Bank. Also

MUNICIPAL BONDS AND OTHER FIRST-CLASS INVESTMENT
SECURITIES FOR SALE.

MILK,
CREAM,
AND
BUTTER
ALWAYS
ON HAND.

LUKENS WEBSTER,

120 S. FIFTEENTH ST.

Milk delivered daily, and butter twice a week to all parts of the city and surrounding country. We are dealing with the most reliable dairies. Orders by mail solicited and promptly filled.

LARD OF THE VERY BEST QUALITY
A SPECIALTY.

FOR DRY GOODS

—THE BEST PLACE IS—

STRAWBRIDGE & CLOTHIER'S,

MARKET }
EIGHTH } STREETS.
FILBERT }

One of the largest buildings in the city, and
the largest Establishment in America devoted exclu-
sively to

DRY GOODS.

The stock includes Silks, Dress Goods, Trim-
mings, Millinery, Hosiery, and Underwear, Gloves,
House-Furnishing Goods, Carpets, Ready-Made
Dresses and Wraps, and everything that may be
needed either for dress or house-furnishing purposes.
It is believed that unusual inducements are offered,
as the stock is among the largest to be found in the
American market, and the prices are guaranteed to
be uniformly as low as elsewhere on similar quali-
ties of goods.

LEARN TO WAIT.

LEARN to wait—life's hardest lesson,
Coun'd perchance through blinding tears,
While the heart throbs sadly echo
To the tread of passing years.

Learn to wait—hope's slow fruition ;
Faint not, though the way seem long ;
There is joy in each condition,
Hearts, through suffering, may grow strong.

Constant sunshine, howe'er welcome,
Ne'er would ripen fruit or flower ;
Giant oaks owe half their greatness
To the scathing tempest's power.

Thus a soul untouched by sorrow
Aims not at a higher state ;
Joy seeks not a brighter morrow,
Only sad hearts learn to wait.

Human hearts and human greatness
Spring not from life's sunny side ;
Heroes must be more than driftwood
Floating on a waveless tide.

—From the *Humbler Poets*.

For Friends' *Intelligencer* and *Journal*.

RELIGIOUS TOLERANCE.

AMONG the fruits of an experienced Christian life few show more conclusively and effectively how fully the human will is surrendered to, and governed by, the Divine will, than does a just tolerance of the opinions, sentiments, and actions, of those who differ, when these are performed under apprehended requirements of that will, whether this difference be the result of education, the various talents with which we are endowed, or the different stages of growth that may have been reached in the occupancy of those talents. And by tolerance of these differences I do not mean a mere sufferance of that which we cannot control or alter, or an acquiescence in them because we are powerless to change them, while underneath we are cherishing a mental condemnation of them ; but a willingness to allow the same freedom of opinions and action that we claim for ourselves, and at the same time to refrain from assuming the seat of judgment over those who thus differ from us either by word or thought. Nor are we to conclude that our thoughts, our conclusions, or our modes of action in the religious field are the only correct ones, or that whatever does not come up to the standard we regard as the correct one is therefore necessarily wrong and reprehensible.

When Jesus gave to his disciples the new com-

mandment that they should "love one another," even as he had loved them and at the same time established the criterion by which they were to be known as his disciples, he did not give them a creed to subscribe to, neither did he prescribe a mode of dress or address, nor a method of worship, nor courses of action for them to adopt by which a uniformity could be secured that they might be known as his disciples, but each of them was left free to obey what he understood to be the Divine requirement. They were to be known by the love they bore each other, and as the nature of love is to lead those who are governed by it to be tolerant not only of the opinions of those toward whom it flows but of their faults, and while striving to correct these to do it in such a spirit as to retain and cultivate a reciprocal feeling of affection ; so it necessarily follows, that if any in our day claim to be the true disciples of Christ, they too will be known by the love they bear each other. And this will be manifested not by mere profession, but by a tolerance of each others' different modes of thought and action so long as they are earnestly seeking to do what they believe is right in the occupancy of their gifts in the different fields of labor opening before them as instruments in the Divine hand for good to their fellow men. Jesus saw that those whom he had called and chosen as his immediate disciples were men of different endowments and temperaments, and that in the occupancy of their gifts they would necessarily differ in their ideas of duty and in the methods to be used for spreading his gospel ; for their different traits of character and different endowments would lead them to view the same thing from different standpoints, and they would therefore of necessity arrive at different conclusions. Hence if any one or more of them should set up a standard and require all the others to comply therewith, they would be likely either to refuse or comply with a mental reserve which would weaken their power for good. So there would follow discord, jealousies and rivalries, and ultimately separation, and thus mar the progress of that religion which Jesus came to establish, and retard its spread among the nations of the earth. But by loving each other as unselfishly as he had loved them, each would be willing to allow the other to work in his own field, suppressing all jealousy or feeling of rivalry, and rejoicing in the fruit of a brother's faithfulness in the service allotted him, though it differed from his own.

Such is a true religious tolerance ; and had the professed followers of Jesus from the Apostolic day to the present manifested their love for each other

by this kind of tolerance, there would have been no persecutions among them for religious belief, no division among the various sects, no cruel martyrdom such as have stained the annals of the professed Christian church, no harsh and bitter denunciations because of the entertainment of different views, or because some under the guidance of Divine wisdom and the experience of past ages entered upon new fields of duty; and, as a necessary sequence, true Christianity would have become the religion of the masses to a far greater extent than we now find it in our day.

Friends who, by the adoption of their title and their claim to be governed by the immediate direction of the Holy Spirit, we call the Christ, profess to love God supremely and to love each other. The lack of this kind of tolerance has demonstrated its devastating effects. Intolerance of each others' views and actions, even while those actions were in no wise incorrect or immoral, has led to the divisions and subdivisions which have so largely interfered with the spread and adoption of its principles.

We ought to learn from the mistakes of the past, how to improve our present and future action; and when a member of our Society finds the requirements of Truth demand a service that differs from that which has been pursued in the past, and which he believes is for the best interests of mankind, this kind of tolerance will lead us to withhold quick or harsh condemnation, to investigate as far as we may be able the ground upon which these base their course of conduct, and if upon such an investigation it becomes apparent that his daily life is correct, that his dependence upon the requirements of the Divine will is firm and unshaken, and that he evinces a loving demeanor towards all, a true tolerance would require us to refrain from questioning his motives or condemning his acts, or manifesting a distrust because we do not find it our place to work in the same field. Neither should we raise in our own minds a standard for others to adopt, because that which we believe to be the opening of truth requires us to adopt it for our own.

George Fox left us the legacy to "mind the Light," but while he put upon record his idea of the course of life and action, which the members of the Society he was instrumental in gathering should adopt, he evinced a clear sight that changes might be necessary, and that it was not conformity to one unalterable standard that was to be observed, but, as he found he could not follow the traditions of the church, but must speak, act, and live as the Light within him directed; so he was willing those who came after him should adopt the same general standard, feeling confident that this Light would not lead them astray, even though it might unfold different duties to perform. Nor need there be any fear, under such a tolerance, of confusion arising; for we shall be known as the disciples of the Christ within, by the love we bear each other, and by this criterion we shall be able to detect the true from the false and to determine the correctness and truthfulness of the profession of any who claim to be led by the Divine Spirit into new courses of action.

History, as well as our observation of the actions of men in the present, shows us that when men profess to be serving God and claim to be acting under conscientious convictions, and yet have no real call, but are moved by a desire to win popular favor or to secure some selfish interest, they invariably become intolerant toward those who do not coincide with their views or wishes, heady and impatient in the reception of advice or words of caution, and often contentious under the opposition they meet. All of which conduct, it may be clearly seen, does not emanate from a spirit of true love, and so again the criterion of Jesus would show us the distinction between the true and the false.

I know many very earnest, sincere, and honest minds feel aggrieved when there is a departure from what they deem imperatively demanded of them and what they think is important for all the members of the Society to observe; and yet, if there be in the minds of these a true, tolerant spirit, they will be led to avoid harsh, quick, and improper condemnation, but will in a gentle and loving manner, point out to such what seems to be right and then leave them to consider it, and having thus lovingly done their duty leave them in the care and under the guidance of One who knows better than the human what ought to be done. Such a course will tend to induce those for whom the concern has arisen to more carefully examine the ground upon which they are standing, and if they are true in their desire to mind the Light, they will at once retrace their steps if they find they are in error; but if not, and they feel they must go forward in the course which appears clearly right for them, they will still maintain a loving spirit towards those who have been concerned for them.

Such a tolerance of each others' feelings and views will preserve a true unity of feeling, and will mark the true Friend; while it will, at the same time, place no improper obstacle in the way of any rightly concerned mind to labor in such a field of service as the Light within may point out.

I think any candid, thoughtful mind that makes a careful investigation of the past history of the Society of Friends, cannot fail to discover that all the commotions that have disturbed the peace and interfered with the growth and prosperity of our Society have had their origin in an intolerant spirit, actuated by a zeal not grounded in the love that Jesus enjoined upon his disciples. It led to the disastrous separation of 1828. It has led to the subdivisions that have marked the history of the other branch of the Society. It has led to the scattering of our own branch. It brought many a pure and tender spirit under its condemnation during the anti-Slavery excitement, and caused many a resignation from our Society by concerned Friends, because they could not bear up under its condemnation and ostracism.

It is the part of wisdom, then, for us who are now the active members of our Society, learning from these mistakes of the fathers and mothers, to avoid like courses of conduct in the future, and to so conduct ourselves, under the guidance of a truly tolerant spirit, that we may become what we profess to be,

Friends. Friends, because we love one another, because we love our fellow-men not associated with us in religious communion, because we love the fallen and degraded so much that we use every effort the Lord shows us we are capable of using to uplift them and to prevent a recurrence of their fall, and above all because we so love our God that we can trust him to direct the movements of others in his service as well as our own.

Such is true religious toleration, and such should be the fruit which our profession should bear before the world as well as in our religious organization and in our home life.

THE FIRST MISSIONARY JOURNEY OF ST. PAUL.

[From Fairar's Life of St. Paul Selected for FRIENDS' INTELLIGENCER AND JOURNAL, by C. A. K.]

"SENT forth by the Holy Spirit." More conscious instruments, perhaps of God's will than has ever been the case before or since, and starting on a journey more memorable in its issues than any which had ever been undertaken by man—Saul and Barnabas, accompanied by their attendant, started on their way.

There were yet multitudes of heathen and thousands of Jews in the city of Antioch, who had not accepted Christianity: but the two Apostles were summoned to other work. All land routes were more or less dangerous and difficult. Accordingly they descended the rocky stairs which led down to the port of Seleucia, and there embarked on a vessel which was bound for Cyprus. And thus began "the great Christian Odyssey." The Apostolic barque has spread her sails; the wind breathes low, and only aspires to bear upon its wings the words of Jesus. As they sail south-westward over the hundred miles of that blue sea, which one of them was destined so many times to traverse—the sea which four times wrecked him, and tossed him for a night and a day on its restless billows—they must have felt a deep emotion at the thought that now for the first time the Faith on which depended the hopes of the world was starting for fresh regions, from its native Syria. Little did Paul know the future that lay before him. That future—the fire of the furnace in which the fine gold of his heroic spirit was to be purged from every speck of dross—was mercifully hidden from him, though in its broad outlines he must have been able to conjecture something of its trials. Yet, doubtless, he would have boldly uttered "I hold not my life dear unto myself," and the faith of the Christian would have enabled him to say, "I can do all things through Christ that strengtheneth me."

Yet to all human judgment how ill qualified, physically, was the Apostle for the work which lay before him. His bodily presence was weak, his speech despised; but over the feeble body and shrinking soul dominated a spirit so dauntless that he was ready to brave torture, to quail as little before frowning tyrants as before stormy seas.

When the Apostles stepped ashore at Cyprus upon one of the ancient piers, of which the ruins are

still visible, it was a busy and important place, and we cannot doubt that Barnabas would find many to greet him in his old home. Doubtless, too, there would be some to whom their visit was peculiarly welcome, because ever since the persecution of Stephen, Cyprus had been connected with the spread of Christianity. Of their work at Salamis we are told nothing, except that "they continued preaching the word of God in the synagogues of the Jews." It appears from this that Salamis was one of the towns where the Jews were sufficiently populous to maintain several synagogues; and if the Apostles came in contact with the heathen at all, it would only be with proselytes. After their residence in Salamis the three missionaries traversed the whole island, but not one incident of their journey is preserved for us until they reached the town of Paphos, not the old and famous Paphos, but New Paphos, the modern Baffa, now a decayed and mouldering village, but then a bustling haven, and the residence of the Roman Proconsul, Sergius Paulus.

It does not in any way impugn the claim of Sergius Paulus to be regarded as a person of intelligence, that he had with him, apparently residing in his house, a Jewish imposter named Bar-Jesus, who had arrogated to himself the title of Elymas, the Ulemak, or Wizzard. The prevalence of earthquakes in Cyprus would be likely to give to the minds of the residents that gloomy and credulous tinge which is often found in countries liable to such terrible inflictions; and New Paphos had been devastated by an earthquake sufficiently recent to have left a deep impression. Perhaps from this, and other causes, Bar-Jesus had acquired unusual influence, but it is an unsuspected confirmation of the accuracy of Luke,—which so often occurs to establish the veracity of the sacred writers,—that we find Cyprus to have been famous for its schools of religious imposture, of which one was professedly Jewish. The same feelings which had induced Sergius Paulus to domicile the Jewish Sorcerer in the proconsular residence, would cause him to send for the new teachers, whose mission had attracted attention by that loving earnestness, which differed so widely from the neutrality of the synagogue. But the position of soothsayer to a Roman Proconsul—even though it could only last a year—was too lucrative to abandon without a struggle. Elymas met the Apostles in open controversy, and spared neither argument nor insult in his endeavor to persuade Sergius of the absurdities of the new faith. Instantly Saul—and this is the moment seized by the historian to tell us that he was also called by the name of Paul, which henceforth he exclusively uses—came to the front to bear the full force of the sorcerer's opposition. A less convinced or a less courageous man, might well have shrunk from individual collision with a personage who evidently occupied a position of high consideration in the house of the noble Roman. But to a spirit like Paul's, while there could be infinite compassion for ignorance, infinite sympathy with infirmity, tenderness towards penitence, there could, on the other hand, be no compromise with imposture, no truce with Canaan. He stood up, as it were, in a flame of fire, his

soul burning with inspired indignation, against a man whose cowardice, greed, and worthlessness he saw, and wished to expose. Fixing on the false prophet and sorcerer that earnest gaze which was perhaps rendered more conspicuous by his imperfect sight, he exclaimed, "O full of all guile and all villainy, thou child of the devil, thou foe of all righteousness, cease, wilt thou, thy perversion of the Lord's straight paths." And then perceiving the terror produced on the mind of the hypocrite by this bold invective, he suddenly added, "And now, see the Lord's hand is upon thee, and thou shalt be blind, not seeing the sun for a time." The denunciation instantly took effect, the sorcerer felt that his impostures were annihilated, that he stood in the presence of an avenging justice. A mist swam before his eyes, followed by total darkness, and groping with outstretched hands, he began to seek for some one to lead and guide him. Nor was it strange that a display of spiritual power so startling and so irresistible should produce a strong conviction on the mind of the Proconsul. How far his consequent belief was deep-seated we have no evidence. But the silence of Luke would seem to indicate that he was not baptized, and we can hardly look on him as a lifelong convert, or we should have heard of him, in their records, as of the others who joined the church, from the ranks of the noble or the mighty.

For Friends' Intelligencer and Journal.

THE CHURCH AND THE LIQUOR TRAFFIC.

"THE primary relation of man is to his Creator. . . The feeling which exists in consequence of this relation manifests itself in love, adoration, and worship. It is universal, ineradicable, and intense. It is religious; and, whatever may be the forms and ceremonies of its manifestation, and however it may be perverted and distorted in its development, this element or attribute of human nature is in him the source of aspiration and progress. It is the elastic connection which continually lifts the race as a whole, and exerts the most powerful and permanent impulse in all reform. The religious organizations of Christendom demonstrate this truth. This elastic union between man and his God is often strained, and sometimes appears to be broken; but, generally, it holds, and, let us hope, may never fail in the end to draw every wandering planet again to the bosom of its eternal source. As might be expected,—in fact, must from the laws of nature be the case,—those organizations in society through which conscience, morality, and worship are most actively manifested, the churches—religious bodies—have from the first and still continue to be, the great visible force which has sustained the temperance movement against the opposition it has encountered. Every good cause has very largely, I think chiefly, to rely upon them for that ever present power which grinds the grist of human welfare." (Senator Blair.)

The founder of the Methodist Church, John Wesley, as long ago as 1760, wrote as follows "on the sin of distilling and selling spirituous liquors:" "But neither may we gain by hurting our neighbor in *body*. Therefore we may not sell anything which

tends to impair health, such as, eminently, all that liquid fire commonly calls drams or spirituous liquors. . . . But all who sell them in the common way, to anyone who will buy are *poisoners in general*. They murder the King's subjects by wholesale . . . and what is their gain? Who would envy their large estates and sumptuous palaces? A curse is in the midst of them."

At the present time, when nearly every denomination has given utterance, in plain and pointed language, in favor of the temperance cause, advocating generally, total abstinence for the individual and the prohibition of the liquor traffic by law, "All else, in my opinion, is worthless—a fraud, a delusion, and a snare." (Senator Blair.)

It must be evident to all that this "great visible force," the Christian Church, God's chief agent for the advancement of truth, must be kept pure and clean. Just as purity and holiness of life are demanded of the ministers and members of a church, even so, the church, in order to effectively battle with any great evil, must itself be absolutely free from any taint. If the life of a minister be not in accord with his teaching, can men believe in his sincerity? And if a religious society permits an evil to exist within its pale, all its efforts to crush this evil elsewhere must be seriously impeded and its sincerity open to doubt.

A religious society, therefore, to be consistent and to exercise its greatest usefulness in the elevation of mankind, must protest against any of its members (except druggists, for medicine), selling alcoholic liquors of any description or encouraging their use. How can it hope to impress a reasoning world with the beauty and value of its principles or testimonies, if those principles are being daily violated by its own members? How expect to retain in membership those whose consciences are alive on these matters or how gain new members, when those who wish to join may see the ones who have been long in the fold, willing to make a livelihood by dealing in intoxicating liquors, thereby endangering the prosperity and happiness of others; the church, at the same time, making no sufficient effort to suppress this evil or relieve itself from such crushing responsibility.

And here the query arises: If there are members of a religious body who are engaged in selling liquors, why do they not quit the business or otherwise relieve the church of its responsibility, seeing their conduct is a source of so much anxiety and sorrow? To this question, they themselves would answer:

1. "The business of selling liquor is a lawful one." In answer to this it may be said that while the statement is true as to the law at present in most States, it is contrary to law in Maine, Kansas, Iowa, Rhode Island, Vermont, and New Hampshire, and in large portions of other States. Thus, while the law permits the business in one locality, it is under the ban in many other places. Can a conscientious person in any State feel justified in the violation of a moral law that has already been placed in the Constitution of many States? Moreover, the members

of a religious society should hold their well-established principles as at least equal in authority to the law of the land and carry them out with equal care. It has heretofore been a source of great gratification that these principles have been far in advance of the law, and often in advance of public opinion, but, being firmly advocated and carried out in the church, public opinion has been educated up to the point of fixing them in the law. Can the Church afford to stand on a lower moral plane than the legal statutes? Should not the Church be the means of establishing moral principles in the common law?

2. "Our ancestors traded as we do, were regarded as worthy members of Society and they started us in the business we now follow." It is well to remember that each period has its especial questions to settle; we have to deal only with those of the present. What may have been right for our fathers, may not be right for us. The liquor traffic has increased immensely during the past thirty years, and how to deal with the resulting intemperance is the question of the present day. Our fathers acted according to the light they had; we act according to the light now streaming in, and we can see, more clearly than any one in former times, the evil tendency of the use of intoxicants,—realize that we are in the midst of a death struggle between intemperance and civilization.

"New occasions teach new duties, time makes ancient good uncouth;

We must upward still and onward, who would keep abreast of truth."

Could our ancestors have seen in their day the evil results of selling liquor as we know them now, they surely would have given their energies to other lines of trade not tending to injure but to help mankind.

3. "We have no other means of support, have been trained to that business and are familiar with no other. If the selling of liquor be given up, the other branch of our business will be ruined." In answer to these two points it may be said that to one who looks carefully into the results that follow the use of alcoholic liquors in the family and elsewhere, continuance in the trade of supplying the public with these beverages, seems impossible if there is love for humanity in his heart. He would say to himself: "Have I a right, in order to make a living for myself and family, to sell that which tends to injure the bodies of my brethren, ruin the mental powers, destroy domestic happiness, wreck homes, endanger life, and put in peril the welfare of the soul?" It is a principle established in law and morals, that no one has a right to engage in any business that interferes with the well-being of others. In an honest effort to quit such a business and establish a better one, there is little doubt that help will be cheerfully given by friends and, more than all else,—from a Heavenly source.

4. "While some members of church buy and use liquor, we have the right to sell it." In those denominations which have taken an advanced stand on the temperance question, the number of members who use liquor as a beverage must be very

small. The younger members are almost entirely exempt, and the few exceptions among the older ones are those who formed the habit long ago, at a time when the dangers and results were not so well known as now. But these exceptions to the general rule of total abstinence adopted by the church, nor the use of intoxicants in any form by the individual, do not excuse the selling of liquor. Many churches have spoken plainly against the trade at different times, each time with greater force and lately with remarkable unanimity. Moreover, the fact that one man errs is no excuse for another, and the harm that one man does by drinking is trifling compared to the harm done by him who sells liquor to be drunk by many families.

To an observant mind, the selling of intoxicating liquors seems to affect two parties chiefly:—those who sell and those who use, together with their families. It is rare indeed that one who deals in liquors does not come to use them himself, to a greater or less degree; indeed, the necessities of the trade will require him to drink with his customers at times, which may lead to the formation of a habit fatal to a man's moral and physical welfare, and the welfare of those dependent upon him. And is it not true that one engaged in a business so selfish and so careless of the well-being of others must inevitably deteriorate in moral character?

But on the other hand how are those affected to whom the liquor is sold? Ah, here the saddest part of the whole matter is touched! These wines and other liquors go to be used in families and at their entertainments; they go to tempt the boys to evil ways; to create an appetite for stimulants in young girls and women; and, in fact, to set in motion that downward movement which, with all its heart-rending incidents, ends at last in the drunkard's grave. For the appetite created by the grocers' wine increases until it demands the stronger stimulants offered by the saloon; and he who helps to start the evil is resting under a responsibility for which he will be held accountable.

Who can estimate the amount of harm done, even during the past year, by the sale of wine to be used in families?

The *seller*, or the *families in peril*:—which class, chiefly, should receive our sympathy?

Does it not come home to each member of a Christian church, that a duty is resting upon him, a duty to his fellow-men? May it be performed with the aid of Him, "who doeth all things well!" * *

A FARMER whose cribs were full of corn, was accustomed to pray that the wants of the needy might be supplied. But when any one in needy circumstances asked for a little of his corn, he said he had none to spare. One day, after hearing his father pray for the poor and needy, his little son said to him:

"Father, I wish I had your corn."

"Why, my son, what would you do with it?" asked the father.

The child replied, "I would answer some of your prayers."

SCRIPTURE LESSON, No. 11.

THIRD MONTH 17, 1889.

JESUS' LOVE TO THE YOUNG.

GOLDEN TEXT: "Suffer the little children to come unto me; forbid them not: for of such is the kingdom of God."—Mark 10: 14.

READ Mark 10: 13-23.

JOURNEYING onward, preaching the kingdom of God and healing disease, Jesus passes through Samaria, and comes into the neighborhood of Jericho, on the borders of Judea. It was near the time of celebrating the feast of Tabernacles, and his disciples were on their way to Jerusalem, as every Jew was required to attend the Feast. The multitudes came together, as was their custom when Jesus was near, and he, as was his wont (Mark 10: 1), taught them. A discussion followed, in which the Pharisees took part.

And they brought unto Him little children. This was done that Jesus should lay his hands on them and pray for them and give them his blessing. This was a common usage among the Jews. It was believed that such blessing from one who was regarded with reverence, brought divine favor to the child. (Gen. 48: 14).

The disciples rebuked them. Reproved them, either because they thought them too young, or that they would be troublesome or annoying to Jesus. But he was moved with indignation at their conduct, and made the circumstance an occasion for their instruction, as he had done a little while before.

Suffer the little children, etc. It was a source of pleasure to Jesus for the parents to bring their little children with them when they came to be instructed. It was an evidence of their love for the little ones, and the care as parents they bestowed upon them. Parents cannot begin too early to lead their children into the way of blessing. Many have been lost to the good for want of this watchful care in the impressible years of infancy. The tenderness with which Jesus received them—taking them in his arms—must, as we read the simple story, draw our hearts very near in feeling to the great, overflowing heart that was in him and prompted the kindly deed and the loving word that stand as examples to all his followers.

One came. This was a young man, and a ruler; one who held some office in the Synagogue or in the nation. He came in haste, fearing he might miss the opportunity of an interview.

Good Master. This refers most probably to his character as a religious teacher, and may have been a title which the Jews applied to their teacher. The word master as here used means teacher.

What shall I do that I may inherit eternal life? What more dost thou require than I have already done, that I may enter into the life of which thou teachest?

The test came: it was more than he was willing to yield, and he went away sorrowful. He was not prepared to make himself poor and of no account that he might help others; not ready to take his place with the lowly ones that he might be rich towards God. It is not that the rich man must give up his fortune and make himself and his family outwardly poor, but that he shall hold his riches subservient to his duty to God, and use them as a means to be help-

ful to those less fortunate than himself. There are many who, like the rich young ruler, are wanting to be assured of eternal life, yet unwilling to accept the terms upon which it is to be received.

The character of Jesus, in every phase, stands, confessedly, in history, as the purest type of humanity. His whole existence was inspired by Divine love,—he was "one with the Father,"—hence, nearly two thousand years after his death, he remains to the world an example of righteousness in all things. In his life we find an entire disregard of personal advantage; he was self sacrificing, self-forgetful, forever giving his thought and energy to purposes of good. In our lesson, his disciples, fearing he was weary and would be annoyed by the children that would have gathered around him, "rebuked them," and would have driven them away; "but when Jesus saw it he was moved with indignation." His heart went out to the children as it went out towards all mankind that sought his counsel and his aid. He had overcome the world, in the sense that he had placed above all outward blessings the gift of God in his own soul.

So in our lives do we find true happiness only in serving others. All that constitutes human goodness,—human greatness, in its true sense,—is being unselfish. John Woolman says: "The state in which every motion from the selfish spirit yielded to pure love, I may acknowledge with gratitude is often opened before me, as a pearl to seek after." We stand always between two influences: that of Divine love within, inspiring us to yield self for the help of those who, in some way need our aid; and that of the world without, that tempts us to make all things subservient to our own comfort and convenience. True and lasting happiness follows the former course only. The Divine love in us prompts us to put aside envy and vanity and self-conceit, and to put in their place charity, humility, and loving kindness. The Christ-spirit is ever striving within us to lead out of low and base and sordid desires and actions into noble, generous, and pure impulses and deeds. The Comforter is here, "even the Spirit of truth," and each and all of us have known of the blessings of his influence in our lives and characters. Let us trust in this "Spirit of truth," and when it inspires us to acts of self-abnegation, of love and sympathy and charity, let us not resist the heavenly visitant, nor neglect to follow whithersoever he may lead.

It is possible, when the future is dim, when our depressed faculties can form no bright ideas of the perfection and happiness of a better world,—it is possible still to cling to the conviction of God's merciful purpose towards his creatures, of his parental goodness even in suffering; still to feel that the path of duty, though trodden with a heavy heart, leads to peace; still to be true to conscience; still to do our work, to resist temptation, to be useful, though with diminished energy, to give up our wills when we cannot rejoice under God's mysterious providence. In this patient, though uncheered obedience, we become prepared for light. The soul gathers force.—*Channing.*

For Friends' Intelligencer and Journal.

CONSIDERATION.

AN exclamation uttered by the Almighty through his inspired penman is as imperative now as when it came to arouse to a consideration of duty and thoughtfulness: "O, that my people were wise, . . . that they would consider their latter end!"—that in the midst of the many claims for time, means, and mental ability, it be remembered that all that is changeable must come to an end, and life itself be given up with a full confession of how we have used the talents bestowed. Have we honored the Giver, or hid them away to moulder, instead of cheerfully presenting them as we ought with joy, or do we complain of our Benefactor as expecting more than he ought, when in fact ourselves are in fault? "To every one was given according to their several ability." Can we marvel at the exclamation, "O, that my people were wise!" Wilt thou, O God, forgive the weakness of humanity!

There is no time
For us to repine,
So much around us to bless;
Let us watch and pray
Each passing day,
And leave to God the rest.

He knows our need,
And has sown the seed
That will bring a rich supply;
When our part is done,
The prize is won,
For on Him we may rely.

A power divine
Will ever shine
Through Bethlehem's star.
Look when we may
The light of day
Is not afar.

SARAH HUNT.

From The Friend, (London).

HAS THE WORLD CHANGED? OR HAVE WE?

ARE the doctrines of the Society of Friends changed? We cannot deny that our practices have; there is but slight, if any, actual barrier between ourselves and the world. Has the world then changed for the better to so great an extent that our protest is no longer needed against the life and conduct which in time past we condemned? Our lives should be consistent, and we should still withhold our countenance from indulgences and habits which in themselves are even questionable, and in their effects lowering to the tone of society. Once we set our faces against the stage; the same stage many of our members now encourage by attending and by imitation. If we were right then in raising our protest against the debasing effect of participation in the life of the theatre, we must have lowered our own standard now, and our lives must be out of harmony with our true knowledge.

It is said we must encourage to elevate; but encouragement is of the thing which is, not which is to be. It is useless to admonish whilst we condone.

A tradesman has our support so long as we give him our custom; the support is of the man and his goods as they are. I do not ask what the possibilities of the stage may be; but I do say that we shall not help to purify by supporting what is admittedly impure in tendency.¹

Dancing we once thought at least questionable; is it less so now? The test of our lives is not hard. Are we doing that which is for the good of others? or are we doing that which, if followed by others, would lead in ever so slight a degree from the right path? We strive to be "liberal-minded" and "broad;" we must use care in the interpretation of these words. Christ says, "the broad road leadeth to destruction," the strait to eternal life; surely meaning the broad and easy road of conformity to custom contrasted with the more difficult one of self denial and care in choosing our path. Let us take the broad view, the true broad view of life which has for its foundation love to God and our fellow-men, love which will make easy a walk by following which our brother may not stumble or be made weak.

For those of us who are business men the need of a blameless life is great, and our influence for good or evil boundless. Let us be honest in word and deed, and do all in the name and to the glory of God. Once we were advised to avoid the spirit of speculation. Now some of us are speculators; engaged in business where artificial fluctuations of price are allowed, and where, very largely, the ignorance of one is taken advantage of by the supposed more perfect knowledge of the other. Should we treat our brother thus? We want to regard all men as our brothers, to love our neighbor as ourselves, and again do ALL in the name and to the glory of God, remembering that his guidance and love are more to us than all worldly advantage. "What shall it profit a man if he gain the whole world and lose his own soul? or what shall a man give in exchange for his soul?" "Let us hear the conclusion of the whole matter, Fear God and keep his commandments, for this is the whole duty of man. For God shall bring every work unto judgment with every secret thing, whether it be good or whether it be evil."—*M. J. Adams.*

THERE never yet was a woman so gifted, wealthy, beautiful, or high in a social position that she was not marred by a cold, distant, and supercilious bearing. There are so many sorrowful things in life, there are so many hurts and wounds for all of us, it seems to me that every woman ought to cultivate a sweet manner and a kindly glance. It costs nothing, and, like a ray of sunlight it warms and strengthens many a frost-bitten life whereon it falls. The truly great are never arrogant or cold, but modest and kind in demeanor; while the unworthy and presumptuous often assume an air of supercilious disdain to hide natural deficiencies.—*Ella Wheeler Wilcox.*

¹ To those who are, however indirectly, supporting the stage I would say: Ascertain now the condition of its employes and ask yourselves whether the life is one you would willingly see your own sisters engaged in.

PROGRESS AND CONSERVATISM.

WHATEVER may be said of the freedom of the will, we generally accept as true the views and opinions held by those with whom we associate when we begin to think and reason for ourselves. There is in the home and social life into which we are born, a certain atmosphere that has an influence no outside pressure can entirely overcome; the home usages,—the books that are read, the conversation that we listen to in the familiar intercourse of the family,—are all factors in shaping and giving permanence to the operations of the mind through which character is developed and the will and understanding made effective. As we come into active participation in the affairs of the world there is always a tendency to unite with those whose views harmonize with our own, a leaning towards if not an advocacy of that line of thought or action involved, which offers the fewest obstacles to our investigations. An idea may be presented that has never claimed our attention, but has a significant bearing upon human welfare and is capable of varied interpretations as to its utility and application. It may be a new thought, the outgrowth of some new development in the world's progress, and we, by the very pressure that is brought to bear, are taking sides. It is such a crisis that gives the bias to our future and becomes the turning point that places us in the advance guard of possibilities, or leaves us to take counsel of our fears and to find no safety except along the road that has been worn into ruts by ages of uncertain progress.

In religion, in civil government, and in all those questions that have a bearing upon the present and future welfare of the race, there are very few of whom it can be said they are free from the trammels of tradition; few indeed who can so far divest themselves of every consideration of partisan feeling and affiliation as to think and act under the influence of that principle which having examined without prejudice is prepared to stand for what has been found worthy of acceptance, without fear or favor.

The emancipation of the mind from the fetters of usage and from the dominance of authority in what pertains to its higher interests has been slow, and men still look to expediency as the safe refuge when questions of reform are pressed upon their attention.

It is so easy to move along with the current of popular thought and save ourselves the labor of investigation, we forget sometimes that the ground we occupy is only tentative; new openings into which duty and opportunity are leading us must be accepted not in the oldness of past conditions, but in the fresh significance of present need. The limit of progress at one period marks the starting point for the next advance; and thus from stage to stage we are "leaving the things that are behind"—things that might be as ruts and obstructions in our future journeyings.

The Great Teacher, when he said men do not put the new wine into the old bottles, illustrated the same truth. We cannot keep pace with the world's advancement while we cling to that which is passing away. There is a conservatism that does not obstruct or hinder, but is patient and forbearing and admits of progress; and there is a conservatism that will have nothing which is not established by precedent, that holds the former times as better than the present, the first is not far behind the advance guard, while the latter flounder in the ruts their own fears have worn and see only loss and disaster in every new adventure that is undertaken. Yet the world moves, and willing or otherwise, we are all borne along with the resistless current.

MARRIAGES.

MCVAUGH—WEBSTER.—At the residence of the bride's mother, in Upper Dublin, Montgomery county, Pa., Twelfth month 18th, 1888, with the approbation of Hiram Monthly Meeting, Levi F. McVaugh, son of Hiram and Jane McVaugh, and Annie Webster, daughter of Isabella E. and the late Aaron D. Webster.

DEATHS.

ALLEN.—In Philadelphia, on the morning of Third month 2d, 1889, of apoplexy, after a brief illness, Samuel Allen, in his 76th year; a member of the Monthly Meeting of Friends held at Green street.

BURROUGH.—At the residence of her son Edward, near Merchantville, N. J., Second month 25th, 1889, Mary H., widow of Joseph A. Burrough, in her 81st year.

HICKS.—Second month 26th, Evan P. Hicks, in his 74th year; a valued member of the Monthly Meeting of Friends held at Green street, Philadelphia.

JANNEY.—In Philadelphia, Second month 5th, 1889, Emily S., wife of Robert M. Janney, and daughter of William C. and Emily B. Smyth.

LOVERTING.—At Blythwood, near Germantown, Third month 2d, 1889, Edgar Lea, son of Mary B. C., and the late Joseph S. Lovering, Jr., in his 15th year; a member of the Monthly Meeting of Friends of Philadelphia.

MARTINDALE.—Second month 17th, 1889, in Newtown, Bucks county, Pa., suddenly, of heart failure, Cynthia, wife of Wallace Martindale, in the 51st year of her age. It can truly be said of this dear friend, "None knew her but to love her, none named her but to praise."

RITTENHOUSE.—At Germantown, suddenly, on Third month 2d, 1889, Naomi, widow of Jonathan Rittenhouse, and daughter of the late Mahlon Murphy, in her 74th

year; an elder of Germantown Preparative and Green Street Monthly Meetings.

TRUMP.—At Millwood, Baltimore county, Md., on Sixth-day, Third month 1st, 1889, Charles Trump, in his 82d year, a member of Baltimore Monthly Meeting; son of the late Michael Trump of Philadelphia.

WALTON.—At her residence with her sisters, Mary and Martha Beas, on the evening of Second month 28th, 1889, Rachel B., widow of Thornton Walton, in her 80th year; a member of the Monthly Meeting of Friends held at Green street, Philadelphia.

WARDER.—Suddenly, Second month 27th, 1889, John H. Warder, in his 68th year, son of the late John H. and Eleonor Warder; for several years an attendant of Race Street and Girard Avenue Meetings.

WIDDIFIELD.—Second month 23d, 1889, at his residence, 50 Charles street, New York city, Samuel Widdifield, in his 90th year. He was a member and very regular attendant of New York Meeting; for many years his seat was seldom vacant.

NEWS OF FRIENDS.

BLUE RIVER QUARTERLY MEETING.

DWELLERS in cities and wooded regions can have but a faint conception of the force and power of the wind, sweeping over our western prairies portions of which are entirely barren of tree or bush to break its effects, and therefore can hardly be expected to sympathize in full with the difficulties of those who are obliged to face its disagreeableness and fury in order to attend their meetings. I speak not now of those dreaded cyclones, which, at intervals, burst upon an ill-fated section, carrying everything before them, leaving ruin and devastation in their rear, but of our common winds, which at times are so strong as to penetrate through all the wraps one can well wear, piercing, as it were, the very bones, and chilling the marrow of the individual. Such was the experience of the few who ventured forth to attend Blue River Quarterly Meeting for ministers and elders, at Benjaminville, Ill., the afternoon of the 23d of 2d month, in which were represented by person, but two subordinate meetings; the other four composing it sending their reports by mail. The meeting was very small. We were reminded that without individual development, there could be no collective power; therefore to secure this power, each one must be willing to use his faculties and to be used in his Master's cause in order to witness a growth in that which is good. A short communication, expressive of sympathy with one of our little meetings, was directed to be sent to it, and after transacting the routine business, we closed.

On the next day, the general quarterly meeting convened. It also was smaller than common, owing to the inclemency of the weather and the rough roads, but all seemed alive to the object of our assembling. In the business part of the meeting, the statement of the condition of some of our isolated meetings and friends, brought us under a deep concern, which found expression by many, and resulted in the appointment of a large committee to visit these as way might open, and encourage them to continued faithfulness, in the belief that it would

tend to a reawakening in some of a zeal formerly felt but which under difficulties had slumbered for a while.

There are localities not very distant from us, in which are many friendly people, anxious to know of Friends, and to learn of their doctrines, but who are not joined to us by membership; it is in the scope of the duties of this committee to visit such. No special course has been mapped out further than to "mind the Light" in the pursuance of their duties. A new element was introduced in this committee, being the appointment mainly of younger members than are usually assigned to such work, and we hope for much good from this movement.

On First-day, the weather having somewhat moderated, and the sun shining warm and pleasant, many more persons assembled, and the truth as given forth by two of our ministers, was attentively listened to. The mission of John the Baptist was shown not yet to have ended. There are many Johns now, and have been, preaching in the wilderness of the hearts of their hearers, preparing a straight way therein for the Spirit of God to enter, and baptize with fire and the Holy Ghost; but unless we are willing for this, it cannot be effected. The character of Paul was also commented on and held up as a bright example, and we were shown that there was nothing to prevent our becoming as good and great as he was, if we were as willing to submit to the guidance of the Divine Spirit as he showed himself to be.

Our usual First-day School Quarterly Conference was omitted at this time, owing to unfavorable weather and bad roads, and although our meetings were smaller in consequence of these latter conditions, all felt that they had been profitable gatherings, and that it was good for us to be there.

E. H. COALE.

Holder, Ill.

THE MEETING AT LINCOLN, NEBRASKA.

FROM a private letter to one of the editors, from a Friend at Lincoln, Nebraska, we extract the following information: No doubt, thou wilt be pleased to learn something of our Friends' meeting. We hold an Executive Meeting at 2 o'clock p. m., on the second Fifth-day in the Second, Fifth, Eighth, and Eleventh months. Last Fifth-day (Second month 14), we had a very interesting and I think profitable meeting. Isaiah Lightner, of Genoa, was with us; (his son and daughter are attending the University here); also Amos Harvey and son, Mary and Emma Shotwell and niece, of Garrison, added to the strength of the meeting. There were twenty-two of our own members present. After the reading of the First, Second, and Eighth Queries and their answers, (we could answer them very clearly), one of our members remarked: "We are too young to have differences. I fondly hope we may also enjoy the present kindly feeling,—or rather that it may mature into a higher condition; for, my dear friends, I do believe we are united in a true brotherly love." We hold our First-day meetings on the second and fourth First-days in every month, but I think we will soon meet every First-day. The time appears long be-

tween our meeting, now; the change is under consideration.

In the Executive meeting, Moses Brinton desired that the Fourth Query might be read, and that we might consider it well. Our Legislature has proposed a Prohibition measure, to be voted on some eighteen months hence, though it is not in a shape fully satisfactory to Temperance workers. It was an appropriate occasion to have the Fourth Query read, and was the means of causing a free expression from our members, who left, I believe, with the determination to use such influence as they could for the promotion of temperance.

MIAMI (OHIO) QUARTERLY MEETING.

Although the weather was unfavorable, the Select Meeting, which met at 2 p. m., on Sixth-day (2d mo. 8), was well attended.

On Seventh-day M. S. was the first speaker. She dwelt upon the beauty of our living silence, showing clearly the difference between it and dead, listless silence, and encouraged all to make sacrifices if necessary to attend all our meetings, telling how she had been strengthened to perform her household duties in good season after attending to the promptings of truth in this matter.

D. F. thought there were two kinds of religion, which he would designate as natural and artificial, endeavoring to show that which comes directly from God to be natural, and that which consisted in the inventions of men, artificial. A sister thought that religion did not come without a struggle and deep heart searchings. Others bore witness to the truth as it was given them.

After the closing of the partition men and women Friends entered upon the business that claimed the attention of the meeting at that time. During a lull in the business a ministering Friend said she felt a concern on her mind for the young, to encourage them to hold fast the faith, nothing wavering even if those they had been looking to as bright examples had stepped aside, etc. This encouraged a young mother present to tell how she was surrounded by her little ones away from Friends, no meeting near but one of another denomination. Lately a number had joined it, and she had thought of doing so, but these words always came up: "I am a Friend." Much encouragement was given her.

At the close of the meeting the Philanthropic Committee met to consider what action we should take with respect to the Blair Bill in relation to Sabbath observance, and teaching "the principles of the Christian religion" in the public schools. The meeting was invited to sit with them, which it did. Although the meeting was long it was felt to be a favored season. W. C. Starr, of Richmond, was in attendance.

On First-day D. F. said the Society of Friends was often accused of denying the Divinity of Jesus Christ, and he explained clearly that that was an unjust charge. Other living testimonies were handed forth, and the meeting closed under a solemn sense of our dependence upon the Father and Master of all.

B.

FRIENDS IN CANADA.

A Friend of Yarmouth, Ontario, in a private letter, says: "Our Half-Yearly Meeting was held at Lobo about two weeks ago. Isaac Wilson was there; he came to Yarmouth to attend the funeral of John Minard's mother, who was one hundred years, six months, and three days old. She was sick about two weeks. Isaac gave us a good sermon on practical religion.

"To-day was our preparative meeting; twenty persons present, a large meeting for the middle of the week. The different monthly meetings of Genesee Yearly Meetings are writing to their isolated members; we have received a number of replies. Some have joined other denominations and do not wish to retain their rights of membership, while others feel that they will always continue to be Friends, even if they are far away from any meeting."

"We have had a very mild winter with only a few days very cold. Last First-day, Second month, 24th, was the coldest, the thermometer at 18 to 22 degrees below zero. We have had good sleighing for five weeks."

—Bucks Quarterly meeting, held at Wrightstown, Second month 28th, was well attended, although not so large as it usually has been. Very few strangers or Friends from the neighboring quarters were present. Ellison Newport was the first to break the silence in a short exhortation. He was followed by Robert Hatton in a long and interesting communication on the importance of Friends maintaining the original principles of our profession. After he sat down Elizabeth H. Plummer appeared in fervent vocal supplication. The first meeting closed under a comfortable feeling, and the usual business of the reading and answering all the queries was proceeded with.

After uniting with the summary answers as prepared by the clerk, appointing representatives to the Yearly Meeting, and the reports of the different committees appointed at last quarter,—a Friend arose and called the attention of the individual members to the importance of the vote that is soon to be taken in Pennsylvania on an amendment to the constitution of the State. The matter created a lively interest and a minute was made encouraging all who had a right to vote to use their influence in favor of the adoption of the amendment. The minute was read and united with, but way did not open to forward a copy of it to the yearly meeting,—as it was thought the subject would claim the attention of that body without its being forwarded from Bucks Quarter.

E.

The following is an extract from an essay read at a recent conference of church women of the (Episcopal) Diocese of Pennsylvania:

"When we look upon the extravagance and superfluity which the flood-tide of fashion and worldliness has brought upon their votaries, especially in the matter of dress,—that idol of the age,—we can hardly avoid the plaintive query: Is this the purpose end of our creation? even to sport our airy season, like the butterfly, and then be seen no more?"

We can but marvel how sensible women, setting aside the precepts of Holy Scripture and the restraints of religion, such as 'Be not comformed to this world,' 'Let not your adorning be the outward adorning,' etc., can swim with the current of this world in its ostentation, its paraphernalia, its vain compliance, and thus also set such example for the young to follow, with any degree of consistency or due appreciation of the accountability we lie under for the talent of influence committed by an omniscient and just Judge."

For Friends' Intelligencer and Journal.

CALIFORNIA, ONCE MORE.

DREAMS of the resplendant Occident have haunted me for one whole year, and visions of yet unexplored regions of semi-tropical brilliancy, so tempted my restless feet to wandering, that I have come again to where the sun dips its gold into the blue waters of the Pacific, thoroughly equipped for journeying whithersoever the paths may lead, even be it seaward, through the open portals of the Golden Gate.

Happily we arrived in Oakland when the skies were fair, for this is California's rainy season, and we were prepared for storms and dense fogs, which we were told awaited us; but these all had passed away, and the glad sun looked down upon fresh, green grass, luxuriant foliage, beds of blooming plants, clambering vines, and hedges of creamy callas, lifting their golden-scented goblets from dark, shining leaves. These refreshing sights greeted us, as we drove to the Windsor Hotel, and after luncheon, feeling no sense of weariness from our transit across the dreary wastes of desert land, we go over the ferry to "Frisco," and thence to Chinatown, for this interesting vicinity has not yet been explored by some of our party.

One square up Nob-Hill from Kerney St., and near the noblest part of the city, lands us in our desired haven. So dense is the population here,—for they say there are twenty thousand Chinamen in San Francisco alone,—and so foreign in appearance is everything that meets the eye, that it requires no great stretch of the imagination to believe we had been suddenly transported to the home of the unloved celestials, and that we were breathing the atmosphere of another clime. Free and unmolested in this miniature China, set down in the very heart of the city, contiguous to the centre of business and trade, where by thrift and industry many have accumulated wealth, is it marvelous at all that the almond-eyed Mongolian presents such a calm, contented exterior?

Chinese business life here is a study and easily accessible, as much of the trading is done in the open air. Through the door ajar we see him at his desk, spectacles on nose, running up and down the perpendicular rows of queer characters; his broad smile an "how do" welcome you into his shop, gorgeous with the display of his wares. Richly embroidered silks and banners, choice designs in bronze, satsuma, and cloissoné, fine carvings in ivory and wood, and rare China and articles of vertu, dear to the heart of

the æsthetic tourist, meet the admiring gaze. Perhaps next door to all this, is a frontless butcher shop revealing the conglomerate contents. Conspicuous hangs the carcass of the coveted roast pig, reeking with grease, and along side of it the flesh of beast, bird and fish, and sausages of questionable composition, calculated to inspire disgust in the gastronomical economy of an American. The most curious of all are the ducks and other water-fowl, flattened out to the consistency of a griddle cake, apparently boneless and almost transparent, though retaining their original shape. Through what process these have passed, is difficult to conjecture. A little further on a greengrocer holds the fort on a steep pair of cellar steps, his head reaching a little above the landing. Around him, within reach, on the side-walk, are tubs and buckets of beans with very long yellow sprouts, other vegetables and queer shaped roots, and potatoes of Chinese growth, entirely unknown to us. Besides these are delicacies in the shape of chopped meats done up in dainty little cornucopias trimmed with parsley, square cakes of boiled rice of a bright canary color, and other choice bits for the fastidious taste of the native.

We push on through crowds of Chinamen of all sizes, ages, and positions, from the high caste, with his long gown of brocade or velvet, and ornaments to designate his rank, to the indigent coolie cobbler, old, withered, and almost blind, who sits on the sidewalk mending the curious shoes. We notice but few women, and these present a very strange appearance. Their shiny black hair is plastered down with grease, and secured at the back of the head with ornamental pins, and their cheeks are painted vermilion. They wear black silk short gowns and red or blue trousers, and go shuffling along on their uncomfortable shoes with thick wooden soles rounded boat-shape under the middle of the foot. As we look down the narrow streets, they are gay with Chinese lanterns and flags which are hanging as far as we can see.

The buildings are painted in bright colors, and the principal restaurant, with its roof curving upward, is of a light pea green with fanciful ornamentation in front. We go up a flight of stairs and into the various dining and breakfast-rooms, where are round tables of dark mahogany-looking wood and solid, square stools. One table was laid ready for guests, and we inspected the contents of the various little china bowls arranged over the table. There were sweet pickles cut in shapes, nuts and cheese, sweetmeats of Chinese manufacture, sprouted beans, and glacé fruits, some trimmed with colored papers and made attractive. Two small odd-shaped bowls of china, and a large china spoon were at each place—but no chop sticks. In some of the less pretentious rooms,—evidently for private parties,—were small round tables, and immense chairs of solid wood elegantly carved, and upholstered in gold embroidery. Chinese lanterns and crystal chandeliers of home manufacture were suspended from the ceiling in great variety, and when lighted must produce a brilliant effect.

But we must see a Joss House. Our explorations are not complete unless this part of Chinatown yield

up its sacred mysteries. We had interrogated several denizens without satisfaction as to its locality, when we ran across one who smilingly consented to conduct us. Him we followed up a steep, narrow street, when suddenly he turned into a dirty alley-way leading to the rear of a large old building. We paused at the entrance and shook our heads as he looked back and beckoned us on; and seeming amused at our timidity, he returned and left us standing—questioning the propriety of risking ourselves in such an uncanny place. A policeman seeing our perplexity stepped up and offered to accompany us. He led us to the front entrance through a dark corridor, up a dingy flight of stairs and into the presence of the holy of holies.

The air was filled with a sweet odor of incense from sticks of sandal wood which were inserted in great bowls and vases of china and brass, and kept constantly burning in front of the altar upon which sat an Idol King with four hideous Josses sitting cross-legged at his feet. A Chinaman in the most exasperating pigeon English endeavored to explain the virtue and power of each Joss, but it was only here and there that we could interpret a sentence. However we caught sufficient to learn their sincerity in the belief they claim to be handed down six thousand years from Confucius. To each Joss is given the power to confer favors of a certain kind, and to grant each individual wish. There is even one who sends good luck to gamblers. He is a small idol standing in a dark recess, who, when in the flesh, cried six days and nights because his mother died. Tiny little casks filled with sticks of bamboo with an inscription on each are shaken up before the idol one appeals to, a stick is drawn out and the inscription referred to the contents of a large book containing the answers.

"Dis once, him full brotbee, he tells tings six tousand years back, he biggee Joss," says John, looking for assent; but we felt dubious. Some of the Josses take the liberty occasionally of absenting themselves from the wood, and go on a visit of weeks. For the purpose of recalling their spiritual parts, a large drum and bell are set up on an easel, and they are struck violently with a mallet, to which they directly respond. This room, devoted to their religious exercises, contained a gorgeous array of offerings to the idols. Magnificent vases of bronze and satsuma, wood carvings all gilded, and representing feats of prowess and brave deeds done in the lives of the Josses, and hangings of richest silks and embroideries,—and all this in America! Surely the missionaries have a field to labor in other than foreign shores. Enough of this atmosphere, filled with ghouls and gnomes, and we seek the pure out-door air under Christian skies.

Again for 'Frisco and sight-seeing. A pass is required to board yon little government steamer; so we go to the headquarters of General Miles, and in the name of Lieut. Noble, of dear old Maryland, obtained the necessary document, which procures an "open sesame" to the *General McDowell*, and we are soon upon deck. Opening a door leading up to the pilot house we ask permission to ride in such a

favored nook, and the gray haired, good natured German, Capt. Stoefer, bids us enter. We ascend the steps leading from his little den, and stand beside the great wheel by which the boat is steered.

Pulling out from the pier we thread our way amid ships and steamers and tiny water craft until the open bay is reached, with San Francisco in the background, so awkwardly situated. Up the sides of the steep hills the houses have crept, until reaching the summit they seemingly have tumbled and been piled into the ravine between,—great masses of frame buildings, once painted drab but smoked and dirty and dismal. We ask what law or fiat controls the founding of cities that many of their sites are so ill chosen. Perhaps we will forgive all when we remember the outlook into the harbor, and over the glittering waters of the matchless bay, with its fortified islands, rising green and velvet clad from the unfathomed depths; its picturesque slopes, dotted with little villas extending to the water's edge, its reach of shore with sun-rosied hills beyond.

We are steering for Black Point, or Mason Island, the residence of General Miles, and the soldiers' headquarters. The Captain reaches for the brass ring overhead, the steam whistle blows hoarsely, he pulls twice the brass hook at the side of the boat, a warning for the engineer to slow up, a big bump against the pier, and the boat stops a few moments for passengers to laud. On we go toward the beautiful island of Alcatraz, and look through the Golden Gate. The Captain points to the spot between the two headlands forming its portals, where so recently two noble ships collided, and one sank beneath the waves. This fortified island rises precipitously from the water's edge in places, its winding roadway overhung with gray rocks, draped and festooned with a wealth of clinging vines and blossoms. Up above, on the plateau, are the rose-embowered homes of the officers. Across the Bay is Angel Island, its little military encampment snug in a cozy nook, with the emerald hills rising back of it, dotted with pines and clumps of live oaks, making a picture for an artist's eye. Here we see a squad of prisoners—deserters from the army—marching down the steep road under guard. They come on board and lounge unconcernedly on the deck. The steamer lands them at Precidio, where an officer halts each one as he passes up to his jail, and examines him that no weapons or contraband articles are concealed on his person.

After a delightful cruise of about two hours we head for the pier, passing great ocean steamers at anchor, loaded, perhaps, with rich cargoes from foreign shores. The golden rays no longer shimmer on the placid waters which now partake of varying tints of gray and blue shading into amber tints, caught in the after glow. The sails from phantom-like ships, afar, peer through the soft blue haze settling over the bay, and enwrapping the dim "city by the sea." The shadows silently creep toward sunset, the chilling sea breezes sweep from the outer ocean, and we draw our wraps about us and cross the ferry to Oakland.

Oakland is a picturesque little city of about fifty thousand inhabitants. It wears a brisk, businesslike

air. The bell one hears tolling regularly every half hour, is that of the local train owned by the Southern Pacific R. R. Company, and running to and from the ferry, free to all citizens. The street car lines run in various directions, leading to Piedmont, and other points in the attractive suburbs of the city. The climate of Oakland is finer than that of San Francisco, being more sheltered from the ocean winds. Clothing of about the same warmth is worn throughout the whole year. One dresses according to the condition of his blood. As I write, a lady passes by muffled up in sealskins, another follows in her wake habited in a spring dress and wrapless. A young girl trips by wearing a white dress, over which is a heavy cloak. It is a constant panorama of incongruities; each consults his or her own individual feelings—regardless of the calendar or mercury. How enjoyable to live in the atmosphere of such sublime independence!

THE LIBRARY.

ANSON D. F. RANDOLPH & Co., New York, announce the immediate issue of a new edition of a work long well-known to religious readers. The title is: "The Imitation of Christ, and the three following Books. Now for the first time faithfully rendered in rhyme, after the manner in which they were written by Thomas Kempis."

In connection with this announcement, the publishers make the following statement: "It has been reserved for this century to discover that the form in which the 'Imitation' has been published hitherto is misleading, inexact, and quite inadequate to represent the charm of the original. It was not written, as is known to many students, in simple prose, but in a rhythm, more or less exact. That some of Kempis's contemporaries were acquainted with the rhythmic form of the work, is shown by a MS. of the 'Imitation' at Brussels, which was written soon after Thomas Kempis's death. Dr. Hirsche, of Hamburg, who has spent a quarter of a century in the study of the work, has discovered that by a system of punctuation, which is rigidly adhered to, that throughout the four divisions of the treatise (with the exception of a few chapters in Book III.), this rhythm is actually pointed out for the learner. Dr. H. has published an edition of the 14th MS. from Thomas's own handwriting, in which the author's text is fully and faithfully reproduced. It is with the help of that edition, with aid drawn from other sources, that the present translation has been made. The writer of the treatise is here called by his proper name, Thomas Kempis. Whether the *à*, as heretofore used, be looked upon as Latin or French, it is incorrect."

"The importance of fidelity in small things is seen in the fact that small occasions are coming continually, while great ones seldom occur. Thus our education in faithfulness will depend not so much on our doing right on great occasions, as in the small but frequent tests of daily life. It is these which educate us to good or evil."

SWARTHMORE NOTES.

MYRTLE E. FURMAN, B. O., Assistant Professor of Eloquence, has offered a gold medal to the members of the Senior Class who shall do best in an oratorical contest which she proposes to hold in Fifth month. There are now prizes for oratory in all four of the college classes; the Furman prize for the Seniors, the *Phoenix* prizes for the Juniors, and the Magill prizes for the Sophomores and Freshmen.

—Professor Appleton is now delivering his course of lectures on English, at Moorestown, N. J.

—Daniel D. Wright, of New York City, has presented the college with a valuable painting for the historical collection in the Anson Lapham repository. The picture, which was executed by an aged Friend in the neighborhood, represents the last of the three great oaks, under which George Fox preached when he visited the site of Flushing, Long Island, in 1672. It was the intention to have held the meeting in a small meeting-house near by, a glimpse of which is shown in the picture, but such a number came that George went out under the trees and there addressed a great multitude. The trees all stood until the present century, and the last did not disappear until 1870.

—Thomas Donaldson, a Philadelphia lawyer with considerable reputation as an orator, lectures in the college hall on Fifth-day evening, on "Sir Walter Raleigh." The lectures come under the auspices of one of the literary societies, and his address will be free to students and visitors.

—President Magill has received letters from about twenty colleges in the State endorsing his movement toward securing a change in the educational laws.

—The Freshmen, following the example of the Class of '91, propose holding class sports this spring. Medals will probably be given in cases where the record made exceeds '91's records.

—The presidents of Michigan University, Cornell, Princeton, Johns Hopkins, and Swarthmore have been invited to write articles on the educational value of examinations, for the Third Month number of the *Nineteenth Century*. (London).

If a man fills his place in this world, other people will know it, whether *he* knows it or not. If he does not fill his place, other people will know it, whether he realizes it or not. The first thing he has to attend to, is to fill his place as well as he can. The last thing he ought to trouble himself about, is other people's estimate of his success in his endeavors. A man can never win a good name by worrying over his supposed lack of deserved reputation. He can never lose reputation by failing to give it his personal attention while doing that which he is set to do.—*Selected*.

I HAVE always been thinking of the different ways in which Christianity is taught, and whenever I find one way that makes it a wider blessing than any other, I cling to that as the truest—I mean that which takes in the most good of all kinds, and brings in the most people as sharers in it.—*Selected*.

HAPPY THE MAN.

HAPPY the man who in some rural glade
Contented dwells nor of its confines tires;
The rich, sweet-smelling soil upturning with his
spade
Where the dark earth, with little toil, is made
To yield sufficient for his few desires.

The rush and turmoil of the greedy town,
Its sin and pride and shame, to him unknown;
Nor beggar's whine, nor surly mammon's frown;
Nor crack-voiced vendors crying up and down,
Nor drunkard's oath, nor ruined virtue's moan.

Instead, the morning pulsing full with life,
O'erflooded with the varied songs of birds;
The pure, fresh air with scents of flowers rise—
Nor discord here; nor sound of sordid strife,
But eloquence without disturbing words.

With swelling breast he roams the dewy meads,
The meanest flow'r his joy and tender care;
The winds that, murmur'ing, stir the tangled reeds,
Fit orchestra adapted to the needs
Of Nature's drama acted for him there.

For him the peace of close converse with God.
To him the door of nature opens wide;
The woods, the hills, the daisy-spangled sod,
He loves them all—where others blindly trod
He moves serene—his being satisfied.

Amid such scenes his gentle life is passed,
The ward of Wisdom, learning what is best;
His creed to love, his church the vaulted vast,
In contemplation richest at the last—
He falls asleep upon a kindly breast.

—Charles E. Banks, in *Arkansas Traveler*.

THE LESSON OF THE BIRDS.

WHAT do the birds do when the winter nearth,
And dead leaves drop downward, and every bough is
bare,
And the pools are ice-crusted, and he who listens heareth
The rustle of the snow-wings in the upper air?

Oh! the birds they are brave; their fine pervasive senses
Discern the distant warmth and balm beyond the frost
and sting;
The old ones tell the young ones in secret conferences,
And the young ones learn the lesson, and trust in the
spring.

In the close pine coverts they crowd for protection,—
The left-behind who cling to home and will not south-
ward go.
They know the hardy berry-beds, and need no direction
To seek out drinking-basins in the half-melted snow.

When the sunshine warms the world, the birds rehearse
their singing;
Low trills and twitters break the quiet of the woods.
And while spring is yet a long way off, they see her, and
come winging,
Blue-bird and thrush and robin in joyous brotherhoods.

Teach us your lesson, dear birds, of bright endurance,
To face the cold and face the gloom, and bravely wait
and sing,

And trust the Love that never fails, in confident assurance
That out of winter's deepest drifts shall bloom the spring!

—Susan Coolidge, in *S. S. Times*.

A SWEETER SONG.

THERE never was a life so pure and bright,
But had a care;
As there will float, the fairest starlit night,
Clouds here and there.
Yet passing clouds obscure no one star long,
But drift away;
To-morrow you may sing a sweeter song,
If sad to-day.

HARRY DAVID.

For Friends' Intelligencer and Journal.

"MAUMMA": A SKETCH OF THE SOUTH
BEFORE THE WAR.

(Continued from last week.)

THIS was midwinter and spring, summer, autumn
came and went, without any tidings.

We were back on the plantation for another
winter when on our way home to dinner one day
in company with our governess, we spied the mail-boy
from town on his return across field. Now for a
race, and my pony as swiftest won. "Any letters
Abel?" He held up a batch, and there was this for
me:

TALLAHASSEE, Fla., December 21, 18—

Dear Daughter: I'm in great distress. Old man Jack
and me. We are in jail. They do say 'tis for debt. I
don't know how that was. But here we are, and both bad
off. They say he will die. I'm better'n I was, thank
God! 'Twas rumattis and I'm still cripple, and painfull,
though up and about. I don't count that though. What
frets me is my sweet young mistis and them pore little
ones, nobody to look after them and they all ailing! Flor-
ida does not agree with them, and so young master had
to seek another place; and while he was gone a man came,
and seized old man Jack, and me, the only two left with
them to mind them. I know they miss me. If I could
get but a word of them, I'd feel easier. O, do, dear daugh-
ter, write quick just a word of comfort. Maybe you can
find out something about them? I pray God take care of
them. Who else is there to do it.

Write quick to your loving

MAUMMA.

Miss Mary ———, Charleston, S. C.

I ran with the letter in search of my father, who
went with it to town to consult an able lawyer. After
some unavoidable delay the pitiful wretch who had
done this to cover some petty debt, was brought to
terms, and these two faithful attendants were removed
from jail. That is "Maumma" was given up by him.
Death had forestalled him as regards the old freed-
man, "Jack."

We could gather no tidings of Mrs. S. Neigh-
bors were few and far apart in that section, and no-
thing certain came in reply to us. Probably the
harsh creditor had alarmed her, and the removal of
her humble guardians had intensified her fright.
Perhaps she had gone to follow after her husband?

After a while a letter from Tallahassee again
reached us. "Maumma" had left, declaring her pur-
pose to hunt for her mistress. "She would go, if she
died on the way," wrote this scribe. "She had some
savings on hand, she said, and go she would. Ma
told her 'twas a wild goose chase and nothing else,
and be sure some scoundrels would pounce on her
munny, if not her; and she'd better stay with us.

She could make sure of shelter and good vittles at any rate, which was better'n roving round the world, but go she would.

"She is a rare good old woman, father says, though she is a nigger. I used to love to hear her talk, and when she left I promised her to write, and so I do now though it's rather late. She's been gone over a month, but you see I have to go to school, and do chores besides when I come home, and learn my lessons, too.

"But I've redd up everything in time to-day on purpose to keep my promise and so I tell Miss Mary she thought a heap of you 'Daughter'—that's her name, her nickname with them all at home,—says she does this, and daughter does that, was her cry all the time she'd be talking to me, and when she was going her last word was for daughter. Tell her God bless her, and all she loves."

There was a long interval of silence again. Then came a letter direct from her. She was in safety with her guardian. But not until after a "good piece and much wandering" Mrs. S. had indeed hurried off by stealth after her husband. "Maumma" had returned at once to the place deserted by them, and lingered there sometime trying to discover whither they had fled. Then she had returned to Tallahassee, as it seemed by inspiration, for there too, almost upon her heels, came Mr. S. as, even in her panic, his wife had first written to tell him what had happened, and hurrying back to meet her and the children, he had lost only such time as was needful in securing them comfortable lodgings, ere he retraced his way back to Florida to recover his servants.

This letter was dated from "Port Lavaca." There it was likely that they would "tarry" some months, until "young master" could "fix" upon some suitable place for his new home—most likely farther westward.

It was long before he did seem able to "fix." Once cut loose from his native State the spirit of restlessness seemed to possess him. He was not penniless though an adventurer; so that with some capital, small as it was, and with youth, education, no little business talent, and energy, to cast off the depressing past, he went resolutely facing the future and sounding his chances to "better fortune."

Still, as the "rolling stone gathers no moss" it was long before we got hopeful news of them, as "fixed."

At last he planted his stakes, and like magic gathered comforts around him; but hey, ho, presto! all was gone, and, like the Arab, he was off again in search of another home. Thus, though hearing at intervals from "Maumma," we never could feel sure of her surroundings.

By this time I was "grown up," and gone from my island home to that of my husband's, when there came a letter telling me of Mrs. S.'s death.

"She was never strong, and from the time we crossed the borders of South Carolina she began to droop. It seemed like Texas was too wild for such a tender one. It was like we were forever on a sea; driving here and driving there; so different from the way she was raised! She tried to be like herself before Mass R., but when he was away she couldn't

hide it so well. The last blow was the death of her youngest, our baby R. named after his father. That was a year ago, just after we settled here. Then Mass R. himself had to notice how she was fading away. He came in where I was sitting, with the children asleep one evening, and asked me if I didn't notice her a-coughing? Her mother, says he, died in consumption, I believe, and oh, my mind misgives me. I would take her to the springs, but she would never leave the children, and I ain't got money enough to carry all there. So then he begged me to watch her close whenever he had to be away from home, and see that she was more careful of herself. Still she would never let on to me, but once. He was away, and that evening I missed her indoors. I went out, thinking she was at her little boy's grave just close by, and that the dew must be falling and so she'd better come in. But she wasn't there. I found her some ways off from the house, standing looking away off, and talking softly to herself.

"These prairies," says she, "are so lonesome. Nothing to be heard but the rustle of the wind, or the howl of a wolf. Boundless as the sea! but not to compare with it. Far as I look 'tis yet the same. How small, how lost I am in this dreary land! Is it my burying-place too?"

"'Mistress! don't talk that way. You musn't talk that way,' says I, 'Mustn't I?' says she, turning round all quiet and smiling on me. "Yet I do feel that way very often; and since you've overheard me, let me say, once for all, that I know my time is short. When I am gone your master will grieve. Be good to him as you've always been. Then he can marry again. But what will my little girls do without a mother? You must be everything to them. Promise me now, right here, never, never to leave them?" I was too full to speak, but I wrapped the shawl I had brought out around her and I felt her as cold as a stone. "No," says she, "I will not go in till you give me your word as I ask you; and then I know it'll be kept." After this she kept up bravely to the last. She had always given up part of every day to teaching the children. One morning she kissed them and sent them out to play much earlier than usual, and said she must go lie down awhile. I helped her into her chamber and covered her over, then sat close by. Soon she bade me send Mass R. to her, for says she, "I think my time is out." I sent him in. Presently he called to me to bring the children in. She was white, but smiling up in his face as peaceful as ever I saw anybody, and so took leave of us. Her last word to me was, "Your promise, Maumma."

"She had her husband's promise also to take the best chances for her children's learning more than they could get here. So now, as Mass R.'s got a kind offer from Mr. — to give them a home with him in Charleston, if their father can manage to pay their schooling, I have hopes of seeing you once more, dear daughter, for we are already on our way; and so I get the kind lady of the house where we are put-up at present, to write this for me."

"We?" She herself at that advanced age was on her way with these helpless charges! Gladly did I

bail the assurance of her safe arrival; it seemed to me almost a reckless act in Mr. S. to send those three girls with only an old black woman on such a journey as it then was. She called them her "parairie flowers," and three lovely ones they were.

Jessie, the second sister, was the most like her mother, but not half so beautiful; though very fair and with blue eyes and golden locks, and a sweet smile. Little Constance, just ten years old, a merry romp of sturdier build, with hair, eyes and skin almost gypsy-like. Isabel, the eldest, a blended likeness of both parents was the most beautiful. She was also charmingly *naïve*. On my first visit to them, while the other two eyed me shyly, she fixed her large, hazel eyes upon me, watching me narrowly.

"Maumma" spoke her rebuke in an under tone. "How can I help it?" she replied aloud. "What, my dear?" I asked.

"Maumma tells me it is not polite to stare at you, but I can't help it."

"Why not?"

"Because she has held you up as my pattern all my life."

"Indeed!"

"Yes, it was always, 'Daughter, never did so. Daughter would have been shocked at that.' She used to tell us that even in the making of mud pies, you were nicer than we: for that you, Miss Mary, could manage to keep yourself neater, and took better care of your clothes."

All throughout their sojourn here, "Maumma" jealously guarded these motherless girls; and this at the cost of much discomfort to herself.

[To be concluded]

SIMPLICITY.

WE may test contemporary literature by its conformity to the canon of simplicity; that is, if it has not that, we may conclude that it lacks one essential lasting quality. It may please; it may be ingenious, brilliant even; it may be the fashion of the day, and a fashion that will hold its power of pleasing for half a century, but it will be a fashion. Mannerisms of course will not deceive us, nor extravagances, eccentricities, affectations, nor the straining after effect by the use of coined or far-fetched words and prodigality in adjectives. But, style? Yes, there is such a thing as style, good and bad; and the style should be the writer's own and characteristic of him, as his speech is. But the moment I admire a style for its own sake, a style that attracts my attention so constantly that I say, How good that is! I begin to be suspicious. If it is too good, too pronouncedly good, I fear I shall not like it so well on a second reading. If it comes to stand between me and the thought, or the personality behind the thought, I grow more and more suspicious. Is the book a window, through which I am to see life? Then I cannot have the glass too clear. Is it to affect me like a strain of music? Then I am still more disturbed by any affectations. Is it to produce the effect of a picture? Then I know I want the simplest harmony of color. And I have learned that the most effective word-painting, as it is called, is the simplest. This is true if it is a

question only of present enjoyment. But we may be sure that any piece of literature which attracts only by some trick of style, however it may blaze up for a day and startle the world with its flash, lacks the element of endurance. We do not need much experience to tell us the difference between a lamp and a Roman candle. Even in our day we have seen many reputations flare up, illuminate the sky, and then go out in utter darkness. When we take a proper historical perspective, we see that it is the universal, the simple that lasts.

I am not sure whether simplicity is a matter of nature or of cultivation. Barbarous nature likes display, excessive ornament; and when we have arrived at the nobly simple, the perfect proportion, we are always likely to relapse into the confused and the complicated. The most cultivated men, we know, are the simplest in manners, in taste, in their style. It is a note of some of the purest modern writers that they avoid comparisons, similes, and even too much use of metaphor. But the mass of men are always relapsing into the tawdry and the over-ornamented. It is a characteristic of youth, and it seems also to be a characteristic of over-development. Literature, in any language, has no sooner arrived at the highest vigor of simple expression than it begins to run into prettiness, conceits, over-elaboration. This is a fact which may be verified by studying different periods, from classic literature to our own day.

It is the same with architecture. The classic Greek runs into the excessive elaboration of the Roman period, the Gothic into the flamboyant, and so on. We have had several attacks of architectural measles in this country, which have left the land spotted all over with houses in bad taste. Instead of developing the colonial simplicity on lines of dignity and harmony to modern use, we stuck on the pseudo-classic, we broke out in the Mansard, we broke all up into the whimsicalities of the so-called Queen Anne, without regard to climate or comfort. The eye speedily tires of all these things. It is a positive relief to look at an old colonial mansion, even if it is as plain as a barn. What the eye demands is simple lines, proportion, harmony in mass, dignity; above all, adaptation to use. And what we must have also is individuality in house and in furniture; that makes the city, the village, picturesque and interesting. The highest thing in architecture, as in literature, is the development of individuality in simplicity.—Charles Dudley Warner, in *Atlantic Monthly*.

"Not what the world says we may do, but what we know we ought to do, is the standard of duty for us in our daily conduct. Yet the conflict of conflicts in our mind is just at this point. The world says that we may do a great many things that we know we ought not to do. It is easier to follow the world's counsel than to adhere to our own convictions of right. But if we do right we shall never have cause to regret it; whereas, if we fail to do right, we shall never be without a cause of regret for our failure. And God will approve our right doing, even though all the world should deem us foolish or over-particular."

DEVELOPMENT OF THE ELECTRIC MOTOR.

The dynamo, stripped of its technical details, is a machine for transforming energy. It converts mechanical power into that phase or manifestation of energy which we call electricity. Mechanical power is cheap and the dynamo made electricity cheap. The moment electricity was reduced in cost the electric motor assumed a commercial value. It ceased to be a mere laboratory apparatus and became a practical machine for converting electrical energy back into mechanical power. It is not easy to comprehend the immense importance of this latest evolution of machines and all that it means when we say that we have now joined the steam-engine, the dynamo, and the motor in one. It is as great an improvement as the invention of the steam engine itself. It is not necessary here to enter into the study of the electric motor as a machine. The point to consider is the position of the electric motor as a transformer of energy and its place in the arts, business, transportation, and manufactures. Electric motors are now a regular trade product and can be bought, in a variety of styles and shapes, ready made, precisely as we may buy a steam-engine or a turbine. They are made in a number of sizes, ranging from one-tenth of a horse-power upward. A motor of one-eighth horse-power weighs only fifteen pounds, and measures $7\frac{1}{2} \times 5 \times 3$ inches. It can be placed in any position, right side up, upside down, or affixed sideways to a wall, and will deliver power from its pulley in any required direction. Larger motors occupy more space in proportion; but any motor, whatever its size, can be placed in any position where it rests firmly on its base.

An electric motor will operate in any ordinary temperature and in any climate, provided it is kept dry. It is practically cold—that is, it gives out no injurious heat while at work. Even when running at a very high speed it is safer, so far as mechanical injury is concerned, than any other form of machine or motor. Of its two chief points, the magnets and armature, only the latter is subject to wear and tear, and this wear is confined to the bearings. The energy passing through the magnets appears, so far as our senses show us, to have no effect on the material of the magnets, and they remain practically unchanged through years of service. When not at work the motor is at complete rest, and all cost of maintenance ceases, except the interest and the slight cost of keeping such enduring metals as copper and iron from injury by rust or fire. Added to these advantages is the fact that the electric motor receives its supply of energy through a wire. It is difficult at first to comprehend how much is meant by these simple statements. First we may observe the structure of buildings where power is used. In such buildings the walls and floors must be strong and stiff to resist the jarring and weight of heavy engines and to keep the shafting in line, so that all points of bearing and strains shall be firm and not wasteful of power by an unnecessary friction. With the electric motor, particularly if the power is subdivided among a number of small motors, lighter and cheaper buildings can be used. In place of one large engine in the

basement, with belts and shafting to the upper floors, the engine may be in another building, perhaps a mile away, and the dynamo may transmit its energy through wires branching to every floor or to a hundred motors on one floor. With the electric motor it will be possible to erect, as we must, very tall buildings and have "power to let" on every floor. This will not only cheapen the cost of buildings, but enhance the value of real estate by making it possible to put many power-using tenants under one roof.

The problem now being considered in all our industries is the cost of the conversion of energy. The cost of motive power at the engine or turbine is well known. Can that power be conveyed to other places at a profit? Will cheaper construction, cheaper, better, and more healthful land, and greater safety and convenience pay for the necessary loss of power in conversion by means of motors? There are three conversions with the electric motor, and each entails a loss of power, and thus of money. From reliable data it appears that there is a loss of about 9 per cent. between the prime mover and the dynamo—that is, the dynamo receiving 100 horse power from its prime mover delivers to the conductor only 91 horse-power; the conductor a mile long also entails a loss and delivers to the motor only 81 horse-power; the motor one mile from the engine entails a further loss, so that finally only 71 horse-power is delivered to the machinery. It must be observed that with our present system of mechanical conversion by belts and shafts there is a loss in transmission, and the question is, which is cheaper, the single loss of friction by mechanical transmission or the three losses by the motor? There can be no doubt that for all distances beyond a very few hundred feet the motor is the cheaper. This, at least, seems to be settled: the motor is cheapest the moment the factors of construction, land values, sanitary safety, and security from flood and fire are taken as real parts of the problem. The cable road, indeed, conveys power for a mile or more by means of its traveling belt, yet it is enormously wasteful. The larger part of the power must be consumed in moving the cable, and every turn at street corners involves a loss of power. With a wire there is, so far as can be detected, no loss whatever by bending the wire at a right angle.

To all this we must add in favor of the motor complete escape from the heat, noise, dust, and ashes, and danger from fire that must always accompany the steam-power plant. By far the larger part of the fire losses in manufactures of all kinds springs from fires started by the boilers. With the motor the factory may be removed to a safe distance from all danger. The boiler-house may burn, but the mill need no longer go with it. To the student of social science the electric motor is full of suggestions for the future. If power can be subdivided and conveyed to a distance, why may not our present factory system of labor be ultimately completely changed?—*Chas. Barnard, in The Century.*

"WHAT Christianity needs more than anything else is Christians."—*President Fairbairn.*

NEWS AND OTHER GLEANINGS.

—Speaking of Charles Dudley Warner and his book "My Summer in a Garden," the *Book Buyer*, (New York), says that the garden he afterward sold, and some years ago he bought, in the same part of Hartford, a newer and larger house, which he has practically rebuilt. It stands next door on one side to Harriet Beecher Stowe's, and on another side to Mark Twain's and between the two houses the path shows signs of constant use. The Warner Home, which is marked as much by Mrs. Warner's taste as by her husband's, is distinctively theirs. No other house is like it. The very porch and doorway are an invitation to enter, which all are only too eager to accept, and within it is full of light and comfort and an easy informality both in its appearance and its atmosphere. On the walls hang relics of the journeys about the world, gathered in Nubia, Egypt, Northern Africa, Spain, and all over the Continent of Europe; the portières and rugs are of interesting Oriental workmanship; and whether it is a picture, a bit of china, or porcelain—whatever object takes the eye—the inquirer finds it has a history and associations of its own. Open fireplaces are there, of course, for it was the writer of the "Backlog Studies" who offered the ridiculous picture of an artist putting on canvas "a happy family gathered round a hole in the floor called a register."

—A report upon the divorces granted in this country in the last twenty years has been made by the U. S. Commissioner of Labor, Carroll D. Wright. It shows that in twenty years 328,716 divorces were granted in the United States. Of this number 216,919, or 65 per cent. were granted upon the petitions of wives, and 111,983, or 35 per cent., were granted upon the application of husbands. The greatest number of divorces granted was on the ground of desertion and reaches 38 per cent. of the entire number. Of the remaining, 33,155 were granted on the ground of the wife's unfaithfulness and 28,480 because of the husband's infidelity. The State of Illinois leads in the number granted, 36,072 having been decreed by her courts during this time. Ohio follows with 26,367, Indiana granted 25,193; Michigan, 18,433; Iowa, 16,564; Pennsylvania, 16,020; New York, 15,355; Missouri, 15,278; California, 12,118; Texas, 11,472; Kentucky, 10,248. From 1870 to 1880 the population of the United States increased 29.4 per cent.; the number of divorces, 79 per cent.

—The "French village" near East St. Louis has a population of 800 souls, among whom there are 300 farmers and, it is stated, not one pauper.

—Mollie Fancker, a Brooklyn lady, who has been an invalid nearly all her life, is the Vice-President of a manufacturing company which makes and deals in goods designed for the comfort of sick people. All the meetings of the company are held in the lady's darkened chamber, from which she has not stirred for twenty-three years.—*Exchange*.

—A line of cable cars passing through La Salle street tunnel, in Chicago, is to be lighted by incandescent lamps as the cars enter the tunnel, the current being thrown out as daylight is again reached.

—A building eighteen feet by twenty-two feet and fourteen feet high, made of canvas and paper, and built in sections for convenient transportation, has been made for the Harvard South America astronomical party. A galvanized iron cupola surmounts the structure.

—The *Sanitary News* publishes a warning as to the danger arising from the fact that disease germs are known to be carried by means of postage-stamps and ordinary bank-notes. The habit of moistening adhesive stamps with the saliva affords a good opportunity for the conveyance of

contagion. "We have often seen," says *Science* in commenting on this article, "persons holding change in the mouth for a moment, probably not knowing that disease germs may be carried by this means. Silver money is as bad as paper money."

—A correspondent of the *Boston Journal* writes: "I saw a letter from Mrs. Harriet Beecher Stowe, a few days ago, in which she reports herself as having all her bodily powers perfect, a quite healthy appetite and as enjoying a quiet sleep every night. 'In view of these items,' she writes, 'I am no subject for lamentation; I do not lament over myself.' Further on in the letter she speaks most hopefully of her health, and in a way that makes one forget that this was the woman for whose momentary death the whole world looked less than six months ago. Her letter shows no loss of mental vigor, while the handwriting is firm, with the letters carefully formed."

—Miss Kirkland, who is the author of several valuable books, such as "Six Little Cooks," "Dora's Housekeeping," "Speech and Manners," etc., which were published by Messrs. McClurg & Co., has just sent out through the Fergus Printing Company, Chicago, a paper cover containing a list of 1,000 subjects for composition, intended for the use of both teachers and pupils. They are divided under appropriate headings, and will be found excellent aids in selecting subjects.—*Chicago Paper*.

—The newspapers of January 7 and 15 record the fall of large masses of rocks from the edge of the Horseshoe Falls in the Niagara river. The shape of the falls is considerably altered by the breaking away of these masses, the outline being changed to that of a double horse-shoe, the smaller one of which was caused by the recent displacement. Many are of the opinion that the recession of the cataract is going on at a much more rapid rate than was calculated by Sir Charles Lyell in 1841—the rate of one foot per annum. In Mr. Bakewell's *Geology* the rate is estimated to be three feet per annum.—*The American*.

CURRENT EVENTS.

THE Inauguration of General Benjamin Harrison as President took place on the 4th instant. As usual the ceremony drew a very large number of people, but the day was extremely wet and stormy, so that the great crowds suffered much discomfort. On the following day the President sent to the Senate, (which had been convened in special session), his nominations for his Cabinet as follows: Secretary of State, James G. Blaine, Maine; Treasury, Wm. Windom, Minnesota; War, Redfield Proctor, Vermont; Navy, Benjamin F. Tracy, New York; Interior, John W. Noble, Missouri; Postmaster-General, John Wanamaker, Pennsylvania; Attorney-General, W. H. H. Miller, Indiana; Agriculture, Jeremiah Rusk, Wisconsin.

DISPATCHES from Ecuador, South America, on the 3d instant, report that a sharp shock of earthquake was felt in that country the preceding evening, about 11 o'clock. It lasted about fifteen seconds, and was followed a few minutes later by four other shocks. Shocks were felt at intervals during the night and next day.

It is announced at this writing, (Fourth-day morning), that Isaiah V. Williamson, the venerable philanthropist, was prostrated yesterday morning with heart failure and partial paralysis. Later in the day his condition improved, and at an early hour this morning he was resting easily, having regained consciousness and additional strength.

THE steamer City of New York, at San Francisco, from China and Japan, brings news that relief is now being received from all sides for the great distress in North China, caused by last season's floods, but, nevertheless, it is feared

that many thousands of people will perish in the cold of the winter.

AMONG the measures which died with the Fiftieth Congress was the Oklahoma bill, which remained on the Senate calendar. Some of its provisions were, however, incorporated into the Indian Appropriation bill. No territorial government is established, but an area of land, embracing about six million acres, in the Indian Territory is thrown open to settlement.

THE prosecution of Charles Stewart Parnell and other Irish members of the British House of Commons before a Special Commission, at London, has passed through a very exciting stage within the last fortnight. Certain letters ascribed to Parnell, implicating him in acts of violence, and which he denounced as forgeries, have been very fully ascertained to be such, and they were traced to a man named Pigott, who, upon the disclosure, fled from London to Madrid and there committed suicide. The prosecution is regarded as being substantially broken down.

NOTICES.

* * * A portion of the Committee to visit the branches of Philadelphia Yearly Meeting, will, under the minute of their appointment, attend the monthly meetings at Race street, Third month 20th, 3 p. m.; Spruce street, Third month 21st, 10.30 a. m.; Green street, Third month 21st, 3 p. m.; and the following meetings: Germantown, Third month 22d, 7.30 p. m.; West Philadelphia, Third month 23d, 7.30 p. m.; Frankford, Third month 24th, 10.30 a. m.; Girard Avenue, Third month 24th, 7.30 p. m.; Race street, Third month 25th, 7.30 p. m.

Friends generally are solicited to attend.

* * * A religious meeting will be held at Friends' Home for Children, 4011 Aspen street, West Philadelphia, Third month 10th, 1889, at 3 p. m.

A cordial invitation is extended to all.

* * * The regular meeting of Young Friends' Association will be held in the Parlor at 15th and Race streets, (Philadelphia), on Second-day evening, Third month 11th, at 8 o'clock.

The exercises will consist of the reading of papers prepared for the purpose, including an essay on the Life of Thomas Ellwood, and general discussion thereon.

Association of Friends to Promote the Education of the Colored People of the South.

HOWARD M. JENKINS, Chairman, 921 Arch Street, Phila.

SARAH J. ASH, Secretary, 1717 Vine Street, Phila.

LYDIA A. SCHOFIELD, Correspondent, 1717 Vine St., Phila.

HENRY M. LAING, Treasurer, 30 N. Third St., Phila.

EXECUTIVE COMMITTEE—Edward H. Magill, Swarthmore, Pa.; Sarah H. Peirce, Philadelphia; George L. Maris, West Chester, Pa.; Mary Ann Fulton, Wilmington, Del.; Amos Hillborn, Philadelphia; Alfred Paschall Doylestown, Pa.

WORK OF THE ASSOCIATION.

The work of the Association is chiefly to raise funds.

These are sent to the support of two schools for colored youth in South Carolina,—the Schofield Normal and Industrial School, at Aikin, and the Mt. Pleasant School, near Charleston, in charge of Abby D. Muoro.

All who are interested in the purposes and aims of the Association are invited to be present.

* * * A Conference on the subject of Temperance, under the care of Concord Quarterly Meeting's Committee, will be held at Friends' meeting house, Wilmington, Delaware, on First-day, Third month 17th, at 2.30 p. m.

Friends and others interested are cordially invited.

MARY MCALLISTER, Clerk.

* * * Quarterly Meetings in Third month will occur as follows:

- 11. Baltimore, Baltimore, Md.
- 14. Haddonfield, Moorestown, N. J.

* * * Circular meetings have been appointed by the Western Quarterly Meetings as follows:

Kennett Square in the Third month.

Hockessin in the Fourth month.

To convene on the second First-day of each month respectively, at 2 o'clock p. m.

* * * The Burlington First-day School Union will meet at Trenton, Seventh-day, Third month 9th, at 10.30 a. m. All interested in the work cordially invited.

WM. WALTON,
SALLIE T. BLACK, } Clerks.

* * * A Conference of parents, teachers, school committees, and others interested will be held under the care of the Committee on Education of Philadelphia Yearly Meeting of Friends, on Seventh-day, Third month 9th, 1889, at 15th and Race streets, Philadelphia, commencing at 10 o'clock a. m.

The subjects for consideration are:

- 1. Primary Reading.
- 2. Reading in the Higher Grades.
- 3. Manual Training.

All interested are invited.

Prompt attendance is desired.

WM. WADE GRISCOM, Clerk.

PUBLISHERS' NOTICES.

* * * Matter intended for insertion in the INTELLIGENCER AND JOURNAL should reach us by Third-day morning, though notices or advertisements relating to affairs of immediate importance may be used as late as the morning of Fourth-day. In order to reach our distant subscribers, the paper is now mailed on Fifth day and must be sent to press at noon of the day preceding.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

JARVIS-CONKLIN MORTGAGE TRUST COMPANY,

Capital Paid In, . . . \$1,500,000.

Six per cent. Guaranteed Mortgages on Farm and City properties.

Six per cent. Debenture Bonds interest payable half yearly.

Five per cent. Saving bonds in small or large amounts running six, twelve, eighteen, or twenty-four months.

These Bonds are issued under the supervision of the Bank examiners of the state of New York, with whom we have deposited 1-10th of our Capital in Government Bonds.

We issue instalment Saving Bonds, secured by real estate security, running 10, 15, and 20 years. Send for Pamphlet.

FRIENDS' NEW MEETING-HOUSE, BALTIMORE.

The new meeting-house of Baltimore Friends, erected in consequence of the sale of the house on Lombard street,—which had become inconveniently situated and undesirably surrounded,—has just been completed and occupied. It is located in the north-western section of the city, fronting on Park Avenue, a broad and handsome street, at the corner of Laurens street. The front on Park Avenue is 144½ feet, the depth on Laurens street 130 feet, running back to a 20 feet alley. The situation is high, and the building becomes quite a conspicuous feature of the locality. It is set back 10 feet from the usual building line.

The material is stone, a granitic gneiss from quarries on Jones' Falls, a stream within the city limits, with trimmings of Woodstock granite, from along the line of the Baltimore and Ohio road, twenty miles west of the city. The roof is selected slate from Peachbottom, Pa. The wood-work is ash for the outer doors; inside doors and frames, window trimmings, wainscoting, etc., are Florida cypress. The stairs are of yellow pine and ash, the floors selected Georgia pine. All the wood-work, except the outside of the window frames and basement, is finished in "hard oil." The plastering is gray, or "sand finish."

The illustration above gives a view of the exterior of the building, from Park avenue. The form, it will be seen, is an L. The main building, on the right hand, is the meeting-house, with inside dimensions of 50 by 70 feet, and a vestibule 11 feet in depth, extending across the front,—a small cloak-room, etc., with an open fire-place, being taken off the vestibule, on the left hand of the main entrance door. As you enter the meeting room from this door, the raised gallery is at the opposite end, its arrangement being in the usual way. Two rows of seats are placed upon it, a hand-rail in front of each. The benches for the body of the meeting are arranged in rows extending to the rear, as usual. Over the vestibule is a gallery, giving an additional seating capacity of 300. The ceiling is 34 feet high, (to the "square" of the building); above it is a large loft, with floor, which will be useful for storage purposes, etc.

The L. building is 105 feet long, by 33 wide. The basement being partly finished, it has substantially four stories. The end toward Laurens street contains heating furnaces, and also coal cellar, lavatory, retiring room for men, etc. The other end, (the extreme left of the picture), has an area space around it, and contains rooms for janitor, kitchen, and a lunch-room,—the last 34 by 30 feet. There is also in

this basement a large fire-proof vault, built in the best manner, for the preservation of records.

On the main floor of the L is the men's meeting-room, and adjoining it, connected by wide sliding doors is the parlor and library-room. The former is 55 by 30 feet, the latter 35 by 30. Their ceilings are 18 feet high. The meeting-room is designed for the use of men, when business meetings are separately held, and for lectures, etc. It is in the rear of the main meeting-house, and has its main entrance on Laurens street, where there is a vestibule 9 feet deep with a small cloak-room. The library and parlor has its main entrance through a vestibule (shown in the engraving), whose doors open out upon the yard, and a walk leading out to Park Avenue. In this vestibule is the cloak-room, etc., for women.

The second story of the L is divided into smaller rooms, suitable for committees, First-day school purposes, lodging-rooms, etc., and the third story is one large and pleasant attic chamber, lighted by dormer windows, and finished like the floors below, in which men Friends attending Yearly Meeting may be lodged. (100 single beds, it is estimated, can be conveniently placed there. When not in use, there is ample room for storage in the adjoining loft, over the meeting-house.) Women Friends will be accommodated on the floor below. The ceilings of the second floor are 13 feet high, and of the third floor 9 feet.

As will be seen from this description, as well as from the illustration, the new building is capacious, and has been carefully arranged for the several purposes of Friends. It will accommodate them, certainly, very comfortably. The arrangements, fittings, etc., are all plain and simple, but substantial, and great care has been taken to secure good materials and good work. Considering this, and the size of the building, the cost seems very moderate,—about \$38,000; this sum including heating and plumbing, though, we believe, not the seats in the meeting-rooms. The architect is Charles E. Cassell. The first stone was laid Fifth mo., 1, 1838, and the whole work, as already stated, is now about finished.

WHAT name shall we give this world-spirit which pervades, unifies, and quickens all, and, in forming the lowest orders of life on this planet, already had in full view the highest and most perfect types of being? We have no better name for it than our fathers. It is God, whose goodness is over all his works. No other explanation can we offer of the cause and constitution of things than to ascribe the life, order, beauty, and harmony of the universe to a supreme, self-conscious, and creative source, the great Being of whom, through whom, and to whom are all things. The creation is thus an eternal and majestic revelation of God.—*Charles W. Wendte.*

“On the one hand the fact is clear, that the world is very sinful and very sorrowful; and the duty is clear—‘Strive to make it better,’ and the command is clear—‘Take thou thy individual share in the work of healing.’ . . . ‘Duties are thine; results are God’s.’ See only that thine intent be good and pure, and the rest thou mayest safely leave in the hands of God.”

From the Atlantic Monthly.

THE CHRISTMAS OF 1888.

Low in the east, against a white cold dawn,
The black-lined silhouette of the woods was drawn;
And on a wintry waste
Of frosted streams and hillsides bare and brown,
Through thin cloud-films a pallid ghost looked down,—
The waning moon, half-faced!

In that pale sky and sere, snow-waiting earth,
What sign was there of the immortal birth?
What herald of the One?

Lo! swift as thought the heavenly radiance came,
A rose-red splendor swept the sky like flame,
Up rolled the round, bright sun!

And all was changed. From a transfused world
The moon's ghost fled, the smoke of home-hearths curled
Up the still air unblown.

In Orient warmth and brightness, did that morn,
O'er Nain and Nazareth, when the Christ was born,
Break fairer than our own?

The morning's promise noon and eve fulfilled
In warm, soft sky and landscape hazy-hilled
And sunset fair as they:

A sweet reminder of His holiest time,
A summer-miracle in our winter clime,
God gave a perfect day.

The near was blended with the old and far,
And Bethlehem's hillside and the Magi's star
Seemed here, as there and then:
Our homestead pine-tree was the Syrian palm,
Our heart's desire the angels' midnight psalm,
Peace and good-will to men!

—*John Greenleaf Whittier.*

HEATHEN NAMES OF THE DAYS AND MONTHS.

It is the advice of this meeting that all Friends keep to the simplicity of truth, and our ancient testimony, in calling the months and days by Scripture names, and not by heathen. London, 1697.

LETTER from the Meeting for Sufferings assigning reasons for the disuse of the common names of the days and months. To the quarterly and monthly meetings of Friends in Great Britain, Ireland, and America.

Dear Friends:

Pursuant to the directions of the last yearly meeting, in relation to an act made the last session of Parliament for regulating the commencement of the year, and correcting the calendar now in use, this meeting hath thought convenient to communicate unto you the following advices:

By the said act it is ordered and enacted that the supputation, according to which the year of our Lord beginneth on the twenty-fifth day of March, shall not be made use of from and after the last day of December, 1751; and that the first day of January next following the said last day of December, shall be reckoned, taken, deemed, and accounted to be the first day of the year of our Lord 1752, and so on, from time to time, that the first day of January in every year, which shall happen in time to come, shall be reckoned, taken, deemed, and accounted to be the first day of the year; and that each new year shall

accordingly commence, and begin to be reckoned, from the first of every such month of January.

First. That in all the records and writings of Friends from and after the last day of the Tenth month, called December, next, the computation of time established by the said act should be observed; and that accordingly the first of the Eleventh month, commonly called January, next, shall be reckoned and deemed, by Friends, the first day of the First month of the year 1752.

Secondly. And whereas for the more regular computation of time, the same act of Parliament doth direct that the natural day next immediately following the "second day of September" in the year 1752, "shall be reckoned and accounted to be the fourteenth day of September, omitting for that time only the eleven intermediate days of the common calendar;" that Friends should be found in the observance of this direction, and omit the said eleven nominal days accordingly. And we think it may be useful and expedient, on the present occasion, to revive in your remembrance some of the motives which induced our ancient Friends to forbear the appellations of the months and days, and to observe in their conversations and writings such names as were agreeable to Scripture, and the practice of good men therein recorded.

The children of Israel, the people whom God chose out of all the families of the earth to place his name among, and to make himself known unto, were strictly commanded, not only to abstain from the idolatrous practices of the nations, in the midst of whom they dwelt, but were enjoined to be circumspect in all things that the Lord commanded; and even to make no mention of the name of other gods, neither to let it be heard out of their mouth.¹ This injunction was not relative to any legal or typical rites, external ceremonies, or institutions of the law peculiar to the Jewish nation, but was a perpetual command and standing ordinance, respecting the honor of the One Almighty Being, the same yesterday, to-day, and forever; and as such ought to be regarded by us, and by all the generations of those who with the heart believe, as well as with the tongue confess, "that the Lord he is God," and that "there is none else beside him;" who hath declared, "I am the Lord; that is my name; and my glory will I not give to another, neither my praise to graven images."² Convinced of this great and everlasting truth both by the testimony of the Holy Scripture and the manifestation of that divine principle which leads those who are faithful to its teachings from all that would dishonor the name of God, either in word or deed, our ancient Friends were conscientiously concerned to refrain from the use of those names of months and days which had been ascribed by way of honor to the idols of the heathen, and in conformity to their false worship: this concern rested upon them, from a pious persuasion, that the glorious gospel day and time was come, wherein the Lord was fulfilling his covenant with

Israel, viz., "I will take away the names of Baalim¹ out of her month, and they shall be no more remembered by their name."²

And that you may the more clearly discern the importance of that Christian testimony borne by our predecessors in this case, we recommend what follows to your serious consideration: viz., A brief account of the origin of the names of some months of the year, and of all the days of the week, now customarily and commonly used.

I. January was so called from Janns, an ancient king of Italy, whom heathenish superstition had deified, to whom a temple was built, and this month dedicated.

II. February was so called from Februa, a word denoting purgation by sacrifice, it being usual in this month for the priests of the heathen god Pan to offer sacrifices, and perform certain rites, conducting as was supposed to the cleansing or purgation of the people.

III. March was so denominated from Mars, feigned to be the god of war, whom Romulus, founder of the Roman empire, pretended to be his father.

IV. April is generally supposed to derive its name from the Greek appellation of Venus, an imaginary goddess worshipped by the Romans.

V. May is said to have been so called from Maia the mother of Mercury, another of their pretended ethnic deities, to whom in this month they paid their devotions.

VI. June is said to take its name from Juno, one of the supposed goddesses of the heathen.

VII. July, so called from Julius Cæsar, one of the Roman emperors, who gave his own name to this month, which before was called Quintilis, or the Fifth.

VIII. August, so named in honor of Augustus Cæsar, another of the Roman emperors. This month was before called Sextilis, or the Sixth.³ The other four months, namely, September, October, November, and December, still retain their numerical Latin names; which, according to the late regulation of the calendar, will for the future be improperly applied. However, from the continued use of them hitherto, as well as from the practice of the Jews before the Babylonish captivity,⁴ it seemeth highly probable, that the method of distinguishing the months by their numerical order only, was the most ancient, as it is the most plain, simple, and rational.

As the idolatrous Romans thus gave names to several of the months in honor of their pretended deities; so the like idolatry prevailing among our Saxon ancestors, induced them to call the days of the week by the name of the idol, which on that day they peculiarly worshipped. Hence

The first day of the week was by them called Sunday, from their customary adoration of the sun upon that day.

¹ This word Baalim, being the plural number of Baal, signifying Lord, has relation to the names of divers idols of the heathen worshipped in several places.

² Hosea ii. 17.

³ Maerob Saturn. lib. 1 cap. 12.

⁴ Vid. the Scriptures to the time of Ezra.

¹ Exod. xxiii. 13. Deut. iv. 35.

² Isaiah xlii. 8.

The second day of the week they called Monday, from their usual custom of worshipping the moon on that day.

The third day of the week they called Tuesday, in honor of one of their idols, Tuisco.

The fourth day of the week was called Wednesday, from the appellation of Woden, another of their idols.

The fifth day of the week was called Thursday, from the name of an idol called Thor, to whom they paid their devotions upon that day.

The sixth day of the week was termed Friday, from the name of Friga, an imaginary goddess, by them worshipped.

The seventh day they styled Saturday, as is supposed from Saturn, or Seater, by them then worshipped.¹

In the ages of popish superstition, not only the use of such heathenish names and customs was indulged, but also other unsound and unscriptural practices in religion were invented and introduced. For when the profession of the Christian religion became national, multitudes of the heathen priests, whose interest lay in the performance of rites, ceremonies, and sacrifices, embraced prevailing Christianity with selfish views; and labored early, with too much success, to find employment for themselves by imposing on the people a new set of ceremonies and sacrifices, bearing some resemblance to those which in their former state of heathenism they had been accustomed to. From this corrupt source sprang the popish sacrifice of the mass, the celebration of which at particular times, and on particular occasions, gave rise to the vulgar names of Michaelmas, Martinmas, Christmas, and the like.

Seeing, therefore, that these appellations and names of days, months, and times, are of an idolatrous or superstitious origin, contrary to the divine command, the practice of good and holy men in former ages, and repugnant to the Christian testimony borne by our faithful friends and predecessors in the truth, for the sake of which they patiently endured many revilings; let neither the reproach of singularity, nor the specious reasonings of such as would evade the cross of Christ, turn you aside from the simplicity of the gospel; nor discourage you from keeping to the language of truth, in denominating the months and days according to the plain and scriptural way of expression, thereby following the example of our worthy elders, and coming up in a noble and honorable testimony against these and all other remains of idolatry and superstition.

From the Meeting for Sufferings in London, the Sixth-day of the Seventh month, 1751.

"If the world seems cold to you
Kindle fires to warm it!
Let their comfort hide from view
Winters that deform it.
Hearts as frozen as your own
To that radiance gather;
You will soon forget to moan
"Ah! the cheerless weather."

SCRIPTURE LESSON, No. 12.

THIRD MONTH 24, 1889.

BLIND BARTIMEUS.

GOLDEN TEXT.—Be of good cheer; rise, he calleth thee.

Mark 10 : 49.

READ Mark 10 : 46-52.

THE city of Jericho, the scene of the incident recorded in our present lesson, was one of the oldest cities of Palestine. It was of great extent and very populous when the army of Joshua encamped against it, and was the first great city of Canaan that the Israelites conquered. In the journey of Jesus to Jerusalem, this city lay in the route. When they were leaving Jericho, with the great multitude, who, like themselves, were on their way to the Feast, they passed a blind man sitting by the way-side begging.

When he heard, etc. When he was told that Jesus of Nazareth was in the company, the hope that he might heal his malady as he had done to so many of whom he had heard, inspired him to call aloud. It was his only opportunity, and he would not be quiet though he was rebuked, but cried out the more. Who of us would not do the same if our only hope for some coveted good was passing beyond our reach?

And Jesus stood still. He stopped that he might inquire into the need of the poor beggar, and give him relief. They who are near by speak encouraging words,—they tell him to rise, for "Jesus calls thee." How gladly he casts aside the beggar's garb, and hastens to be led to his deliverer, his helper.

It is not an alms in money that he petitions for; nobler thoughts had sprung up in his heart since the word went forth, "Jesus of Nazareth passeth by." If he can only be healed of his blindness, he will no longer beg for his daily bread; his own hand will supply every want, and as he receives what he so earnestly craves, he joins the glad multitude that he may return thanks to the God of his fathers in the holy city, and make the offering that is required.

The faith of Bartimeus was of a kind that may be a pattern for us. It first led him to cry out to Jesus, and when he heard the call to come, how quickly he cast aside everything that would hinder. His cloak impeded his progress, and he left it, that he might the sooner reach him through whom the healing power was to be granted. The Apostle, in his epistle to the Hebrews, has the same thought, 12 : 1, 2 : "Let us lay aside every weight, and the sin which doth so easily beset us, and let us run with patience the race that is set before us, looking unto Jesus, the author and perfecter of our faith, who for the joy that was set before him endured the cross, despising the shame and hath sat down at the right hand of the throne of God."

Many of us who name the name of Christ fail of the good that might be ours, because we are not watchful,—we do not keep ourselves ready to respond, when the call comes to work, or it may be wait, for both are conditions that we must be willing to accept, if He so rules it.

One of the greatest stumbling blocks in mankind's advancement in the knowledge of spiritual truth is doubtless the natural, or material character

of the popular impression or understanding of spiritual matters. Thus heaven is generally considered as a place where the good go *after death*. In like manner God is given, more or less, a material character, as abiding in a place, and to be met only after mortal life is ended.

Such views were in no instance taught by Jesus, and are therefore not Christian, but are the relics of ancient forms of belief, which are, happily, passing away. The savage has his "happy hunting ground" which can be entered only after death, but in no expression or teaching did Jesus or the Apostles give grounds for the thought that heaven is located in space, to be entered after death, and that there the soul shall meet its God. On the other hand, the teaching of the New Testament is that "God is a spirit;" that "the kingdom of God is within you." The Scripture teaching is that the kingdom of heaven is not conditioned by space or time, but that it is the presence of the Divine Spirit in the human soul at any time and in any place. Jesus so kept his spirit in accord with the Divine Spirit, that the presence of the Father was always his, and he could declare, "I am not alone, because the Father is with me." Such will be the experience of all who seek the Divine presence in their own souls. To them prayer, or "the earnest petition," is the constant desire to be good, to be pure in heart, to be obedient to the Divine will as it may be revealed. It is not vociferous pleadings, not stated implorations, not formal addresses as to a Being afar off, but earnest, heart-felt longings to keep near unto our Father,—to put our trust in him and to follow his requirements.

Earnest prayer is thus unceasing, and its effect is to bring the life that is actuated thereby into a heavenly condition. An eminent minister has said, "We do not go to heaven at all, heaven comes to us." Perhaps this is the best practical test of "the earnest prayer," that to our lives and characters it brings the blessed result that *heaven comes to us*. Who has not sometimes experienced this blessed condition? "We stand on the threshold of heaven at every moment." Every little act of love, every determination to do that which we feel to be quite right, every effort to make more pure our lives, every desire to increase our trust in our Father's care, puts us at once in the presence of the Divine, and brings heaven into our souls.

"WHEN God lets loose an idea upon this planet we vainly set limits to its progress; and I believe that Gospel Temperance shall yet transform that inmost circle, the human heart, and in its widening sweep the circle of home and then society, and then, pushing its argument to the extreme conclusion, it shall permeate the widest circle of them all, and that is government."—*Frances E. Willard*.

"EVERY truth some truth doth hold.
Like the fabled sage of old,
Love, the cunning Alchemist,
Turns our leaden lives to gold."

KEEP thy spirit pure from worldly taint by the repellent strength of virtue.—*Bailey*.

For Friends' Intelligencer and Journal.

THE EVOLUTION OF THE HOUSE.

WHEN the Arctic climate of the first glacial period had given place to the less rigorous temperature of the flooded Champlain; when the coal plants of the Carboniferous and the reptile of the Mesozoic had, like earlier types, passed away, leaving their history written on the rocks and in the coal fields; when the mammoth and the cave-bear were still roaming the plains of Europe and North America; then, if not earlier, man made his appearance upon both continents, and no sooner had he become well established than he began to erect for himself dwellings. These first rude attempts at architecture were as unlike the commodious and convenient habitations of to-day as their builders were unlike the graduate of a modern school of technology. Utility was at first the sole motive but as the æsthetic sense developed beauty as well as usefulness began to be considered.

"Cairns develop into magnificent temples; in place of caves with rude markings there arise at length galleries of paintings," says Herbert Spencer. Just what suggested to the primeval man his first notion of a building we can only surmise. If he happened to be an inhabitant of a forest country the shelter of overhanging boughs may have given to the "tool-using animal," as Carlyle calls man, his first idea of a hut covered with branches or bark; the dweller by the water side, shielding himself under the thickly growing rushes, could hardly avoid improving upon the shelter thus afforded by nature and weaving the rushes into a cover for his hut; the hunter of the plain utilized the skins of animals taken in the chase; while the primitive mountaineer, living in a natural cavern, bethought himself at last to build a cave from the loose rocks lying about.

The childhood of the Aryan race is involved in obscurity. We have few records of the slow steps by which our prehistoric ancestors climbed to civilization. Yet the scanty relics of primitive architecture which remain indicate a close resemblance between the savage progenitors of civilized races and the savages of to-day. The cave dweller was not confined to glacial times, but has his modern representative in the most degraded races of the present. Neither was the lake dweller, who built his house on piles and connected it with the land by a bridge, confined to a particular area or age, this mode of building having been suggested by similar conditions to peoples far remote from each other in time and space. In South America, Africa, and New Guinea, these dwellings are still found; Herodotus mentions the lake dwellings of ancient tribes; and the lakes of Austria, Hungary, and Switzerland abound in remains of such habitations.

So long as the primitive man remained a hunter his dwelling was of a temporary character; but when he learned to cultivate the soil he became more settled and built permanent abodes. The transition from the wandering to the settled state was well illustrated by the various tribes of American aborigines at the time of the discovery of the continent. Communism was a characteristic of the native North Americans and the bark covered frame of the roving

tribes, the "long house" of the partly horticultural Iroquois, and the terraced brick buildings of New Mexico exhibit alike a plan of architecture designed to accommodate a number of families.

If we leave that portion of mankind which has never made sufficient progress to have a written record of its civilization and turn to the earlier historical nations we shall find that domestic architecture was not highly developed. The mild climate in which these ancient people lived supplied little incentive to improvement in their houses; neither was their government favorable to anything which might increase the comfort of the masses. So it happened that while the common people of Egypt still lived in huts and the wealthier classes knew little of what we call comfort, the banks of the Nile became studded with stupendous temples guarded by long avenues of sphinxes, and with pyramids which commemorate the cruelty and tyranny of the kings whose tombs they were intended to form.

In the Tigris-Euphrates Valley it was much the same. The enamelled brick of Babylon, the sculptured alabaster of Assyria, the magnificent porticoes, pillars, and stairways, of Persia were all designed to add to the glory of the monarch rather than to increase the comfort of the people.

In Greece the people were for the state, and though this nation made some progress toward domestic comfort, their wealth and talent were chiefly expended on public buildings, and the unrivalled beauty of the Parthenon bears witness only to civic virtues, while the people had made as little progress toward the home building as they had toward the home life.

The Romans were more domestic. In the early days of the city the meals, the sacrifices, and all domestic transactions took place in the atrium, or main room, but as the people advanced the house grew and each room came to have its particular use. Luxury prevailed. Houses were cooled in summer and warmed in winter by pipes of hot or cold water and various other contrivances were introduced which added to the comfort and convenience of the inhabitants.

Meanwhile, farther to the north, a race was slowly developing which was to rule the civilized world. Two thousand years ago, our ancestors, the Teutons, lived in thatched log huts chinked with straw and lime. Rome fell a victim to these sturdy warriors, but her influence lived in her conquerors and from the ruins of the Empire sprang up the civilization which produced the Gothic architecture of Italy, England, and France. Western Europe became filled with stately edifices rich in spire and buttress and pointed arch and glittering with windows on which "The whole history of the Bible is written in the hues of the rainbow by the earnest hand of faith."

But while the leaders of the church were erecting these magnificent memorials to the Deity they forgot man and his needs, and still the people lived in darkness, and discomfort, and dirt.

"The reign of democracy has succeeded that of despotism," and to-day instead of building triumphal

arches, palaces, pyramids, and cathedrals we have comfortable homes. The hut has given place to the house of stone, brick, or wood. The open fire on the floor has been succeeded by various modern systems of heating. Instead of a hole in the roof for the escape of smoke we have chimneys, though this improvement did not come into use until the fourteenth century. The clay floor, strewn with rushes and covered with filth, has disappeared. By slow stages from mica or through oiled linen, horn, paper, and glass, the modern window has been reached. From the thatched roof we have advanced to slate, iron, and other recent improvements. The staircase became a prominent feature of interior architecture in Queen Elizabeth's time. Before that they climbed to the upper story by a ladder on the outside.

Let those who deplore the decline of architecture as an art look around at the vast improvement which our dwellings have undergone during the past few hundred years and they will cease to regret the utilitarian tendency of the age which gives us health and comfort instead of cathedrals.

ANNA L. NICHOLS.

VALUE OF A GREAT FAITH.

NOBLE living is the end for the accomplishment of which all religious agencies should be employed. And yet the tendency manifest in some quarters to relegate all theology to the realm of immaterial and unimportant things is to be deeply deplored. This for the reason that certain great faiths have much, very much, to do with forming the characters and shaping the lives of men. To ignore, or treat as of minor moment, so much of theology as teaches faith in God and a future life, is to stand directly in the way of all genuine religious effort. Let us admit that religion is a life and not a creed, that it is something to be lived and not merely something to be believed, and the question still remains, how can religion thus understood be best promoted? How can we best impart to our fellow men the highest motive, the deepest inspiration, leading them to noble living? Not, surely, by treating as indifferent matters, or even as non-essential, such great theological truths as the existence and attributes of God, and the certainty of a future life. For a confident faith in these doctrines has been in the past, and must be in the future, a power making for practical righteousness more potential than all other agencies combined. In all ages the men of noble and consecrated lives have been those who were moved by the inspiration of a great faith. By a great faith, I mean a faith in the great, the fundamental, the central, the essential things in religion; those things without which religion cannot exist. And since religion is right feelings and relations toward God as rightly apprehended, we must include theism at least as one of its indispensable elements. Such a great faith is, I repeat, the mainspring, the motive power, of the noblest living. I will not say it is the only inducement to such living, for I recognize the fact that a good life is better than a bad life, even if our present brief existence be the whole of it. I ask, however, why not seek the highest, and most powerful motives; why not invoke

everywhere and always the most potential influences; why not present to mankind the most convincing reasons, to lead the race toward righteousness? Surely the church can do no less. Surely religion demands all this, at our hands. And these higher and stronger motives must all take root in a great faith. That man who truly believes that he is day by day forming a character, not merely for time, but for eternity, and who is also convinced that he is responsible to a Supreme Power in whom he lives and to whom he owes all that he is, and all that he is to be, will feel an infinite motive, an all-powerful inspiration, leading him irresistibly to high and noble living. Such a faith is the inexhaustible fountain from which must flow the ever-living streams of life and hope. The man of the church that is not permeated and inspired by it, is like an engine without steam, or like a flower without the sunshine, or like the electrical battery without the electricity.

I have been careful to speak only of our great faiths. There are many doctrines and dogmas that have been fastened upon Christianity which are foreign to it, as they are to all true religion. They are not important, except in the sense that they may be positively hurtful. They are not such beliefs as have to do with life. They furnish no great motive for right living. They are, therefore, to say the least, even if true, unimportant. We want so much of theology as is essential to the highest and best development of the religious nature in man, and we want no more. As belief in God is the chief agency in such development, let the church teach theism. As the highest motive for building the Christian character is found in the fact that life continues after the body is dead, let the Church teach immortality. As the religious nature is best developed and strengthened by its exercise, let the Church teach the duty of worship. With these great and inspiring faiths in God, in immortality, and in worship, plainly inscribed upon her banner, the Church may go gloriously conquering and to conquer.—*Selected.*

YOKE-BEARING IN YOUTH.

THE *Christian Union* prints some resolutions adopted by the Board of Overseers of Harvard College. These tend to establish a stricter supervision of the students, and in view of the irregularities lately exposed by articles in the *North American Review*, ought to be welcomed by all lovers of good discipline for young men. Commenting upon this subject, this paper says:

What we parents want of a school, college, or university is not so much Greek, Latin, or mathematics, but the best possible preparation for life. Now life is not a happy-go-lucky affair. It is not possible for a man in life to disregard rules, to set for himself his own hours, to follow blindly his own impulses, and to make up for his folly at the end of three, six, or twelve months by cramming, with the aid of a tutor or a pony. And if a college habituates him to think he can get along by any such process as this, it is only preparing him for a bitter disappointment, or necessitating for him some very hard

schooling when he gets out of college. The college ought not to be carried on upon kindergarten principles, nor even upon boarding-school principles. But neither should it be carried on upon the principle that you can do what you like and square up the accounts at the close of the year or the term. It should be adjusted as far as possible in such a way that the pressure applied will correspond to the pressure applied in life, and the accountability will be analogous to the accountability in life, and so the habits formed will be the habits needed for life.

Now, when the college graduate gets out into life he will find that it requires regular hours, and that its requirement is enforced by frequent roll-calls. If he goes into a commercial pursuit, he cannot go to the bank or the store when he likes; he must be on hand every day, and not only at the hour but in many cases at the minute. If he becomes a lawyer, he cannot be late at court without suffering a default, nor absent from his office without losing his clients. If he is a physician, sickness and death will not await his convenience. Even if he is a minister, he must be in his pulpit and at his weekly meeting with both promptitude and regularity; and if he attempts to provide for either by a process of cramming, he will find himself liable to be dismissed by his congregation before he had tried the experiment on them for a year.

How to adjust artificial requirements and accountings in a college or a university so as to approximate most nearly to the rational requirements and accountings of life is a difficult problem, and one which may well puzzle the most sagacious and experienced educator. It is probable that most colleges have made their systems too artificial and unyielding; but the problem is certainly not to be solved by abolishing them altogether. Young men are not apt to be prepared for the severe requirements of life by four years spent without any. It is not by turning the colt loose in the pasture to crop what he likes and canter where he pleases that he can be prepared for the harnessed and regular activities of useful living. It is well for a man that he bear the yoke in his youth.

PHILADELPHIA FIRST-DAY SCHOOL UNION.

PHILADELPHIA First-day School Union held its regular quarterly meeting on Sixth-day evening, 8th inst., and was well attended. Reports from various schools were quite encouraging especially that from Girard Avenue. It showed a membership of 240, with an average attendance of 170, the greater part of whom remained at meeting. A new feature of the Union is the participation of the various schools. Race St. school favored the Union with a poem entitled "Mind the Light," an essay on the life of John Woolman, and a class exercise which consisted of selections from the Scriptures. An interesting essay, which showed that the author had been much favored, was read by Isaac Roberts, of Norristown, by special request, with which general satisfaction was expressed. The meeting was the most satisfactory of any held for a long time.

THE MINISTRY OF SORROW.

THERE is nothing in the whole range of circumstances embraced in "the warp and the woof" of human life, that so tests the faith and tries the soul of the Christian believer as the dispensation of sorrow; and only those that have reached a high position in the grace of subjecting the human will to the Divine will, can honestly assent to its being termed a ministry, which it most surely is when we come to judge it by the effects it has produced, from the day of the joyful advent of Jesus of Nazareth into a sin-stricken world, and his sorrowful exit therefrom.

Sorrow differs in kind and degree, and comes in some form, sooner or later, to everyone. Especially the grief caused by separation from loved ones in their departure from the material world to the world of spirit. Our human affections are so strong and we so realize the blessedness of the family relations, that when these are severed it is hard to submit to the inevitable, to see the justice in things we but little comprehend. In our finite weakness we cannot grasp the greatness of the infinite mind or the laws regarding matter, and we cry aloud in our anguish, at first into what seems but nothingness. Then begins the blessed ministry of sorrow. He who "is never so far off, as even to be near" impresses us from within, where He loves to abide, though we may not know of the abiding, and we feel, if we try to keep in check the rebellious spirit, a little uprising of faith and, finally, a peace enters the heart that may exceed any joy in outward things we have hitherto known; but it will be a peace and a trust in a Power so great yet so gentle and loving, so far away and yet so near, that the assurance comes that all is well and that sometime ours will be the enlarged vision to behold the justice in His decrees that now lie hidden in mystery.

How constantly we have the testimony of those persons who having passed through great sorrow, have been so impressed by it that nothing would induce them to part with the experience gained therefrom. They knew of a sustaining Power that never before had been realized and the ministrations of a love that must be felt to be comprehended. To such are applicable the glowing words of the ancient prophet: "Fear not, for I have redeemed thee; I

have called thee by thy name, thou art mine. When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee. When thou walkest through the fire thou shalt not be burned; neither shall the flame kindle upon thee. For I am the Lord thy God." And in our modern times the same spiritual power has inspired writers to voice their impressions of the peace brought about by this ministry of sorrow:

"For, on earth or in heaven, to true hearts is given
One quiet abode;
One mighty arm guards them, one blessing rewards them,—
The presence of God!
The stars in declining fail not in their shining,
Through daylight's increase:
They who pass on before us leave dawn breaking o'er us,
Lighting up, through death's grating our chamber of waiting,
Our chamber called Peace."

MARRIAGES.

ROBERTS—THOMAS.—At the home of the bride, Cheyney, Delaware county, Pa., on Third month 8th, 1889, by the order of Friends, and under care of Goshen Monthly Meeting, Horace Roberts, son of Emmor and Martha L. Roberts, of Moorestown, N. J., and Emma E., daughter of J. Preston and Elizabeth C. Thomas.

DEATHS.

CHANDLER.—In Kennett Square, Pa., Second month 7th, 1889, Joseph P. Chandler, in his 67th year; a member of Kennett Monthly Meeting.

CHEW.—In Moulton, N. J., Second month 21st, 1889, S. Lillie, daughter of Charles B. and Lydia S. Chew, in her 18th year.

DARLINGTON.—At his home, in West Marlborough, Chester county, Pa., on Third month 6th, 1889, Richard Darlington, in the 92d year of his age.

Thus has ended a long life of usefulness, clouded but for a few years towards its close by feebleness of intellect, the result of an injury from a fall on his head. Many remembering the genial, kindly Friend,—for he was one of the true type,—will love to recall the hospitality of his home so frankly extended, and the intelligent interest he manifested in all the affairs of life. Especially in matters of education his services were invaluable, for having been a teacher in early life he appreciated its importance, and ever labored to advance the intellectual as well as the material interests of the community, enlisting also in humanitarian work. Possessed of a vigorous mind, he was an earnest thinker, and one who very emphatically could he said to have the "courage of his convictions."

To his own Religious Society he gave most faithful adherence, taking an active part in all business meetings, as well as punctually attending those held for worship. He served many years as elder and held various other positions of importance in our Society. Gathered to his heavenly home he leaves to children, grandchildren, and great-grandchildren, the example of one steadfast and true, untrammelled by the conventionalities of society, yet manifesting in his own character a high standard of kindness and integrity.

DICKINSON.—Suddenly, Third month 8th, 1889, Elizabeth E., widow of Charles Dickinson, in her 75th year.

HARVEY.—At Chester, Pa., Third month 3d, 1889, Dr. Ellwood Harvey, in his 69th year.

KING.—In West Philadelphia, Third month 2d, 1889, Lizzie H., wife of Alfred King, in her 53d year. Interment at Little Britain, Pa.

MARTIN.—At his residence near Coatesville, Pa., Second month 20th, 1889, Thomas Martin, in his 90th year; a frequent attendant of Fallowfield Meeting.

He expressed near his close "All is peace."

SHOTWELL.—At Rahway, N. J., Seventh-day, Third month 9th, 1889, Margaret G., widow of Henry K. Shotwell, in the 81st year of her age; a valued member of Rahway and Plainfield Monthly Meeting. Her long and painful illness was borne in the unselfish, uncomplaining spirit that was characteristic of her through life.

STACKHOUSE.—Third month 3d, 1889, Hannah H., widow of Charles Stackhouse of Horsham, in her 85th year.

TEAS.—At his residence, Horsham, Pa., on Sixth-day, Third month 9th, 1889, George S. Teas, in the 57th year of his age.

In the removal of this Friend, his family, our Religious Society and the community have lost a valuable member; a man of sterling integrity, great energy, and excellent business qualities. His religion was strikingly exemplified in his life of benevolence and usefulness. He was clerk of Horsham Monthly Meeting, and an overseer. His judgment and counsel were sought by many, particularly by the poor, who always had his kind sympathy.

His funeral took place on Third-day, the 12th inst., at Upper Dublin meeting-house, where a large concourse of friends, relatives, and neighbors assembled in and around the house and a solemn meeting was held. Testimonies were born by David Newport, Ellison Newport, Henry T. Child, and Franklin T. Haines. H. T. C.

TYSON.—On Second-day, Third month 4th, 1889, Mary B., widow of Jacob P. Tyson, aged 75. Funeral from Abington Meeting-house.

WOOD.—Suddenly, Third month 7th, 1889, Albert W., son of John and Sidney K. Wood, of Torresdale, Philadelphia, aged 22 years.

EDUCATIONAL CONFERENCE.

The third and last educational conference was held at Race street meeting-house, (Philadelphia), on Seventh-day, 9th inst., when a large number of people, mostly teachers and those interested in education in our Society, were assembled. The first subject for consideration was Primary Teaching of Reading. Frances Haines read a paper upon this subject, some extracts from which will be printed.

Prof. Moon of the National School of Elocution spoke upon Reading in higher grades. He said that good reading is the power to impress thoughts upon the hearer; it is to impress, not express. The reader stands between two powers, the audience and the thought, and his office is to convey the thought to the audience in the most impressive manner. Much bad reading results from an incorrect relation between reader and audience.

The subject matter selected should be on the plane of the reader's thought, that he may give expression to the author's ideas as though they were his own. There should be no difference between

reading and speaking, or in other words the reader should aim at conversational directness, and his study must be to master this power. There is a sympathy which comes back to a speaker from his audience, and this is a source of power; it is like the relation of the clouds and sun to the earth, what it draws it gives back in gentle showers or in thunder and lightning.

The student of reading must be critical of his own efforts. He must know what he wants to do, and though he fail many times, it is possible for him to reach his high ideal. Everybody uses conversational directness except when he reads, then his expression becomes formal and meaningless.

The sentiment of the selection begets what we may call the *color* of the voice, and there must be a proper relation between the sentiment and the expression.

The speaker here gave some short readings illustrating the pathetic, the humorous, and the solemn. There is a mechanical perfection in reading which he would abolish by teaching his pupil to utter with the directness of conversation the thoughts of the author. A. C. Dorland thought that if the natural expression of the home and school room were correct it would be very helpful in expressing the thoughts of others, therefore teachers should insist upon a correct manner of answering in all recitations.

Professor Moon thought that children are very susceptible to such influences, they copy the voice and the manner of expression of their elders. A great point is gained when a child gives a natural expression in reading. A friend asked how self-consciousness in a child can be overcome.

Prof. Moon replied that the child's mind should be so completely filled with the thoughts of the author that there is no room for self-consciousness.

Professor Bachelor said the book should not be an artificial barrier between the speaker and the audience. While he agreed that a true reader must impress his audience, he also thought it most important that he learn to *express* himself sufficiently to reach his audience. Vocal culture gives him control of his voice, and the voice gives expression to changing emotions. Criticism by the class, he said, ought to mean picking out the good as well as the bad; if this were so, children would welcome it.

After a ten minutes' recess Professor Sayre of the Manual Training School read a very interesting paper upon the course of instruction in the school. It is not a trades' school, but the aim is to instruct the boys in the principles which underlie all trades.

Though it was after one o'clock when Professor Sayre closed his very interesting remarks, some discussion was entered upon with regard to the value of manual training, all agreeing that the apprentice system being out of date the boys must have some opportunity to learn the use of tools, and this can be acquired side by side with their literary education. Sewing as a school exercise has been revived for the girls, and in some cities they are taught the use of light tools.

There was thought to be a need of some manual training in the classes following the Kindergarten.

Altogether the conference was a very interesting and instructive one, and the Yearly Meeting's Committee on Education, has done good work in affording an opportunity for the public consideration of these vital questions involved in the training of our children. Teachers must certainly feel an increased love for their profession as they unite so pleasantly in the search for the best methods of instructing their classes. And the delightful social intercourse afforded by these meetings will by some be long remembered.

EDUCATIONAL.
PRIMARY READING.¹

Of the three methods used in teaching beginners,—the Phonetic, Word, and Alphabetic,—I found it best for myself, that I could obtain better results, not to adopt any one exclusively but to combine all. Prof. Emerson White, in his work on Pedagogy, gives an excellent idea of this, in what he terms the Union Method. Although we find many able educational writers advocating one to the entire exclusion of the other, the alphabet, or a-b-c method, has fallen into almost entire disuse, superseded by the other two mentioned. Nevertheless I believe that children should be taught the alphabet in order, not at the beginning by any means, but later when the characters are all previously well known in familiar words. In class K. the baby class of the school, the first lesson and sometimes the second and even third consists of a story about some familiar thing, endeavoring to get from the little ones what they already know. Becoming better acquainted, eager questions are asked, and I am treated in turn to each separate fund of knowledge stored up in the busy little minds: so I have tested my bearings and am ready to begin.

The difficulties which present themselves at this stage certainly call forth the possibilities of the teacher. It is wonderful how children will differ in regard to the faculty of observation, while of the same age or very near it, and under, seemingly, the same conditions of life. To meet these exigencies I endeavor to have my objects and words not so easy and familiar that the brightest will despise them, nor so difficult that the slower members of the class will become discouraged at the outset, where all should be made as encouraging and bright as possible. For example: I bring into the class a boy's hat; we talk about it, the form, color, compare it with others seen, etc. I then write the word *hat* on the black-board,—do not print it, as I do not approve of children learning to print, cannot see any advantage gained thereby, it is very apt to spoil their hand-writing in the future, and the two forms, script and print, confuse them in the attempt to form both. It takes a comparatively short time for them to become familiar with the written word. The next lesson, probably a color, is taught—one that is conspicuous in the classroom, black, for instance. We now have on the board *black hat*.

I do not confine myself to words of three letters, but vary with words of five or six, only the object

and word which it represents must be familiar. Very soon in the course of our little talks follow the words "is" and "my." I say to them "my hat is black, what color is thine?" The reply usually is very satisfactory; if not, I continue until it is so, and the sentence reads, "My hat is black." It requires so little to make a child happy, and the fact of reading writing seems to fill the little hearts with unbounded delight. I continue this way for about one month, one lesson each day, although it would be greatly to the children's advantage if two lessons of a short period each could be given every day. When the change is made from script to print, I place the chart before them with the printed words which have been previously learned in script. It is astonishing how quickly they will become familiar with them. I next introduce the sounds of these words, we talk of the names of the letters, etc. So we continue: first script, then print; the sounds and names of letters forming a part of every lesson. By the first of the year they have some hundred or more words in their vocabulary, and are ready for the First Reader.

VOCAL DRILL.

After the great benefit I have derived physically from the system of vocal culture as taught by Julia A. Orum, I feel the added importance of beginning this training early in the child's life. The development which results from the abdominal, diaphragmatic, or natural type of respiration, is uniform, strengthening the whole trunk, calling for full free expansion of the lungs and removing all strain from the delicate muscular structure of the throat. We do this by distributing the strain on the stronger external muscles of the body; that this is correct, we need only notice the respiration of an infant or little child. To aid in the accomplishment of this purpose I have our vocal drill, which only lasts some two or three minutes, as humorous, and happy as possible, that the children shall enjoy it and ask for a repetition. For instance, we take the vowel *o*, to illustrate joy, sorrow, pain, surprise, etc.; besides yielding variety of tone which always brings a rich increase to the reading lesson, it is rare fun for the children.

Then, again, we take up short simple sentences, embracing more fully these various emotions, the different calls, etc. The importance of the vowel as the element of sound that makes the word, I dwell upon early in the lesson; I frequently speak of it as the voice sound. For example, in the words *tal, far, old*, comparison is made of the relative importance of sound, of vowel and consonant; and, again, of sound suiting sense, as far away, come quickly. The children very soon catch the idea, and with their pliable, fresh voices require only guidance. If I find a child defective in a final letter,—*t* or *d* for instance,—I have him give me a full, clear vowel sound with the deficient consonant, as *ä—t, â—d*. I also have him repeat a series of words ending in *st* and *sts*, as *nests, tests, etc.*, words beginning with *wh*, where, while, etc. Speaking through too contracted an opening in the mouth renders utterance indistinct; to correct this fault I have sometimes taken in class a silver

¹ An Essay read by Frances Haines, at the Educational Conference, Philadelphia, Third month 9th.

quarter and required the child to hold it between his teeth a moment or two during the vocal drill, or to place two fingers close together and insert, and hold them in the same manner. I try always to correct these individual defects as they come under my notice during the reading lesson. Teach the articles as belonging to the word that follows, never separately—being careful to give the full sound *the* before words beginning with vowels. I have had great difficulty in this direction with several pupils who have come to us from schools outside; with one little boy especially who persists in saying *ah* with decided emphasis,—“I saw *ah* man go down *ah* street.” The little fellow is struggling to overcome it, but the habit is so ingrained that I feel he will not drop it easily.

POSITION.

When I place the book in the child's left hand, I show him how easy it is, with the right hand free to turn the pages if necessary; also I see that the left foot be a little in advance, with toes of both feet slightly turned out, that the body be in a perfectly straight, easy position. The distance at which the book should be held is given at the same time. I illustrate how muffled the sound is if held too close, besides we like to see the face as well as hear the voice, either in reader or speaker. The erect position is insisted upon; here we have a little talk on breathing—our lungs, what they do for us; we must do all we can to strengthen them by keeping our shoulders well thrown back, etc.,—in short make them feel that position is a part of the lesson. Little children are so curious, so eager with the “why,” that if you give them a reason, something they can understand, and appreciate,—besides the trite “it is proper and right to do so,”—they will be very apt to remember and improve.

ANALYSIS.

I fully believe that a child of seven years may be taught to express thought, read with as much expression from the First Reader, as at a much later period he does from the Fourth Reader. Keep the idea always before the child's mind; let him drop his book, talk with him about it, impress upon him that reading is only talking, that he is telling a pretty story; in time he will appreciate and understand fully, then reading will be a delight, it will mean something, for back of the words the thought lies full and clear, ready to be expressed. I am frequently surprised at the rapid growth in this direction, especially noticeable in Class I, where they call it “picking out the thought,” and in which they manifest a great deal of pleasure. We take a paragraph and discuss it; the most important words, what they mean, their relation to the other words, etc. Not only is the analytical faculty developed, but it necessarily calls for naturalness of tone, one of the great essentials of all good reading.

PREPARED AND UNPREPARED LESSONS.

If a lesson is to be prepared at home, before dismissal give the class some instruction in regard to this preparation: the new words must be searched out and pronounced,—this pronunciation from the

very beginning should be perfectly correct and distinct,—and if they are recited in concert, only clear, natural tones should be used, free from drawl and disagreeable sounds; their meanings should be fully understood, that they may readily use them in conversation. The knowledge gained through the different means of acquiring the lesson is of more real value than that which is contained in the simple reading lesson itself. I remember once telling a class of little ones who, in the beginning of the school year were having some trouble with the expression, to pretend that the chairs, table, pictures, etc., in the room where they were preparing their lesson, were listening to the pretty thoughts they were bringing out, and that they would not understand them if they did not talk their stories in bright clear tones. A very hearty, happy laugh responded, but the suggestion had its effect; for I was informed afterwards, confidentially, “it was such fun to talk to tables and chairs.” But it amounted to more than fun for myself in the added improvement which was very soon evident in the class.

It grows clearer to me every day in the school room, that the children want so little from books that to be successful we must be original in our methods; must draw our illustrations from their free, untrammelled, every-day life with as much humor and brightness as shall strike the happy little minds and hearts, that it shall be stored up for future use in years to come. With this preparation there is no danger of the child's reading through spelling; all the punctuation points have been previously taught, new words are known both as regards pronunciation and meaning, and only the expression is left for the home-work; and the very fact of having something to do for himself, by himself, is an incentive to an intelligent child, as future results will testify. Again, the recognition of words at sight while comparatively easy for some, is often very difficult for others who may be even better students than the more fluent readers, but who, becoming embarrassed and confused, stumble through the reading lesson which if a few minutes had been granted them, would have been acquitted in a far different manner. It is not my intention to depreciate the importance of reading at sight. I know it is of great value to the child. It is my custom to alternate—a prepared lesson one day, the next a reading at sight—and the latter part of the school year is devoted almost entirely to sight-reading.

CRITICISM.

While the best criticism necessarily comes from the teacher, still it has been my experience that children trained to criticise, capable of expressing themselves clearly in regard to the manner of reading of their associate class-mates, always reap a benefit themselves in their own reading. By appointing one or two critics during a lesson, each to give one criticism on every reading under the watchful guidance of the teacher, besides adding life to the lesson, a teacher prevents all that promiscuous calling out, which so disorders a class, oftentimes doing more harm than good. This effort to criticise calls for some command of language, even from a very little child; and

however simple it may be, if it be correct and to the point, it adds just that much to the child's knowledge. The spirit of criticism should be kindly; for even little tongues can be sharp sometimes, and we know little hearts feel very keenly; but if in the beginning this is curbed with decided firmness, but gently, it will soon vanish.

[Conclusion to follow.]

SWARTHMORE NOTES.

ISAIAH V. WILLIAMSON, of Philadelphia, whose death occurred on Fifth-day last, had been a liberal giver to the college. He endowed the Professorship of Engineering last year and had given various amounts at other times. President Magill made fitting remarks upon his death in the morning collection for religious exercises on Seventh-day. His will, which was admitted to probate on the 11th inst., leaves a further bequest of \$25,000 to the College, to go into the general endowment fund.

—A committee of twenty-one from the Board of Managers, Faculty, Alumni, and Senior class has been appointed for the consideration of the celebration of the twentieth anniversary of the founding of the College. A number of plans have been suggested for the Bi-decennial, as it is called, but no definite arrangements have as yet been made.

—The new athletic rules which have recently been adopted here have received a great deal of favorable comment. The rules are calculated to raise the standard of Swarthmore athletics both on the college grounds and on other fields, as now no entries in any sports will be permitted except by persons who have attained a fair standard.

—*The Halcyon*, the college annual, has gone to press and will appear about the middle of next month. The class of '90 expect that it will be the best in the history of the college.

—The contest for *The Phoenix* oratorical prizes will be held on Sixth-day, the 22nd inst.

—The Athletic Association will hereafter award medals to all persons, other than those winning first and second places, who reach certain standard of excellence. The medals will be bronze, while first place secures a gold medal, and second place a silver one.

IN MEMORIAM.

E. S. J.

ONE quiet, cheering presence is no more

With us on earth. But in their upward flight

Such sweet and healthful spirits, heaven's door

In passing through, a moment leave ajar,

That down on us may gleam the blessed light.

And if in such a transient glimpse, so fair

The spirit world of God shall seem to be,

What charms unspeakable, what wonders rare,

What varied loveliness must cluster there,

What wealth of love and truth we yet shall see!

"Nay, fear not for your loved ones," saith a voice,

"Nor mourn uncomf'orted. Thus much I tell:—

All silence is not death; ye should rejoice

That all who die forever with Me dwell;

For I am, in the silence. All is well."

A. L. D.

THE OLD FRIENDS.

WHERE are they scattered now,

The old, old friends?

One made her dwelling where the maples glow,
And mighty streams through solemn forest flow
But never from the pine-crowned land of snow
A message sends.

Some meet me oft amid

Life's common ways;

And then perchance a word or smile declares
That warm hearts throb beneath their load of cares;
For love grows on, like wheat among the tares,
Till harvest days.

"But some have fall'n asleep;"

The words are sweet!

O friends at rest beneath the blessed sod,
My feet still tread the weary way ye trod
Ere yet your loving souls went back to God!
When shall we meet?

O thou, Divinest Friend,

When shall it be

That I may know them in their garments white,
And see them with a new and clearer sight,
Mine old familiar friends—made fair and bright,
Like unto Thee?

—Sarah Doudney.

For Friends' Intelligencer and Journal.

FROM MONTEREY, CALIFORNIA.

As I sit writing by the spacious window of my apartment in this great caravansary, and breathe the fragrant spicy odors, as from "Araby the blest," wafted from gardens of the rarest exotics, and listen to the songs of birds, in the paradise of eternal spring, I can scarcely realize that it is mid-winter by the almanac, and that Old Boreas is holding high carnival away across the continent on the shores of the sister ocean.

This is Monterey, one of the famous seaside resorts of this wonderful flowery land, and the hotel referred to, the Del Monte, whose doors swing open to health and pleasure seekers from January to December.

No pen-picture can do justice to the surroundings. Glimpses caught here and there upon the sensitive paper inside the camera can give at best but a faint idea of the reality.

Leaving San Francisco, we ran southward some one hundred and twenty-five miles to reach here. Our course lay through the beautiful valley of Santa Clara, closed in by the coast range of formidable foothills. The scene all along appeared as one in the June of eastern lands. Ploughs were plunging through the mellow earth, turning the green sod; great fields were already covered with the fresh young grain. Gardens of vegetables, laid out in the straightest of rows, or in terraces along the western slopes, looked inviting, with their contents ready to be gathered for the table. Other fields were so carefully cultivated, so free of all weeds, that they appeared as if swept and then thoroughly combed. Here and there, over the level stretches, were the native live oaks, just as artistic nature had grouped them. Thanks to the appreciation of the Califor-

nians, they do not ruthlessly fell their trees, and the grateful, plentiful crops spring up and grow in the shadow of their overhanging branches.

I wonder as I look out, if one would not weary of this ever present summer and spring? We are creatures to whom variety and change are as necessary as the air we breathe. Would there not be longings for the glorious tints of autumn, the solemnity of falling leaves, for the crisp morning air to tingle our cheeks, and even for the wintry winds and the soft white mantle of beautiful snow?

We whisk through thriving little towns on our way; the houses, as is the custom in California, are painted white, and shadowed by the tall fringed eucalyptus trees. Here and there are parks near the roadside, with their luxuriant growths of palms and semi-tropical trees, hemmed in by green banks of cypresses. Now and then we catch a glimpse of white sails of ships to our left in the outstretched arms of the bay.

Santa Clara and San José (San Ho-sa) are the two important towns of the valley. A few miles after leaving the latter, and just as the setting sun is casting a soft, roseate hue over the hills to the east, the round white dome of the Lick Observatory gleams from the summit of Mt. Hamilton. It is fourteen miles away in a direct line, in latitude $37^{\circ} 25'$, and 4,448 feet high. The site was selected for the astronomical observatory which was endowed with the sum of \$700,000 by the will of James Lick who died in 1876. After Mr. Lick announced his intention of endowing an observatory to be established on a mountain top, the French government established one on the Pic du Midi, and the Italian government one on Mt. Etna.

We reach the Hotel Del Monte, as we did the Raymond in March last, under cover of night, and lie down to rest, with the swash of the low surf sounding in our ears. The original Del Monte was burned some two years ago, and this enormous pile, erected above its ashes, was completed just one year ago. Its interior is after the most modern and improved plan, and its appointments are luxurious in the extreme. It is noted for the perfect cleanliness in which it is constantly kept. It is told of a guest who came bustling into the office one morning gruffly demanding his bill and surprising the clerk by the remark that things did not exactly suit him, and he was going to depart. When the cause was demanded by the astonished clerk, the reply was, that a fly speck had been discovered upon the railing as he descended the stairway!

This extensive building with its imposing front, and several annexes, will accommodate seven hundred and fifty guests.

It is situated near the eastern edge of a natural park containing about two hundred acres, some eighteen or twenty of which form the pleasure grounds, and are in the hands of the landscape gardener who has exercised his every gift in laying them out in the most artistic designs. Other lands have been laid under contribution for the finest and most rare of tropical trees and plants, many imported from Australia, Africa, New Zealand, and other coun-

tries. The garden of cacti is "a joy forever," containing eighty varieties of the most odd and curious growths. Beneath these, and the tall, white plumes of the pampas grass are beds of rare plants and brilliant flowers, which are native to no other than a sunny clime. It is said that in no other place in the world is there such a collection of an equal number of varieties grown in the open air. Here the lovers of Nature may wander for a whole day, through ever varying and changeable scenes and still find new beauty wherever each diverging path may lead. In his course, he will pass under gigantic old pine trees, into the deep shadows of the live oaks reaching out overhead their grotesque branches, twining and intertwinning into a veritable roof-tree; he may enter the cypress maze, with its intricate labyrinths ever misleading him from the central goal. If he gets out again, he will take one of the inviting shady walks that lead into hitherto undiscovered gardens of choice roses—and on into others of exquisite flowers, hid away, for a delightful surprise.

Walking down to the quaint old town of Monterey, we came across a convenient Jehu who dumped us into his ambulance and drove us the usual round of sight seeing. First, to the old Mission Church, built about one hundred years ago. We jumped out and entered, obeying the injunction printed and hung on the sides of the church: "If you do not believe, keep silent." The interior is anything but inviting, the attraction being its antiquity. The altar is bedecked with bunches of gay paper flowers, tall candles are grouped about a most pitiable looking figure of Jesus upon the cross, and pictures of saints, hung on the damp, musty walls. We do not linger long in such an atmosphere. The walk leading to the church is paved with the dissected vertebrae of whales, and the bleached jaw bones of a whale form the posts of the gateway.

The old Block-House and Custom House, built of adobe, were pointed out to us, also a dilapidated looking building, once the headquarters of General Fremont. On an elevation close to the Bay are the battered remains of the old Mexican and English forts, and on the banks of a little stream pouring into the Inlet is erected a huge cross, with the date, June 3d, 1770.

In the month of December, 1602, says the *Del Monte Wave*, Don Sebastian Vizcayno, acting under the instructions of Philip III., of Spain, sailed into the placid waters of what is now known as Monterey bay, and landing with two priests and a number of soldiers, took possession of the country in the name of his royal master. A cross was erected by Vizcayno, and religious ceremonies were performed at an improvised altar, beneath the gracious protection of an umbrageous oak. This oak, though ragged and bent, and almost bereft of its branches, still stands an old land mark.

Monterey is delightfully situated on hills sloping to the water's edge, with a grand ocean outlook across the Bay. In earlier days it was the most important shipping point along the coast. The remains of old whaling stations are yet to be seen. In the tumbled down buildings are huge black tanks falling

to pieces, once used for rendering the blubber into oil. Here was the capital of the Territory, previous to the American conquest, and here the authority of the United States was first established, July 7th, 1846.

A charming drive of about five miles brings us to San Carlos, or Carmel Mission, at the head of the little Bay of Carmel. This mission was one of four established toward the end of the 18th Century by Padre Juanapera Serra, this one being founded in 1770. In the church-yard lie the remains of the venerable old priest, who was borne in Malorca, Spain, and died in this country in 1784. The iron grated door of the church was opened by a little Portuguese boy, who demanded a dime apiece before we could enter the enclosure, with its uninviting ground floor, and air of dreary desolation. These missions are losing their charm of antiquity and ancient style of architecture by undergoing a modern restoration. Its exterior is modeled after the old Spanish style, with its twin bell towers and mound-shaped roof, the facsimile of the Syrian Mt. Carmel. After making a picture of the old ruin, we drove through lovely green pasture lands and up steep rocky slopes, until from an elevated position we looked down upon the Bay of Carmel. The wind is blowing stiffly, and the sea rolls heavily; great waves some twenty feet high rear up to their utmost, poised for a moment, disclosing an intense green, then pour a long line of white foam, breaking with an awful thunder over the black rocks jutting out of the sea, and die away in gentle ripples on the sandy beach.

No one should visit California without coming to Monterey, and no one should see Monterey, and have the misfortune to miss the seventeen-mile drive, which takes you up the Bluffs through Pacific Grove. This "Christian Seaside" forms a permanent campground, where hundreds of people spend months of every summer in tents and lodging houses. The retreat had its origin in a Methodist camp-meeting. The participants were so well pleased with their first experience there, that they formed an association, obtained control of the land, and made arrangements to spend some months there every summer.

The property is now owned by the Pacific Improvement Company, which pursues the same general policy as that originally adopted for the Evangelical Association, and the "moral and prudential" management is still subject to a board of clerical managers. We drove through this Grove for several miles, the road overhung by pines and live oaks with long, graceful moss suspended from the branches, and beds of ferns underneath. Here and there we catch glimpses of the ocean, and finally emerge into open daylight, and look over the blue Pacific shading off to a level line against the white sky. Not a ship breaks the line of monotony, not a cloud trails its shadow over the deep. We drive up the steep cliffs overhanging the shore, the artist unloads his photographing outfit, and goes to work, while we clamber down to the sandy beach where the waves cast up beautiful shells and sea mosses. Out a short distance, black rocks in great masses are piled up and on them are perched a vari-

ety of water fowl,—pelicans, wild geese, ducks, and sea gulls; bellowing seals, black, and of a greenish color, have floundered up the rugged sides and lie basking in the sun.

These denizens of the land and sea watch us calmly from a safe distance.

Cypress trees of enormous growth, resembling, as I imagine, the Cedars of Lebanon, are just here on the coast, standing as grim monuments to the buried ages, storm-swept for hundreds of years, their furrowed trunks bending inward, away from the seas. "Botanists and tree lovers," says Dr. Asa Gray, "have a special interest in cypresses, macrocarpa and Pinus insignis, on account of their very restricted habitat, and for their value as ornamental trees."

The first, the Monterey pine, is known in the wild state, only on the oceanic edge of the notable coniferous grove, which extends a few miles between the Bay of Monterey and the narrow Inlet of Carmel. The large cypress trees of Monterey grove, most picturesque in character and position, are only a dozen or two in number. They are confined to the rocky and wind-beaten headland of the immediate shore. In view of their precarious position, it was gratifying to find at certain points that a goodly number of thrifty young trees were successfully competing with the pines, a short distance inland, yet hemmed in between the slowly encroaching ocean on one hand, and the forest of pines on the other, and the future of the unique tree is certainly very precarious.

Our route homeward leads us away from an ocean view, but down by the edge of leafy woodlands, into little valleys, through which are blowing the salt sea breezes,—by tiny sheets of water left by the retreating tide, and once we catch sight of the Bay of Carmel as the yellow light of the setting sun is flooding the waters, and then we plunge into the piny grove again.

Soon we run across a Chinese village. We recognize it by the reds, and blues and yellows,—bits of gaudy coloring that light up the dingy huts and tents that are built close to the edge of a little inlet jutting up into the silent woods. These are the "Toilers of the sea," who earn their rice and roast pig by dint of fishing, and gathering shells to beguile travelers like ourselves. And who could resist the importunities of a small Chinese maiden, clad in her gown of royal purple, red silk trousers, and an indescribable head gear made up of ribbons, and flowers, and with the tiniest of feet encased in embroidered shoes? She approaches our carriage, reaching up to us specimens of her wares, and modestly says, "One shell five cents, one big shell ten cents," in the purest English. Some of these shells are arranged on the mantel in our room.

Only one week with such surroundings! The last day of all, the Sabbath, we seek no place for worship, save "God's first temples:" what place could there be more fitting for Divine adoration, for the soul's stillness, that it might realize in the full sense God's wisdom, and goodness, and love, than here beneath these venerable trees, and in the midst of His wonderful creation? What need we here—or elsewhere, indeed—for strains of music save that of the joyous

birds, to accompany our most sincere and worshipful heart songs?

But our time for "Adios" has come, and we must give place to others who seek this favored land.

Second month 3. EMILIE PAINTER JACKSON.

"MAUMMA": A SKETCH OF THE SOUTH BEFORE THE WAR.

(Concluded.)

The gentleman who, as a friend of their mother, had given them a home, was a widower with one son, a youth of perhaps eighteen. Neither was at home, except at meal-time and bed-time, leaving the conduct of household affairs almost entirely to their domestics. Long years without a mistress these, as may be supposed, were of the most "upper-handed sort" as negroes say. Conceive one trained to thrifty, methodical ways brought into contact with such a set! They, on their part, eyed with suspicion a specimen of their race so unknown to them.

"It frets me sore, daughter!" said "Maumma" to me, the confidant of her cares. "Yet I don't know what I can do. They abuse the good man's kindness and waste his stores, but I can't prevent it. They are real sassy to the children, who, not being used to ill-mannered niggers, can't abide 'em, and that keeps me worried lest some day they'll out with their goings on to grandpa; particular little Connie, who is his pet; and that would be so upsetting to the old gentleman. Only last night when he asked her 'how she liked Charleston?' she said, 'very well, but there was some things it could take pattern in by the West.' 'And what's that?' says he. 'Why, in manners,' says she. 'Say you so, gypsy? What fault have you to find with the manners of a Charleston gentleman?—and few enough you could have seen as yet but me, and what is the matter with me?' 'O, not you, Grandpa.' 'Well, what Charleston gentleman should take pattern by your Prairie chaps?' 'I don't mean gentlemen; I never said the word. I mean your Charleston niggers;' which gave me such a scare I called her to come quick to me, so he might not ask her more. Then they wrangle together, those niggers, and use such words as make the girls wonder, never having heard them, and me ashamed of my own color. All I can do is to keep the poor children up stairs as much as I can, though its not healthy to shut 'em in doors."

Nor was this her only trial. Mr. S. could scarcely spare more than enough to educate his girls, and it was as much as she could do to keep them neatly dressed with the little money he could furnish for this purpose. On more than one occasion I discovered that she was trying to supply the deficiency out of her own savings. Her alacrity and neat-handedness were wonderful to me. I knew that she did all their washing and mending with her own hands, because one day on her going from my house she had begged me to let her "do up" my laces and fine things, as it would be "no trouble at all."

"Not to one so rheumatic?"

"Well, they are trifles."

"You see, Miss Mary," said Isabel, "she will not pay for our washing, because she says the people

charge too much, and do it so badly, and she loves to do up things nicely; and you may as well give up to her, she's so persisting!"

By-and-by an anxiety from another source crept in to harass that loyal heart. As usual she took her chances while the "children" were at school to trudge down town to me for advice.

"It's about letting them stay down stairs with Master E. after tea. He never used to be in till bedtime when first we came. But here lately, he comes in to their tea, and doesn't go out again."

"Is he not a well-behaved lad?"

"He is quite a young man now, daughter. There's naught against him so far's I know. But he 'tices them into games and treats them like little girls. 'Tis all well enough with little Connie, and maybe even Miss Jessie. But I doubt my mistress would have been vexed to think of Miss Isabel being drawn into sich boisterous games. Poor, dear child she sees no harm,—how should she used only to romping with her sisters on them wild pararies, and only a poor servant woman like me to set her right? So when I tell her she is too big to let a young gentleman have his sport with her that way, and be no kin, for all she calls his father grandpa, she thinks very hard of me, and comes up stairs quite pouting over it. Perhaps you'll kindly set me right wherein I'm wrong, and talk it over with her? She thinks the world o' you, daughter!"

On another occasion, when I had sent the carriage to bring these motherless ones for a holiday at my house, I noticed the depression of their gentle caretaker and asked the cause. She made no reply; the two elder girls exchanged looks also in silence; but little Constance, leaning on "Maumma's" knee said reproachfully: "I am sure one of you was cross to her, for she was crying this morning while she was dressing me, and would't say what ailed her, but cried all the more. Ask them, Miss Mary, and see if I'm not right!"

Then Isabel, after some hesitation spoke: "I don't think I said anything to make her cry. I did have a dispute with 'Maumma' which we could not settle; but I promised her to abide by your decision, Miss Mary, and so I will." Then I learned the difficulty. As these girls became better known they received invitations to the houses of their schoolmates; and of late these had been multiplied, and from simple Saturday dinings-out had assumed the more formal state of evening gatherings. Of course it was a natural consequence that as pretty girls and well-mannered they should attract notice, especially Isabel, now tall and womanly in looks and ways; and just here was the point of disagreement between nurse and charge. For whereas "Maumma" had hitherto carried her darlings to these evening parties and gone to bring them home, with no thought of gainsaying on the part of these children of nature, no sooner had society thrust itself into view than what had seemed a matter of course then, was now a thing to be scouted. "It looks perfectly absurd," said Isabel warmly; "to see 'Maumma' close on our heels: and I had to tell her she would make us the laughing stock of our acquaintances."

"She always 'followed at our heels,'" said I, "when we went to evening gatherings."

"Yes: but Miss Mary, you were but a child then!"

"Well, yes, a younger one, certainly, than you are now. But Jessie has not spoken," said I, turning to her: "How do you feel, my dear, as regards being made the 'laughing stock' of your acquaintances?"

"O, Jessie!" cried Isabel, "she does not care an iota one way or another!"

"Is she so insensible?"

"Jessie is altogether different from Isabel!" interrupted Constance.

"Let Jessie speak for herself, if you please. Tell me your feeling about this, won't you, my dear?"

"I think" said Jessie timidly, "it is quite natural for Isabel to feel more sensitive about it. She is a young lady now."

"O, indeed? Does that mean you are not one?"

"I mean that she is older and not so childish as I."

"One year—hardly that many months her junior does not seem to me to throw you so much in the shade. You are certainly quieter, Jessie, but I do not see that you are any more childish."

"Well, but I am really younger," she proceeded in her mild way. "And besides Connie is right. There is a world-wide difference between us—no two sisters could be more unlike. I'm duller, much duller than she. I never feel hurt by things that are offensive to her. I like to go out when she wants to go, but I don't really feel the need of it as she does, and often would as lief stay at home. When I do go, I am much better pleased to look on than to take part in the amusements. I know it looks stupid, but I'd rather be quiet."

"I understand. Still I have not yet reached your view of the disputed point?"

"O—about 'Maumma's' following us around Well—the truth is I can see no more objection to it now than before. That is speaking for myself alone. But—then—Isabel is different. She has—has more friends than I—friends among the—the boys."

"O; the boys?"

"Yes, of course our girl friends have brothers and as I am dull, and like best to be let alone, they don't bother about me. But they like talking to gay girls, and so they always want to go home with Isabel, and she can't always decline their politeness, and so—and so, you see, it is what folks here are not used to seeing—a girl with an escort followed by a—her good, old 'Maumma.' I often try to coax 'Maumma' to take me round another way home, but she will not."

This was the longest speech I had ever drawn from the shy Jessie. While I reflected how best to advise them, the impulsive Isabel resumed: "I'm afraid that I did seem unkind. But I did not mean to, nor to be ungrateful. Poor old 'Maumma!'" leaning forward and fondling the old, withered hand, hardened in her service. "Forgive my crossness! But few can know all you are to us, and it vexes me to have them liken you to a watch-dog."

"Them outsiders can't hurt me da'ling! 'Tis only when you've set against me, that I'm all cast down."

"Well, but, there now! let that point drop. Consider those tiresome night-walks and those long minutes waiting at people's doors like a common lackey, and you a martyr to rheumatic pains!"

"Maumma" shook her head without another word of protest; but her eyes, turned wistfully upon me, were her best intercessors, and drove me into the breach.

She was very soon, however, after this visit, released from responsibilities of this kind. Mr. S. was married again; and both his new wife and himself desired their return to Texas. He had done violence to his affections in sending them off for their advantage. Now that he had a mistress in his household, and one too of suitable years to be a discreet friend to his children, he could not but recall them, for there was besides an excellent school close by. His business, as before, precluded all possibility of his going for them himself; but if "Maumma" had no desire to stay without them, and if she felt equal to the long, tedious journey back, he could trust them entirely to her as before.

"'Tis but another hard wrench for me," she said.

"Worse than before. I'm an older woman now. But what's to keep me here? I've seen you married and settled with your good man. Drusilla¹ lies dead in her furrin burying-ground. Who is there to follow, but these I promised never to leave? I don't know Mass S.'s new lady. Maybe she's a real one; maybe not! so far as looking with favor on another woman's children; so, God willing, I'll stand by 'em to my dying day." And so she did.

I leave you, reader, to follow her, in your mind's eye, an ignorant, no, no, not ignorant, but unlettered woman through these Southern States; across wilds in lonely stage-coaches; down turbulent rivers amidst all sorts of characters then flocking to border-life. I have no measured terms for such an exploit. On their return home her "da'lings" kept me posted as to her welfare. One of the three sisters wrote me at least quarterly, until at last came tidings of the closing scenes of her life.

"Her rheumatic pains wore her away. But we never could know how bad they were she was so patient and uncomplaining. Little did we dream she was so near the end. She herself broke it to us one day when Connie was reading to her 'the blessed Word,' as she called it. She loved to hear it to the last. Indeed, except to talk about you, she seldom was drawn away from that subject—her 'heavenly home,' she said; and that there she knew she should be with you again some day. She lived and died a Christian."

IN all human institutions a smaller evil is allowed to procure a greater good: as in politics a province may be given away to secure a kingdom; in medicine a limb may be lopped off to preserve the body. But in religion the law is written and inflexible, never to do evil.—*Goldsmith.*

EVERY day is a day of crisis; every hour is the hour of destiny; every moment is the nick of time.—*Lyman Beecher.*

¹ Her only child.

A CONVERSATION WITH THE GRAND LAMA.

GEORGE KENNAN'S contribution to the *March Century* is a description of his visit to the Grand Lama of the Trans-Baikal, whose portrait forms the frontispiece of the number. The article is profusely illustrated, and from it we quote the following:

"After dinner I had a long talk with the Grand Lama about my native country, geography, and the shape of the earth. It seemed very strange to find anywhere on the globe, in the nineteenth century, an educated man and high ecclesiastical dignitary who had never even heard of America, and who did not feel at all sure that the world is round. The Grand Lama was such a man.

"You have been in many countries," he said to me through the interpreter, "and have talked with the wise men of the West; what is your opinion with regard to the shape of the earth?"

"I think," I replied, "that it is shaped like a great ball."

"I have heard so before," said the Grand Lama, looking thoughtfully away into vacancy. "The Russian officers whom I have met have told me that the world is round. Such a belief is contrary to the teachings of our old Thibetan books, but I have observed that the Russian wise-men predict eclipses accurately; and if they can tell beforehand when the sun and the moon are to be darkened, they probably know something about the shape of the earth. Why do you think that the earth is round?"

"I have many reasons for thinking so," I answered; "but perhaps the best and strongest reason is that I have been around it."

"This statement seemed to give the Grand Lama a sort of mental shock.

"How have you been around it?" he inquired. "What do you mean by 'around it'?" How do you know that you have been around it?"

"I turned my back upon my home," I replied, "and traveled many months in the course taken by the sun. I crossed wide continents and great oceans. Every night the sun set before my face and every morning it rose behind my back. The earth always seemed flat, but I could not find anywhere an end nor an edge; and at last, when I had traveled more than thirty thousand versts, I found myself again in my own country and returned to my home from a direction exactly opposite to that which I had taken in leaving it. If the world was flat, do you think I could have done this?"

"It is very strange," said the Grand Lama, after a thoughtful pause of a moment. "Where is your country? How far is it beyond St. Petersburg?"

"My country is farther from St. Petersburg than St. Petersburg is from here," I replied. "It lies almost exactly under our feet; and if we could go directly through the earth, that would be the shortest way to reach it."

"Are your country men walking around their heads downward under our feet?" asked the Grand Lama with evident interest and surprise, but without any perceptible change in his habitually impassive face.

"Yes," I replied; "and to them we seem to be sitting heads downward here."

"The Grand Lama then asked me to describe minutely the route that we had followed in coming from America to Siberia, and to name the countries through which we passed. He knew that Germany adjoined Russia on the west, he had heard of British India and of England,—probably through Thibet,—and he had a vague idea of the extent and situation of the Pacific Ocean; but of the Atlantic and of the continent that lies between the two great oceans he knew nothing.

"After a long talk, in the course of which we discussed the sphericity of the earth from every possible point of view, the Grand Lama seemed to be partly or wholly convinced of the truth of that doctrine, and said, with a sigh, 'It is not in accordance with the teachings of our books; but the Russians must be right.'

"It is a somewhat remarkable fact that Dr. Erman, the only foreigner who had seen the lamasery of Goose Lake previous to our visit, had an almost precisely similar conversation concerning the shape of the earth with the man who was then (1828) Grand Lama. Almost sixty years elapsed between Dr. Erman's visit and ours, but the doctrine of the sphericity of the earth continued throughout that period to trouble ecclesiastical minds in this remote East-Siberian lamasery; and it is not improbable that sixty years hence some traveler from the western world may be asked by some future Grand Lama to give his reasons for believing the world to be a sphere."

THE PROSE WORKS OF J. G. WHITTIER.

In a review of the prose works of John G. Whittier, the *Literary World*, Boston, says: Each new edition of Mr. Whittier's writings is a distinct benefit, moral and literary, to the world. His life and genius are a beacon light above the confusion of ideals that surge and struggle noisily, drawn here and there by the conflicting currents of modern thought. It is a good of which the world is beyond reckoning, to have such a man among us, whose voice we may hearken to, follow, and whose faith and ideas are standards by which to measure the progress of the times. An Italian ecclesiastic lately wrote, in a private letter, "Fortunate America, whose great poets are also her great saints!" The saintliness of Mr. Whittier is, moreover, of the most human and attractive type, his hopes and aspirations are like those of us all in our best moments, but he, standing habitually where others attain only with effort and rarely, holds out to us a hand to aid and uplift. The years during which his physical vigor and brilliant spirit, immortally youthful, have maintained him in the prime of manly strength far beyond the seventy years of common existence, have been crowned with the reward of honor and peace. He has had the felicity to see his songs materialize into national law. His poetic gift, to which he denied certain aesthetic satisfactions until its severe mission should have been fulfilled, has won the leisure to delight itself in beauty. It is as the poet that Mr. Whittier is chiefly known and

honored; his prose, however, is not less characteristic and admirable. In reading the volumes which contain his prose writings, one receives afresh the impression of the great vitality and purpose of every utterance of his. He has written upon a wide variety of topics. The conflict with slavery and the advocacy of political reforms have engaged his pen in noble and efficient labors. In his considerations of spiritual things, his prose, like his verse, possesses a singularly clear vision and verity, which seem a realization of the blessings pronounced upon the pure in heart. His personal and historical portraits are just, sympathetic, and strong; his reviews are upon the generous lines of true criticism; his tales and sketches are genuinely dramatic, running easily through the scale of natural human sentiment. An especial trait of Mr. Whittier's genius is manifest in his occasional writings—for instance, letters in reply to invitations to anniversaries or public meetings. These replies are not the mere passing phrases of compliment or display of graceful rhetoric upon such occasions, but possess durable value of sentiment and language and remain significant memorials. Notable among these occasional letters are the expression of lofty faith which pierced the cloud laid over the land by the death of President Garfield; the magnificent utterance regarding Italian unity; the tender letter to the old schoolmates of Mr. Whittier, at Haverhill, and the beautiful tributes to Professor Longfellow and to Dr. Holmes.

In this new edition of Mr. Whittier's works the publishers have included not a few writings hitherto uncollected, in compliance with the rightful wish of the public, which craves acquaintance with everything that this beloved and revered poet has written. The purity and directness of his style, the passion and elevation of his genius, blended and balanced by his sound judgment, render Mr. Whittier a living classic. And in him honor is due not alone to the poet, but to the prophet who warned, to the patriot who aided to deliver his country from the sin of slavery, to the friend of progress and peace. May the days of Mr. Whittier be long and full of contentment in the land which he honors by his presence!

LINCOLN'S DISINTERESTEDNESS.

ONE cannot but be impressed anew by the fact that one of the most effective equipments of Abraham Lincoln for the performance of difficult duties was a quality which he shared with Washington, and which each possessed to a conspicuous degree—the simple but tremendously powerful quality of disinterestedness. It was tact, *i. e.*, intelligence added to kindness, which helped make Washington a successful leader; it was tact which helped Lincoln to steer his Administration not only through the perils of war but between the rocks of selfishness and faction—but without purity of purpose, without absolute disinterestedness, neither could have done so well, so completely, the work assigned.

With the enormous and enormously increasing populations, the seething social movement, and the ever-threatening political dangers of the New World, there are not and never will be times of perfect peace

and quiet. Every Administration, every Congress, State, community, every year, every day, has its emergency. In our uncertain and ever-shifting scheme of general and local governments good men, bad men, half good and half bad men, are continually pushing or being pushed to the front as leaders. Now and again an unscrupulous schemer attains a notable official or unofficial eminence; and his disgraceful and pestiferous "success" tends towards the imitation of his methods on the part of men of easy consciences. The example of Washington, the centennial of whose inauguration is so near at hand, and of Lincoln, who was with us only yesterday, and whose pure and devoted life is now being told for the first time—there will never be a moment when the example of these men will cease to be among the most saving forces of the nation.—*The Century.*

ARTESIAN WELLS IN DAKOTA.

The artesian wells of Dakota are probably the most remarkable for pressure, and the immense quantity of water supplied, of any ever opened. More than a hundred such wells from 500 to 1,600 feet deep, are to-day in successful operation, distributed throughout twenty nine counties, from Yankton, in the extreme south, to Pembina, in the extreme north, giving forth a constant, never-varying stream, which is in no wise affected by the increased number of wells, and showing a gauge pressure in some instances as high as 160, 170, 175, and 187 pounds to the square inch. This tremendous power is utilized, in the more important towns, for water supply, fire protection, and the driving of machinery, at a wonderful saving on the original cost of plant and maintenance, when compared with steam. In the city of Yankton a forty-horse power turbine-wheel, operating a tow-mill by day and an electric light plant by night, is driven by the force of water flowing from an artesian well, the cost of obtaining which was no greater than would have been the cost of a steam-engine developing the same power, not counting the continual outlay necessary (had steam been employed) for fuel, repairs, and the salaries of engineer and fireman. What has been accomplished through the aid of natural gas and cheap fuel in building up manufactories elsewhere, may some day be rivalled on the prairies of Dakota by tapping the inexhaustible power stored in nature's reservoirs beneath the surface.—*Harpers Magazine.*

NOT LEFT OF GOD.

We are not left of God
So long as a rose blooms at our window pane;
So long as the sun shines, and the soft rain
Calls forth the early violet from the sod,
If but a wild briar by our pathway nod,
After its winter death awakened again.
Seeing its life we may forget our pain
Of unbelief. Who brings forth life but God?
He stains with tender tint the lily's lip;
Feels with incessant care the insect crew;
Drops honey for the wandering bee to sip,
In a white ebalice set with pearls of dew,
The glow-worm hath his lamp; the firefly's light
Is but a pledge of love writ on the night.

—*M. F. Datts, in S. S. Times.*

NEWS AND OTHER GLEANINGS.

—The documents and deeds formally ceding the ownership of the historic Digilton rock by the Royal Geographical Society of Copenhagen, Denmark, to the Old Colony Historical Society have been received at Taunton, Mass., by Captain Hall, the Secretary of the latter body. They bear the seal of the King of Denmark.

—A valuable addition was recently made to the National Museum at Washington, being a present of a large number of aboriginal remains discovered in a mound in Florida. The find was the property of Dr. Thomas Featherstonhaugh, and was by him presented to Major Powell. Specimens of decorated pottery and weapons of various kinds are among the articles found. The mound is situated about the geographical centre of the State, and was an unusually large one, it being estimated that fully four hundred bodies had been buried there. —*Exchange.*

—The Council of the London Royal Academy has denied the petition to open their exhibitions on Sundays. The stated reason of the refusal is that the measure could not be adopted without the direct permission of the Queen, who hesitates to assume the initiative in a reform of this kind, believing that the act might prove an embarrassing precedent to the government in relation to the libraries, museums, and other institutions under its control. —*Exchange.*

—Information has been received from Paris that the management of the Paris Exposition have set apart space free of charge for the proposed American exhibit of Indian corn. The intention is to build a handsome corn palace in which the different kinds of corn will be exhibited. American cooks in attendance will prepare corn for food in all the various ways known to the American housewife, and samples will be freely distributed to all who visit the exhibit. The promoters of this display believe it will prepare the way for a greatly increased demand for the American cereal in European markets.

—The Philadelphia Board of Health is alive to the fact that the time is fast coming when the adoption of a system of garbage cremation is practical for large cities. A resolution of that body adopted on the 19th ult., sets forth that "it is the opinion of the Board that destruction of garbage by fire is the best plan of disposing of the waste material in the cities" and that "the department having charge of the matter be requested to adopt this method as the one best adapted to Philadelphia and most conducive to the health and comfort of the community." Accompanying the report was a lengthy communication from Dr. Edward Clark, the physician of the Board of Health of Buffalo, N. Y., describing the method of disposing of garbage in that city. The Merox process, the one in use there, has the advantage of utilizing for fertilizing purposes several of the residual products. Whether this system is more economical than several which are based on the idea of complete combustion, is a matter for determination. A copy of the resolutions was sent to Director of Public Works Wagner. —*The American.*

CURRENT EVENTS.

The death of Isaiah V. Williamson, whose dangerous illness was announced last week, occurred on the 7th instant, and his funeral on the 9th. It was found that he had not signed the additional provisions of his will, by which, among other things, he intended to provide a fund for the maintenance of his new School. The will itself, made in 1874, was admitted to probate on the 11th inst. It devotes \$1,000,000 to various public institutions and charities, and leaves the rest to be ultimately divided

among his collateral heirs. The industrial School has what he paid over to the Trustees, some time ago, about \$2,250,000, which, it is calculated, will establish a school for 300 boys, instead of 1,000, as had been proposed. A place for it has been selected near Media, Delaware Co., Pa.

I. V. WILLIAMSON was born near Fallsington, in Bucks county, Pa., Second mo. 1, 1803. He came to Philadelphia, and engaged in business when quite young. Besides his gifts to the Industrial School, (\$2,250,000 as stated above), and the \$1,000,000 bestowed in his will, it is believed that other gifts in his life-time amounted to a million,—making 4½ millions altogether.

A SLIGHT earthquake shock was observed at 6.30 o'clock on the evening of the 8th inst., at various points extending from Baltimore northward into Pennsylvania, as far as Harrisburg. It was noticed in Philadelphia. No damage was anywhere reported.

A REPORT was received from German sources, on the 9th inst., that in a fight between an American war vessel and one of the German Empire, at the Samoan Islands, the former had been sunk, with all on board. The rumor was not credited.

IN New Hampshire, on the 12th instant, an election was held to decide the approval or rejection of several amendments to the State Constitution. That providing for Prohibition is defeated, a majority of votes being cast against it, and a two-thirds vote in its favor being necessary to adopt it.

DISPATCHES have been received in Berlin, from Africa, reporting the safety of Henry M. Stanley, the explorer, and that he is "marching rapidly toward the East Coast."

NOTICES.

* * * A Friends' Temperance Conference of the Western Quarterly Meeting will be held at London Grove, on First-day, Third month 17th, 1889, to convene at 2 p. m.

All interested are cordially invited to participate.

ELMA M. PRESTON, } Clerks.
ELLWOOD MICHELER, }

* * * The Committee of Philadelphia Monthly Meeting propose having a social reception for members and attenders of their meetings on Sixth-day evening, Third month 29th, between 7.30 and 9.30 o'clock. The company of young Friends from the country and other strangers, in an especial manner is invited, also the husbands and wives of our members, even though they may be members of other denominations.

It will be held in the Parlor and Library Room, 1520 Race street.

* * * A Conference on the subject of Temperance, under the care of Haddonfield Quarterly Meeting's Committee, will be held in Friends' meeting-house, Medford, on First-day, Third month 17th, at 3 p. m.

Friends and others interested are cordially invited.

WM. C. COLES, Clerk.

* * * A Conference on the subject of Temperance, under the care of Concord Quarterly Meeting's Committee, will be held at Friends' meeting-house, Wilmington, Delaware, on First-day, Third month 17th, at 2.30 p. m.

Friends and others interested are cordially invited.

MARY McALLISTER, Clerk.

* * * Circular meetings have been appointed by the Western Quarterly Meetings as follows:

Hockessin in the Fourth month.

To convene on the second First-day of each month respectively, at 2 o'clock p. m.

* * * Henry T. Child expects to attend Friends' Meeting at Wilmington, Del., on First-day, the 17th inst., and a Temperance Conference at the same place in the afternoon.

REALITIES.

OH, never deem this world a dream
Of things which are not what they seem!
For He who hurled through space this world
And the starry skies above unfurled,
Can never lie; and earth and sky
Are what He wrote for the human eye.
The fool, indeed, or child may read
Only the letters with careless heed;
And fail to see what mystery
Contained in the sacred whole may be.
But he whose sight is open to light
Finds the page with heavenly glories bright.
For on Nature's face we can clearly trace
The tokens of Godhead in every place.
In every line God's power divine,
His love and wisdom steadily shine;
In His hand we lie, while with raptured eye
We read His truth on sea and sky.

—*Ex-Pres. Thomas Hill of Harvard.*

From Friends' Quarterly Examiner, (London.)

THE MISSION OF FRIENDS: SOCIAL.¹

BY EDWARD GRUBE.

In a former paper I have endeavored to point out how, in the case of a Society, no less than in that of an individual, the possession of life depends on the consciousness of a Mission; and have also tried to state what, from a survey of the circumstances of its origin and history, appears to be the mission of our own Society. That mission was stated to be the upholding before the world of the principle of the spirituality of religion,—in other words, of the real presence of God in man. The working of that principle on the spiritual side we traced, noting how its acceptance has led to the disuse of outward ceremonies and of a professional ministry,—to the endeavor to maintain a life and worship “in spirit and in truth.”

All this, however, is but one side of the many applications of our central principle; there is another, which is of quite equal importance, but which has been less often handled.

In virtue of the one spirit that dwells in all men, mankind are one with each other. Barriers of race and nation, of rich and poor, of black and white, of heathen and Christian, break down before a vivid realization of the Oneness of Humanity. This has been felt implicitly by all in every age who have had

¹This is a continuation of the paper reprinted from the *Quarterly Examiner* in the issues of this journal First mo. 12 and 19, current volume.]

a true insight into the sacred dignity of man. The sigh of Wordsworth,—

“What one is,
Why may not militant be?”

expressed the aspiration of every heart that has throbbled with the passion of humanity. And so the absorbing desire of such true-hearted souls has been to sweep away the causes that divide man from man, and to raise up those who, through the oppression of others or the evil customs of society, are living beneath their true dignity. In other words, the passion of humanity has been a passion for social regeneration,—for realizing the “Kingdom of Heaven” here below. “There is a sense,” says a modern writer,¹ “which lies dormant with most of us. It may always be awakened, and, once roused it never leaves us. Let us call it, if you please, the Sense of Humanity. It is not philanthropy, nor benevolence, nor sentimentality; it is a thing much wider and fuller than any of these. Peter got this sense when he had the vision of the great sheet. It is the sense of the universal brotherhood.”

Every man who has truly entered into the spirit of Christ has had this sense,—has felt, therefore, that he had a mission *socially*, as well as spiritually. “The still, sad music of humanity” has fallen upon his ears, and has roused him to a sense of the wrong and shame of the oppression of man by man.

Historically, it is true that those who have discerned most clearly the presence of God with man have been foremost in proclaiming the oneness of humanity. The sense of the fatherhood of God has carried with it that of the brotherhood of man. Hebrew prophets of old, coming forth to declare the spirituality of religion, denounced in burning words the selfishness of those who bought and sold their brethren, or who “joined house to house, and field to field,” till there was no room left for the poor. This is true, although their sympathies had not then extended far beyond the limits of their own nation. The early Church, inspired by the spiritual teaching of their Master, tried to carry it into practice by establishing community of goods. The apostle James yields to none of the old prophets in his denunciations of the rich, who kept back by fraud the hire of the laborers that had reaped their fields.

This generalization holds good in measure, though, as we shall afterwards see, with limitations, of our own Society. George Fox and his friends denounced the spirit that leads to this agitation we have always maintained and even through

the "dead ages," in spite of their narrowness and formalism, spiritual giants were evolved,—men like John Woolman and Joseph Sturge, who embodied in themselves the "enthusiasm of humanity."¹ Largely through their efforts the gigantic evil of negro slavery was swept away, and by the labors of such men as they the barbarities of our prisons and the cruelty of our criminal code were greatly mitigated. In our own day we have earnest agitation against the corrupting influences of alcoholic drinking and the State regulation of vice.

These are healthy signs, and show that the "enthusiasm of humanity" is by no means extinct among us. But when we look at the condition of the social life around us, it is impossible not to long for a new development of this enthusiasm. We work on in the beaten tracks, but there are new ones waiting to be opened up. If we have not lost enthusiasm, we are yet deficient in that insight which detects new social needs, and that elasticity which adapts old principles to new conditions. We are lacking in such qualities as those of Woolman, to whom it was given to discern the inherent immorality of the then respectable practice of slave-holding, and to faithfully uphold the true standard, in the face of social displeasure and the disapproval of those in high position in the Society.

There are facts in our social life to-day which demand the earnest attention of Christian people as much as did that of slavery,—facts which, though not new, are coming to the front as they have never done before. The attention they require they are beginning to receive,—more, I regret to say, without our borders than within them. "The air," says a leading Baptist minister,² "rings with proofs that social problems are supreme." Roman Catholics and Anglicans, Baptists and Independents, vie with one another in discussing the social condition of the people.³

How is it with ourselves? So far as I am aware, this subject has never, as such, claimed the attention of our Yearly Meeting. Very rarely, I believe, has it been brought under the notice of any of our subordinate meetings. We are indeed reminded from time to time of our traditional protests against war and against slavery; we have had the evils of drink, and perhaps of licensed impurity, officially discussed. But there appears to be no recognition that as a Church we have any duties whatever in regard to the destitute multitudes around us, beyond the periodical reminder that we are "to be kind and liberal

¹It is interesting to note that the derivation of the word *enthusiasm* is *en, theos*, implying the indwelling of a Divine power. Hence Friends should be in a special degree "enthusiasts."

²Dr. Clifford, in an address to the Baptist Union (Huddersfield, 1888), on "The New City of God."

³For instance: the Catholics last year held an important Congress at Liège, for the special purpose of discussing in an exhaustive manner the duty of the Church in relation to the poverty of the masses. And many of the resolutions come to were of a very Radical, not to say Socialistic, character. The Anglican bishops, in their Conference at Lambeth last year, received and published as part of their encyclical letter a "Report on Socialism." At the late meetings of the Church Congress, papers on social questions have formed a leading feature; and last year, at Wolverhampton, a Socialist was invited to address the Congress.

to the poor,"—a recommendation valuable indeed, but rather suggesting the assumption that undeserved destitution will always exist, and is a necessary accompaniment of our civilization.

It is this assumption that is to a certain extent, I suppose, at the root of our apathy in this matter. But in making it we only show ourselves behind the times. Emphatically this is an age that does not accept facts without inquiry, and does require institutions to justify themselves before accepting them as permanent. It is an age that insists on overhauling traditional ideas and institutions, and examining them in the light of truth and justice. And if it appears neither just nor expedient that a huge class of our population should be born into a condition of sordid misery and degradation, out of which they have little or no hope of escaping, then the spirit of the age demands that this state of things shall be put an end to, or else that very convincing reasons shall be given why to put an end to it is impossible.

The indolent assumption that what has been must be, is, I fear, one cause of our apathy in this matter; but it is an assumption that little befits the fellow-disciples of Fox and Woolman. Other causes there may be, such as the tendency to be contented with a back-eddy rather than the main current of the stream of national life; the tendency spoken of in the last paper, to look to an external standard of truth and duty rather than an inward guide;¹ and ignorance as to the actual condition of the population. This ignorance is, I believe, so general, even among people otherwise well informed, that it may be better before going further to state with some care a few facts. There are those who say, when anyone speaks of poverty, that it is all a mistake; that there is no poverty now worth troubling about, except such as is a wholesome corrective of vice and drunkenness. . . .

But, it may be said, even if things are bad now, they were much worse fifty years ago; and it may be supposed that if we keep on as we are at present, all will come right in time. Undoubtedly Mr. Giffen and others have proved beyond all question that the working-classes, as a whole, are vastly better off now than in 1840. On the other hand the following facts should be remembered:—"In 1840 the condition of labor was extremely low. Indeed it seems to be universally admitted that the period from 1780 to 1840 was the worst in the history of the English laborer, since the feudal system began to decline in the middle of the 14th century. It was the time when self-interest ruled unchecked, when workmen were not allowed by law to combine together, and when society had not yet intervened with its factory legis-

¹This tendency I heard strikingly manifested some time ago, when a valued Quaker missionary was describing the difficulty of convincing certain natives that the practice of slavery was wrong. He said he had often wished that there had been some definite text in the Bible that could be appealed to as authoritative on the subject. Shades of Penn and Barclay! How had those natives been taught? Surely their teachers can have realized but faintly the method of George Fox (itself only the method of Christ revived) who, in the words of Caupon Westcott, "made clear beyond question the power of the simplest spiritual appeal to the consciences of men."

²T. Kirkup, "Enquiry into Socialism," p. 28. (Longmans, 1888).

lation to check the greed of employers. Moreover the period since 1840 has been a time of unparalleled expansion, such as we cannot hope to see again. Not again shall we be likely to have in a single generation such discoveries as those of the applications of steam, gas, and electricity, or the opening up for colonization of boundless expanses of fertile land all over the world. Again it must be remembered that in spite of the great improvement in the material comforts enjoyed by, perhaps, one-half or two-thirds of the working-classes, the "residuum" remains practically as low as ever, and the *position of the whole body tends to become more and more precarious*. As the large system of industry extends, the means of production (land and capital) tend to concentrate themselves in fewer and fewer hands, and the great body of the workers cannot set themselves to work unless it happens to pay an employer to engage them. Hence they have less and less control over the conditions of their employment, and are at any time liable to lose it through a change in fashion or in prices. In this respect their position compares very unfavorably with that of the middle ages, when the guilds so organized labor that all decent workmen were practically sure of employment. The industrial revolution of the last century destroyed the guilds, and introduced the chaos of individual competition. At the passing of every wave of commercial depression, (itself the result of ill-regulated competition), large numbers of honest workmen now fall like apples in an autumnal gale, and many never rise again. They and their offspring go to swell the numbers of the "residuum."

The facts brought out above, both in regard to the destitute and those whom we should rather call the poor, must surely make us think. Nothing surely can be more distinctly the duty of a Christian Church than to investigate, and take measures to remove if possible, conditions that put a bar to the development of the spiritual life of a large proportion of the population. And that our present poverty is such a condition is only too manifest. Where there is the pressure of grinding poverty, it is in nearly all cases impossible for human beings to cultivate a high spiritual life, or to live as befits their true dignity. Mind and spirit are dependent on the body; and if the cravings for food and warmth are unsatisfied, it is very difficult for higher cravings to make themselves felt. Spirit again is dependent on mind; and if the mind is continually occupied with a burden of hopeless care, it is next to impossible for the spiritual life to flourish. Too often the temptation is irresistible to employ the first means that present themselves—alas! only too obtrusively—for temporarily drowning care. Added to this, there is the danger of demoralization inseparable from overcrowding among those who are too poor to afford decent dwellings, and from parental neglect among children whose mothers find it needful to go away to work. It is little less than a miracle, if children brought up amid sordid surroundings turn out other than vicious and degraded.

It is true, indeed, that Christ pronounced blessings on the poor,—blessings which we in our luxuri-

ous homes are very ready to remember in reference to other people, and to forget in reference to ourselves. But it is quite certain that it was not such poverty,—the poverty that degrades and brutalizes,—that he had in mind. The state of things that He contemplated was one in which there should be enough for all to satisfy without anxious care the physical cravings, so that their best energies might be given to higher aims.

That is the state of things which Christ undeniably had in mind as the external condition of his kingdom,—a kingdom which it ought not to have required the sneers of secularists to convince us was meant to be realized here on earth, and not only in some future state. It is in flagrant contradiction of facts to say that such a state of things prevails now. It is a simple mockery to tell the destitute around us to "take no thought for the morrow" (too many of them, indeed, are by long hopelessness reduced to that condition, though not in the sense intended); or that if they will but "seek the Kingdom of God, all things shall be added unto them." Those words were true when uttered, and might be true again if Christians had all along been doing their duty.

[Conclusion to follow.]

THE THREEFOLD RELATION OF CHRIST TO THE PRESENT AGE.¹

A FEW years ago, a lady of more than average intelligence, a member of one of the so-called Evangelical Churches, said to the writer, in the course of a conversation in which reference had been made to the Society of Friends: "I have always thought until quite recently that you Quakers were a set of wild heathen,—harmless and respectable enough, but without any definite religious belief." She admitted, however, that her opinion had been changed somewhat by a more intimate acquaintance with some of the members of the Society of Friends, who did possess a definite religious faith and could give a reason for the same.

Probably every Friend who has had much intercourse with members of other branches of the Christian Church has met the same unwarranted criticism of our Religious Society in some form or other. Very often the charge is presented in words like the following: "Yes, they are good enough people, these Quakers, from the moral standpoint, but they have no religion,—at least they do not believe in Christ." Within the past few weeks that charge—that we "do not believe in Christ"—has been brought to my attention as the utterance of a person of intelligence—a school-teacher—who ought to have known better, but who probably did not care to know better. When it is charged against members of our branch of the Society of Friends (as has been done) that we are heretics, because we do not believe in Christ, it is time that we deny such charges, lest our silence be construed as consenting to them: if our denial be somewhat indignant, it may well be pardoned such

¹An Essay read at the meeting of the First-day School Union of Philadelphia, Third month 8th, 1889, in Race street meeting-house, Philadelphia, by Isaac Roberts.

indignation, because of the utterly unfounded nature of the charge.

It is of importance that we who are interested in First-day school work should know what is said of us by others, so that we may be prepared to meet these and similar accusations when they are presented to us; and it is especially important that teachers in our schools should be able to present to the scholars in them the truths which we as a Religious Society hold, so that they may be able also to meet and answer them; for it is altogether probable that they will hear them much more frequently than will others who are older and better informed.

What then shall be our reply to such charges,—and what should be our teaching to the scholars in our First-day schools? To ignore the question, and say that those who make such attacks are too ignorant to deserve a reply, is not to meet the danger involved in them, but seems a mere evasion. To pursue such a course may seem dignified, but it is certainly neither brave nor wise. What then shall our answer be?

For myself the proper answer to such charges is this:

Instead of its being true that our branch of the Society of Friends does not believe in Christ, there is no other branch of the Christian Church that more fully accepts his truth and more entirely believes in him than do we. We may, and doubtless do, differ from others in our estimate of some of the circumstances that surrounded the life of Jesus, but none can go farther than do we in the acceptance of his teachings as the most important message God has ever sent to his children, in the belief that those teachings are, as he declared they were, both spirit and life; and in the confidence that the anointing Spirit, which made him the Christ, was and is the Spirit of God.

There seem to be several ways in which men may be said to believe or not to believe in Christ, and it is well to have clear ideas in regard to these different ways of looking at and believing in him. To my mind there are three distinct, and yet closely related, ways of regarding him, or (as would, perhaps, be the better way to put it) there seems to be a threefold relation of Christ to the present age. It may be of help to others, as it has been to myself, to describe (even though briefly and inadequately) this threefold relation, and at the same time note what has been and is the teaching or view of the Society of Friends in regard to it.

In the first place, Christ is presented to us of this age as an historic character, a man anointed with the Spirit of God (which anointing made him the Christ) teaching such truths and doing such works as the Spirit of God led him to teach and to do: as he himself said (John xii. : 49)—“For I have not spoken of myself, but the Father which sent me, he gave me a commandment what I should say and what I should speak;”—and again (John xiv. : 10) “the words that I speak unto you I speak not of myself, but the Father that dwelleth in me, he doeth the works.” We can perhaps find no better account of his life-work, of the purpose of his coming and the

power which enabled him to fulfill that purpose, than is given in the book of the prophet Isaiah, from which he himself read in the synagogue at Nazareth, in the presence of those among whom he had been brought up. The account of this incident in his life as recorded in the Gospel according to Luke (4. : 17 etc.), is as follows:

“And when he had opened the book he found the place where it was written: ‘The Spirit of the Lord is upon me, because he hath anointed me to preach the gospel to the poor; he hath sent me to heal the broken-hearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised, to preach the acceptable year of the Lord.’”

From this beginning of his active teaching on to the end of it, the life of Jesus was a continued fulfillment of this prophecy. With the record of that life as given in the four gospels the Society of Friends has never had any controversy; the historical Christ as there presented has always been accepted by our religious body (as a whole) without cavil or complaint. We cannot too highly prize that life which is so perfect an example of the highest attainment of a divinely-led and controlled human life; seemingly so far above our attainment, and yet set before us as the ideal which we should make every effort to attain. Nor can we too highly appreciate what that life, lived at such great sacrifice, has made possible for us in all things that make life worth living,—in freedom of thought and action; in knowledge of the truth, and in the service of the highest good which it has opened up to us. The higher idea we form of the historical Christ as presented to us in the authentic records, and the more closely we follow his example, the more fully will we learn the will of our Heavenly Father, and the more able will we be to do that will.

The second way in which Christ is presented to the present age is as the dogmatic or theological Christ, in the creeds and doctrines of the various branches of the Church bearing his name, each denomination holding that its doctrines are founded on the truth, and present to the world the true Christ. In this age it is generally conceded that each individual has the right, and should enjoy the fullest liberty, of selecting that branch of the Church whose doctrines most nearly embody the truth as he sees it. No man, no body of men, can at this time deny the right of private judgment, nor dare they interfere with religious liberty in its widest sense. The Society of Friends, although without a written creed, has nevertheless a well defined religious belief which has borne fruit in the development of many noble Christian lives which form the best proof of the intrinsic value of that religious belief. “By their fruits ye shall know them,”—and the Society of Friends can doubtless produce quite as good fruit in the shape of devoted Christian living as can any other branch of the Church of Christ. If we prefer to base our doctrines as a Church directly upon the teachings of Jesus himself, if we look to his words as the highest outward authority for the truths we profess, surely we need not on that account be

charged with rejecting him. When such charges as those referred to are properly investigated, they will usually, perhaps always, be found to rest upon a difference of opinion as to doctrine or dogma. We are said not to believe in Christ because we do not accept the doctrines of this or that branch of the Christian Church, but prefer to enjoy our undoubted right of entertaining our own views. Those who make such charges do not stop to think that we could present the same charge against them (were we ready to descend to that plane of action). Granting to others the right to worship God according to the dictates of their own conscience, we quietly claim, and propose to exercise, the same right for ourselves; and for those who have the charge of heresy ready for all who differ with them we have sincere pity, regretting that in their zeal for mere opinion they should thus forget their Christianity. If our branch of the Society of Friends refuses to accept a certain doctrine which other branches of the Christian Church regard as essential, it should be remembered that we do so because we do not find such a doctrine in the teachings of Jesus, and cannot reconcile it with right reason. Regarding him as the highest authority in matters of doctrine, we can appeal to him, as did his disciples of old: "Lord, to whom shall we go? Thou hast the words of eternal life."

But there is another and higher way in which Christ is presented to the present age, and it is with this that the Society of Friends is chiefly concerned. It is as the living, energizing Christ—the Christ-spirit abiding in the soul and controlling the life, revealing the will of God and imparting strength to fulfill that will—that we chiefly believe in him, and surely there can be no higher, no more practical, or more advantageous way of believing in him than this. One of the modern English essayists has used an expression which conveys very fully the idea of the living Christ as entertained by many, if not all, members of the Society of Friends; it is the expression—"the power that makes for righteousness;" what words can better express the work in the individual soul of the Spirit of Christ; a living power which "makes for righteousness" by freeing us from the power and dominion of sin, by revealing to us the will of God, by giving us the purpose to do that will, by granting us the power to accomplish that purpose. It is in this way that Friends are concerned to know Christ,—as a living, vital, purifying presence in the individual soul;—in thus knowing him they carry out the injunction of George Fox, "Friends, mind the Light." It is as such a living power that our ministers have presented Christ in that ministry of the word; one expression which is heard in our meetings more frequently perhaps than any other is, "the light and life of Christ in the soul," and our ministers are generally careful to urge their hearers to faithfulness in obeying the requirements of this indwelling, inspeaking Spirit of Christ. If to have this knowledge of Christ in the soul; if to listen to his voice and to obey his teachings as they come to us "warm, and fresh, and living;" if to enter upon the service of God and to do his will as revealed to us by this inner light; if to know that we are made more pure,

more strong, more loving, more true, by this hearing and this obedience,—if this is not to believe in Christ what then can he? surely not a mere intellectual conviction of the correctness of the record relating to the historical Christ? nor can it be the acceptance by the mind of this or that theological dogma relating to him? As Friends we cannot so believe. We are convinced that any faith in Christ that does not result in moral and spiritual growth is but a faith in vain; any faith in Christ that does not show itself in the improvement of the outward life is of no value whatever. Christianity when most simple and most accurately defined is "the life of God in the soul," and that life *must* of necessity show itself in the life and character.

If it were necessary many passages of Scripture, many sayings of Jesus and his disciples, could be quoted to show that this latter and (according to the Society of Friends) the most important relation of Christ to mankind, is amply sustained by them; even as it is fully sustained also by right reason. But it is not only supported by the Scriptures and by reason, but by human experience as well. The Light "which lighteth every man that cometh into the world" does not shine in vain. We are so constituted that, as Emerson says, "we know the truth when we see the truth." The enlightening, purifying, strengthening power of the Spirit of Christ, "the grace of God which bringeth salvation, hath appeared unto all men." If its teachings are obeyed, character is uplifted and men are drawn nearer to God; if disobeyed, a loss in moral power, in spiritual insight, is the inevitable result.

That there will ever be a variance between the inward teachings of the living Christ and the recorded teachings of the historic Christ is not at all probable, although it is possible, as history has shown, that the living Christ may lead men into paths of right action which were but indirectly (if at all) referred to by the historic Christ. As we listen to the inspeaking word, and obey its teaching, we will doubtless find that our lives will approach more and more nearly to that of our great Exemplar, whose life was perfect because a life of perfect obedience. And in thus approaching more and more near to that example of righteous living, we will find at once our best development and our greatest safety; for, as was said by William Penn, "we are to be judged by our likeness to Christ, rather than by our notions of Christ."

"Oh the outward hath gone! but in glory and power
The spirit surviveth the things of an hour:
Unchanged, undecaying, its Pentecost flame
On the heart's secret altar is burning the same!"

BENJAMIN HALLOWELL.

"Though dead, he yet speaketh."

FEELING the interest that I always have in the right training and proper influence that should be thrown around our dear youth, and believing that many that are engaged in the responsible position of teacher and instructor might profit by the experience of this great man and Christian, I feel willing to offer for publication in your excellent paper the following striking incident recorded in his autobiography, that his beautiful example may be widely disseminated.

REBECCA M. THOMAS.

Sandy Spring, Md.

"About 1835, one of the students came to my study and told me that a ten-dollar-bill had been taken out of his trunk, and he had no idea who could have done it. I asked him to give me a list of his room-mates, which he did, six in number, including himself. I then charged him to mention the subject to no one until I could examine a little into the matter.

"I kept a pretty close watch upon the movements of all the boarding students, and particularly of the room-mates of the one who had lost the money.

"One Seventh-day one of these room-mates, whom I will call James, went to Washington, as the students frequently did, by permission, when they had particular friends or relatives there, to return on First-day evening. James did not return with the others; this gave me a hint. I immediately set inquiries afloat, and found he had gone in the cars to Baltimore, and had put up at a prominent hotel, and I was impressed with a full belief that the bill was paid with his room-mate's money. Yet it required very careful proceeding. James did not return until Third-day evening. This was an occasion in which I felt I *must act*. He was about sixteen years old, perhaps over. I feel it right, here, to mention, and the retrospect of it is very comforting and encouraging, that it was my custom on those occasions of difficulty, in which I felt obliged to act, that before I would invite the student into my study, to go in by myself, the doors being constructed so that no one could then enter, and earnestly crave that I might be favored in the interview I was about to have with the student that all might be for his good, without any regard to the interests or popularity of the school. And in no single instance, when this precaution was taken, did the interview fail to be satisfactory.

"After such preparation, I invited James into my study, and the subject being an unusual one, and it having been several days in my mind, I was favored with an unusual degree of calmness and strength. We sat sometime in silence. I then inquired of him why he had not returned on First-day evening. He replied he had been to Baltimore. 'How didst thou go?' 'In the cars.' 'Where didst thou stay in Baltimore?' (These questions were put feelingly and very deliberately). 'At Barnum's Hotel.' 'Where didst thou get the money to pay thy expenses?' 'My father gave it to me.' 'Is thy

father in Washington?' 'Yes, sir.' 'Now,' said I, 'James, this last information I value, as I see from it the way of helping me out of a difficulty.' Here I called my man and asked him to bring up my horse and buggy as soon as possible, as I wished to go to Washington. I continued to say to James that such a student (naming him) had lost a ten-dollar note out of his trunk the week before, and thy not returning to school as the other students, but going to Baltimore instead, and putting up at a hotel there naturally awakened an apprehension that *something was not right*, and I am rejoiced at having my mind relieved on this point.' I saw while I was speaking that he was guilty. As soon as I ceased, he arose, and with tears in his eyes, said, 'Oh, Mr. Hallowell, I cannot go to Washington with you. I *did* take that note. It was the first act of the kind I ever committed, and if you will only forgive and excuse me, I give you my word it shall be the last.' We were both affected. There seemed to be an unusual depth of contrition and humility, and he had made no denial of the act. I asked him to sit down while I thought the matter over a little while. After a few minutes I said to him: 'James I am pleased with thy candid acknowledgment, and with the evidence of thy regret and contrition. I can forgive and excuse thee heartily on the terms thou namest, and no one knows of it but thee and me, nor shall any one know of it, as far as I am concerned. But the student must have his money. I must pay him the ten dollars and charge it in thy bill as money advanced to thee in a particular emergency, and if thy father makes inquiry of me about it, I will refer him to thee, and thou must satisfy him in such way as thou thinkest right.' After giving him a little consoling counsel he left me. I paid the student the ten dollars, and when I presented the bill to his father, who was then among the most distinguished and influential men in Washington, he paid it promptly, without making any inquiry, and so the matter ended. No student could have behaved better, or could have been more affectionate and respectful than James was during the remainder of the time he was at school. *I told no one*. About twelve years afterwards I was called out of my school-room to see a gentleman whom my man had shown into the study, and there I found a fine-looking, large-sized naval officer who took me in his arms and wept. It was James, with whom I had the interview in that same study. We both wept. He was a Captain in the Navy, and at that time had command of a prominent vessel. As soon as he could speak, he said, 'Mr. Hallowell, you have been the making of me. You have saved my character,' and his tears flowed profusely for some time."

THE castle which conservatism is set to defend is the actual state of things, good and bad. The project of innovation is the best possible state of things. Conservatism goes for comfort, reform for truth.—R. W. Emerson.

I HAVE lived to learn that the secret of happiness is never to let your energies stagnate.—Adam Clarke.

THE VIEWS OF FRIENDS.

[A friend has handed to the INTELLIGENCER AND JOURNAL the following note. It was sent to the New York *Independent*, but returned by the editor of that journal. As it explains itself, we present it without further comment.—EDS.]

To the Editor of *The Independent*:

In an article in *The Independent* of the 28th ultimo, in relation to the author of "Robert Elsmere," the writer, Rebecca Harding Davis, of this city, makes a passing allusion to the Society of Friends, and does it in such manner as cannot properly be passed by without comment and correction. The passage is as follows:

"Only the insular habit of thought, of which we have spoken, can account for the astounding fact that Mrs. Ward, speaking for her sect at Oxford, has brought forth as a new revelation, known only to a few secluded thinkers the hackneyed dogmas of the Hicksite Quakers and of other branches of the Unitarian Church in this country. That it is and nothing more."

The points to be remarked in this, are: (1) The attempt to identify Friends' religious views with those presented in the work of fiction referred to; (2) the ascription to Friends (whom she calls "Hicksites") of certain "hackneyed dogmas"; and (3) the assumption that these Friends are a "branch" of the Unitarian church.

Each of these ideas is so great a departure from truth and justice, and all of them cumulatively are so absurdly incorrect, that it seems proper to say to the readers of *The Independent*: (1) That the Friends, as a body, hold definite religious views quite at variance with those which R. H. D. ascribes to "Robert Elsmere" and its author: if, therefore, she has not done injustice to the latter, she does extreme injustice to the Friends; (2) that the Friends (whom she calls "Hicksites") have no "dogmas" either "hackneyed" or otherwise, a large liberty being permitted them upon points of doctrine inferior to the essential of Quakerism, the Inward Light, and its corollary the subordinate, though confirmatory, nature of the Scriptures, this liberty being exercised as to the points which, according to R. H. D.'s statement, "Robert Elsmere" and its author particularly raise; (3) that the Friends are in no sense a "branch" of the Unitarian—nor of any other—church, and cannot be truthfully identified with that body, the fact being that while some of them hold "Unitarian views," others hold "Orthodox" views, neither class being coerced or disciplined by the other.

The idea in R. H. D.'s mind seems to be that Friends "deny the divinity of Christ,"—an error which is not uncommon, it is true, being apparently composed in equal parts of a confusion of thought and a want of information.

FRIEND.

Philadelphia, 3d mo. 8.

The true and living faith that works by Love to the purifying of the heart, is the gift of God created in the soul by our faithfully attending to his teachings; leading us to moderation in all things.—E. Hicks.

THE "LORD'S SUPPER."

[Read at the Quarterly Association of First-day Schools, of Whitewater Quarterly Meeting, Milton, Indiana, Third mo. 2, 1889.]

FRIENDS regard the Lord's supper, as partaken of by the churches as only an outward evidence of an inward work already accomplished; and therefore its outward observance not necessary. The true Communion of the Lord can only be partaken of by those who have been previously baptized with the Holy Spirit, so that the love of God burns within them as a consuming fire, destroying the dross of humanity, and leaving the pure gold of obedience to the Divine will. Such can then come into that close communion with the Father that they can sit down at his table and feast upon his love, which is the bread of life, and drink through inspiration that divine truth and wisdom, which is the wine of life. And as often as we thus "sup with Him, and He with us," we come forth from the spiritual feast strengthened, invigorated, and renewedly qualified to labor in his service. This is the true eating of his flesh, and the drinking of his blood, without which, as our blessed Master said, "there is no life in us." It is only through constant watchfulness, and prayer without ceasing, that we can keep close enough to the Father to hear the whisperings of his still small voice, or see the insinuations of his glorious light.

This spiritual Supper of the Lord, when often partaken of, is the regenerating and purifying Power that will crucify us to the lusts of the flesh, and bring us at last to realize that Christ indeed is born within us, and the Kingdom of Heaven is at hand.

ANNA M. STARR.

THE DEATH PENALTY.

TEMPE, the celebrated authority on criminal law says: "Why do we still have the death-penalty, which is no deterrent punishment, but a cruelty, a barbarity? They say to murder a human being, to annihilate a human life, is something so horrible, inhuman, unnatural, that it can be expiated only by the severest punishment? They murder the murderer! They annihilate in cold blood his life, a second one in addition to the first! And the second murder they call right, justice, and for the murderer who is to be murdered special tortures have to be created. The death sentence is announced to the murderer weeks beforehand, and it is said to him—'Thou shalt die a violent death. We will lead thee to the gallows, and there the servants of the executioner will seize thee, strap thee, and then the executioner will come to thee and hang thee.' Thus the murderer will be murdered after having had before his eyes for weeks and months the future of his approaching cruel death. 'But, after all,' they say to him, 'it is possible that you may be pardoned,' in order to make still more terrible by the seconds of hope the weeks and months of deadly anguish! And this they call justice, even Christian justice!"

NOR what we think, but what we do
Makes saints of us.

SPREAD THE LIGHT.

WE have quite recently in our Editorial columns called the attention of our Representative Committee to the need there is for more activity in the direction of preparing and spreading in a condensed form, the principles, testimonies, and history of the Society of Friends. We are again, and almost constantly, reminded of this need by private letters wherein are expressed thoughts and feelings that give evidence of the desire that exists for such an understanding of the Divine truth as it is the blessed privilege of Friends to possess. To bring this "hunger and thirst" into communication with that which will satisfy it, or to a means tending to that end, is a problem that is seeking a solution, and in order further to arouse interest so that some way may present for this, we are permitted to insert some extracts from a letter from an "isolated" Friend in a far Western city to a ministering Friend in Philadelphia Yearly Meeting:

"I sometimes think it is a mistake for Friends to keep so much that is good within their own little circle. The world needs us, and just such holy principles as our society teaches, and yet the inquirers do not know where to seek for the spiritual truths; they do not find what they want in creed-bound Orthodox churches. So many church members talk to me and tell me of the impulse in them to seek for more light, more spiritual instruction—they cannot find it altogether in the Bible, where they are always directed by their pastor to look for it. A young married lady here in the hotel has come to me and opened her heart. I happened to have a little book of 'Sermons' by Sunderland P. Gardner and 'Views of Friends' by John J. Cornell. She read them and told me she did not see how she could join any church but the Friends, for she had had for years past such convictions, and was not satisfied with the teachings she was accustomed to hear. She wants to send to Philadelphia for these books. Are not some of them printed for free distribution? If not, I would like to buy several; for I know they would bring peace to many a benighted soul. I have wished for a long while that a minister, or ministers of our Society would feel it right to come amongst us—they must not be so much afraid of coming in

their own wills. We need a nucleus—a leader around which a meeting can be formed—it will not prevent any from acknowledging the real Head of the Church by wanting a visible earthly shepherd. I know how reluctant Friends are to rely on preaching, but what matters it if the *result* is good, and those unacquainted may hear and know the truth.

"I get so weary myself of so much man-made worship and dislike so to have my children grow accustomed to it, that I feel as if I would like to go some place where I could sit in silence and worship after the fashion of my own people. But for the benefit of others whom I know would come, and many join with us, we must express our views and principles verbally. There are many who feel so isolated; cannot some one come to our rescue? Some one in whose face others can see the Divine light shining, and whose walk is in the fear of the Lord. Such are the only real teachers here on earth, and they are the Father's instruments for good. Many of the Friends attend the Church, and are apparently satisfied, it seems a pity to lose them from the ranks of our little Society.

"In these Western cities there is such a field to labor in, and I am loath to think how much good could be accomplished by Friends, and that nothing is done only individually and that in a very humble way. It seems to me that Friends as a body would feel such an impulse—such an inspiration to spread their glorious principles, that they would float banners everywhere, and gather all they could within the fold—and if the world only knew, many would come thankfully."

Is there not revealed here a need that we consider carefully a way to more broadly spread the truth as held by Friends? However we may regard the matter of a dependence upon preaching there is a pathos that is touching in this appeal for "a shepherd." This, of course, must be left for the individual pointing of the Spirit, but there could be enlightenment through the agency of our literature, that should receive the attention of our Society through its Representative Committee's donating books and tracts and appropriating the means to convey them where they may do good. Shall such appeals continue to be made in vain?

AND if, through patient toil, we reach the land
Where tired feet, with sandals loose, may rest,
Where we shall clearly know and understand,
I think that we will say, "God knew the best!"
—May Riley Smith.

WE know in part; the other part
Is hid in God, and only shines
In points of Glory on the heart
That moves towards him in Love's straight lines.
—Benjamin F. Larrabee.

MARRIAGES.

ANDREWS—RODGERS.—On Fourth-day, Third month 6th, 1889, at the home of the bride's parents, under the care of Chester Monthly Meeting held at Moorestown, N. J., William L. Andrews, son of Charles and Mary T. Andrews, and Laura H. Rodgers, daughter of Thackara G. and Ruthanna Rodgers, all of Moorestown, N. J.

THATCHER—TRIMBLE.—At the residence of the bride's father, Pocopson township, Chester county, Pa., Fourth-day, Second month 20th, 1889, by Friends' ceremony, Hilbora D. Thatcher, of East Marlboro, son of Benjamin and Adrianna Thatcher, and Phebe Emma, daughter of Jacob and the late Celia S. Trimble.

WALTON—MICHENER.—Under the care of Kennett Monthly Meeting, at the residence of the bride's mother, Third month 14th, 1889, Howard J. Walton, of New Garden, son of Joel M. and the late Lydia Y. Walton, and Jane T. daughter of Catherine T. and the late Courtland Michener, of Newlin township, Chester county, Pa.

DEATHS.

AMBLER.—On Seventh-day morning, Third month 9th, 1889, near Langborne, Bucks county, Pa., of dropsy of the heart, George R. Ambler, in his 63d year; a member of Middletown Monthly Meeting.

BROWN.—At Brooklyn, N. Y., 12th of Third month, 1889, Edward Brown, in his 72d year.

CHANDLER.—At Kennett Square, Pa., Second month 7th, 1889, Josephus P. Chandler, in his 67th year; a member of Kennett Monthly Meeting.

CLOTHIER.—Third month 13th, 1889, James Clothier, aged 72 years; a member of Mount Holly, N. J., Monthly Meeting, formerly of Philadelphia.

DICKINSON.—Suddenly, Third month 8th, 1889, Elizabeth E., widow of Charles Dickinson, in her 76th year; a member of Darby Monthly Meeting.

EYRE.—At his residence, Norwood, Delaware county, Pa., Third month 12th, 1889, J. Randolph Eyre, aged 77 years, formerly of Philadelphia, where he was an attendant of Race Street Meeting. Interment at Fair Hill.

JAMISON.—At Quakertown, Pa., Third month 14th, 1889, David R. Jamison, in his 63d year.

KIMMEY.—At Camden, Delaware, Tenth month 16th, 1888, Margaretta Kimmey, widow of James Kimmey, and daughter of Jabez and Rachel Jeakins, in the 70th year of her age; a member of Camden Monthly Meeting.

KIRK.—Third month 11th, 1889, Elias Kirk, of Abington, Pa., in his 81st year.

LUKENS.—At the residence of her brother, at Horsesham, Pa., Third month 9th, 1889, Hannah W., daughter of the late Jacob T. and Jane R. Lukens, in her 40th year.

MADDIN.—At Trappe, Talbot county, Maryland, Third month 6th, 1889, Mary B. Maddin, widow of Thomas Maddin, and daughter of Michael and Ann J. Lowber, in the 69th year of her age; a member and elder of Camden Monthly Meeting. Interred in Friends' burial-ground at Camden, Delaware.

MIDDLETON.—Third month 13th, 1889, Ellwood, son of the late Enoch and Hannah Middleton, in his 65th year; a member of Green Street Monthly Meeting, Philadelphia. Interment at Crosswicks, N. J.

PELLETIER.—At the home of her parents, James C. and Caroline E. Hull, 442 Halsey street, Brooklyn, N. Y., Second month 28th, 1889, after a long and painful illness, Carrie Louise, wife of Hartley G. Pelletier; a member of New York Monthly Meeting.

ROBERTS.—At the residence of her son, Wm. H. Roberts, East Moorestown, N. J., Elizabeth W., wife of Elisha Roberts, in her 70th year.

SHOEMAKER.—In West Philadelphia, Third month 7th, 1889, Mabel, daughter of Isaiah L. and Sarah M. Shoemaker, aged 21 days.

SHOTWELL.—At the residence of her grandson, H. S. Ogden, Orange, N. J., on Seventh-day, 4th inst., Lousia Shotwell, in the 89th year of her age, widow of Henry Shotwell, formerly of Rahway, N. J.

WAY.—Third month 10th, 1889, Margaret, wife of Thomas M. Way, and daughter of Thomas Wilson, late of Half Moon, Pa., in the 63d year of her age.

WHITE.—In West Philadelphia, Third month 13th, 1889, of capillary bronchitis, Frances J., daughter of Dr. Joseph W. and Rebecca S. White, and grandchild of the late John J. White, aged 9 months.

WOOLMAN.—Suddenly, Third month 9th, 1889, in her 76th year, Phebe W. Woolman. Funeral from Rancocas meeting-house, N. J.

CHARLES LEWIS.

Being partakers in a measure of each other's trials as well as consolations, though what may be said can avail but little to lighten the burden of grief whether openly manifested or more secretly felt; yet if it will serve any good purpose, this brief tribute to the memory of our departed friend, Charles Lewis, ought to have a place in the weekly messenger that he prized so highly, THE FRIENDS' INTELLIGENCER. Though not a sectarian, he firmly believed that Friends should be diligent in attending their meetings, and promoting every good word and work undertaken by the Society.

Very early in life, while yet the bloom of youth lingered, he was solemnized by Divine impressions making manifest a call to the ministry, to which he was then unfaithful. Many years after he remarked to the writer in an impressive manner and with deep emotion, that in great mercy he was permitted to glean, where by obedience to the Divine will in his early years he might have reaped more largely. As he had been in declining health for some time, he was impressed with the feeling that his stay here was not to be long continued. He gave up the management of the farm, that he might spend what yet remained to him of life in retirement from worldly cares.

He was favored to attend the little meeting at Plainfield, Ohio, of which he was an overseer, up to the last First-day before his death. Lying down to rest as usual, on the evening of the 7th of Eleventh month, 1888, without a moment's warning, in his 71st year,

"His spirit with a bound
Left its encumbering clay;

His tent at sunrise, on the ground
A darkened ruin lay."

His wife is left to mourn the devoted and tender husband, and six children, two of them daughters, to rise up and call him blessed, for he was a loving and unselfish father. The many who shared his friendship and hospitality can bear testimony to the goodness and simplicity of his life, and his ready sympathy for all who needed a kindly word or deed. Though living 8 miles from Plainfield meeting, and the road rough and hilly, he was seldom absent except in very inclement weather. Friends traveling in the ministry and visiting the meetings found ready and hearty welcome at his home, and when refreshed he cheerfully went with them in their journeyings, glad of the opportunity to serve the Master in serving his faithful laborers. One of his sons, while yet a youth, came to this

city to live, and has by industry and faithful application gained a name and a place among its successful business men. The youngest son remained at home, taking charge of the farm and caring for his parents with filial devotion.

Philadelphia.

THE LIBRARY.

THE WRITINGS OF JOHN GREENLEAF WHITTIER. In Seven Volumes. Boston: Houghton, Mifflin & Co. 1888.

In our issue for Eleventh month 17, 1888, we gave a notice of this new and complete edition of the works of Whittier, mentioning particularly at that time the first two volumes, which had then been recently issued. The whole series, making seven in all, is now complete, and we commend it most heartily to the attention of all who already know, as also of those who have not yet learnt, the beauty and virtue of Whittier's genius. The edition is complete; it includes everything he has written—and desires to perpetuate—up to a very recent date; and it has had his own supervision and editorship.

Following the two volumes already noticed, the third and fourth volumes also contain poems, those in Volume III. being the brave and stirring Anti-Slavery lyrics, and the not less earnest songs of Labor and Reform; while those in Volume IV. are the Personal and Occasional Poems, the Tent on the Beach, and the poems of his sister, Elizabeth H. Whittier. At the close of this, also, there are given in an Appendix some of the early and uncollected poems, which in the judgment of the author, as of critics generally, did not rise to the standard of merit shown by his other work. Among these are the Indian tale "Mogg Megone," and the pathetic, almost painful, "Isabella of Austria." An index of titles, and an index of first lines of all the poems, are also given in this fourth volume.

The fifth, sixth, and seventh volumes contain Whittier's prose writing. This is less familiar, we have no doubt, to most persons, than his poetry, and it is not to be denied that his fame will rest upon the latter. There are, however, many essays, sketches, and letters which disclose his powers, as they do likewise his character and temperament, and there are forcible and trenchant criticisms which deserve preservation as part of the history of the time when they were written. Here, for example, in Volume VII., is an essay of 1846 dissecting Thomas Carlyle's harsh and inhumane treatment of the Negro Question. There is no lack of force,—or of truth,—in the sentences where Whittier declares that the article he is reviewing (printed by Carlyle in *Fraser's Magazine*), "would be interesting as a literary curiosity, were it not in spirit and tendency so unspcakably wicked as to excite in every right-minded reader a feeling of amazement and disgust," adding that "with a hard brutal audacity, a blasphemous irreverence, and a sneering mockery which could do honor to the devil of *Faust*, it takes issue with the moral sense of mankind and the precepts of Christianity."

This edition is well printed, and neatly bound,—the volumes in cloth have a fine olive cover, pleasant to the eye, and appropriate to their contents. In this binding the price is \$1.50 per volume—\$10.50 in all.

NEWS OF FRIENDS.

BALTIMORE QUARTERLY MEETING.

This meeting was held this time in the city, and is called the Spring Quarter. As it was the time of the opening of the new meeting-house, the attendance was quite large and the occasion a truly interesting one.

We were favored to have the company of our valued friends Thomas Foulke of New York, and Samuel S. Ash of Philadelphia. We missed from our meeting two of the ministers of our Quarterly Meeting, Rebecca Price and Darlington Hoopes. The former is in feeble health, the latter had a sick family.

The select meeting in the afternoon of Seventh-day (the 9th inst.), was held at Old Town meeting-house. The weather during the three days of services was very pleasant.

On First-day the new meeting-house was opened and the main building was filled with interested people. And our visiting Friends and some of our own were greatly favored in holding forth the truth.

A meeting was called for evening, which was largely attended and the exercises evidently went to the hearts of the people. Many were present who were not of our membership.

The quarterly meeting, on Second-day, (11th inst.), was also well attended, being the largest we have ever known. When the time came to proceed to business, the male portion of the assemblage passed over to the new lecture-room. Each branch attended to the business of the quarterly meeting, and we adjourned to meet at Sandy Spring in Sixth month.

Baltimore Monthly Meeting has the acquisition of several valuable members who have come in by conviction and by certificate, and we feel encouraged to hold up our testimonies before the world.

H. J.

[Our correspondent above, in a letter sent us last week, but which was not used then because its details were mainly presented in our own article descriptive of the new meeting-house, gives some additional information which may be interesting. He says:]

"We received for the Lombard street property the sum of fifty thousand dollars which went very far toward defraying the necessary expense required for the erection of such a meeting-house as we needed, and such as we ought to have for all our purposes, and such, we think, when fully completed we will be favored to have. In view of the fact that our worthy fathers handed down to us this valuable gift, which we have occupied for a period of eighty-three years, it became our duty and our pleasure to purchase this land and erect this valuable meeting-house, and hand it down to coming generations. We have erected as good a house as could be "made with hands," wherein mortals may worship their Great, Eternal and Good Father, who planted the everlasting granite of which the walls are builded.

"The Building Committee has well done the work for which it was appointed, and handed over the key to the Standing Committee on property. The mem-

bers of this building committee would not of course desire to be commended for performing a duty, yet it is no more than just to mention the names: Edward Stabler, Jr., Joseph J. Janney, Joseph Matthews, William Wood, George M. Lamb, Thomas M. Brown, Elisha H. Walker, William Canby, John M. Griffith, Thomson P. Perrine, Daniel F. Pope, Eli M. Lamb, John B. Dixon, Isabella Tyson, Emma L. Taylor, Alice C. Robinson, Martha S. Reese, Maria K. Davis, Martha V. Vickers, M. Elizabeth Janney, Martha S. Townsend, Rachel R. Holt, Margaret Husband, Mary D. Hull, Martha Cowman. This building committee was nominated to and approved by the monthly meeting, Second month 7th, 1884, and had the advice of a committee from the Representative Committee of the Yearly Meeting.

"During the building, the whole monthly meeting has been worshipping with our Friends of Eastern district, and though at considerable inconvenience on account of the great distance from our homes, and the crowded condition of the house, it was a profitable season, and one long to be remembered on account of the kindness and hospitality of the Friends of 'Old Town Meeting.'"

WHITEWATER QUARTERLY MEETING.

WHITEWATER Quarterly Meeting of Friends was held at Milton, Ind., on the 22d of Third month, and was largely attended and interesting throughout. The meeting gathered at 10 o'clock a. m. Representatives were present from all the monthly meetings, and the answers to the queries which were presented gave evidence of Christian growth, and impressed the assembly with the love and true fellowship existing among the membership.

The First-day School Quarterly Association assembled in the evening at 7 o'clock. The attendance was large, filling the meeting-house. Delegates were present from all the schools, of which there are six, and the reports presented showed continued interest and a gradual growth in attendance at nearly all the schools. Fall Creek First-day School does not have any sessions during winter months, but the time is near when it will resume, with increased interest. Two interesting recitations were given by scholars of the Milton First-day School, and papers were read from Fall Creek School on "The Relation of First-day Schools to the Home," and from the Richmond School on "What are the Views of Friends Concerning the Lord's Supper?"

The next quarterly meeting will take place at Richmond, Ind., in Sixth month, and the First-day School Association will meet on the evening of the same day. At the meeting in Milton an executive committee of three from the Richmond School was appointed to arrange the exercises for the next meeting, and also select subjects on which essays may be written.

While a company of Richmond Friends were returning home on the evening of the 2d one of their number, Wm. Parry, met with a severe accident at Cambridge City, when getting to the train, by making a misstep and falling against the car, cutting his head badly. It caused great anxiety among his

numerous acquaintances and it is a pleasure to state he is improving rapidly. W.

Richmond, Ind., Third month 9.

THE INSTRUCTION OF THE BLIND.

THE fifty-sixth annual report of the Managers of the Pennsylvania Institution for the Instruction of the Blind, which has recently come to our notice, contains, besides the work done by the Institution during the year past, a brief history of the origin of schools for this unfortunate class. Most persons will probably be surprised to find that it is little more than one hundred years since Valentin Hally established in Paris the first school for the blind, and only a little more than fifty years since such schools were established in America. Hally's institution was ruined by the Reign of Terror, in the Revolution, but after the peace of 1815 it was re-established. It was his belief that the education of the blind should begin as early as possible, and of late there has been a growing tendency to give them the advantages of the kindergarten system.

Grateful mention is made of the late Principal, William Chapin, whose name for the first time since 1850 disappears from the list of officers. He is succeeded by Frank Battles, who for several years had attended to the more active duties of the office.

At the close of the year there were remaining in the institution 98 males and 91 females; of these 160 are supported by the State of Pennsylvania, 47 counties being now represented; 10 by New Jersey, 3 by Delaware, and the remainder by the institution and by friends. Of the literary attainments of the pupils, five are reported as having graduated at the University of Pennsylvania, one has taken a complete course and another a partial course in the National School of Elocution and Oratory. The former, a young woman, totally blind, is now teacher of Elocution in Swarthmore College.

The college graduates are reported as "honorably maintaining themselves as private tutors or in work for which their education has especially adapted them." Attention continues to be given to physical culture, much stress is laid upon the need of some measure being adopted by which the advantages of the education received may be brought more fully to the public notice and the objections felt by parents to sending the sightless ones to the school be removed. We learn also that there are in our city five organizations devoted exclusively to the education, employment, or aid of the blind, and in addition to these the blind themselves have two beneficial societies for mutual aid and assistance.

The health of the pupils is good, only one having died during the year, a frail, delicate little girl, who was removed to her home previous to her death. A few changes have been made in the corps of instructors. Some changes in the methods of teaching arithmetic have been made, with most gratifying results. The music department "has had a year of uninterrupted prosperity."

The branches taught during the year were: Algebra, anatomy, arithmetic, etymology, geography (local and physical), grammar, Greek, history, Latin,

literature, object lessons, physics, reading, spelling, composition, and modeling. The younger children are still instructed by the kindergarten method, in which they take great interest and show gratifying progress.

SWARTHMORE NOTES.

THE Sophomores are now taking a very interesting course of descriptive astronomy, and under Professor Cunningham's direction the students have already made observations for themselves through the large telescope in the college observatory. In the Senior year there is an elective course of mathematical astronomy which is much more thorough and difficult than the descriptive course.

—The authorities have decided to add an Assistant Professor of chemistry to the corps of instructors. The large increase in the number of students in the engineering and scientific departments has made this step necessary, as the classes have given Dr. Day an excess of routine work and allowed him but little time for experimenting and investigation. It is not yet decided who the new instructor will be.

—The retiring staff of *The Phoenix* has decided to assume one-half of the present debt of the Athletic Association, which amounts to about \$180, this being the last of the indebtedness contracted when "Whittierfield" was laid out in 1887. "Whittierfield" is one of the finest college athletic grounds in the State, and is now almost entirely paid for. *The Phoenix* has done a great deal to increase the college spirit of the undergraduates.

—The Freshmen have decided to hold sports on Seventh-day, Fourth month 27th, and have appointed a committee to make the arrangements.

—When the Strath Haven mill property is purchased by the college, as it was decided to do by the meeting of the Stockholders last week, there will be nearly three hundred acres on the college grounds. The purchase of the new ground will ensure a good water supply by protecting the stream from which the institution is supplied.

THE LOVE OF CHILDREN.

TELL me not of the trim, precisely arranged homes where there are no children—where, as the good Germans have it, "the fly traps hang straight on the wall;" tell me not of the never disturbed nights and days, of the tranquil, unanxious hearts where children are not: I care not for these things. God sends children for another purpose than merely to keep up the race—to enlarge our hearts, to make us unselfish and full of kindly sympathies and affection; to give our souls higher aims; to call out all our faculties to extended enterprise and exertion, to bring around our fireside bright faces and happy smiles and loving, tender hearts. My soul blesses the Great Father every day, that he has gladdened the earth with children.—*Mary Howitt.*

THE torture of a bad conscience is the hell of a living soul.—*Calvin.*

EDUCATIONAL ESSAY: PRIMARY READING.

[Concluded from Last Week.]

I THINK all will agree with me that a pleasing variety is essential in every reading lesson; in order to fix and hold the attention of little children there must be a change before any one form becomes tiresome. For instance, reading on sides, we see who will make the least mistakes in pronunciation, who will bring out the thought in the clearest, brightest, most natural tones, etc. In a lesson from the board I call for the names of some five or six different objects in the room or near by and have a child combine them into a sentence of some length, calling it a story. This affords them a great deal of amusement, instructing them in script reading at the same time. Frequently the new words of the lesson are written out at home and handed me in the class so that they become very familiar both with script and print; occasionally the entire lesson is written out by the more ambitious, although I never require the latter.

In class K I have the children close their eyes while I write quickly a word on the board, to see who will be the first to know it when I give the signal to look. I frequently have them begin with the last word of their next day's lesson, and so on up the page until it is finished; this instructs them in recognition of words at sight, and each child is ambitious to know every word that comes round to him; happy the little one who is entirely successful! Occasionally the classes read in concert, but only for variety, as individual faults are lost and sing-song tones are often acquired; although the latter can be overcome by the teacher's asking questions, the class replying, or vice versa, making them realize that reading is talking where only natural, bright tones are needed. I am assisted, helped very much in this respect, by my associate teachers in other recitations besides reading, and I feel I can say we all work together in concert recitation especially for clear, natural tones free from drawl and disagreeable sounds. While very loud, unnatural tones are not desirable, it is necessary that they be clear, distinct, and of sufficient strength to be heard in a moderately large room; and I find it a great help for those who have low, weak voices, to stand at a distance, as they feel the necessity then of being more forcible.

Five or ten minutes is sometimes devoted to silent reading, placing a page of the chart before them where all can easily see. I require them to read to themselves with as little moving of the lips as is possible among such little people who have not as yet acquired the habit; afterwards the same is read aloud. When I find the pronunciation is getting careless, we have a "pronouncing bee." I select previously a list of words that have been mispronounced in back lessons; two captains are called—one for each side—who choose their men, as in a spelling contest. There is this difference, however, they pronounce while I spell. In the latter part of the school year little K shares in these contests, and while they prove a help are a source of great pleasure to the little ones. I have found the dictionary of great advantage to the children of class I. After a lesson on its markings,

the finding of words and definitions, they are prepared to use it. One or two have been appointed each day to bring dictionaries in the class, and to find such words as may come up for pronunciation or meaning, as the children may desire. I encourage them to use their dictionaries outside of school hours, as it is of great assistance not only as regards pronunciation and definitions, but in spelling. And just here, one word in regard to marks. While it is not my purpose to discuss the pros and cons of the marking system, I feel it incumbent upon me to say that a judicious system of marking, not daily probably not oftener than once a week, and apart from the reading lesson, is valuable as a record which will be sent later to the parents.

A very important feature of the reading lesson, and one in which little children take especial delight, is character personation in dialogue. You really get more insight into the child's nature through this than any other form of reading matter; for here, as the little ones frequently inform me, "it is so easy to talk the reading;" and it is just this talk, the easy natural, conversational tones, that we should be continually striving to bring out in our pupils. When the different characters have been assigned, each child determines what shall be the nature of each character, whether happy, humorous, or the reverse; it is amusing, and to me oftentimes instructive, to hear the various reasons given by the children for the natures of the characters they are endeavoring to personate. This talk of the characters previous to the reading of the lesson, makes them very real to the children; and with this realization comes the free, hearty, natural expression so delightful to the teacher and so helpful to the scholar. This call for variety in conducting the reading lesson may tax the teacher at the outset, but in the end it will yield a rich harvest; for the time will come when the book will be all that is necessary to excite interest, its various tales and stories and all they suggest being sufficient incentive to an intelligent child reader, without any outside work.

VARIETY IN SUBJECT MATTER.

Additional interest in the reading lesson necessarily follows a change of reading matter. Another and different reader with its new, bright, suggestive illustrations excites a lively curiosity on the part of the class to read and know for themselves the various stories contained therein; copies of some simple little poem, printed on separate sheets of paper, can be procured at a small cost, or what is cheaper, done on the hectograph. Children almost as much as adults enjoy the scrap book, culling from old papers and magazines gems of sentiment to be preserved and re-read later. Cards made of black bristol-board the size desired, with the little poem or story pasted thereon, allowing a small margin, are better adapted to a class than the book; each child being supplied, the children furnishing the reading matter, and the teacher arranging it at convenient seasons and to suit her purpose. In what is known as the Elzevir Library, John B. Alden, publisher, can be found much that is of value to the child,—short stories by Grace Greenwood, poems by other eminent authors

of child literature, and many of the copies are not more than 2, 4, and 8 cents. A monthly magazine is a very welcome visitor among the little folks; and at this day, when all periodicals are so reasonable, and a large number instructive as well as entertaining, teachers of reading should avail themselves of the opportunity.

RECITATION.

The importance of recitation combined with reading, I think no one will question. First, the very fact that the book is not before him, that he is not reading,—only telling a story,—is of valuable assistance in the great gain of natural talking tones, which he almost unconsciously acquires and which afterwards manifests itself in the reading lesson. Second, if confidence is required on the part of the reader, how necessary that this element should enter the recitation which would prove of small value without it. The fact of holding the book is a source of comfort to a timid child; but to be without anything upon which to fix one's attention, except the recitation, does call for a good share of confidence; and just this training of requiring recitations at stated times from pupils will strengthen and develop it. The sweet unconsciousness of a little child added to a modest confidence is a fair, lovely sight indeed, and one from which we of mature years might well take pattern. Third, the recitations are usually poems, and I think it well for a child to begin early with memorizing and reading good, simple rhymes correcting at the very outset the tendency of jingle, the *tun te tun* of the rhyme, which seems to come very natural to a little child in his first attempt. This, however, can be overcome, entirely dispensed with, by calling his attention to the thought contained in the poem, showing him where it is, what it is, talking about it, telling him that if the thought is brought out, the rhymes will take care of themselves, etc. In this way the measure of the poetry is preserved, while the analytical faculties of the child are strengthened and developed. Only the other day a little one of class I informed me it was harder to find the thoughts in poetry than in prose—"you had to skip around so to find them." Fourth, the poems thus memorized are usually selected from some favorite book at home; and we all know that anything that will bring the home and school life closer, into a mutual interest, can only tend to good results.

I remember hearing Prof. Emerson White say that the simple poems he had memorized as a little child, often recurred to him of late years, and always with pleasure; that he felt glad he was required to commit them to memory, they were now his own. So it is with our little ones of to-day; reading makes its impression for a time, but memory holds the stanzas committed to her care, to be retold in later years, bringing with them the sweet associations of childhood's happy hours. The character of the poetry so memorized should be such as will call forth all that is true, good, and beautiful in the child's nature, creating in him at the same time a strong desire, a love for reading and recitation of the highest and best in child literature. What a rich field for the teacher! At the same time a weighty responsibility

rests upon her in this guidance of the tender, impressionable minds committed to her care.

THE POOR READER.

What shall be done with the naturally poor reader, who has very little expression in conversation and less in the printed word? I could name several of this class, and I think I could safely say we all have a share of just this material. Some half dozen or more come to me in the mornings before school, when we talk of the lesson, analyze, read together, etc. At times I feel very much discouraged, but take heart again when I realize "the end is not yet." I try especially to get them interested in the story, rouse up the analytical faculty, in short, get them to feel what they read; then if their inflections are not so bright or their voices so rich and melodious as their more fortunate associates, they will at least in time become intelligent readers.

ENCOURAGEMENT FOR THE CHILDREN.

I sometimes wonder if we appreciate the amount of confidence which it required on the part of a little child to step forward and read before a large number of associate class-mates, and the additional confidence which is necessary to overcome the consciousness of the critical attitude which the teacher must necessarily bear towards the reading; is our sympathy sufficiently called forth, is encouragement cheerfully and readily given to the timid, sensitive, self-distrusting little ones who catch our slightest words, either of approval or disapproval.

This question has come to me very forcibly in my daily work in the school room, especially in the case of a little girl who has the unfortunate, distressing habit of stammering. At times it was impossible for her to read at all, so I ceased requiring it of her before the class; while the habit was somewhat under control when alone with me, yet she still was troubled, although I used every means in my power to assist her. At last I discovered she could read with me, and finally gained her consent to read before the class with one of her classmates. Thus far it has been a success; she has a strong, clear voice, is quite an intelligent reader for her years, and has gained so much confidence that on being asked if she was willing to recite with one of her playmates before the school, responded heartily and seemed delighted with the idea of being capable of doing her part in what she so much enjoyed in others. The recitation was of the simplest nature, only one stanza of a few lines, but delivered without the least hesitation.

I have not cited this case with the feeling of any great achievement; on the contrary, it is merely a beginning, the habit resulting from extreme nervousness being still with the child; but encouraged and strengthened by the knowledge of contributing her share to the lesson, we know not the result which later years will develop. I have still others whose little faces pale and flush by turns,—a sure evidence of the sensitive, shrinking disposition so keenly alive to adverse criticism. When encouragement is extended to such, success is sure to follow; and though they may not turn out prodigies, they will at least improve their opportunities, and repay the

teacher a thousand fold for the kindly tone and glance vouchsafed them in time of discouragement.

FRANCES HAINES.

BURDENS.

We all must bear them. Vain regret,
Love's longing for some dear lost face
Which even sleep cannot forget,
Nor yet the coming years replace;
The disappointment all must know,
When hope's mirage proves but a dream,
The finding Marah's waters flow
Where tempting wayside fountains gleam.

We all must bear them. Some may smile,
And hide their burden in a song;
And others may be silent, while
They learn to suffer and grow strong.
We find no balm in Gilead's vale,
No recompense for pain and loss,
And oft our weary efforts fail
To lift the pressure of the cross.

We all must bear them. Why despair?
The wine-press is not trod alone.
The promise is, that He will care,
As doth a father, for his own.
Our burdens may become our wings,
For underneath His arms will be;
And through our sighing sweetly rings,
"Sufficient is my grace for thee."

—Myra Goodwin Plantz, in S. S. Times.

THE CHILDREN.

THEY are such tiny feet!
They have gone so short way to meet
The years which are required to reach
Their steps to evenness, and make
Them go
More sure and slow.

THEY are such little hands!
Be kind; things are so new, and life but stauds
A step beyond the doorway. All around
New day has found
Such tempting things to shine upon; and so
The hands are tempted oft you know.

THEY are such fond, clear eyes,
That widen to surprise
At every turn! They are so often held
To sun or showers, showers soon dispelled
By looking in our face.
Love asks for such much grace.

THEY are such fair, frail gifts!
Uncertain as the rifts
Of light that lie along the sky;
They may not be here by and by.
Give them not love, but more, above
And harder, patience with the love.

—Washington Critic.

"It can so impress the mild
With quietness and beauty and so feed
With lofty thoughts, that neither evil tongues,
Nor greeting where no kindness is, nor all
The dreary intercourse of common life
Can e'er prevail against it, or destroy
Our cheerful faith that all which we behold
Is full of blessings." —Anon.

GETTING ACQUAINTED.

I got acquainted very quick
 With Teddy Brown, when he
 Moved in the house across the street,
 The nearest one you see.

I climbed and sat upon a post
 To look, and so did he;
 I stared and stared across at him
 And he stared back at me.

I s'posed he wanted me to speak.
 I thought I'd try and see—
 I said, "Hello!" to Teddy Brown;
 He said, "Hello!" to me.

—*Sydney Dayre, in St. Nicholas.*

NATURAL SCIENCE STUDY IN SCHOOLS.

THE Committee appointed by the American Society of Naturalists to "develop a scheme of instruction in natural science to be recommended to the schools," have made a report in which they say the study should begin in the lowest grades of primary schools, and the teaching be mainly by object lessons. A more systematic course should be arranged for high schools and an acquaintance with one or more departments of natural science should be required for admission to college. The committee add:

"The zoölogical instruction in the lower schools should not attempt a systematic survey of the whole animal kingdom, but attention should be directed chiefly to the most familiar animals, and to those which the pupils can see alive. The common domesticated mammals should first be studied, and later the birds, the lower vertebrates, the insects, crustacea, and mollusks. While the range of zoölogical instruction must be limited as regards the number of forms studied, those few familiar forms should be so compared with each other as to give the pupils, very early, some conception of the main lines of biological study—morphology, physiology, taxonomy.

"Special prominence should be given to the study of plants and animals which are useful to man in any way; and the teachers may advantageously, from time to time, give familiar talks in regard to useful products of vegetable and animal origin, and the processes of their manufacture.

"Attention should also be given to the more obvious characteristics of the kinds of minerals and rocks common in the region in which any school is situated, and to such geological phenomena as are comparatively simple and easily observed.

"The subject of human physiology and hygiene is of such immense practical importance, and so few comparatively of the pupils ever enter the high school, that we regard as desirable some attempt to teach the rudiments of the subject in the grammar, and even in the primary, schools.

"We would recommend the introduction of exceedingly rudimentary courses in physics and chemistry in the highest grades of the grammar school.

"We would recommend as perhaps the most desirable branches of science to be included in the classical courses in the high school, and to be required for admission to college, physical geography, phænogamic botany, and human physiology. The

first is suggested as tending to keep alive in the student's mind a sympathetic acquaintance with nature in its broader aspects; the second, as affording unequal opportunities for discipline in observation; the third, as affording knowledge of the greatest practical importance.

"The rudiments of physics and chemistry which we propose for the grammar schools, will enable physical geography and physiology to be intelligently studied in the early years of the high school course."

GIRARD COLLEGE STATISTICS.

IN the last annual report of this Institution it is stated that at the beginning of this year there were 1,368 pupils. The total number of admissions to the College since the opening, in 1848, to January 1, 1889, is 4,021.

"The number of boys still on our roll waiting for admission is two hundred and sixty; of these, two hundred and forty-eight are from Philadelphia and other parts of Pennsylvania, and twelve are from other states or countries, viz.: five from New Jersey, four from New York, one from California, one from Delaware, and one from Wales. It is evident, therefore, that applicants continue to present themselves more rapidly than they can be admitted. This state of things has continued with scarcely an intermission from the foundation of the College. The noble charities which have just been instituted by the Misses Drexel and by Mr. Isaiah V. Williamson, will, it is hoped, afford ample room for the admission of those for whom we can find no place.

"During the year, 160 additional boys were admitted to the School of Mechanical Instruction. This has been accomplished by extending the course of pupils in the second grade of the third school, who have been found old and strong enough to derive benefit from such instruction. There are now upwards of 450 boys in this department. No more striking illustration of the change in the apprentice system can well be afforded than is shown by a comparison between the number of boys bound out this year and in 1870, when our first report was made. Of the 121 boys who left the College in 1886, desiring occupations, we were able to obtain indentures but for six, while 115 found ready employment. In the year 1870, out of seventy boys who left the College, fifty-three were indentured. Fortunately, however, the training now given in the use of tools, in free hand, mechanical and geometrical drawing, in shorthand and type-writing, and in telegraphy, enables us to find places for them with comparative ease. This is best shown by the fact that while formerly at least 10 per cent. of the pupils were unable to obtain positions before reaching the age of eighteen, last year there were none, and this year but two, on an average less than 1 per cent., who remained in the College until compelled to leave on age.

"Mr. Girard, in naming the occupations in life preferred by him for the pupils, first mentions agriculture. While we often obtain places for boys with farmers, the Board has never seen an opening for special instruction in this art. A scheme to accomplish this, to some extent, in connection with the

cultivation of our Catawissa lands has been suggested, and is now in the hands of a committee for consideration."

"OLDEST TWINS IN THE WORLD."

THE *Germantown Independent* of a recent issue says:

"It is not generally known that there are two gentlemen residing in Germantown and Jenkintown who have the honor of being the oldest living twins in the United States, if not in the world. Their names are Samuel and John Nice. They were born May 11th, 1805, which makes them almost 84 years of age. They both learned the undertaking and cabinet making business, and from 1828 until 1865 carried on the calling at Germantown."

We beg leave to take exceptions to the item published in the *Independent*, and offer as a substitute the case of George and Jonathan Buckman, well-known in Bucks county. These brothers were born in Darby, Delaware county, on April 22d, 1803, being 86 years of age in April next, and subsequently removed to Watertown, N. Y. Their mother was of the General Brown family, of New York city. George learned the blacksmith business and for upwards of forty years carried on the industry, being the patentee and manufacturer of the celebrated Buckman plow, and founder of the town of Buckmanville, in Upper Makefield township, Bucks county, Pa. During the war he assisted as nurse in the China Hall hospital, in Bristol township. He now resides with his son-in-law, Owen W. Worstall, at Millville, N. J., and is yet hale and hearty. Jonathan lives in Washington, D. C., but is confined to his room, being somewhat feeble and defective in vision. For a number of years he carried on the undertaking business at Tennallytown, near Washington, and during the war interred hundreds of soldiers who died in the government hospitals in that city. Mahlon Buckman, a brother, near 84 years of age, resides in New York, and Stacy C. Buckman, another brother, died at Newtown about one year ago, at the age of 80 years. George and Jonathan Buckman bear so close a resemblance to one another that they have frequently been confounded. When the late Major Joseph B. Roberts was stationed at Washington with his command he met Jonathan on the street and accosted him, asking of his friends in Bucks county. Jonathan was dumb-founded, and it took some time to convince the Major that he was the brother of George instead of that gentleman himself. It would seem, judging from the occupation of both John and Samuel Nice and Jonathan Buckman, undertakers dealing continuously with the dead, it is also conducive to long life. Until further facts and proof are brought to light the *Enterprise* shall demand the credit from the *Independent* of naming the Buckman Brothers as "the oldest living twins in the United States, if not in the world."—*Newtown Pa., Enterprise*.

Envy and jealousy light the intensest fires that ever burn in human hearts; gossip and scandal are the smoke emitted by them. If, as has been said, these passions could, like some modern chimneys, be consumers of their own smoke, a purer and better atmosphere would then prevail.—*Frances E. Willard*.

JACK FROST'S HERBARIUM.

In Florida, where ice is so desirable for cooling food and drink, it is not naturally formed, and so must be made. I visited an ice factory. They have twenty tons of ice forming here all the time. They lift a tank every thirty minutes, take out the ice, refill the tank with water and replace it. The freezing takes forty-eight hours. The tank they have just emptied will be filled soon, and a new block of ice will be taken from it on "the day after to-morrow." Now, it seems that this freezing takes place so gently that a spray of roses may be put into a tank of water and frozen into the mass of ice without stirring a petal from its place. There it lies imbedded, in all its beauty of form and color—a marvelous thing, I think. The ice-makers like to perform this experiment, as it shows the clearness of their ice; and pride is taken in freezing pieces of unusual beauty and transparency. A delicate spray of flowers, a cluster of ripe fruit, or a brilliant-colored fish are favorite subjects. Exhibitions of such freezings are occasionally made at fairs, and a particularly beautiful or interesting piece makes a very attractive gift for a birth-day or for Christmas. What a pretty way to preserve objects! I would like a collection of Florida specimens so preserved. No dried-out herbarium specimens; no faded and distorted alcoholic preparations; no unnatural taxidermist mounts, but everything in its natural color, its perfect outline, its living beauty. Here, a clear little block with a chameleon; here, a larger one with a coiled rattlesnake; there a young alligator, a cluster of grape fruit or oranges, a spray of flowers, or a series of forest leaves. But, alas! such a collection would not last a single week.—*St. Nicholas*.

PLANTING WITH A CANNON.

ALEXANDER NASMYTH, the landscape painter, was a man fruitful in expedients. To his mind, the fact that a thing could not be done in the ordinary manner, was no reason why it should be given up. His son relates the following interesting example of his ingenuity: The Duke of Athol consulted him as to some improvements which he desired to make in his woodland scenery near Dunkeld. Among other things, a certain rocky crag needed to be planted with trees, to relieve the grim barrenness of its appearance. The question was how to do it, as it was impossible for any man to climb the crag in order to set seeds or plants in the clefts of the rocks. A happy idea struck my father. Having observed in front of the castle a pair of small cannons, used for firing salutes on great days, it occurred to him to turn them to account. A tinsmith in the village was ordered to make a number of canisters with covers. The canisters were filled with all sorts of suitable tree seeds. The cannon was loaded, and the canisters were fired up against the high face of the rock. They burst, and scattered the seed in all directions.

Some years after, when my father revisited the place, he was delighted to find that his scheme of planting by artillery had proved completely successful, the trees were flourishing luxuriantly in all the recesses of the cliff.—*Exchange*.

MUNICIPAL SUFFRAGE FOR WOMEN.

The question of municipal suffrage for women will soon come before the [Massachusetts] Legislature. Those who favor this measure, and especially women who have worked and waited for its passage for many years, are encouraged by the fact that the old objections are no longer heard. The single one now urged with any force is that offered by John C. Llops at the late hearing of the remonstrants. He said essentially this:

"Politics is a branch of business, of actual affairs, of dollars and cents. Women are without practical business experience. Women are segregated from men by their circumstances, separated from them and from affairs by their domestic relations. A large majority of them are not engaged in any branch of business or individual occupation. As a matter of personal fitness, therefore, they are not qualified to discriminate wisely between candidates, or to decide intelligently on public policy."

In answer to this, almost the only objection now remaining to the equal rights of women, it may be fairly urged that the ground taken by Mr. Ropes shows a man's point of view quite as completely at fault in regard to the whole world of women's interests, as that of any woman can be in regard to men's interests.

Mr. Ropes says, "A large majority of women are not engaged in any branch of business or individual occupation." So busy has this gentleman been with his own public and private affairs that it has not even occurred to him that the making of the home, the care of the family, the rearing of the children, is business which occupies at least 20,000,000 of women in this country during the largest part of their lives, and very important business it is, which needs special legislation by those whom it most immediately concerns.

It is the women's side of the world's business for which women should have the suffrage. Men do not know about it, as witness Mr. Ropes, an able and intelligent lawyer, who thinks because women do not have men's business, that they do not have any business.

One only needs to look at the laws that have been made for women to see that men cannot do well about the home business. Under the old law, when at the marriage ceremony the bridegroom had said to the bride, "With all my worldly goods I thee endow," the law at once declared that all the personal property the newly-made wife had should be the husband's property; that he and not she should have the "custody" of her person; that he might give her "moderate correction," if the stick with which he whipped her were no larger than his thumb. When her child was born, the law, asking no questions of her, said: This child belongs to its father. The sole legal right to it was in him, and there it remains to this day. The law gave the use of all her real estate to the husband as long as he should live, because he had to support her and her child. Wives reared the children, spun and wove, washed and ironed and cooked, while the husband "supported" them. The wife who earned a dollar at scrubbing somebody

else's house (she had nothing for scrubbing her husband's house), brought home her dollar, but it was by the law her husband's dollar, and he had it. If the husband died, the law left his widow only forty days to stay in the house without paying rent, and that is all the right she has to stay in the house to-day. It is true that by much petitioning some of these odious laws have been done away with, but they furnish clear proof that women must look after their own business interests. In the villages and country towns, where everybody knows everybody, women are surely as competent as men are to judge of candidates for town offices who will look after the material and moral interests of the town. Women always care for their children. They would be sure, the majority of them, to unite with that party of men who would be true to home interests. Thus the public and private good would be better cared for by the help of the municipal suffrage of women in the towns.

In the cities, where everybody does not know everybody, women read the newspapers, and have as fair a chance as men do to ascertain the character of candidates. City mothers care for the good of their children and the welfare of their families not less than the mothers in the towns. The home business is their business, and in order that it may be thoroughly cared for, women should have the municipal vote.

Towns and cities are corporate bodies, of which women as well as men are members. The very fact that they are members of the city or town corporation should, in all fairness, entitle them to a vote in it, as it entitles them to one in every other corporation of which they are members. The existing laws which concern women are proof that they need a hand in their own affairs. The Legislature can now secure this boom for women. They are waiting anxiously, in the hope that the women of all the future, as well as those of to-day, may be grateful to this Legislature for just and generous action in their behalf.—*Lucy Stone, in Boston Globe.*

GRACE IN ARGUMENT.

A SEVERE test of social grace is conversation when it becomes argument. To state one's side clearly and without warmth, to listen without prejudice, to catch the drift of an opponent's thought and not hold him to an imperfect statement of that thought, is the highest form of intellectual courtesy. It is the business of a lawyer to confuse a witness; but a parlor is not a court-room, nor is conversation held there the records of a court. It is astonishing how rarely a number of people can discuss any subject and keep its principles in sight and its personalities out of sight. It is rare even among those of broad social opportunities. A party of six ladies and gentlemen sat discussing the issue of the late campaign, the principle part being taken by a gentleman who had made special studies of the subjects. For some time the conversation had continued, when a seventh person joined the group, breaking into the conversation abruptly. A lady had just closed some remark when the new-comer brusquely broke in with,

"Never argue with a woman," quoted as a lawyer's maxim. A dead silence lasted for a moment, and the interest in the conversation lagged, the ladies present not possessing the temerity to continue. The remark, while it silenced them, neither refuted the statement made nor showed a knowledge of the subject in hand by the speaker, though his manner indicated that he thought a *finis* had been reached.

How often is an interesting and instructive conversation broken by just such crudeness, or by lack of interest! How often are conversations developed into a mere exchange of personalities, the victor being he of the least manners and sharpest tongue! This is the favorite method of those who cannot sustain argument or brook defeat.

Is the statement true that the art of conversation is not developed in our social life? That the spirit of haste, of money-getting, makes all seem useless that does not tend to an exchange of coin?

The *salon* in France flourished because maintained on a basis of intellectual equality. No concessions were made because of sex, no favors asked because of sex; each stood erect in the integrity of intellect. This was the charm of the *salon*. Europe bowed before Madame de Staël, not because she was a woman, but because of the intellectual power and social grace which caught the spirit of the opponent and conceded the right of his position. While acknowledged as the most brilliant talker of her age, it was also acknowledged that she was the most charming listener, whose sympathy always brought out the best in those about her; that all felt in her presence, not that she was shining at their expense, but that they felt and revealed, under the magic of her presence, the best in themselves.

The spirit of individualism in America is responsible for the lack of art in conversation. The same spirit that makes every man rush for the first place, elbowing his neighbor, indifferent to his rights or his weakness, is the spirit that has entered our social circles and made conversation a quicksand in which one is in danger of losing all power of thought through the discourtesy of one whose power is not expression of thought, but sharpness of tongue. Not persuasion, but victory, is the goal even in the social circle.—*Christian Union*.

CHANGING LOCATIONS.

It is especially hard for persons well advanced in years to change locations. We become so a part of our surroundings that it requires a wrench to break away and make new relations. But we should not spend too much time in thinking of the past, but press on, doing to-day's duties and knowing to-day's people, not valuing them less because they are *new*, or the old less because they have dropped somewhat out of our present life. We must keep loosening our tendrils and moving on while life lasts more or less. If we do not the objects on which they are fixed will move on anyway.

"Change and decay in all around we see,
O Thou who changest not, abide with me."

P.

A NEEDED WARNING.

DR. GRACE PECKHAM, in a recent number of *The Home Maker*, presented one more dictate of fashion to which the majority of women bow, and points out its dangers. She says:

"The fashion of wearing veils has become very prevalent. It is a fashion which should not be encouraged. Its redeeming features are that the veil protects the hair and keeps it well arranged; it protects the forehead from the wind and wards off neuralgia. These two services of the veil can be retained, but the veil should not be worn over the eyes. To them it is very injurious. It is injurious to the mechanical seeing apparatus, since a constant adjusting of muscles and lenses is required, and a striving to obtain a clear image for the retina. It is extremely wearing to the brain, which has a great deal to do with touching up and finishing off the picture which falls upon the vision, and in making the mental image a perfect one, no matter what the external one may be. Veils of dotted lace and dazzling white illusion may give rise in a few weeks to an irritable condition of the eyes that years will not remove."

NEWS AND OTHER GLEANINGS.

—General Agent Anna T. Wilson, of the Children's Aid Society, reports that during last month 64 children passed through the hands of the society. Of these 29 went with their mothers to places at service, 16 were placed in private families to board, 8 in private families on trial, 4 in hospitals, and 7 were returned to parents, relatives, or other guardians; 47 visits were also made to children during the month.

—A project that has been contemplated for some time by Anthony J. Drexel has been put in practical shape by the purchase of the Louella Mansion at Wayoe, Delaware county, and the selection of Trustees and Managers for the "Drexel Industrial College for Women." The object of the institution, as set forth in the charter, is to instruct women and children between the ages of 13 and 19 years in all duties appertaining to the care of a household, and to teach such trades and businesses as will make them practical women, able to earn a respectable livelihood.

—It is now said that operations on the proposed Nicaragua Canal will probably be begun this month by sending a dredging plant to Greytown. The harbor of this town, which is to be the eastern terminus of the Canal, is constantly liable to be filled up by sand moving westwardly, through the action of shore currents. It is proposed to construct a pier of brush and piles, which will allow the harbor to be opened to vessels of 15 or 18 feet draft. The work of permanent improvement to 30 feet draft will not be begun until the building of a railroad inland. This road will bring rock taken from the great rock-cut, and which will be used for the sides of the canal through the marsh-lands, and for the construction of a permanent pier at Greytown.—*The American*.

—No year since 1879 had so small an amount of sunshine in England as 1888.

—*Engineering News* for March 2d contains an interesting item to the effect that a French company—the Gas and Water Company of Tunis—are about to undertake for practical purposes the restoration of the reservoirs of ancient Carthage. These basins cover an area of 37,590 square

feet, and are divided into eighteen communicating apartments. They have been entirely neglected since the incursions of the Arabs in 697.

—The United States will make a creditable display at the Paris Exhibition. And this is as it should be; for, although nominally a universal exposition, it will be practically a display of the products of republics. The monarchies of Europe will be represented only by private exhibits, while the republics of North and South America have rallied in force. The United States Department of Agriculture will make a splendid showing. Secretary Colman has placed the undertaking in the hands of Professor C. V. Riley, the entomologist, an energetic organizer as well as a careful and enterprising scientific observer; and Professor Riley has already sent forward three car-loads on the way to France. The bulk of shipments are nearly through with, and the perishable staples will follow during the next month. Congress appropriated \$250,000 to aid exhibitors, and Secretary Colman's quota of this will insure the best illustration that the agricultural resources of this country have ever had on the continent of Europe.—*Science.*

—It is said that the sewerage system which is now being constructed in Buenos Ayres is the most perfect in the world. Measures have been taken which will result in putting every house in the city in perfect sanitary condition within three years. Sanitarians will watch the result of this stupendous undertaking with great interest, and will be able to deduce from it many valuable practical lessons.

CURRENT EVENTS.

PRESIDENT HARRISON has made a number of appointments, the most important being Ministers to several foreign countries. Among these are Whitelaw Reid, the editor of the *New York Tribune*, to France, and Thomas W. Palmer, of Michigan, to Spain. The U. S. Senate is still in session.

JONATHAN CHACE, U. S. Senator from Rhode Island, well known as a member of New England Yearly Meeting of Orthodox Friends, has resigned his seat, desiring to devote his time to private affairs. He has been in Congress since 1851, having entered the House that year, and been chosen to the Senate in 1855.

THE New Jersey Legislature has repealed the High License and Local Option bill passed last year. The repeal bill establishes a new license system, satisfactory to the liquor interests. It was passed in the Senate some time ago, and in the House on the 19th inst.

NOTICES.

. Haddonfield First-day School Union will be held at Moorestown, on Seventh-day, Third month 30th, commencing at 10 a. m.

All interested are cordially invited.

MARTHA C. DE COU, } Clerks.
MARY R. WILSON, }

. A meeting of all the divisions of "Young Temperance Workers" will be held at Girard Avenue meeting-house, 17th street and Girard Avenue, on Fifth-day evening, 24th inst., at 8 o'clock.

Aaron M. Powell, of New York, is expected to be present and will deliver an address.

. The Committee of Philadelphia Monthly Meeting propose having a social reception for members and attenders of their meetings on Sixth-day evening, Third month 29th, between 7:30 and 9:30 o'clock. The company of young Friends from the country and other strangers, in an especial manner is invited, also the husbands and wives

of our members, even though they may be members of other denominations.

It will be held in the Parlor and Library Room, 1520 Race street.

. Circular meetings have been appointed by the Western Quarterly Meetings as follows:

Hockessin in the Fourth month.

To convene on the second First-day of each month respectively, at 2 o'clock p. m.

. The Penn Sewing School held in Race street meeting-house will close its present session on Seventh-day, Third month 30th, at 10 o'clock a. m. It is proposed to make this an Anniversary meeting, twenty years having passed since the school was started. The attendance of former officers, teachers, and friends of the school is desired.

ANNIE C. DORLAND, Secretary.

. A portion of the Committee to visit the branches of Philadelphia Yearly Meeting, will, under the minute of their appointment, attend the following meetings: Germantown, Third month 23d, 7:30 p. m.; West Philadelphia, Third month 23d, 7:30 p. m.; Frankford, Third month 24th, 10:30 a. m.; Girard Avenue, Third month 24th, 7:30 p. m.; Race street, Third month 25th, 7:30 p. m.

Friends generally are solicited to attend.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall-st., N. Y.

AMOS HILLBORN & Co., Furniture, Bedding, Curtains.

PARLOR, DINING ROOM, LIBRARY
AND CHAMBER FURNITURE, CUR-
TAINS AND FURNITURE COVERINGS
MATTRESSES, BEDS, FEATHERS,
SPRINGS, SPRING COTS, ETC., ETC.

No. 1027 Market Street, Philadelphia.

JARVIS-CONKLIN MORTGAGE TRUST COMPANY,

Capital Paid In, . . . \$1,500,000.

Six per cent. Guaranteed Mortgages on Farm and City properties.

Six per cent. Debenture Bonds interest payable half yearly.

Five per cent. Saving bonds in small or large amounts running six, twelve, eighteen, or twenty-four months.

These Bonds are issued under the supervision of the Bank examiners of the state of New York, with whom we have deposited 1-10th of our Capital in Government Bonds.

We issue instalment Saving Bonds, secured by real estate security, running 10, 15, and 20 years. Send for Pamphlet.

THE TRANSFIGURED FACE.

I KNOW the face of him who with the sphere
Of unseen presence communion keeps:

His eyes retain its wonders in their clear
Unfathomable deeps.

He brings the thought that gives to earthly
things

Eternal meaning; brings the living faith
That, even now, puts on the immortal wings,
And clears the shadow, Death.

This in his face I see; and, when we meet,
My earthliness is shamed by him; but yet
Takes hope, to think that in the unholy street,
Such men are to be met.

—Robert Leighton.

NOTES FROM PALESTINE.—VII. DAMASCUS.

ANCIENT Palestine was limited by Dan and Beer-sheba, but the traveler in that country to-day would be disappointed not to extend the journey northward to Damascus, where Syrian life, which still retains many nomadic characteristics, may be seen in its most cosmopolitan form. The city is surrounded for nine miles by olive plantations and gardens most beautiful when the apricots are in fruit and the pomegranates in blossom. These gardens are bounded on three sides by mountains, but on the west stretches the great Syrian desert.

The city walls show three different periods of building, the lowest course being Roman, the central Arabian, and the upper Turkish. At intervals occur round or square towers in a dilapidated condition. Of the numerous entrances, the "Gate of God" is most revered, because from this the caravan of pilgrims starts from Mecca and hither it returns.

We entered the city by a gateway opposite the Tomb of St. George, who is said to have assisted Paul to escape from Damascus. The window pointed out as that whence the apostle was let down in a basket by night, can hardly be the one mentioned in the Scriptures, as the wall beneath it is of Turkish construction.

In the Christian burial ground outside is the grave of the English historian Buckle. In the same vicinity is the traditional House of Naaman, the Syrian, now used for a leper hospital.

Having passed the gate, we found ourselves in "the Street which is called Straight." It extends quite across the city and merits its name. Remains are still to be seen of the columns with which it was flanked in ancient times. As in the days of the

Apostles, the Jewish quarters are near this street. The locality in which the Christians live has not yet recovered from the massacre of 1860, when the Druses rose against them and 6,000 unoffending citizens were killed. The rest of the city is Muslim. The population is not accurately known, but is estimated at 110,000.

The friend who had accompanied us from Jerusalem, a Syrian physician, hospitably entertained us in his own home. His house, like most of those in Damascus, was devoid of ornament on the exterior. After passing the entrance we were led through a corridor to a square court paved with different colored marbles, where a fountain played amidst lemon, orange, pomegranate and jasmine plants. The room assigned for our use opened into this court and here our host introduced us to his wife and sisters. They wore gauzy robes sparkling with jewelry and, according to the custom of their country, were delicately powdered and painted, their finger nails being tinted with henna. The ladies could not speak English and we knew only a few words of the Syrian language, but we found a common medium of speech in French. They gave us a gentle welcome with their soft, melancholy eyes, which now and then lighted up with genuine merriment at some unexpected contrast between our customs and theirs. In reclining among the pillows on the cushioned divan which ran around three sides of our room, in smoking the nargilehs, or long-stemmed water pipes, which they begged us to try, in handling with grace the tiny cups of black Turkish coffee frequently offered for refreshment, they certainly had the advantage of us; but in the dining room across the court, where we sat on chairs at a table, we were more at home than they, and we noticed that they occasionally deserted their knives and forks in despair and resorted to thin wedges of bread placed beside each plate, like the "pushers" sometimes given children in America. The meat, chiefly mutton, was chopped fine and served in the grape leaves in which it was boiled. Beet root, turnips and cucumbers were pickled in salt-water or vinegar. The wheat bread was thinly spread with butter and grape syrup and then sprinkled with sesame. Bread, cakes and biscuits were made of other grains also and generally eaten hot. Raisins, oranges, apricots, figs, jellies, preserved fruits and Turkish paste made the deserts.

The floor of our room was raised above the court and carpeted with fine straw-matting. Before stepping upon this we removed our shoes. At night our divan was also our bed and coverings were taken from shelves over our heads.

When the ladies went with us to church or on the street they were enveloped in long, white cotton mantles, which concealed all but their eyes. It was impossible for us then to tell one from another, but they recognized their acquaintances at a glance.

The bazaars of Damascus furnish an unending source of entertainment. Each business has its separate quarter. In the bazaar of the joiners were articles of wood inlaid with mother-of-pearl, including wedding chests, mirrors, shoes, tables, etc. The goldsmiths displayed dainty necklaces and bracelets of ingenious design, fine filagree, zars or silver holders for coffee cups, jewels and coins. The copper-smiths had Oriental dinner services adorned with inscriptions.

In the saddle-markets were costly trappings of velvet and silver, embroidered saddle cloths, pistol holsters, sharp Arabian bits and clumsy stirrups.

The Greek bazaar boasted "Damascus blades," so-called; the handles were showily decorated with mother-of-pearl and jewels, but the steel was mostly modern, and imported from Soligin, Germany.

In the silk shops were gay striped shawls for the head, fancy jackets, caps, scarfs, table covers, and tobacco pouches. Among woolen fabrics were displayed the striped brown or black and white mantles of the Bedouins and red fezzes ironed on round moulds. In the cotton market were white cloths streaked with gold thread, of which the robes and turbans of the Muslims are frequently made. Curtains in silk, woolen, and cotton could be purchased in exquisite designs.

The carpets were in long strips not adapted to American floors, but the Turkish and Persian rugs would have delighted any housekeeper. The oldest were most expensive. The patterns were novel and attractive and the colors wear well.

The shoemakers offered a great variety of goods, slippers of scarlet and yellow leather, children's velvet shoes, pattens for the street or bath, hob-nailed boots for peasants.

We dined in a restaurant where the vegetables were cooking in huge copper caldrons. Small pieces of fresh mutton with strips of fat tail between them were slowly roasting on large spits. Thin, flat bread was baked by being pasted against the stove. Beans and others dishes were consumed by purchasers in the open street. On the counter were bottles of liquors stoppered with colored eggs or lemons. Lemonade was cooled with snow from Lebanon.

In a stall hung with mirrors the barber shaved or bled people. At the corners of the streets sat public writers and engravers of seals surrounded by peasants and Bedouins. The Persians, who are experts in seal-engraving, were much employed, as seals are essential to conveying and are appended, instead of signatures, to deeds. As a class, the handicraftsmen are industrious. They are united in guilds; it is said even the beggars have a guild. To many of the shops were attached pet lambs with fleeces tinted in patches of pink and blue. They were kept as playmates for the children, being considered safer for them than dogs.

The cries of the street venders were characteris-

tic. The seller of lemonade and *eau sucrée* carried on his back a jar with narrow neck and two handles, while he rattled brazen cups in his hands, shouting "Refresh thy heart!" or "Allay the heat!" Another cried, "O father of a family, buy for 30 paras a roll of cucumbers" (i. e. 5 lbs.) "Tender cresses from the spring of Ed-Duiyeh," sang a third, "if an old woman eats them, she will be young again next morning." "Here is something too hard for the teeth to bite," called the purveyor of pistachios and roasted pease. "O Giver of Sustenance, O Allah, send customers," implored the itinerant baker. "Appease your mother-in-law," admonished the street-florist (i. e., by giving her a bouquet).

Water was carried about in goat-skins, and not infrequently we saw some charitably disposed person purchasing the contents of a water-skin to distribute freely to the thirsty. Muslims bought bread for the street dogs. Rival venders showed no jealousy of one another and a generosity prevailed among them which astonished us, who were accustomed to seeing business transacted with the rigidity and sharpness of law. Among the Damascenes of the higher class, it is the custom if possible to present your friend with any of your possessions which he may specially have admired.

The Great Mosque eclipses all other buildings of Damascus. It was built on the site of the ancient Christian Church of St. John by Greek architects, who employed 1,200 workmen. The interior contained antique columns brought from the towns of Syria, and was enriched with marbles of rare value, mosaics, and precious stones. From the ceiling were suspended 600 golden lamps. Much of this ancient splendor has now disappeared. Part of the building was burnt down in 1069 and the restorations were inferior to the original. The golden lamps were replaced by those of less value. But the spacious interior, the long aisles, and arched vaulting still produce a sweet and solemn effect and lift the soul into a spiritual atmosphere. We were now and then ludicrously brought back to a sense of earthly surroundings by the custodian who chafed after us with a lost slipper. Few things so enrage a Muslim as to have you leave behind one of the enormous cloth coverings in which your shoes are encased, as you shuffle over the marble floors of a mosque, yet it is very difficult to keep them on. The minarets are still in good repair. The most beautiful is octagonal, has three galleries tapering towards the top, and is crowned by a ball and crescent. From these and other minarets of the city, five times a day, the hours of prayer are proclaimed by the muezzins in sonorous tones. In a court is the tomb of Saladin. On the upper beam of a beautiful gate adjoining the Mosque is inscribed in Greek the passage from the Psalms: "Thy kingdom, O Christ, is an everlasting kingdom, and thy dominion endureth through all generations" (the words "O Christ" being interpolated). The origin of this inscription has been much discussed by archaeologists.

Our friends were Greek Catholics, and we were kindly received and entertained by the Patriarch of that sect, whose residence is at Damascus.

A small church belonging to the Latins has been erected on the supposed site of the house of Ananias.

The old castle of Damascus is a square fortress with twelve projecting towers, erected in 1219. The deep moat is now filled with reeds and many chambers have fallen with decay. In one is kept the sacred tent carried by the caravan of pilgrims to Mecca, in others, ancient armor.

The public gardens were watered by three rivers, and here the people were gathered in picnic groups, smoking nargilehs, eating rice, and listening to Arabian music, which is not melodious to American ears.

CORA A. BENNESON.

From Friends' Quarterly Examiner, (London.)

THE MISSION OF FRIENDS: SOCIAL.

BY EDWARD GRUBB.

(Conclusion.)

AND here we come back to the causes of our present troubles. It is idle to say that the state of things we see is inevitable,—that we did not produce it, and are not to be held responsible for it. "Am I my brother's keeper?" Nine-tenths, at least, of the poverty that now prevails can be traced directly or indirectly to the ignorance, apathy, and selfishness of the upper classes,—the classes that have prided themselves on their Christianity. Even if it is said that many of the poor bring their misery on themselves by their recklessness and drunkenness, still the question remains, *What made them reckless and drunken?* The answer to this in most cases is, the conditions in which they were born,—conditions directly traceable to the ignorance and selfishness of the upper classes in the past. It was their ignorance that led to wholesale demoralization during the early part of this century by a vicious Poor Law, and throughout by indiscriminate almsgiving. (The poor have probably suffered more from well-meant but lazy and ill-considered efforts to help them, than from any other single cause.) It was their selfishness that in preceding centuries passed law after law (such as the atrocious law of Settlement) in the interests of the rich, and to the detriment of the poor; which until stopped by stringent Factory Acts crowded women and children into factories (for the sake of cheap labor), and caused two generations to become physically and morally degraded; and which still, in the fierce struggle of industrial competition, finds itself forced, by a necessity which only itself has created, to cut down wages to the lowest point.

The fact is, we are none of us in this world isolated units, forming by our own powers our own characters, and responsible only for ourselves. We are each of us born into a society which goes far to mould our characters, and to fashion our lives. We form society, and by society we ourselves are formed. And it may be that just here we light upon a fundamental defect in the Quaker view of life, traceable to Fox himself. Has not Quakerism all along been too exclusively *individualistic*? Have not our thoughts been too much directed to individual worship, to individual faithfulness, to individual purity of life, and have we not missed something of the higher meaning of life in *association*,—the life of the Family, the

Municipality, the Nation, and the Race? Is not this seen when a Friend writes on "Christian Solidarity," and we are but little able to receive it, or to understand exactly what he means? It is certain that the idea of Solidarity, though not the word, was perfectly understood in pagan Greece and Rome, and in our much-despised Middle Ages.

The life of the Nation or the Guild was then as real a thing in the consciousness of men as the life of the Individual. It is only in very recent times that the idea of "each one for himself" has been the guiding principle of life, either in religion or in politics. That idea, as regards religion, is the child of Protestantism and we as Protestants have shared it. In politics it is the product of the eighteenth century, and was consummated by the French Revolution of 1789. The theory of the "Rights of Man" may have been necessary as a stepping-stone, in freeing mankind from the dominion of ruling classes, but as a master principle of life it is doomed to hopeless failure. Logically carried out it simply means the triumph of the strong over the weak, and leads straight to the state of things we see around us,—the means of living concentrated in the hands of the few, while multitudes are scarcely able to survive.

The chief reason why the whole of our working-classes are not in that condition is that they have *not* acted on the principle of "each one for himself," but have (in Trades' Unions and Coöperative Societies) associated themselves together, subordinating personal freedom to the good of all.

Thoughtful men on every hand are beginning to realize the utter break-down of the theory of individualism and universal competition.

"We have been suffering for a century," says Prof. H. S. Foxwell,¹ a leading economist, "from an acute outbreak of individualism, unchecked by the old restraints, and invested with almost a religious sanction by a certain soulless school of writers. The narrowest selfishness has been recommended as a public virtue, and the debasing pursuit of private gain has become the all-absorbing motive of action."

"We are suffering on all sides," says Canon Westcott,² "and we know that we are suffering, from a tyrannical individualism. This reveals itself in social life by the pursuit of personal pleasure; in commercial life by the admission of the principle of unlimited competition; in our theories of life by the acceptance of material standards of prosperity and progress. Nor is it difficult to see why this should be so. The silent revolution which has taken place within this century in the methods of production and distribution has terribly intensified the evils which belong to all late forms of civilization. The 'great industries' have cheapened luxuries, and stimulated the passion for them. They have destroyed the human fellowship of craftsman and chief. They have degraded trade, in a large degree, into speculation. They have deprived labor of its thoughtful freedom, and turned men into 'hands.' They have given capital a power of dominion and

¹ "The Claims of Labor," p. 249. (Edinburgh Coöperative Printing Society, 1886).

² "Social Aspects of Christianity," p. 138. (Macmillan, 1887).

growth perilous above all to its possessor. So it has come to pass that in our fierce conflicts we are in peril of guiding our conduct by a theory of rights, and not by a confession of duties; of losing life in the search for the means of living; of emptying it meanwhile of everything which gives dignity to manhood."

The watchword of the future is not Self-interest or Individualism, but Association, and joint action for the good of all. And this we shall have to take as the foundation of our religious, no less than of our secular life, if indeed we feel it needful thus to distinguish them. Our chief thought must no longer be to "work out our own salvation," but to "bear one another's burdens, and so fulfill the law of Christ." In upholding the banner of the Presence of God in Man, we must not forget that this implies the Oneness of all Humanity. We must learn more fully that there is no true service of God which is not also a service of man.

The individualism which has too much distinguished our religion, coinciding with the growing individualism of society, has aided us in the struggle for existence; and to become a Friend has generally meant becoming well-to-do. This has been so far recognized, that a Quaker in popular apprehension has been a man who, however precise in outward appearance and deportment, has not always been above sharp tricks in business.

"'Make money,' said the Quaker, 'and be honest, if *thee* can.'"

Popular ideas have usually some basis in fact; and, though grossly unjust if applied generally, it is to be feared that there is some slight foundation even for this. The discouragement of æsthetic, and to a certain extent of intellectual activity, and the attempt to live the life of pure spirit without such aids to elevation of character, have helped to direct our activities into more obviously utilitarian channels. There has been, especially of late, a certain "Philistinism" about us, different indeed from that which Matthew Arnold complained of in the ordinary Dis-senter, but against which we shall do well to be on our guard. Our style of furnishing our houses, for instance, too often exhibits more of expensive ugliness than of simple beauty and true refinement of taste. It is, perhaps, no wonder that having had the sense of beauty repressed for generations, our first efforts after loveliness should not be of a very elevated type. We have not been free either from the pernicious vulgarism of bowing down to wealth; courting the society of people because of their money; treating persons differently because of differences in "position;" speaking of persons as "doing well," on the ground of making a large income, regardless of real services to society. Some may doubt the justice of these remarks; but it will, I believe, be recognized on reflection, that there is reason for them, in spite of noble examples of the truest refinement. It has been unfortunate that the most spiritually-minded of our people have been more ready to denounce æsthetic and intellectual culture as mere "worldliness," than they have to declaim against that which far more deserves the name,

—the selfish and grasping spirit of modern life. We have been afraid of wasting our time over music, but not of wasting it in piling up useless wealth. We might well have gained a lesson from the man of science who when urged to take up some lucrative investment replied that "he really had no time to spare for making money."

There can be no question, I say again, that this spirit of selfishness, added to culpable ignorance and indifference in the administration of public and private charity, has been the chief factor in bringing about the state of things we see around us. And I believe no real and permanent amelioration is possible, until the ideal of modern life (which is largely our own ideal too), is changed; until we realize, in a practical manner, that we are "not our own;" that our advantages of whatever kind, whether wealth or leisure, or powers of mind or body, have come to us through society,¹ and must be used for society; that to use them for our own personal comfort, or the aggrandisement of ourselves or our families, is simply betraying a trust. This is, undoubtedly, in exact agreement with the plain teaching of Christ,—teaching which with quite marvellous facility we ignore or explain away, speaking of the inalienable rights of private property. Rights of private property indeed! "What hast thou that thou didst not receive?"

Why is it that we, who profess as a Society to carry out the plain teaching of Christ, are not taking the lead in working for this social regeneration,—the coming of His kingdom upon earth? Hardly since Joseph Sturge have we had a "social giant" among us. And instead of lending a ready ear to the great spiritual and social teachers of the century, as Mazzini, Carlyle, and Ruskin, their words (if known at all) too generally fall on ears but little prepared to receive them, and seem but as the idle echo of voices from a visionary land.

To many readers, much of what I am writing may appear visionary too. At least there will (and quite rightly) be the query, What would you have us *do*? Space will not allow of my now giving a detailed answer. In a pamphlet published two years ago on "The Problem of Poverty," I endeavored to give some hints of a few of the most hopeful lines of action. Here I will only allude to the importance of a resolute application of our powers of mind (now so largely used for beating others in the race for wealth) to the study of social problems, which in our complex society have become so difficult and so perplexing; of setting a high standard of scrupulous fairness and kindness in our dealings with others; of cultivating the acquaintance of the poor, not as patrons, but as friends and equals; of taking the utmost care that anything we give away does not do more harm than good by undermining independence, and sapping the manhood of the recipients; of living simple lives, eschewing vulgar ostentation in meals or furniture, as essentially of "the world, the flesh, and

¹ What I mean is, that not one of us would be what we are, or anything like, if we and our parents had not been born into a society already possessing the accumulated treasures of the past. Each one of us is, in the most literal sense, "the heir of all the ages."

the devil;" but adorning our homes with objects of real beauty and permanent value, and sharing them as much as possible with our poorer neighbors, encouraging these as much as possible to beautify their homes too; thus helping to direct the production of wealth into permanently useful channels, and once more accomplishing the marriage of Industry and Art. I do not here allude to the more obvious ways of improving the condition of the people by encouraging Thrift and Temperance, by the earnest advocacy of legislative reform, and by willingness to accept responsible public offices; what I rather wish to do is to call attention to less familiar paths.

Such are: thoughtfulness as to the effect of our actions upon society as well as upon ourselves,—noticing, for instance, the enormous waste of wealth and brain-power involved in the fierce competition of modern business (as evidenced by the great profits of the Distributive Coöperative Societies, who, by largely supplying their own markets, are thus relieved, in part, from the pressure of competition); and considering the actual working of our investments, informing ourselves how the money will be used, and who will benefit by it; and enquiring whether it might not be worth while to accept a smaller rate of interest for the sake of employing it near home, where we could ourselves look after it,—say in purchasing better and more sanitary dwellings for the poor.¹

These are a few of the many ways in which one whose conscience is awakened may begin to lead a social instead of an individual life. But is there not room for something more than this? Has not the time nearly come when those of us whose minds are thus awakened might with advantage unite ourselves together (as we already have our Peace and Anti-Slavery Societies) in a "Friends' Social Union," for discussing and attempting to apply in practice some of the best means of improving the condition of the people, and for pressing the subject on the attention of our own Society and of the public?

Whether this be practical or not, one thing is certain, that if the diseases of society are ever to be healed, it will be through the power of religion,—a religion not, perhaps, exactly of the conventional type, but one which gives free scope to the development of every high and noble human faculty, social as well as spiritual, artistic and intellectual as much as moral and devotional.

Socialists and many socialists imagine that they can regenerate society from the outside, simply by changing its institutions. Their attempts, so long as they leave out religion, are forever doomed to failure; for no mere mechanism, however perfect, can summon to itself the principle of life. Organization is not the cause of life, but life is the cause of organization. The symptoms of blood-poisoning cannot be cured with a lotion. Society can only be healed from within. Its life-blood must be purified; the hearts and affections of its members, which are the source of all its energy, the secret of all its progress,

must be renewed with a Divine inbreathing. The new City of God must be founded on love and helpfulness, actuated by the Law of Duty, and fired by religious faith. Whence is that love to come, and what shall be the source of the faith? Now, as ever, it must come from the Unseen; the narrow limits of selfishness and sense-experience must be borne down by the inrush of the Divine Spirit.

What form of religion is fitted to organize the new society so well as a purified Christianity,—the religion of Christ himself, who is the permanent embodiment of all that is highest and best in man, the permanent expression of the very heart of God? What form of Christianity is better fitted to take the lead in this organization than that which has throughout protested against the narrowness and formalism of the dominant religion, has striven to call men back to the simpler and purer faith of its Founder, and to the realization of his spirit as a present power in their lives? Just as we put on that spirit shall we know the depth and power of true religion, and be fired with love and faith to work with Him for the world's redemption. So shall we be able with hope and confidence to pray—

"Chase back the shadows, gray and old,
Of the dead ages, from our way,
And let our hopeful eyes behold
The dawn of Thy millennial day;
That day, when fettered limb and mind
Shall know the truth that maketh free;
And he alone who loves his kind
Shall, childlike, claim the love of Thee,"

MARY FISHER.¹

THE lives of few of the contemporaries of George Fox offer more of striking and romantic interest than that of Mary Fisher. She was born in the north of England in 1623—one year prior to the birth of George Fox—and became a Friend very soon after the rise of the Society. She early dedicated her talents to the ministry, and, in consequence, had to endure her full share of persecution, having been twice imprisoned in York castle. At another time she was compelled by the order of the mayor of Cambridge to undergo the ignominious treatment of being "publicly whipped at the market cross until the blood ran down her body" for preaching and "discoursing to the students about the things of God." The assembled crowd marvelled at the meekness and patient fortitude of Mary Fisher and her companion under this cruelty, and she is said to have remarked, "This is but the beginning of the suffering of the people of God." Samuel M. Janney, in his "History of Friends," mentions this incident as the first case of a Friend being publicly scourged.

In the year 1656, one spring day, a vessel arrived in the harbor of Boston, bringing with other passengers, Mary Fisher and Anne Austin—the forerunners of those Friends who were destined to disturb so sorely the stern and uncompromising Puritans of the Massachusetts Bay Colony. At that time John Endicott, a man of iron will and unyielding

¹ The Edinburgh Social Union, founded by Prof. Patrick Geddes, is doing much useful work in this and others of the directions here indicated.

¹ An Essay read in the Conference, after meeting, at 15th and Race Sts., 3d mo., 17, 1889, by Annie Cooper.

temper, was Governor of the colony, but during a temporary absence his deputy, Richard Bellingham, had the control of affairs. When the news of the arrival of these innocent women reached the deputy-governor, he immediately issued an order for them to be detained on board the vessel, and sent an officer to search for books in their possession. About a hundred books were taken from them, and, in accordance with the decree of the Town Council, these were publicly burned by the common executioner. The women were sent to prison and deprived of the use of all books and writing materials, and the windows of their prison were closed to prevent any intercourse with the outside world.

As no provision had been made for their support during their imprisonment, these women must have suffered for want of food, had it not been for the kindness of Nicholas Upsall, a humane and liberal citizen of Boston, who agreed to pay the jailor five shillings a week for the purchase of food. After a confinement of five weeks, the captain who had brought these prisoners to Boston was required to give bonds to the amount of £100 that he would take them back to the Barbadoes and that he would not permit them to hold intercourse with any of the inhabitants of New England.

Our interest, however, centres in the remarkable visit of Mary Fisher to Mahomet Fourth, Sultan of Turkey. This young and gifted monarch, who was at that time the terror of the Christian world, was encamped on the beautiful plains surrounding the city of Adrianople, and was preparing to over-run with his large army Central and Western Europe.

We know little of the incidents of her journey, until she reached Smyrna, where the English consul, not understanding her mission and well knowing the dangers to which a woman unattended was exposed in traveling in an Oriental country, ordered her to be returned to Venice in a vessel bound to that port. Undaunted and deeply impressed with the importance of her call, she persuaded the captain to allow her to land in Greece. Alone and on foot, she pursued her perilous journey over the mountains of Macedonia and Thrace, and at last reached the camp of the Sultan. Having accomplished the object of her visit, she declined the escort generously proffered by her royal host and started homeward.

Soon after her return to England, she married William Bayley, well known as a minister and voluminous writer in the Society of Friends. Later she became the wife of John Cross, and emigrated with him to Charleston, South Carolina. We afterwards hear of her living in this city, as a widow at the age of seventy-three. It is, however, probable her life closed in Charleston. A grand-daughter, named Sophia Hume, afterwards returned to London and became a distinguished minister. She was buried at an advanced age in the historic Burial Ground of Bunhill Fields.

The visit of Mary Fisher to the Sultan has been put in verse, and was published in 1854 as one of the "Lays of Quakerdom," by the late E. Rush Plumly.¹

From Young Friends' Review.

ESTABLISHMENT OF MEETINGS IN CANADA.

It appears from the Minutes of Philadelphia Yearly Meeting that some time in the year 1797, a concern was felt by that meeting towards Friends residing in what was then called Upper Canada and parts adjacent thereto, and a committee of thirteen Friends were appointed to visit them. Abraham Gibbons, Joshua Sharpless, Isaiah Rowling, Oliver Paxson, John Simpson, James Langstaff, Richard Hartsborn, James Cooper, Jacob Lindley, Jacob Paxson, James Willson, John Hunt, Jesse Kersey. In the following year they presented a report to the yearly meeting, which afforded solid satisfaction, and they were encouraged to give such farther attention to the concern as best wisdom might direct, and to aid them in their labors eight more Friends were added to the committee; Eli Yarnell, Nathan A. Smith, John Pierce, Thomas Stewardson, Reuben Helliari, John Cox, Jr., Benjamin Mason, Benjamin Clerk.

In Fourth month, 17th, 1799, they presented to the yearly meeting then sitting the following report:

"We, the committee appointed to give further attention to the situation of Friends in Upper Canada have several times met, and after dipping into their state and feeling near sympathy with them in their remote and exposed situation, agreed to propose for the consideration of the yearly meeting whether a committee might not be now seasonably appointed to visit them the ensuing summer with powers to establish a monthly meeting, and to assist them in opening it. If the committee, when amongst them and duly considering their situation and peculiar circumstances, should be easy to proceed therein. The said monthly meeting to be under the particular care of this yearly meeting." The above report being considered, was approved, and said committee were desired to continue further service; that the proposal therein mentioned might be effected, the names of two more Friends added to their assistance: William Blakey, Isaac Coats.

Their next and last report, dated Pelham, Tenth month 1st, 1799, is as follows: "We, the committee, separated to visit those members of our Religious Society who reside in Upper Canada. After visiting their families both at Black Creek and the Short Hills, and having this day had a weighty conference with them on the subject of our appointment at their meeting-house in Pelham, which was generally attended by the members of both meetings, we unite in judgment that it may be best to establish a monthly meeting amongst them to be composed of the members of those two meetings, that it be named Pelham Monthly Meeting, and be held alternately at Pelham and Black Creek, the first Fourth-day of the week in each month, the even months at Pelham and the odd months at Black Creek. The first monthly meeting to be held to-morrow at Pelham at 11 o'clock, and that a meeting be held at Black Creek the First and Fifth days of each week, except the Fifth days of the week that the monthly meeting is

¹The poem referred to, part of which was read, was published in FRIENDS' INTELLIGENCER, in 1880.

held at Pelham. And at Pelham on the First and Fourth days of each week, except the Fourth day of the week that the monthly meeting is held at Black Creek. And that a preparative meeting be held at Black Creek on the last Fifth-day in each month, and one at Pelham the last Fourth-day in each month, all to begin at 11 o'clock.

"As there are at present but few in number, it is agreed that both men and women sit together whilst transacting business of the preparative meeting and monthly meeting, and that they report once a year to the yearly meeting written answers to the queries." Signed, Joshua Sharpless, William Blakey, Isaac Coats, James Cooper, Nathan A. Smith, Jacob Paxson, Thomas Stewardson.¹

The first monthly meeting was held the Tenth month 2nd, 1799.

The total membership, old and young, was 79 viz., 43 at Pelham and 36 at Black Creek.

The first year after its establishment there were added in membership: by request, 3; by certificate, 16.

The second year, by request 20; by certificate, 21.

The third year, by request, 10; by certificate, 16.

The 25th of 12th mo, 1799, a box of books was received from Philadelphia Meeting of Sufferings. Pelham Preparative Meeting's share consisted of "ten Epistles, three large Bibles, three small Bibles, six Testaments, five of Benjamin Holmes' Works, eighteen of Spaldings' Works, twelve Spelling Books, one vol. Phipps' Works, six of Mary Brooks', eight of Elizabeth Webbs', two doz. Primers, one Barclay's Catechism, two blanks for Pelham and one for Black Creek."

Seventh of 10th mo., 1801, a committee appointed for the purpose submitted the following plan for a meeting-house at Black Creek. Said house to be built of logs flattened, twenty feet by thirty, and fourteen feet high. The committee from Philadelphia Yearly Meeting "being present and concurring therewith."

On the 2d of 12th mo., 1801, a committee was appointed to "visit and advise with Friends of Yonge Street," and the 6th of 1st mo., 1802, an addition was made to said committee with power "to appoint a meeting for worship and have overseers among them." On the 7th of 7th mo. this committee made the following report: "They had visited them and advised them to hold a meeting for worship on First and Fifth days of the week, and had nominated Friends for overseers." On the 6th of 10th mo. of the same year, Yonge Street Friends request Friends of Pelham to unite with them in applying to Philadelphia Yearly Meeting to establish a preparative meeting there. This request was granted by Philadelphia Yearly Meeting in 6th mo., 1854.

In 9th mo., 1804, Friends of Whitechurch request "to be indulged the privilege of holding a meeting for worship." This was approved and a committee appointed 6th of 2d mo., 1805.

At Pelham Monthly Meeting, held 9th mo. 4th,

1805, certificates were produced and read for fifty-five members.

In 12th mo., 1805, the establishment of a monthly meeting at Yonge street was considered, and an application to that effect directed to be forwarded to Philadelphia Yearly Meeting. The monthly meeting must have been established in 10th mo., 1806, as we have no account of its establishment, and the minutes of that meeting are missing.

In 2d mo., 1807, a committee appointed by Pelham Monthly Meeting to confer with committees of Adolphus Town and Yonge Street monthly meetings suggests in its report: "The propriety of laying before the yearly meetings of New York and Philadelphia, out of which we descended, whether now might not be a proper time for us to be united and placed in a capacity to meet twice a year, once as a quarterly meeting and once as a yearly meeting."

In 6th mo., 1807, "the Friends in the district of Erie, 9th town, 7th range, near Buffalo," requested to be indulged in a meeting for worship.

In 8th mo., the report of the committee to visit Friends near Buffalo was presented and approved and they were allowed to hold their meetings as desired under the care of a committee.

In 10th mo., 1807, a request of Friends at Chipewa to hold a meeting for worship at the house of William Shotwell was granted.

Eleventh mo., 1st 1807. From the Yearly Meeting Extracts read at this time it appears that "Friends of New York and Philadelphia yearly meetings have jointly agreed that the Friends who constitute the three monthly meetings within this Province shall constitute a meeting for discipline vested with the powers of a quarterly meeting and called Canada Half-Yearly Meeting, to be held alternately at West Lake and Yonge street twice in the year, and to be under the care of New York Yearly Meeting."

In 5th mo., 1810, Friends of Willink, near Buffalo, were allowed the privilege of holding a preparative meeting.

In 9th mo., the revised disciplines were received. Also it was proposed and united with that men and women Friends hold their meetings for discipline separately.

The Preparative Meeting at Willink was discontinued in 2d mo., 1811, and re-established in 2d mo., 1812. Friends at Eighteen Mile Creek and Cateragus "were granted an Indulged Meeting, to be held at Clear Creek under care of a committee, agreeable to the decision of the Half-Yearly Meeting." Third mo. 4th, 1812, Friends at Norwich were granted a meeting for worship under care of a committee.

RICHARD W. BROWN.

You find yourself refreshed by the presence of cheerful people; why not make an earnest effort to confer that pleasure upon others? You will find half the battle is gained if you never allow yourself to say anything gloomy.—*Lydia Maria Child.*

SELF-COMMENDATION.

THE great Apostle to the Gentiles writing of some who claimed for themselves more than they were willing to accord to their brethren, said of such: "They themselves, measuring themselves by themselves, and comparing themselves with themselves, are without understanding. . . . For not he that commendeth himself is approved, but whom the Lord commendeth." Not that a man is to have no just appreciation of himself,—but that this shall not interfere with his according to others the same earnestness of purpose that he claims for himself.

"To thine own self be true;
And it must follow as the night the day,
Thou canst not then be false to any man."

expresses the thought that lies at the foundation of true self-appreciation, he must know himself, must understand the aims and the motives which prompt him in his intercourse with others. The true man cannot excuse in himself an act, or harbor a thought that his own sense of right would condemn in another: this is the test for judging of those about us. He "Thinketh no evil," is a characteristic of the true man and this has a deeper significance than we are apt to concede; he who allows this spirit to rule him is without guile, without dissimulation, without suspicion,—that enemy of all good which lurking in the by-places of the human heart is ever ready like the tempter of old to question the motive or doubt the sincerity of another who differs from himself.

The true man is ever ready to accord sincerity of purpose to all who are seeking for the right, although it may be along paths that differ from his own; if the aims are high and pure, the goal at the end of the journey will be the same haven of rest. Nowhere is the spirit of "measuring themselves by themselves," more to be guarded against than in our association in church fellowship; it not only narrows the life and warps the judgment, but lessens the influence for good of those who yield to its spirit, and is destructive of the unity and harmony of the body. He that is true to himself can never lose sight of the fact that the liberty which he claims for himself, is the right of every other man who is obedient to the light he has received. He may indeed say of him-

self "I have never been called to enter upon a course of action that to my brother seems a duty," but it must be said in no censorious or fault-finding spirit, or convey the impression that because the liberty of the one is greater than his own it is not a liberty in the truth.

To the traveler Zionward, who has borne the burden and heat of the day, censorious judgments have no other effect than to warn against indulging in such criticisms; he pursues the even tenor of his way with a great pity in his heart for all who are lacking in the grace that "thinketh no evil." It is for the young disciple—for him who has but recently yielded to the visitation of the Divine Spirit—that we have need to fear. He comes to the work of the church, as it is opened before him—not in the yesterday of the fathers, but in the freshness of the revelation which meets the conditions under which his work must be accomplished. The inspiration is from the same source, of whom it was long ago declared, "A thousand years are as yesterday when it is past;" and while it calls to many good and useful works that were not undertaken by those who preceded us, these are but the outgrowths of the same law of development which led the forefathers of our Society to walk in paths, before untried, but which led onward and upward toward the fuller light which we now enjoy. Though the fires of persecution are no longer kindled, let us be careful and watchful, lest the spirit that applied the torch and is still seeking "whom it may devour" find a lodgment in our midst, and hinder the fuller manifestation of the Christ power which must become the dominating principle of the Christian Church, if it fulfills its mission of peace and goodwill to all mankind.

WE are sure our readers must have found much satisfaction in the article by Edward Grubb, from the *Friends' Quarterly Examiner*, begun a week ago and concluded in this issue. It is peculiarly gratifying to find among the English Friends some whose conception of the principles of Quakerism is at once broad and true, and who, building upon that good foundation, approach the great questions of the present time with a catholic and kindly earnestness. Their writing, as exemplified in this instance, is serviceable to the cause of Truth, on this side of the Atlantic, and no doubt upon the other as well.

THE importance of fidelity in small things is seen in the fact that small occasions are coming continually, while great ones seldom occur. Thus our education in faithfulness will depend not so much on our doing right on great occasions, as in the small but frequent tests of daily life. It is these which educate us to good or to evil.—*Selected.*

MARRIAGES.

BROWNBACK—TAYLOR.—At the residence of the bride's parents, in West Goshen township, Chester county, Pa., on Fifth-day, Third month 21st, 1889, by Friends' ceremony, George F. Brownback, of Upper Uwchlan, to Mary L. Taylor, daughter of Jesse J. Taylor, of West Goshen.

COOPER—WRIGHT.—At the residence of Louisa A. Wright, the grandmother of the bride, by Friends' ceremony, on the 12th of Third month, 1889, Samuel F. Cooper, of Northampton, to Ella M. Wright, of Newtown, all of Bucks county, Pa.

DEATHS.

ABBOTT.—At Roxborough, Philadelphia, Third month 19th, 1889, Ephraim O. Abbott, aged 79 years; a member of Green street Monthly Meeting.

BANER.—At Dorchester, near Port Elizabeth, N. J., Third month 21st, 1889, of paralysis of the brain, Deborah Baner, in the 68th year of her age. The funeral took place on the 25th inst.

BUZBY.—In Camden, N. J., Third month 18th, 1889, Rebecca C. Buzby, aged 81 years. Funeral from her son's, Edwin S. Buzby, Bordentown, N. J.

ELLIS.—Third month 21st, 1889, Edward B. son, of Samuel and Elizabeth L. Ellis, Hightstown, N. J.

FELL.—In Newtown, Bucks county, Pa., on the 19th of Third month, 1889, after a lingering illness, at the home of his daughter, Anna Hall, James Fell, in the 79th year of his age; a member of Buckingham Monthly Meeting.

HALLOWELL.—Third month 16th, 1889, at Horsham, Pa., Tacy Ann, widow of William J. Hallowell, aged 72 years.

LEWIS.—On Sixth-day, Third month 15th, 1889, Helen M. Lewis. Interment Newtown Square Friends' ground.

MEREDITH.—At his residence in Plymouth township, Montgomery county, Pa., Second month 5th, 1889, Jesse Meredith, in his 82d year; a member of Gwynedd Monthly Meeting.

MIDDLETON.—On the evening of First month 31st, 1889, at Flushing, L. I., Spencer H. Middleton, on the first day of his 66th year, son of the late Enoch and Catharine Hill Middleton, of Philadelphia.

He had been a resident of New York since 1854, and for the past four years had been an invalid from paralysis the extreme suffering of which he bore with patience and cheerfulness.

MOORE.—Suddenly, Third month 19th, 1889, at Mullica Hill, N. J., Hannah A. Moore, in the 61st year of her age; a member of Pilesgrove Monthly Meeting.

MULLIN.—Third month 15th, 1889, at her home in Horsham township, Montgomery county, Pa., Mary, widow of Robert Mullin, in the 80th year of her age; a member of Horsham Monthly Meeting.

RODGERS.—At Harrisouville, N. J., Third month 21st, 1889, Ann, wife of Samuel Rodgers, aged 62 years; a member of Pilesgrove Monthly Meeting.

SHOTWELL.—At the residence of her grandson, Harvey S. Ozden, Orange, N. J., on Second-day, Third month 4th, 1889, Louisa Shotwell, in the 89th year of her age, widow of Harvey Shotwell, formerly of Rahway, N. J.; all her life a member of Rahway and Plainfield Monthly Meeting.

Though living for a long time far separated from Friends, and prevented of late years by ill health from attending meetings, her attachment to the Society was deep and earnest and her life that of a true and consistent member.

SHUTE.—At Richmond, Indiana, First-month 26th, 1889, Ruth Anna, wife of Charles H. Shute, and daughter of the late Solomon Gause, in her 44th year; member of Whitewater Monthly Meeting of Friends.

STEARNE.—Third month 18th, 1889, Merchant M. Stearne, in his 94th year; an attender of Frankford Meeting, Pa.

VAIL.—Near Dover, Morris county, N. J., on Seventh-day, the 16th inst., William Brotherton Vail, only son of J. Elwood and Rachel B. Vail, (of hasty consumption), aged 32 years within 4 days; a member of Rahway and Plainfield Monthly Meeting.

This beloved young Friend was the grandson of Richard Brotherton whose worth and exemplary life are remembered by many people, and it seems fitting to record that in his character and life many of the virtues of his grandfather were manifested. His parents made the old homestead (which was the home of Richard Brotherton, and his grandfather) their home, and it was to this home he went in the early part of First month to repair his health, declining from a severe cold he had contracted, and long, close application to business. He was a devoted son, and valued most highly his inheritance in the Society of Friends, whose principles he daily endeavored to practice in his business and social life. His recovery was most confidently expected, but the disease was beyond remedy and he sweetly faded away from the presence of dear ones in the midst of the cherished associations of the old home he loved so well.

"God calls our loved ones, but we loose not wholly
What He hath given;
They live on earth, in thought and deed, as truly
As in Heaven."

SCRIPTURE LESSON, No. 13.

FOURTH MONTH 7, 1889.

THE TRIUMPHAL ENTRY.

GOLDEN TEXT.—"Blessed is he that cometh in the name of the Lord."—Mark 11 : 9.
READ Mark 11 : 1-11.

This entry of Jesus into Jerusalem was made at the time when Jews from every quarter of the globe and of every nation then known, were flocking to the great annual feast of the Passover. It was the one occasion from which no true Israelite would willingly absent himself. They came in immense throngs, by ships across the seas and in caravans from afar over the barren, sandy deserts, as well as from Galilee. And these pilgrims, representatives of all the countries to which the Jews had migrated after the destruction of their nationality, were there to witness the entry of the lowly Jesus, the Prince of Peace, into their holy city—into the Great Temple—the most sacred place in all the earth to the Hebrew people. It is not possible to think of that multitude listening to the wonderful words that proceeded from the lips of Jesus as he taught and reasoned in the Temple, without gaining an idea of what the influence would be as they carried back with them to their distant homes some lesson of kindness and forbearance, some higher thought of love and duty, than had ever before come to them.

And when they drew nigh, etc. The caravan with which Jesus and his disciples traveled had come from Jericho over a rough and narrow path to Bethany, fifteen miles distant, on the day before the Sabbath.

Bethany was on the eastern slope of the Mount of Olives, about two miles from Jerusalem.

Ye shall find a colt tied, etc. The ass was universally used for riding and carrying burdens. The horse had been introduced from Egypt, by Solomon, for war purposes. (1 Kings 10: 28.) The ass was an emblem of peace. It had been prophesied more than five hundred years before that the Messiah would come to Jerusalem in that way. (Zach. 9: 9.)

Spread their garments. This was in token of welcome and homage to their expected Messiah. Kings and men in authority were accustomed to make triumphal entries into the great cities.

The eventide was come. The evening before the Sabbath, and it was necessary that they should leave before the Sabbath, which began at sundown of the sixth day of the week. The laws respecting its observance were very strict.

The triumphal entry of Jesus into Jerusalem, accompanied by the excited populace, crying Hosanna: *Blessed is he that cometh in the name of the Lord*, has been regarded of great historic interest as giving evidence that the common people heard him gladly, and were more ready to receive him as the Messiah than those who had been taught to expect him. Friends desire to emphasize the spirituality of religion by directing attention through and beyond the record to the development of that more real interest—the dominance of the spirit. The lesson teaches that the day had come when traditional religion was to be dethroned, and spiritual religion inaugurated; when the dictum of doctors and lawyers, of chief priests, Scribes and Pharisees, was to be withstood and resisted; when the reading of the book in the Temple was to give place to him of whom Moses and the Prophets spake, who embodied and declared the fulfilment of all scripture by announcing, "The spirit of the Lord is upon me, because He hath anointed me to preach glad tidings to the meek," etc.

There is always more or less exhilaration in entering upon any great and good work for which we have long been under the preparing hand. The spirit that possesses us is frequently contagious, and the unprejudiced people round about are quick to hurry us forward, sometimes, by their indiscretion, damaging the work they desire to aid.

The Christian traveler must ever watch the pointing of the spirit lest he be diverted by surrounding influences from the simplicity of the truth and the directness of his mission. We must remember that in taking Jesus for our example we are not expected to do his work, but our own; that although it be true as declared by the Apostle (Rom. 8: 14): "As many as are led by the Spirit of God, they are the Sons of God;" yet preëminently was Jesus the Christ,—the anointed, "in him dwelleth all the fullness of the Godhead bodily," representing the complete triumph of the spirit. There can be no doubt that on entering Jerusalem he was thoroughly possessed with the consciousness of his Divine mission, being controlled and directed by the same Holy Spirit that had enabled the Prophets before his day to personate the Deity, and to speak with authority in the name of

the Highest. So, in measure, is every one that is led of the Spirit quickened into sympathy and fellowship with others so led in all the ages, and enabled to look upon life from a higher standpoint of view, becoming transformed from the image of the earthly to the image of the heavenly nature. Physical and mental triumphs promote and encourage pride and vanity: but moral and spiritual triumphs bring humility, under the consciousness that it is God that worketh in us both to will and to do of his good pleasure. The true progress of our lives is manifested in the expression of John the Baptist, "He must increase, but I must decrease."

NEWS OF FRIENDS.

INTERESTING APPOINTED MEETINGS IN ILLINOIS.

THERE has just closed a series of very interesting, and remarkable meetings here in East Jordan. They were appointed under the direction of Edward Coale. Three other members of a Committee from Blue River Quarterly Meeting attended them. In these appointments there seemed to be but one step taken at a time, and one appointment came after another merely as the impression developed a need. In all there were twelve meetings, including two parlor meetings. Two were held in Friends' meeting-house at the usual hour for assembling at this place. The others were held of evenings in the Hall at Penrose, and two in the house where the M. E. Church at Jordan assembles regularly for divine worship.

This part of Illinois is perhaps as pleasant and prosperous as any part of the State, yet, nevertheless, the few Friends settled here are completely isolated. Fifteen years ago there was a live meeting here, composed of active members, but a number of those aged worthies are now resting from the toils of life; some of the younger families have added brightness to other settlements of Friends, and we, a few only, have been left here alone. We have read in Proverbs that "Iron sharpeneth iron; so a man sharpeneth the countenance of his friend," and this little band has seemed to need just such care as the Caretaker of souls has permitted to reach us at last.

In preparing this meagre account for the INTELLIGENCER AND JOURNAL, it is not necessary to send out to other localities the deep and useful lessons given in all their freshness unto us; but in allusion to them, let my pen say that in these twelve meetings there came no tiresome sameness,—in all there seemed to be *mana* for the hour, and the interest to the end rather increased than diminished.

One meeting that may be useful for other minds besides our own to ponder over I feel that I may particularize; it was the last of this series, and was held in what is known here as the "White Church," where our Methodist neighbors hold their meetings. The one who felt and bore the great responsibility of appointing this large meeting (as all the preceding ones) believed that it would be right, on this occasion to have these good people in their own house to open this meeting in their own way. And they did so in an humble, deferential manner. To a mind conservative like that of the writer of these lines, there

arose a sort of feeling of silent protest or disunity, forgetting that this was a union meeting of Christian people, and that the honest religious feelings of all should be respected, even without lowering a silent spiritual worship when the time and surroundings came.

No other audience ever paid closer attention than this to the words poured forth in their hearing, and when the meeting closed it was under such a feeling of tenderness and loving reverence unto the Spiritual Supreme, that forms and formalities had dwindled to nothing. The influential, and the humbler ones too, overflowed with expressions which in manner and tone attested unmistakably to the heartfelt truthfulness of this sentence, "O what a good meeting." One Methodist sister pressed our hands, saying, "This was not a Quaker meeting, nor a Methodist meeting, but a Christian meeting," and further added that she must indeed express these thoughts to Friend Coale! In walking down the aisle among the groups, as the congregation was preparing to disperse, could be heard and felt the general outburst of thankfulness; and in the midst of such beautiful evidences of life,—life!—such as we Friends and all Christian denominations recognize, how could a disunity, born only of conservatism, continue? M.

East Jordan, Ill., Third month 19.

RELIGIOUS INTEREST IN NEBRASKA.

Letters from Nebraska represent the appearance of an earnest religious awakening among the people of the Northeastern section of the State. A private letter says that there are few schoolhouses, no matter how poor and small, that have not now some form of worship held in them. "Protracted meetings" are in progress, and the interest increases. At three of the points the movement has been started by Friends. One of these, at Kemma, in Knox county, holding a First-day school before the meeting, has been successful in bringing about a reformation in the lives of some who seemed wholly given over to the drink habit, but who are now decently clothed and taking an active part in the school. Application was made to Friends in this city for books, which has been responded to, with Bibles from Friends' Bible Society, and denominational works from the collection of the Yearly Meeting at 15th and Race streets, the freight being paid by the Literature Committee of the First-day School Association. The box was forwarded to Dr. George Roberts, at Creighton, the nearest railroad point to Kemma, to be given out to responsible persons as the contents are applied for. The books have reached their destination, and a part of them are now in use.

The Friend who started the work at Kemma conducted it in accordance with the usages of the Society, but later a number of what are known in the West as "Fast" Friends (the Western revivalist and "evangelical" element) coming in and introducing the methods of work adopted by that branch, and the people finding their manner of expression and of conducting meetings more in accord with what they had been accustomed to, he felt they could not work in harmony together, gave up his connection

with it, and gathered a meeting in the Sherbrook schoolhouse, several miles distant. The only features of the movement at Kemma as it is now conducted, that ally it to Friends, are the rejection of water baptism and the communion service, and the preference for a free gospel ministry.

The first meeting at the new locality, (Sherbrook) was held on the 17th inst. The Friend from whose letter we quote, writes: "To-day being very bright and clear, — and — and myself attended the Friends' meeting at Sherbrook. There was some misunderstanding in reference to the organization of the First-day school, it having been given out for 2 p. m., the meeting to be held at 12 m. We gathered at the hour in the old-fashioned quiet observed by our Society, which was broken by friend K——, the leader of the movement, in an earnest exposition of the doctrines held by us. He said among other things that at one time he thought the religion he professed the only true faith, but by mingling with others he found there were good people everywhere. He referred to the Scripture testimony of those who claimed to be of Paul, and others of Cephas, etc., and made a forcible application of it to Christians in our own times. I was much moved, as I had been on the previous occasion and felt at liberty to relate an experience I had early that morning. As I awoke the words of the Master came before my mind: 'Why callest thou me good? there is but one good; that is God.' I had not the least idea where in the Gospels it was found, but taking up one of the new Bibles, as we sat down to breakfast, and opening it to read, I saw the very passage that had so impressed me, in the chapter I proposed to read. [Matthew, xix., 16.] I then spoke briefly on the subject and of the privilege we enjoyed in our freedom to worship according to the dictates of conscience, alluding to the tendency of the Church to follow the ideas of the Apostles, rather than the instructions of the Great Teacher himself. The meeting closed, and an invitation was extended to meet at Reedville school-house on the next First-day, with the Friends who represent the Kemma interest. The people in that section are an intelligent class and have greater freedom of thought in matters of religion. I look forward to being present, with all my family. It is a source of great satisfaction to have Friends' meetings in our neighborhood."

—The *Young Friends' Review*, (Canada) says: "An effort is being made to bring our Friends residing in Toronto together, with the object of establishing a meeting there. We think this is a step in the right direction. There are a number of families of Friends there, and among them some influential and earnest members. There is unlimited scope for Friendly endeavor in a city of the size of Toronto. We hope our Friends there will avail themselves of the present effort to organize."

—The members of the Visiting Committee of the Yearly Meeting were present at the monthly meeting held at Race street, 3d mo. 20. It was largely attended, and Margaretta Walton, one of the committee, spoke to the satisfaction of the gathering. At

the monthly meeting at Green street, on the same day, a portion of the committee were present, and Joel Barton, Jr., Joseph Powell, and Margaretta Walton spoke. On the 22d inst., in the evening, a meeting was held at Germantown. The attendance was small, compared with the gatherings above noted, but nevertheless it was a good occasion. Margaretta Walton dwelt somewhat on the relation of the Mother Church to its branches, and those present were encouraged to a faithful attendance at our meetings.

FROM THE SOUTH CAROLINA SCHOOLS.

SEVERAL very interesting letters from Abby D. Munro, teacher of the school for colored children at Mt. Pleasant, S. C., have been received in this city. She gives details of the completion and furnishing of the new building, which, by the aid of friends of the work, has been erected. In a letter of Second month 7, to the Association for Promoting the Education of the Colored People, she says:

LETTER OF A. D. MUNRO.

"Three months of our school year have already passed away, so rapidly we can hardly realize it, for with the care of the school inside and of the new building outside, we have scarcely taken note of time. We found the children anxiously waiting our return, and we commenced school with eighty pupils which we considered a very good number, as the country children cannot commence until December, when the cotton-picking is over. As in other parts of the State, the crops here were very poor, this year; consequently the people are very poor, too, with very little money in circulation. They are willing and eager to work, but there is nothing for them to do in winter, and they have no way of making up for the loss of their crops. With the exception of a week or two, we have had a very mild winter, which has been greatly in their favor. But all this has made no difference to the school attendance. As I said, we commenced in November with eighty, and in January had one hundred and fifty names enrolled. The attendance, thus far, has been all we could ask for. A number of times we have counted one hundred and forty in their seats. Indeed our room has been so full there has been hardly space for the pupils to pass to and from their recitations. But if you could look in upon us at any time, you would find us as busy as bees—and, I fear, as buzzy, too,—with three classes reciting in one room. But this will soon be over, to our untold relief, for when I write you again we shall, probably, be settled in our new building, about which there has been some unavoidable delay. But I shall go into it, at all events, next week, and do the best I can until the rest of the desks arrive. Any one who has never lived in this country can form no idea of the difficulties and delays one must encounter in the accomplishment of what is undertaken. Hurry is out of the question in anything you cannot do yourself. 'We'll get it done *after a while*,' is the encouragement we get when we attempt to expostulate. And everything *does* get done 'after a while,' too, and sometimes, I think, it is as well as the hurry and drive we are accustomed

to in the North, if our patience was only equal to it.

"Our new building is a fine, well-built house in every respect. It stands on forty brick pillars. The main room will seat one hundred and four pupils. From this there open the two wing rooms, which can be used either as recitation rooms, or if furnished with desks, can be used to grade the school, giving Primary, Intermediate, and Grammar rooms. I shall hope to do this in time. As our school stands now, we should have thirty-four for the Grammar, fifty for the Intermediate, and the remainder for the Primary. The Advanced Class, which now numbers ten, is farther ahead in studies than Grammar School pupils generally, and most of them are trying to prepare themselves for teachers. Three of our pupils are now teaching; one in Oakland, Florida, and two in this county. The County Superintendent has assured me that our pupils shall have the preference as long as their examinations are equal, which of course is very encouraging for them to try and remain in school as long as possible. But I assure you that very few of them remain in school after they are large enough to work, without a struggle on their part, and a great deal of self-denial on the part of their parents. As one of the boys once expressed it, 'when we get the head full, we shall forget all about the empty stomach.'

"Though our building is not two stories, still it is high enough for rooms up-stairs, and I am anticipating having the large upper room finished, and our Sewing School reëstablished there. The floor, like the one below, is already laid, and it can be furnished at no great cost by-and-by. There are no debts of any kind upon the building. I hope some of our friends will come and see us before the winter is over. Considering all the disadvantages we have labored under, our school has kept together beyond our expectations, and lost in nothing, we think, except in writing and blackboard exercises of different kinds, to all of which greater attention will now be paid.

"A few days since we had the most severe earthquake shock I have ever experienced. The house shook till everything loose rattled, and we were all greatly startled. I do not think this building will be affected by any convulsions of nature, unless more severe than those already experienced here.

"We deferred our yearly entertainment until we should get into our new building, for two reasons: First, after our pupils are seated in the church we haven't room enough to display our gifts, and, second, we wanted to make a kind of jubilee of our entering the new building. Of that you will hear, further on. Every one seems pleased with the new building. Our neighbor, Judge S., expressed himself so well pleased with the painting that he has gone and had his own house painted in imitation. It is painted two colors of drab, with window-sashes and trimmings under the roof red. The colors harmonize perfectly. Most of the houses here are whitewashed, and this painting is quite a new departure. The lot is all fenced in. I have been advised by the Town Council to apply for fifty or a hundred feet more of land back of the house for the

playground. This, I think, I shall do, and we can extend the fence whenever we may feel able.

"We have no accommodations for boarding pupils, but we have a dozen or more who are boarding in different families in the village. Some live near enough to go home Friday afternoons, and the rest will stay through the winter. We should have more of this class, could we get them accommodated, but, as a general thing, the people here live in one or two rooms,—all they can pay for,—and after they have stowed away their own round number of children, they have little room to accommodate others. The dissatisfaction with the short terms of the County schools becomes greater every year. In one or two months, (the length of terms in most places), the children just get settled and supplied with books when school breaks up."

Another letter, of Second month 24, says: "We moved into our new house the first of the week. We carried all the chairs we could from the Home, and borrowed the benches from the piazzas, and managed to seat the children by putting the smaller ones around on the platform. It seemed very nice to be in our own house, and the children are delighted." Third month, 16, she says: "Last month we registered 140 scholars, and the average attendance was 121; it would have been even better, but for the continued rainy weather. Having our lot fenced in keeps everything nice and snug. Fifteen minutes after the bell rings, the gates are locked for the day, —and so far no one has been locked out. This brings them right up to the mark in punctuality, and all these people need training in that direction. The County schools have already closed. Our attendance has not fallen off. Planting commences next month, when most of the country children will leave, but they are comparatively few. On account of the heavy rains, the season is backward. . . . I am looking forward to resuming our Industrial Department next year, but do not think it best to undertake it now."

FROM THE SCHOOL AT AIKEN.

A private note from Martha Schofield, dated Third month 18, says: "The school still keeps full, and visitors daily crowd my office-work into the evening. I had enough to pay all the teachers the month's salary, and am thankful for it, as the rooms have been crowded. On the 1st inst, we had a fair, with singing by the scholars, from which we cleared \$70. It began at 6:30, and by 10 o'clock, the building was empty and closed. I mention this to show that the people are learning promptness. A few years ago no one would have come before 8 o'clock, and most not before 10, expecting to stay till midnight. . . . The boys have built a wood house, and house for a large boiler (the gift of Benjamin Passmore). The boiler has been bricked in with a chimney and is most valuable for boiling clothes, heating water for bathing, etc. They have repaired fences, laid board walks, and planted the garden. One boy has been kept busy cobbling for the scholars and doing some outside work. Trees are being planted about the grounds. Tables and benches have been made and repaired in the shop ;

while the printing work has been more than usual, and if we had greater facilities would pay well."

—We are requested by the officers of the Association to aid these schools to say that there have been a few recent contributions of funds from interested Friends, but that the total is much behind the results of previous years, and they do not feel encouraged. The work in the South is so good, and is done with so great economy, that they cannot think it a real burden upon any one to make a small contribution toward it, and even small contributions if sent in as generally as heretofore will be enough, no doubt, to keep the schools from closing.

THE SOCIETY TO PROTECT CHILDREN.

THE twelfth annual report of the Pennsylvania Society to Protect Children from Cruelty covers the operations of this excellent charity for the year 1888. It is a record of great interest, showing as it does the good that has been accomplished through its instrumentality, many cases being given where the gross-cruelty practised upon helpless childhood has been brought to the Society's attention and the poor victims of abuse and neglect have been rescued and placed in good homes or in institutions that care for such children.

From the manager's report we copy the following:

"During the past year we received and investigated 871 complaints of cruelty or neglect to children. These involved the care and custody of 1,709 children. 195 arrests were made, and 559 children were removed from improper surroundings, and from brutal parents or guardians, being afterwards placed in suitable homes, as our tabulated statement will show. In the twelve years the Society has been in operation it has received and investigated 9,054 complaints, involving the custody of 20,819 children, obtained 2,611 convictions in cases prosecuted, and rescued 6,756 children from dens of vice, and from neglect and cruelty, who were placed by the Society in comfortable homes where they were under a good moral influence. It has sheltered, clothed, and fed 3,730 children, and furnished 33,562 meals.

"During the year we noticed a falling off in the number of complaints, principally of neglect. This can be attributed in part to the good effects of the enforcement of the High License Law, which greatly reduced the number of liquor saloons, particularly those where whiskey was sold for five cents. It is now much more difficult for children to purchase liquor at such places."

During the year the Society received legacies from five estates, as follows: of John Bryden, \$4,654.18; of Catherine M. Bohlen, \$2,000.00; of J. C. Lawrence, \$475.00; of Catherine J. Kirkpatrick, \$2,809.76, and of Alexander Fleisher, \$1,000.00. These amounts have been added to the permanent fund, only the interest to be used for current expenses.

The report says that the Society feels encouraged to push forward their work, when they realize how strongly they have been endorsed, and how liberally it is supported. Undoubtedly an organization that is filling so useful a place among the many charities

of our city, is worthy the cordial support and hearty coöperation of all who are interested in the moral advancement and welfare of those who are to be among the future upholders of its institutions, that they be trained to habits of industry and sobriety, and made useful members of the community.

YOUNG FRIENDS' AID ASSOCIATION OF NEW YORK.

It is an encouraging feature of the activities which are the developments of our age, that they are calling into service the young life of the Church and bringing nearer together in aim and feeling and in coöperative work the older and the younger members of the Society. Nowhere, perhaps, is this more apparent than in the Association for which we propose to speak a good word of cheer and sympathy. The fifteenth annual report of the Young Friends' Association of New York gives a brief summary of what has been accomplished during the past year, with the names of the officers, and of the donors through whose gifts the Society has been able to extend the helping hand to 41 families who but for the aid thus received must have suffered during the inclemency of the winter. The methods of work have been the same as in former years. Personal visits are made by Committees from the Association, aided by the Charity Organization through which the worthiness of all applicants is ascertained. A most earnest appeal is made for new members who are willing to engage in active work; the field of labor increases and the need of more laborers is urgently presented as the usefulness of the Association must be greatly impaired if others are not added to its ranks.

Special mention is made of the "Clothing Fund" and its value. Sixteen cases not receiving other relief were provided with warm, comfortable garments. The supply is, however, insufficient, and contributions of all kinds are solicited, which may be sent to Amelia Willets, 55 West 54th street, or to Sarah M. Harris, Friends' Seminary, 16th street and Rutherford Place. The Treasurer is Joseph A. Bogardus, 177 West street.

We are never more in the line of useful service than when we follow the Master in ministering to the wants of the needy and suffering. "Inasmuch as ye did it unto one of these my brethren even these least, ye did it unto me," are words of encouragement to all who thus labor.

BALTIMORE FRIENDS' SCHOOLS.

BALTIMORE MONTHLY MEETING has appointed a joint standing Committee on Education, which will have the care of such schools as may be established by the monthly meeting. The Committee has arranged to open a kindergarten in the new meeting-house building, on Park Avenue and Laurens street, on Second-day next, Fourth month 1st, to be conducted by Hannah T. Yardley, of Baltimore. They expect to establish a primary school in the same building, in Ninth month next. The Principal of this department, or a higher grade,—should such also be established,—has not yet been selected.

Baltimore has had no Monthly Meeting school the past year. ***

SWARTHMORE NOTES.

THE contest for the *Phoenix* prizes for oratory in the Junior class, which was held in the college hall on Sixth-day evening last, was one of the most interesting events of the winter. The terms of the foundation only allowed five contestants and these were chosen from among a large number who submitted articles. The competitors were Abby M. Hall, of West Chester, Pa., who spoke on "Heroism in Woman;" Eloise Mayham, of Stamford, N. Y., "Arnold of Rugby: Teacher;" William E. Sweet, Colorado Springs, Col., "The Statesman and the Politician;" Rebe S. Webb, of Philadelphia, "Woman's Place in Literature," and James W. Ponder, Milton, Del., "Russian Despotism." The judges were Professors Appleton, Smith and Furman, and two members of last year's *Phoenix* staff, but so well were the orations delivered that they had considerable difficulty in deciding, but finally awarded first place to Eloise Mayham and second to James W. Ponder. The prizes are gold medals, provided by the staff of Volume VII. of the *Phoenix*.

—The Board of Managers have decided to grade and sod the elliptical area enclosed by the running track and fit the space up for an athletic ground. When this is done the foot-ball field can be moved from the front campus, and all the games centralized.

—The Athletic Association has decided to hold an in-door exhibition in the gymnasium on the afternoon of Fourth-day, Fourth month 3rd.

—A member of the college the other day received a letter from the editor of the well-known "College World" department of the New York *Mail and Express*, in which he states that Swarthmore College is rapidly gaining an enviable reputation in the East for its educational thoroughness and advantages as an institution of learning.

—The *Phoenix* staff used some of their surplus in attending J. L. Stoddard's lecture, "Cardinal Richelieu," at the Philadelphia Academy, on Fourth-day.

THE KANSAS PROHIBITORY LAW.

EDITORS INTELLIGENCER AND JOURNAL:

NOTWITHSTANDING the correctness of the statement from Governor Martin's message, quoted in a recent issue of your paper, yet let not any conclude that we have attained the Sabbath of rest as to the Temperance question. Liquor is still used by a few in many places, and now can, under the United States law, be pretty openly brought in; one or more can send for it into Missouri, and then it can be shipped to our depots, hauled up into the towns, and taken possession of by those sending the money for it. Thus our law is in one sense secretly, and yet openly, violated, and we are thus bound to support or permit the evil, as all were implicated in the support of slavery, under the United States Fugitive Slave law. Besides, it gives a few the chance to monopolize the profits in those places where the trade is allowed of and causes even legal users to have several times too much to pay for it.

Must not the remedy be in the general Govern-

ment ceasing to take revenue from its manufacture and license for its sale and prohibit its being made save for legitimate purposes? Hence the need for all the Temperance element to be united in bringing about this desirable end of general Prohibition. As long as it is sold in some places and encouraged by the Federal Government, it will be a drawback to the effectiveness of State enactments.

THOS. LAMBORN, SEN.

Yates Center, Kansas.

IN BLOSSOM TIME.

Who would have thought, awhile ago, when bitter winds were raging,

And all the wintry world was chill, that deep beneath the snow

The heart of summer life and heat a victor's strife was waging,

Till in the trees that gave no sign the sap began to flow?

Before a single tiny leaf had shown the bud's increasing,

Before a glimpse of the spring had brightened twig or spray,

The bloom and beauty all were pledged; a loving Hand unceasing

Was working in the winter time to bring the summer's day.

And now the fields are like the sea, with foamy ripples tossing,

And o'er the blushing crests of May the blue-bird glances free;

The sunshine and the diamond shower, like shuttles swift are crossing.

And the gladness of our childish days comes back to you and me.

For God has brought the blossoms, and the fruit in time will follow;

The seed within the furrow dropped, and then the golden grain;

The patient work and waiting still, and then o'er hill and hollow

The happy songs of harvest and the overflowing wain.

Ah! never when the winter about our way is beating,

In sorrow's breath, or burden of the toil that we must share,

Should our trustful souls grow timorous, or falter to re-treating,

For the blossoms of the springtime are in our Father's care.

—Margaret E. Sangster, in *Sunday School Times*.

A WOMAN'S STORY.

AY, 'twas thirty years ago—

All the garden was aglow:

Ruddy hollyhocks, red roses,

Marigold and salvia posies,

Stately sunflow'rs, humble pansies—

"Heartsease true as little Nan's is,"

Quoth my lover, speaking low.

In the orchard trilled a robin.

Ah me! how my heart was throbbing!

Those long happy years ago!

Well, the tale's been often told;

Two things, pure love and pure gold,

Do not wane with passing fashion.

Life's cold without human passion.

Pick me that blue pansy yonder—
Thoughts for pansies, say you?—fonder
Grow our thoughts as we wax old.
Haply, as the rough path steepens,
And our feet lag, true love deepens—
Just because the tale's retold.

—Lady Lindsay in *English Ill. Mag.*

JOHN ERICSSON.

JOHN ERICSSON, one of the greatest inventors and engineers of this century, died in New York City on the 8th of the present month, in his 86th year. He was born in Sweden, Seventh month 31, 1803. A sketch of his life in a New York journal says:

He was a remarkable instance of a man who preserved his physical and intellectual powers in their fullness up to a great age. Until he was prostrated a few days ago by the functional disorder which proved fatal to him, he was steadily, methodically, and laboriously engaged in the study and solution of the most abstruse problems of mechanics and physics. At no period of his life did his work more severely tax his intellectual powers than during his later years, and yet throughout the whole of his long career he had been dealing with subjects that strain the human faculties to the uttermost and require the closest concentration of the human mind. The history of that career is almost a history of modern engineering. Sixty years ago he competed with Stephenson in the trial of a locomotive for the Liverpool and Manchester Railway in England, and beat him so far as speed was concerned. The directors made traction power rather than speed the test, and the prize of \$2,500 was awarded to Stephenson. Ericsson then first employed the principle of artificial draught, still retained, and which has helped to make the railway locomotive one of the grandest and most perfect of mechanical constructions, and to bring about the development of our modern railway system. Before going to England in 1826, when he was twenty-three years old, he had distinguished himself in Sweden, his native country, by engineering work on the Gotha ship canal, and by precocious inventive talent that attracted the attention of the highest officers of the Government. The list of his inventions in England is long, and they were all in the higher or the highest range of engineering and mechanics. In 1823 he first applied practically to navigation the principle of condensing steam and returning the fresh water to the boiler. In 1829 he constructed a steam fire engine, the prize for the best plan of which was awarded to him by our own Mechanics' Institute in 1840. In 1830 he first used the link motion for reversing locomotive engines, and the modification of his device is still employed in all locomotives. In 1832 he invented the centrifugal fan blowers now so extensively used in navigation. In an engine built by him in 1834 steam was first employed expansively.

From his boyhood up to the time of his death the utilization of heat as a means of power gave a principal direction to the studies and ambition of Ericsson. In Sweden he had invented a flame engine; in 1833, he first brought his calorific engine to the attention of the scientific men of England, and in 1853, after he

had removed to this country, he introduced the principle into the famous caloric ship, the *Ericsson*. The speed obtained by that vessel was not enough for commercial purposes, though as a scientific achievement the caloric engine won for him the Rumford medal, and these engines are still used in great numbers for light mechanical purposes. Since that time, and more especially during the period since the war, Captain Ericsson has occupied himself largely with the solution of the problem of making direct use of the force stored up in the sun's rays, and to aid in his investigations of the subject he invented a solar engine and various other contrivances of great ingenuity. One of the greatest of his practical achievements was the invention of the screw propeller, by which all steam navigation has been revolutionized. He first applied the principle in England in 1837, but the English Admiralty refused to adopt his invention on the ground that it would be useless in practice, "because, the power being applied to the stern, it would be impossible to make the vessel steer." That dictum determined Ericsson to try his fortune in this country, to which he was urged to come by Commodore Stockton. He landed here fifty years ago, in 1839; and two years later designed for our navy the screw ship *Princeton*, the first vessel having the propelling machinery below the water line, out of reach of hostile shot. With the building of the *Princeton* begins the history of modern naval warfare under steam. It changed the construction of the fleets of the whole world.

The invention of the screw has been claimed by various individuals, but to Ericsson its practical introduction in navigation is unquestionably due. Having thus revolutionized naval warfare, he again transformed the navies of the world by the building of the *Monitor*. His first suggestion of the principle of that vessel, involving the concentration of great guns in a revolving tower of a partially submerged vessel, was made in a communication to Louis Napoleon in 1854. The *Monitor* was constructed by Ericsson in one hundred days, and fresh from her contractors it encountered and worsted the *Merrimac* in Hampton Roads, on March 9, 1862. It is not too much to say that, except for her and her victory, the result of the war might have been changed. The history of that encounter and of the ironclad navy subsequently built on the *Monitor* principle is well known, and we do not need to recount it here. During the last twenty years Captain Ericsson devoted himself to his profound investigations as to solar energy, to computations of influences that retard the earth's rotary motion, and to the invention and introduction of a new system of submarine attack.

"TAKE joy home.

And make a place in thy great heart for her;
And give her time to grow, and cherish her;
Then will she come, and oft will sing to thee,
When thou art working in the furrows; ay,
Or weeding in the sacred hour of dawn.

It is a comely fashion to be glad;
Joy is the grace we say to God."

—Selected.

DESOLATION OF THE DEEP SEA.

DESPITE the fanciful pictures which some writers have drawn of the ocean bed, its desolation, at least in its deepest parts, must be extreme. Beyond the first mile it is a vast desert of slime and ooze, upon which is constantly a dripping rain of dead carcasses from the surface, which carcasses supply the nourishment for the scanty fauna inhabiting the abyssal region—in some places more than five miles from the sunshine—and the microscope reveals that the slimy matter covering this deepest ocean bed is very similar in composition to the ancient chalk of the cetaceous period, while mixed with it here and there are minute metallic and magnetic bodies which have been proved to be dust from meteorites. At long distances a phosphorescent light gleams from the head of some passing fish which has strayed thither from a higher and happier zone. But it is not until we have mounted a good deal nearer the surface that the scene changes for the better. We now meet with forests of brilliantly colored sponges, while the phosphorescent animals swimming about are much more numerous, and the nearer we get to the littoral zone more and more phosphorescent lights appear, till at length the scene becomes truly animated. When only 1,200 feet separate us from the sunshine we come upon the first seaweed and kelp (1,200 feet is the deepest limit of plant life in water), but we must rise still another 1,000 feet and more, and get as near the top as 130 feet before we find any reef-building corals. As plants do not live in deep sea, the deep-sea animals either prey on one another or get their food from dead organisms and plants which sink down to the bottom. Thus Maury says: "The sea, like the snow cloud with its flakes in a calm, is always letting fall upon its bed showers of microscopic shells." An experiment proves that a tiny shell would take about a week to fall from the surface to the deepest depths. Since sunlight does not penetrate much farther than the littoral zone there would be beyond this perpetual darkness but for phosphorescence. Many of the animals inhabiting the continental and abyssal zones have merely rudimentary eyes; but these blind creatures have very long feelers, which help them to grope their way along the bottom. Other deep-sea animals, on the contrary, have enormous eyes, and these very likely congregate around such of their number as are phosphorescent, and may perhaps follow the moving lamp-posts about wherever they may go. And so bright is this light on many of the fish brought up by the dredge that during the brief space the animals survive it is not difficult to read by it. The reason why fishes and mollusks living more than three miles under water are able to bear a pressure of several tons is that they have exceedingly loose tissues, which allow the water to flow through every interstice and thus to equalize the weight. When the pressure is removed they perish. In the Challenger expedition sent out by the British Government all the sharks brought up from a depth of a little less than three-quarters of a mile were dead when they got to the surface of the sea.—*The Catholic Magazine*.

"OUR RATHERS."

ONE day I heard a brief interchange of remarks between a sick little girl and her nurse. The child said, "Oh, I'd rather go to school than stay here in bed!" and her nurse quietly replied, "We cannot always have our rathers." It was a good text for the little sermon that preached itself in my mind.

Our "rathers" are very apt to lead us into self-indulgence. They mean the things that are pleasiest and easiest for us without regard for others. If we had them always, there is no doubt that we should be narrowed down to self, instead of reaching out toward others, with our capabilities for helpfulness very much weakened.

Children who form a habit of saying when told to do a certain thing, "Oh, I'd rather do this!" or "I'd rather have that!" and whose mothers indulgently say, "Well, do as you please!"—are the disagreeable, peevish, teasing sort, and unpleasant to live with. The habits thus acquired usually cling to them through life.

Unselfishness is hard to practice, even when the habit is very early formed as well as constantly nourished by wise guardians; how little do blindly erring parents realize how hard they are making their children's after lives by indulgence during their early years.

Passing along from the children to the "grown-ups," as a little friend of mine calls them, and coming to ourselves, we have to face this question, Shall we take our "rathers" when we may, relinquishing them only when we must? To answer this question we must ask others: Is our first object in life pleasure? Is it ease? Is it ourselves, or has it a broader meaning? It is not pleasure if we live for the highest that is in us; not ease, if we realize that the best, sweetest, and most worthwhile things in life are gained by effort; and not ourselves, if we are earnest men and women.

In determining on any course of action, our first question should not be, "Which would we rather?" but, "Which should we?" and that leads to the consideration of many things,—time, place, outcomes, effects, others, and lastly, ourselves. If a question of mere pleasure and taste, we must exercise self-control. Is there any lesson of life harder to learn, or stronger in its power for the up-building of character? Fortunate are we if in early childhood we learn to do the right rather than the pleasant thing.

Most of our "rathers" concern matters of taste or pleasure, and many of them, if indulged, mean trouble, discomfort, or loss to others. It is easy to give up to our "rathers," hard always to do our duty; yet, as George Eliot says, "The reward of doing one duty is power to do the next."

The shortest, quickest road to happiness is not to seek it. Marcus Aurelius Antoninus summed all up when he said: "If thou workest at that which is before thee, following right reason, seriously, vigorously, calmly, without allowing anything else to distract thee, but keeping thy divine part pure as if thou shouldst be bound to give it back immediately,—if thou holdest to this, expecting nothing, fearing nothing, but satisfied with thy present activity according

to nature, and with heroic trust in every word and sound which thou utterest, *thou wilt live happy.* And there is no man who is able to prevent this."

Thus comes his word down through all these seven-hundred years, clear and strong, and needed to-day.

And to sum up all the lesson of my little sermon, here is a strong word of Lucy Larcom's that may be helpful:

"Never lay the blame
On God's great name,
For the lack that of *thy choosing* came!"

—*J. S., in Unity.*

CHURCH TENDENCIES.

[An exchange paper contains the following matter. It is of interest as a statement of two opposite "tendencies" in the Episcopal church.]

I was talking the other day with an old-fashioned, Low-Church Episcopal clergyman, one of the few now alive—and I find that he naturally takes a very gloomy view of the present ecclesiastical tendencies of his church. "It is rapidly drifting back to mediævalism," he exclaimed. "Our clergy hanker after ecclesiastical titles and dignities hitherto unknown in our church, and our people have learned to love a materialized, sensuous worship, radically opposed to Gospel simplicity. The defection of the Reformed Episcopalians a few years ago was wholly the result of this reactionary tendency. But instead of learning anything from that incident the sacerdotalists in the church have become more arrogant than ever. Men high in the councils of the church openly scoff at the work of the Reformation, and declare that before many years the church will repudiate it. Here and there a man like Bishop Huntington arises to protest against some particular development of ecclesiasticism, but their protests are unheeded. It is no longer possible to regard the Episcopal church as a bulwark of Protestantism. For it is drifting out of sympathy with everything that Protestantism holds dear."

Strangely enough, I met a High-Church Episcopal clergyman on the same day, who bewailed the latitudinarian tendencies of his church. "The growth of the Catholic party in the church," he said, "is more apparent than real. So far as ritual is concerned, there has been a commendable progress, but this has been due more to the growing love of æstheticism than to any interest in the dogmas enshrined in the ritual. I confess it with sadness, we have not convinced the reason of the men who think; the intelligence of the age is against us. Some of our most representative clergymen boldly avow this disbelief in the most vital Catholic dogmas, and there is no authority in the church to call them to an account. The same thing is true in the English church. The Bampton Lecturer for 1880, Dr. Hatch, contemptuously threw overboard the church's teaching in regard to the divine origin of the episcopacy. And now the Bampton Lecturer for 1888, the Rev. R. E. Bartlett, does the same thing. It is idle for the church to disavow responsibility for these utterances, when it deliberately invites them as it does, and refuse to discipline their authors."

THE RAINFALL OF THE WEST.

THE Chief of the Signal Service, General Greely (known as the Arctic explorer), has made public an interesting letter, prepared in response to a resolution of the U. S. Senate, upon the rainfall of the Pacific Slope and Western States and Territories. Accompanying the letter is a paper by Lieutenant Glassford, of the Signal Service, discussing the causes of the wet and dry seasons, the abundance and deficiency in different portions, the summer rainy season in Arizona, etc., fortified with charts and tables exhaustive of the subject. These tables cover observations from 661 stations of an average length of seven years and three months, and the charts show separately the maxim, minimum, and mean rainfall for every month and the year. The terms of the resolution made it General Greely's duty "to express his views upon the importance and value of these charts and tables, and also inferentially to express his opinion on the question of recurring droughts in Texas, and in relation to the vexed question of increasing or decreasing rainfall in the arid or sub-humid regions of the United States."

Pursuant to this instruction General Greely discusses the matter at great length. He says: "One great result which must redound to the benefit of the trans-Mississippi and Texas Missouri country by the publication of these official data, will be the dispelling of erroneous and injurious impressions which have long prevailed regarding this extensive region. In the early century this territory was viewed as hardly suited for civilized man, its enormous plants and vast mountains being represented as arid and desert regions, unsuited for cultivation, and in many places even unfit for pasturage. Adventure, exploration, and circumstance have pushed the frontier westward until the myths of the great American desert to the north and of the rainless 'staked plains' to the south have practically disappeared. It is none the less true, however, that the latest and most reliable American text-book of meteorology of this country speaks of the areas 'between the Sierra Nevada and the Rocky Mountains, including portions of Utah, New Mexico, and California,' as 'a region which is entirely destitute of rain,' and 'that further on the east side of the Rocky Mountains the country is a barren desert almost without rain.'"

Another great value of the charts is the bringing to general attention and consideration very extensive areas of country in what has been known as the arid region, where late and careful observations have shown the rainfall to be far greater than has been usually attributed, and thus transfer these areas to the sub-humid districts.

The Chief Signal Officer puts it forward as his opinion that when Idaho, Nevada, Utah, New Mexico, and Arizona shall have been covered with rain-gauges as completely as New York or New England, the final outcome of observation will indicate that the actual average of rainfall for this arid region is now understated by the census charts from 10 to 40 per cent.

General Greely notes that observations at 16 stations indicate an increase in the rainfall, while 8 show

a decrease. The stations are located in Texas, Nevada, New Mexico, Indian Territory, California, Arizona, and Kansas.

In conclusion he says: The Chief Signal Officer does not hesitate to express the opinion that the trans-Mississippi and trans-Missouri rainfall is slightly increasing as a whole, though in certain localities it may be slightly decreasing from causes set forth above, and it seems most proper for him to put forth his strong conviction, even if it be not a certainty, when, as in this case, it will tend to reassure the agricultural population in the lately drought-stricken districts of the West. There appears no possible reason to believe that the scanty rainfall of the past year or two will not be followed by increasing precipitation in the next few years, which will maintain the annual rainfall of these sections at the average, or even increase it. It is believed that the interests of the entire country will be subserved by the publication of a large edition of the rainfall charts and tables accompanying this report.

NEWS AND OTHER GLEANINGS.

—Pundita Ramabai, on her way to India, has been spending a little time in Japan, and lecturing there to large audiences. In Tokio, the capital, the largest lecture hall in the city is said to have been so crowded that the doors had to be closed half an hour before the meeting began.

—Tolstoi, the great Russian writer, says: "Public opinion cannot be moulded through the novel. Those who read novels—the great mass of people—read them for the story; they do not look or care for the application. It is a too diluted way to speak the truth and fails of success. No, I will write no more novels."

—Following out a hint from London, where women guides are regularly organized, having a bracelet as badge, a New York woman makes a good living as a guide to other women visiting the city. She meets them at the trains, takes them to their rooms, shows all the sights, and performs all the duties which are undertaken by European guides.

—There is a successful woman insurance agent in Auburn, N. Y. Two years ago, at the death of her husband, who was a prominent insurance man, she decided to continue the business. She has been so successful that the men in the same business complain that by her winning manner she is getting all the custom.

—Jennie June writes from Paris of Miss Elizabeth Strong, the girl from San Francisco, who promises to become as great an artist with respect to dogs as Rosa Bonheur has to horses. Miss Strong is a quiet, earnest little girl who went to Paris without a sou. She painted her little flower pictures, as she had done in San Francisco, for bread, and, in the meantime, studied and worked night and day upon such stray subjects as could help her to a knowledge of animal life and anatomy.

—It is announced that the American Society of Civil Engineers, the Society of Mechanical Engineers, and the Institute of Mining Engineers are together organizing a trip to Europe to visit the Paris Exposition. The favorable replies from members are so numerous as to make it probable that two steamers will be required to accommodate the party. The rapid growth of the engineering profession in the United States has made it desirable that an adequate representation of the body should be made

among all the European scientific bodies which will send delegations to the Exposition.—*The American.*

CURRENT EVENTS.

STANLEY MATTHEWS, one of the Justices of the Supreme Court of the United States, died at Washington on the 22d inst., in his 65 year. He had been ill for some weeks.

EX-PRESIDENT CLEVELAND and a party of friends are now traveling in Cuba.

THE employés in the machine shops of the Pennsylvania Railroad in Altoona, Pa., have been notified that nine hours will constitute a day's labor. They will be given a half-holiday on the Seventh-day of the week. About 4,000 men will be affected by this order.

THE Illinois Central Railroad Company has given notice that it will no longer ship liquors into Iowa from Dubuque. The liquor dealers will hereafter send their goods to East Dubuque, Illinois, and from there they will be taken by the Central and Ohio roads into the interior of the State. The goods must hereafter be shipped for what they are, and not as vinegar or something else.

THE colored people in Raleigh, North Carolina, have organized the North Carolina Emigration Association, the object of which is to colonize all negroes of the State in Arkansas. A convention is to be held on the 22d of next month, to fully organize the State.

DEATHS in this city last week numbered 412, an increase of 7 as compared with the preceding week, and a decrease of 62 as compared with the corresponding week of last year. Among the principal causes were: Apoplexy, 6; Bright's disease, 11; cancer, 10; congestion of the lungs; 10; consumption of the lungs, 46; croup, 6; scarlet fever, 11; typhoid fever, 14; inflammation of the lungs, 44; old age, 17; paralysis, 11.

BERLIN, March 25.—The labor movement is spreading throughout Germany. Many strikes are reported in the provinces.

LONDON, March 27.—At midnight last night Mr. Bright was reported to be sinking. He was still unconscious. The Queen and the Prince and Princess of Wales have sent messages of sympathy to the family.

WORK OF THE ASSOCIATION.

The work of the Association is chiefly to raise funds. These are sent to the support of two schools for colored youth in South Carolina,—the Schofield Normal and Industrial School, at Aikin, and the Mt. Pleasant School, near Charleston, in charge of Abby D. Munro.

NOTICES.

* * * The regular meeting of Young Friends' Association will be held in the Parlor at 15th and Race streets on Second-day evening, Third month 8th, at 8 o'clock. All who are interested in the purposes and aims of the Association are invited to attend.

* * * A religious meeting will be held at the Home for Aged Colored Persons, Belmont and Girard avenues, West Philadelphia, to-morrow, (Third month 31st), at 3 p. m., to which Friends are invited.

* * * A Conference on Temperance and the Constitutional Amendment will be held in Friends' meeting-house, at the Valley, on First day, the 31st, at 2.30 p. m. Train leaves 13th and Callowhill streets, at 8.30 a. m. for Maple Station, and returns at 5.05.

* * * A portion of the Philadelphia Quarterly Meeting's Committee to visit the smaller branches, will attend West Philadelphia meeting, at 35th street and Lancaster avenue, on First-day morning, Third month 31st, 1889, at 10.30 o'clock; also the meeting held at 15th and Race streets, on the evening of the same day, at 7.30 o'clock. Friends are cordially invited to be present.

* * * Circular meetings have been appointed by the Western Quarterly Meetings as follows: Hockessin in the Fourth month. To convene on the second First-day of each month respectively, at 2 o'clock p. m.

* * * The Penn Sewing School held in Race street meeting-house will close its present session on Seventh-day, Third month 30th, at 10 o'clock a. m. It is proposed to make this an Anniversary meeting, twenty years having passed since the school was started. The attendance of former officers, teachers, and friends of the school is desired.

ANNIE C. DORLAND, Secretary.

* * * Haddonfield First-day School Union will be held at Moorestown, on Seventh-day, Third month 30th, commencing at 10 a. m.

All interested are cordially invited.

FRIENDS' INTELLIGENCER AND JOURNAL.

INTELLIGENCER.
Vol. XLVI. No. 14. }

PHILADELPHIA, FOURTH MONTH 6, 1889.

{ JOURNAL.
Vol. XVII. No. 845.

YE DID IT UNTO ME.

SINCE Christ is still alive in every man
Who has within him one upspringing germ
Of heavenward-reaching life, though crushed, infirm,
And dwindling in the hot simmons that fan
Only the jungle-growths of earth,—we can
Best minister to Him by helping them
Who dare not touch His bellowed garment's hem:
Their lives are even as ours,—one piece, one plan.
Him know we not, Him shall we never know,
Till we beheld Him in the least of these
Who suffer or who sin. In sick souls He
Lies bound and sighing; asks our sympathies:
Their grateful eyes Thy benison bestow,
Brother and Lord,—“Ye did it unto Me.”

—Lucy Larcom.

For Friends' Intelligencer and Journal.

THE DISCIPLINE OF AFFLICTION.

“I WILL not leave you comfortless, I will come to you,” were the consoling words of the Divine Master to his sorrowing disciples who were not prepared for his departure, so soon to take place. He had been their leader, their teacher, their friend; all the trials they had experienced in the three years that they had been his constant companions, were as nothing when compared to this of his going away, and how were they to endure the parting!

It is with us as it was with these sad-hearted disciples. When those upon whom we have been leaning,—those who are our beloveds, who have eaten of the same bread, and drank with us the same cup, are removed from our sight, there seems nothing left but despair. It is so hard through our blinding tears to “look up to the hills whence our help cometh,” while the sombre hues of darkness and distrust gather about our lives and there appears nothing in all the earth worth living for. In the deep agony of the hour we crave only to follow the departing footsteps. And from the depths into which we are plunged, in our first great grief we seldom wholly emerge,—rarely ever rise to the same level of untrammelled ease and freedom, in which we rejoice and are glad, ere the hour of trial sweeps over us, carrying away the support upon which we lean. It is this inevitable result that makes the discipline of affliction so momentous. The sorrow comes frequently “as a thief in the night.” Like the inhabitants of that olden time we know not until the floods are upon us, that our little world of joy and peace and love is to be overwhelmed and the waters of the deluge to sweep every summit of strength and hope. Ah! how can we know where our poor ark is to find a

resting-place in the tumultuous sea upon which we are tossing? We must wait the subsiding of the storm before the dove can find the olive branch that promises peace and deliverance. If the stricken ones could only know and feel this—could trustingly bide the time until the hand of the Helper brings relief! But we weary our poor hearts with the striving, and fearing that we are forsaken and forgotten, sometimes permit dark and defiant thoughts to tear and rend us with weapons of their own forging, and thus daring and defying we are in danger of losing the only anchor that can hold our tempest-tossed vessel and may founder in the surging billows.

When we realize our own helplessness and can reach out to lay hold of something stronger and firmer than our poor selves groping through the “horror of great darkness,” yet clinging to what is left us, the blessed words, “I will come to you,” fall sweetly upon the ear, and we look up in hope, for they bring with them the evidence that our deliverance is assured.

It is for just such storms that He, the Helper and Comforter, would educate, would prepare us. “In the world ye shall have tribulation,” he had said, “but in me ye shall have peace;” but we do not see and understand the meaning of the lesson, while all is clear and bright before us. The problems of existence must be worked out according to the length and breadth of each one's shadow; and though we hear another tell the height and depth that his calculations give, it only reveals to our vision the greater magnitude of that which falls upon our pathway.

We know where sorrow and affliction find us, but can any mortal say when and where we part company? “Your sorrow shall be changed into joy, and your joy no one taketh away from you,” are reassuring promises when we are ready to take hold and make them our own; and the possibility of this being realized in our own experience should be the one ray of hope, the one spot of solid earth upon which to plant our feet in the subsiding tempest. We are lost if we turn from it, we may survive the wreck of all our treasures if we cling firmly to the outstretched hand patiently waiting and watching for the dawn of the light. And in this condition we will hear the voice of the Comforter, it is as sure as the eternal verities of God; though it tarry for a time, it is ourselves that hinder the coming. The compassion of the Infinite One is ever ready to descend upon the weary mourner with a peace that passeth understanding. Let the heavy laden lift up the head in hope, nor suffer despair to set its iron heel upon the crushed spirit or doubt turn the sor-

row stricken from the only Friend that can give rest to the soul.

The apostle comforted his brethren with the assurance, that "our light affliction which is for the moment, worketh for us more and more exceedingly an eternal weight of glory; while we look not at the things which are seen, but at the things that are not seen, . . . which are eternal." While our faith and courage may not be so strong as to enable us at the time to call our affliction "light," as could the apostle who could at another time declare it "not to be joyous, but grievous, yet afterward it yieldeth," wrote he, "the peaceable fruit unto them that have been exercised thereby, even the fruit of righteousness."

These afflictions belong to and are, a part of our human condition, we cannot escape our portion; in some form or other which we always shrink from with terror, the sorrow—the parting—comes. The attachments which make an Eden of our lives, carry with them the shadow of Gethsemane, and "the cup" may not pass until some drops of its gall and wormwood touch our own lips. Let us accept the dispensation as did the Divine Master. If the lesson of his loving yet sad life has a meaning to us in the time of trial and bereavement, it is found in the patience and self-surrender with which he accepted the cross; and, while praying that "the cup" of suffering might pass from him, could yet say, "not my will but thine be done." L. J. R.

OLD ADVICES OF THE YEARLY MEETING.

[The following old Advices, "given forth from time to time by the Yearly Meeting of Friends for New Jersey and Pennsylvania," held alternately at Burlington and Philadelphia, have been copied and sent us by a friend in New Jersey. Some of them are still of value, no doubt.]

Appeals, 1711. It is thought it may be necessary where Arbitrators being chosen by the parties differing, and Bonds entered. If the Arbitrators do not agree, and a monthly meeting gives judgment in the case, the person aggrieved may have liberty to appeal.

Arbitrations, 1724. Advised, that differences be ended with speed, by prudent and just Arbitration.

Affirmation, 1710. As to the solemn Affirmation, as it is a thing of the greatest moment, we exhort all to be very careful about it, and renew unto you the sum of the advice of the Yearly Meeting at London therein, upon its first enacting: "That Friends be charitable one to another about it, they that can take it not to censure or reproach those that cannot, and those that cannot, to use the like caution with regard to those who can," till further relief can be had for us all, to which end we have written to our brethren in Britain, and through the Grace of God, and an unanimous application therein, are not without hopes that an easier way may be had for the whole Body, and all occasion of dislike be thereby taken away and prevented, to which all ought to contribute in our several stations, to our utmost ability.

Acknowledgments, 1713. Touching the matter of making Acknowledgments or papers of condemnation for

offenses against the Church. It is the sense of this meeting, that in such cases, the offenders do attend the monthly meeting, together with their papers of Condemnation in such case, where it is practicable.

Books, 1709. The care of the Press being recommended to Philadelphia Monthly Meeting, a committee of eight Friends, any five of whom are desired to take care to peruse all writings or manuscripts that are intended to be printed, before they go to the press, with power to correct what may not be for the service of Truth; otherwise, not to suffer any to be printed.

(1718). This meeting seeing occasion to renew to the notice of Friends our ancient care and practice in the case of publishing Books and Writings, now recommends to the Monthly and Quarterly Meetings that they take due care to deal with such as disorderly persons, who shall print or publish any Books or Writings, which have not been approved of by the Friends appointed by this meeting for that service. (1719). Advised, That such be dealt with, as write, print, or publish any books or writing, tending to raise contention, or occasion breach of Unity among Brethren, or that have not first had the perusal and approbation of the Friends appointed by the yearly meeting for that purpose. (1722). Agreed, That what writings are approved of by the Overseers of the Press for printing, shall be done at the charge of this meeting.

Burials, 1711. A request from Philadelphia Quarterly Meeting to know how far Friends may be concerned in the Burials of those that were not in communion with us which was discoursed, and after a great deal of consideration, and divers Friends speaking their minds therein, it was thought necessary to exhort Friends to be careful to keep themselves and their children from going with the Dead into any of their Worship Houses, and avoid as much as may be, to hear any of their Sermons: And that Friends may be careful to discharge their conscience in the sight of God, and waiting for Wisdom and counsel from Him, that so Truth in all things may be honored by them, and no offense justly given to those that are not of us. (1719.) Advised, That whereas at some Burials, where people may come far, there may be occasion for some refreshments, yet let that be done with such Moderation; and the behavior of all Friends be with such gravity and solidity as become the occasion. And if any appear otherwise, let such be reprov'd, and dealt with as is advised in case of Misbehavior or indecencies at Marriages. And it may be further noted, that any excess in this case, and the making so solemn a time as this ought to be, and really is, in its own nature, to appear as a Festival, must be burthensome, and grievous to the sober Christian mind, which will of course be under a far different exercise at such times. Friends are desired therefore to have great care therein, and use all endeavors, everywhere, more and more to break from and avoid that offensive and unsuitable custom of large provision of Strong Drink, Cake, etc., and the formal and repeated servings and offers thereof. This indecent, and indiscreet custom and practice has run to such excess, that invitations being made to greater numbers than their own or neighbors' houses can

contain, the very streets and open places are made use of for the handing about burnt Wine and other strong Liquors. And besides the indecencies above mentioned, the custom of waiting for the last that will please to come (though ever so unseasonable) and the formality of repeated servings to each, break in upon another decent order among Friends of keeping to, and observing the time appointed.

(1729.) This meeting recommends to the care of Friends, that they observe decency and moderation in their internments, that the becoming solemnity may not appear as a noisy Festival, and where Wine or other Strong Liquors are served (which many sober-minded among us think needless) that it be but once, and that some solid Friends be appointed, by the respective Monthly Meetings to attend at Funerals to move for bearing out the corpse seasonable, about an hour after the appointment made to meet at the house.

JOHN BRIGHT'S CHARACTER AND CHARACTERISTICS.

From two interesting letters printed in the *New York Tribune*, from the London correspondent of that journal, George W. Smalley, we make the extracts below. He first met John Bright at Birmingham in 1866, upon the occasion of a great public meeting in that city.

His hair even then was gray, though abundant, the complexion florid, and the rather irregular but powerful features gave you at first sight an impression of singular force and firmness of character. So did the whole man. The broad shoulders, the bulk of the figure, the solid massiveness of this masterful individuality, the immovable grasp of his feet upon the firm earth, his uprightness of bearing, the body knit to the head as closely as capital to column—all together made the least careful observer perceive that here was one in whose armor the flaws were few. He looked straight at you, not as if he meant to, or by any effort of will, but with the natural directness of a child or animal—there was neither fixedness nor flinching, but perfect frankness. Neither then nor since, during the two and twenty-years I have known him, did I ever see on his face an expression which did not bear the stamp of sincerity. No man hated pretension or falsity of any kind more than he. It was obvious he could hate. There were lines in his face which came there by peaceful reflection. He was of those who think they do well to be angry against baseness and injustice, against oppression and privilege. It was the spirit of the Old Testament quite as much as of the New. His mission was, in a measure, one of destruction; he had spent his life in uprooting abuses; in thundering against tyrannical institutions; in denouncing laws and law-makers who stood between the people and prosperity. The passion for justice was not stronger in him than the hatred of injustice.

You may say that all these things were not likely to be visible in the first five minutes, nor were they. What I mean is that Bright's face answered to the conception one had formed of it, and that long fa-

miliarity never changed the first impression of that first interview. If we are to accept Arnold's classification of civilizing elements into Greek and Hebrew, there is no doubt where Bright belongs. It was the Hebrew element which dominated him. Isaiah was his prophet, and I have also seen him at times—mostly in public, but sometimes in private—when the lightnings of his eye might have flashed from the sternest of Hebrew messengers from the Most High. A good photograph of him has often an air of benignity, and an air of benignity belongs to him, but he does not wear it always. The broad arch of the forehead, the crown of hair set far back on the head, the beautiful gray eyes, the gentle manner, and their contrast in the perverse curve of the mouth and the strongly, heavily moulded jaw. He was a saint, if you like, but a saint who belonged to the church militant. He was a man of peace, always in arms to prevent you from going to war.

The word reminds me of the interview which among all those I had with Mr. Bright was, next after the first, most impressive to me. It was the morning after he resigned office on account of the bombardment of the forts at Alexandria. I called on him at his room in Piccadilly. He occupied the same for many years on the second floor of the house numbered 132. It has lately been pulled down to make way for a smart new block. He had the whole of the second floor, and the room in which he sat and worked and received visitors was large and comfortably furnished, with an outlook into Green Park. It was a sunny July morning; brighter than is often to be seen in London; the sun streaming in through the three large windows. Bright was in his dressing-gown; a garment to which, like Carlyle, he was much attached; not a fashionable short smoking-jacket, but an ample robe that fell below his knees. He was not given to making conventional speeches, but he said as the door opened: "Ah, you are very good to call on a Minister out of office." His tone and look were both of depression. I said his resignation would be regretted as much in America as in England, and that, if he cared to say anything in addition to what was known, his friends would be glad to hear it. "No," he answered. "I have nothing to say." So we talked for two or three minutes about the weather and the last dinner party, and I rose to go. "Sit down," he said, and forthwith began on his resignation and the Egyptian business generally. Much of what he said was for the public, and was published at the time; some can never be published. He was extremely agitated; the tears were sometimes in his eyes. It was a crisis in his life. He longed to be useful. He liked office. The Chancellorship of the Duchey of Lancaster suited him perfectly. There was no administrative or departmental work, which he hated, there was a salary of £2,000 a year, which he did not object to draw, and there was a seat in the Cabinet, with all the authority and dignity which Cabinet rank confers. Mr. Gladstone and he were united by almost lifelong ties. His attachment for his chief was as strong as it is possible for such an attachment to be. He said:

"You know something about the relations between us. You know what I expected from his Government. You know what it costs me to part from it and from him."

"Then, why resign?"

He got up from his chair, walked to the window, and stood there looking out on the green fields and blue sky. Then he turned, walked back with a flushed face and flaming eyes, and burst out:

"Do you think I am going to be party to an act like the bombardment of Alexandria? If it were just, if it were necessary, I should hate to be responsible for it in the least degree. It is not just, it is not necessary. It is a wanton and wicked outrage on a nation which has a right to be free. I have borne witness against war all my life long. I abhor it. None of our wars have been just. There has not been a just war since William the Third, except your war to put down the Rebellion. My legacy to my children is a message of peace. Do you think, do you think, at my age I am going to be false to all my principles, to go back on all my record, to retract all I have said, to sanction such an act as this, to leave my children a heritage of shame and disgrace, to leave behind me for them the memory that their father was a traitor and a renegade? Never!"

His voice was hoarse with passion, with the passion of a great nature stirred to its depths. The smooth tones had become rough and hard. He spoke with all the energy of sorrowful indignation at a great wrong which he was powerless to prevent. He had tried to prevent it and failed, and grief and righteous anger surged and boiled within him. I had never, anywhere, on the platform or in the House, seen him in this mood, nor heard such tones, nor seen such gestures.

What Mr. Bright liked, I have always thought, in poetry—at any rate, in modern poetry—was the sentiment rather than the poetry. There is no evidence that I know of that he cared much for the delicate art of Lord Tennyson, or for Matthew Arnold in all his force and purity. His favorite among living or recent writers of verse was Mr. Whittier. Mr. Bright and Mr. Whittier had much in common. Both were members of the Society of Friends. Both were Abolitionists, and there were other likenesses on which I need not dwell. Mr. Whittier's anti-slavery verse had endeared him to his English co-religionist, whose enthusiasm embraced much more than the anti-slavery verse of the American poet. He admired the simplicity, the courage, the fervor in a holy cause, the faith in great things, which are among Mr. Whittier's best gifts. He admired him altogether, quoted him, talked of him with delight. One night at dinner—I may be indulged in saying that it was at my house—Mr. Bright turned the conversation to Mr. Whittier. The ladies had gone to the drawing-room.

"Of course you read Whittier?"

"Yes, I have read him."

"But, I mean, read him often. Do you mean to say you don't know him by heart?"

"No, not much by heart."

"Not his best things? Don't you know 'Snow-bound,' can't you repeat it?"

And upon a general admission from the four or five that were present that no one of them could repeat it, Mr. Bright's eye kindled, he got up, walked to the fireplace, put his back against the chimney-piece, and declaimed the whole poem. I can see him as he stood there, his beautiful face lighted up with the glow about him and the deeper glow within him; his voice subdued to the size of the room, but not less rich, deep, melodious, and true than if rolling out to thousands; his gesture, not frequent but decisive and sometimes dramatic. Mr. Whittier never heard his own poetry so recited. I thought I should tell him of the scene. I never did, but I hope somebody will tell him now. When Mr. Bright had finished, we went up stairs. He carried Whittier with him, and talked of him to the ladies as he had talked to us; not, as I said before, critically, but with deep feeling and real apprehension of what is best in him. Nor did it end there. Mrs. Proctor, the delightful young lady of eighty, as Mr. Lowell called her, was there; alert, fresh, energetic, keen-witted, as she always was, I think Whittier was new to her; not familiar, at any rate. She listened intently. When the company broke up, she drove Mr. Bright home—gave him a lift is the phrase here. I saw her again not long after, and she told me that he repeated Whittier to her in the carriage all the way to Piccadilly; and when they had arrived, kept it standing a minute or two in front of his door while he finished what he had in hand.

In the society of London Mr. Bright was a unique figure. Needless to say he never was a man of fashion. There was a long period during which the world of fashion held aloof from him. It ended before he became a Cabinet Minister and Privy Councillor. The Tribune of the People, as some of his friends used to call him, had ceased to be thought dangerous by the Classes. He was asked often to all sorts of houses and to all sorts of entertainments.

To mere conventionalities he paid but scant respect. It was his habit to wear a black velvet waistcoat long after other people had ceased to wear them. I cannot remember ever to have seen one in London except his. It did not matter what he wore. There was no truer gentleman in the company—a phrase which is detestable, but has a meaning not easy to express briefly otherwise. There was no courtlier personage than this Quaker; none whose manners were more perfect. If there had been no standard of good manners he would have created one. It could not be said of him that "manners maketh man;" the reverse was true. "The gentleman," said Emerson, "is a man of truth;" the word "is a homage to personal and incommunicable qualities." Swift said: "Whoever makes the fewest persons uneasy is the best bred in the company." Mr. Bright's simplicity was such that a stranger who was disconcerted by meeting him must have been timid indeed.

A MAN'S best work may not be recognized in his family while he is still with his family; but he ought to be at his best there, so that afterwards it shall be remembered how good he was even while his goodness was unrecognized.

SCRIPTURE LESSON, No. 14.

FOURTH MONTH 14, 1889.

THE REJECTED SON.

GOLDEN TEXT.—“The stone which the builders rejected, the same was made the head of the corner.”—Mark 12: 10.

READ Mark 12: 1-12.

The parable was a familiar form of conveying instruction in the Eastern lands. Very much of Jesus' teaching was by parable, and the vineyard was among the most common figures used by both the Old and the New Testament writers. David used it in Ps. 80: 8-11, Isaiah also in 5: 1-7, and Jer. 2: 21. In the parable of our lesson, Jesus takes up the same thought that Israel, as the conservator of Divine truth, was a vine planted by God, the Great Husbandman, and briefly points out the unfaithfulness of those who were placed over the chosen people.

Went into a far country. We are not to understand this as teaching that our Heavenly Father leaves his human children to themselves, or gives the oversight of them to prophets and teachers. These he raises up, from time to time, to be witnesses of his unflinching love and watchfulness, and to remind those who are forgetful that they owe obedience and loyalty to him. It *does* teach that those who are the leaders and rulers of the people are held responsible for the right performance of the solemn trust committed to their keeping.

He had yet one, a beloved son. One and another of the servants who had been raised up to warn and admonish the people, had been cruelly persecuted, and some put to death. There yet remained one, and this, his beloved son, Jesus, the Messiah, the Christ, whose coming had been foretold by the prophets. Now he was among them, and the treatment he would receive at their hands, is portrayed in the remaining verses of the lesson.

He will give the vineyard unto others. They to whom God had entrusted the custody of a knowledge of himself, through the revelations of the Holy Spirit, having proved themselves unworthy of the trust would be superseded, and they who had been accounted strangers and outcast would take their place.

This parable is but one of many lessons of instruction which Jesus gave during the few days he spent in the Temple before the Feast of the Passover. The vast multitude that had gathered, and were still coming to Jerusalem, must have increased the throng that listened to the words of the Great Teacher. He had never before entered the Temple with authority, or so boldly reprobated the wrongs and abuses that were permitted within its courts. This stirred up the hatred of the scribes and rulers, who saw in the parable of our lesson that it was of themselves, and the treatment he would receive at their hands, that he spoke.

In to-day's reading the servants meant by Jesus were the prophets who had, at various times, brought into the world the knowledge which God wished to impart. It is true that they have generally been greatly persecuted, suffering many things at the hands of the very people for whose sake they

gave up their personal ease and comfort. The Son was, perhaps, treated the most shamefully of all.

We still, even we, reject Christ and admit evil into our hearts daily. Every time a good impulse is disobeyed the voice of Christ to the soul is disregarded, and his teachings rejected. Yet mostly we believe we love him, and would always, perhaps, rather obey than not if it were not so hard! But we know well that to listen to this voice and follow its directions brings real happiness, and it is a joy we may always have if we try our best to overcome evil, in our hearts or elsewhere, with good. “God is not the God of the dead, but of the living;” and the Christ lives still, with all his love for us, still speaks to our souls through the spirit of God. To reject him to-day seems even worse than for ignorant, ill-taught men to slight and scorn him when on earth. And again, we reject him whenever we are unkind to any one; for he said, “Inasmuch as ye have done it unto one of the least of these, my brethren, ye did it unto me;” but whenever we remember to be kind and gentle, we are kind and gentle to Christ.

“Unheard, because our ears are dull,

Unseen, because our eyes are dim,

He walks on earth, the wonderful;

And all good deeds are done to him!”

THE FIRST-DAY SCHOOLS.

A TEACHER'S RECORD FOR A MONTH.

BEING asked to take charge of “The Gleaners,” Second month, 24th, 1889, I turned to a lesson made out some three years ago, but never yet used, and began by asking the girls, “What are we here for?” “To hear what Miss Anna has to say!” promptly answered one. “To be taught a First-day school lesson,” said another. “What are First-day schools for?” “To teach the belief of the Society of Friends,” and “To teach children how to be good.” Yes, especially the latter, for it is much more important that people should be truly good than that they should think as we do even. First-day Schools teach how to be good and teach religion to children. How can anyone teach you how to be good?” “Talking about it.” “Explaining the Bible.” “Teach by actions.” “From objects.” “From other books beside the Bible,” and “Teach us to think before acting.” “Yes, and by teaching you to listen for the—what?” “Conscience?” “No, not quite conscience.” “Inner Light.” “Yes, but we cannot hear light; what also do we call it?” This they could not give, —“the still, small voice; still, because though it tells us things, and sometimes speaks as clearly as words, yet it is silent; and small, because it always speaks gently: we do not *have* to obey it; no compulsion is used, but we feel much the happier always for obedience to it.” “What is religion?” “A form of worship; or, from its derivation, a re-binding of one's self to God.” “What is worship?” “I think we worship whatever we like better than anything else.” “Yes, worship is the deepest love of which we are capable, whether it is offered to God or to something he has made. Directly or indirectly perhaps all men wor-

¹From the Secretary's minutes of a First-day School.

ship God, though some unconsciously and very indirectly. Whether a person's worship be of a high or low grade, it is always the best part of his nature." "Can I teach what I do not know?" "No." "Can I teach *well* what I hardly believe?" "No, thee could teach it, but not so well as what thee does believe." "What is the use of learning to be good?" "To have the esteem of others, and it makes the character better." "It does good in every way." "It makes others happy." "To be happy one's self." "Which is the lowest reason given?" This puzzled them for awhile, but they finally agreed that the love of approbation was the lowest. "What other reason has not yet been told?" No one could think. "Does it make any difference to our Heavenly Father what we do?" "Oh! yes; we ought to be good for his sake." "What is the highest motive that has been mentioned?" "To make others happy, and for God's sake." "Here are a few motives for good behavior,—fear, ambition, love, gratitude, love of praise, love of power, the wish to please God, the wish to be useful, the desire for happiness. Do not answer to me, but let me know when you have answered to yourselves; what is your individual motive or reason for doing right?" This seemed to interest and even amuse them, and they thought diligently. At last one said she *hadn't* any; but she could tell the motive of one of the others! "Can thee imagine anyone who cares nothing for the esteem of others, nothing for the improvement of self, for doing good in any way, for making others happy, for her own happiness, nor for pleasing God?" "No," she admitted with a shrug and smile; and after a few moments' thought, said, "I don't think it is always *one* thing, we have different motives at different times." This appeared to meet the views fully of the entire class. After the bell-tap, as the scholars were going to their places for general collection, one girl lingered to ask, "Well, what is worship?" "The most intense love of which the soul is capable." "Doesn't thee think some people worship themselves?"

The following First-day was very rainy, and there being a dearth of teachers, your secretary finally found herself confronted with eight small children, the remnants of three classes, and no subject. Grasping with a sort of calm despair the first thing that occurred to my mind, I taught them "The Kingdom of Heaven" something in this wise: "Did any of you ever hear of it before?" A "yes," or two, a few words, a couple of negatives, and one placid smile, were the replies. "What is a kingdom?" "Where a king rules." "Who is king of Heaven?" "God." "What does a king do?" "Makes laws." "What for?" "To make people good." "What are the laws of the kingdom of Heaven?" They did not know, but accepted readily the suggested "The Ten Commandments." "What are the two great commandments given in the New Testament?" No one knew, until the first few words were given. "What new commandment did Jesus give us?" This, too, the teacher had to tell them. "Who is the father of us all?" "God." "Then we are the children of a great King. What are a king's children called?" "Princes and princesses." "Then what are we?"

They had never thought of this. "What should this good King's children be?" "Good." "Yes, be perfect 'even as your Father which is in heaven is perfect.' Is this possible?" "Yes," was the general reply. "Yes, anyone can be perfect for a little while, and by trying and trying, can be so for a longer and longer time." Here was brought in the lesson on "Faults," reported two or three months ago in another class. Three of the eight knew for what fault they were oftenest corrected; none seemed to know what was the most hurtful to his nature, but all were interested in the samples given of different kinds of faults, classed as disobedience, unkindness, and untruthfulness, and agreed that to tell what was not true, to hurt people or animals and to disobey are worse in their nature than to leave one's hat lying on the floor, or not to have one's hands and face always clean. To have the latter things classed as unkindness to other people made them laugh. Faults being but the perversion or misuse of some good quality, we then took up particular ones, such as stubbornness, self conceit, laziness, restlessness, etc., and looked for their kindred good qualities. An indolent person is apt to be naturally gentle; a stubborn one, firm; a restless one, energetic and fond of work; he who stands at the head of his class must guard against self-conceit; a neat child may be too easily put out by others' carelessness, etc. "What happens to a king's children after a while?" "They get money." "Why when their father dies they get the kingdom." "Well, the King of heaven does not die, but do not his children have their share of his kingdom just the same,—even more so?" "Yes." "This kingdom of heaven is something very splendid and beautiful, and Jesus said we should not have to wait till we die to have it, but that it is here, now, within our reach, ready for us. How many of you think that this lesson will help you any to find a little of your share of it, this next week?" Every hand was raised except that of the youngest present, a boy of seven, who could hardly be expected to comprehend. Indeed I looked for two or three only, and was surprised at seeing seven. After this followed the reading of a story called "The Windflower," which was cut short by the bell.

Upon the 10th the hour was spent with a class of six growing boys, overflowing with restless energy, and yet quite fairly obedient to their teacher's ruling. During the selection from the catalogue of library books they were encouraged to choose with judgment and told that nothing is of more importance to boys of their age than to read good books. Having been absent for two lessons the teacher asked them "What have you been having while I was not with you?" One said "Something about choosing friends," and another added "Choose good ones." "What is a good friend?" "One that stands up for you," and "One you can trust not to tell on you." "If someone should help me to do wrong, and not tell, is that a friend?" "Yes." "Yes, but a good friend? A good friend must be true to you." Here a boy asked not too politely "Do you practice what you preach? Did you always tell everything you did?" "I try to practice, but was like other boys and not perfect." In their former

lessons, one continued, they had discussed friends as being divided into three classes, acquaintances, associates, and companions, ("and chums" added a scholar). "We can be too hasty, can we not, about making friends? Intimate friends should be few. If you confide many things to a new acquaintance you may find before long that there is no real friendship between you after all. What do you think is the best thing you boys can leave behind you when you die?" "Your body. Oh! no, your reputation." "Good deeds." "Reputation? but that and character are two different things. What is reputation?" "What other people think of one." "No, it is what they say," urged another boy. "Then don't we want to strive to make our character perfect?" "Yes," said one; and one, "Can't do it. If you step on a centipede even, you're doing wrong." "Not always. It depends upon the spirit in which it is done. People are expected to keep their houses clean. Robert Burns could never bear to see anything die. Did you ever read his piece about a wounded hare? It is very pretty, and shows how such things grated on his nature. What would be a good character?" "Gen. Garfield;" "Abraham Lincoln;" "George Washington;" "Benj. Harrison;" and "Grover Cleveland!" put in a youthful Democrat. "Sh—no politics." "Then Christ." "But among men." "Judge Futchy; we needn't go so far away from home to find them," replied the boy. "What do you want to be?" "Men of character;" "Good character," added the most restless of the six. "What does thee want to be?" to a delicate looking boy. "As good as I can." "What tells thee when thee is good?" "Conscience." "What makes thee feel bad when thee does wrong?" "Fear that I'll be found out," answered another. "Thee shouldn't care for that. Thee should listen to what God teaches and not care what others say. You should all cultivate a knowledge of right and wrong. Don't read novels much; they usually only lead to a love of excitement." "Dime novels," suggested the "bad" boy, with a smile. "Dime novels are like others, only worse. They have a plot, and you read for the end. Novels are sometimes useful, but if much indulged in they destroy the taste for better reading. How do you boys feel when you have finished a novel?" "Feel like reading another." "That is exactly true." A voice from the far end of the bench interposed: "Gold fever's as bad as any novel." A short but lively discussion followed between the two boys until the teacher said "Yes, it is as bad. You shouldn't do anything at fever heat. Always act from reason. Dickens's novels are good; he gives excellent pictures of London life. He draws his heroes from poor and lowly classes; his bad characters are hypocrites from higher grades of society. Did you ever read a novel in which the bad character was made very attractive, so that you would almost like to copy his faults? Dickens makes his bad characters very odious. The tendency of some books is to attract to wrong modes of life. Dickens is not so. There is nothing much better for boys to read than history." "Oh! history's dry," said one. "No, it isn't!" replied another. "The

'Deer-foot' books are religious," suggested a third. "A book don't have to be exactly religious always, to get religion out of it," commented the teacher. "I've read all the books in this library that are worth reading," remarked one boy. "They're all girls' books except the 'Ragged Dick' series," went on another. "What about the lives of the Presidents?" "Oh! well, nearly all of them." I seized the opportunity to ask each scholar what kind of books he liked best, with the following results: No. 1;—"Not history,—travels." 2d, "Travels, history, botany, zoölogy." 3rd, "History, travels, biography." 4th, "Travels, stories, ornithology, and Chas. Coffin's books, 'Story of the United States Navy,' 'Marching to Victory,' etc." 5th, "Story books, travels, birds and animals, and Trowbridge." 6th, "Oliver Optie's stories, and biographies of Lincoln and Garfield." Washington Irving was highly recommended to the class as good literature, and the scholars responded heartily to his praise when the "Legend of Sleepy Hollow" and "Rip Van Winkle" were mentioned. [The unavoidable absence of the Secretary on the closing First-day of the month accounts for the abruptness of the closing.]

For Friends' Intelligencer and Journal.

A GUARD AGAINST HASTE IN SPEECH.

An impatient word, spoken in haste to those we hold most dear; an angry look, which as it flashes from the eye, cuts so deep into the hearts of those it is our duty to love and respect; an unworthy action toward a neighbor or friend; who has not experienced a feeling of mortification and unhappiness as the sure result of either of these? who of us would not be willing to bear almost anything could we only recall them, alas when too late? Some time since, feeling my weakness, I hung before my mental vision a "sign," and upon it I wrote the following words:

"God grant, it be my constant daily care

That from my lips no hasty word shall leave;

That I from every act and look forbear

Which might the feelings of Thy children grieve."

I try each morning to look upon this "sign," the first thing, and indeed many times a day, and I feel that I have been helped. To be sure, sometimes the "sign" is blown down, but the post (which is the *desire* to improve) is there, and I hang up the "sign" again and read it.

The hope that the above may be of assistance to others is the only reason for my being willing to offer it to you. BENJ. HALLOWELL, JR.

Lansdowne, Pa.

"If thou werkest at that which is before thee, following right reason, seriously, vigorously, calmly, without allowing anything else to distract thee, but keeping thy divine part pure as if thou shouldst be bound to give it back immediately,—if thou holdest to this, expecting nothing, fearing nothing, but satisfied with thy present activity according to nature, and with heroic trust in every word and sound which thou utterest, *thou wilt live happy*. And there is no man who is able to prevent this."—*Marcus Aurelius*.

FORBEARANCE.

THE grace of "forbearing one another in love," is one of the few "best gifts" which we may "covet earnestly;" yet it is not so much a gift as it is an attainment, one of those qualities of the mind that are developed through a feeling of our interdependence, and a true regard for the inherent rights of each individual. Its exercise in no sense indicates timidity or cowardice; but it does acknowledge the weakness and frailty that, in a great degree, are elements of every human character, and because all are involved therein, are a common inheritance of the race.

To admit this as a fundamental truth requires a courage which is only possible to the truly brave and noble; it is far easier for the average man to resent a wrong or an injustice, whether real or fancied, than to bear the same without retaliation, waiting the time when calm reason and cool judgment shall set the matter in its true light. While it is said that "forbearance may cease to be a virtue," there are few cases in the affairs of men that its just observance will not help forward to a peaceful and amicable solution. And while the grace of forbearance may be acquired through the experiences of mature life, its best results are gained under the training of the home, beginning in the nursery, when so many seeds both good and evil, spring from the soil of the infant mind, and need the hand of the wise husbandman to nurture the one and root out the other. It is quite natural that the child should think of himself and his own wishes first, and insist upon having his own way without the least consideration for the rights of his associates, and it is often the case that he is indulged in his caprice under the plea that "when he is older he will know better."

There is no fallacy more fruitful of disastrous results, than this; it may be compared to the little flame which is easily put out in the beginning but left to smoulder and spread, may become in the end a most destructive conflagration. The home training that respects the rights of every member of the family circle, and while insisting on their observance as a rule of the home life, is tender and patient with the wilful and selfish, cannot fail of good results even where but little progress seems to be made. It is not

so much how far we have gone in the home endeavor, as it is to have made a start in the right direction. The value of what we make our own through the steady effort and watchful care of parental love and foresight is not realized all at once when we go beyond its influence. It is when we are brought into the straits of individual experience, that these lessons come to our aid, and we are made stronger "to choose the good and refuse the evil."

To be patient and forbearing is to have control of the forces of mind and heart, keeping them always at our command but never permitting them to gain the mastery. "He that is slow to anger is better than the mighty; and he that ruleth his spirit than he that taketh a city," are words of ancient wisdom which will have a place in the maxims of the world so long as passion and intolerance usurp the place of kindness, forbearance, and love.

MARRIAGES.

DOWNING—FELL.—On Fourth-day, Third month 27th, 1889, at the home of the bride's parents, No. 40 Model Avenue, Trenton, N. J., under the care of Chesterfield Monthly Meeting of Friends, Henry D. Downing, of Wilmington, Del., son of Thomas S. Downing, of Downingtown, Pa., and Frances Fell, daughter of Henry R., and Rachel W. Fell.

HAMILTON—PENNELL.—At their residence, Philadelphia, Pa., Third month 28th, 1889, by Friends' ceremony, Milton L. Hamilton, of Philadelphia, and Mary E. Pennell, of Chester county, Pa.

REYNOLDS—WILSON.—At the residence of the bride's parents, Sylmar, Cecil county, Md., Fifth-day, Third month 21st, 1889, by Friends' ceremony, John H. Reynolds, of Rising Sun, son of the late Haines and Annie E. Reynolds, and Mabel, daughter of Wm. and Mary F. Wilson.

WALTON—LAMBORN.—At the bride's parents, near Yates Centre, Kan., on Fifth-day, 21st of Third month, 1889, by the order of Friends, and under the care of Wapinococ Monthly Meeting, Wilmer Walton, of Parsons, Kansas, son of Thornton and Hannah B. Walton, of New Brighton, Pa., both deceased, and Mary Lamborn, daughter of Thos. and Mary H. Lamborn.

DEATHS.

ADAMS.—Third month 24th, 1889, Gilberta Fuller, wife of Harry L. Adams, and daughter of J. Carmalt and Mary Willis of Philadelphia.

BLAND.—In Philadelphia, Third month 7th, 1889, of diphtheria, J. Harry Bland, aged 25 years.

MATHER.—Near Trenton, N. J., Third month 27th, 1889, Patience S., wife of Benjamin Mather. Interment from Langhorne meeting-house.

SHEPPARD.—Third month 27th, 1889, Richard S. Sheppard, in his 81st year; a member of Westfield Preparative and Chester Monthly Meeting, held at Moorestown, N. J.

THORNE.—At the residence of his sister, 558 Madison Ave., New York, N. Y., on Second-day, Third month 25th, 1889, in the 64th year of his age, Edwin Thorne, of Thorndale, Millbrook, Dutchess county, N. Y., son of the late Jonathan and Lydia Ann Thorne, of New York city.

WORRELL.—In Philadelphia, Third month 26th, 1889, Lealete, daughter of Hibberd B. and Sallie G. Worrell, aged 10 months.

YOUNG.—At his residence, in Merritt's Corners, N. Y., on the 10th of Third month, 1889, De Witt C. Young, in the 76th year of his age; an interested member of Chappaqua Monthly Meeting, and a diligent attendee of meeting as long as his health permitted. He was a Friend in the true sense of the term,—being the friend to those who needed help, and the sympathizer with those who were in trouble. He was earnestly concerned to know his duty, and in his quiet way to do it, even though in so doing he was led with the two or the three into that which was held by the world to be unpopular. In his life of service, and peaceful death, we are forcibly reminded of the saying of old,—“Mark the perfect man and behold the upright, for the end of that man is peace.”

NEWS OF FRIENDS.

APPOINTED MEETINGS AT EASTON, NEW YORK.

FRIENDS here rejoice that the way has been made clear for our friend, Isaac Wilson, of Canada, to visit us in his mission of Gospel labor. On First-day, Third month 24th, at 11 a. m., he attended a meeting at the South Friends' meeting-house. In spite of bad roads, a large audience assembled, who listened with satisfaction to the words of encouragement and love which flowed freely for an hour and a half. At 3 p. m. he attended an appointed meeting at the North Friends' meeting-house. Here the meeting was somewhat smaller, but fully as impressive; all seemed to feel the impress of his words, and go on their way rejoicing. In the evening a parlor meeting was held at which he was also present.

Second and Third-days he spent in Saratoga, visiting Friends and holding meetings. On Fourth-day, at 2 p. m., an appointed meeting was held at the Presbyterian meeting-house, at which he bid them, in the spirit of the Lord, to be “up and doing,” for the fields are already white unto harvest, but the laborers are few. The next evening another interesting and impressive parlor meeting was held. On Sixth-day morning, with the bright spring sunshine flooding the earth, he went on his way to other fields of labor.

Would that more of our friends might give us an occasional visit, by way of strength and encouragement, that we may truly feel

“Wiser and better, with a thankful mind,
To bless our God for every glory given,
And with a gentle heart, to seek and find,
In things on earth, a type of things in heaven.”

P. A. H.

Easton, N. Y.

—A Friend in Kansas, in the course of a private letter, says: “I am much alone and a little peculiarly situated as to fellowship with Friends. I like the INTELLIGENCER AND JOURNAL, for its tone of liberality, and the correctness of many of the views published; and I enjoy the accounts of many Friends' meetings, etc., giving us to understand what is going on, and the state of things, which is next best to being an eye-witness. If I dared to

look outward, I could wish with ‘S,’ of Maryland, that the Good Master would send some commissioned one this way. Much is doing by ‘Salvationists’ and others, and yet the tide of the full, clear stream, is running low, it seems to me.”

—A notice of the marriage of a Friend, in Kansas, well known in the East for his benevolent work among the colored people, etc., is printed elsewhere. A letter from one present at the wedding says: “The little meeting held on the occasion we thought was a favored one. Several neighbors and guests came in; and, although some had not attended a Friends' meeting before, all were soon gathered into a very comfortable quiet. From the time of the entrance of the persons who were to join in a covenant of union “till death,” a precious solemnity was felt to attend. A few words were offered by way of testimony and also in supplication. The entering into the covenant openly by the persons themselves,—a new ceremony for many to witness,—“in the presence of the Lord and this assembly,” seemed very deep, real, and impressive. All hearts appeared to be moved and the canopy of love covered the gathering. Several expressed to us that they were glad to be present. We feel thankful for the favor as it was experienced, and that there is a way for us when we feel true desires for the right thing to be done. I wish that our privileges as Friends were more appreciated; then these occasions might be more frequently seasons of true fellowship in the best cement of life, the love of the Lord.”

CHRISTIAN EFFORT AMONG THE POORER PEOPLE.

EDITORS INTELLIGENCER AND JOURNAL:

I HAVE read with admiration the article in your last number taken from the *Friends' Quarterly Examiner* of London,—admiration at the courage of the writer in expressing his views and the courage of the publishers in giving them circulation. No one but an honored member of the Society could venture thus to show up its short-comings; no one but a student of the social question could point out the origin of the evils now so prominent. In both cases, indeed, the root is the same,—individualism, every one for himself alone, both in commerce and religion.

I know not how it may be with Friends in England, or indeed in America, but among other religious denominations in this country, I am told, a movement opposed to individualism is quite pronounced. I am not prepared to give any account of it; possibly those who feel an interest in the subject would get information from a publication in magazine form, called “Lend a Hand” of which I have seen but a single number. I have understood that the Episcopalians are particularly active in this line, and I have myself seen an interesting example of it on a very small scale. The rector of a small church in my neighborhood has rented a house in an inferior neighborhood and there established a so-called “Workingman's Club.” The rooms are open every evening from six till ten o'clock. Some of the men of the congregation are in attendance, and very often the rector himself. They have newspapers to read,

and games in which the gentlemen join with the visitors. The difficulty is to get the poor souls to come in; to bring the amusements down to their level. We have here a public library, lighted and well warmed, with seats for perhaps forty people. I have been there several times lately, and each time spent an hour or more entirely alone. But at the workman's club there is a fair attendance, many of them ragamuffins just from the street. They were very orderly in their behavior. The evening I attended was the "ladies' evening." Some four or five ladies, very plainly dressed, came in, sang, played games, cheques, etc., and talked with the visitors on a footing of perfect equality. Toward ten o'clock there was a call to order, the minister read something, recited one of the written prayers or "colleets" of his church; coffee with buttered bread was handed around, and the exercises were at an end. There is also a "Friendly Society" in which a number of young women meet women of their own age of an evening, read, talk, and work with them. The minister of the parish told me the effect was perfectly wonderful in increasing the attendance at church and otherwise. A great many years ago the members of Friends' meeting in this city held a "sociable" at each other's houses once a week. We had no religious exercises, but read instructive books and exchanged views. In a few months, I think, the attendance at meeting was quite doubled.

In work of this kind I do not know that Friends would have any advantage over other denominations; perhaps would be under a disadvantage in attracting the class of persons who most need aid. At first, at least, such persons come to be entertained in some way, and pleasant stories and easy games, so far as I can understand, with a little simple music are the only common ground on which the two classes can meet.

Whether work of this kind will ever elevate the lower classes cannot yet I think be foreseen. Their position, commercially, is every day worse and worse. In England, I believe, the workmen's associations have met with some success. The result is different in America. I think every strike during the last two years has failed. The workmen have had to surrender at discretion. Meantime, says a writer in their interest, twenty-five persons hold one hundredth part of all the wealth in the United States. Carrying out that proportion, twenty-five hundred persons would own all the property in the United States, and absolutely control the means of living of sixty millions. In 1880 ten persons made eight million dollars apiece: that is the ten made as much as eighty thousand families make on an average. Great fortunes, says the writer quoted, are *not* soon dissipated; they are held for generations; and capitalists deal with masses of working men, just as securely as disciplined armies do with mobs.

There is another branch of Edward Grubb's paper which I will ask the privilege of remarking upon briefly, next week.

J. D. McPHERSON.

Washington, D. C.

NOTES OF T. W. HIGGINSON'S LECTURE.¹

THE lecturer said he generally took it to be the sign of a healthy mind in a child, when it dislikes to study history. This is not because history in itself is not interesting, but because it has too often been written in a dry, lifeless way,—the skeleton presented without the blood and muscles, so to speak. We are naturally interested in our fellow-men, and since history is an account of the doings of human beings it would always interest us if properly written. Love of fiction is supposed to be an attribute of childhood, but when you have told a child a wonderful story, its first question is "Is it true?" showing that they seek for truth, and love the true even more than the wonderful. History, when written as charmingly as if it were fiction, and fiction written with the semblance of truth, always chains the reader.

In attempting the study of History we must be moderate in our aims, knowing that we approach a subject of great magnitude, and that the limitations of the human mind preclude the possibility of our remembering everything. Our ability to acquire knowledge reminded him of the pop-gun he used when a boy. He first cut a piece of potato with one end of the reed, then turned it round and cut another piece with the other end; but at no time were there ever more than two pieces of potato in the gun at once. So it is too often with our acquired list of facts,—one pushes the other out! Such is the humiliating experience repeated over and over again by instances of our best students, leaving school with high records for their knowledge of history, and forgetting it as rapidly as they learned it when they ceased to be students.

He recommended that a few dates, judiciously selected, say twenty or twenty-five, be fixed in the memory as stepping stones down the path of time. Any teacher will help you to arrange these on a sheet of note paper, and these main facts, or dates, well chosen, and studied in a systematic, intelligent way, cannot fail to interest you. Know these thoroughly,—not think you know them. They had best relate to some distinct period or personage, such as the discovery of America, or the reign of George III., for instance. Then add to these a knowledge of the period, by reading works of social detail, and all that will throw light on the manners and customs of the time.

It is a bad thing to begin life with inaccuracy. Inaccuracy of language is often illustrated by educated people, who still make use of the ungrammatical expressions permitted them in childhood.

The essential thing is to approach the study of history with a fair mind, remembering that the worst man, or the blakest event, has his point of view. Study the side you don't incline to, as well as the side you do; seek fairness in everything—even to your opponents. History written with truth, and in a clear forcible style, with justice to all sides, will never fail to be interesting. And what we understand—interests us; and what interests us we remember.

¹ On "How to Study History;" at Swarthmore College, Third month 15.

SWARTHMORE NOTES.

—The authorities on Sixth-day last decided to close the college for the Spring holidays on Third-day of this week. The vacation will continue until Second-day, the 15th. Owing to this change the dates of the Somerville reunion, the gymnasium exhibition, and the preparatory sports will have to be postponed.

—The contract for grading the space enclosed by the tract upon Whittierfield has been awarded, and work commenced on Third-day. The college athletes are much pleased over the decision to help them.

—Dr. Coffin, principal of an Indian training school at Salem, Oregon, was at the college last week, accompanied by Prof. Birdsall, of Philadelphia.

—The elections in the different classes for members of the *Phoenix* staff have resulted as follows: From the Junior class, James W. Ponder, of Delaware; Abby M. Hall, of Pennsylvania; and Edgar Allan Brown, of Ohio. From the Sophomore class, William C. Sprout, of Pennsylvania; and Josephine F. Ancona, of Pennsylvania. From the Freshman class, Gertrude R. Hutchings, of California. To these the retiring staff added Samuel R. Lippincott, of New Jersey; Benlah W. Darlington, of Pennsylvania; and Frederick E. Stone, of Delaware; and the new staff elected William L. Donohugh, of Pennsylvania. The new staff organized on Second-day by choosing Edgar Allan Brown, Editor-in-Chief, and James W. Ponder and Abby M. Hall, Associate Editors.

TWIN SISTERS OF STILL GREATER AGE.

EDITORS INTELLIGENCER AND JOURNAL:

I NOTE in your issue of Third month 23, the account of the two brothers by the name of Nice, and the Buckman twins of advanced years,—the former born in May, 1805, the latter in April, 1803. I wish to mention twin sisters, still older, Martha and Mary Stackhouse were born July 29, 1802, in Falls township, Bucks county, Pa., and are still living. They were the youngest of nine children. Their parents, David and Martha Stackhouse, were life-long members of the Society of Friends,—David living to be 94 years old. The twin sisters now live together in Wrightsville, York Co., Pa., and also belong to Friends. Martha married James Cook, who is now deceased. Their mental faculties are quite good, they write to their friends, and enjoy the company of friends and relatives, but do not go from home.

L. D. M.

Chester, Pa.

... It has been forcibly said that "it was devotion to a Leader—allegiance to a Person," rather than a set of mere dogmas, that was at the bottom of that great movement of thought and feeling in which Christianity was cradled. This Leader or Person is the Jesus of Nazareth who appears in the four Gospels, and who is not only the author, but also the substance and life of the system that bears his name. He himself is Christianity in actual life.

MY WORK.

I COME to Thee—O, Lord—for strength and
patience
To do thy will.
Help me, O Father, in this world of duty
My place to fill.

I may not go and labor in Thy vineyard,
Where, through long hours,
Bravemen and women toil, and from Thy presses
The red wine pours.

My work at home lies with the olive branches
Thou'st planted there.
To train them meekly for the heavenly garden
Needs all my care.

I may not in the woods and on the mountains
Seek Thy lost sheep;
At home a little flock of tender lambskins
'Tis mine to keep.

Thou givest to Thy servants each our life's work;
No trumpet tone
Will tell the nations, in triumphant pealing,
How mine is done.

But 'twill be much if when the task is ended
Through grace from Thee,
I give Thee back undimmed the radiant jewels
Thou gavest me.

—Mrs. M. P. Handy.

SONG OF THE SEA.

THE song of the sea was an ancient song
In the days when the earth was young;
The waves were gossiping loud and long
Ere mortals had found a tongue;
The heart of the waves with wrath was wrung
Or soothed to a siren strain,
As they tossed the primitive isles among,
Or slept in the open main.
Such was the song and its changes free,
Such was the song of the sea.

The song of the sea took a human tone
In the days of the coming of man;
A mournfuler meaning swelled her moan,
And fiercer her riots ran:
Because that her stately voice began
To speak of our human woes;
With music mighty to grasp and span
Life's tale and its passion-throes.
Such was the song as it grew to be,
Such was the song of the sea.

The song of the sea was a hungry sound
As the human years unrolled;
For the notes were hoarse with the doomed and
drowned
Or choked with a shipwreck's gold:
Till it seemed no dirge above the mould
So sorry a story said
As the midnight cry of the waters old
Calling above their dead.
Such is the song and its threnody,
Such is the song of the sea.

The song of the sea is a wondrous lay,
For it mirrors human life:
It is grave and great as the judgment-day,
It is torn with the thought of strife:

Yet under the stars it is smooth, and rife
With love-lights everywhere,
When the sky has taken the deep to wife
And their wedding day is fair—
Such is the ocean's mystery,
Such is the song of the sea.

—Richard E. Burton, in *Harper's Weekly*.

IN A GLASS HOUSE.

THEY'VE got a glass house in the garden,
A little house out in the sun;
I watched while the gardener built it
Until it was finally done.

Now what do you think it was made for?
I do not believe that you know;
But I do. Now isn't it funny?
'Tis to hurry the flowers to grow!

And I'm sure that it does, for the pansies
Have blossomed as full as can be,
And there isn't a flower in the garden,
And scarcely a leaf on a tree.

So I've wondered and wondered a long time—
Please answer me this, if you can:
Do you think if I lived in one like it
I should hurry and grow to a man?

—Agnes M. Lewis, in *Wide Awake*.

THE PROHIBITORY AMENDMENT: ADDRESS OF A. M. POWELL.¹

It gives me special pleasure to be with you and to help, so far as any word of mine may, to create a public opinion in favor of the Prohibitory Constitutional Amendment. I have very great faith in this Amendment as a method of procedure against the liquor traffic. It brings the subject where it belongs, directly to the people. "We, the people, do ordain," etc. After a Constitution is adopted, by its own provision the people may amend it. An opportunity is now afforded to the people of this State to do this. You are to deliberate upon the question whether you will or will not adopt this Amendment. The Legislature has performed its part, and the question is now before you; you have the opportunity to decide whether you will perpetuate the license method of dealing with the drink traffic, or whether you will abolish altogether the license system.

It is a peculiar American method of dealing with important questions. No other country on the face of the earth brings to its people such opportunities as these. In the light of the interpretation of the great significance of citizenship in our country, I feel the importance of this occasion, and I congratulate you as citizens of Pennsylvania that this opportunity is at hand. It has been said, "God links opportunity and responsibility together;" so while you have a rare opportunity, there is a solemn responsibility resting upon you.

I need not dwell long upon the evils of the liquor traffic to show that its results are inimical to the public welfare. It is the chief factor of crime, pauperism, and taxation, and as such it becomes altogether

¹Delivered at Girard Avenue Friends' meeting-house, on Friday, Third month 28th, 1893, before the Society of Young Temperance Workers. From phonographic notes by Henry T. Child.

appropriate that the sovereign people shall consider whether they will incorporate in their fundamental law a provision that the drink traffic shall cease.

In the report of Frederick H. Wines, secretary of the National Prison Association, he says: "About a decade ago there were in the prisons and jails about 60,000 inmates. In addition to these there were about 11,000 in reformatories of various kinds, making a total of about 70,000 people, old and young." He has recently given an opinion that the new census (about to be taken for 1890) will show an increase which will reach from 75,000 to 80,000 in the jails and penitentiaries, and over 15,000 in the reformatories, making a total of nearly 100,000 prisoners in the United States. Nine-tenths of these are imprisoned either directly or indirectly on account of the use of strong drink, as this is known to be the chief factor. Senator Wilson, of Iowa, in commenting on the fact that crime is steadily on the increase in this country, refers to the fact that in his State, where prohibition obtains, crime is decreasing; and he states that in one-half of the county jails there is not a single prisoner.

In addressing some of you as Young Temperance Workers, let me illustrate some things that this traffic does to childhood. The New York Society for the Prevention of Cruelty to Children had 6,500 complaints of suffering last year, 2,244 arrests were made, and 2,208 convictions. There were 3,216 children rescued and relieved. I have examined many of these cases, and find that in most of them either one or both parents were intemperate. On the first day of the year, a beautiful girl, frail and delicate, eleven years old, made a pitiful claim for protection. She had been driven out from her home by a drunken father and mother.

What is the remedy? The license system has been tried for a century and more, and has proved emphatically a failure, either to restrain or overcome. Its tendency has always been to perpetuate the evil. It has been said that it is demand that creates supply. If there were no drinkers, there would be no traffic. It is a lamentable fact that there is so much demand for drink, and we should all of us do whatever we can to teach the lesson of total abstinence.

It is also true that "supply creates demand." In coming over in the car, a lad came through with candy for sale. There were children sitting quietly; but when they heard him and saw the candy they were seized with a great desire for this and began to beg their parents for it. If they had not had it offered, they would not have thought of wanting it. This did for them just what the liquor-licensed saloon does to thousands of people, and if it were not displayed in their sight many would find it easy to resist the temptation. A licensed saloon is a constant temptation to many people.

You have in this State one of the best license laws in the country, restrictive beyond most license laws. I am not disposed to undervalue its merits; but they are not in the feature of high-license, but in certain bonds and penalties by which it has reduced the number of saloons in some localities. But it does not propose to abolish the saloons; it does

not propose to put an end to the drink traffic; only to regulate and circumscribe it. I presume the quantity of liquor consumed has not been diminished; beer drinking is on the increase.

This is not what we want. There never was a greater mistake made by anybody than by those who suppose high-license is in itself restrictive. The reduction in the number of your saloons was not on account of the price, but on account of the restrictive features.

Plainfield, N. J., will illustrate this point. They have had as many saloons under high license as they ever had, and I believe more. The Council decided to raise the fee to \$700, and they had more applications. They made a restriction that the saloons should be closed at 11 o'clock instead of 12 at night. One saloon-keeper said he would rather pay \$1,000 than to lose that hour. It is not a legitimate business that can afford to pay a license fee of \$1,000 for the hour from 11 to 12 at night. Think of the homes in that city from which men and women are enticed; think of the money that is worse than wasted in these saloons at the midnight hour.

There is in Plainfield a home for fatherless and motherless children and those who are worse off than these. In two months there were fourteen little children who made application for shelter. There are 15,000 people in that city, and in eleven months 150 children applied for shelter. In almost every case these were in want on account of the drink habits of their parents.

High license is one of the greatest delusions. The State of Nebraska which has had the highest license, that of \$1,000, has found the results very unsatisfactory, and within a few weeks they have decided to submit a Prohibitory Constitutional Amendment to the people. I am speaking to some who are Juvenile Temperance Workers. Let me tell you what a little boy in that State did.

In that legislature there were license advocates and Prohibitionists. There were political clans and complications, and it was found that not a single vote could be spared; indeed there were two votes needed to carry the bill. One member changed his vote from no to aye, and still there was one needed. A member of the House said, "I wish to change my vote; I represent two counties; one favors and the other opposes this Amendment. I realize that it will be impossible to please both sides. I have lost a great many nights' sleep thinking what is best to do. Yes, I have been looking for guidance from some Higher Power; but I have come to the conclusion that the Lord has little to do with the affairs of a Nebraska Legislature. I have consulted with my family upon this question, and the other evening my five year old boy climbed upon my knee, and putting his arms around my neck, he said: 'You will vote right on submission, won't you, papa?' I shall now say to the counties I represent that I cannot please you both, but with the grace of God helping me, I will vote for the salvation and welfare of my boy. I therefore vote aye." So "a little child shall lead them."

What that boy did in determining the action of the Nebraska Legislature, some of these boys or girls

may do in determining the vote of some one in Philadelphia to be in favor of the Amendment.

License has had its trial and has been a failure. Prohibition has had something of a trial, but under great disadvantages and discouragements. So that in an examination of the two methods, there are difficulties. It is very difficult to change the habits of a people in a decade. In Kansas, the pioneer constitutional prohibition State, we have something of a guide, although it has had great difficulties to contend with, and obstructions have been placed in the way from year to year. Both the last governors testify that prohibition has been a great success; that it has greatly reduced the use of intoxicating liquors, it has promoted general prosperity, and improved the welfare of all classes. The Amendment was adopted by 8,000 majority; but a late governor told me that it would be confirmed by 75,000, if the vote were taken now.

Another illustration for the children. A little Kansas boy, 8 years old, visited a relative in Pittsburgh, Pa., and walking along the streets he was curious to know what was going on in those places where the windows were curtained and screened. I think it will be well for you when the practice of prohibition causes all these places to be shut up and children may not become familiar with them. No legislative business needs screens.

Maine which had had legal prohibition for nearly a quarter of a century, has adopted constitutional prohibition by 48,000 majority. I admit there is liquor sold in Maine. I have never yet heard of any statute that was not violated. The Ten Commandments are very often violated; but nobody thinks of repealing them because of this, nor does any one believe them to be a failure because they are sometimes violated. I visited Maine, and a friend invited me to go to the jail of one of the cities, saying, this will tell the story. We were kindly welcomed. We found some white-washed cells, some household furniture stored, but not a prisoner there. With a population of 25,000, there had been only one prisoner in the year, and that was a woman arrested for selling liquor. The liquor traffic is a cause, prisons are an effect.

I visited Portland, the largest city in Maine. There were some prisoners there, but many of the cells were empty. I saw there, at work, men who had been saloon keepers and had been convicted and were making shoes. In Maine they send saloon-keepers to prison; in New York we send them to the legislature and sometimes to Congress.

I like the Maine method best; and if Pennsylvania does its duty on the 18th of the Sixth month the brewers, distillers, and saloon keepers will find themselves out of business. The prisons will not be so crowded as they now are. Men and women will come out and not go in again, as "repeaters," as they now do.

Let us look at Iowa, a great and important State. It is trying the experiment of prohibition in earnest. Senator Wilson, of that State, says in a population of about two millions there were in 1886, 2,645 convictions; in 1887, 1,520; and in 1888, under more strin-

gent prohibition, 838. They have a State prison contractor of labor, who made his contract upon the old basis; but he finds himself unable to fulfil it because there are not enough prisoners. This is rather bad for the contractor, but it would be better to pay him his loss than to go back to the old way and furnish prisoners. Governor Larrabee has spoken most emphatically of the very great blessing of prohibition. He hopes to see these blessings extended elsewhere. I am deeply interested in the part which the Society of Friends shall take in this impending contest. As a member of this Society, I am anxious that it shall have a good name because it deserves it. I am somewhat anxious as to the attitude of Pennsylvania Friends on this important occasion, one in which it seems to me every man and every woman, (though the women cannot vote as I wish they could,) should take an active part. Every concerned Friend should be enlisted heartily and earnestly to secure the adoption of this Amendment.

Here, again, these young people can help. Let me give another illustration of how "a little child shall lead them." In most of the State there are laws requiring instruction as to the effect of alcoholic drinks, stimulants, and narcotics on the human system. In New Jersey, there are some local influences of this kind, and in one of her cities temperance instruction is given in the schools. One of the scholars, a lively little girl whom I know personally, lives in a home of wealth and refinement, but where liquor was still kept upon the side-board and wine upon the table. The instruction which she had received at school so wrought upon her mind that she felt that she must speak to her father and mother about it. She made an appeal and said she was ashamed to meet her classmates if this was continued. Her appeal was irresistible, and the wine and liquor were banished. So I hope these young people will come to be leaders in this great work for the adoption of this Amendment.

I said I have a deep interest as to what will be the attitude of Friends. There are different meetings. Your yearly meeting has a large and efficient Temperance Committee; so have nearly all the quarterly meetings. I think the occasion demands that the monthly and preparative meetings should appoint responsible committees to promote public influence in favor of this Constitutional Amendment. Friends are a small body; but in the community they have great weight, much more in proportion to their numbers than any others. This is a time when it seems to me Friends cannot afford to be idle.

It is not a partisan campaign; simply citizenship wholly dissevered, for the time being, from party. It is for or against! The situation is such that no one can avoid the responsibility. One must be on one side or the other; and if he absents himself from the polls, he gives the liquor men just what they want. If he votes against the amendment, he does just what the brewer, the saloon-keeper, and the distiller want.

I am sure there can be no enlightened, conscientious Friend in view of the truth in relation to pro-

hibition, who will not feel the importance of taking the side of the home, as against the saloon, by voting the drink traffic out. I appeal, therefore, to those who are members of the Society of Friends, to make this a subject of most thoughtful consideration. There is no time to lose; the weeks are rapidly passing; there should be many meetings—like this. There should be a seed-sowing of literature throughout this Commonwealth. As is the thought upon the subject, so will be the action. This beautiful meeting-house before it existed as we see it, existed in somebody's brain. It was all planned out, thought out, before it took shape. So all of us are architects of our own character and those of others. Let us see to it that they build wisely and well, by right thinking and preparation for right action.

Some one has written a delightful little volume entitled "One Upward Look for Each Day." Let us have this upward look. As we contemplate this question, let us take that upward look, opening the heart to devotional influences; and I believe we shall be found doing all we can, and combining with others to put away the greatest evil of our times and the world.

THE NOBLEST THOUGHT THE TRUEST.

OUR modern life is full of reminiscences of the past, and, although these survivals of ancient ignorance and superstition no longer have their old force and authority, their influence is still very great. Many an intelligent man finds himself unconsciously affected by some old superstition still lingering in the habit and speech of to-day. These survivals are not confined to minor matter; they affect our conceptions of the greatest things. Any one who makes a candid study of his own thought finds in it at times almost antagonistic conceptions of God and of human life, and any one who reads the works of the day on these themes, or who talks much about them with others, finds these different conceptions sometimes held by the same person at the same time. In our best moments we see clearly that only our noblest thought about these things can be true. But there are other times when the survivals of past thinking assert themselves, and we find ourselves confused by two antagonistic ideas. It is not easy for a man to trust entirely to the noblest thought of life which comes to him. So many men have thought ignobly of it, and have written all manner of evil against it, that it is difficult to swing one's self clear from their influences and to look at it from another standpoint.

The pessimism of the Buddhist has crept into the Christian conception of life, and men find it difficult to believe what they know in their hearts must be true—that life is essentially great and noble and not a hideous blunder. The thoughts about God which men held in their childhood still travel with us and enter unconsciously into our conceptions, blurring the image of Divinity as Christ gave it, and confusing it between the thought of the Divine God and the god made in the image of man by man himself. But it is very certain that if there be a God, the highest thought we can have of him must be true, and that if he fashioned us, the noblest thought we

can have of ourselves must fall short of our highest possibilities. The only way to keep one's self steadfast is to plant one's self immovably on this foundation. When conflicting theories perplex and antagonistic thoughts torture the mind, it is well to take our place beside the Divine Teacher and stand or fall with him in our thought of God. If Christ was mistaken, then there is no truth in the world. If, on the other hand, he saw with unerring gaze, as we believe he did, it is small matter whether theologies or schools or text-books or great thinkers agree with him or not. They may fail to agree; that is their misfortune; it does not concern us. If there are parts of the Bible which seem to conflict with the thought of his Father which Christ presented, we can sooner afford to let those passages go, if that were necessary, rather than question for a moment the authority of the Divine Teacher. But such contradictions do not exist in the book itself; they are altogether of man's making, and the struggle which many people are having to-day to reconcile an inherited theology with their own clear perception of the teaching of Christ is a useless struggle. Let the theology go; Christ is more than all the logicians, and wiser than all the makers of systems.—*Christian Union*.

FUNERAL OF JOHN BRIGHT.

THE death of John Bright occurred Third month 27. His funeral took place from his home, "One Ash," at Rochdale, on the 30th. It was at the Friends' burying-ground and the whole proceeding was substantially according to Friends' views, this being according to his desire. A dispatch from London says:

Crowds of people lined the route of the procession from "One Ash," Mr. Bright's home near Rochdale, to the cemetery. Among those present were Joseph Chamberlain, Sir Wilfrid Lawson, Jesse Collings, Arnold Morley, William Rathbone and General H. Lynedoch Gardiner, C. B., Esquire in Ordinary to Queen Victoria, who represented Her Majesty.

A number of deputations headed the procession. Fifteen carriages containing mourners followed the hearse. Eight of Mr. Bright's workmen carried the coffin to the hearse, and from the hearse to the grave. When the coffin was deposited in the grave the mourners gathered around in silent meditation, according to the custom of the Friends, to which sect Mr. Bright belonged. The Dean of Founders College afterward delivered an oration. He spoke of Mr. Bright as a man of great simplicity, who did not attribute his talents to his own efforts, but considered them gifts from God.

Four wreaths remained on the coffin when it was lowered into the grave. One was sent from Biarritz by Queen Victoria. Attached to it was Her Majesty's autograph. Another from the Prince and Princess of Wales, with a card bearing the words: "As a mark of respect." The third was from Mr. Bright's work-people, and the fourth from Miss Cobden. Attached to Miss Cobden's wreath was a card inscribed: "In loving memory of my father's best friend."

RAILWAY RELIEF ASSOCIATIONS.

SEEING as we do the many lines in the country grouped into large systems whose ownership will no doubt remain stable in years to come, permanence of employment and stability of position is easy to be guaranteed and the corporations can now better secure their own rights and strengthen themselves against the encroachments of the public by drawing their employés more closely to them, showing that paternal care and solicitude for them which tend to establish good feeling and community of interest.

Relief associations under the guidance of the companies will do this. They are flourishing on the Baltimore & Ohio and the Pennsylvania railroads. The organizations on those roads may be taken as the type of what other companies should do. On the former, the scheme originated with the elder Garrett nearly ten years ago. At its organization all employés could join without regard to age. After a short period those over forty-five years and those who could not pass a medical examination were not allowed to join. All persons employed regularly by the company are required to pass a medical examination, must be under forty-five years of age, and must join the relief association. Thus it will be seen that nearly all their employés are members. The compulsory feature looks to an outsider like a hardship, but the obligation is on him only who seeks employment.

The employés are divided into two classes—hazardous and non-hazardous; and these two classes are divided into five others who pay into a fund certain fixed sums each month, according to the amount of wages regularly received. Benefits are paid in weekly indemnities in cases of sickness and disablements, and a gross sum to the beneficiary when death occurs. They vary according to the amount contributed. Free medical and surgical attendance is given; hospitals are established; physicians are appointed at convenient points on the line. The company has contributed \$100,000, the interest on which at six per cent. goes into the fund yearly. It also puts \$25,000 per year into a superannuation fund. A building loan association has also been formed, which has become quite popular.

There are many other liberal features, of which limited space will not permit an enumeration.

The Pennsylvania Railroad Company has also adopted a system of relief similar to that of the Baltimore & Ohio, but not so extensive. It is entirely voluntary, and numbers over 20,000. It rapidly increases in popularity as its benefits become more appreciated.

In both companies the employés are rapidly leaving the local benevolent associations; they find they can insure themselves with the aid of a solvent and powerful company for much less money than in the thousand and one local lodges whose solvency depends on the honesty of a secretary or a treasurer.

Other systems of relief, but to a minor extent, have been adopted by railway companies—notably free hospital service for the sick and disabled upon the Santa Fé and Missouri Pacific, all of which materially lessen the number of claims for damages and subsequent costly trials and judgments in the courts.

PROGRESS IN JAPAN.

LATE advices from this far-off island Empire have been of the most interesting character. At the festival which is annually held in Second month to commemorate the establishment of the Empire, the nation was given a written constitution which is said to be the first that an Asiatic emperor of his own will has granted to his people. The date of the Empire goes back 660 years before the Christian era.

The ceremonies connected with this important event took place in the new palace at Tokio. The Emperor and Empress sat side by side in the throne-room with the members of the royal family, Ministers of State, and other dignitaries gathered from all parts of the nation to take part in the general gladness of the occasion.

The first ceremony was the act of worship performed at the cenotaphs of his ancestors, in the Sanctuary of the palace. After the worship the Emperor "read his speech in a clear, strong voice," then handed the constitution to the Prime minister, and the royal party left the room.

In the procession which moved to the parade ground outside the city, the Emperor and Empress rode side by side. The school children were formed in line to meet and welcome the royal party on their return, with song and banners and demonstrations of gladness. While the crowd was immense, it is said to have been more quiet than such a surging mass of humanity in our western cities. The Japanese have not yet learned our noisy way of showing enthusiasm.

The Constitution provides for a House of Peers and a House of Commons. The right of suffrage is given to all men of the age of twenty-five years and over who pay taxes to the amount of twenty-five dollars yearly. Liberty of religion, freedom of speech, and the right of public meeting are established. Parliament is to possess legislative functions, and the control of the finances under limitations. The date of the assembling of the first Parliament is fixed for next year, and it is declared that the Constitution shall go into effect at the same time.

If one should give me a dish of sand, and tell me there were particles of iron in it, I might look for them with my eyes, and search for them with my clumsy fingers, and be unable to detect them; but let me take a magnet and sweep though it, and how would it draw to itself the almost invisible particles by the mere power of attraction! The unthankful heart, like my fingers in the sand, discovers no mercies; but let the thankful heart sweep through the day, and as the magnet finds the iron, so it will find in every hour some heavenly blessing; only the iron in God's sand is gold.—*Becher.*

THE disciples could bring help according to the need of those to whom they went as Christ's representatives. Every representative of Christ can do as much as that to day—in the power of Christ. And that is the mission of the disciples of Christ.

CLIMBING MOUNT ST. ELIAS.

THOUGH by no means the highest mountain in the world by actual measurement, yet Mt. St. Elias probably appears as large as, if not larger than, any other, for it is plainly visible from the sea throughout its entire height of eighteen or nineteen thousand feet, though situated from forty to fifty miles inland. The Swiss mountains, which are all under sixteen thousand feet, are generally seen from elevations varying from four to eight thousand feet, while in the Himalayas the plane of observation is considerably higher. It is certainly true that, with the possible exception of Mt. Wrangel, about which little is known, Mt. St. Elias presents the greatest snow climb of all the mountains in the world, on account of the low point to which the line of perpetual snow descends in these northerly regions. Beside St. Elias such mountains as Cook and Vancouver sank into insignificance. . . .

The southwestern face of St. Elias, it is safe to say, will never be climbed; it presents a mass of broken snow, beautiful, yet forbidding. We estimated the summit to be about 7,000 feet above us, making its total height 18,500 feet. It seemed to us that the Coast Survey, giving it 19,500 feet, was two liberal in its figures.

The day was cloudless; the whole scene was one that baffles description. It surpassed in grandeur though not in picturesqueness the very best that the Alps can offer. Roughly speaking, the eye encountered for miles nothing but snow and ice. I had never before thoroughly realized the vastness of the Alaskan glaciers, though during the past fortnight we had spent many a weary hour in crossing immense moraines. One of the glaciers we looked down upon was not less than sixty miles long, while another attained a breadth of twenty five or thirty miles.

From below I had gained the impression that ice covered with *débris* predominated over white ice. I now saw that this was not the case, and that the ratio of *débris* to clear ice was probably not greater than that of one to ten. When standing at a considerable height one appreciates for the first time the beautiful curves through which the glaciers alter their course. We noticed this in particular in looking down upon the Agassiz Glacier. It appeared at one point to describe three or four arcs of concentric circles with radii varying from eight to ten miles, each one being indicated by a light coating of stones, the whole resembling an immense race-course. Through the Tyndall Glacier, and for a distance of several miles, two light streaks of moraine ran parallel to each other, presenting from above the appearance of a huge serpent crawling the length of the glacier.—*William Williams, in Scribner's Magazine.*

THERE are men who pray without ceasing; that is, they keep in the presence of God, so that they can speak with him at any moment. To such a man prayer is the almost unconscious breathing of the soul. . . . The prayerful man whether he works or prays, or travels, will feel beside him the solemn and sweet presence of God.—*R. S. Barrett.*

OKLAHOMA.

I. N. CUNDALL, late Principal of the Worcester Indian Academy at Vinita, Indian Territory, says in a letter to the Milwaukee *Wisconsin* :

Oklahoma proper was originally intended for the use of tribes of friendly Indians. It contains about 1,987,905 acres. Its east line is the 96th meridian, the extension of which northward to the Kansas line forms the boundary between the lands of the Cherokee nation proper and the famous "Cherokee Strip" or "Cherokee Outlet," which outlet extends westward 4 degrees to the 100th meridian, or to the west line of Kansas and of Texas. The Cherokee Strip, therefore, is to extend about 60 by 280 miles and adjoins Oklahoma on the north. This strip is included in the Springer bill. It has been leased for a number of years by the Cherokee nation to the "Cherokee Strip Live Stock Syndicate" for \$100,000 per year. This strip has recently, and in the face of the formal protest of the Government been leased again to the same company for \$175,000, payable semi-annually. It is splendidly watered by streams, well timbered along the rivers, the lands are rich and rolling, furnishing verdure of luxuriant quality and growth, rendering it as a stock raising country unsurpassed.

When the line was run settling the northern boundary of Texas and the southern boundary of Kansas, by some strange happening a narrow strip of public domain containing 3,700,000 acres, or 5,781 square miles lying directly west of the Cherokee Strip was left out and has been ever since known as "No Man's Land." It is a valuable country. Seven thousand people live there with no law but lynch law, and the demands of the knife and rifle. The strip is also included in the Springer bill; and these three divisions of land, Oklahoma proper, the "Cherokee Strip," and "No Man's Land," are to constitute the new territory, Oklahoma. After providing for the Indians in severalty, it will furnish 150,000 farms, a farming population of 750,000, which with the natural dependent city and village population indicates a prospective state little less than the size of Ohio, with 1,500,000 inhabitants, equal to the great State of Kansas.

But a grave question of morals and right comes up and stands squarely in the way. The Indian Territory has a population of 70,000, and an area of 68,991 square miles, or 44,154,240 acres, giving about 600 acres, or nearly a mile square, to every man, woman, and child in the Territory. This is manifestly many times more than they can use; nevertheless the land belongs to the Indians. The Choctaws and Creeks claim Oklahoma proper, and the Cherokees claim the Cherokee outlet. This tenure by which the Cherokees hold their lands, and direct from the government, is as strong as form and words can make it, "as long as grass grows and water runs," I have heard repeated over and over again in the Cherokee homes as the words of the treaty on the pledge of which they commenced their tragic exodus from Georgia.

* *

Nor speculation, nor emotion, but conscience is the true foundation of the higher life.—*J. H. Allen.*

PAGANISM IN GREAT CITIES.

In the course of a recent sermon on the evangelization of New York, R. Heber Newtown said:

The churches have been converted to the paganism of political economy; unless the clergy look sharp they will find that they have accepted retainers from capital—their position—and their lips are silenced when labor pitiously cries for justice. No word against the root evils of our industrial system is spoken from hosts of the pulpits, whence the carpenter's son has been driven by Mammon. The poor man hears the Gospel of "property, property, property!" Charity is preached, but not justice, and it is not charity, but justice, that the world needs. If the ethical forces of the church were turned on these problems some solution would soon be found. The failure to find a solution is a terrible indictment of Christianity. As a class, the very poor here are as irreligious as the very rich, and we are gravitating into a city of the extremes. We have two dangerous classes to contend with. Is it any wonder that religion seems disappointing in the gulf where a prosperous and a virtuous middle class has gone down? If we can convert the rich I have no fear about the poor. When their big brothers on earth are brotherly they will believe in a Father in Heaven. It is high time for our rich men to remember that a city which loses its religion will not keep its wealth. Property then had better be put again into diamonds. Real estate in a Sodom is liable to a sudden shrinkage.

CABBAGE IN HALF AN HOUR.

For the benefit of the mothers who may think either I or the cooking school have gone astray on the matter of cooking cabbage, I want to emphasize here the advantage of the new way over the old. I was as sceptical over the notion of cabbage being properly cooked in half an hour, as any of you can be; but my first experiment corrected me, and all who tasted this maligned vegetable served after the new method declared themselves surprised.

Have plenty of salted, boiling water, in which a teaspoonful of soda has been dissolved, plunge the cabbage in, top downward, leave it uncovered and let it boil until tender, that will be, as given in the time-table, from twenty minutes to half an hour. Take it out in a colander, drain well, put into a hot dish, put in bits of butter, some salt and pepper, and serve at once. It will be as delicate as cauliflower; the color will be retained and there will not be an unpleasant odor over the house, such as is always associated with boiling cabbage. Try it once, and then see if the School Kitchen Learning has not gotten several steps in advance of your old, traditional methods.—*Sallie Joy White, in Wide Awake.*

. . . THE greatest battle of life is the one that we have to fight with the evil tendencies of our own hearts; and the greatest victory that we can possibly win consists in the conquest of these tendencies. "He that ruleth his spirit" is greater "than he that taketh a city." (Prov. xvi: 32.)

NEWS AND OTHER GLEANINGS.

—Alvan S. Clark, the telescope builder, is going to build a forty-inch telescope for the University of Southern California. He makes some interesting statements of the difficulties and care of lens-marking. The disks are made in France. The principal work of shaping the lenses is done by hand, no machinery being accurate enough. The focal curves have to be so accurate that every ray of light from a star which strikes the telescope must pass through four surfaces and have its course so changed by refraction that it will meet every other ray in a point no larger than the cross section of a fine needle.—*N. Y. World.*

—At the recent session of the Wilmington, Del., Methodist Episcopal Conference, Presiding Elder Ayres of the Salisbury district reported that the church members under his jurisdiction spent every year for tobacco, money enough to pay all the running expenses of the churches five times over.

—Captain Platt, of the United States Fish Commission steamer, at Charlotte Harbor, Florida, has successfully hatched 3,500,000 eggs of the sheepshead. This is said to be the first successful hatching of that important food fish.

—In reference to the question whether the Greeks tinted their statues, a correspondent of *London Notes and Queries* says there is not least doubt that the answer must be in the affirmative. There is the amplest evidence of the fact that the sculptures of the Parthenon—at least some of them—were tinted, but they were not painted with solid paint, like the statues in the Crystal Palace. Architecture and sculpture were often tinted, not alone by the Greeks, but by the Etruscans, Assyrians, and Egyptians. Colored statuary abounded in the Middle Ages, as any one may see for himself who examines mediæval monuments.

—An idea of the wonderful growth of trees in the fertile soil of California—a growth which seems almost fabulous to persons living in less favored regions—can be gathered from this paragraph printed in a recent issue of the *Pacific Rural Press*: "A fig-tree, planted in 1874, has a top 30 feet high by 30 feet through, with a trunk 5 feet 7 inches in circumference at the smallest part, which is two feet from the ground. A California walnut (*Juglans Californica*), planted in 1882, is 25 feet high, with a head 25 feet through, and a trunk diameter of 12 inches. An English walnut, planted in 1884, is 16 feet high, with a trunk 6½ inches in diameter. The trees are in Antelope Valley, in Colusa county, and have not been irrigated.

—In the House of Lords, of the English Parliament, on the 28th inst., the Marquis of Salisbury, "Premier" of the present (Tory) Government, alluded to the death of John Bright. He said, among other things: "He had special qualities, for which he will be admired and noted in history. He was the greatest master of English oratory in the present generation, the eloquence of his style giving fitting expression to his burning, noble thoughts. He possessed a singular rectitude of character. He was inspired by pure patriotism from the beginning of his career to its close."

—"The most difficult feature of the Nicaragua Canal," says W. L. Merry, one of the engineers who have examined the proposed route, "is the restoration of the harbor at Greytown, which has been destroyed by a silt deposit from the San Juan river. It is not more difficult, however, than was the construction of a harbor at Port Said, and the work will resemble it in character. The method of restoration favored by the United States engineers is the diversion of the lower San Juan into the Colorado branch, which already carries to the ocean eleven-

twelfths of the volume of the river. This can easily be affected, and once the harbor is isolated, it is intended to dredge it, and run a breakwater 3,000 feet into the Caribbean. The soil is volcanic sand, easily handled, but difficult to locate permanently."

—The library of Baltimore Friends, in the pleasant library room, at the new meeting-house, numbers 2,500 volumes, which are placed in the cases previously used at Lombard street. In the same room, on a central panel, has been placed a very appropriate picture, the gift of the artist, Charles Yardley Turner, a member of Baltimore Monthly Meeting, but now living in New York City. It is a large sketch in charcoal. The subject is "After Meeting." A young woman is walking cheerily from the meeting-house on the snow-covered ground, having by the hand a little girl of six years. The execution is admirable, and the faces of the two are very charming, whilst the scene reaches at once to the heart of the beholder. The picture has been generously donated to the Library, which it now graces, by the artist, in remembrance of his boyhood days in Baltimore, and in honor of his excellent and widely known grandmother, Rebecca Turner, deceased.

—One of the grandest works ever undertaken by our Government was the establishment, in 1871, of what is called the Life-Saving Service, under Hon. S. I. Kimball, for the rescue of ship-wrecked men and vessels. There are now 226 of these stations, of which 173 are on the Atlantic coast. Last year over 700 lives and nearly \$8,000,000 worth of property were saved. Some of the most heroic deeds in history are recorded of the men who engage in this perilous work. For real bravery what could exceed that fierce fight with the wind and the waves along Nantasket Beach, when twenty-eight lives were snatched from the fiery jaws of death?—*Advocate of Peace and Arbitration.*

CURRENT EVENTS.

News was received on the 30th ult., that a terrible hurricane had swept the harbor at Apia, in the Samoa Islands, on the 15th. Six war ships were wrecked, three belonging to the United States, and three to Germany. Two of these may possibly be saved, in a damaged condition; the others are a total loss. On the American vessels fifty lives were lost, including four officers; on the German, ninety-six were lost. The harbor is small, and is exposed to such storms, while the bottom is such that the anchors will not hold. Details of the disaster were received at Washington, on the 30th ult., from Admiral Kimberly, who commanded the American ships.

ROBERT T. LINCOLN, of Chicago, son of Abraham Lincoln, has been appointed by President Harrison to be Minister to England. Allen Thorndyke Rice, proprietor of the *North American Review*, has been appointed Minister to Russia.

EX-PRESIDENT CLEVELAND and his party have returned to this country from their trip to Cuba.

A LONG letter from Henry M. Stanley, the African explorer, has been received in England, and has been published. It was written in Tenth month last, and describes the journeys of his expedition for the relief of Emin Pacha, in much detail, beginning in Sixth month, 1887.

THE extra session of the United States Senate closed on the 2d instant, that body adjourning *sine die*. Unless the President should call an extra session, Congress will not sit again until Twelfth month next.

THE hurricane in the South Pacific Ocean, (which destroyed the ships at Apia), swept over 1,200 geographical miles, embracing in its track the Hervey and Society

groups of islands. The American ship *Red Cross*, from New South Wales for San Francisco, was driven ashore at Raratonga and wrecked. The crew was saved. The American ship *Ada Owen* was wrecked at Ouara. Her crew was saved. Wrecked from the British ship *Suckin*, from New South Wales for San Francisco, was seen at Aitutaki. It is supposed that the crew perished.

NOTICES.

. The Joint Committee on Temperance and Intoxicating Beverages of Philadelphia Yearly Meeting of Friends, will meet at Race street meeting-house, Philadelphia, on Seventh-day, Fourth month 13th, 1889, at 11 a. m.

The Standing Sub-Committees meet on the same days at 10 a. m. Book Committee in Race Street Parlor. Committee on Education and Publication, in the meeting-house. Committee on Legislation, in room No. 4. Visiting Committee in room No. 1.

JAMES H. ATKINSON, } Clerks.
ANNIE C. DORLAND, }

. Friends Charity Fuel Association will hold its concluding meeting for the season this (Seventh-day) evening, in Parlor 1520 Race street, at 8 o'clock.

WM. HEACOCK, Clerk.

. Circular Meetings in Fourth month occur as follows:

7. Frankford, Phila., 3 p. m.
7. Providence, Pa., 3 p. m.
14. Roaring Creek, Pa., 2 p. m.
21. Chestnut Ridge, Pa.

. The regular meeting of Young Friends' Association

will be held in the Parlor at 15th and Race streets on Second-day evening, Fourth mo. 8th, at 8 o'clock. All who are interested in the purposes and aims of the Association are invited to attend.

. Concord First-day School will be held at Chester, on Seventh-day, Fourth month 20th, commencing at 10 a. m.

All interested are earnestly invited to be present.

EDWIN J. DURNALL, } Clerks.
MARY YARNALL, }

. The next meeting of the Salem First-day School Union will be held in the Friends' meeting-house, Woodstown, on the second Seventh-day of the Fourth month, (Fourth month 13th, 1889), at 10 o'clock a. m. All are invited.

RICHMAN COLES, } Clerks.
LOUELLA WADDINGTON, }

. Circular meetings have been appointed by the Western Quarterly Meetings as follows: Hockessin in the Fourth month.

To convene on the second First-day of each month respectively, at 2 o'clock p. m.

. The Penn Sewing School held in Race street meeting-house will close its present session on Seventh-day, Third month 30th, at 10 o'clock a. m. It is proposed to make this an Anniversary meeting, twenty years having passed since the school was started. The attendance of former officers, teachers, and friends of the school is desired.

ANNIE C. DORLAND, Secretary.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER Co., 106 Wall-st., N. Y.

THE TRUTH.

FRIEND, though thy soul should burn thee, yet be still.
Thoughts were not meant for strife, nor tongues for swords.

He that sees clear is gentlest of his words,
And that's not truth that bath the heart to kill.
The whole world's thought shall not one truth fulfil.

Dull in our age, and passionate in youth,
No mind of man hath found the perfect truth;
Nor shalt thou find it; therefore, friend, be still.

Watch and be still, nor hearken to the fool,
The babbler of consistency and rule:

Wisest is he who, never quite secure,
Changes his thoughts for better day by day:
To-morrow some new light will shine, be sure,
And thou shalt see thy thought another way.

—Archibald Lampman, in *Harper's Magazine*.

NOTES FROM PALESTINE.—VIII.

FROM DAMASCUS TO BA 'ALBEC—RUINS OF THE CITY
OF THE SUN—LEBANON AND ANTI-LEBANON
RANGES—BEYROUT.

We journeyed from Damascus to Ba 'albec on horseback, but carried no tents, depending upon accommodations to be found at inns and native houses on our route. Two servants attended us and our kind host in Damascus, the Doctor, again became our guide and trusty counsellor, seldom permitting us out of his sight. His manner in dealing with everyone was characterized by dignity and gentle courtesy. He spoke English indifferently and somewhat amused us by always calling us "dear," instead of using our names.

It is likely he had heard some American thus speak to his wife and thought it the usual way of addressing foreign ladies. We would not correct him, lest he should fear he had been obtrusive. "Please do not sleep on your horse, dear," he would plead as we journeyed, alluding to a bad habit of mine, consequently on early rising.

"Ah, but Doctor," I would remonstrate, "this horse knows me. He would not let me fall for the world." Indeed the Arabian horses seemed quite as intelligent as many of the people we met.

"But he might be startled, dear, and forget."

The Doctor himself rode a mule, and, when we were about to mount, summoned the entire household to the door to admire his beast, an animal more highly prized in the East than in the West. But, notwithstanding his rich trappings of velvet and silver, two of us from America looked upon him with dis-

trust. The Doctor was enveloped in a broad, white alpaca cape as a shield from the dust, and had thrown over his fez a gay, striped silk handkerchief, very becoming to his dark skin. We also used this Bedouin style of head dress, as a defense from the sun. The folds fell over the back of the neck which it is important to protect in hot countries.

Our way at first followed a carriage road amidst gardens and villas in the valley of the ancient Abana, now called by Arabs the Barada. A little distance from Damascus is the beautiful estate of the Bedouin shekh, Migwel, left him by Lady Digby, an Englishwoman, whom he married and for whom he forsook his wives and tribe. Here or in the city he lived with his foreign wife until her death, when he became the heir of her large property.

The country was intersected by condnits. All of the rivers which water the plain of Damascus, flow into the Meadow Lakes, eighteen miles distant. They are a favorite resort of Bedouins during the spring and summer.

Riding up a valley between chalk hills, we emerged on the Plateau of Sahra, where the soldiers of Damascus are reviewed. This we crossed in an hour, leaving it to enter a beautiful glen, on whose cultivated terraces grew flourishing vineyards and orchards. Later the scenery became wild and rugged, some of the broken cliffs being 2,000 feet high. A rocky tunnel, which suddenly terminates, connects the two mountain villages of El-Ashrafiyeh and Bessima. Its purpose is not now known. Some suppose that it carried the waters of Fijeh to Damascus, others that it was constructed by Zenobia to conduct the same springs to Palmyra.

We had a breezy ride among the hills beyond Bessima, which is perched on the brink of a precipice above the Abana river, the valley below being filled with foliage. Then we descended into a pass of remarkable beauty, along the bank of the stream, bordered with poplar, walnut, apricot, apple, and cherry trees. It seemed indeed a fit approach to some fabled abode of the gods, and soon we came upon a venerable shrine, which was probably, in ancient days, dedicated to the river god. From a cavern beneath it bursts a foaming cataract, 30 feet wide and 3 or 4 feet deep, tumbling over blocks of stone and overshadowed by a shelving cliff. This is the famous Fountain of Fijeh sung by Oriental poets. It rushes over a rocky bed for eighty yards and then joins another stream to form the Abana. We ate our lunch beside this sparkling spring in the solemn shade of a grove of ancient trees which still enclose it. In the

vicinity are remains of parallel walls, 37 feet long and 6 feet thick, connected at the end by another wall. The village of El-Fijeh, beyond, contains about thirty houses.

In the afternoon we followed the windings of the stream by a road high above it on the mountain side. We found the remains of a small Greek temple near the village of Kef-el-Awamid. Beyond this we crossed the river on a bridge and reached the village of Suk, where we stopped for the night at a native hut. We slept on a mud floor in a room occupied by all members of the family, their guests, domestic animals, and various creatures not bidden. It is worth while, however, for the traveler, if not too fastidious, to subject himself to annoying experiences occasionally, for the sake of observing how other people live.

Suk occupies the site of the ancient Abila, the region about which was called Abilene, (Luke iii: i.) On the opposite bank of the river rise lofty cliffs containing rock tombs. One of these, nearly thirty feet long, is the reputed Tomb of Abel, claimed to be on the site of his murder. Adjacent are the ruins of a temple.

After leaving Suk, in the early morning, we still followed the Abana. We noticed portions of a Roman road hewn in the rock above us, with Latin inscriptions recording that it was built in the reigns of the emperors Marcus Aurelius and Lucius Verus by the legate Julius Verus, at the expense of the inhabitants of Abila. Finally the valley expanded into a plain and the stream became a waterfall. We approached the town of Zebedani amidst orchards and vineyards. Here a lively trade was going forward in garden produce.

Afterwards the scenery became less interesting and, while traversing the stony plain of Surghaya, the Doctor took out a newspaper to read. The rattling of a page, as he turned it, startled his mule, who, true to his nature in spite of his gay attire, threw his rider in a somersault over his head and landed him, without a second's warning, on a pile of rocks several feet in advance. Our Doctor unexpectedly became our patient. His knee was badly cut, though the bone was not injured. Fortunately we had arnica and linen bandages and my friend furnished a flannel covering from a breadth of her dress. It was impossible to continue the journey beyond the next village, where we found lodgings in a cottage. While our patient slept and I sat outside, by a brook, writing, the children of the town gathered around, watching me curiously, as if I had descended from another planet. The crowd increased until I had thirty or forty spectators, but when I arose to escape so much unsought attention, they ran likewise. Our accommodations at night were similar to those at Suk. I slept little from the necessity of guarding our provisions from the cats, that ran along the rafters, hunting up every hiding place, no matter how secure it seemed.

Fortunately the Doctor rested more soundly and was able the next day to mount his mule again, which he still insisted upon riding, though we begged him to take a horse. We climbed the Anti-Lebanon

mountains by a zig zag path, where forget-me-nots spangled the turf. The region was lonely, but occasionally we came to a well, about which a few mountaineers were chatting. The Doctor entertained us with an adventure which, on the same route, befell his father-in-law, an attorney of Damascus. He was attacked by robbers and when about to be despoiled of his possessions was opportunely rescued by the appearance of the Governor of Damascus with his retinue. The robbers fled. Several years after, his advice as an attorney was sought by one of these highwaymen. There was a silent recognition in the eyes of the two men when they met, but no allusion was ever made to the former encounter. The gentleman pleaded and won the case for his client.

Our interest in this story made us unaware of our nearness to the ruins of Ba 'albec, till a turn in the mountain road brought them unexpectedly into view on a plain below. They we paused speechless, overwhelmed by their majestic presence. They seemed the work of a race of Titans, speaking the language of past centuries. Their huge columns of yellowish stone, lifting themselves from the mass of ruins, stood out grandly against the sky. But it was only on near inspection that we comprehended the full magnitude of the temples. They were three in number. Some of the stones in the walls are said to be the largest ever used in architecture and placed at a height beyond the power of modern machinery to raise them. One block, 64 feet long, 13 feet high, and 13 feet thick, is 19 feet above the ground. Another, still lying in the ancient quarries, is 77 feet long. The columns are 60 feet high, with Corinthian capitals bordered with a frieze.

The temples at Ba 'albec, called from the worship to which they were consecrated by the Phœnicians, "The City of the Sun," were once counted among the wonders of the world. They suffered changes after the Greeks and Romans gained possession of them and other styles were incorporated into their architecture. Constantine erected a basilica in their midst. The Muslims converted them into fortresses and several earthquake shocks completed the destruction. Camels now feed in their empty, grass-grown spaces. But the traveler finds in their debris many a precious bit of sculpture, portions of some elaborate frieze, choice geometric designs, chiseled flowers which blossom in marble beauty even in the dust, and many hints of the splendor which once was here.

We visited the ruins in a heavy rain storm, clattering about in wooden pattens made for the peasants, as we had no rubbers. They were kept on by a strap passing over the instep and protected our feet better than our faces, for we tripped several times and fell.

Near Ba 'albec are the ruins of Ras-el-'Ain, now attractive only for their clear spring which, after winding capriciously amidst the gardens, is finally collected in a circular basin.

It still rained when we left Ba 'albec and crossed the treeless valley between the Lebanon and Anti-Lebanon ranges. The mountains were covered with

recent snows. As the rain fell with greater force, we stopped at a cottage to dry our clothing, where we were pled with questions by a young man of Lebanon, who was saving his money to come to America.

We rode through Zahléh, the largest town of Lebanon, after its lights were lit, and pushed on to the inn at Shtora for the night. Here, on the next morning, we parted with our kind friend, the Doctor. He returned to Damascus. We proceeded towards Beyrout, a day's ride, with our servants only. But I was again reminded of his thoughtfulness as we climbed the winding road to the Lebanon Pass. One of the boys who attended us occasionally ran before me and peered up into my face, an action unaccountable to me, until I discovered that the Doctor had charged him not to let me go to sleep on my horse.

On the summit of the Lebanon Pass we stood 5,000 feet above sea-level and looked down upon a magnificent prospect. In the distance were the blue Mediterranean and Beyrout on its shore, about us barren mountains which may once have been covered with cedars, on one hand a wild gorge called the Wady Hummana, and far below, a green valley sheltering a few villages, among them the little town where the poet Lamartine spent three or four months.

Beyrout was further than it looked. We were four or five hours in descending to the mulberry plantations and grove of pines which terminate its favorite drive. The city has a fine situation on a slight eminence overlooking a bay. It is a centre of missionary work, contains numerous schools supported by different religious denominations, excellent hospitals, a medical college, and many substantial buildings. Its commercial interests are thriving and vessels from many ports stop here. On one of these steamers we sailed for Constantinople.

CORA A. BENNESON.

For Friends' Intelligencer and Journal.

OBEEDIENCE.

THE beauty and simplicity of our quiet Quaker faith, is in nothing, perhaps, more apparent than in the teaching that our acceptance with our Heavenly Father is in proportion to our obedience to his requirements impressed on our minds; unquestioning, unqualified obedience, no matter what the requirement may be, whether so small a thing as to lay aside some trifling personal adornment, or so great as to be the ambassador of our Lord, and standing in the assembly of the people, deliver his message to them, or take words of comfort to some poor distressed soul. In either case it is the *obedience* that makes the *act* acceptable. Our neighbor may feel called to perform some service, the cheerful rendering of which as an act of obedience to plainly manifested duty, brings such peace and happiness to him, that I, noticing this happiness, without going below the surface to inquire into the *cause*, am induced to follow his example and perform a similar action in hope of similar blessed results. Alas! for my disappointment; instead of the blissful feeling anticipated by me and enjoyed by him, there is dissatisfaction, regret, uneasiness, and why? That particular duty was *his, not mine*, and it

was because of his *obedience*, not his *act*, that he was blessed. We are all enjoined to labor, but all are not given the same work to do; each has his own allotted sphere in the good husbandman's vineyard; some to eradicate the weeds, some to cultivate the soil; some to prune and train the tender vines and plants, some to harvest the grains; all working harmoniously, and each contributing his share towards the welfare of the whole. But should one wish to attempt another's work without being bidden to it, and without the proper qualifications for it, confusion would follow, and harmony be destroyed.

Herein lies the mistake often made; looking to see what our brother is doing, and trying to be like him, instead of keeping our eye single to the light of God within us, and being willing to follow it wherever it will lead us. "What is that to thee? follow thou me," might then very appropriately, be spoken to us. We need also to be careful that we be not bewildered by *apprehensions* of calls to duty, "for if the trumpet give an uncertain sound, who shall prepare himself to the battle?" and our Heavenly Father sends not forth his servants without full credentials. When we have a *living* desire to fill the whole measure of our duties to God and man, we may feel a surety that this desire will receive the blessing of Heaven; and ability and strength will be afforded to fulfill these duties, be they great or small, to the honor of him who has said, "To obey is better than sacrifice." How many have heard the call, "Put off thy ornaments, that I may know what to do with thee." Let all such carefully eye the pattern given on the mount, and keep within the restrictions which Truth, the internal monitor, imposes upon its followers, and peace will assuredly follow; for we are told in Holy Writ, "If we hearken to his voice, our peace will be as a river, and our righteousness as the waves of the sea." Our sojourn here is brief, even at the longest; our happiness in the next world, or stage of advancement, depends upon our progress in this world; and our happiness here is mainly governed by our obedience to Divine requirements. It is my firm conviction, that if we experience no happiness here for well-doing, vain will be our hope and expectation of a blissful hereafter; it behooves us, therefore, to be ever watchful; and having been made willing to be obedient workers in the cause of Truth, welcome it wherever we find it, because it is Truth, work for it because it is *Truth*; and giving our hearts to God's glorious work, cast no lingering look behind to the fleeting pleasures from which we have turned, but continue onward and upward ever; and new fields will be opened for us to labor in, higher duties will be given us to perform, greater powers will be bestowed on us, and in his name we will overcome all obstacles to advancement in the path of duty.

Holder, III.

ELIZABETH H. COALE.

IN the decline of life shame and grief are of short duration; whether it be that we bear easily what we have borne long; or that finding ourselves less regarded, we less regard others; or that we look with slight regard upon affliction, to which we know that the hand of death is about to put an end.—S. Johnson.

A THANKSGIVING.

Among the papers of James Nayler is this beautiful offering of thanksgiving, rich in imagery and tender in pathos. "It is in my heart to praise thee, Oh! my God. Let me never forget thee; what thou hast been to me in the night, by thy presence in the day of trial, when I was beset in darkness, when I was cast out as a wandering bird, when I was assaulted with strong temptations, then thy presence in secret did preserve me, and in a low state I felt near thee; when the floods swept me away, thou didst set a compass for them how far they should pass over; when my way was through the sea, and when I passed under the mountain, there wast thou present with me; when the weight of the hills was upon me, thou upheldest me, else I had sunk under the earth. When I was as one altogether helpless, when tribulation and anguish was upon me day and night, and the earth without foundation; when I went on the way of wrath, and passed by the gates of hell; when all comforts stood afar off, and he that is mine enemy had dominion; when I was cast into the pit, and was as one appointed to death; when I was between the mill-stones, and as one crushed with the weight of the adversary; as a father thou wast with me, and the rock of thy presence. When the mouths of lions roared against me, and fear took hold of my soul in the pit, then I called upon thee in the night, and my cries were strong before thee daily, who answerdest me from thy habitation, and deliverest me from thy dwelling-place; saying, I will set thee above all thy fears, and lift up thy feet above the head of oppression. I believed and was strengthened; and thy word was salvation. Thou didst fight on my part when I wrestled with death; and when darkness would have shut me up, then thy light shone about me, and thy banner was over my head; when my work was in the furnace, and as I was passed through the fire, by thee I was not consumed, though the flames ascended above my head. When I beheld the dreadful visions, and was among the fiery spirits, thy faith stayed me, else through fear I had fallen. I saw thee, and believed so the enemy could not prevail.

"When I look back to thy works I am astonished and see no end of thy praises; glory, glory to thee, saith my soul, and let my heart be ever filled with thanksgiving. Whilst thy works remain, they shall show forth thy power. Thou didst lay the foundation of the earth, and led me under the waters, and in the deep thou didst show me wonders, and thy forming of the world. By thy hand thou ledst me in safety, till thou showedst me the pillars of the earth: then did the heavens shower down; they were covered with darkness, and the powers thereof were shaken, and thy glory descended; thou fillest the lower parts of the earth with gladness, and the springs of the valleys were opened, and thy showers descended abundantly, so the earth was filled with virtue. Thou madest thy plant to spring, and the thirsty soul became as a watered garden, then didst thou lift me out of the pit, and set me forth in the sight of mine enemies. Thou proclaimedst liberty to the captive, and calledst my acquaintance near me:

they to whom I had been a wonder looked upon me, and in thy love I obtained favor in those who had forsaken me. Then did gladness swallow up sorrow, and I forsook all my troubles; and I said, how good is it that man be proved in the night, that he may know his folly, and that every mouth may become silent in thy hand, until thou makest man known to himself, and hast slain the boaster, and shewed him the vanity that vexeth thy spirit."

EDUCATIONAL.

EXAMINATION AND EDUCATION.¹

BY PRESIDENT E. H. MAGILL, SWARTHMORE COLLEGE.

The place which examinations should occupy in any system of education is a subject of great importance, and one which has, of late, deservedly claimed the serious attention of educators, both in this country and abroad. It is my purpose, in this paper, to give briefly my estimate of the educational value of examinations, and to offer some suggestions as to their improvement and amelioration. Let me say, then, in the outset, that studying for a thorough comprehensive knowledge of the subject in hand, and studying for any specific examination, are two operations of the mind entirely distinct and different from each other. The former necessarily includes wide and extensive reading upon all of the collateral points bearing more or less directly upon the subject, and so forms that habit of thorough and complete investigation, which is characteristic of profound scholarship in any department, and which cannot be too earnestly cultivated nor too early acquired. The latter, on the other hand, tends to narrow down and concentrate the attention upon such points as, from experience and observation, have been found most likely to be dwelt upon by the examiner. A great facility in answering specific sets of questions is thus acquired, which facility really represents no deep and thorough knowledge of the subject. These remarks apply with especial force when the examiner is a different person from the one who has given the instruction. This is, almost invariably, an error. No one can so well question students upon any subject as the one from whom the instruction has been received. If it be said that such persons, being generally more directly interested in the result, cannot be trusted to make the examination, the simple answer is that no one who cannot be thus trusted should ever have charge of the education of the young.

But should examinations of all kinds be given up because of the injurious effect upon the mind produced by studying especially to meet their demand? This by no means follows, as a proper modification of existing systems of examination will remove the difficulty. How, then, shall such examinations as are to be retained, be conducted to make them least objectionable, and productive of the best results? This is the plain and practical question that now presses upon the attention of educators everywhere.

First of all, then, let the rule be established that those who give the instruction shall themselves con-

¹Article in the American Supplement to the (London) *Nineteenth Century*, for Third month, 1889. (New York: L. Scott Publication Co.)

duct the examinations. This will necessitate the general adoption of the principle of promotion based upon certificates from all schools and institutions of learning, for admission to institutions of higher grade. Our colleges would thus admit to their classes, whenever practicable, by certificates of the heads of the Preparatory Schools. And this change has been found to work well in practice wherever it has had a fair trial. And why should it not, for who can so well know of the qualifications of the candidates as those instructors who have long met them daily in the class room, and by whom, therefore, they should be thoroughly understood? And how shall these instructors in the institutions of lower grade really determine the fitness of the candidates which they present for promotion? Here I shall probably differ from many of my fellow workers in the educational field. What is the real meaning of an *examination*? Is it not a process of finding out what *was not known before*? Now, if this be the case, why should an instructor burden his students with "final" examinations to ascertain what was known as well before as after the examination was held? What teacher, who is worthy of the name, does not know, at the end of the year, or the term, just which students of his classes deserve promotion, and which do not? This knowledge is acquired by quizzing before or after lectures; by recitations; by brief examinations held throughout the year; and by a general knowledge of the student necessarily acquired by daily contact in the class room. And these brief examinations should never be announced in advance, and should occur at quite frequent and irregular intervals. No opportunities should be given a student to *prepare* for any examination, further than the conscientious preparation of the advance and review lessons of the day may be said to be a preparation. Thus are the evils of a system of cramming at once and effectually obviated. The constant expectation of examinations, more or less extended, at irregular and unlooked-for intervals, would have an excellent effect upon the attention of students in their daily lectures and recitations; and also upon their attendance, where the vicious practice of voluntary attendance is introduced. I would then offer as a premium for faithful and earnest work during the year, exemption from all final examinations upon those subjects in which the student reached, in his regular record, a certain established percentage of excellence. What this percentage should be would depend upon the nature of the subject, and the manner in which the instruction had been given. And this "regular record" should be secured, not by a slavish system of marking every recitation, which is almost sure to take the best of the life out of the teaching, but it should be the result of frequent quizzing and the brief written examinations already referred to; with such occasional daily marking as may be deemed desirable. Students should always feel that they *may* be marked upon a specific recitation, at any time. No competent teacher will fail to see that a far more reliable result can be secured in this way than by any minute system of marking all of the daily written or oral work. Teachers thus freed from the fetters of the daily mathemat-

ical marking, and largely freed from the final examinations, would be at liberty to teach their *subjects*, in a large and liberal way; and would, themselves, make much more rapid development as instructors, and lay foundations of study and wide research that would prepare their students to become the profound scholars and thinkers of the next generation.

SCRIPTURE LESSON, No. 15.

FOURTH MONTH 21, 1889.

THE TWO GREAT COMMANDMENTS.

GOLDEN TEXT—"Love worketh no ill to his neighbor: love therefore is the fulfillment of the law."—Rom. 13 : 10.

READ Mark 12 : 28-34.

JESUS, at the close of each day, appears to have left Jerusalem and returned to Bethany, where he found loving welcome in the home of the two sisters Mary and Martha. Going back in the morning he continued his instructions to the multitudes who thronged to hear him. These discourses were delivered in the courts of the Temple that surrounded the central building, the most holy place, into which only the chosen ones of the priestly order, and from the tribe of Levi, were permitted to enter.

On this occasion both Pharisees and Sadducees had been asking many questions, trying to find from Jesus' own word some cause of accusation, but without success. The Sadducees who rejected the doctrine of a resurrection, had been silenced by the wisdom of his answers, and now one of the scribes queried with him about the commandments.

Jesus answered. The manner of the scribe and the interest he seems to have taken in the explanations Jesus had already given, gave evidence of a desire, on his part, to hear further, to which Jesus was willing to yield.

The Lord our God. The Lord is one. This was in accordance with all that Jesus had taught. The unity or oneness of God was the cardinal truth of the Hebrew faith, and in nothing was the Beloved Son more clear and explicit than in declaring this truth. He never claimed for his own union with God any other than a spiritual union, such in kind, but not in degree, as is shared with every true and faithful child of the Most High.

Thou shalt love thy neighbor. The duty of loving obedience to the Lord, who is one God,—the Being through whose bounty we receive every earthly good, and every faculty and endowment of mind and soul,—will, if faithfully performed, lead us to be kind and considerate of one another as sharers of his bounty. "He that loveth not his brother whom he hath seen, cannot love God whom he hath not seen." (1 John 4 : 20.)

We should always remember that the first great commandment is to love the Lord with all the heart, soul, mind, and strength. We must not love him equally with other things, but above all and beyond all. To love with all the heart is to rejoice in loving, not to give an unwilling devotion, if such a thing could be. With all the soul is with every particle of one's spiritual being, reserving nothing for self. With all the mind is with our best thoughts to think for

him—that is, set our minds to work to think for the cause of good in all possible ways. And to love him with all our strength is to love him in our actions, not only in our thoughts and feelings; love him outwardly as well as inwardly, and as earnestly as our natures will allow.

Like unto the first, but not quite equal to it, since the first, if fully obeyed, includes the second, is "Thou shalt love thy neighbor as thyself." "But we cannot love everybody," as a young girl once said to the writer, in First-day school. Nor can we, at first. But we can *try* to love God and our companions, and put away from us all thoughts and feelings that would lead us in the other direction. God is truly lovable, in every sense, and the better we come to know him the more we feel it so; people do not always seem worth liking, but there must be something lovable in everyone, which we can find if we will, for God loves us all, and what God loves cannot be all evil.

These two commandments cannot be separated; for how can any one love God whom he hath not seen, if he love not his neighbor whom he hath seen?

In the chapter from which to-day's reading is taken is shown how the different sects of the Jews,—the Pharisees, Sadducees, etc.,—were trying to catch Jesus by asking him questions. They were trying to find some fault in him so they might deliver him up to the rulers. But mark the power that was given him to answer them, and then to propound a question that none of them could answer.

MAKING A VINEYARD.

THERE is much interest attached to this subject, the vineyard being so frequently used in the Scripture to illustrate the care of our Heavenly Father over his human children, and their want of faithfulness to him.

The process of preparing the ground and planting the vines, with the care necessary to the perfection and preservation of the fruit, is very interestingly stated in a recent number of the *Sunday School Times*, from the pen of H. B. Tristram, a dignitary of the English Church.

He writes: The parable of the vineyard let out to husbandmen is full of minute touches beautifully illustrative of the agricultural methods and customs of the East,—methods and customs which remain unchanged to this day. Four operations are spoken of in the formation of a vineyard,—planting, hedging it, making a wine-press, and building a tower. Care and labor are bestowed on planting, such as are expended on no other crop. The vine is not cultivated on rich plains, or in the lowlands, but invariably on the hillsides, and generally with a southern aspect. The vine loves rocks and stones, and in the rich soil mingled with these it extends its roots for moisture to a great depth and an immense distance. Consequently the land must be thoroughly cleaned, all brushwood and other roots carefully extirpated; for the vine brooks no competitor in the soil. Another part of this preparatory operation is mentioned by Isaiah in the parallel parable (Isa. 5): He "gathered out the stones thereof." The hillsides are always thickly strewn with loose stones, which in that di-

mate are of the greatest use in preserving the moisture from evaporation under the sun's rays. But the larger stones in every vineyard are always gathered and heaped in long ridges at regular intervals, so as to give at a distance the appearance of long, parallel stone walls, which have crumbled through neglect. When the vineyards have perished, and the land has lain desolate for centuries, these ridges remain, attesting its ancient fertility. Nowhere is this more striking than in the deserted south country near Kadesh Barnea, so well-known to our Editor, and in the hills of Moab, in which the vine has long ceased to exist. The use of these ridges, over which the boughs are trailed, is to keep the bunches of grapes from the damp ground whilst ripening, and to aid the ripening process by the reflected heat from the stones. He "set a hedge about it." With the exception of the gardens close to the villages, the vineyards are the only enclosed plots, the corn-fields and oliveyards being always open, and the former only protected from trespass by the vigilance of the shepherds and herdsmen. The sheep and cattle are never left alone, or out in the fields, as with us, but from morning to night are under the watchful eye of the shepherd, as they roam on the hillsides for pasturage. "Dugged the winefat," or, rather, as Isaiah expresses it, "hewed;" for the winefat, or wine-press, was always in the vineyard itself, as the ripe grapes would not, without loss, bear carriage to any distance. I remember, in one day's exploration on Mount Carmel, discovering eleven of these wine-presses. A flat or gently sloping rock is selected. At the upper end, a trough is cut about three feet deep, and four and a half by three and a half feet in length and breadth. Just below this is hewn out a shallower trough, connected with the upper one by two or three small holes bored through the rock close to the bottom of the upper vat, so that when the grapes were pressed in it, the juice streamed into the lower vat. The last operation is the building a tower. This was not done invariably. In many of the smaller vineyards, and especially when near the village, the owner was content with "a booth that the keeper maketh,"—a sort of wicker-work erection of boughs, with an upper story, where the keeper could sit and guard the ripening crops from intruders, whether human or other, and especially from the jackals at night, "the little foxes, that spoil the vines." This erection only lasted for the season, and perished in winter. But in many cases we still find the ruins of the solidly built tower, which commanded a view of the whole enclosure, and was probably the permanent residence of the keeper through the summer and autumn.

We note, lastly, the mode of payment of rent. "At the season," the owner sends to receive of the fruit of the vineyard. To this day, rent in the East is paid in kind. The proportion varies, but it is a proportion agreed upon beforehand. It is more in the case of vineyards than in that of corn, because the expenditure of capital is greater and of labor less than in the latter. The first charge is the government tax, legally one-tenth, but often much more. Then to the proprietor generally one-half, but often

more for vineyards and olive-yards, and less for flocks and herds.

DUTIES OF FRIENDS AS CITIZENS.¹

HAVING been asked by a member of the Committee on Conference to prepare something to read before this body to-day, I accepted; and the question now claiming the earnest attention of all thinking people of our State has led me to a few thoughts upon the Duties of Friends as Citizens.

The history and teachings of Friends certainly lead us to a clear conception of the duties of citizenship and impel us to a conscientious performance of those duties. George Fox argued against unjust laws and illegal judicial decisions, with a clearness and courage perhaps surpassed by none. He lived in an age, however, in which he could have no voice in the making of laws; but Penn, in founding his colony for the oppressed among all peoples, gave to the citizens the law-making power; and to every man, and woman too, who believed in one Almighty God and paid a certain annual tax, he gave the right to vote. The very constitution of our Society and the manner of conducting our meetings, shows that we believe in a government by the people, and in the expression of individual opinion and conviction upon all important questions.

Yet, notwithstanding the teachings of history and the example of our Society, many Friends have, from time to time, refrained for various reasons, from voting and performing other duties of citizenship. Is this right? I think not. I think it is a mistake both morally and religiously. All will admit that we cannot live without municipal law. Laws must be made, interpreted, and enforced; and so there must be law makers, judges, and executive officers; and these legislators, judges, and other officers, and the work done by them will be good, bad, or indifferent according to the characters of the people who elect them and the principles embodied in the ballots cast. If, then, Friends and other good people refrain from participating in the affairs of government, they are neglecting a plain and imperative duty and leaving it in the hands of a class less fitted for it either in point of intelligence or honesty. Does not the material prosperity, the physical condition, the moral standing, and the religious and spiritual welfare of a people depend very largely on the character of their government? Are not voters responsible for the character of that government? By what possible argument can it be shown that they have no responsibility in this respect? If then the neighbor whom I am to love as myself is not only he whom I meet in daily intercourse, but also every citizen of this government however remote and however insignificant, for whom I am bound by that love to secure the best government possible, is not the duty of citizenship as much a religious duty as any other, and should we not perform it in the same spirit? I can conceive, therefore, of no circumstances under which the conscientious Friend can excuse himself from voting.

He is not bound religiously or morally to any can-

didate or to any party; but he is bound as a Christian man and a dutiful citizen to promote the cause of truth and right, and to speak for and to vote for that which he conceives to be best for his State and nation, and each and every citizen thereof. If the candidates or the principles of any existing party are such as he cannot approve, then is there the greater necessity of his coming forward boldly in behalf of such principles and candidates as his conscience does approve. To do otherwise is to yield the victory without a struggle to that which he pronounces wrong. To-day we all talk of and deplore political corruption and misgovernment, and yet how many of us there are who have either actively aided to bring it about or have failed to rebuke it by an opposing vote. It is time that all good people, Friends and others, should awaken to the fact that no act of life needs more earnest, prayerful consideration than the act of voting. A wrong action or a failure to act when duty demands it, injures sometimes the individual, sometimes the family, sometimes the people with whom we are brought into business relations; but the failure to express at the ballot box and elsewhere our earnest convictions on principles of government concerning the Commonwealth is an injury to the whole people. If we have no convictions upon any question demanding our suffrages, we should feel it our duty to study the question till we have; and then, we should act accordingly. If there can be an election without a principle involved which concerns the welfare of some human being, then may we be excused from voting; but I can think of nothing else which should clear us from condemnation for thus neglecting one of the highest Christian duties. I am not urging Friends to go into the turmoil and excitement of politics; I would have them keep out of them; but I would have them prayerfully consider their duties to the State, and manfully do them just as faithfully as they perform their duties to the meeting or to their families; for back of the home and back of the meeting stands the State as the guardian of both.

And now I want to add a few words in reference to the election to be held in Sixth month next. This is neither the time nor the place to speak upon the financial phase of that question. And there should be no need to speak of that anywhere or at any time to Friends or other Christian people. The man whose first question, concerning any measure proposed for the good of himself and his fellows, is, "How will it affect my pocketbook?" certainly is not a very strong pillar of the Church. His so-called religion is a marketable commodity, and he will, perhaps unwittingly, sell himself to the highest bidder. For us, therefore, the only question is, whether the saloon, the brewery, and the distillery are good or evil; whether they are a benefit or an injury to our people. In the coming election there are no parties, no politics, no candidates. There is properly, for good people, no question of policy or finance; but the simple question of right or wrong. To vote against the Amendment is to vote in aid of misery, of wretchedness, of crime; not to vote at all is to shirk a religious and moral duty, to sin by omission, to throw

¹An Essay read at the Conference, after meeting, at 15th and Race Sts., Philadelphia, Third month 31, 1889, by Samuel B. Carr.

your influence for the saloon and against the school, the home, and the Church; to vote for the Amendment is to vote for the removal of temptation, to vote for the salvation of the young, to vote for the cause of suffering womanhood and defrauded childhood. It is to vote as religion dictates, and as conscience approves; and, for this reason, that it is the cause of religion, as much so I believe as any subject that has ever been spoken of in this house, I have dared to bring it before you to-day. Let us all pray that God may give us wisdom to know the right, and courage to do it to the full extent of our ability without fear or faltering.

HARMONY IN WORK.

It is a rare thing for a person to be born into a condition or frame of mind that is not disturbed by the conflicting opinions and actions of those with whom he comes in contact in the daily routine of life, socially or in regularly organized work. We are so constituted that if possessed of any strength of character, the power to work, or to mingle together in perfect harmony, free from the personal feeling of self-assertion, is one of the attainments that is to be reached only through "watchfulness, prayer, and constant strivings against the corruptions of the heart and influence of circumstances."

In the varied intercourse of life, especially in that which brings us together in works for public or private good, there will arise variety of opinion amounting to what seems, and often is, opposition to ideas and methods of work that leads to discord and reveals weaknesses of character that are indeed trying; and it has been well said that the "power to see the good in the purposes and opinions of opponents, is a gift of grace that belongs only to the highest characters." When a number of individuals are gathered together and united in some worthy object for which all desire to labor, there is at once revealed the distinctive characteristics of each worker; either by the plans suggested, the spirit manifested in the carrying out of these, or in some way is revealed the hidden strength or weakness of every one. The small minds will insist on certain points of their own, or those of some one to whom they yield the supremacy of stronger thought, but the larger minded and more wisely developed characters

will evince a flexibility in the minor matters that will inquire into the needs, the ways, and the means of carrying forward the work, bending his personality to meet that which will result in the common good of all concerned.

Too often the frictions that arise in homes and in societies are the result of a too determined self-will, which provokes opposition and destroys harmony, when a frank acknowledgment of the equal right of all concerned to have a judgment, would lead to blessed results, to say nothing of the higher attainments to which the great apostle commends us, and towards which we should all strive, "to be tenderly affectioned one to another; in honor preferring one another."

Many are the ways to preserve peaceful relations in our work, and prominent amongst these are the cultivation of faith in each others' integrity, and the constant suppression of any suspicion of evil, keeping in full view always the prize at the end of the race to be run, rather than harping on the good or bad condition of the many roads leading thereto. In the strong words of another: "Broad, comprehensive minds, working intelligently, see the good in all, and seek to bring out and use that good. Small minds, working for personal glory or position, doubt the motives that move opponents, antagonize the good that is laid at their service, and the whole world suffers a loss through them."

THE articles contributed to our columns by Cora A. Benneson are concluded with this issue. From numerous expressions by readers, we infer that they have been of general interest.

THE friends of the Indian work, especially those concerned in the organization called the Indian Rights Association, have very earnestly urged upon President Harrison the retention in office of the present Commissioner of Indian Affairs, John H. Oberly. He was appointed a few months ago, and has made a very satisfactory officer. A letter sent to the President from this city and signed by a large number of persons interested in Indian work, says that he "favors the abolition of the spoils system in the Indian service, and the introduction of the merit system in its place, whereby men of character and ability may be appointed to places of trust among the Indians, irrespective of party affiliation, and be retained in service as long as they remain competent and faithful. Mr. Oberly's course, so far, has, in our judgment, proved the sincerity of his professions."

ALL skill ought to be exerted for universal good, every man has owed much to others, and ought to repay the kindness he has received.—*S. Johnson.*

DEATHS.

BIDDLE.—Fourth month 2d, 1889, at her late residence with her son-in-law, Howard F. Conrow, Germantown, Philadelphia, Charlotte H., widow of Israel Biddle, in her 59th year; a member of Upper Springfield, N. J., Monthly Meeting. Interment at Mansfield, N. J.

EVANS.—At her residence, Mount Auburn, Cincinnati, Ohio, on Third month, 24th, 1889, Mary Evans, widow of the late Jasou Evans, in the 74th year of her age; a member of Miami Monthly Meeting.

GAUNT.—At Mullica Hill, N. J., Fourth month 5th, 1889, Samuel Gaunt, in his 72d year; an elder of Pilesgrove Monthly Meeting.

IDDINGS.—Third-day, Fourth month 2d, 1889, in New York, George W., son of the late James and Frances H. Idings, and grandson of the late James Martin, of Philadelphia.

LLOYD.—At his home, Darby, Pa., Eleventh month 30th, 1888, Charles Lloyd, in his 78th year.

MANKIN.—At Woodbury, N. J., Third month 30th, 1889, Beulah Mankin, in her 84th year.

MUNDAY.—At Downey, Iowa, Third month 11th, 1889, Mary Emily Munday, wife of Samuel Munday, and daughter of Thomas E. and Ann Hogue, in her 38th year. She left a family of six children, the youngest an infant a few days old, the eldest a daughter 17 years. Her parents and husband survive her, and feel that her loss is beyond measure. She realized that she was soon to leave them, and called them all to her bedside, while she was yet able to speak to them. Took her infant in her arms, and expressed her concern for its future care. She calmly left instructions for her family, and bade them an individual farewell with a loving embrace. She was a kind, patient mother and wife, and loving daughter. She was much interested in their meeting and First-day school. Beloved by all who knew her—

"The blessing of her quiet life
Fell on us like the dew."

WALKER.—On Seventh-day, Third month 30th, 1889, in Philadelphia, Miriam K., daughter of Fannie and the late Wm. P. Walker, and grandchild of Havard Walker, of Chester Valley, aged 17 years. Interment at Valley Meeting grounds.

WOOLMAN.—Third month 30th, 1889, Martha B., wife of Daniel L. Woolman, of Vincenttown, N. J., in her 42d year.

Mary Mullin departed this life Third month 18th, 1889, in the 80th year of her age.

In a life that was so full of silent ministry to those who were permitted to be companions of this dear friend, and to those to whom she was not known personally, there is much to instruct. Nine years ago, from a very active life she became a confirmed invalid, her left side being entirely paralyzed. It seemed a cross almost greater than she could carry, but with patient perseverance she soon mastered a way in which her right hand might still be employed. By placing a piece of oil cloth over her lap so that the needle would not catch her dress, she would pin her work thereto and thus manage to do various kinds of sewing, though often discouraged, especially in threading the needle. But she mastered the many difficulties and during the nine years of her invalidism made over twenty-five bed quilts in addition to much other sewing.

She wrote frequent letters to distant relatives, always with the feeling it was only a "poor scribble," but to the

receivers they were very valuable. Truly can it be said of her she dwelt in the valley of humility, but ever did her sweet spirit minister strength unto all who came to mingle with her. She was fond of reading, and being somewhat isolated, found great comfort in her books.

The last two months of her life she suffered much and her earnest appeal was, "Oh, come Lord, loose these chains and let me go." And as we watched beside her, we could not doubt her realization of a "new heaven and a new earth."

M. H. F.

NEWS OF FRIENDS.

ISAAC WILSON AT SARATOGA.

ISAAC WILSON, of Canada, paid a visit in gospel love to Friends of Saratoga, and the call went forth to all those that were weary to come to the fountain of God's love that is ever flowing toward his children. On Second-day, 25th of Third month, by appointment, Friends and others gathered at Friends' meeting house in considerable numbers; and the greeting at the close of the meeting testified of his work. By invitation of members of the Methodist Church he held a meeting at their house in the evening, the congregation joining in the services, to the spiritual satisfaction of all. Also, on Third-day evening, by invitation of the Baptists, he held a meeting in their house, five miles distant. The following, in part, are among the many messages he had to leave with us:

Man is a spirit whether enveloped in the mortal or disrobed. It is essential that we give some thought to our advancement. Some think when we enter upon a spiritual life it is time enough to begin to consider it, "but all our to-days blend with to-morrows," consequently this life should blend with the life to come. In order to grow in spirit we must first divest ourselves of selfishness. I do not mean that we are to release our hold on material things. In order for the higher growth of the spirit we must first conquer those grosser things that belong to the physical bodies; overcome anger, avarice, ill-will, and all enmity and resentment for our fellow beings; devote a portion of the time to spiritual improvement. In doing this we shall be better prepared to enter the future. He spoke upon the work and worship of Jesus Christ. In the course of his discourse he urged upon all the necessity of divesting themselves of the conditions which have been thrown upon them by the power of other creeds, and examining the work of Jesus analyze his worship in the light of their clearest individual illumination. O! our Father, God, we thank thee for these sublime revelations through thy inspired messengers; and lo! these revelations are here and he who runs may not only read, but understand them. Eye hath not seen, nor ear heard, nor hath it entered into the heart of man to conceive of the things that God hath prepared for those who love him.

PHILIP S. DORLAND.

Dean's Corner, N. Y.

And if, through patient toil, we reach the land
Where tired feet, with sandals loose, may rest,
Where we shall clearly know and understand,
I think that we shall say, "God knew the best!"

—May Riley Smith.

COMMUNICATIONS.

SIGNING REMONSTRANCES AGAINST TAVERN
LICENSES.

Editors INTELLIGENCER AND JOURNAL:

IN the Book of Discipline of Philadelphia Yearly Meeting, the fourth Query asks, if Friends "are clear of signing applications for licenses to sell the same." And what a growth in the Truth it would be if all the yearly meetings could inquire into the condition of their members in this respect. But the question has come before me, whether those Friends who refuse to sign remonstrances against licenses are not as guilty as though they had signed the applications. When an evil exists, and no cry is made against it, are we clear of that evil? It is often said that "silence gives consent," and surely, if we do not use an effort to put a stop to wickedness, our silence will never do it.

The people of Pennsylvania are at this time very much interested in a Prohibitory Amendment to the State Constitution; but I do not intend this communication for the Friends of Pennsylvania only, but for Friends everywhere—wherever the sad and blighting effects of the intoxicating cup is seen. I do not like to take up the columns of the INTELLIGENCER AND JOURNAL with anything that does not concern all Friends. For, when a communication is of a local character, other Friends are deprived of something that might be to them as "good tidings."

Let me query of you, dear Friends, Are you clear of signing applications for licenses to sell intoxicants? Are you advancing the cause of Truth by signing remonstrances against the sale of the same?

GEO. J. WEBSTER.

TIRE D MOTHERS.

A LITTLE elbow leans upon your knee,
Your tired knee that has so much to bear;
A child's dear eyes are looking lovingly
From underneath a thatch of tangled hair.
Perhaps you do not heed the velvet touch
Of warm, moist fingers, folding yours so tight;
You do not prize this blessing overmuch,
You are almost too tired to pray to-night.

But it is blessedness! A year ago
I did not see it as I do to-day;
We are so dull and thankless—and too slow
To catch the sunshine till it slips away,
And now it seems surpassing strange to me,
That, while I wore the badge of motherhood,
I did not kiss more oft and tenderly
The little child that brought me only good.

And if, some night when you sit down to rest,
You miss this elbow from your tired knee—
This restless, curling head from off your breast,
This lisping tongue that chatters constantly;
If from your own the dimpled hands had slipped,
And ne'er would nestle in your palm again;
If the white feet into their grave had tripped,
I could not blame you for heartache then!

I wonder so that mothers over fret,
At little children clinging to their gown;
Or that the footprints, when the days are wet,
Are ever black enough to make them frown.

If I could find a little muddy boot,
Or cap, or jacket, on my chamber floor;
If I could kiss a rosy, restless foot,
And hear its patter in my home once more;

If I could mend a broken cart to-day
To-morrow make a kite to reach the sky—
There is no woman in God's world could say
She was more blissfully content than I.
But, ah! the dainty pillow next my own
Is never rumpled by a shining head;
My singing birdling from its nest is flown—
The little boy I used to kiss is dead!

THE PIGEON AND THE OWL.

THESE once was a Pigeon, as I have heard say,
Who wished to be wise;
She thought to herself: "I will go to the Owl,
Perhaps he'll advise;
And if all he tells me I carefully do
I'll surely get wisdom." Away then she flew.
When little Miss Pigeon arrived at the barn
She found the Owl there.
Most humbly she cooed out her wish; but the Owl
Did nothing but stare.
"Well, well!" thought Miss Pigeon, "of course I
can wait;
I won't interrupt him; his wisdom is great."
She waited and waited. At last the Owl blinked,
And deigned a remark:
"You'll never be wise, foolish Pigeon, unless
You stay in the dark,
And stretch your small eyes, and fly out in the
night,
And cry 'Hoo-hoo-hoo!' with all of your might."
So little Miss Pigeon to practise began;
But all she could do
Her eyes would not stretch, and her voice would
not change
Its soft, gentle coo;
And she caught a sad cold from the night's damp
and chill.
And, lacking the sunshine besides, she fell ill.
Then little Miss Pigeon gave up being wise:
"For, plainly," said she,
"Though owls are the wisest of birds, theirs is not
The wisdom for me;
So I'll be the very best Pigeon I can."
And what do you think? She grew wise on that
plan!

--Emilie Poulsson, in *Wide Awake*.

APRIL.

WHEN the warm sun, that brings
Seed-time and harvest, has returned again,
'Tis sweet to visit the still wood, where springs
The first flower of the plain.

I love the season well,
When forest glades are teeming with bright
forms,
Or dark and many-folded clouds foretell
The coming-in of storms.

From the earth's loosened mould
The sapling draws its sustenance, and thrives;
Though stricken to the heart with winter's
cold,
The drooping tree revives.

The softly-warbled song
Comes through the pleasant woods, and colored
wings
Are glancing in the golden sun, along
The forests openings.

And when bright sunset fills
The silver woods with light, the green slope
throws

Its shadows in the hollows of the hills.
And wide the upland glows.

And when the day is gone,
In the blue lake, the sky, o'erreaching far,
Is hollowed out, and the moon dips her horn,
And twinkles many a star.

Inverted in the tide
Stand the gray rocks, and trembling shadows
throw,

And the fair trees look over, side by side,
And see themselves below.

Sweet April, maun a thought
Is wedded unto thee, as hearts are wed;
Nor shall they fail, till, to its autumn brought,
Life's golden fruit is shed.

—H. W. Longfellow.

JOHN BRIGHT: BIOGRAPHICAL DETAILS.

JOHN BRIGHT had in his veins the blood of several generations of Non-conformists and Friends. The Brights were plain English people, who lived first in Wiltshire and afterwards in Coventry. They were peaceable, industrious tradespeople, connected with the Society of Friends and instinctively resisting the payment of Church rates. He was born at Greenbank, Rochdale, on November 16, 1811. His father had worked for years as a weaver for 6 shillings a week, but being sober and industrious was slowly making his way in the world. His mother was a tradesman's daughter and a woman of strong character, exercising great influence over her eleven children. Two years before John Bright was born, the father borrowed money from friends in Manchester, had taken an old mill and laid the foundation for the family fortune. The children had only a bare education. The boys were taken into the mill at fifteen and taught their father's business. They learned neither Latin nor Greek. At a school conducted by a Friend in Greenbank, and subsequently at larger schools in Townhead and in Yorkshire, John Bright was taught the elements of a plain English education. Later in life he confessed that it might have been wiser if his father had kept him longer at school, but at the time he found confinement irksome and was glad when he was allowed to go into his father's mill.

His first speech in public was heard in 1831, when he moved a vote of thanks to a popular lecturer who had been delivering a course in Rochdale on Eastern travel. Not long afterwards he made a speech on temperance which impressed the audience as both vigorous and brilliant. These earliest speeches were committed to memory, a practice which he speedily abandoned, as clumsy and debilitating. As time went on and he became interested in questions of the day, he formed the habit of holding rehearsals

in his father's mill before an audience of one, an intelligent workman, who was not sparing in criticism. But these juvenile efforts were of slight importance.

In the agitation against the Corn Law, Richard Cobden was the organizer and logician, and John Bright the orator. From 1841 to 1846 was the period of greatest activity, and the two labored side by side on the platform and in Parliament. His career in Parliament opened in 1843 when he succeeded in carrying by storm the Conservative stronghold of Durham, in the interest of the Anti-Corn Law agitators. In 1847 he was returned for Manchester without opposition and was reelected in 1852; but in 1857 he was defeated in consequence of his opposition to the Crimean war and to Lord Palmerston's policy in China. Birmingham gladly accepted him as its representative at a by-election in the autumn of the same year. The tie then formed could be broken by death alone. In 1882 his quarter-century of active political service was rounded out by a series of impressive demonstrations occupying the greater part of the week.

After his first speech in the House of Commons, his reputation rapidly improved and by the time Sir Robert Peel succeeded in carrying the abolition of the Corn Laws, he was considered one of the most eloquent debaters. Throughout the agitation he had boldly charged the land-owning class with deliberate selfishness in thwarting the wishes of the working classes. His frequent appearances on the platform before audiences of working people gave him the best practice he could have had in public speaking. He did not acquire Parliamentary mannerisms; he continued to speak plainly and to avoid rhetorical artifices and theatrical gestures; and his oratory retained that directness of purpose, simplicity of manner, and lucidity of thought which characterized it to the end. After the dissolution of the Anti-Corn Law League he ceased to be regarded as an agitator, and was acknowledged to be a leader with a great popular constituency behind him. His views of public questions broadened year by year; he began to advocate the lowering of the suffrage and the disestablishment of the Irish Church; and he became a moral force behind Mr. Gladstone in advancing Liberal measures of a progressive nature.

His defeat at Manchester in 1857 was the result of the manliest and most courageous act of his life. He had opposed the policy of the Government which led to the Crimean war, and had only succeeded in rendering himself very unpopular. His speeches at this time were among the noblest of his life. A more impressive passage than this it would be difficult to find in the memorials of modern eloquence:

"I do not suppose that your troops are to be beaten in actual conflict with the foe, or that they will be driven into the sea; but I am certain that many homes in England in which there now exists a fond hope that the distant one may return—many such homes may be rendered desolate when the next mail shall arrive. The Angel of Death has been abroad throughout the land; you may almost hear the beating of his wings. There is no one, as when the first-born was slain of old, to sprinkle with blood the lintel and the two sideposts of our doors that he may spare and pass on; he takes his victims from the

castle of the noble, the mansion of the wealthy, and the cottage of the poor and lowly, and it is on behalf of all these classes that I make this solemn appeal."

Lord Palmerston's flippant and contemptuous reply to Mr. Bright's impassioned appeals drew forth from Lord Macaulay a rebuke in private correspondence. But the war feeling in England was so strong that the orator was silenced. His health was greatly impaired and for two years he was compelled to withdraw from public life and to visit the Riviera, Algiers, and Italy. Undeterred by the opposition which he had excited by his course during the Crimea, he courageously espoused the cause of the North and of the slave in the American civil conflict at a time when the sympathies of the Government and of the upper and commercial classes were enlisted on the side of the Southern Confederacy. Profound as was his detestation of war, his abhorrence of slavery led him to pronounce the cause of the North a righteous one. His speeches in favor of the North at once appealed to the conscience of the great mass of the English people. One splendid passage Americans love to recall :

"The leaders of this revolt propose this monstrous thing—that over a territory forty times as large as England, the blight and curse of slavery shall be forever perpetuated. I cannot believe, for my part, that such a fate will befall that fair land, stricken though it now is with the ravages of war. I cannot believe that civilization in its journey with the sun will sink into endless night in order to gratify the ambition of the leaders of this revolt, who seek to

'Wade through slaughter to a throne
And shut the gates of mercy on mankind.'

I have another and a far brighter vision before my gaze. It may be but a vision, but I will cherish it. I see one vast confederation stretching from the frozen North in unbroken line to the glowing South, and from the wild billow of the Atlantic to the calmer waters of the Pacific main—and I see one people, and one language, and one law, and one faith, and all over that wide continent the home of freedom and a refuge for the oppressed of every race and of every clime."

John Bright became a member of the Reform Ministry formed by W. E. Gladstone in 1868. His place was President of the Board of Trade; he had declined to take the India Office, because he did not sympathize with the manner in which the English Government was carried on in India. This Administration ended in 1874. Again, in 1880, he became a member of the Government, as Chancellor of the Duchy of Lancaster,—a nominal place which made him a member of the Cabinet. He resigned, in 1882, on account of the bombardment of Alexandria, and the War in Egypt, (details of which were given in last week's INTELLIGENCE AND JOURNAL). He considered the use of force indefensible on moral grounds. "For forty years," he said, "I have told my countrymen that morals were the true basis of politics. I have denounced war, and I should have been false to my principles had I become a party to a war which was begun without necessity." He was well-satisfied to retire. His voice was already breaking under the weight of advancing years. Besides, he was weary of public life, and yearned for peace and quiet. "One's age," he once said, "should be tranquil, as one's childhood should be playful; hard

work at either extremity of existence seems to be out of place." During the closing years of his life he antagonized W. E. Gladstone's Home-Rule policy, and became one of the staunchest supporters of Lord Hartington and the Unionist policy. (His brother, Jacob Bright, and his son, W. Leatham Bright, took the Gladstonian, Home Rule side.)

"It is doubtful," says Justin McCarthy, "whether English public life ever produced a man who possessed more of the qualifications of a great orator than Mr. Bright. He had a commanding presence, a massive figure, a large head, a handsome and expressive face. His voice was powerful, resonant, clear, with a peculiar vibration in it which lent unspeaking effect to a passage of pathos or of scorn. His style of speaking was pure to austerity; it was stripped of all superfluous ornament. It never gushed or foamed. It never allowed itself to be mastered by passion. The first peculiarity that struck the listener was its superb self-restraint. He never, under the pressure of whatever emotion, shouted or stormed. The fire of his eloquence was a white heat, intense, consuming, but never sparkling or sputtering." He was heard at his best when his imagination illumined with a poetic glow the profound thoughts to which he was giving utterance. This is an excellent example of his greatest style in oratory :

"Suppose I stood at the foot of Vesuvius or Etna, and, seeing a hamlet or homestead planted on its slope, I said to the dwellers in that hamlet or in that homestead 'You see that vapor which ascends from the summit of the mountain; that vapor may become a dense black smoke that will obscure the sky. You see that trickling of lava from the crevices or fissures in the side of the mountain; that trickling of lava may become a river of fire. You hear that muttering in the bowels of the mountain; that muttering may become a bellowing thunder, the voice of a violent convulsion that may shake half a continent. You know that at your feet is the grave of great cities for which there is no resurrection, as history tells us that dynasties and aristocracies have passed away, and their name has been known no more forever.' If I say this to the dwellers upon the slope of the mountain, and if there comes hereafter a catastrophe which makes the world to shudder, am I responsible for that catastrophe? I did not build the mountain or fill it with explosive materials. I merely warned the men that they were in danger. So now, it is not I who am stimulating men to the violent pursuit of their acknowledged constitutional rights. We are merely about our lawful business, and you are the citizens of a country that calls itself free; yet you are citizens to whom is denied the greatest and first blessing of the Constitution under which you live."

John Bright in private life was a most genial and lovable man. His first wife was the daughter of Jonathan Priestman, of Newcastle-upon-Tyne, who made his home life at "One Ash," Rochdale, a very happy one. His first marriage occurred in 1839, and his second marriage in 1849, when the daughter of William Leatham, a Wakefield banker, became his wife. He was a most tender and devoted father, his children numbering eight. His home was one of the least ostentatious, yet pleasantest in England. Americans were always welcome there, Charles Sumner

having, perhaps, the freest entrance to it. He was an expert angler and was very fond of horses and dogs. His library was his favorite room. Surrounded there with his books and with a happy circle of children and grandchildren within call, he was one of the most contented men in England.

THE "BROOKS LAW" IN PENNSYLVANIA.

The question has been more or less debated whether under what is known as the "Brooks law," which has been in operation in Pennsylvania for about a year, there has been a material diminution of the evils of intemperance. Joshua L. Baily, a well known citizen of Philadelphia, active in the temperance cause, has issued a small pamphlet on the question presenting very calmly an interesting review of the subject. We make from it the extracts below. He says:

There is a wide-spread misapprehension in relation to the character and purpose, as well as to the results, of the so-called "Brooks High License Law of Pennsylvania."

This is a misnomer. The title of the act referred to is: "An act to restrain and regulate the sale of vinous and spirituous, malt or brewed liquors, or any admixture thereof." The framers of the act, knowing that it would not be possible summarily to abolish the legal license system of the State, sought to engraft upon that system such restraints as would reduce to a minimum the evils of the drink traffic. Restraint, and not license, was the purpose, and license only an unavoidable incident of the bill.

Before the passage of this act the license power was vested in the Judges of the Court of Quarter Sessions in all the counties of the State excepting Allegheny and Philadelphia, and with authority to refuse or grant at their discretion. The fee was \$50 in each of the counties excepting Allegheny, where it was \$300 for a full license and \$100 for beer only.

By the new law the discretionary power of the Judges was extended to all the counties alike, and the fee was fixed at \$500 in cities of the first, second, and third classes (which comprised Philadelphia, Pittsburgh and Allegheny), \$300 in all other cities, \$150 in boroughs, and \$75 in townships.

But the distinguishing characteristics of the new law were the restrictions, which were numerous and minute, not to say rigorous, and therein its vitality and effectiveness consist.

The act required that the applicant for license should be "a citizen of the United States," that he should be "of temperate habits and good moral character"—the sole and bona-fide proprietor of the saloon for which he sought a license, and having no interest directly or indirectly in any other. His petition should further state that the place to be licensed "is necessary for the accommodation of the public," and the act further provided that there should be annexed to the application a certificate signed by at least twelve reputable, qualified voters of the ward or township attesting to the truthfulness of the applicant's statements. It was also made a condition that the applicant should give as bondsmen two reputable freeholders residing in the ward,

borough, or township where the saloon was to be located, each owning real estate worth at least \$2,000 over and above all incumbrances, and qualifying in that amount, and that no manufacturer of liquors could have any interest in a saloon or be a saloon-keeper's bondsman.

These were some of the vital characteristics that made the law effective.

A very large proportion of those already holding licenses were neither native born nor naturalized, and a still larger number had at one time or another been convicted of crime, or were of such notoriously bad character that they knew it would be folly to apply for a renewal of their licenses; and a very considerable proportion of the remainder were unable to procure the necessary bondsmen.

Under the old law a brewer could be the virtual owner of any number of saloons. He had only to furnish the outfit, take a chattel mortgage, and bind his customer to purchase from him all his beer. One instance is reported of a brewer who was running no less than twenty three saloons in this way. Of course the new law broke up all this.

Conscious of their inability to meet the requirements of the law, a great number of saloon-keepers in various parts of the State failed to put in their applications for renewals of their licenses. There were more than 2,100 such cases in Philadelphia.

Mark, it was not the *price* of the license that deterred these from making application, although it is possible there may have been a few instances. Scores of brewers and distillers and wholesale dealers stood ready to pay the license fees and to be the bondsmen but for the prohibitions of the law.

But those who decided to apply for licenses had to undergo a proving and sifting still more severe at the hands of the Judges. One of the sections of the act provided that in addition to hearing the petition of the applicant for license the Court should also hear the petitions of remonstrants, and in all cases should refuse the licenses whenever in the opinion of the said Court (having due regard to the number and character of the petitioners for and against such application) such license was not necessary for the accommodation of the public and the entertainment of strangers and travelers, or that the applicant is not a fit person to whom such license should be granted.

Under the wholesome discretion thus granted the Courts, many applications were refused in different parts of the State, and over 2,000 were refused in Philadelphia alone. Mark, not shut out by the so-called "High License" (for the applicants had already shown their readiness to pay the license fee) but rejected under the restrictions and prohibitions of the law as applied at the discretion of the Court.

The whole number of licenses granted in Pennsylvania in 1887 was 14,704, and in 1888, 7,728, showing a reduction of 6,976, or nearly one-half. The reduction was as follows: in Philadelphia, 4,426; in Allegheny county, 1,660; in other counties, 890; total, 6,976.

The Brooks law took effect June 1, 1888. A great decrease in drunkenness and crime has been

looked for as a legitimate consequence of the great decrease in the number of saloons. What have been the results in other parts of the State is not known to the writer, but the following figures are clear as to the beneficial results in Philadelphia. The commitments to the Philadelphia County Prison from June 1, 1887, to March 1, 1888 (nine months), under the old law, were 21,603; from June 1, 1888, to March 1, 1889 (nine months) under the Brooks law, 13,727, a decrease of 7,876.

Commitments for intoxication during the same periods were: June 1, 1887, to March 1, 1888, 13,398; June to March 1, 1889, 6,889; a decrease of 6,509.

Commitments to the House of Correction were: June 1, 1887, to March 1, 1888, 4,570; June 1, 1888, to March 1, 1889, 3,835; a decrease of 785.

The diminution in the arrests for drunkenness and consequent commitments to the House of Correction and the County Prison, must be attributed, in large measure, to the strict enforcement of those provisions of the act which prohibit, under severe penalties, the opening of saloons on Sunday, and the sale to minors or persons visibly intoxicated. It is a source of sincere congratulation that Prohibition is enforced in Philadelphia on at least one day in seven—incontrovertible evidence that, to that extent at least, Prohibition does prohibit.

That there has been a diminution in drunkenness or in the consumption of liquors at all in proportion to the great decrease in the number of saloons, no one will venture to claim. Indeed, as to the diminution in the consumption of liquors, there is an entire absence of any proof. There has been a great increase in the bottling business and the sale of liquors by brewers and dealers to private families, and parties holding licenses are generally doing a greatly increased business, many of them having doubled their sales, and others having increased them many fold.

These are enjoying a monopoly, and there are few of them but would gladly pay an increased license fee rather than have that monopoly infringed. Whatever efforts have been made to have the law repealed, or essentially modified, came not from this favored class, but mostly from those who have been shut out of the business and desire to regain the license of which they have been deprived.

What have been the *net* results it is quite too soon to determine, but it must be apparent that whatever good has so far resulted from the execution of the law is to be attributed to its restraining and prohibitory features as applied by our able, conscientious, and courageous Judges, and that there is no ground whatever for the claim, which some have set up, that these good results have been reached through "High License."

The conclusion seems very natural and easily arrived at, that if the prohibitory features of a license law can be made effective to reduce by more than one-half the number of saloons in the State, prohibition without the license feature is the agency we should now invoke to close the remainder.

THE CHESTNUT TREE.

[*Forest Leaves* for April, a periodical published monthly in Philadelphia for the Pennsylvania Forestry Association contains a fine engraving of a mammoth chestnut tree at Northbrook, Chester county, with an interesting article descriptive of the chestnut, by Prof. J. T. Rothrock.]

In all the world there are, so far as I know, but two well-marked species of chestnut trees. Such, at least, is the conclusion of Benthham and Hooker in their great work on the "Genera of Plants." It is true, however, that in 1854 DeCandolle admits these two, but gives seven other varieties, and names four other species as doubtful. We should be adopting the latest view, and probably the most philosophical one, if we accept *two* as the number of species.

Our native form would then be known as *Castanea vulgaris*, variety, American, among the botanists. The other form we recognize as the Chinquapin, or *Castanea pumila*. We might call it the dwarf chestnut.

Taking our chestnut in its widest sense, the species is found in Central and Southern Europe and in the adjacent parts of Asia, including even China, as well as in North America from Southern Maine, south along the mountains into Alabama, and west to Indiana, Kentucky, and Tennessee. The varying forms which it assumes over this wide area are known as geographical varieties, and are sometimes so unlike as to have been regarded as distinct species. Thus we popularly speak of the Spanish chestnut and the Italian chestnut, but it appears, after all, that they belong to the same species as the one we find on our own hillsides.

No tree then can vary much more in appearance than the common chestnut does. One might also infer that it would have to be so in order that the tree might adapt itself to climates so unlike, and to soil and situations as diverse as those upon which it grows even in this State. Thus it flourishes on our flat, alluvial lands, but is also found as a native high up among our mountains, where, with the rock oak, it makes up the bulk of the forest.

Perhaps no tree responds more fairly to generous treatment than the chestnut. Contrast its smooth, rank, luxurious appearance as growing on fertile soil, with that which it presents among the rocks, where it is careworn, gnarled, and where its form tells us plainly as words could that life has been a struggle with it.

In size, the possibilities of the chestnut tree appear to be vast. Leave out of the question the celebrated tree on the slopes of Mount Etna, which is said to have a diameter of 83 feet, and near which there are others that are more than 35 feet through, the known maximum diameter in this country has exceeded 12 feet. Our illustration is of the specimen at Northbrook, Chester county, Pa., on the property of Mr. Abraham Marshall. At 3 feet above the ground it was 25 feet and 2 inches in girth when measured on Jan. 1st, 1889. Its appearance indicates that it is still in vigorous condition, and the quantity of last year's empty burrs on the ground proved that it is abundantly fruitful. It has been repeatedly struck by lightning, but shows hardly a trace of the scars

received in the unequal contest. Southeastern Pennsylvania may be called a region of large chestnut trees. At Ilorsham, Mr. Josiah W. Leeds measured a stump which was nine feet across. There are several other individuals in Chester county almost as large as the one we have illustrated, and one in Delaware county which is even larger around. Chestnut trees from five to six feet in diameter are quite common.

With all the range over which the chestnut tree spreads in Pennsylvania, from lowland to highland, it is singular how seldom it grows to a large size on limestone soil. Such at least has been my observation. If I am wrong, I shall be glad to be informed to the contrary. The trees will thrive amid sandstone rocks, or even in sandy soil. This has more than a mere scientific interest, for, if true, it may give a clue to the soil best adapted to chestnut culture.

All in all, we may consider the chestnut as among our most valuable trees. Its general hardiness, its rapid growth, its wide range of usefulness, and the ease and certainty with which one may obtain a second crop make it of first importance, if we consider it from the standpoint of the forester. But it has another value. I recently asked a friend, who had three chestnut trees in his yard, what value they were to him. He replied: "My youngest son gathers and sells on the average, from twelve to fifteen dollars' worth of fruit from them each year, besides what we eat, give away, and those that are carried off." Then, too, as an extraordinary instance of fruit bearing, we may well allude a second time to the tree, vouched for by Mr. Alfred Sharpless of West Chester, as having produced one season (when it was sixty-five years old) forty-eight dollars' worth of fruit, besides what was consumed by the family of the owner. When we remember these facts in connection with what we know of the value placed upon chestnuts as an article of food in southern Europe, it is certainly fair to assume that we will, ere long, come to look at chestnut trees as a source of food and that in estimating the value of the tree we will estimate its fruit bearing capacity. Indeed, we may safely suppose that before many years, here, as in Italy, chestnut trees will be cultivated as we do peach trees, simply for the fruit. This may appear at first sight not at all likely, but time will tell. Nay, more, we shall probably estimate in the near future some varieties of chestnut much more highly than others, because they will bring more in the market than others, according to size and flavor.

Out of 420 species of trees enumerated by Prof. Sargent in his census report for 1880, our chestnut stood well down on the list in weight, ranking as the 356th kind of tree; or, in absolute figures, having a specific gravity of 0.4504. To put its value in another way, it would rank as 247 in fuel value out of 420 species; in elasticity, as 152; in ultimate transverse strength, as 184. These figures come from the volume of Prof. Sargent, to which allusion has already been made. It should always be remembered that the sprouts from chestnut stumps do not last when exposed to the weather or soil, nearly so long as the

first growth timber does, and this should not be lost sight of in comparing the value of the two kinds of timber.

"ARBOR DAY" IN PENNSYLVANIA.

GOVERNOR BEAVER of Pennsylvania has issued a proclamation designating the 26th of Fourth month as Arbor Day. He says:

The brightening branches and swelling buds of our early deciduous trees warn us of the duty and the privilege of repairing the wastes of the present and providing for the wants of the future. The people of the Commonwealth have been in advance of the Executive in the thought of and preparation for our annual Arbor Day. It is pleasant thus to note the interest which has been and is being awakened upon this subject.

By the concurrent resolution of the Legislature approved the 30th day of March, 1887, the Governor is requested to appoint, annually, a day to be designated as Arbor Day in Pennsylvania, and to recommend by proclamation to the people, on the days named, the planting of trees and shrubbery in the public school grounds and along our public highways throughout the State.

This request is most cheerfully complied with, and in accordance therewith, Friday, the 26th day of April, 1889, is hereby designated and set apart as Arbor Day in Pennsylvania.

The planting of trees and shrubbery in our public school grounds and along our highways is earnestly recommended to our people. The subject of tree planting, however, has become so important in many ways that the Executive feels compelled to give wider scope, if possible, to the observance of Arbor Day, than is hereinbefore indicated. Public parks are being provided for in several of our cities and towns, through private munificence and public enterprise. In what way can the individual citizen of these several cities and towns better show his appreciation of and gratitude for these benefactions than by planting a tree, which shall not only manifest his appreciation but at the same time deepen the interest of himself and his family in a work which is so essentially for the public good? What better rallying point for the family in a public park than the tree of their own planting and nurture? What more beautiful tribute to the men who have so nobly provided for the health and happiness of future generations than such a mark of grateful appreciation on the part of the people of the several communities benefited? The places for such tree planting could be designated by the authorities in charge, and the results could not but be in many ways beneficial.

We have for several years been devoting our energies in many parts of the State to beautifying the grounds about our school buildings; let us give special heed in our coming Arbor Day to beautify our highways, both in town and country. Let us become a tree-planting Commonwealth. Let us plant trees which will grow into value and will be useful for the wood supply of the coming generation. The discouragements which have beset those who were interested in this subject heretofore in Pennsylvania

are being gradually removed. The encouragements are slowly multiplying. Whilst we teach the children, and hold pleasant converse in the school room over the beauty and usefulness of tree and shrub, let us give them practical lessons in the actual planting, which shall awaken their desire and determination to do likewise.

Would that our people could be impressed with the importance of this subject! Would that we could realize the great debt of obligation which we owe to the coming generations! We have drawn upon the century which has passed, have denuded our forests, have wasted our precious heritage, and seem to have little realization of the obligation which rests upon us to repair these wastes and to restore this heritage.

It may not be out of place for the Executive in this proclamation to carry the thought of our people beyond the school-grounds and parks and highways, and commend to all who are the owners of lands, which can be re-forested, the importance—yea, the necessity—of turning their attention to forestry as a means of profit to themselves and of incalculable benefit to the community in general.

Let our thoughts turn at once to preparation for the coming Arbor Day. Let trees be provided in advance. Let the citizens of our several communities consult together as to the species of trees suited to each locality likely to grow into what will be useful as well as ornamental. Let preliminary meetings be held to arrange for the details of the observance of Arbor Day, and let our roadsides welcome with smiling verdure the era of better roadways, which, we hope, is dawning in Pennsylvania.

For Friends' Intelligencer and Journal.

A CENTENARIAN IN EASTERN OHIO.

On the 1st of Fourth month, 1889, Ellis N. Johnson, of Mount Union, O. completed his one hundredth year. He was born in Washington Co., Pa., on Fourth month 1st, 1789, and is therefore just thirty days older than the United States Government. He emigrated to Ohio in 1809, when the country was an almost unbroken wilderness, and built a log cabin on the site of his present brick residence, in the village of Mount Union, (which is at the present time the 6th ward of the city of Alliance). He is a descendant of a family of Friends, has been a lifelong advocate of the temperance cause, and was an outspoken champion for the cause of the slave and was actively connected with a station of the "underground railroad," which was located in the vicinity. He enjoyed the acquaintance of Robert Fulton, the inventor of the steamboat, Neal Gillespie, grandfather of James G. Blaine, and some other prominent persons of those days. And has met with General Lafayette, Henry Clay, and Winfield Scott in different places, and has voted at all the Presidential elections since that of Thomas Jefferson. He was married twice, and was the father of fifteen children, ten of them still living, has had thirty-nine grandchildren, and eight great-grandchildren. His present wife was a school teacher, and gave to James G. Blaine his first lessons in orthography, and reading. "Uncle Ellis, (as he is often called), is now rather

feeble physically, yet he is very social in disposition, and loves to talk of the various incidents connected with his former life and its surroundings.

H.

THE MONKS' BIRD ALLEGORY.

THE monkish chronicles of the early ages of Christianity wrapped the truths, which they wished to teach, in quaint allegories to attract their heathen readers. One of these fables may interest Americans. It is as true in significance as it was in the days of the Cæsars.

A flock of birds mysteriously appeared one day in a city out of a clear sky, and sought refuge in all manner of strange hiding places.

One flew into a bare stone cell, where it died of starvation; another into the gaping throat of a wild boar, and was stifled by fat; a third was placed by a princess in a beautiful cage. At first she counted the bird as her chief treasure, and fed and cherished it. Then she began to decorate the cage with gold and jewels, and forgot its inmate, until one day she found it starved and dead.

But another took refuge in the breast of a woman so poor that she had only rags to keep her warm and crusts to eat. The bird was her only happiness.

When the winter night came, a call sounded from the sky for the birds to return. There was but one of them yet living. It flew from the breast of a poor woman who lay frozen to death by the roadside, and heaven opened to take it in.

The allegory needs no interpretation.

As we walk along the street to-day and look into the faces of the passers-by, we can read the story of the bird from heaven which was given to each one of them at birth. In that man's breast it died of cold; in this it was stifled by swinish appetites; that woman's body is a beautiful cage which she so loves to adorn that she altogether forgets its holy tenant.

But there are men and women who meet us every day, whose every word and action are fragments of harmony from the divine dweller in their hearts.—*Youths' Companion.*

THE Hydrographic Office at Washington intends to do what it can to lessen the loss of life and property from hurricanes on the Pacific Ocean by collecting information relating thereto and publishing pilot charts of the North and South Pacific Ocean similar to those now issued for the North Pacific Ocean. As a preliminary to this work it asks for reliable information about hurricanes in the Pacific, particularly that which destroyed so much property at Samoa on March 15th and 16th. Captains of vessels and others who can aid in this work should send their notes to the Hydrographic Office at Washington, to one of the branch offices, or to any United States Consul, for transmission to Washington.

WE cannot go so far

That home is out of sight;

The morn, the evening star,

Will say, Good day! Good night!

The heart that loves will never be alone;

All earth, all heaven it reckons as its own.

MIMICRY IN NATURE.

Go to the seashore and observe the grasshoppers among the beach grass. They fly up at your approach, whiz off a rod or so, and alight. Can you see them? They are colored so nearly like the sands they live upon that detection of one at rest is almost impossible. On yonder grassy bluff, a stone's throw away, you will find none of them, but other kinds equally, or almost equally, lost to sight by their harmony with their surroundings. What chance of life for either if they suddenly changed places? They would be so conspicuous that every passing bird or other insectivorous creature would sight them. Of course, these protective colors have been gained by slow steps. Every grasshopper that found its preferred food among the sands was liable to be eaten. In the long run just those would be eaten which were the most easily seen. One which varied in coloring in never so small a degree, so as to be less easily seen than his brother, would live to perpetuate his kind, and his brother come to an untimely end; the progeny would show the fortunate variation, and be more likely to be spared to transmit in increased volume the probability of the happy coloring. Given, then, a brood of grasshoppers that find their preferred food in sandy spots, and, unless other and more powerful forces act upon them, it must result, from their liability to be eaten by creatures fond of grasshoppers, that in time they will resemble in coloring the sand on which they live; it is impossible that they should not. Any creature not specially protected by nauseousness or habit or special device of some sort must, in the very nature of things, if it is to live at all, have some other protection, and that afforded by color and pattern is by far the most common. The world is made up of eaters and eaten, of devices to catch and devices to avoid being caught.—*Atlantic Monthly.*

CURRANTS ARE SMALL GRAPES.

A FREQUENT error among those interested in cookery is to suppose that the imported articles called currants, used in fruit cakes, mince pies, plum puddings, buns, and the like, are a fruit resembling our own black or red currants dried. In reality these dried fruits which we call currants are just as much raisins as anything that is offered under the specific name, being only a dried grape, although of an exceedingly small variety, each grape no bigger than a common pea, and each bunch but two or three inches long. These little grape bunches are picked and dried in the sun, and are so full of saccharine matter that the exuding sugar crystallizes them into a compact form of sufficient hardness to require considerable strength to open the mass and prepare the fruit for packing, they being then a second time compressed, this time by means of treading with the feet, which process perhaps accounts for a good deal of the dirt and gravel usually to be found packed with them. The grapes grow all through the islands and adjacent regions of the Grecian Archipelago, and being exported originally from Corinth, they were called at first corinths, which word was gradually corrupted

into currants, till the primitive plant and its fruit berry of our own gardens, which might be dried from now till doomsday without developing enough sugar to melt them together as we find the Zante currants etc. l. —*Harper's Bazar.*

As a fond mother, when the day is o'er,
Leads by the hand her little child to bed,
Half willing, half reluctant to be led,
And leaves his broken playthings on the floor,
Still gazing at them through the open door,
Not wholly reassured and comforted,
By promises of others in their stead,
Which, though more splendid, may not please him
more;

So Nature deals with us, and takes away
Our playthings one by one, and by the hand
Leads us to rest so gently that we go,
Scarce knowing if we wish to go or stay,
Being too full of sleep to understand
How far the unknown transcends the what we
know.

—*Longfellow.*

DAY by day, day by day,
Guide me Father in thy way;
Let me hear thy spirit say,
I will guide thee, only trust me
Day by day, day by day.

—*M. C. in Unitarian.*

NEWS AND OTHER GLEANINGS.

—The *Congregationalist* (Boston) says: Here is a question, asked by Erasmus three hundred and seventy-one years ago, which we wish the pastor of some church which pays more for the service of its quartette choir than it gives to the poor, would answer, viz.: "To what purpose is that musical din, provided at great expense, while at the same time our brethren and sisters, who are living temples of Christ, are gradually dying of hunger and thirst?"

—We find it stated in an exchange paper that "President Seelye," (of Smith College, we presume) "does not believe in the Darwinian Theory, or Evolution, and gives it and Professor Winchell some hard hits in his recent article in the new edition of Johnson's Natural History."

—Every Paris school is provided with a kitchen and dining-room, and most of the children get their dinner at school. They can get a warm dinner for two cents a dish. If any one cannot pay for it, he has it gratis. In order that the pride of poor children may not be wounded, each gets a check from the director, and all receive the same kind of check, whether paying or not, so that schoolmates have no means of distinguishing. One school of 500 pupils distributed in three months 5,260 portions, of which 4,116 were paid for. The entire cost for the three months was \$73.50, of which \$41.15 was paid, leaving the entire cost of the school for three months but \$32.41.—*Journal of Education.*

—The prairie fires in South Dakota during the past week were fanned by high winds, and caused great destruction. The towns of Volin, Olivet, Pukawana, Leola, Lesterville, and Mount Vernon have been almost completely destroyed by the flames. Many frame buildings were wrecked, and there has been a heavy loss among live stock. Travel was suspended on some of the railroads so great was the force of the wind, and clouds of dust prevented the engineers from seeing the track. It is reported that several persons lost their lives. These fires seem to

have been even more destructive than was at first reported. The atmospheric conditions were also remarkable, if, as reported, the humidity at the time of the great winter storm was only seven per cent. The average in Dakota is 70 per cent. Such a condition of dryness, if it lasted for any length of time, would convert the grass into stubble, through which the flames would spread as along a train of powder. And this is what seems to have happened, or there would not have been such widespread destruction of live stock, as well as of property.—*Public Ledger*.

—The *Revue Scientifique* states that it has long been known that the stalk of the sugar cane might be used in the production of a paper of the best quality. It is therefore surprising that with the constant decline in the value of sugar, owing to over-production, and the steadily increasing use of paper, it has never occurred to sugar planters to embark in the manufacture of paper as a supplement to sugar producing. The fibres of the cane give an excellent paper, and the necessary mechanical and chemical processes are easily carried out.—*The American*.

—The estimated cost of the projected ship canal between Bordeaux, on the Atlantic, and Narbonne, on the Mediterranean, France, is \$130,000,000. This vast undertaking—comprising, as it does, a length of some 330 miles, to save a voyage around Spain of 700 miles—would have a depth of 27 feet, in order to allow of the passage of heavy ironclads, and would require thirty-eight locks. The plan also contemplates a railway track alongside, so that by means of locomotive towage a speed of seven miles an hour could be maintained by day, and also by night by the aid of electric light.

—An engineer of the Comstock Mines recently came upon an enormous tree of the *Sequoia* species, in the wilds of the Sierras, in Tulare County, California, which he believes to be the largest on the continent. The party had no rule with them, but one of them measured the tree with his rifle, which is four feet long, and found it to be forty-four lengths of the gun in circumference, at a point above the ground as high as he could reach. The top of the tree is broken off, but it is still of immense height.—*Exchange*.

—It is estimated that twenty thousand immigrant girls who seek our shores through the great national gate-way, Castle Garden, are annually lost to purity through the lack of systematic effort to protect and instruct them in their chosen work,—domestic service. The "Sunshine Mission" aims to meet this great need by establishing homes for the training of these girls. It is hoped that the "Sunshine" work of prevention may some time dispel forever the need of "Midnight Missions" of reformation.—*Temperance Bulletin*.

—A newspaper paragraph says that the Watkins Glen (N. Y.) property has been sold by Amos J. Michener, of Philadelphia, to Paul C. Grening, of Brooklyn for \$150,000.

—It is anticipated that the votes of members of the Catholic Church in Pennsylvania will be generally against the Prohibitory Amendment. Archbishop Ryan has been quoted on that side, and in an address in Philadelphia on the 8th, a newspaper report says he "concluded with an expression decidedly against the prohibition of the liquor traffic by law and in favor of its restraint through the conscience. External prohibition was not the desirable thing, he said; the hearts and consciences of the people must be reached. The way to get at the conscience was not by creating a fear of a policeman or the law; it was to bring to the mind the knowledge of an omniscient and omnipresent God, and in no other way could the evil as to the whole people be restrained."

—An appeal from the Society of Colored Working Men was brought Saturday evening before the New Century Guild of Working Women. This plea was not for social recognition, but asking for an expression of willingness on the part of white self-supporting women to accept as co-workers, and treat with civility, as clerks, seamstresses, saleswomen, etc., colored women whom they would consider acceptable in all other respects. As only a small proportion of the members are represented at the business meetings, it was not judged fair to commit the Society, but simply to record the standing vote of 28 in favor of such recognition to 7 against.—*Philad'a Ledger*, 8th.

—A Berlin dispatch says: Emperor William has paid daily visits to his mother since her arrival here, and she in turn, has visited the dowager Empress Augusta, the Empress, and the Duke and Duchess of Saxe-Meiningen. The restoration of friendly relations between the members of the Imperial family appears to be perfect.

CURRENT EVENTS.

The organization of the friends of the proposed Prohibitory Constitutional Amendment in Pennsylvania now has "headquarters" at No. 929 Chestnut Street, Philadelphia, (second story), and the Chairman of the Committee, H. W. Palmer, has issued an earnest address to the people in behalf of the Amendment. In Rhode Island, the Legislature just elected is strongly in favor of the re-submission of the constitutional provisions of that State, and it will no doubt be so ordered. The election in Massachusetts takes place on the 22d of this month. Feeling in that State is divided: among those in favor of the Amendment are Senators Hoar and Dawes, and ex-Governor Loog. Among those opposed are Phillips Brooks, T. W. Higginson, and President Eliot, of Harvard.

A STORM of unusual violence, including rain, hail, and snow, with high wind and occasional thunder and lightning, prevailed on the 6th, and to some extent on the 7th, in North Carolina, the Virginias, Maryland, and Southern and Western Pennsylvania. High winds also prevailed along the coast, and five lives were lost by the foundering of a barge in the Delaware Bay. Serious damage was done at Norfolk and Portsmouth, Virginia. The lower portion of Norfolk was flooded and a fire resulting from the slacking of lime on a wharf caused a loss estimated at \$150,000. Many buildings were nuroofed by the wind. Marine disasters are reported in Chesapeake Bay.

WORK has been entirely suspended on the Panama Canal, and over 8,000 laborers have been sent to their homes. A Coasular investigation shows that there are still over 3,000 persons on the line of the works who are in a destitute condition. Some deaths from starvation have already been reported, and it is feared that many more will occur if prompt measures are not taken by the West Indian Governments to send the people back to their homes. Negroes and women and children are the worst sufferers. Despite the great distress good order prevails.

LEWIS HAYDEN, one of the most prominent colored citizens of Boston, died on the 7th inst., in that city, aged 73 years. He was born a slave in Kentucky, but escaped to Canada when a young man, and in 1848 went to Boston to reside. His residence became headquarters for anti-slavery workers, and he became noted as a lecturer. He served two terms in the Massachusetts Legislature.

The American Consul at Ottawa informs the State Department that licenses to fishing vessels will continue to be issued this year by the Canadian Government on the same terms as last year.

SOMEWHERE.

SOMEWHERE, await the treasures we have strew'd
Which idle hands, and feet have rudely shattered,
And tenderest love shall gather as its own
The pearls thus scattered.

Somewhere, the tears of broken-hearted trust,
Of patient sacrifice, and self-submission,
Shall form the rainbow promise of a just
And full fruition.

Somewhere, the narrow stepping-stones we tread—
The steep, and terrible ascent of duty—
Shall change to velvet terraces o'erspread
With emerald beauty.

Somewhere, the doubtful seed that we have sown,
Shall well disprove a cold, uncertain rootage,
And vindicate the hope we now disown,
By fairest fruitage.

Somewhere, our human efforts of to-day,
The faltering outcome of a pure intention,
Eternity shall hold as brave assay
And true ascension.

Oh, Universal Soul! The finite range
Of earth, and time may dwarf our high endeavor,
Yet life is victory, through the evolving change
Of Thy Forever.

—Augusta Cooper Bristol.

JAMES NAYLER.¹

THE saddest chapter in the annals of the Society of Friends is that containing the story of the strange infatuation and sufferings of James Nayler, and much has been written about this sad case of delusion. Thomas Carlyle, in his work on Oliver Cromwell, has devoted several pages, in a half-serious, half-comic strain, to the misfortunes which marked the life of this misguided man. "To reconcile in some degree, the discrepancy between the declarations of Cromwell in behalf of freedom of conscience, and that mean and cruel persecution which the Quakers suffered under the Protectorate, the generally harmless fanaticism of a few individuals bearing that name is gravely urged." (J. G. Whittier.)

On the other hand, Charles Lamb, whose gentle spirit had a feeling in common with the quiet ways of the Friends, writes: "If you are not acquainted with it, I would recommend to you above all church narratives, to read Sewell's History of the Quakers. It is in folio, and is the abstract of the Journals of

¹Read at the Conference, after meeting, at 15th and Race Sts., Philadelphia, Fourth month 7, 1889, by Annie Cooper.

Fox and the primitive Friends. It is far more edifying and affecting than anything you will read of Wesley and his colleagues. Here is nothing to stagger you, nothing to make you mistrust, no suspicion of alloy, no drop nor drop of the worldly or ambitious spirit. You will here read the true story of that much injured, ridiculed man (who perhaps has been a by-word in your mouth),—James Nayler; what dreadful sufferings, with what patience he endured, even to the boring through his tongue with hot irons without a murmur; and with what strength of mind, when the delusion he had fallen into, which they stigmatized for blasphemy, had given way to clearer thoughts, he could renounce his error, in a strain of the beautifullest humility, yet keep his first grounds, and be a Quaker still!"

James Nayler was born in the parish of Ardesley, Yorkshire, in 1616, and received from his father, a man of reputation and ample means, a good education. At the time of his marriage, he settled on a farm in Wakefield, grounds afterwards made classic by Goldsmith's inimitable story, "The Vicar of Wakefield." The quiet, rural life here was soon disturbed by the din of war, for the long struggle of the people of England with their king, Charles the First, for their civic rights had at last culminated in a resort to arms. At the summons of Lord Fairfax and the Parliament, James Nayler joined a troop of cavalry, composed of sturdy Independents, and like many others who afterwards became eminent Friends, he won distinction as a soldier. By promotion he became quarter-master under General Lambert, and served with him in his campaign in Scotland.

Having become disabled by ill-health, after eight or nine years' service in the army, he resigned his commission and returned to his home, where his time was spent in active life on his farm and in attendance at the conventicles of the Independents. Sometime later he met George Fox, who had just been liberated from an imprisonment in Derby jail, and was then traveling in the north of England. The interview led to the conviction of James Nayler, and soon after he joined the Society of Friends, becoming a minister of powerful and persuasive eloquence.

"In the spring of the next year he was in his field following his plough, and meditating, as he was wont, on the great questions of life and duty, when he seemed to hear a voice bidding him go out from his kindred and his father's house, with an assurance that the Lord would be with him while laboring in his service. Deeply impressed, he left his employment, and returning to his house, made immediate

preparation for a journey. But hesitation and doubt followed; he became sick from anxiety of mind, and his recovery for a time was exceedingly doubtful. On his restoration to bodily health, he obeyed what he regarded as a clear intimation of duty, and went forth a Preacher of the doctrines he had embraced. The Independent minister of the society to which he had formerly belonged sent after him the story that he was the victim of sorcery; that George Fox had a bottle, out of which he made people drink; and that the draught had the power to change a Presbyterian or Independent into a Quaker at once; that in short the Arch Quaker, Fox, was a wizard, and could be seen at the same moment of time riding on a black horse, in two places widely separated! He had scarcely commenced his exhortation, before the mob, excited by such stories, assailed him. In the early summer of the year we hear of him in Appleby jail. On his release he fell in with George Fox. At Walney island, he was furiously assaulted, and beaten by clubs and stones, the poor priest-led fishermen being fully persuaded they were dealing with a wizard." (Whittier.)

A letter dated 30th of 8th month, 1652, shows his spirit: "Dear friends: Dwell in patience and wait upon the Lord, who will do his own work. Look not at man who is in his work, nor at any man opposing it; but rest in the will of the Lord, that so ye may be furnished with patience, both to do and to suffer what ye shall be called unto, that your end in all things may be his praise. Meet often together; take heed of what exalteth itself above its brother; but keep low, and serve one another in love."

Going to London in 1654, a feeling of uncertainty came over his mind, but he entered with great zeal into the work of the ministry, and his influence was soon recognized among the Friends of the city. Admiring and sympathising friends gathered around him, and such was the power of his ministry that profane and drunken cavaliers and intolerant bigots were moved and converted to the principles he preached. Weak and infatuated women, carried away by his eloquence, addressed him in terms of adoration, calling him "the Everlasting Son of Righteousness, The Prince of Peace, the only begotten Son of God." Yielding to this adulation, the mind of James Nayler lost its balance and his intellect became clouded.

To quote again from J. G. Whittier: "Weak in body, worn with sickness, fasting, stripes, and prison penance, and naturally credulous and imaginative, is it strange that in some measure he yielded to this miserable delusion? Let those who would harshly judge him or ascribe his fall to the peculiar doctrines of his sect, think of Luther, engaged in personal combat with the Devil, or conversing with him on points of theology in his bed-chamber, or of Bunyan at actual fisticuffs with the adversary; or of Fleetwood and Vane and Harrison millenium mad, and making preparations for the earthly reign of King Jesus. It was an age of intense religious excitement. Fanaticism had become epidemic. Cromwell swayed his Parliaments by 'revelations,' and Scripture phrases in the painted chamber; stout generals and

sea-captains exterminated the Irish, and swept Dutch navies from the ocean with old Jewish war-cries, and hymns of Deborah and Miriam; county justices charged juries in Hebraisms, and cited the laws of Palestine oftener than those of England. Poor Nayler found himself in the very midst of this seething and confused moral maelstrom. He struggled against it for a time, but human nature was weak; he became, to use his own words, 'bewildered and darkened,' and the floods went over him."

Edward Burrough and Frances Howgill, at that time the most weighty and gifted ministers in London, were constrained to extend tender admonitions and to rebuke the conduct of James Nayler and his friends, before they left London to go to Exeter. In the latter city their extravagant language brought them under censure, and James Nayler was arrested by the authorities and thrown into jail. Some of his most infatuated followers gathered around the prison declaring that "Christ was in prison," and when they were admitted to his presence, they knelt and kissed his feet, saying, "Thy name shall no more be called James Nayler, but Jesus."

Here is the graphic account Carlyle gives of his entrance into Bristol, the next place we find him: "In the month of October, 1655, there was seen a strange sight at Bristol in the West. A procession of eight persons; one a man on horseback, riding single; the others, men and women, partly riding double, partly on foot, in the muddiest highway, in the wettest weather; singing, all but the single rider, at whose bridle splash and walk two women: 'Hosannah! Holy, holy! Lord God of Sabaoth!' and other things 'in a buzzing tone,' which the impartial hearer could not make out. The single rider is a raw-boned male figure, with lank hair reaching below his cheeks, hat drawn close over his brows, nose rising slightly in the middle, of abstruse down look, and large dangerous jaws, strictly closed; he sings not; sits there covered, and is sung to by the others bare. Amid pouring deluges and mud knee-deep, so that the rain ran in at their necks, and they vented it at their hose and breeches; a spectacle to the West of England and Posterity! Singing as above; answering no questions except in song. From Bedminster to Ratcliffe Gate, along the streets to the High Cross of Bristol; at the High Cross they are laid hold of by the authorities;—turn out to be James Nayler and company."

This strange proceeding, of course, led to the arrest of the company, and Nayler was sent to London. Instead of giving him the benefit of a trial by a jury with all the safe-guards of the law, Parliament undertook to examine his case and pass judgment. Carlyle, in writing of this Parliament says: "To posterity they sit as the James Nayler Parliament. Four hundred gentlemen of England, and, I think, a sprinkling of Lords among them, assembled from all the counties and boroughs of the Three Nations to sit in solemn debate on this terrific phenomenon; a mad Quaker, fancying or seeming to fancy himself, what is not uncommon since, a new incarnation of Christ." After a long and wearisome trial, which lasted for two months, the following sentence

was passed: "That James Nayler be set in the pillory, with his head in the pillory, in the Palace Yard, Westminster, during the space of two hours on Thursday next; and be whipped by the hangman through the streets from Westminster to the Old Exchange, and there likewise be set in the pillory, with his head in the pillory for the space of two hours, between eleven and one, on Saturday next, in each place wearing a paper containing a description of his crimes; and that at the Old Exchange his tongue be bored through with a hot iron, and that he there be stigmatized in the forehead with the letter B; and that he be afterwards sent to Bristol to be conveyed into and through the said city on horseback with his face backward, and there also, publicly whipped the next market day after he came there; that from there he be committed to prison in Bridewell, London, and there he restrained from the society of all people, and there to labor hard until he shall be released by Parliament; and during that time, he be debarred the use of pen, ink, and paper, and have no relief except what he earns by his daily labor."

This most inhuman punishment was inflicted on the letter, notwithstanding numerous petitions were addressed to Parliament, praying for a mitigation of the sentence, and thousands of sympathizing citizens gathered around the place of torture, many earnestly protesting against the extreme cruelty of the sentence. Robert Rich, an honorable and influential citizen, followed him up to the pillory and held him by the hand while the poor victim was undergoing the agony of having his tongue pierced and his forehead branded. There is reason to believe Cromwell would have been disposed to clemency and have had some charity for one of his old and well-tried soldiers, but the clergy interposed and, in the "name of God and his Church," demanded the execution of the sentence. Strange to say, none of his companions were punished. To account for this, it has been conjectured that Parliament aimed to crush out the rising Society of Friends, among whom Nayler, when in his right mind, had been so effective a minister.

At the expiration of his term of imprisonment, he was released by order of Parliament. "In the solitude of his cell, the angel of patience had been with him. Through the cloud which had so long rested over him, the clear light of truth shone in upon his spirit; the weltering chaos of a disordered intellect settled into the calm peace of a reconciliation with God and man. His first act on leaving the prison was to visit Bristol, the scene of his melancholy fall. There he publicly confessed his errors, in the eloquent earnestness of a contrite spirit, humbled in view of the past, yet full of thanksgiving and praise for the boon of forgiveness. A writer who was present says the 'assembly was tendered and broken into tears; there were few dry eyes, and many were bowed in tears.'" (Whittier.)

"In the latter part of the Eighth month, 1660, he left London to visit his wife and children in Wakefield. As he journeyed on, the sense of a solemn change about to take place, seemed with him; the shadow of the eternal world fell over him. As he

passed through Huntingdon, a friend who saw him describes him as 'in an awful weighty frame of mind, as if he had been redeemed from earth, and a stranger on it, seeking a better home and inheritance.' A few miles beyond the town, he was found, in the dusk of the evening, very ill, and was taken to the house of a friend living not far distant. He died shortly after, expressing his gratitude for the kindness of his attendants, and invoking blessings upon them. About two hours before his death, he spoke to the friend at his bedside these remarkable words, solemn as eternity, and beautiful as the love which fills it:

"There is a spirit which I feel which delights to do no evil, nor to avenge any wrong; but delights to endure all things, in hope to enjoy its end; its hope is to outlive all wrath and contention, to weary out all exultation and cruelty, or whatever is of a nature contrary to itself. It sees to the end of all temptations, as it bears no evil in itself, so it conceives none in thought to any other: if it be betrayed, it bears it, for its ground and spring is the mercy and forgiveness of God. Its crown is meekness; its life is everlasting love unfeigned; it takes its kingdom with entreaty, and not with contention, and keeps it by lowliness of mind. In God alone can it rejoice, though none else regard it, nor can own its life. It is conceived in sorrow, and brought forth with none to pity it; nor doth it murmur at grief and oppression. It never rejoiceth but through suffering, for with the world's joy it is murdered. I found it alone being forsaken, I have fellowship with those who live in dens and desolate places of the earth, who through death obtained resurrection and eternal Holy Life."

Thus died James Nayler, about forty-four years old. His mortal remains were buried in Thomas Parnell's burying-ground at King's Rippon, a green nook of rural England.

From Young Friends' Review.

ESTABLISHMENT OF MEETINGS IN CANADA.¹

TENTH month, 4th, 1815, Friends at Norwich requested to have a meeting for worship and a preparative meeting, which being forwarded to the half-yearly meeting received their approval. The meeting was established in Second month, 1816, to be called Norwich Preparative Meeting, and to be held the last Fourth-day in each month; the meeting for worship to be held the First and Fourth-days of each week.

First month 3rd, 1816, a Committee was appointed "to take into consideration, and prepare, some plan respecting schools," and Eighth month 7th, 1816, they presented the following report:

"The Committee submit for the consideration of the monthly meeting the appointment of a Committee in each branch of our monthly meeting to open a subscription (headed with the introductory part of this report), to raise by liberal and voluntary contributions, a sum sufficient to build a school-house near

¹Continuation of article reprinted in issue of Third Month 30, 1889.

our meeting-house, where master and scholars may diligently attend meetings without much inconvenience to the prosecution of their studies." Which the meeting after due deliberation thereon united with.

Second month 7th, 1816, a Committee previously appointed by the Half Yearly Meeting, in compliance with a request made by Pelham Monthly Meeting, for a different arrangement of the Half-Yearly Meeting, report: "That having visited that meeting and its branches, it is their united judgment that the time has not fully come for any alteration."

Eleventh month 6th, 1816, Friends at Ancaster requested to be indulged with a meeting for worship, which was granted, under care of a Committee, said meeting to be held on the First day of the week, at the eleventh hour, at the house of Levi Wilson.

First month 1st, 1817, a Committee appointed by Pelham Monthly Meeting to inspect the plan of a meeting-house at Norwich, reported, "that they had limited the size to 36 feet by 50, and estimated the cost at one thousand dollars," which the meeting uniting with, was directed to the half-yearly meeting.

Eighth month 6th, 1817, Friends in the south part of Norwich, were granted an indulged meeting, to be held in a school house on the First- and Fifth-days of the week, at the eleventh hour, under the care of a Committee; and in Seventh month 1st, 1818, they were granted the privilege of purchasing five acres of land for the purpose of building a meeting-house upon, and also for a burying-ground, to be called Pine Street Meeting.

On the 7th of First month, 1819, Committees appointed by Pelham and Eden Monthly Meetings, to consider the propriety of being set apart, to constitute a quarterly meeting, conferred together, and produced the following report: "That after a time of weighty deliberation, and having the unity of a number of men and women Friends, not of the Committee, concluded to propose to their respective meetings, to request for a quarterly meeting to be held alternately at Pelham and Hamburg, (formerly called Willink,) and called Pelham Quarterly Meeting, with desires that the half-yearly and quarterly meetings may sympathize with us in our present difficult situation, and see it right to concur with us in forwarding our request." As we find no farther mention made of the foregoing request after being forwarded to the half-yearly meeting, we conclude that it did not receive their approval.

From the minutes of Canada Half-Yearly Meeting, held the 3rd and 4th of Second month, 1810, we find the report of a Committee, previously appointed to visit Norwich Preparative Meeting, on account of their request for a monthly meeting: "That they had met with Friends of the several branches of that meeting, and were united in a belief that it may be right to allow a monthly meeting at that place, to be held the second Fourth-day in each month, and to be called Norwich monthly meeting, to be opened in Third month next, which after a season of weighty deliberation was united with," and a Committee appointed to attend the opening of said meet-

ing. In Fifth month 2nd, 1821, Pelham Monthly Meeting taking into consideration the subject of a quarterly meeting, concluded to propose to the monthly meetings of Norwich and Hartland, to appoint Committees to meet with us and endeavor to form some plan to have a quarterly meeting that may be beneficial to each of the monthly meetings.

In Eleventh month the Committees reported that they were united in proposing that a quarterly meeting be held circular, four times in the year, at the four monthly meetings constituting the half-yearly meeting. In Eighth month 4th, 1830, Friends of Pelham Monthly Meeting agreed to apprise the half-yearly meeting that they were united in joining Farmington Quarterly Meeting, unless some new arrangement should take place that might tend to relieve them of the burden that had long aggrieved them, and requested the sympathy of the half-yearly meeting in their present tried situation, and granted the privilege of the half-yearly meeting being held half of the time at Pelham.

Tenth month 6th, 1830, a Committee from Norwich visited Pelham with a minute from that meeting, expressing a desire to be united with them in establishing a quarterly meeting. A Committee was appointed to confer with them and also with the Committee from the half-yearly meeting on the subject.

The meeting was eventually established Twelfth month 20th, 1833, and called Pelham Half-Yearly Meeting to be held alternately at Pelham and Yarmouth.

For Friends' Intelligencer and Journal.

THE CHARACTER OF JOB.

SOME time ago the characters of Samson and Elijah were brought out in this paper, and as I read the last, I was touched with the higher and more practical characteristics of Job with his continued fidelity to God. I feel my pen inadequate to give the full interpretation. Yet a word to the wise is sufficient to at least open a glimpse of the great lesson for us to learn.

In this narration the first truth that strikes the reader is, that "he was a perfect and upright man, one that feared God and eschewed evil." The query arises: Why then should he be made an example of in the manner he is said to be? We can each draw our own inference, but the lasting truth that impresses us is, that after the great affliction, with the loss of all that the natural man holds dear, he bowed himself to the ground and exclaimed, "The Lord gave, and the Lord hath taken away, blessed be the name of the Lord!" Next we learn he was stricken with sores of intense pain, the wife of his bosom questioned his integrity, saying, "curse God and die," but he turned and said unto her, "Thou speakest as one of the foolish women speaketh." While he mourned the day of his birth and the anguish of his life, with his friends to counsel him in his humility and his complaints, yet he never murmured as to the injustice of God, always endeavoring to get a lesson for the present. Thus we see that humility and integrity were constant companions of his soul.

When we read the exclamation that he made, under the suffering that he endured, we stand amazed, unless we too have bowed low before Job's God and been lifted up in purity of purpose as he was. Listen to the drops of faith that distilled in his soul, "With the ancient is wisdom and in length of days is understanding." He saw nothing but justice, and abhorred himself as of little moment whether he lived or died. When his three friends, first counseled, then exhorted, and at last reproved him, he neither justified himself nor acknowledged that he willfully neglected the counsel of the Lord, "for he is not a man as I am, that I should answer *Him* and we should come together in judgment." Patience has ever been the prominent characteristic of Job, for as we read carefully the account of his afflictions, the circumstance is recorded of the strong argument presented by Eliphaz, Zopher and Bildad, and Job meets them with this positive language, "But I know that my Redeemer liveth." Again he comes forth to answer his reasoners, saying, "There is a knowledge of natural things, but wisdom is an excellent gift of God;" and after enumerating the many geological formations and the great marvelous power that called them into existence he put another strong query, "But where is *Wisdom* to be found? and where is the place of understanding?" continuing by referring them to the richness and beauty of the precious stones of the natural world, forcing them upon the natural understanding, that perchance a spiritual truth might be established; then closes with these words, "Behold the fear of the Lord, that is wisdom and to depart from evil is understanding." Indeed it would take a more lengthy article than I can write, with an abler pen than mine, to give the full truth connected with the life of this humble, patient man.

Suffice it to say that among all, "Job sinned not, nor charged God foolishly," but like many others he learned much in his suffering and in the closing of the account he says: "I have heard of thee by the hearing of the ear, but now mine eye seeth Thee." I recognize a lesson of instruction in every Biblical character that is represented as sent or called of God, and we notice that each one as we progress through the history, while they have a different, yet a stronger type, the depth of the true life becomes clearer as we advance, the perfection of humanity comes in the closing individual affliction brought out by John when on the isle of Patmos. But when we consider the length of time since the early lessons were written, and the present condition of the world we wonder at the comparatively slow advance; yet we admit there has been a great work performed, and still a great one to be done but the greatest of all is for ourselves and in ourselves.

MARY G. SMITH.

Hoopston, Ill.

The truth cannot be burned, beheaded, or crucified. A lie on the throne is a lie still; and truth in a dungeon is a truth still; and a lie on the throne is on the way to defeat, and truth in the dungeon is on the way to victory.—*Selected.*

From the Sunday School Times, Philad'a.

HEART-PEACE BEFORE MINISTRY.

PEACE in the heart is one of the conditions of good spiritual work. Indeed, this qualification is unnecessary, for the same is true of all kinds of work. We cannot do our best in anything if we are fretted and anxious. A feverish heart makes an inflamed brain, a clouded eye, and an unsteady hand. The people who really accomplish the most and achieve the best results are those of calm, self-controlled spirit. Those who are nervous and excited may be always busy, and always under pressure of haste; but in the end they do far less work than if they wrought calmly and steadily, and were never in a hurry. Nervous haste is always hindering haste; it does faulty work, and does but little of it in the end. Really rapid workers are always deliberate in their movements, never appearing to be in any hurry whatever; and yet they pass swiftly from task to task, doing each one well because they are calm and unflustered, and, with their wits about them, work with clear eye, steady nerve, and skillful hand. The people in all lines of duty who do the most work are the calmest, most unhurried people in the community. Duties never wildly chase each other in their lives; one duty never crowds another out, nor even compels hurried and therefore imperfect doing. The calm spirit works methodically, doing one thing at a time, and doing it well, and therefore works swiftly, though never appearing to be in haste. "Unhasting yet un-resting" is the motto of quick and abundant achievement. Haste spoils work, and yet dare not pause, for duty presses.

"Haste not! let no thoughtless deed
Mar for aye the spirit's speed;
Ponder well and know the right,
Onward then with all thy might;
Haste not; years can ne'er alone
For one reckless action done.

"Rest not! life is sweeping by,
Do and dare before you die;
Something mighty and sublime
Leave behind to conquer time;
Glorious 'tis to live for aye
When these forms have passed away."

It is especially true in spiritual work that we must know the secret of peace before we can minister either swiftly or effectively to others in our Master's name. Feverishness of spirit makes the hand unskillful in delicate duty. A troubled heart cannot give comfort to other troubled hearts; it must first become calm and quiet. It is often said that one who has suffered is prepared to help others in suffering; but this is true only when one has suffered victoriously, and has passed up out of the deep, dark valley of pains and tears to the radiant mountain-tops of peace. An uncomforted mourner cannot be a messenger of consolation to another in grief. One whose heart is still vexed and uncalmed cannot be a physician to hearts with bleeding wounds. We must first have been comforted of God ourselves before we can comfort others in their tribulations.

The same is true of all spiritual ministry. We need a steady hand to touch the work of Christ's

kingdom. One of our Lord's earliest miracles furnishes an illustration of this truth. Jesus was called to heal a woman who lay sick of a great fever. One of the Gospels describes the cure in these striking words: "He touched her hand, and the fever left her; and she arose, and ministered unto them." We readily understand this record, as it refers to the physical cure that was wrought by our Lord. We know, of course, that the woman could not minister to others while the fever was on her. When sore sickness comes, the busiest, fullest hands must drop their tasks. No matter how important the work may be, how essential it may appear, it must be laid down when painful illness seizes us. We must be healed of our fever before we can minister.

But there are other fevers besides those which burn in men's bodies. There are heart fevers which may rage within us, even when our bodies are in perfect health. We find people with feverish spirits, —unhappy, discontented, fretted, worried, perhaps insubmissive and rebellious. Or they may be in a fever of fear or dread. These inward fevers are worse evils than mere bodily illness. It is better in sickness to have our heart's fever depart, even though we must longer keep our pain, than to recover our physical health, while we keep our fretfulness and impatience uncured.

We cannot minister while heart-fever of any kind is on us. We may still go on with our work, but we cannot do it well; and there will be little blessing in it. Discontent hinders any life's usefulness. Jesus loved Martha, and accepted her service because he knew she loved him; but he told her that her feverishness was not beautiful, and that it detracted from the worth and the full acceptableness of the good work she did; and he pointed her to Mary's quiet peace as a better way of living and serving. Anxiety of any kind unfits us in some degree for work. It is only when Christ comes and lays his cool hand upon our heart, and cures its fever, that we are ready for ministering in his name in the most efficient way.

The lesson is for us all. We are in no condition for good work of any kind when we are fretted and anxious in mind. It is only when the peace of God is in our heart that we are ready for true and really helpful ministry. A feverish heart makes a worried face, and a worried face casts a shadow. A troubled spirit mars the temper and disposition. It unfits one for being a comforter of others, for giving cheer and inspiration, for touching other lives with good and helpful impulses. Peace must come before ministry. We need to have our fever cured before we go out to our work. Hence we should begin each new day at the Master's feet, and get his cooling, quieting touch upon our hot hand. Then, and not till then, shall we be ready for good service in his name.

THE morality of Jesus was not in unison with the temper or the feelings of his age. It was universal morality, adapted for the whole human race and for every period of civilization. It was morality grounded on broad and simple principles, which had hitherto never been laid down as the basis of human action.—*Milman's History of Christianity.*

SCRIPTURE LESSON, No. 16.

FOURTH MONTH 28, 1889.

DESTRUCTION OF THE TEMPLE.

GOLDEN TEXT.—"One greater than the temple is here."

—Mark 12: 6.

READ Mark 13: 1-13.

AFTER the conversation between Jesus and the scribes, which was the subject of our last lesson, Jesus directed his discourse to the people who stood around him, warning them against the hypocrites and false teachings of the priests, pronouncing against them the judgments that would surely follow their falsehood and oppression. He then left the Temple, never to enter it again except as a prisoner in the hands of his cruel enemies. As he with his disciples passed out, the beauty of the building and the massive stones of which it was erected, were the subject of remark. This opened the way for further discourse. "*What Manner of Stones.*" The Temple was built first by Solomon, about a thousand years before. When the king of Babylon captured Jerusalem it was destroyed. (II. Chron. 36: 6, 7, 19.) When the Jews were permitted to return to their native land, Zerubbabel, who was a prince of Judah and their leader, set about rebuilding the temple. This was nearly 600 years before the time of Jesus; it was called the second temple, and was inferior to the original structure. It also was destroyed by an invading army. About sixteen years before the birth of Jesus, Herod the Great began repairing it, and after 18,000 men had worked upon it nine years, it was restored with great magnificence. It was this temple that the Galilean disciples of Jesus admired so greatly. The word *Temple* was given not merely to the central edifice, but to all the numerous courts and chambers that crowned Mount Moriah and were enclosed with walls. The Temple was used by Jesus, and afterward by the Apostles, as a figure of the human body, and with great force. As the central building of the Temple was the holy of holies, where only the high priest was allowed to enter, and within its walls the Shekinah or visible presence of Jehovah was believed to meet and communicate with him; so within the human being a divine principle has its dwelling-place, and with this the Heavenly Father meets and holds his spiritual communication. (1. Cor. 3: 16.) The Temple was destroyed, as predicted by Jesus, in the year 70 of the Christian era. A Mohammedan mosque now occupies the top of Mt. Moriah.

Take heed. In this warning Jesus tried to prepare his disciples for the persecution that was coming upon the little company of believers that had gathered around him. They were to be watchful but not anxious, nor were they to expose themselves needlessly to danger, and when brought before kings and rulers, they were not to prepare learned discourses to vindicate their cause, but to rely upon the Holy Spirit, which would give them fitting words at the time of need. "*Ye shall be hated.*" They were not to be discouraged because of the ill feeling manifested towards them. They could not expect that the old customs and usages of the world in regard to religion would be abandoned at once. Only those who had found there was need of a more spiritual understand-

ing of the will of God, could have the courage to break away from the old forms, and they were assured that whatever befell them in this life, if they were strong and steadfast to the end, salvation in the future life would be theirs.

Take heed that no man lead you astray, etc. In this saying of Jesus we see the importance of being true to our convictions of truth and duty as they are manifested to us, being careful to search all things and hold to the truth, or being led, as George Fox advised, by the Inner Light.

"That these things must needs come to pass," seems to be prophetic of the sufferings and trials that those must endure who are true to their highest ideal of right and firm in adherence to duty.

Since his creation, man has always worshipped what he considered some power higher than himself. With the Jews this was embodied in their idea of the I Am, Jehovah, God, King of kings, etc. To the manifestation which they conceived to dwell in the Ark of the Covenant, and afterwards in the Holy of Holies of their Temple, they gave elaborate forms of worship. Our lesson teaches us that Jesus, in foretelling the destruction of the Temple was also preparing men for that truth, that God is a spirit, to be worshipped in spirit and in truth. And as Paul said to the Corinthians, "Know ye not that ye are a Temple of God, and that the Spirit of God dwelleth in you?"—that *we* are the temples, not the buildings that man in his pride or reverence builds in which to worship. Therefore how important it is that we should keep these temples (our bodies) pure and clean, so that they may be worthy of the living God, and that we should say with the Psalmist, "Let the words of my mouth and the meditation of my heart be acceptable in thy sight, O Lord, my rock and my Redeemer."

EXPLANATORY NOTES FOR LESSON 15.

Among the ancient Jews the scribe was the copyist, as well as the expounder of the law. In the Mohammedan order the Mollah holds the same place. In his punctiliousness of dress and his pursuits and deportment he is said to be a fair type of the scribe in the days of Jesus. Of the Mollah, one who has traveled in the East, writes:

"We may see him sitting in his little office, at the corner of the bazaar, with its front open to the street. He is recognized at once, on his little carpet, by his magnificent and spotless turban. The holy book [the Koran] lies open at his side, while with his reed pen he transcribes on the morsel of parchment, laid on the palm of his left hand, the favorite text which has been chosen by the customer who sits or stands close by, holding by the hand the little boy for whom the amulet is being prepared with the neatest calligraphy. Of course the Mollah has been consulted in the choice of a text, which may be a command, a blessing, or a prayer. So sat the Scribe at the corner of the street. The phylactery is still used by the Jews, and the little box which contains it is bound during prayers on the forehead and the wrist, in obedience to the literal interpretation of Deuteronomy 6 : 8

So, too, the next verse is literally obeyed by the modern Jews: 'Thou shalt write them upon the posts of thy house, and on thy gates.' One can always recognize a Jewish house by the little glass phial which is let into the right-hand door-post, and carefully plastered over, but just revealing a very small part of the phial with the parchment strip rolled up within it.

"The scribe of our lesson of the 21st perhaps was desirous of employing for the phylacteries which he wrote some passages which should contain the chiefest of God's commands, and, with that object in view, asked Jesus the question; for we cannot believe, from his reply and subsequent remark, that this scribe was other than honest and sincere, or that there was anything captious in his inquiry. The scribes at this time were divided into two sections: one the party of Shammai, the ultra-ritualistic and Pharisaic party; the others the followers of Hillel, whose leader during all this period was Gamaliel, more moderate and tolerant than the others, holding a less formal interpretation of the law, and advocates of toleration. They appear to have absented themselves from the sanhedrim which condemned Jesus, and as we know, Gamaliel afterwards had the courage openly to plead for toleration."

COMMUNICATIONS.

VINDICATING THE TRUTH OF HISTORY.

EDITORS INTELLIGENCER AND JOURNAL:

It was a tremendous expression of public opinion in regard to the dangerous precedent of ignoring or suppressing History, when eighteen thousand women of Boston turned out on one of the stormiest of days to register their votes against it. I am inspired by somewhat of the same feeling that animated them, to say a word in relation to a notice I read in the INTELLIGENCER AND JOURNAL of a book lately published called (I believe) "Old Westtown." It seemed strange,—among a list of teachers of more or less distinction, to see no mention of Benjamin Hallowell, who spent there some of the best years and the best energies of his life. He is said to have been the first teacher to introduce scientific lectures into schools, (of course, they had been given in colleges), which I understand he did successfully there, and to the end of his life his heart warmed up and his countenance would glow as he spoke of dear old Westtown. He sent his children there to be educated, a son and a daughter, and after a lapse of fifty years, on taking one of his grandchildren to the school, I found that he was still held in pleasant and grateful remembrance. I cannot bring my mind to the belief that a theological difference of opinion could lead to the suppression of the name of one—merely as a teacher—whose life was indeed a fulfillment of the grand utterance of the immortal Lincoln: "With charity towards all, with malice towards none."

PHILADELPHIA, FOURTH MONTH 20, 1889.

SIMPLICITY IS TRUTH.

THERE is hardly one,—perhaps it would be safe to say there is none,—among the authorities whom we respect in literature and criticism who does not testify in behalf of simplicity. The garish has its votaries, but not its reputable advocates. In art, it is the simple which is the true and the beautiful: ornamentation is dangerous, and extravagance in color or design is fatal.

If, then, we were to place the simplicity which Friends have endeavored to maintain only upon æsthetic, and not at all upon ethical grounds, it would be fully justified. It may safely appeal to the universal testimony of the masters of art, in all ages, for the evidence that there is nothing permanently attractive in departures from simple and pure lines of expression, whether it be in language, in writing, in manner, in dress, or in the accessories of civilized and cultivated life.

The formula of the Friends, as commonly expressed, calls for "plainness of speech, behavior, and apparel." This is to be interpreted according to its spirit, and its common sense. It does not demand what is harsh, ugly, or insufficient. It calls for a comparative simplicity,—a plainness as contrasted with what is exaggerated, a chastening of what otherwise might be excessive. The plainness which is simplicity forbids show for show's sake: it does not forbid the expression in any form of what is refined and refining, charming to the appreciation of a true taste. It forbids what is vain, what is meretricious, what is extravagant, what is overloaded, and overdone.

There is evidence in this, as we conceive, of the relation which this one,—like so many others,—of the principles of Quaker action bears to the truths that are fundamental. It is fresh evidence that those principles did not spring from narrowness, but from actual breadth,—not from ignorance but from sound perception and knowledge. That the plainness which proceeds to austerity is not much maintained amongst us need not be cited on either side: individual tastes and feelings have their rights of expression, within the general rule. Neither the spirit of love nor the sense of the beautiful countenances the idea that every one shall express his simplicity

in exactly the same manner, or to precisely the same extent. Those of us who prefer the old-fashioned forms in dress and address, made honorable as it seems to us by the usage of our fathers and mothers, may present for ourselves our idea of the Plainness which our profession calls for, and it need neither be a reproach nor a special honor to us, any more than a different form of Simplicity in others is a discredit or a ground of praise. There must be room for individuality, for the play of character, for the representation of what each spirit demands as its expression of the simple beauties of life.

We suggest these considerations to young men and young women, especially those who may have thought the plainness of Quakerism repulsive or unreasonable. It is not the former; it is founded, as we have just said, on the soundest æsthetic principles. Nor is it the latter: the reasons for it, drawn from the truest and broadest philanthropy, are conclusive. Whether we repair to the authorities in literature and art, upon one hand, or to the teachers and laborers in behalf of mankind, upon the other, we shall find that the Simple is the True, and the Extravagant and Excessive is the False and Vulgar.

New names are being added to our subscription list, each week,—not so many of course, as we should like, but still more than enough to overcome the drain of losses by the death of old subscribers, so that there is a small nett growth of the list. We venture to think that this is evidence of the interest taken in the paper, and an indication that it has a value for the younger class of Friends and Friendly people. It is our endeavor to present reading matter which has interest and usefulness in the present day, and which is connected in principle with what has gone before. The old principles are true and vital: the work of to-day is to apply them to to-day's conditions.

THE INTELLIGENCER AND JOURNAL is being used in an increased degree for advertisements by persons wanting situations or help. We commend these to the attention of our readers, and think that aside from any consideration of the desirability of the business for the newspaper itself, they are a convenience also to its readers. The circulation of the paper was never more extended than now, and we believe that it is looked at carefully from cover to cover by most of those who receive it.

NATURE seems to exist for the excellent. The world is upheld by the veracity of good men; they make the earth wholesome. We call our children and our lands by their names; their works and effigies are in our houses.—*Emerson.*

MARRIAGES.

WILSON—MENDENHALL.—At the residence of the bride's mother, Lombard, Cecil county, Md., Fourth-day, Third month 20th, 1889, under the care of Nottingham Monthly Meeting, Mary, daughter of the late Edwin and Emma H. Mendenhall, to Samuel D., son of Wm. and Mary F. Wilson, of Sylmar, Cecil county, Md.

DEATHS.

FELL.—In Newnan, Georgia, Fourth month 3d, 1889, Mary Amanda Fell, wife of Thomas E. Fell, a son of Lewis Fell, of Wilmington, Del.

HUEY.—In Philadelphia, Fourth month 6th., 1889, J. Thomas Huey, youngest son of the late James and Rachel M. Huey.

JANNEY.—Suddenly, Fourth month 12th, 1889, at the residence of his son, Dr. Edgar Janney, Aquila Janney, in the 83d year of his age. Interment at Goose Creek Friends' ground, Loudoun county, Va.

LAW.—On Seventh-day, Fourth month 13th, 1889, at the residence of his parents, William and Elizabeth T. Law, William H. Law, in the 29th year of his age; a member of Chicago Executive Meeting of Friends.

MOORE.—At his residence in Marple, Pa., Fourth month 6th, 1889, Jehu Moore, aged 75 years. Interment at Darby Friends' ground.

REID.—At West Grove, Pa., Fourth month 11th, 1889, George Reid, formerly of Philadelphia, in his 92d year, an uncle of the late John H. Reid, of West Chester, Pa.

RIDGWAY.—At the residence of her husband, Middletown, Del., Fourth month 10th, 1889, Lydia Willits, wife of Jesse C. Ridgway, aged 62 years.

STIRLING.—Fourth month 8th, 1889, Clement Biddle, son of Edmund and Anne Biddle Stirling, of Philadelphia, and grandchild of Clement Biddle, Chadd's Ford, Pa., aged 5 weeks.

SWAYNE.—Fourth month 11th, 1889, at his residence, Christiana Hundred, Del., after a severe illness, Henry Swayne, aged 71 years; a useful member of the community and warmly attached to the principles of Friends. For many years he was the main stay of the little meeting at Centre, Del.

TAYLOR.—Fourth month 10th, 1889, at the residence of his son, Jesse J. Taylor, West Goshen, Chester county, Pa., Joseph L. Taylor, in the 95th year of his age; a member of Birmingham Monthly Meeting.

WILKINSON.—Suddenly, at Wheeling, W. Va., Third month 15th, 1889, Nathan Wilkinson, aged 78 years and 23 days. Formerly of Wilmington, Delaware.

MARY H. EVANS.

It seems fitting that more than a passing announcement be made of the recent death of Mary H. Evans, of Cincinnati, which occurred 24th of Third month. She and her husband, Jason Evans settled in Cincinnati in 1842. During all the following years to the date of death they were faithful and concerned members of Cincinnati Meeting, their children being interested and useful members of the same.

Almost all visiting Friends from East or West have been hospitably entertained by them. The home of the parents, pleasantly situated on Mt. Auburn, was surrounded by those of their three married children. These with their children made a happy circle, of whom the grandparents were always the centre.

Jason Evans passed away in 1876, since which time the mother, with a beloved and devoted niece, have dwelt to-

gether in the homestead. Mary Evans was a constant attendant of her own particular meeting, and of Miami Quarterly and Indiana Yearly Meeting, to which she belonged, as well as a frequent visitor to other yearly meetings.

In these assemblies her voice was seldom heard, but she followed the exercises closely and feelingly. She was an invaluable member of the various committees, her judgment being excellent and well considered, not too easily swayed by her emotions, but kind, fair, and charitable. She was unspoiled by prosperity, and kept herself free from the social whirl of the world around her.

Simple and plain in appearance and deportment, the poorest and plainest felt at ease with her. No one felt conscious of any lack in her presence, because she made no distinctions, and was no respecter of persons. It seemed to be her desire to "treat everybody well," an example we may all profitably follow. Always kind and thoughtful, as many of her own Society as well as others could testify.

The writer of this little tribute had occasion in early life to know her kind and generous disposition, and owes to her and her family a debt of grateful memory. Though this slight testimony seems a very inadequate expression, yet I am sure if her many friends could add their tribute an excellent and unusual memorial would thus be made in loving honor of her worth. Her children and her children's children will "rise up and call her blessed."

"Farewell!

And though the ways of Zion mourn
When her strong ones are called away,
Who like thyself have calmly borne
The heat and burden of the day.
Yet He who slumbereth not nor sleepeeth
His ancient watch around us keepeth;
Still, sent from his creating hand,
New witnesses for Truth shall stand,
New instruments to sound abroad
The gospel of a risen Lord."

For Friends' Intelligencer and Journal.

LETTERS FROM BERLIN.—I.

In a room in a "castle in Spain," where I often go to spend that

"Little pause in life while daylight lingers
Between the sunset and the pale moonrise"

to sit in the glow of the fire light and watch the flickering shadows play hide and seek among the dark oak furniture, is an old folio on the book-shelves. I love to take it down and turn its yellow pages and look at its vivid pen and ink sketches and read the accounts of life in a land lying far toward the North in Linnæus's day, for it is his "Tour in Lapland," of which Richard Jefferies says: "It is the best botanical book written by the greatest of botanists, specially sent on a botanical expedition, and it contains nothing about botany." But I have no mind now to verify his statements by a residence nearer to the North Pole, so slowly do we come out from the gloom and darkness of the winter here, like creeping out from a cave or tunnel. Yet we do have an assurance that "The hounds of spring are on winter's traces," and that soon we will be listening to the thrushes and nightingales singing in the Thiergarten, and the soaring skylarks on the sandy, heath-covered moors beyond Charlottenburg, for the daylight hours increase, the boy who brings the breakfast at seven in

the morning no longer carries a lantern to find his way up the steps, and has left off his great coat, and his voice has a cheerier note in it, as he hands in the bag of hard oblong rolls, thickly sprinkled with poppy seeds, and round soft ones that taste like Auntie's rusk in childhood's days. The heavy piles of snow have all been carried away in wagons from the streets, the long boats lying for months in icy moorings are moving again upon the Spree, and in the Potsdamer Platz are men and women with wide baskets full of sweet violets and golden acacias and jonquils, and red anemones from Italy, the breath and fragrance of spring all about them. And our own home window is bright too with crocus blooms, golden, white, and purple, and a great pot of daffodils which carry the sunshine within them, singing as it were in their hearts,—

"Darlings of the sun are we
That wear his color everywhere,"

and bringing to my mind's eye whenever I look at them, "The host of golden daffodils," that bloom in Bartram's Garden from the stone steps down to the great cypress tree,—the glimpses of the river seen flashing in the sunlight, between the tangled maze of budding boughs, to which the Cornus mas gives color and warmth of tone. What a joy there is in memory! How full it grows of sun-kissed pictures and how often our joy days are marked with flowers. In walking through the Thiergarten I turn quite aside from my way, unfaithfully, only to pass by a clump of this Cornus, to stand near it for a few minutes, because of the happy, homelike memories that cluster among its stems, and strong buds, of a spring day in Bartram's Garden.

The Thiergarten! Six hundred acres of trees, and avenues, and beautiful statuary, and lakes where the skaters throng in winter, and sand piles where the children swarm in summer—walking there in the morning, when the sun shines, the trees making a dark net work against a smoky blue background of distance, the long, long vistas, figures moving far down them in the blue haze, the little birds piping softly,—instinctively there comes to your lips: "Enter into his gates with thanksgiving, and into his courts with praise." Away off on Königgrätzer street is the roar of the city, muffled like the beat of waves and as you go on, far ahead through the trees gleam the majestic Doric columns of the Brandenburger Thor, through which you look down Unter den Linden, where are all the royal palaces, and the armory and library and university and opera house and great art museums and statues in marble and bronze. Walking there one day this winter with a bright little American boy, he paused before the figures of William and Alexander Humboldt and asked about them, and then with face glowing exclaimed, "How I wish I could travel about the world and be carved in marble!" The Emperor and the imperial family are often to be seen driving there. The people stand and watch for them and shout "hoch! hoch!" as they pass, and the soldiers in the guard houses salute with loud rat rat of drums. Two anecdotes of the crown prince and his brother that are current, reveal some phases of child life in a

palace. The guards stationed at the palace doors are required to salute the imperial children every time they pass, with drum taps. One day the Emperor was writing; he heard an almost incessant saluting and went to learn the cause: the children were going through one door, around and through it again, over and over, the guards strictly attentive to duty. The Emperor boxed the children's ears. Another day a distinguished preacher with a companion was making a call upon the Emperor. Their two tall hats were left in the ante-room, and the two royal boys were left there too. They seized the hats, and wanted to see the crowns fall down "crush hat" style. But the preacher's was not so arranged, but stiff as a board. The crown prince after vain efforts told his brother to sit on it, "*Er Muss herunter!*"

When the Prediger came to put on his hat the Emperor wished to send for a new one to replace it, but he preferred to keep it,—for the sake of historical interest perhaps.

Speaking of the people standing and waiting on the Linden to see the Emperor drive by, there seems to be more leisure here than in many other places for standing and contemplating things,—for following Thorean's saying that "There is no philosophy equal to the observation of the things before you." A squirrel leaping among the boughs of a tree, some workmen digging in a sand bank, or mending the asphalt pavement will attract a crowd of interested gazers; a row of women will stand and look into a meat shop window, where steaks and roasts and every variety of sausage and wurst are displayed, with pots of blooming hyacinths and azaleas interspersed, and often a bust of the Emperor holding a central position among them. I have concluded that these women must be keepers of "pensions," who had on their supper tables last evening veal cutlets and cheese, sliced raw ham, and raw salmon, raw goose breast, pickled, smoked, and sliced, and tongue and sausage, and must stand where they have other delicacies of the same order in view, to properly vary their *menu* and make it attractive to critical American boarders, who will eat heartily of these dishes and complain next morning that the climate of Berlin does not agree with them. It is comical to see a huge man staring at a window full of ladies dress goods, but if he is an artist not sure of his colors, he could have no more favorable standpoint for verifying any belief he may hold that certain tints when placed side by side are inharmonious. But where the "rich and the poor meet together," tiptoe, and wait their turn for a chance to see, is in front of an art store.

Some evenings ago, while waiting in a hall for a beautiful performance to begin, a Japanese gentleman was introduced to me; a glance at his face and slight figure, caused me to say on hearing his name, "I think I heard you lecture at Swarthmore College two winters ago." "Yes," he had been there—and spoke of the pleasant evening he spent, and of the beauty of Swarthmore's surroundings, and asked many questions about the welfare of the college and of those whom he met there. With the same ease and quiet dignity with which he lectured upon

"Japan and the Japanese," so he talked of his rambles in Ireland, where everywhere he noticed a beautiful golden flower and asked its name. Some told him it was "frouze" and some that it was "fairze." He pondered it unsatisfied, until two lines in the "Deserted Village" dawned upon his memory, and the yellow furze that blooms so often in the lines of English poetry stood revealed to him. He spoke of his visit to Carlyle's old home in Cheyne Row, where the windows were dilapidated and "To Let" was upon the wall, of his admiration for Carlyle, of the beauty of Dr. Quincey's style, of new American books and old German ones, of Berlin life and how one must lower his American standards if he would see it. In his native country is a proverb: "It is always darkest at the foot of a light-house"—and since he has come away from America, he knows how he truly loves and appreciates it;—but he seems a true representation of Machiavelli's wise man—"who carries his country at the soles of his feet," garnering rich sheaves of thought, and of memories from each country,—rejecting all that is opposed to the true humanities, keeping always his own gentle soul, his dignified bearing, his perfect courtesy. America or Germany,—it is the same old world one has always been used to, a little different in outward aspect, but full of beauty and poetry and melody, yet "Underneath it all the loud perpetual wail as of souls in pain." Orion with his glittering club keeps watch at night over the red tiled roofs opposite, as over the tree tops at home, and geraniums and lilies bloom in the windows here as there, and great hearted, inspiring, generous people are confined to no one locality or land or age, but are everywhere and always weaving threads of "God's own sunlight thro' the woof of time." And when one comes into the presence of one of these, how one's soul seems to expand, and all good and brave things appear possible! I would like to tell of one or two such characters here, but have transgressed my limits already and must say, with all the other Berliners, "Adieu,"

Berlin, Third mo 2

FROM THE SCHOOL AT MT. PLEASANT, S. C.

[Abby D. Munro, in a report to friends of the school at Mt. Pleasant, S. C., gives an animated and interesting account of the opening of the new school-house, on "Washington's Birthday."—Eds.]

We have usually been very fortunate in our choice of a day, as regards the weather; but not this year. We have had a great deal of rainy, dreary weather this winter, but this was the rainiest, dreariest of all. The storm-fiend was abroad. A real New England northeaster had set in during the night, and the storm had increased in violence as the morning advanced, growing colder all the while. A more disagreeable, uncomfortable day could not be imagined. Occasionally the rain would turn to sleet, and add greatly to the general discomfort.

We had gone too far with our arrangements to retreat, but we felt so sorry for the children. That this day of all days should be so stormy! How unfortunate for them, we thought; how disappointed they will

be, poor little things, to be thus deprived of the pleasure they had so long anticipated! And we planned in our own minds what we should do to make up the loss to them. With this feeling we plodded on through the empty streets. The sound of merry voices, as we approached the school-house, assured us that a few at least had ventured out; but as the time for opening school drew near, it became evident that our pity had been lavished in vain. They began to pour into the room; village children and country children, those who lived far and those who lived near. Everything that could be laid hold of to protect from the rain had been appropriated; old bags, pieces of carpet, old dresses, big coats covering little boys, little coats drawn over big boys, etc.

As these grotesque figures presented themselves at the door, shouts of laughter would arise from those who had preceded them, till we concluded the weather hadn't dampened their spirits if it had dampened their garments. When at last we called them to order, we found but six empty seats; an attendance such as we had never had at any occasion of the kind before. "Poor little things" indeed! We had anticipated having some of our friends with us; but no living woman but a school teacher, in this section of the country, would think of venturing into the streets in such a storm. So we had our good time all to ourselves. And when, after we had gone through with the programme; they had sung and sung till the walls echoed and re-echoed with the chorus of their sweet voices; after we had read and talked, distributed the gifts, chosen the cards, exhausted the grab-barrel, and very nearly exhausted ourselves; we found it to be three o'clock, we could hardly believe it—so little had we taken note of time.

The rain continued to pour in torrents, the sleet occasionally beating against the windows and in at the open doors. It was comfortable and pleasant, and they all dreaded going out in the storm. But they were hungry also (judging by ourselves); so after a while longer spent in showing and admiring their gifts and general merry-making, they wrapped themselves and each other in their bags and carpets, and garments and pieces of garments, and selecting their umbrellas and apologies for umbrellas (mostly the latter) out of the empty nail kegs out of which we had improvised umbrella-stands, they went forth into the storm satisfied and happy, to gladden the hearts of their parents with the sight of their pretty, useful gifts.

There was a large variety as well as quantity of woolens, which you know play the most important part in Santa Claus's contribution; and the bright sacques, scarfs, and shoulder shawls were given where we thought they would carry the most comfort, taking care that all who were not there or did not receive a cap last winter should have one this. So all were pleased and satisfied. As it has chanced, we have had cool weather most of the time since; so they have had ample time to air their new woolens, and find out their comfort. One disconsolate-looking but bright little girl has worn all winter to supplement very thin garments, an old drab under-vest, cut open and hemmed, for a sacque; adding by

no means to her general appearance if to her comfort. Greatly to our relief it has given way to a bright, well-fitting woolen sacque which seems to have increased her self-respect as well as the respectability of her appearance.

One tiny little fellow has entered school this winter who is unusually bright and cunning; so much so that he is a great pet with all. He has *no father* ("neber had one") and a very trifling mother; and he had been to school barefooted all winter crying sometimes, his feet pained him so, with the cold. In his bundle I put a good pair of stockings and shoes. When he opened it and saw them, he jumped right up and down and clapped his hands; and the others were almost as pleased as he, so much had they pitied him with his little bare feet. He sat down on the platform and they drew on the stockings, then the shoes and buttoned them up; and he was as happy as a king. . . . The possession of the suspenders by those who needed them most has removed certain fears that haunted us every time said individuals had attempted to cross the room. The socks which were hardly long enough for those who wore short pantaloons, have since appeared before us pieced up at the top with more regard to comfort than to taste, it is true, but in a manner that enabled them to answer their purpose. And so has passed another of these pleasant eras in the lives of these children; and so long a time has elapsed since the first, that children's children have risen up to enjoy them. For quite a number of our pupils now are children of former ones; and bright little things they are, too.

Our attendance thus far has been excellent, even better than usual; and it is no fault of the children that it cannot continue so to the close. But planting time is approaching, [This was written some weeks ago.—Ems.] and the country children will soon begin to drop off. Their advancement is about as other children of the same age generally. A friend of mine who was principal of a large school, was once asked how many scholars he had. His reply was, "I have about three hundred *pupils*, but very few *scholars*." I think that would be the truthful answer of all teachers of public schools, myself among them. But I don't think any can go ahead of these for originality, though; one of the boys who had for the subject of his composition, "Water," startled us with the announcement that if it had hadn't been for water, Christopher Columbus could never have discovered America. Which I thought quite equal to that of the boy on "Pins," who informed his friends that pins had saved a great many persons' lives, because they hadn't swallowed them.

We have had quite a number of applications from persons residing in the interior of the State, for accommodations for children to board and attend school; but it is very difficult to find places for them except they have friends. We have eight pupils only who are boarding in the village for the privilege of the school. Another year we hope to make arrangements for others. Two boys who live fifteen miles from the village found a place within four miles of the school, and think nothing of that distance. We have not so many country children as

we used to have; but on an average, they attend longer. While I have been writing I have received a letter from a minister asking me to take his two little boys to board and attend school. If I were n't so cramped for room, I would, by all means.

NEWS OF FRIENDS.

VISITS IN WESTERN QUARTER.

DEAR EDITORS:

OUR time has been very fully occupied since we came within the limits of Western Quarter. We were met according to previous appointment, and received a cordial welcome from the Friends of Centre Monthly Meeting with whom we spent First- and Second-days, (Fourth month 7th and 8th), attending the meeting at Centre, and participating in the First-day school into which the meeting resolved itself, all in attendance remaining and taking part. The occasion was one of interest, and we felt that a spirit of earnest inquiry and a desire for a better acquaintance with the principles of our Society prevails in their midst. The meeting is small.

ON Second-day the monthly meeting convened at Hockessin. It was a small gathering, the farming operations interfering with some, and sickness with others, but the meeting was satisfactory. The spoken word was listened to with attention, and in the meeting for business an earnest spirit prevailed. The Temperance question claimed consideration, yet it was thought nothing was needed but an expression of sympathy with the Prohibition movement, as the meeting is not within the Pennsylvania limits.

THE meeting on Third-day was held at Unionville, to which place we were kindly conveyed the evening before. This meeting is made up of three preparative meetings. It was not as well attended as its numerical strength would lead us to expect, but the children from the school on the grounds were brought in for the first meeting and added greatly to the interest we felt, the young being always an inspiration to those who stand in the midst of such an assembly. The business that followed was much the same as is usual in our monthly meetings that precede the last quarters before the yearly meeting; with the additional evidence of an increased interest in the Prohibition movement. There was felt to be a need of fuller dedication and concentration of Christian effort in this locality.

THE meeting at London Grove followed; but the carriage waits and these brief notes must be brought to a close. L. J. R.

—A Friend in Chicago remarks in a private letter the serious loss suffered by the meeting at Cincinnati, in the death of Mary H. Evans. She also says: "Remarkable many recent articles in prominent periodicals, it seems to me there is a stirring up of testimony in which the early Friends are being studied, and assigned to places. Professor Huxley even has brought up George Fox. We had a most excellent and deep paper on the 'Value and Work of the Mystics,' read before the Women's Club, Chicago, last week, and the response to it gave evidence that their spirit still exists. Several spoke to the paper. Harriet Hosmer,

the sculptor, was with us, and a Mrs. Yale, an artist from Boston. They were invited to speak to us, and the latter responded."

—At Horsham meeting-house, on the afternoon of last First-day, a Temperance meeting was held under the care of the Quarterly Meeting's Committee of Women Friends. It was addressed by Dr. H. T. Child, who spoke for an hour, with chart illustrations of the injury done by stimulants and narcotics. He strongly urged voting in favor of the adoption of the Constitutional Amendment.

INDIAN AFFAIRS: FRIENDS' VISIT TO THE PRESIDENT.

MEMBERS of the Committee on Indian Affairs of New York and Baltimore Yearly Meetings visited the city of Washington on Seventh-day the 13th instant. The object of the visit was to have an interview with the President and Secretary of the Interior on behalf of our Religious Society concerning the Indian Question, to inform them of the nature of the work we are engaged in, state the views of Friends on the general subject of the treatment of the Indians, and ascertain, as far as they were willing to give expression thereto, the views of the President and Secretary on that subject.

On arriving at the President's house the Friends were, in a few minutes, admitted to his room. After a time not uninterestingly spent in witnessing the process of solicitation for office on the part of a number of members of Congress, who took precedence of the delegation by virtue of White House etiquette, the President came forward and greeted the Friends quite cordially. Thomas Foulke, of New York, introduced each member of the delegation and explained the object of the visit. A brief address was then read by Joseph J. Janney, of Baltimore, setting forth the views of Friends. (It is given in full below.)

Aaron M. Powell followed in a few remarks, emphasizing one or two points in the address, and continuing, alluded to the deplorable condition of affairs in Alaska, and expressed the hope that the attention of those in authority who could do anything to relieve the situation there, would hasten to afford that relief.

The President then said he was pleased to meet the delegation, and sympathized with the views that had been expressed. In reference to Aaron M. Powell's allusion to the condition of affairs in Alaska he said he had appointed a Governor for that Territory who he hoped would meet the approval of Friends and all others interested in good government. That the appointment was made after careful investigation into the moral character of the man, and his antecedents and habits were well considered. He felt satisfied that the new Governor would regard the moral aspect of the question, but if he did not come squarely up to the requirements of the situation, he would not be allowed to stay there. As to the general question of the treatment of the Indians, he approved of what the delegation had presented, but the question was one demanding patience. The solution could not be arrived at suddenly or without

reflection. The thought presented in the address concerning the improvement of the homes of the Indians was a good one, and deserved careful consideration. He thanked the members of the delegation for their visit and shook the hand of each at parting.

The Interior Department was then visited, and an audience was granted the delegation by the Secretary, John W. Noble. A similar address was read to him, to which he responded in some very practical and sensible remarks. He assured the delegation that their suggestions would receive his thoughtful consideration at the proper time. He expressed his determination to punish any contractor or Agent who should be caught imposing upon or cheating the Indians. Whilst he knew he wasn't smart enough to catch them all, he had the disposition and the power to punish them when they are caught.

The delegation consisted of those whose names are signed to the address, and all expressed themselves as pleased and encouraged with the interviews. J.

To the President and Secretary of the Interior:

Both as an organization, and by individual effort, the Society of Friends has labored in behalf of the Indians since that memorable and historic day in 1682, when William Penn made his famous treaty with the Indian tribes of Pennsylvania.

The interest that Friends have taken in the Indians has been stimulated by the feeling that they have been unjustly treated in many instances by the Government, and at all times by unscrupulous white men who surround their homes and endeavor to get possession of their lands. Their condition has constantly appealed to the sympathy of Friends, and we are united to them in a bond of brotherhood that is recognized by the Indian always.

It is not our purpose now to refer to the efforts of our Religious Society during the long period of years between 1682 and 1869, further than to state that during that time there was no interruption to our work. Long journeys were made by Friends during the early part of the present century, into what was then the wild western country, to look personally after the wants of the Indians and to gain information that would qualify the Friends to intercede successfully in the Indians behalf.

Since 1869, when President Grant inaugurated his peace policy and called us more fully into the Indian work, we have concentrated our efforts to those Indians who were located in Nebraska and Dakota, and have endeavored to make our work practical in its character and permanent in its effects. Whilst we have always avoided any effort to make proselytes of the Indians, we have not neglected to inculcate the principles of the Christian religion. The central idea has been to reconcile them to their changed surroundings; influence them to accept as the best thing for them the provisions of the "Land in Severalty law;" make them feel the dignity and accept the responsibility of separate domestic establishments, and to help them to be self-respecting and self-supporting members of the community in which they live.

Indian Agents who have represented the Society of Friends have uniformly directed their efforts to educating the Indian men in the use of farming implements and in mechanical and agricultural pursuits generally. Their efforts have met with a good degree of success. We refer as an illustration to the Santee Sioux tribe, located in the northern part of Nebraska. These Indians, under the influence that we have mentioned, have, in nearly all partic-

nlars, about reached the point of independence of Government oversight. We wish to call attention to one matter which we regard as important and in which we have for some time taken an interest, and that is the necessity of adopting some means of teaching the Indian women the art of housekeeping. It seems to us to be the especial need of all those communities of Indians, where they have their lands in severalty, and are occupying separate homes, that this instruction shall be furnished. Our idea is that the Government shall provide for the appointment of a sufficient number of matrons, whose duty it shall be to go amongst these families of Indians and instruct the women in practical household duties. The men are responding nobly to the instruction that has been provided for them; they are becoming industrious and in many instances successful farmers and mechanics, but the women, lacking the training that is necessary, have not advanced proportionally. We regard it as a matter of vital importance that the *home* influence shall be brought to bear on the Indian in his daily life as a powerful agent in the improvement of his moral and spiritual condition. This benign influence cannot be made available whilst the home lacks so many elements of beauty and attractiveness as is the case at present.

The importance of education for the children is of course recognized by all as the great work of the present and the hope of the future for this people, and we desire to commend the efforts of the Government and all religious denominations for the universal attention they have given the subject.

We desire to offer to the President and Secretary such assistance as it may be in our power to render, in the great work of Indian civilization and advancement.

YOUNG FRIENDS' ASSOCIATION: COURSE OF READING.

At the meeting of "Young Friends' Association," held on Second-day evening, Third month 11th, it was decided that a Course of Reading, with especial reference to the history and principles of the Religious Society of Friends should be arranged for. The work selected to be first read was "The History of the Society of Friends," by Samuel M. Janney; and the Committee on History was instructed to prepare and report at the next meeting a plan for reading this work.

The plan reported by the Committee on History, and adopted by Young Friends' Association at its last meeting, (Fourth month 8th), is as follows:

The work selected for reading, Janney's "History of the Society of Friends," will be divided into short portions to be read monthly, so that those whose time is most limited can still follow the plan proposed. For the month preceding the meeting in

Fifth month (to be held on Second-day evening, Fifth month 13th), the "Introduction" to the History has been selected as the portion to be read; for the next month, (preceding the meeting in Sixth month), the first chapter, relating to George Fox, has been selected; and for each subsequent month, including the Seventh and Eighth months, (in which no meeting is held), two chapters in regular succession are to be read, until the work shall be completed.

It is the desire of the Committee on History to be able to present at each meeting of the Association, after the course shall have been begun, a short article having especial reference to the portion of the History read during the preceding month. It is suggested that, so far as may be practicable, Friends who adopt the course of reading outlined also read other works on similar subjects to those treated in the portion being read; as, for instance, when the first chapter of the History, (which relates to the early life and labor of George Fox), is read, portions of George Fox's Journal might be read with profit.

It is hoped that all Friends everywhere who feel an interest in the history and principles of our Religious Society, whether members of the "Young Friends' Association" or not, will adopt the course of reading selected by the Association and outlined above. The work chosen for reading can be obtained of Friends' Book Association, S. W. corner 15th and Race Sts., Philadelphia.

PROHIBITION IN IOWA.

EDITORS INTELLIGENCER AND JOURNAL:

As the question of Constitutional Prohibition of the liquor traffic is soon to be submitted to the voters of the State of Pennsylvania, I have felt like writing a few lines in regard to the workings of the prohibitory laws in Iowa, that I might thereby do my feeble part in helping to carry forward this great work of moral reform, and if possible refute some of the false statements in opposition to Prohibition. Iowa failed to secure the insertion of a prohibitory clause in the State Constitution, not by the will of the people, but by a technicality in the manner of procedure in the Legislature (so decided by the Supreme Court.) But the State has a rigid prohibitory law, prohibiting the sale of or manufacture of all kinds of intoxicating liquors as a beverage. And it is in regard to the effects of the enforcement of this law that I think the friends of good order, temperance, and morality should speak at this time. Judging by the experience of the temperance work in this State, you will no doubt hear it stated many times, that "in Iowa and Kansas where Prohibition has been tried it has proved an entire failure;" that "in those States there is more whiskey sold and more drunkenness now than before the enactment of this law;" that "it is driving good citizens from the State, and ruining business;" and other statements equally untrue. Such utterances usually come from those interested in the saloon business or liquor traffic, or their associates. But you will sometimes hear them from men of more influence,—those claiming to be temperance men, but in favor of "high license" as against Prohibition, and the friends of Prohibition should be prepared to

meet these statements with the facts in the case. Instead of being a failure, Prohibition has proved to be a grand success in Iowa. And the people of this State are becoming more and more in favor of it, as they see the good results of its enforcement. Official reports from over the State show that in eighty-five counties the law is as well observed and as strictly enforced as any of our laws, and that drunkenness and other crimes are very materially reduced. It is true that in some of the "river towns" where there is a large proportion of foreign population the law is not well enforced, and in a few cities no attempt is made to enforce it, owing to the failure of the city officials in those places to do their sworn duty. But the work is going on, and one after another they are forced to give it up. Only a short time ago the officers of Iowa City, (which has been one of the worst in the State), yielded to the force of the law and closed every drinking place in the city. And we hope at our next legislature to get such enactments as will compel them all to submit to the clearly expressed will of the people of the State. Governor Larabee, through numerous letters and speeches, has given his views and observations of the workings of the law in this State. I will give some extracts from them. He says: "As to the assertion that Prohibition has driven people out of the State, I think not a man has left on account of Prohibition whom it is desirable to have return. Many of those interested in the saloon and liquor business and such persons as are usually attracted by those interests have left, and the State is largely the gainer thereby. The cheap lands in the States and Territories west of us have induced a great many enterprising and valuable citizens to emigrate independent of any influence of Prohibition. Yet there has been a steady growth in our population, and the census of 1890 will probably show in Iowa at least 2,000,000 inhabitants. The vote at the last election shows an increase of 65,329 votes over the election of 1884." "As to the depreciation of values of real estate occasioned by Prohibition, it is the sheerest nonsense. The banking business of the State is perhaps as fair a barometer of business as can be found. The number of banks has increased from 186 in 1883, to 224 in 1888. Deposits have increased from \$27,231,719, in 1880, to \$39,935,662, in 1888." "I think more than half the jails in the State are entirely empty at the present time. There are 98 less convicts in our penitentiaries than there were three years ago, notwithstanding the growth of our population. Expenses of the Criminal Courts have decreased very largely during the last few years." "Tramps are very scarce in Iowa. There are evidently very few attractions for them here. Probably more than 3,000 of their recruiting stations (saloons) have been closed in Iowa during the last five years." "The wives and mothers of the State, and especially those of small means, are almost unanimously in favor of the law. The families of laboring men now receive the benefits of the earnings that formerly went to the saloon. There is no question in my mind that the law is doing good work for our people." "My views heretofore advanced in favor of the law are strengthened and confirmed by added

experience." "Our people are more and more determined to make no compromise with the saloon." "The law has more friends in the State than it ever had before, and I am satisfied no State can show results more satisfactory." That the homes of Pennsylvania may triumph over the saloon, and peace, happiness, and prosperity increase, is the wish of your friend,

EDWARD E. HARRISON.

West Liberty, Iowa, Fourth month 8.

HOMES DURING YEARLY MEETING.

SOME inquiry has been made of us for places where Friends from the country, attending Yearly Meeting, may be accommodated with board. We may mention that there is a committee appointed jointly by the three monthly meetings of Philadelphia, to have in care the suitable entertainment of Friends during the yearly meeting, and a sub committee is in charge of the subject of "finding homes." This consists of the following persons: Jos. M. Truman, Jr., 15th and Race sts.; Mark Baner, 908 N. 17th st.; Sarah L. Haines, 1513 Marshall st.; Emiline L. Moore, 1114 Mt. Vernon st.; George Watson, 723 N. 8th st.; Matilda V. Lobb, 1704 N. 18th st.; Wm. W. Birdsell, Friends' Central School; Tamar Hartly, 1511 Swain street.

ORTHODOX FRIENDS.

—The sessions of Philadelphia Yearly Meeting began on Second-day of this week, (15th instant), at the meeting-house, 4th and Arch streets. It is announced that Samuel Morris, a well known minister of the Orthodox body, has the approval of the several meetings in their order, for a visit to Friends of Great Britain. Thomas P. Cope will accompany him. As this is the first visit by a minister of Philadelphia Yearly Meeting to the English Friends, in a long period of time, it will be noted with some interest.

—The Association of this body which is devoted to aiding the Southern schools for colored children appears to be in active operation. It held its annual meeting on Second-day evening, President Rhoads, (of Bryn Mawr College), presiding. The annual report stated that assistance had been given directly to schools having about 600 colored pupils, in North Carolina and Virginia, besides to other schools at different points in the South. The Treasurer reported a balance of \$1,017 in cash and \$5,000 invested. Addresses were made by Dr. Henry Hartshorne, Samuel Morris, and Dr. Rhoads, and officers were elected for the ensuing year.

—The arrangement of the terms at Westtown Boarding School will hereafter be similar to those of other schools,—that is, there will be a vacation in the summer. For this summer the old arrangement continues, and the term will open on the 23d instant.

OUR Lord and Master

When He departed, left us in his will
As our best legacy on earth, the poor!
These we have always with us; had we not,
Our hearts would grow as hard as are these
stones.—*Longfellow.*

SWARTHMORE NOTES.

COLLEGE opened for the spring term on Third-day morning, after a recess of nearly two weeks.

—Work is progressing on the improvements on Whittierfield, recently undertaken by the corporation. There is considerable to be done yet, however, and it will be some weeks before the grounds will be ready for use.

—Wyatt C. Randall, Ph.D., of Johns Hopkins University, has been appointed Assistant Professor of Chemistry, and will commence his duties at once. This assistance for Dr. Day will enable him to carry on his experimental work to much greater advantage.

—The *Haleyon*, the college annual, is expected to appear the latter part of this week.

—President Magill, and Professors Appleton, Smith, Holcomb and Furman, the judges, have selected the following students to deliver the orations for the Magill prizes in the Sophomore and Freshmen classes: from '91, Josephine T. Ancona, of Pennsylvania; Eliza R. Hampton, of New York; Esther Haviland, of New York; John W. Hutchinson, Jr., of New York; William C. Sproul, of Pennsylvania, and Zaida E. Udell, of Michigan; from the class of '92, Charles B. Hart, of Pennsylvania; Gertrude Hutchins, of California; Georgianna Porter, of Maryland; Florence D. Reid, of Pennsylvania; Laura M. Smith, of California, and Edward M. Underwood, of North Carolina. No less than thirty-one competing orations were submitted to the judges, from which, according to the terms of the foundation, they were to select six from each of the eligible classes. The contest will be held in the college hall on Fourth-day, Fifth month 8th.

—Owing to the change in the time of the spring recess, the date of the Somerville reunion has been postponed to Seventh-day, the 27th; that of the sports of the Preparatory School to Fourth-day, the 24th, and that of the gymnasium exhibition to Seventh-day, the 20th.

OUR CHILDREN.

I LOOKED at the happy children
Who gathered around the hearth;
So blithe they were, no children
Could happier be on earth;
With their merry plays, and their winsome
ways,
And the sound of their silvery mirth.

Then I thought of those other children,
So wizened, and hard, and bold,
Who huddle in slum and collar,
And shiver with want and cold;
Not fresh as the dew, or the morning's
hue,
But haggard and lean, and old.

But yet may they still, those children,
Be taught to forget their pain;
And gathered in arms that love them,
Their laughter may come again;
And the stare of woe and the craft may go,
And the spirit be washed of stain.

But it is not in cold-book learning
Those children's hearts to move;
And the stony eye of the serpent
Is death to the stricken dove;
'Tis an angel alone can touch them,
And that angel's name is love.

For whatever the world may fancy,
And whatever the wise men say
Of our nineteenth century progress,
Of a new and a better way;
Still it takes a soul to make a soul
Now, as in the olden day.

—*The Spectator (London).*

THE FIRST NOTE.

WE heard, this morn, the bluebird's voice
And gone at once were care and gloom:
We knew the world's great jubilee
Had just begun, of song and bloom!

We said: It now is time to watch:
For every day will, faithful, bring
Some new, peculiar gift, to make
Complete the splendor of the spring.

The willows, too, the tidings bear:
With gilded signals lifted high,
They tell their comrades, dull and deaf,
A pageant gay will soon pass by.

The shy hepaticas will peep
From 'neath their silken, downy hoods
To ask their mottled, guardian leaves
What so disturbs the quiet woods.

The maple buds will fling aside
The braided folds of crimson vest,
And all their golden stamens drop
To coax the orchis from her rest.

The wind will change its weary wail,
And fold its wildly rushing wings,
And raise a softly pleading voice
To call to life all lovely things;

Will gently bid the daffodils
To lift their drowsy lids, and shake
Their yellow curls in sly rebuke
Of feeble gleams the sunbeams make.

The mountain in the clear, glad sky
Will wear again his ancient crown,
And seem through April rain to pour
Its carcanets of jewels down.

Yet, 'mid the rapturous delight,
O bluebird, we shall not forget
That first, sweet, tender note to which
The stirring harmony was set!

—*Carol. Cathcart Day, in Christian Register.*

"You do not need to worship? May be so.
I judge you not;
Only, they say the dog that does not know
A master, like a savage wolf will grow,
Hating his lot,
And is a sorry brute, until he find
A mightier will than his, and nobler mind."

"To me the meanest flower that blows, can give
Thoughts that do often lie too deep for tears."

—*Wordsworth.*

WHY SCIENCE STUDENTS GO TO GERMANY.

THE superiority of the instructors is the most important factor. The German institution, the *privat-docent*, is very effective in preventing the fossilizing of the professors. Upon showing a requisite degree of scholarship, any student is allowed to give lectures upon any subject in his department. He receives no pay from the university, but if he can succeed in obtaining hearers he is entitled to all the fees. If he is a good lecturer, the attendance increases, and the full professor loses a corresponding number of students. Not only does the latter lose the fees of the students, but he soon loses his popularity, and the *privat-docent* is on a fair way to a professorship. There is thus a scientific rivalry continually going on, and the professors are forced to keep themselves well informed. There is a mathematical professor in one of the Bavarian universities who for three semesters had not a single student. All the students who should have attended his lectures preferred to hear a live young *privat-docent*. Nearly all the present professors have in past years served in this capacity.

From what has preceded it will be seen that the differences between the German and American systems are few and easily set aside. First, the German students are well fitted for the university; secondly, they are required to be independent in their study; thirdly, their laboratory work is more extended and more accurate; and lastly, the professors, being able to do and doing original work, exert an influence which inspires the students to keep on and overcome difficulties.

I believe that the American students in our first-class colleges are as well fitted as the Germans. (The often-made objections that the German gymnasial graduate is to be compared only with our college sophomore might here be raised. This is not well founded, for the average ages of the freshman of both countries are the same; and liberal educators have in practice indicated their opinions that when a student leaves the fitting school he is prepared for the university, and not for the college.)

The amount of laboratory work in American colleges is on an average very small. The smaller colleges dispense with it entirely in most subjects except chemistry. The first-class colleges are introducing more and more each year, and Harvard has very recently put an experimental course into the requirements for admission in physics. In the department of chemistry, the change in this direction has been most marked. Twenty years ago a college graduate could hardly be found who had taken a course in quantitative analysis. Now the chemical course at Harvard equals that in most German universities.

The chief comparison, however, must be drawn in respect to post-graduate courses, for nearly all the American students abroad belong to this class. The character of the professors and the laboratory surroundings are the prime factors. The professors, unless continually engaged in original research, are not able to give adequate assistance. The laboratory must be well supplied with apparatus, materials, and

collections. Nearly every department lacks, at present, some important part. For instance, the physical cabinets are overstocked with demonstrative apparatus, while the student-engaging in quantitative work must manufacture everything needed.

American students themselves seem to possess more ability than the Germans. But characteristic American haste more than nullifies this advantage. The American is in too much of a hurry to control any results he may obtain; too ready to consider a felicitous experiment as positive proof of a previously formed theory, and too ready to consider a small influencing condition of no importance. He is also too easily discouraged by first difficulties, and lacks what a Western humorist has termed stick-to-it-iveness. Finally, he almost invariably displays his practical Yankee traits in trying to obtain the largest possible objective for a telescope, disregarding the fact that the brains behind the ocular are the chief thing.

But his faults are remedied when he goes to Germany, and it is to be hoped that in a short time they will not even be allowed to appear in his own country. Every college of importance is rapidly adopting the German system in chemistry, and the same must be done eventually in all departments.—*Samuel Sheldon, in Atlantic Monthly.*

WAR INCONSISTENT WITH CHRISTIANITY.

CAPT. HOWE, late a staff-officer of the Royal Engineers, thus relates how he came to resign his commission and leave the army.

He was on service in Natal during the Zulu war, and had been sharpening his sword with a file, and was running his finger along it, admiring its keen edge, when the thought flashed across his mind, "And what is this for?" and the answer came as instantaneously, "To run through a fellow-creature."

"I was so startled at the thought," said he, "which for the first time came home to me in this form that involuntarily I dropped my sword, and from that time determined on the first opportunity to quit the profession." This determination was carried out at the conclusion of the war, and he is now enrolled as a soldier in a nobler army, one that seeks to save the souls of men, and the last that is heard of him is that he has gone to the Cape as a missionary, and is preaching to the miners of Kimberley. This instance of conviction as to the true character of war and its inconsistency with any profession of Christianity is not a solitary one, for we know from the early history of the Christian Church that numbers of young converts to the Christian religion left the Roman army, feeling that Christ's precepts "unbelted the sword of every soldier," and made it impossible for them if they followed him to lift their hands against their enemies. But some of them suffered death rather than serve in the army, one of whom was young Maximilian, who in the year 260 A. D. had his head struck off by order of Dion the proconsul.

When he was brought before Dion and asked his name, Maximilian, turning to him, replied, "Why wouldst thou know my name; I am a Christian and cannot fight."

Maximilian was registered five feet ten inches high, and Dion bade the officer mark him. But Maximilian refused to receive it, still asserting that he was a Christian, upon which Dion instantly replied, "Bear arms or thou shalt die."

To this Maximilian answered, "I cannot fight if I die. I am not a soldier of this world but a soldier of God." Dion then said, "Who has persuaded thee to behave thus?" Maximilian answered, "My own mind, and He that called me." Dion then spoke to his father, and bade him persuade his son. But his father observed that his son knew his own mind, and what was best for him to do. After this had passed, Dion addressed Maximilian again in these words, "Take thy arms and receive the mark." "I can receive," says Maximilian, "no such mark. I have already the mark of Christ." Upon which Dion said, "I will send thee quickly to thy Christ." "Thou mayest do so," says Maximilian, "but the glory will be mine."

Dion said, "Among the life-guards of our master, the Emperor, there are Christian soldiers, and they fight." Maximilian answered, "They know what is expedient for them, but I am a Christian, and it is unlawful to do evil."

Dion said, "Take thy arms. Despise not the profession of a soldier lest thou perish miserably." "But I shall not perish," says Maximilian, "and if I should leave the world my soul will live with Christ the Lord."

Dion then ordered his name to be struck from the roll, and delivered the following sentence: "Maximilian, because thou hast with a rebellious spirit refused to bear arms, thou art to die by the sword." Maximilian replied, "Thanks be to God."

He was twenty years, three months, and seventeen days old, and when he was led to the place of execution he said with a pleasant countenance to his father, "Give the executioner the soldier's coat thou had gotten for me, and when I shall receive thee in the company of the blessed martyrs we may rejoice together with the Lord."—*J. L., in British Friend.*

In the Gospels and in the writings of Paul, we find Jesus to be the same great soul,—tender to the sinner, looking with impartial eye over all forms of humanity, anointed by God to preach the gospel to the poor, the Word made flesh and dwelling among us, the human image of the unseen God, the Leader of mankind in all lands and in all ages.—*Rev. J. F. Clarke.*

For God has marked each sorrowing day,
And numbered every secret tear;
And heaven's long age of bliss shall pay
For all His children suffer here.

—*William Cullen Bryant.*

NEWS AND OTHER GLEANINGS.

—A violent volcanic eruption occurred in the Philippine Islands last December. Vast columns of ashes were thrown up from the Mayou volcano, and in a very short space of time the darkness became so intense that, though it was midday, lights had to be used in every house. The inhabitants of surrounding districts were panic-stricken.

—A correspondent writes that this has been a disastrous financial season for Florida and that great efforts are being made to secure good drainage and cleanliness for Jacksonville.—*Boston Journal.*

—One little creature can do a great deal of mischief. The Colusa (Cal.) *Sun* says there is no doubt but that a squirrel is responsible for a broak in the Hamilton levee and a consequent loss of 50,000 acres of wheat, which became submerged.

—The people of Iceland are very much disturbed by the large emigration from this country to the United States.

—The astonishing announcement is made that the Governor of South Carolina recently pardoned out two colored children, nine and ten years old, who had been sentenced to the state prison for life, for stealing articles worth less than \$10.—*Hartford Courant.*

—The *Boston Pilot*, a Democratic and Roman Catholic newspaper, of much ability, edited by John Boyle O'Reilly, the poet, has this notable paragraph on the death of Lewis Hayden, the colored man: "We knew Lewis Hayden well, and can truly say that he was a man of a great nature, kindly, sincere, exceedingly wise, gentle, courageous, and magnanimous. He was a race type and leader. He had in a marked way the childlike wisdom which is so beautiful a characteristic of the negro race. He was so earnestly and directly true that he could not be doubted. He was a manful opponent, vigorous, and at times passionate; but he was utterly without resentment. No wonder that Boston paused a moment to show deep respect and sorrow when this great-hearted escaped slave from Kentucky died in his own home with his family and sorrowing friends around him. Of such timber are good Bostonians made. Black or white, the man with so high a purpose, so great a fidelity, so strong a character, must become notable and respected. When Kentucky or any other State says the negro is by nature an inferior and a degraded man, Massachusetts will remember Lewis Hayden and many others of his kind, and renew her trust in God and human nature."

—At a meeting of the Unitarian Club, in Boston, a speaker who had "traveled extensively in the West" referred to "the agnostic movement, East and West, of twenty-five years ago. People in the West who had left the churches at that time were now turning back, not so much for themselves as for the sake of their children. They had begun to realize that there was something that the human heart required besides science."

—A beautiful flower, called the rice lily, grows thickly in parts of Southwestern Georgia. It is extremely sensitive to the light. The blossoms fold up at night, but open in the morning. At night, while the lovely white blossoms are closely enfolded in their purple covering, and the flowers are asleep, if a lamp is placed near them they will gradually open and turn toward it. If a strong light is placed on one side of a vase containing them, the half of the bouquet that faces the lamp will be unfolded, while the other half that is in the shadow will remain tightly closed.

—The Philadelphia Police Matron service is but two years and a half old, and has been established in but six of the city's twenty-five police districts. A bill has been introduced into the present Legislature, however, and has been reported favorably to the Senate, which provides for the appointment of police matrons in cities of the first and second class. Should it go into effect, the number of police matrons already in the city's service would doubtless be increased.—*Exchange.*

—There are at present some 2,000 women employed in drug stores throughout the country. When the Woman's

School of Pharmacy was first organized at Louisville there were but two women engaged in the business, and both of these were in the laboratory of one of the professors. During the last term more applications for graduates to fill responsible positions in drug stores or laboratories of manufacturing chemists have been received at the Louisville school than the total number which the school has graduated since its commencement.—*Philad'a Ledger.*

—An interesting description of the physical features of the great Trans-Caspian Railway, recently built by Russia, was given at a recent meeting of the Royal Geographical Society, London. The line is a single one from beginning to end, except the short sidings at stations; every piece of timber and iron used was brought from Russia. The country, through which the road passes is almost level, the engineering difficulties presented being of an unusual kind. The chief of these are scarcity of water and the abundance of sand. On wide stretches no vegetation is to be found and the sand is piled in loose hillocks and swept here and there by strong winds. Various means are employed to keep the track clear. Near the Caspian sea the road bed is kept well soaked with sea water; in other places it is protected with an armor of clay. Palisades are erected sometimes to stop drifting. Another method employed is the cultivation of hardy plants, such as are used for the same purpose on the Danish coast. Many parts of the country traversed by the road are described by the lecturer as being something appalling in their loneliness and desolation.—*The American.*

CURRENT EVENTS.

ANXIETY is felt lest there should be bloodshed among the people who will rush into the Oklahoma district, to take up land, on the 22d inst., the time when it will be "opened for settlement." It is pretty well settled that many more people are waiting to go in than the district will accommodate.

THE steamship *Danmark*, of the line between Copenhagen and New York, was seen abandoned and sinking, at sea, on the 8th inst., by a steamship bound for Liverpool. She had on board over 700 persons, and so far (17th inst.), nothing has been heard concerning them, though it is hoped they have been rescued by passing vessels.

THE Cherokee Commissioners, George D. Robinson, of Massachusetts; J. Otis Humphrey, of Illinois, and Alfred M. Wilson, of Arkansas, met on the 15th inst., in Washington, and received their commissions. They are to negotiate with the Cherokee and other Indian tribes in the Indian Territory for a cession of certain lands in the Oklahoma country, under the act of Congress just passed.

THE conference at Berlin, between representatives of this country and Germany, on the Samoan question, will begin on the 1st of next month. The American commissioners sailed from New York on the 13th instant. It has been agreed between the three powers, Germany, England, and the United States, to keep but one war vessel each at Samoa, for the present. Full details of the destruction of the war-ships in the harbor of Apia, (on the 15th and 16th of last month), have been received by steamer at San Francisco. Two German ships were destroyed, the third escaping without great injury, and two American were also lost, while the third, (the *Nipsic*), is much damaged.

JOHN ALBERT BRIGHT, eldest son of the late John Bright, was elected Member of Parliament, in his father's place, in Birmingham, on the 15th inst. He is opposed to the Gladstone plan of Home Rule.

NOTICES.

* * Henry T. Child expects to attend Friends' meeting at Christiana, Lancaster county, Pa., on First-day morning, the 21st inst., and a Temperance meeting at the same place, at 2 30 p. m. The latter with illustrations, and an appeal for the Constitutional Amendment. All are invited.

* * Abington First-day School Union will be held at Upper Dublin, on Seventh-day, the 20th inst., at 10 o'clock. All interested are cordially invited.

Friends will take the 8.31 train from Ninth and Green streets for Fort Washington.

J. Q. ATKINSON, } Clerks.
ANNA MOORE, }

* * A Conference on the subject of Temperance, under the care of Concord Quarterly Meeting's Committee, will be held at Friends' meeting-house, West Chester, on First-day, Fourth month 21st, 1889, at 2.30 p. m.

Friends and all others interested are cordially invited.
MARY McALLISTER, Clerk.

* * The Western First-day School Union will be held at Centre meeting-house, Del., on Seventh-day, Fourth month 27th, 1889, to meet at 10 o'clock a. m. All interested are cordially invited to attend.

Friends coming by train should communicate in advance with Joseph P. Nichols, Centreville, Del. Take the train leaving Broad street station at 7.25 a. m. for Fairville station. Returning, train arrives in Philadelphia at 7.18 p. m.

EDWARD A. PENNOCK, } Clerks.
LYDIA E. WALTON, }

* * Concord First-day School Union will be held at Chester, on Seventh-day, Fourth month 20th, commencing at 10 a. m.

All interested are earnestly invited to be present.

EDWIN J. DURNALL, } Clerks.
MARY YARNALL, }

* * Circular Meetings in Fourth month occur as follows:
21. Chestnut Ridge, Pa.

* * Quarterly meetings in the Fourth month will occur as follows:

SPRING.

As little children gather round their mother,
And beg her a familiar tale to tell,—
One that is dearer far than any other,
Because so often heard and known so well;

And as they watch her, prompting should she falter,
And any variation quickly see,
And cry, "Don't tell it so, don't change and alter,
We want it just the way it used to be,"—

So do we come to thee, O Nature—Mother,
And never tire of listening to thy tales.
Tell us thy spring-time story now,—no other,
That hath a wondrous charm, which never fails.

Tell it with all the old time strength and glory,
Fill it with many a happy song and shout;
Don't miss one bird or blossom in the story,
Don't leave one daffodil or daisy out.

Tell as each shade in all the tree's soft greening,
Don't skip one blade of grass, one bee, one wren,—
Each little thing has grown so full of meaning,
In the dear story we would hear again.

O Mother Nature! thou art old and hoary,
And wonderful and strange things thou canst tell;
But we, like children, love the spring-time story,
And think it best, because we know it well.

—*Bessie Chandler, in The Century.*

From *The Independent*, New York.

TOLERATION AND LIBERTY.

BY PHILIP SCHAFF.¹

THERE is a wide difference between religious toleration and religious liberty. The one is a concession, the other a right; the one is a matter of expediency, the other a principle; the one is a gift of man, the other a gift of God.

Toleration implies more or less censure or disapproval. We tolerate or endure what we dislike, but cannot prevent. The most despotic governments are tolerant toward subjects who are too numerous or too useful to be killed or exiled. Russia tolerates Romanists, Protestants, Jews, and Mohammedans; Turkey tolerates "Christian dogs," and likes them to prey upon each other; but woe to him in either country who apostatizes from the State religion, or

attempts to induce any member of the same to apostasy. "Toleration is first sought and granted as a favor, then demanded and conceded as a right, and at last spurned as an insult." In a free country nobody wants to be tolerated for his religious opinions or sacred convictions.

Religious liberty is a natural, fundamental, and inalienable right of every man. It is founded in the sacredness of conscience, which is the voice of God in man and above the reach and control of human authority. There is a law above all human laws. It is written not on parchment and tables of stone, but on the heart of man by the finger of God. It is that law which commands with the categorical imperative, and which filled the philosopher Kant with ever-growing reverence and awe. "We must obey God more than man." He and he alone is the author and lord of conscience, and no power on earth has a right to interpose itself between them. "Every man stands or falls to his own lord." Liberty of conscience requires liberty of worship as its manifestation. To grant the former and to deny the latter is to imprison conscience and to promote hypocrisy and infidelity. Religion is in its nature voluntary, and ceases to be religion in proportion as it is forced. God wants free worshipers, and no others.

Toleration is an intermediate state between religious persecution and religious liberty. Persecution results from the union of Church and State; toleration, from a relaxation of that union; full religious liberty and legal equality require a peaceful separation of the spiritual and secular powers.

The theory of medieval Europe was intolerance and persecution; the theory of modern Europe is toleration; the theory of North America is religious liberty and equality. The papal Church is constitutionally exclusive and intolerant, and treats every departure from it as damnable heresy and schism. On the Continent a distinction is made between official Churches and tolerated Sects; in England, between the Established Church and Societies of Dissenters. In the United States all forms of Christianity are equal before the law, and there is no distinction between Churchmen and Sectaries or Dissenters. All enjoy the full right of self-government and the protection of the laws of the land.

European toleration is irresistibly tending to American liberty, or to such adjustment of the relation of Church and State, as will guarantee freedom and independence to each in his own sphere, the one in the spiritual, the other in the temporal; while both have a common interest in promoting the moral purity and integrity of the people.

¹ Philip Schaff's article will be read, no doubt, with interest, as a good statement of a great principle. It is further notable because he is a churchman, an accepted "orthodox" authority on theology and Theological literature, and professor of Church History in Union Theological Seminary, (Congregationalist), New York. He was president of the American Committee which cooperated with the English revisers of the Bible.—EDS. INTELLIGENCER AND JOURNAL.]

Religious liberty, like civil liberty, the liberty of speech, the liberty of the press, and every other liberty, is liable to abuse and consequent punishment. Every man's liberty is limited by the Golden Rule, not to do unto others what we would not have them do unto us. Nobody has a right to trespass on the rights of his neighbor, or to do wrong. The legal maxim is: "*Sic utere tuum, ut alienum non laedas.*" A State cannot control private opinions, but may forbid and punish overt acts of a religion which disturbs the peace of society, and undermines the foundations on which governments rest. The Congress of the United States has forbidden polygamy in the territories, which is a part of the Mormon religion, and would forbid licentious rites, bloody sacrifices, and other criminal acts practiced in the name of religion. But all Christian churches which accept the Bible, teach the Ten Commandments, and enjoin love to God and man, are compatible with, and promotive of, the welfare of society, and make good citizens by making good Christians. A government consults its own interest by protecting all and persecuting none.

Liberty will be abused to the end of time; but no amount of abuse can abolish the right use. The same sun which spreads light and life promotes decay and death. No book is more abused than the Bible, and yet it will ever be the Book of books. So religious liberty remains the most precious of all liberties, and the strong foundation of all other liberty.

For Friends' Intelligencer and Journal.

VISITS IN WESTERN QUARTER.—II.

LONDON GROVE MONTHLY MEETING was held on Fourth-day, the 10th inst. We had come into the neighborhood the evening before, lodging with Friends who live near the meeting-house. The day was fine, leaving no excuse on account of weather, for any one to be absent, but farmers are very busy, and some were kept away on that account.

The meeting was larger than the preceding. The scholars from the school on the premises were present, which added to the interest of the occasion, and the quiet deportment they observed gave evidence that they also were interested in being with us. The custom of meeting together for religious worship was made the subject of inquiry and exhortation; the record of the old prophet was cited, in which he bore testimony that in the early time they who feared the Lord thus met together, and the practice has been continued through all the ages since. The gospel labor was close and searching, and the value of these stated times of inquiry as to the condition of the Society, was dwelt upon. The business meeting which followed showed that a good degree of faithfulness to the several particulars queried after prevails within their borders. The social greetings at the close of these opportunities form no small part of the enjoyment and interest connected therewith. It is so pleasant to take the hand, and respond to the greeting of Friends whom we seldom meet but who are brethren and sisters "beloved in the Lord." In the fading hours of the afternoon we were conveyed to the house of Friends who live near New Garden,

where the next monthly meeting was held. The fresh awakening of spring life,—the evening song of the robin and the lark, first messengers of its approach,—and the golden hues of sunset all combined to make the four or five miles which kept us on the road for an hour, very enjoyable.

The weather on Fifth-day was bright and the air not too warm to make our wraps uncomfortable. New Garden Monthly Meeting embraces New Garden, West Grove, and Mill Creek Preparative Meetings. The meeting was settled in good time and the house well filled. Here again the value of religious commingling was presented, the antiquity of the usage and its continuance in the Christian Church to the present time,—how it had been blessed to us as a society,—keeping alive in the hearts of those who were widely separated, the love of its principles and testimonies and the desire to meet together in the fellowship of the Gospel.

In the business meeting the value of these stated times of inquiry into the condition of the body as a reminder of our duty and responsibility claimed attention, much interest in the business as it came before the meeting was manifested; and near the hour for closing, the shutters were raised for the joint action of both branches upon a paper that was read.

There are many reminiscences of personal and family history connected with this venerable old meeting-house, that are always present when I am permitted to sit with those who worship within its walls. Here I was first brought into social relations with Friends. I go back half a century and recall the faces of those whom I looked upon as types of all the Christian virtues yet so wanting in all of Creed and Confession of Faith that I had been taught to regard as the very essentials of acceptance with God, I could but marvel; for I dared not doubt the sincerity and devotion of those quiet worshippers who, strange as it seemed to me then, would sometimes sit the whole hour of worship without the silence that I had not then come to appreciate, being broken by a human voice. Truly may it be said our Father leads us by ways of his own choosing; and while we look to him for guidance he fails not to be our helper, and to his praise and honor he it said what we know not in the now, we "shall know hereafter."

On Sixth-day, at an early hour, we were on the road again for a ride of nine miles, to Penn's Grove Monthly Meeting, comprising Penn's Grove and Hameville Preparative Meetings. The house is small and the membership much reduced by removals and death, yet there is young life in their midst, and an earnest desire to uphold the testimonies of the Society. The members are mostly farmers, and many of the younger portion were kept away by the press of work. The meeting settled into a quiet that was very precious. The voice of supplication was raised, followed by words of encouragement very tender and comforting. As there are no partitions to divide the business meeting, it was held in joint session, though the answers to the queries were made out separately for the quarterly meeting. It is sometimes objected to meeting in joint session, that the women

will leave the brethren to do all the business; we did not find it so in this instance, and the advantage of considering the various subjects brought before the meeting together added greatly to the interest of the occasion. There seems very little to hold these Friends together beyond the love that prompts to the commingling. If they felt themselves strong enough to have a First-day school after meeting it would gather the young life with them, and bind the old and the young into closer unity. The latter must have something in the outward to lead them along until they are prepared for the higher spiritual condition; and in our small country meetings the gathering of all classes into the school where none are too old to learn, and the youngest are sharers in what is transacted, the benefit is felt by all, even the little ones having their part in the work.

We left the kind Friends with whom we had but a brief sojourn, for a ride of three hours to the neighborhood of Fallowfield Monthly Meeting, which we reached in the dusk of the evening, with a threatening sky presaging a storm. But the morning following, (Seventh-day), though very damp was free from rain, and by the time for assembling, the weather was clear.

This meeting is made up of Doe Run and Ercildown Meetings. Friends seemed slow in gathering, but there was a goodly company that finally settled into reverential quiet. The exercises thrown before the assembly bore special reference to the queries to be considered, dwelling upon the first as the keynote to all the rest. The word of exhortation pressed home the obligation of being good stewards and worthy examples in the Church and before men. The business meeting was much the same as all the others, the answers to the queries indicating a good degree of life and interest in the subjects queried after. One First-day school was reported, held at Doe Run Meeting. It should have been mentioned before that First-day schools are held at London Grove, New Garden, Mill Creek; also, that in all the meetings the Temperance Question and the Prohibitory Amendment are claiming hearty approval and earnest support.

The meeting at Fallowfield closed our service at this time. It was entered upon with a sense and feeling of the responsibility of the work, yet with a trust and confidence that a "present helper in every time of need," will be granted, which was abundantly realized to the praise and honor of Him who calls to the labor.

Eliza W. Chandler, a minister of Centre Monthly Meeting, was in attendance at all the meetings, taking part in the exercises, and rendering helpful service very acceptably to ourselves and to the Friends with whom we mingled. L. J. R.

The bitterest tears shed over graves are for words left unsaid and deeds left undone. "She never knew how I loved her." "He never knew what he was to me." "I always meant to make more of our friendship." Such words are the poisoned arrows which cruel death shoots backward at us from the sepulcher.—H. B. Stowe.

For Friends' Intelligencer and Journal.

HAVE WE TOO MANY ASSOCIATIONS?

THE present is a time of great activity in our branch of the Society of Friends.

On looking over the numerous fields of labor in which many of our members are engaged, and considering how great must be the demand upon their time and their attention, we may well inquire whether so much organized work is conducive to the strength of the body, or whether its tendency is so depleting as to produce permanent weakness and ultimate decay?

If we are to judge from the size of our mid-week meetings,—including preparative and monthly,—we must infer that the interest in these is not so great as it is in the outside work. If we absent ourselves from the meetings of our Religious Society, and attend those of the different associations, it is reasonable to conclude that we are more devoted to the latter than to the former; where our interest is there will we be also. But, even where we attend both, if our attention has been absorbed, and our energies expended before coming to meeting, we shall be likely to bring to it weary bodies and preoccupied minds, in which condition we are poorly qualified for the performance of our spiritual duties, or the rendering of acceptable worship.

Again, these different associations are formed for working, and hence the business must be dispatched without much waiting, or getting down into a state of stillness. A chairman and a secretary are chosen and other officers as they seem to be needed, some parliamentary formalities are regarded as essential to an organization, and many questions have to be argued before they can be finally decided. Now all of this is calculated to promote activity, and to cultivate a readiness of speech; but it is not favorable to that deliberation which should be practiced in a Friends' meeting for discipline, nor is it likely to increase the interest of the younger members in our monthly meetings as these are—or should be—conducted.

Another objection to the association—when it is formed for the consideration of religious subjects, or for the united performance of certain duties—is, that it is likely to take the place of individual concern. All the members of it are engaged in a common work, and hence tenderly exercised ones may temporarily put aside precious invitations, because some other subject is claiming immediate attention. But such invitations do not come at our bidding, and we should be in a receptive state in order to profit by them when they arrive. We cannot pour our religious experience into a common hopper, and each one expect to receive his portion of the grist after it has been compounded with all the others and ground into one mass. The association has assigned a work for us to do, and we have done it to the best of our ability; but if we had been in a state of stillness, listening attentively to hear the voice of the Inward Monitor, we might have been called in another direction, and abilitated to perform some service valuable to the Church, and conducive to our own spiritual welfare. Impressions of duty, and tender scrup-

ples (for a scruple is a negative duty) are much more likely to be effaced in an assembly where such matters are discussed, than they are in a meeting for worship, or in the privacy of our own apartment to which we are accustomed to repair for meditation.

The last objection I have to offer to so many organized assemblies is their encroachment upon the time—short enough at best—for private family mingling. The relation between parents and children is the tenderest, and yet the most binding of humanities;—it is, indeed, typical of that which is superhuman, and to be named with profound reverence. The reciprocal duties of parent and child cannot be delegated to any one else for their performance. They must be discharged by those who owe them, or else they must go by default. The plea of a pressure of business—even if it include much philanthropic work—cannot be accepted as an excuse from parents who neglect the training of their offspring, or from children who are derelict in their duty to those who watched over them during the years of their helplessness and irresponsibility.

Those who read this article will bear in mind that the heading of it is a *question*, not an assertion. The writer would not be understood as being inimical to any particular one of the numerous associations bearing the name of Friends; but he would request, and even urge upon our members to enter into a rigid self-examination to find whether their attendance of our religious meetings is furthered or hindered; whether their interest in these solemn assemblies is increased or diminished; whether they are or are not better fitted for performing acceptable worship; and whether their usefulness as deep, solid Friends in our meetings for Discipline, is promoted or retarded by so much outside work.

Are we not in danger of getting into the Martha spirit,—“Cumbered with much serving?” Friends profess to be a waiting people, and a feeling people; and unless we are willing to wait we shall be unable to feel, and hence cannot know what our real duties are. H. *

Fourth month 20.

For Friends' Intelligencer and Journal.

AT THE FUNERAL.

ELIZABETH: Darkened the house is: and how still!
So uncle John is gone.

. . . They gather now: I wonder who has come.
. . . There's Ruth!

RUTH: O, sister!

ELIZ: How seldom do we meet!

RUTH: Alas! 't is true.

I sometimes think that only funerals
Bring us together, now.

ELIZ: O, say it not! . . .

And yet I've thought of that.

RUTH: I never thought our lives would lie so wide
That Death alone would join them.

ELIZ: What would our mother say, if she could see
How wide apart we dwell?

But day by day fleets by, and years draw on,
The purposes I have fade out . . . and so it is.
It seems to me a hundred things

Claim ev'ry hour. . . .

But, Ruth,—I love thee, still, the same.

. . . Is thy life hard?

RUTH: Hard? . . . Yes, as of old. . . .

Thou knew the life at home,—the daily toil,
The tasks unending.

No servants wait on me: my duties call
On me alone. One pair of hands must do
Whatever must be done.

ELIZ: Yes . . . yes . . . I know.

I wish it were not so.

Thy hand is hard, I see . . . and thin.

RUTH: Thy hand is soft . . . and beautiful.

'T was always so
When we were girls 't was so.

ELIZ: When we were girls!

Thou callest back fair days,
Days of our childhood in the dear old home.

RUTH: Were any days to thee

So rich as these?
I always think of thee
As well, and strong, and bright;
Full of glad life;
Proud of thy husband and thy home,
Proud of its beauties, drinking in its joys;
Full of thy pleasant plans from day to day.

ELIZ: Alas!

RUTH: Is it not so?

ELIZ: Give me thy faithful hand. . . .
There . . . let me hold it fast
A moment let us sit, ere yet the house fills up.
. . . . Thy question moves me.

Happy I ought to be, yet oftentimes,
I fear that wealth is naught
But cumber to the soul.
Sometimes I envy thee thy quiet way;
Sometimes I long to live again
The days at home.
Sometimes dear mother in her cap
Looks down at me.
Sometimes I think that all I have is dross,
—More worldly vanity—
Nothing to live for.

RUTH: Alas!

ELIZ: 'T is true. . . I would it were not. . . .
Happiness, it seems,
Is but a mirage, that we never reach.

RUTH: Content, perhaps, is best. . . .
Dost thou recall how our dear father read
The old Friends' books: how often would he say,
“Content is best”?
Here I have envied thee thy wealth,
And—

ELIZ: I have envied thee!
Strange that the widened contrasts of our lives
Should meet in this!

RUTH: The house fills up.

'T is very near the hour.

ELIZ: Sit yet a moment with me: in this still,
And calm, with death so close beside,
It comforts me to hold thee by the hand.
. . . . A moment, and we'll go.

H. M. J.

Know that the main foundation of piety is this,
to have right opinions and apprehensions of God.—
Epictatus.

FRIENDS' MEETING-HOUSE AT ROCSDALE.

THE FUNERAL OF JOHN BRIGHT.

DETAILS concerning the burial of John Bright are given in the Manchester newspapers of the 1st of the present month, and some of them, indicating the attachment of the deceased statesman to the principles of Friends, and his desire for the simple interment of his mortal remains without needless ceremonial, will doubtless interest our readers. We copy the account below from the Manchester *Guardian* of the date stated. That journal says:

"Mr. John Bright was buried on Saturday in the graveyard of the Friends at Rochdale, with ceremony almost stern in its severe simplicity. Around the tomb his sons, his daughters, and his brothers were gathered, with a larger circle of near friends, and the members of the Puritan sect with which he was connected. A simple prayer, a short address, and the grave-side scene was ended. . . . But the many tears shed over the coffin were the symbol of the universal sorrow that the end had come of a pure and beautiful life. The impressiveness of the burial, though centered in the green patch of earth in George street, was not confined to that small God's acre. Ten thousand people, and twice ten thousand, filled the neighboring streets. Rochdale gave itself to mourning, during the forenoon. The mayor had asked the people to cease work for the day, and the request was faithfully observed. The loom and the shuttle ceased their throbbing for the time. . . . The people were astir in the streets at an early hour. The straight line between One Ash and Yorkshire street, so often traversed by Mr. Bright on his way to the meeting-house, was almost filled an hour before the time of the procession to the grave. It was not merely Mr. Bright's townspeople who were in the street. Rochdale is on the borderland of Lancashire and Yorkshire, and each county sent its representatives to the funeral. . . .

"The morning was not too favorable in the weather it brought. . . . Fortunately heavy rains

did not fall till just after the funeral was over. The scene in front of the gates of One Ash was very striking. The people lined one side of the way in dense masses. On the other side, on Cronkeyshaw Common, were assembled the members of deputations from Liberal, Liberal-Unionist, and Conservative Associations, and other bodies. On boards, some ten or fifteen feet high, were printed instructions, the object of which was to give a harmony to the deputations. As the assembly was growing, the carriages rolled up to One Ash in quick succession [containing many distinguished persons, among them Joseph Chamberlain, John Bright's colleague in Parliament, Sir Wilfrid Lawson, Herbert Gladstone, and others]. . . . Half an hour after ten, a body of men from the mill of Messrs. Bright Brothers, which is built on the Common opposite One Ash, took their place in front of the gates. Then came the hearse, with glass sides. Soon the coffin was placed inside, covered with very beautiful wreaths. One wreath was from the Queen; another was sent by Miss Cobden, 'in loving memory of her father's dearest friend.' The procession left the gates soon after eleven o'clock, the deputations in their appointed places.

"In the meantime many had found their first place of assembly at the graveyard in George street. The ground had been carefully planked, that the grass over the unnamed graves might not be worn away. The gathering in the churchyard was not large, the numbers being wisely restricted to ticket holders. George street was absolutely barred to the general public. But the witnesses of the last scene were nevertheless many. There is another burial ground side by side with that of the Quakers, that of St. Stephen's (Lady Huntingdon's Connexion). Here large platforms were erected, one of which accommodated some two or three hundred of Mr. Bright's late constituents from Birmingham. St. Stephen's is a red brick building with a square tower; and on the top of the tower and in all its windows

every inch of space was filled with faces. There were many, too, on the housetops and on the ridged roofs of distant mills. But chiefly interesting was the gathering in the graveyard itself. Artists were engaged sketching the grave and the little meeting-house and the Library. There was little of pictorial grace from any point of view. The grave was built simply as that of the poorest; the chapel and library are in stone, without the least architectural pretence.

Waiting by the graveside were many members of the Quaker community, some of whom have known Mr. Bright very intimately. They were distinguished in costume from all others. Their broad-brimmed hats, square-cut clothes, and a certain Puritan simplicity of appearance marked them from the rest. These are the direct descendants of the men imprisoned during the Stuart restoration, an imprisonment which led to the writing of the 'Pilgrim's Progress' in that simple, matchless Saxon of which the Quaker who has just gone from among us was so wonderful a master. The most striking figure at the graveside was Mr. Bevan Braithwaite, the minister of the Westminster congregation. Mr. Braithwaite's strong face is in some of its lines very like that of Mr. Bright. Mr. Bright when in London was most regular in his attendance at the Westminster Meeting-house. Between the two men there has been a friendship which lasted from youth. Other distinguished Quakers in the graveyard included Mr. Arthur O'Neill, an old Chartist, who, like Thomas Cooper and others, suffered imprisonment in the early years of the century; Mr. William Morgan, of Birmingham, an old political ally of Mr. Bright, and a prominent member of the Peace Society; Mr. Joseph Sturge, son of Charles Sturge; Mr. Theodore Neild, Principal of Dalton Hall; and Mr. William S. Lean, Principal of Flounders College, Ackworth.

"It was shortly before twelve o'clock that the coffin was brought to the graveside. The members of Mr. Bright's family took their places round the grave, and the remaining part of the assembly formed an outward circle. The rain for the moment had ceased and there was a tender shining in the sky. For a minute or two there was solemn, silent prayer. Many were weeping. Then Mr. Braithwaite fell on bended knee, and as he prayed a short, earnest prayer all heads were uncovered. Mr. Lean then delivered a short eulogium, and the body was lowered into the grave. This was the simple ending of the graveside ceremony. The family proceeded within the little meeting-house, where Mr. Bright's sons and daughters took the family form in front. Mr. John Albert Bright sat at the far end, and Mr. Philip Bright, the youngest son, on the cushion next the little bare space which was sacred to Mr. Bright himself. Mr. Jacob Bright, with Mrs. and Miss Bright sat just behind. It is not customary in the meeting-house to uncover; but on this occasion all heads were bared but that of Mr. Jacob Bright, who sat bowed down with hands covering his face. When prayer came Mr. Bright uncovered also. On the minister's bench facing the congregation were Mr. Braithwaite and many of the fathers of the Quaker sect. Mr. Leake and Mr. Mather were just in front. Mr. Braithwaite,

after a short interval, opened with an address, in which he told something of Mr. Bright in the purely personal aspect. Dr. Hayle, the physician to Mr. Bright, in the course of a few words said how fond was Mr. Bright of reading the 17th chapter of St. John. Then Canon Maclure, vicar of Rochdale, somewhat unexpectedly rose and requested leave to say the Apostolic grace as a sign of their Christian unity. No voice was raised, the Canon said the grace, and the assembly parted. The mourners returned to One Ash, and the general public were afterwards admitted into the graveyard."

SCRIPTURE LESSON, No. 17.

FIFTH MONTH 5, 1889.

THE COMMAND TO WATCH.

GOLDEN TEXT.—"Watch and pray that ye enter not into temptation: the spirit indeed is willing, but the flesh is weak."

—Matt. 26 : 41.

READ Mark 13 : 24-37.

JESUS continues his instruction and warnings as they sit together upon the slope of Olivet, with the beautiful city of Jerusalem spread out before them. He is conscious of the hatred and opposition of many of the Scribes and Pharisees who were in authority. He knows many of them are his friends, but the feeling has become too strong against him for these to have any influence, and his life must be taken.

As they talk, Jesus further discloses to them the terrible calamities that will soon overwhelm the Jewish nation, and endeavors to prepare them for the dreadful ordeal. The main thought that he would impress upon their minds was the necessity of watching the course of events, that they might escape when the final overthrow approached. So fully did he impress this upon them that it is said not one Christian was found in the city when it fell into the hands of the besieging army.

The sun shall be darkened. This is a figurative expression frequently used in the Scriptures to portray some dreadful calamity that was coming upon the people.

Thou shalt see the Son of man. Then would they realize the full measure of their iniquity in rejecting the Messiah, whom God had sent to lead them into the ways of peace and prosperity. They had become full of strife and contention, and wars and all unrighteousness were consuming them as a people. He came not to remove the yoke of Roman dominion, but to infuse into their lives a love of the quiet ways and pursuits of peace, and lead them into a clearer understanding of their relation to God, the invisible king, whose laws were written upon their hearts.

Then shall He send. This also is a figure intended to give assurance that they who had been faithful to the laws and requirements of this invisible King, and had not taken part in the dreadful wrongs that had been enacted, but still kept the love of God and the love of one another in their hearts, would not be forgotten of the Heavenly Father, though scattered to the farthest quarters of the earth.

This generation shall not. The people who were then living would be witnesses of the destruction and desolation he had portrayed.

No man knoweth another's heart as well as he knows his own. The guarding of our souls from evil requires constant watchfulness. *One* must watch lest his temper overcome his judgment, *another* that the love of money does not destroy love of humanity, still *another* needs to watch that the promptings of passion are not gratified, lest faith in purity be destroyed.

It is needful to both *watch* and *pray*. The earnest prayer for deliverance from temptation never faileth. The aspiration of prayer lifts to a higher level.

We should not only watch against the beginning of evil in our hearts, but for the good all about us. The more we cultivate the good in ourselves, and in our friends, the less chance for evil to take root.

The watch tower must never be deserted. "Watch, therefore; for ye know not on what day your Lord cometh." God's angels are ever passing. In the fevered rush of life, let us not forget to watch for their coming, and bid them tarry with us.

NOTES ON THE LESSON: THE WATCHMAN.

In the East every one must be his own policeman. The state punishes, but leaves the prevention and detection of theft and robbery to the individual interested. Hence the watchman is a necessary and important personage everywhere. Not only in the vineyards of the watchtowers, but in the houses and villages, the watchman is needful. It is only in the walled city, where there is a garrison, that the security of the place rests in the hands of the authorities. And so it was of old. The unchanged arrangements of Oriental houses explain the duties and importance of the watchman. In the castle of the great man there was a tower over the gateway, and on the roof of this he kept a lookout during the day. Such was the watchman of the palace of Jezreel, who recognized the chariotteering of Jehu, as he drove furiously up the plain of Esdraelon. But the private house had no such tower, nor was there any outlook post. All Eastern houses above the class of a cottage are built round a square, and frequently with another inner square behind the front area. The rooms all look into the square, those on the ground floor frequently without front walls, but merely curtains to secure a certain amount of privacy, and the upper story having a balcony projecting all around, by which to pass from chamber to chamber. Not one of these has a window to the outside. The only window looking outwards is a grille over the doorway sometimes projecting in a sort of bay, and closely latticed, by which the ladies may peep unseen up and down the street. Such was the window through which the mother of Siseria is represented as looking; such was that through which Jezebel taunted Jehu, little wotting of the faithless chamberlains behind her, ever ready to follow the rising sun. Below this solitary casement is the only entrance, and within the gateway the porter's lodge. As the door is always kept fastened, the porter must ever be on the watch; for there could be no greater indignity than for the master or any visitor to be kept waiting after they had knocked. The porter, on the alert, at once demands the name before he opens; as in the

parable of the Ten Virgins, he refuses to open at all to unwelcome guests. The thief does not attempt a surprise by the door. He digs through the wall of the house behind,—a comparatively easy task where the walls are, as is usually the case, built of stone and clay instead of cement, and his tool a mattock, a sort of pick and hoe combined. As the family usually sleep upstairs, and in summer on the flat roof, the access to which is generally by a flight of steps outside, and not accessible from the inside, the safety of the ground-floor depends on the vigilance of the porter, who is the only member of the household on the area. The Christian watchman has a twofold duty: first, to guard the door of his heart against intruders, and to be ever ready to recognize and obey his Master's voice; and, secondly, to be alert against surprises, lest the thief break in and temptation assault him on the unguarded or unexpected side.—*H. B. Tristram, in S. S. Times.*

TEMPERANCE LITERATURE.

EDITORS INTELLIGENCER AND JOURNAL:

THE Philadelphia Yearly Meeting's Committee on Temperance has lately put into the bookcase in room No. 1, at Race street, in addition to what was previously there, 6,784 pages of literature bearing upon the proposed Prohibition Amendment. This literature is for distribution by members throughout the yearly meeting. The Book Committee feel the importance of having a quantity of well selected literature for immediate use, that our friends from rural districts when coming to Yearly Meeting may supply themselves with such as they can distribute around their homes. The Committee will feel it a great help if our friends will send the name and publisher of any tract, leaflet, or pamphlet that we have not previously had, to Friends' Book Association, for the Book Committee. H.

OUR most exalted feelings are not meant to be the common food of daily life. Contentment is more satisfying than exhilaration; and contentment means simply the sum of small and quiet pleasures. We ought not to seek too high joys. Low measures of feeling are better than ecstasies for ordinary life. God sends his rains in gentle drops, else flowers would be beaten to pieces.—*Beecher.*

IRRESOLUTION is a worse vice than rashness. He that shoots best may sometimes miss the mark, but he that shoots not at all can never hit it. Irresolution loosens all the joints of a state; like an ague, it shakes not this nor that limb, but all the body is at once in a fit. The irresolute man is lifted from one place to another, so hatching nothing, but adles all his actions.—*Anon.*

BWARE of making your moral staple consist of the negative virtues. It is good to abstain, and teach others to abstain, from all that is sinful or hurtful. But making a business of it leads to emaciation of character, unless one feeds largely also on the more nutritious diet of active sympathetic benevolence.—*O. W. Holmes.*

INTELLIGENCER AND JOURNAL.

HOWARD M. JENKINS, *Managing Editor.*

ASSOCIATE EDITORS:

HELEN G. LONGSTRETH.

LOUISA J. ROBERTS.

RACHEL W. HILLBOEN.

LYDIA H. HALL.

PHILADELPHIA, FOURTH MONTH 27, 1889.

A CORRESPONDENT, in a private letter, after mentioning some of his religious experiences, and his customary attendance, under special circumstances, at another place of worship than that of Friends, adds:

"But I never have myself taken any part in the outward ordinances, and never believed or professed to believe in their doctrine. When approached on the subject, I have always avowed myself a follower of Fox. My mature judgment, (I am now near 72), is that the doctrine of the supremacy of the moral faculty over the intellectual,—and its higher form, the Inward Light,—is the most important truth ever revealed to man. And I mourn over the approaching extinction of the Society of Friends, (in England it is already dead), as a great calamity to the cause of Truth."

Our correspondent, it will be seen, assumes that the Society is on the way to extinction. We may remark that we doubt the conclusiveness of present evidence on this point. There are several grounds for hesitating to accept that conclusion: (1) The conviction, entertained by many, (including those not of our own membership), that the truth which Friends have professed is vital and continuing; (2) the fact that the Society, if it changes, changes very slowly, and shows a tenacity of existence which proves its real strength; (3) the revival of interest in Friends' principles among the younger people, which it seems must bear fruit in conviction and a renewal of life. And in general we may rest in the faith that what is good will not die: that a conviction so earnestly and widely entertained must find its testimony bearers and supporters. It is our present duty to keep the lamp trimmed and burning, believing that its light will be called for.

Those who favor us with matter for publication must keep in mind that the duty of the editors is to exercise a judgment as to what best suits the purpose of the paper. We find occasional—not frequent—evidences of a failure to appreciate the fact that the precise work which the editors have in charge is to use such discrimination and make such selection. And it must be remembered that this work, with relation to such a publication as the INTELLIGENCER

AND JOURNAL, is materially different from that of many newspapers. The object here is not merely to print what may be interesting, but also that which will tend to the maintenance of health and strength in the Society of Friends,—which will unite its membership in good feelings toward each other and in support of its principles and testimonies. If we were simply seeking lively and sensational matter, or were indifferent to the effect of what we published, our task would be of another character.

The editors are able to say that they endeavor to perform this work without partiality or prejudice, bringing to it a catholic freedom from any narrow view, and simply keeping in mind what they conceive to be the general interest of their body of readers, as Friends and Friendly professors. No doubt they may judge differently in many cases from what some other person in their place might do, but their success or failure in the aggregate must be the test of their work.

In printing, last week, the names of the Philadelphia sub-committee on procuring homes for Friends attending Yearly Meeting, the name of Charles E. Thomas, 1746 Park Avenue, was accidentally omitted.

DEATHS.

CARPENTER.—In Salem, N. J., Fourth month 13th, 1889, William Carpenter, in the 87th year of his age.

GURNEY.—Suddenly, of heart failure, at his residence in New Baltimore, N. Y., Fourth month 2d, 1889, Jacob B. Gurney, aged 78 years, 15 days; a member of Duansburgh Quarterly Meeting.

HAINES.—Suddenly, on the morning of Fourth month 16th, 1889, of neuralgia of the heart, at his residence in Jefferson county, West Virginia, Edward B. Haines, in the 70th year of his age; a member of Hopewell Particular and Monthly Meeting.

HAINES.—At Mickleton, N. J., Third month 17th, 1889, Stacy L., eldest son of Job S. and Ellen B. Haines, in the 29th year of his age; a member of Woodbury Monthly Meeting of Friends.

Although the day was stormy, yet large was the company of Friends who gathered on the 20th ult. to bid a final farewell to this dear young Friend.

Through the long weeks of suffering and sickness his mind was turned Heavenward, and after feeling that he could not recover he prayed to be taken home, having had some evidence that "all was well." L.

JENKINSON.—At her residence, Massillon, Ohio, on Seventh-day evening, Fourth month 13th, 1889, Eliza A., widow of Isaac C. Jenkinson, in her 88th year; a member of the monthly meeting of Friends of Philadelphia, Pa.

KINSEY.—At their home, "Beechwood," near Milton, Wayne county, Ind., on the 26th day of Third month 1889, Mary Perine Kinsey, wife of Isaac Kinsey, aged 62 years, 10 months. A life-long and consistent member of the Society of Friends. I. K.

WRIGHT.—Fourth month 11th, 1889, at her residence, at Saratoga, N. Y., Alice Wright, widow of the late Joseph G. Wright, and daughter of Joshua and Hannah Macumber.

She has been a life-long and consistent member of Saratoga Monthly Meeting, and a worthy example for others to follow, ever ready to extend the hand of benevolence to the needy, and sympathize with the afflicted. The difficulty of breathing for a few days was very distressing, but she bore it with Christian fortitude, saying she was happy, and a peaceful angelic smile rested upon her countenance. She was within a few days of her 89th year.

For Friends' Intelligencer and Journal.

CHRISTIAN WORK AMONG THE POOR.

RESUMING the consideration of Edward Grubb's article on the Mission of Friends in its social aspect, I come to his two propositions: the one that the improvement of the condition of the poor is properly a religious work; and the other that the form of religion which is best fitted to do that work is that of the society of Friends, modified so as to give "free scope to the development of every high and noble human faculty, social as well as spiritual, artistic and intellectual as much as moral and devotional." And he objects to the dominant religion—by which an Englishman must mean the Church of England—for its narrowness and formalism.

The charge of narrowness and formalism cannot, I think, be successfully repelled. A church which holds that any one who believes and is baptized, though he never did a good deed, but lived in filth and debauchery all his days, will be saved, and he who devotes all his life to good works but was not baptized will be lost; that a Duke of Marlboro, because he was baptized when he was two weeks old and believed the creed, will inherit the kingdom prepared from the foundation of the world, and a John Bright, who never was baptized, must depart into the everlasting fire prepared for the devil and his angels; is certainly narrow. And a church that fixes the dress of each minister and designates a dozen different places for him to stand when he says or reads so many different things, gives sufficient evidence to convict it of formalism.

But its narrowness does not deform its worship or its teaching of the people; nor does its formalism obtrude itself on the attention. The minister must stand somewhere and be dressed somehow, and no one is compelled to know and very few even think that in these things he does not follow his own will. And what is more certain is that neither one nor the other prevents other church members from being earnest and active in the work of ameliorating the social condition of the poor on just the lines and in just the manner recommended by our writer, cultivating their acquaintance not as patrons but as friends and equals, and sharing with them as much as possible the objects of real beauty and permanent value which adorn their homes, and teaching them to adorn their own homes also. Members of that church, men and women, have left the luxurious homes in which they were born and have gone to live near slums and tenement houses in order to cultivate the acquaintance of their inmates, and appear "as friends and equals." If "he can't be wrong whose life is in the right," we must suspend our

judgment until we inquire whether narrowness and formalism are of themselves criminal. And that church, too, in the form which it takes in this country, is rapidly extending its influence and increasing its membership. And its formalism takes a shape which I think might be adopted with advantage by the new religion contemplated by E. G., should it ever get under way; that is, the stated reading of the Scriptures in portions so arranged that in the course of a year all that is profitable for instruction has been read aloud to the people. Certain parts are read more frequently, such as the Ten Commandments and the two added by Christ. These are read at every meeting for worship, as are certain prayers asking help to live a "Godly, righteous, and sober life;" and others more at length enumerating the dangers and temptations to which we are exposed and the various sins which assail the soul, and prayers to be delivered from them.

This, perhaps, is not worship; I speak of it only as *instruction*, which it is, as much as if, instead of a prayer asking the Divine help in doing so and so, and escaping this and that, an exhortation were addressed to the audience warning them of their duty to do this and avoid that. Its value lies in its bringing the various matters to the mind of the hearer, coupled with a suggestion of his duty in connection with them. I cannot but regard this exercise as of great importance in the training of youth. As I have said, it may not be worship; nor is preaching part of worship; yet it is permitted in religious meetings of every denomination, and was so in the time of Christ in the Jewish synagogues, as was the reading of the Scriptures also. He Himself in the town where he was brought up was accustomed to read the Scriptures aloud in the synagogue. (Luke 4: 16). If, fortified by such an example, Friends had seen their way to provide some such instruction for their young members and not left it to the parents without any oversight by the meeting, we probably would not see, as we do now see, meetings on every side deserted and laid down, because members are not satisfied in their religious instincts by spending one hour once a week in silent sitting with their friends. If the church is narrow the meeting is not very broad.

In his enumeration of the qualities desired in the new religion, Edward Grubb includes two elements which have produced the very vices which he condemns in the dominant religion. Its narrowness is the result of the scope given to the intellectual faculty, and its formalism is very much due to the artistic. The greatest intellects among Christians are just those which have built up the vast theological structure which alone is recognized by all but one in a thousand as true Christianity. It is they who have established that in Adam all his posterity sinned and justly incurred and received the sentence of eternal punishment; and that this sentence will be remitted in no case but to those who believe in Christ as the theologians teach them to believe, and are baptized. This is an essential part of the belief of at least every Protestant church. But the establishment of this doctrine is by no means the most extraordinary achievement of the intellectual fac-

ulty. Transubstantiation is its master-piece; the doctrine that a piece of bread blessed by a priest who is in the apostolic succession, is in fact and reality God who created the universe and is to be adored as such. Yet learned men, good, honest, sincere men, hard-headed Englishmen, who earnestly sought the truth and spent years in seeking it, have in our day, under the guidance of the intellectual faculty, come to the solemn conclusion that the bit of bread when ready prepared and blessed to be eaten and digested, is really and truly God, and have, before eating, adored it. And so they believe at this day.

Then, too, the artistic faculty has had its victories though not at the expense of truth, yet at the expense of reason and justice. It has impoverished the people to build stately cathedrals and adorn them with stained glass, pictures, and statuary. It has trained musicians and singers to fill their temples with delicious melody. It has devised gorgeous vestments and studded them with costly gems; and it has arranged splendid ceremonies which architecture, sculpture, music, and dress combine to render imposing, and which occupy the thoughts instead of lifting them on high. How wonderfully has the experience of eighteen centuries verified the mysterious sayings of Jesus that the religious truths are "hid from the wise and prudent," and that of St. Paul that not many "wise after the flesh" are called. If we are to have a new religion, let us not build with materials which were condemned by the architect in advance, and which have been proved by long experience to be worthless. The mission of Friends should be to dethrone the intellectual faculty and elevate the moral faculty in its place.

Edward Grubb, in the article under consideration, assumes that the improvement of the condition of the poor is properly a religious work, but gives no reason for his conclusion. Dr. Lyman Abbott in an article in the *North American Review* of the current month on "Socialism," takes the same view and gives his reasons at some length. Christ, he says, the founder of our religion, made no war on the institutions of society. He assailed individual sin. There was drunkenness in his day but he did not condemn liquor-sellers; slavery, and he did not condemn slave-holders; wars, but he did not condemn soldiers. Laws were oppressive and cruel, but he did not seek to change them. He exhorted men to seek the kingdom of God, secure that all good things would follow. So now, says Dr. Abbott, raise the moral tone of society, purify the hearts of the people, and they will then change all that needs changing.

But it is by no means certain that the evils that afflict society are wholly the result of wickedness and irreligion. There is such a thing as zeal without knowledge; and it is well known that ill-judged charity increases the evils it strives to cure. We know that in our own country and abroad where people are surrounded by Christian influence, their condition social and moral is as bad as anywhere on earth. And as there are Christian communities that live under bad institutions, so there is at least one pagan community whose social and moral condition might excite the envy of the most orthodox believers. The

Parsees are the descendants of the Persian fire-worshippers who fled before their Mohammedan conquerors more than a thousand years ago, and taking refuge in India, have debased their comparatively simple idolatry by an admixture of the filthy and grovelling superstitions of the Hindus, including the worship of the cow. Their highest religious rite is anointing themselves with a certain filthy liquid. Yet among these people drunkenness, unchastity, gambling, and beggary, vices rife in Christian lands, are all unknown. They are so honest and conscientious that they are preferred for situations where trust is necessarily reposed; as railway-guards, and as contractors on public works. The credit of a Parsee merchant is "almost unlimited." If they have counterbalancing vices, the authority I follow does not disclose them.

Of the Persians who remained at home and submitted to the conquerors, most part adopted the religion of their masters; but a small remnant refused so to do, and have consequently been throughout all the intervening ages plundered, oppressed, and degraded by the Mussulmans who have an intense hatred of idolatry. Their kindred in India number near two hundred-thousand and are, on the whole, rich and prosperous. Those in Persia are comparatively few—perhaps ten thousand—poor and sunk in ignorance. Yet "they have a high reputation for honor, probity, obedience to law, chastity, and endurance." (*Chambers's Encyclopædia*, Art. Guebres. *Encyc. Britannica*, Art. Parsees.) Here we have two portions of the same people differing in religious faith and living under very dissimilar conditions, but both displaying the same eminent virtues. Does this not go to show that religious faith is not the controlling agency in determining the social condition of a people?

But while religion, perhaps, just because it should be free from the control of the intellect, is not fitted to deal with physical problems; yet it by no means follows that religious persons should not engage in such matters. There they can find scope for the intellectual faculty under the guidance of just the spirit which ought to and often does animate such persons. If, as I think, the great object of social science is *in some way* to make every one contribute his share to the common stock and, *in some way* to make a just distribution of the product of the labor of all, this is a wholly distinct thing from the advancement of morals; and to a certain extent the economical reform must precede the moral reform, instead of, as Dr. Abbott and perhaps Edward Grubb think, following upon it. Men and women who huddle together at night twenty in a room 12 by 15, without the possible chance of observing the simplest rules of decency, men and women who have no possible chance of ever getting so much comfort as this without thieving or doing worse, cannot be made Christians. If the prayer "lead us not into temptation, but deliver us from evil" has any meaning at all, it means delivering from precisely the condition under which millions of the poor now spend their lives.

But while the needed social reform is a work

which in my judgment no religious society, as such, can advantageously undertake, it is above all one which religious and well disposed people are eminently fitted to accomplish; and the best part of E. G.'s paper is that which recommends a "social union for discussing and attempting to apply in practice some of the best means of improving the condition of the people, and for pressing the subject on the attention of our own society and the public."

It was a question in the time of Christ whether it was wisest for men to direct their efforts to cure the ills of life, or to prepare the mind to endure them with serenity. The greatest philosophers of antiquity, the Stoics, advocated the latter course as the most practical and the most noble, and, indeed, held somewhat in contempt the men who sought to make themselves useful. Early Christianity may appear to have partaken of this spirit, and it has been treated as having much in common with the Stoic philosophy. But this is apparent only. Christ preached only to the Jews; and their law, which he expressly said he came not to destroy, admitted and declared the obligation of caring for the poor and indeed made ample provision for them. Because he did not institute a social reform where the law had only to be put in force to render it needless, it does not follow that we should not do so in a country and time when the laws unless changed threaten to place the whole laboring class at the mercy of a few who know how to manage the machinery of business, and manipulate the process of legislation.

IN AND AROUND SANTA BARBARA.

ONE hundred and fourteen miles by rail from Los Angeles brings us to the sea-girt city of Santa Barbara, situated midway in a plain which here,—owing to a divergence of the coast,—tends almost due east and west, and gives the city a southern exposure. This plain is partially shut in by the long range of Santa Ynez mountains, some three thousand feet high.

Our first impulse after shaking the dust from our feet was to go down where the ships come in, and we walked, breathing the delicious sea air, for one mile along the broad concrete-paved avenue which forms the principal thoroughfare, until it terminates in the pier extending into the deep water of the harbor. We arrived here in the wake of one of the most terrible storms which had visited the coast in twenty years, and one of the disastrous results was evident in a couple of yachts landed high upon the sand, one with a great hole stove in her side, and otherwise battered by the merciless waves. After luncheon, our carriage was at the door, and out the wide smooth streets we drove, under the graceful, overhanging pepper trees, and between gorgeous parterres of flowers, past great fields of pampas grass planted in long rows, resembling barracks of green hay, and up, up, the winding road traced over the foot-hills to an elevation, from which we have an outlook of valleys, mountains, islands, and ocean, unsurpassed by any seen along the Pacific coast.

The character of the scenery here, the salubrious climate, and the bluest of skies suggest Nice to the tourist who has traveled abroad, and returns but to fall in love with the artistic skill of nature in his own favored land.

Southward some twenty miles, a chain of islands, San Miguel, Santa Rosa, Santa Ynez, and Ana Carpa, lift their purple domes and spires from out "the sun-bright deep." Between them and the coast lies the Santa Barbara channel. These islands were discovered by an expedition in command of Rodriguez Cabrillo, in 1542, and were then inhabited by Indians. It is said the bones of this first California pioneer lie in the island of San Miguel. There is a true but tragic story connected with the smallest of this group which dates back to the year 1836, when a number of Indians were being removed from the island. When about to embark, it was discovered by one of the women that her child had been forgotten, and, returning for it, was left behind by her companions, who in consequence of an approaching storm, were obliged to set sail for the mainland. Unfortunately, she was left to her fate, and after a lapse of twenty years, George Nidever, of Santa Barbara, visited the islands for otters, and while there searched for the lost woman, and was rewarded by the discovery of three huts made of whale-ribs and brush, and near which was the object of his search. The woman, though only about fifty years of age, was grey, and emaciated, and apparently had lost the use of language, and all human instincts. She was clad in garments made of skins and feathers, and her hair was wild and unkempt. Nidever brought her to Santa Barbara, where, in three months after her rescue, she died, and was buried by the Mission Fathers.

We follow down the rocky promontories bordering the ocean, until we catch a glimpse of Carpenteria, twelve miles from Santa Barbara to the southeast. The inblowing breeze is laden with the odor of petroleum, and the oily substance has calmed the "troubled waters" in many perceptible places along the shore. The late Dr. Brinkirhoff says: "For miles from Santa Barbara, in a westerly direction, in the bed of the ocean, about one and a half miles from the shore, is an immense spring of petroleum, the product of which continually rises to the surface, and floats over an area of many miles."

Returning, our road leads along the eastern slope of the foothills, from whence we look deep down into the valleys of Monticeto, wondrously beautiful in their lights and shadows. For a background rises the steep, rugged wall of the Santa Ynez mountains, partially concealed by a thick growth of chaparral, and at its base, the scattering, rambling village and settlement, the red roofs of the creamy painted houses peeping out from dense clumps of live oaks. As we descend into this enchanting valley, a wave of delicious perfume steals up from an ocean of pink and white blossoms. We plunge down through the sweet scented air, and follow the serpentine road we know not whither, while it leads through groves of oranges and limes, past orchards of English walnuts and loquats (a Chinese plum) to where are the dark shining leaves of the olive, so tenderly associated in

memory with the land where trod the feet of Jesus of Nazareth. These trees are so unlike all others, so rare in color, and delicate in their tracery of leaves, which ever quivering, discover underneath the greyish tints. The cultivation of the olive was first undertaken by the friars, and many of these trees are yet growing about the Old Mission ruins. The fruit now bids fair to be one of the staple products of Lower California.

In this little secluded world, reign quiet and contentment supreme. There is no sound, save the sweet voice of the meadow lark, the piping of marsh frogs, or rushing of rivulets. It is indeed a rare retreat for the lovers of the beautiful and seekers after peace. Apart from all other attractions, this is said to be the natural home of every known shrub and plant. Here grew the celebrated grape vine, which was transported to the Centennial Exhibition, and its offspring,—equally as extensive,—is yet to be seen. It has a trunk twelve inches in diameter at the ground, and covers an arbor sixty feet square.

On the Sawyer property, at the upper end of the valley, are over twenty varieties of palms, amongst them a screw palm, a sago from Ceylon, a group of *Dracenas* palms, and one which bears dates. Besides these are the oak, eucalyptus, pepper, nectarine, cypress, etc., and a valuable alligator pear tree from Mexico, a rare specimen of silver tree from the Cape of Good Hope, and camphor, India rubber, madrona, and magnolia trees. A supply of water sufficient for irrigation comes from a mountain torrent, bordered and overhung by immense old oaks and sycamores. It leaps over boulders and rocks and makes wild music in its swift flight to the sea.

Agriculture is not a feature of this valley. It is composed of cozy homes, and handsome residences of the affluent, with the grounds about them laid out with great skill and taste. At the open gate leading to one of these mansions we halted. Who could hastily pass a home so beautiful, where rare roses clambered to the very housetops, where a wealth of vines almost enclosed the wide gallery, hanging in festoons and glowing with the crimson discs of the Passion flower. The artist leaps from the carriage, the spring of the camera snaps, and we bring away the colorless picture, robbed of half its beauty.

Here and there we passed humble homes, half hid beneath the trees. At the door of one of these, sits a comely woman, with her dusky children playing about her, typical Mexicans, with the blood of Spanish ancestors flowing through their veins, descendants, perhaps, of some of the discoverers whose names are written upon the blood-stained pages of California's early history.

Now we climb the shadowy hills, and look down again upon Santa Barbara. It is high unto sunset, and the long shadows lie athwart the beautiful land. The breast of the blue ocean is waveless, and a soft mist enwraps the island chain. Away beyond the peerless plain, the Aloha Hills trace their outlines against the mellow sky. To complete the picture, in the foreground a flock of sheep, ripe for the shearing, nibble the green grass, tended by their shepherd with his crooked staff. My thoughts flew to

"H. H.," for these were her familiar haunts. No valley, cañon, or mountain fastness was left unexplored, in her tireless search for the material to form the warp and woof for the weaving of her touching story of "Ramona," which has thrown such a glamour of romance over Southern California, and made her name a household word throughout this and other lands. I remembered her, too, when passing through fields of mustard, likened unto a "golden snow storm," and saw the very birds rest in its branches. Is it any wonder that later on we were unmindful of a glorious sunset,—crimson-barred,—while bowling along, eagerly watching for the first sign that betokened our approach to the Camulos Ranch. There, sure enough was the olive orchard, the Santa Clara river flowing past "low reed-grown banks," the "gently sloping pastures," but alas! the home of Senora Morena was scarcely visible beneath the thick growth of trees, the whitewashed walls of the long low adobe, helped out only here and there, and but a corner of the veranda—with its "vines and linnets' nests," repaid our anxious expectations.

"How do you like our climate?" is the question added to the first greeting of every new arrival by the enthusiastic Californian. How could we reply, other than that it was perfection. We thought so, at least, as we drove to the Old Mission, for no softer to the cheek could be the fuzzy little head and face of the tender infant than the zephyr which gently stirred the listless leaves; but it was a breeze that chased the sun-heated air away to its home on the Mojave desert.

We could see the Mission from our hotel, situated as it is on the northern outskirts of the city, against the green foothills. This is one of the many old Missions to be found up and down the Pacific Coast, and it is said to be the best preserved of all, and has had the most notable history. It was founded in 1786, but has of late been in the hands of the inevitable restorer. However, the bell towers, of which there are four, and other features of the venerable old pile are untouched,—save by the finger of time, which has marked them with signs of great antiquity.

Nearly all the Missions are built after the same plan, in the form of a square, with its enclosed courtyard, into which we looked from the belfry, but which is sacred to man alone, and the foot of woman is not allowed to penetrate therein. The monks here are of the Franciscan order, and with Fathers and Brothers, all told, are about fourteen in number. The long brick-paved corridor is closed in with pillars, with arches between which support the rooms above, over whose uncarpeted floors we heard the tread of monkish feet. While reading some of the thousand names written upon the whitewashed walls, a door opened and a tall friar with kindly face stepped out and greeted us. He was habited in the usual coarse woolen gown of his order, with hood and girdle, and close skull cap. While conversing with him, I ventured to ask the extent or limit of their seclusion. He smilingly replied, "In the twenty-six years of my life spent here I have only been twice to Santa Barbara"—so near and yet so far!

But he cheerfully added, "I do not care much to go, and I take my daily exercise up and down this corridor," which, indeed, was well worn.

The history of these missionaries is an interesting one, and they played an important part in the settlement of California. As early as 1609 they visited the coast, and endeavored to convert the Indians and establish a Mission, but their overtures were received with bursts of indignant yells and a volley of arrows, and many perished at their hands; but their religious zeal was undaunted, and finally, after years of hardship and suffering their efforts were crowned with success. The Missions thrived and flourished, and the friars became rich landholders, with the subdued Indians as their laborers. But changes have been wrought, and to-day the old landmarks are but interesting reminders of the earlier eventful years.

And now by way of conclusion let me say to the art-loving tourist, that he will be amply repaid, if he gain admittance to the studio of Henry Chapman Ford, in State street. The capacious room is filled with works of art and curios. The water colors from his own hand are rare bits of scenery, caught here and there along the crescent beaches and picturesque coast. At certain seasons, for the last fifteen years, he and his companionable wife have lived their lives out under the broad canopy, pitching their tents on mountains, in valleys, or by the sea, catching the ever varying effects of storm, of sunshine, of shadow, and taking note of every glowing tint or radiant coloring to be most truthfully portrayed in the minutest detail. They have gathered, too, treasures from many nations, and other climes,—priceless old baskets and woven ware, and stone implements from the extinct race of Aztecs, earthen jars and mats and curious articles of more modern Indian manufacture, rare old coins, picked up here and there, with lovely shells, and specimens. Waterfowl, and nests, and skeletons of strange birds, and one thousand of other articles that go to make up the unique collection.

TRACES OF EARLY HISTORY IN DECORATIVE ART.

To the student of History, everything which throws a light on the dark and intricate page of the earliest epochs is precious. Too often the evidence of certain great events is fragmentary and apocryphal at the best, and the faint gleams of truth seem like the wavering light of the *ignis futurus*, "leading only to bewilder." In these cases, what the testimony of the rocks is to the naturalist, the research of the archaeologist should be to the historian.

It supplies the lost connection of the story, which perhaps has been handed down from generations, verbally, before it reached a period, and a race, with sufficient scholarly instinct to resolve it into archives.

While the Art and Literature of a nation are sure indications of its advance or decay, its Decorative Art may, and usually does, belong to a much earlier period; and always embodies more fully the spirit and character of the people.

Where it has been found pure, simple, and beautiful, there is beneath it, moral health, purity, and strength. Where it is corrupt, false to truth and harmony, there, too, it is the handwriting on the wall; and the downward path of such a nation is swift and sure.

What a complete survey of the whole life of the ancient Egyptians is depicted in the interior decorations of their temples and tombs; their religion, their customs, their political importance! How pathetic seems to us, now in our Christian era, their hope and desire for the immortality of the soul,—their belief that if the body perished the soul also was lost. And while their homes have long since mouldered into decay, their tombs are almost indestructible. In the carvings on a sarcophagus which belonged to Rameses III. is indicated a symbolic parallel between the course of the setting sun in the mysterious paths of the west, and the wanderings of the soul after death. The ornament of the lotus, which signifies the life-giving power of the spirit, is singularly effective, and falls harmoniously in with the lines of their grave and impressive architecture.

In turning to Persian and Assyrian Decorative Art a strong contrast is presented. It could not have been a spiritual, an intellectual, or even a thoughtful people who have made the vigorous display of muscular activity which we see in their terra cotta and brick ornaments, with their sometimes incongruous lines, and the vivid colors seen in their tiles of a later period. We do not see them employed as the earlier Egyptians or those who dwelt in what is now known as the Holy Land, in sowing seed, in winnowing grain,—but all is battle and conquest.

Later came the arts of the Phœnician, the commercial and manufacturing people, with their train of servants, with their ships on the sea, their stained glass, their brass work, their priceless stuffs and gorgeous apparel, fit robes for kings, and the "soft raiment" of those "who dwelt in kings' houses,"—beautiful fabrics, but perishable,—and among the lost arts, which those things that minister to the human only, must needs be. We can see the semblance of all this in reliefs on the monuments, but little of their work remains. The Cyprian sculptures seem to be a connecting link with the very early work of the Greek and Etruscan, the simplicity of which, with its truthful beauty, holds us in an enchantment. We seem surrounded by an exalted atmosphere, and the spirit of the old Greek poets breathes through it all. With cunning hand they have well represented their simple, thoughtful life, these early Greeks—severe in its morality, lofty in its aspirations. If we regard their household decorations, and one scarcely appreciates the importance of Decorative Art until all of it that pertains to our homes is considered, how true to nature it is, and how perfectly well adapted to the use to which it is applied. See this vine turned around a mirror; it is all bronze; yet while each leaf, branch, and tendril is fitted to a certain space, there is in the fine manipulation all the growth of the plant. They must have lived near to nature to have so beautifully translated her in all her loving moods. If their religion seems to us fantastic, and

legendary, we must remember that to them it had a deeper meaning, and most of them lived closely to its precepts as they understood it. In looking at their tomb slabs alone, we, in the light of Christianity, might learn a deep lesson. In one a family group is seated who have been gathering fruit. On the table before them are clusters of grapes. One rises to depart. Perhaps he has heard the mystic voice, "Come up hither," which in later ages came to John of Patmos. He reaches out his hand, and the marble expresses the silent farewell. A soft melancholy falls on the faces but there is no violent grief.

In another a mother leaves her children. They seem fully to comprehend her last parting, and look lovingly toward her; but there is no anxiety in her face, only a look of calm trust. In several, the parting one points upward, and the written inscriptions are tender and trustful.

More than any written history, these tomb slabs, absolutely sincere as they are, discover the whole life of the Greeks.

Examples might be multiplied from the antique Irish shrines and reliquaries, with their barbaric display of gold and jewels, to the simple strap-work ornamentation of the Saxon-Runic cross.

How much light the recent excavations in almost every old shire and town in England has thrown upon the almost unintelligible chronicles of the early times of our forefathers! An old fireplace with its rude cooking utensils, and an ornamented child's toy in bronze, found deep down in the peat bogs of Ireland, gives the intelligent historical student just the information needed of that ancient people, and every example of archaic Decorative Art throws its own true light upon and illumines the page of history.

E. H. ATKINSON.

Paris, France, Fourth month 7.

For Friends' Intelligencer and Journal.

CONCERNING SOAP.

"SOAP is a great civilizer." In order to gain some idea of its importance as a factor in the American life of to-day, one has only to turn to the advertising pages of any of our popular magazines and note the eloquent language and the artistic skill displayed in commending to the public, "Pears'" or the "Ivory." Indeed it is hard to imagine how people could have made much progress in the art of living without the aid of the cleansing properties of soap.

In various parts of the world are found plants whose leaves, roots, or stems contain a substance called saponine, which forms a substitute for soap. Prominent in the list of these plants is the familiar soapwort, or Bonning Bet, the mucilaginous juice of which forms a lather with water; the Yucca roots are used by the Mexicans for washing; Spain has a plant containing the same principle; while the *Quillaja saponaria* furnishes soap to the natives of Chili and Peru. The composition of saponine has not been accurately determined, though it has been extracted and studied by several chemists at different times. It is not confined to the plants of a single family but is distributed at random through the *Rosaceae*, the *Caryophyllaceae*, and other orders.

The process of making soap from alkali and fat is of very ancient origin. The word is found in the Bible but it is supposed that the two words thus rendered really mean potash and soda. It is certain, however, that the Romans were acquainted with its use, having, according to Pliny, learned it from the inhabitants of Gaul when they conquered that country.

But though the process was known and some skill had been acquired in the art of soap-making, the knowledge was merely empirical and it is only within recent times that science has confirmed and improved the well-known method and explained the principles upon which it was based. It took many centuries for chemistry to emerge from alchemy. So long as the science was only a search for the "elixir of life" and the "philosopher's stone" there was little hope that any practical good to the human race would result from it. How persistently man has sought for the things beyond his reach, instead of turning his attention to improving the health and happiness of the world by using those means which lie close at hand! But when the scientific spirit began to prevail, chemistry took its place with the other sciences and the early part of the present century found Chevreul, a noted French chemist, busy with his experiments upon the fats and oils. To his investigations we owe our fundamental knowledge of the fatty bodies, which, in combination with alkali, produce soap.

The fats and oils consist of a common base, glycerine united with stearic, oleic, or palmitic acid. Stearic and palmitic are solid at ordinary temperatures and form fats; the former is abundant in tallow and the latter in butter. Oleine is more oily and is found in lard. Many fatty substances are mixtures of two or more of these materials. The fats and oils are found in vegetable as well as in animal matter; olive oil, for instance, which is largely used in the manufacture of Castile soap in southern Europe, contains both oleine and palmitine.

On mixing the fats and oils with an alkaline substance such as potash or soda, the acid of the fat combines with the alkali to form a soap, and the glycerine is set free. On this combination soap-making depends, and the qualities of the soap vary with the different acids and alkalies which enter into its composition.

Potash and soda are the only alkalies used in the manufacture of soap; the former on account of its propensity for absorbing moisture, forming a soft soap, and the latter a hard soap. Formerly, the cutting down of forests in Russia and North America led to the manufacture of large quantities of potash which was utilized in the manufacture of soap. Had it not been for the stormy days of the French Revolution, potash soap might still be in vogue among the soap-makers instead of being relegated to a constantly narrowing place in domestic economy. But a "committee of public safety" demanded of the French chemists a new process for soda making, the war having cut off the supply of kelp from which this article had been obtained. The chemists set to work at their task. The result was Leblanc's process

of manufacturing soda from common salt (sodium chloride). Soda became cheap. A revolution in soap making followed and the use of potash has since steadily declined.

The substitution of soda for potash is not the only improvement which the chemist has effected in soap manufacture. In place of crude tallow, purified fats and oils have come into use. Here, as elsewhere in the industrial world, science has extended and perfected the art of earlier days.

State Centre, Iowa.

ANNA L. NICHOLS.

Not in the brow demure,
Not in the downcast eye,
But in the purpose pure
Lies sainthood's prophecy.

The victory over sin
Hath never yet been given
To those who strove to win
For only self a heaven.

Self-seeking must depart
Ere others' homage come;
The sovereigns of the heart
Are crowned by martyrdom.

Think not thy sainthood now
Mankind will recognize;
They who are crowned below
Were first crowned in the skies.

—E. N. Pomeroy, in *Congregationalist*.

I AM a humble pensioner myself for daily bread,
Shall I forget my brothers who seem in greater need?
I know not how it happened that I have more than
they,
Unless God meant that I should give a larger part
away.
The humblest wayside beggar and I have needs the
same,
Close side by side we walked when God called out
one name,
So, brother, it but happened the name he called was
mine,
The food was given for us both,—here half of it is
thine!

PRACTICAL FORESTRY: TREE PLANTING.¹

In planting trees discretion must be observed in selections, as native trees are more hardy and longer lived than the foreign species. More open air spaces in cities as an adjunct to public health was advocated, and likewise no half-mile area of built-up district should be permitted without its breathing place where those who were unable to reach more distant points might resort. In crowded cities thousands of men, women, and children are annually falling victims to the poisons of alleys and sewers, and the inability to breathe the pure atmosphere afforded by trees. Steps must be taken by the State sooner or later to preserve the forests, or serious results will occur in the matter of the supply of pure water. Individual effort can do but little compared to the concerted action of the government. Like other departments of public welfare, the preservation of

¹ From a Lecture at West Chester, Pa., by Dr. J. T. Rothrock, University of Pennsylvania.

forests must be conducted at any cost whether directly profitable or not.

This will compel the replanting with trees of many districts now entirely denuded of such growth; rocky hills, sandy ridges, and spaces otherwise unfitted for cultivation can be utilized in this way. At least two thousand square miles within this State, which but a few years ago were heavily wooded, can now be found to meet these conditions; stripped in a year of what it required at least two-thirds of a century to produce.

In recent conversation with a gentleman formerly engaged in lumbering, the lecturer found him an earnest advocate of forestry, a recent experience of the expense of obtaining the roughest class of timber for mine purposes having opened his eyes to the increasing destitution of timber, in which he had taken an active part. Also in riding through a district formerly well wooded the change was so marked as to be distressing; in place of the luxuriant forest was now a cleared district whose impoverished soil yielded a scanty return to the plow and foretold a dismal future. The forestry law does not seek to restrain the cutting of matured timber, but desires to replace the grown tree with young sapling that will increase with age in value. The face of the earth upon steep hill-sides when bereft of trees is quickly seamed by the spring torrents and its beauty gone with its trees. Tree planters are working for the lives and health of their posterity— all ground too steep for cultivation should be planted with trees, and also all islands in rivers should be thus utilized. Low lying fields now annually washed by floods could be improved by the same practice, and bog could be made available for certain varieties. Upon rocky land the rock chestnut oak flourishes, and in Massachusetts thousands of acres of replanted land were covered with dense growth as far back as 1846. In Pennsylvania plenty of rough land is to be found equally available for this valuable wood.

On sandy ridges the pitch pine flourishes, and in gorges fit for nothing else, the butternut, which is easy to work and has a satin-like finish, grows almost in any place and along water ways will hold the banks secure against flood. And so also the American linden, useful for carriage material, paper pulp, shoe soles, and even for corlage and matting. In the swamp the basket willow is at home, and there appears to be no spot so sterile that some variety of tree cannot take root.

Among the trees whose value is yet hardly realized is the sugar maple which now produces twenty-three per cent. of the sugar made in the United States, an example being quoted of a grove of a thousand trees which returned its owner two hundred and forty dollars annually for sugar without counting the wood that it produced.

Two causes of excessive waste of timber are in fencing and by fire, and the remedy for the latter being in the enactment and enforcement of stringent laws providing for severe punishment for burning up timber land.

Professor Beal, of the University of Michigan, who has given great attention to the forestry ques-

tion, claims that the damage among the young shoots of the timber in that State by annual fires is incalculable and will eventually result in a serious deficiency of timber. The enactment of laws against forest fires would be practical forestry. The opponents of forestry cannot get over certain facts which are obviously apparent, among which are as follows:

1. There is not a single State in the Union which has timber enough to last fifty years.
2. Pennsylvania, formerly one of the greatest lumber producing States, is now non-supporting in timber.
3. A crop of trees cannot be raised in a year.
4. It will take at least fifty years to raise a supply of available timber.
5. Nothing is being done.

Through the schools of the Commonwealth great good can be accomplished by interesting the young folks in this important subject, and to such educators as Higbee, McAllister, and Philips, great credit is due.

Experimental stations for tree culture can produce good results and Burnett Landreth, of the Forestry Commission, is urging the acquisition by the State of Penn's Manor farm in Bucks county for this purpose. William Penn in his early grant obligated his purchaser to retain one acre in six in forest and thus showed wisdom and prudential forethought.

Townships should make common cause in this matter and plant trees in waste places, as is done in Germany and other foreign countries. Pennsylvania is in the van in this movement and where less than a dozen years ago the advocates of organized forestry could be counted on one hand, an association with five hundred members now exists. The Governor of the State is the Chairman of the Forestry Congress which will meet in Philadelphia in October, and the general interest over the country has been mainly the work of a few pioneers, the majority of them being women, who have always stood foremost in every good work of reform.

SWARTHMORE NOTES.

—The Faculty have changed the date of the contest for the Magill prizes in oratory to Sixth-day evening, the tenth of next month.

—The Freshman Class have postponed their sports until Fourth-day afternoon, Fifth month 1st. They will have an interesting programme of games.

—Lukens Webster spoke in the meeting on First-day last. In the afternoon he attended Professor Smith's study of the principles of the Society of Friends, where there was an interesting discussion upon the influence of atheistic oratory and literature.

—The annual gymnastic exhibition was held on Seventh-day afternoon last before a good-sized audience. The event was made more interesting by the fact that six silver cups, offered by Dr. Shell, for the Department of Physical Culture, were offered for competition. One of these was won by Walter Roberts, '90, who cleared nine feet in the pole-vault, a remarkably good indoor record; another by Ralph Stone, '89, who jumped five feet, four inches, and

the remaining four were awarded to the '89 tug-of-war team, which defeated all competitors.

—The regular sports of the college Athletic Association will be held in Whittierfield, on Seventh-day, Fifth month 11th. This year's contests promise excellent results as the gymnasium exhibition disclosed unlooked for strength in Athletics.

—The joint meeting of the Somerville and Delphic Literary Societies on Seventh-day evening last was a very pleasant social event. There was good debating, and several able essays and well delivered recitations.

THE EXTERMINATION OF THE BUFFALO.

At the present time, outside of the National Park, where about two hundred and sixty buffaloes are now harbored, there are not over three hundred, probably not as many, left in the whole United States. The survivors of this magnificent race of animals are scattered in little bunches in several localities. There are about one hundred in Montana, or at least there were a year ago, some at the head of Dry Creek and the remainder at the head of Porcupine Creek. In Wyoming there are a few stragglers from the National Park, which, when chased, run back there for protection. In the mountains of Colorado last summer there were two bunches of mountain bison, one of twenty-five head and the other of eleven. These have probably been killed. There are none in Dakota, though eighteen months ago thirty were known to be there. It was estimated in 1887 that there were twenty-seven in Nebraska, and about fifty more scattered in the western part of the Indian Territory and Kansas. Those in Nebraska have since been killed by the Sioux. Of the thousands that once inhabited Texas, only two small bunches remain. Thirty-two head are near the Ratons, in the northwestern part of the Panhandle, and eight in the sand-hills on the Staked Plains north of the Pecos River. These were seen and counted on the 1st of April of last year. This estimate of the remnant of a great race is believed to be essentially correct. It was obtained from reliable and well-informed persons throughout the West, and in part from personal observation during the past years.—*Franklin Satterthwaite, in Harper's Magazine.*

"Thou knowest not what argument

Thy life to thy neighbor's creed has lent."

In these lines Tennyson spoke only the truth, but the man who stops on it makes a fatal mistake. Tennyson's doubter "fought his doubts and gathered strength;" he did not stay with them, and cultivate them, and preach them; "he faced the spectres of the mind and laid them," and so "came at length to find a stronger faith in his own." This "stronger faith" should immensely outweigh the doubt, unless religion is to perish.—*Boston Transcript.*

"It takes a soul

To move a body—it takes a high-souled man

To move the masses—even to a cleaner sty;

It takes the ideal to blow an inch inside

The dust of the actual."—*Browning.*

THE LATE MICHAEL CHEVREUL.

THE fact that M. Chevreul, the distinguished French chemist, whose death was announced on April 9, lived beyond his one hundred and second year is of itself almost enough to secure his fame. But, like Moses Montefiore, he was distinguished for more than his length of days. Almost to the very end M. Chevreul still earned his modest fee for attending the meetings of the French Academy, and his intellectual vivacity does not seem to have deserted him at any time. His studies and experiments were carried on in his chamber, when he was not able to leave his bed for more than a few hours each day. It is not many days since the death of his son at the early age of sixty-nine recalled the story of the father's down right vexation, as it is described, when the younger man was compelled to go under a physician's care. The lively old gentleman of one hundred and odd seemed to have no patience with the fragility of his degenerate offspring.

The labors of M. Chevreul, as a chemist, were eminently practical, and of great utility, though perhaps not carried along lines where they attracted a marked degree of popular attention. He devoted himself to the study of the properties of animal fats with an enthusiasm which is said to have been almost romantic, and with results which will be felt for all time in the increased comfort and healthfulness and happiness of everyday life. His final, and perhaps his greatest achievement was, by dint of arduous experiment and study, to make practical the manufacture of glycerine for common use. This introduced an important element in the making of soaps and unguents, into medicine, into a vast variety of mechanical and artistic processes, among them printing and the manufacture of paper, and into explosives. Its utility seems capable of almost indefinite expansion, and while M. Chevreul was not the first to discover the properties of glycerine, he was the first to open the road for their employment in many ways for the advantage of mankind. Great as the results are that have already been achieved under this head, they probably give a faint suggestion of the development that may be expected hereafter. Another achievement of great utility, though not one of a sort, perhaps, that the poet or the orator would find a heroic theme, was the introduction of the stearine candle—a benefit to the masses of the race which few statesmen or great warriors have ever equalled.

Another subject to which M. Chevreul was conspicuously devoted was that of colors. This he studied with indefatigable zeal, and considered from every point of view. . . . It is sixty-five years since he was appointed director of the dyeing works and professor of special chemistry in the tapestry manufactory of the Gobelins. During much of this long period he carried on experiments in dyes and studies in color with astonishing industry, and with that combination of profundity and versatility which is one of the characteristics of the French mind. There was no detail of art as applied to life with which he did not concern himself, from the decoration of churches to the

coloring of children's picture-books, and the influence of his researches has been felt in every such field of adornment.

His discoveries were not sensational, but they aided in the advancement to a remarkable degree of the useful and the beautiful. His great learning, his wonderful activity, both of body and mind, and the unprecedented prolongation of his career as a scientist, made him one of the picturesque figures of our time.—N. Y. *Tribune*.

RESULTS OF SCIENTIFIC FARMING.

A RECENT prize offered by an Eastern horticultural society for the largest money product from a given area of small fruits was awarded to a strawberry grower whose sales from two acres amounted to more than seventeen hundred dollars; and Mr. E. P. Roe, in *Play and Profit in my Garden*, has told us how he secured a gross return of slightly more than two thousand dollars from the same amount of land. In the report of the last annual meeting of the New Jersey Horticultural Society the following are given as some of the yields obtained by its members, "although the season had been uniformly bad." Early cabbage produced \$435 per acre; early tomatoes, \$585 per acre; asparagus, four acres returned \$900; seven acres, \$1,000; four acres, \$200 per acre, and some instances as high as \$300 per acre.

Mr. Peter Henderson tells of an asparagus grower near Atlanta whose crop gave for three successive years a net profit of \$1,500 per acre; and as instancing departures from old methods, cites the case of a farmer residing near Rochester, "who half a dozen years ago timidly made the attempt of growing a half-acre of his fifty-acre farm in vegetables for a village market. His venture was so satisfactory that he gradually increased his area, so that he now uses thirty of his fifty acres mostly in growing cabbages for the Rochester market. He further informed me that the net profit from the cabbage garden last year was six thousand five hundred dollars, or a little over two hundred dollars per acre, and that it was not a very good year for cabbages at that." And for the encouragement of those not "to the manor born," the same authority gives the following case as being within his personal observation: "A college-bred man of twenty eight, failing in health from office work, purchased a farm of sixty acres at Northport, Long Island. The second year he tried a few acres in vegetables and small fruits, which he found sale for in the village of Northport at most satisfactory prices. I was on his farm in the summer of 1883, and I must say that for a man who had got his knowledge almost wholly from books, his venture looked as if it would be a complete success." In the dairy region of southern central New York, where the writer's boyhood was passed, and where the chief agricultural attractions consist of a gently undulating landscape and some most enticing trout streams, the general farming community have found themselves compelled to live "rather close to the bone." A rise or fall of a half-cent per quart in the wholesale milk market of New York city may be sufficient to turn the balance from one side to the other of their profit and loss ac-

count. Yet among their number is a Princeton alumnus, the record of whose work I have recently seen, who by the application of agricultural science to the growing of crops, the manufacture of ensilage, and the feeding of stock, is enabled to pursue the "even tenor of his way," which is to harvest an annual profit many times in excess of the average three and one-half per cent. of his State.—*James K. Reeve, in Harper's Magazine.*

WHEN the leaden world

Sets its hard face against their fateful thought,
And brute strength, like a scornful conqueror,
Clangs his huge mace down in the other scale,
The inspired soul but flings his patience in,
And slowly that outweighs the ponderous
globe,—
One faith against a whole earth's unbelief,
One soul against the flesh of all mankind.

—Emerson.

YIELD all the days their dues,

But when the evening light is lost, or dim,
Commune with your own spirit, and with Him!
Restore your soul with stillness as it meet,
And when the sun bids forth, haste not to show
Your strength, but kneel for blessing ere you go,
And meekly bind the sandals on your feet.

—Thomas Ashe.

NEWS AND OTHER GLEANINGS.

—An account of a recent "symposium" on inspiration held by Glasgow and Edinburgh theological students belonging to the Free (Presbyterian) Church of Scotland says: "It was all but universally admitted that the inspiration of the Bible does not differ in kind from the inspiration of the poet or the painter. It was also generally agreed that, whatever view of inspiration be held, it can only be applied to the ethical and religious portions of the Bible, and not to the historical."—*Hartford Courant.*

—One of the most notable men of science in France,—a chemist,—Michael Eugene Chevreul, died at Paris a few days ago, at the extraordinary age of nearly 103 years, (he was born 8th month 31, 1786). "It is impossible for me to comprehend," said M. Chevreul in a talk with an American visitor after he had entered his second century, "how an intelligent being and above all a scientist can deny the existence of a great governing power. I can understand agnosticism, which neither denies nor asserts, but simply says, 'I don't know'; but materialism is a mystery tome. There is too perfect an order in nature to accept the doctrine that all this symmetry and usefulness came about by pure chance."

—A terrible famine prevails in certain districts of China. "Almost the whole missionary staff in the two famine districts are engaged in the work of relief," says the *North China News*, "and yet they report that they are only able to touch the fringe of the distress."

—The writings of A. T. Drummond on the Geology of the Great Lakes, have attracted considerable attention in Canada and this country. In his view, Lake Superior is the most ancient of the lakes, and at one time found an outlet to the ocean through the Mississippi valley. Later, however, it was the source of a great river system which terminated at the shore of the Atlantic. This great river arose in the Michigan basin and Lake Superior, crossed what now is Lake Huron, and was joined later on by an-

other large stream from the north. After crossing the Ontario valley, the waters of these streams found an outlet to the ocean through the Mohawk-Hudson valley. At a comparatively recent period, the elevation of the land between the Georgian Bay and Lake Ontario blocked the course of the river and caused a new channel to be opened into the Erie basin. Before this time the St. Lawrence was a river of small size, taking its rise in the Adirondack mountains.

—Among the objects of large size which are expected to be features of interest at the French Exposition, will be an immense terrestrial globe. It will be one millionth of the size of the earth, and consequently will have a diameter of something less than 100 feet. On this scale it will be possible in most cases to give geographical details their true proportionate dimensions. All the great lines of communication by land and sea can be shown in detail. The globe is to be poised, and arranged so that the diurnal revolution of the earth can be exactly imitated by means of clock-work. The work, it is announced, is well forwarded to completion.

—There has been discovered four miles south of Rattlesnake Spring, Washington Territory, an extensive ledge of marble, in which beautiful trees or plants of moss are as frequent, and as clearly defined as in the moss agate, though the marble is not translucent. The body of the stone is mostly white, with splashes of pink and blue between the bunches of moss.—*Scientific American.*

—The Ober House, which was burned recently at Wrentham, was one of the oldest colonial structures in Massachusetts, and "one of the truest specimens of that type of architecture." It possessed the over-hanging second story with loop-holes, to enable marksmen to defend themselves in time of war. The old house is first mentioned in the town records as early as 1703, when William Fish, Sr., and his wife gave the dwelling and 25 acres of land to their son Benjamin for 25 pounds sterling.—*Exchange.*

—According to statistics recently given out at Salt Lake City (as published in a Western paper), the Mormon Church has 12 apostles, 70 patriarchs, 3,919 high priests, 11,805 elders, 2,069 priests, 2,292 teachers, 11,610 deacons, 81,899 families, 119,915 officers and members, and 49,303 children under eight years of age. The number of marriages for the six months ended April 16, 1889, was 530; number of births, 2,754; new members baptized, 488; excommunications, 113.

CURRENT EVENTS.

THE vote was taken in Massachusetts on the 22d inst. upon the question of inserting a Prohibitory clause in the constitution. The negative side had a majority reported at 44,500. Cambridge, (where Harvard University is located), in which, by a "local option" vote, liquor license is refused, gave 1,983 for the Amendment, and 4,621 against it. The vote in Boston was 11,060 in the affirmative, and 31,075 in the negative. One Congressional district, that which includes Cape Cod, gave an affirmative majority. All the cities, except Somerville, voted in the negative. Members of the Women's Christian Temperance Union were active at the polls.

THE passengers and crew of the Danish steamer *Danmark*, which was found at sea abandoned, had been all taken off by another steamer, the *Missouri*, which left part at the Azores Islands, (the nearest land), and brought the others, (all she could accommodate), to Philadelphia, where they arrived on the 22d inst. Only one life was lost at the wreck, and over 700 were saved.

THE Oklahoma lands were "opened to settlement" at noon on the 22d inst., and large numbers of people, who

had been held at the border by the U. S. military, entered at once. The number is estimated at not less than 25,000. In many cases, men were mounted on fleet horses, to ride at once to places heretofore selected as desirable, and enter their claims. The accounts sent on the evening of the first day's occupancy report no disorder or violence, though it seems probable that some persons entered in advance of the time and secured locations.

NOTICES.

* * * John M. Child will lecture in Friends' meeting-house, East Fifteenth street and Rutherford Place, New York, on Sixth-day, the 26th inst., at 8 p. m., under the auspices of the Sub-Committee on Temperance of New York Yearly Meeting's Philanthropic Labor Committee. The subject of the lecture is "The Squandering of Reserve; an Argument in favor of Total Abstinence from Alcoholic Drinks," and it will be accompanied with stereopticon illustrations.

All that are interested are cordially invited.

* * * A Conference on the subject of Temperance, under the care of Haddonfield Quarterly Meeting's Committee, will be held in Friends' meeting-house, Camden, N. J., on First-day, Fourth month 27th, 1889, at 2.30 p. m.

All are cordially invited.

WM. C. COLES, Clerk.

* * * A meeting of the Yearly Meeting's Committee on Isolated Membership will be held at Room No. 1, 15th and Race streets, Philadelphia, on Seventh-day, Fifth month 4th, at 10 o'clock a. m.

HOWARD M. JENKINS, Clerk.

* * * Aaron M. Powell, of New York, will address the Conference held at Friend's Meeting-house, 15th and Race streets, on First-day next, Fourth month 28, after meeting, on "The Constitutional Amendment."

* * * A portion of the Philadelphia Quarterly Meeting's Committee to visit the smaller branches will attend the meeting held in School street, Germantown, on First-day morning, Fourth month 28, 1889, at 10.30 o'clock.

An invitation is cordially extended to Friends and others to be present.

* * * Bucks county First-day School Union will be held at Laughorne, on Seventh-day, Fourth month 27th, commencing at 10.30 a. m.

All interested are earnestly invited to attend.

AMOS R. ELLIS,
M. ELLEN LONGSHORE, } Clerks.

* * * Friends' Social Lyceum—meeting at Friends' meeting-house, 17th and Girard Avenue, Fifth month 1st, at 8 p. m. Exercises include a discussion of the Temperance question. Speakers: Samuel B. Carr, Richard B. Westbrook, and others.

* * * The Western First-day School Union will be held at Centre meeting-house, Del., on Seventh-day, Fourth month 27th, 1889, to meet at 10 o'clock a. m. All interested are cordially invited to attend.

Friends coming by train should communicate in advance with Joseph P. Nichols, Centreville, Del. Take the train leaving Broad street station at 7.25 a. m. for Fairville station. Returning, train arrives in Philadelphia at 7.18 p. m.

EDWARD A. PENNOCK,
LYDIA B. WALTON, } Clerks.

* * * Quarterly meetings in the Fourth month will occur as follows:

- 27. Scipio, Scipio, N. Y.
- 27. Westbury, Brooklyn, N. Y.
- 30. Concord, Wilmington, Del.

PUBLISHERS' NOTICES.

* * * Matter intended for insertion in the INTELLIGENCER AND JOURNAL should reach us by Third-day morning, though notices or advertisements relating to affairs of immediate importance may be used as late as the morning of Fourth-day. In order to reach our distant subscribers, the paper is now mailed on Fifth day and must be sent to press at noon of the day preceding.

* * * WE particularly ask that when money is forwarded to renew subscriptions, care be taken to give us the name of the person to whom the paper is now being sent. Sometimes, instead of this, the name of another member of the same family is given, in which case, the new name not appearing on our list, we suppose it to be a new subscription, and send two papers.

Where it is a new subscription, please say so, and this will also to help avoid mistakes.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test short weight, alum, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER Co., 106 Wall-st., N. Y.

Tailoring. Tailoring.

Fit and promptness guaranteed. Desirable goods, such as cloths, cassimeres, and worsteds suitable for Plain and Fashionable Garments, always on hand.

"DO THE DUTY NEAREST."

FINDING myself unfit for famous deeds,
I tried to help in people's lesser needs,
Just did the little tasks that lay at hand :
Picked up the fallen child, brushed off the sand ;
Lightened my neighbor's load, dispelled the fears
From timid souls in galling bonds for years,
Sang just a little song that cheered some one
To whom the great songs were an unknown tongue,
And for my own made such a restful home
That they were tempted not from it to roam.
"Ah me," I sighed, "this is not dreamed of name."
But, lo ! my world was ringing with my fame.

—Louise Phillips, in *Christian Register*.

OLD ADVICES OF PHILADELPHIA YEARLY MEETING.¹

SOME Advices given forth from time to time by the Yearly Meetings of Friends for New Jersey and Pennsylvania, held alternately at Burlington and Philadelphia :

Burials, 1735.—It being moved that notwithstanding the provisions made by our Book of Discipline, and the advices of Friends on that occasion, greater provision for eating and drinking are made at Marriages and Burials than is consistent with good order ; it is therefore recommended to the several Quarterly and Monthly Meetings to be careful in those particulars, and to deal with such who may transgress therein. And withal that Friends be careful to observe the time appointed for Burials, as near as may be conveniently, according to our Discipline and former advice.

1746.—It was moved to this meeting that notwithstanding the repeated cautions given from former meetings, Friends in some places do not observe so punctually as they ought the time appointed for Burials, from whence divers inconveniences ensue. This meeting therefore again recommends it to the care of the several Quarterly and Monthly Meetings to enforce our Discipline in this respect, so as to prevent the disorders complained of. 1750.—Advised, That Friends be concerned frequently to call upon the overseers, or other Friends appointed within their respective meetings to prevent the unnecessary use of Strong Drink at Burials, and to see that the time fixed be observed, and to enquire whether they discharge their duty therein.

1757.—It is now recommended to the several Quarterly and Monthly Meetings, to consider the ex-

pediency and service of keeping a regular record in each meeting of Births and Burials, and to revive the same by enquiring, when the Queries now in use are read and answered, "Whether due care is taken in respect to the recording Births and Burials.

Charity and Unity, 1787.—We beseech all that they hold fast their blessed unity of the Spirit in the bond of peace, and be tender and very careful of breaking it, lest it be an occasion of mourning in Zion, and of rejoicing to her enemies ; And avoid all tokens of open division amongst us, particularly that of keeping on the Hat in time of Public Prayer in our meetings. If the person so praying hath ever been owned and received by us, until they have been duly and orderly proceeded against, and disowned by the Monthly and Quarterly Meetings they belong to : And we do earnestly desire that not only this but all other things that tend to division and breach of this precious unity may be watched against and avoided —Namely, evil speaking and backbiting one of another upon any offense conceived one of another, but if any be offended according to the wholesome order of the Gospel, declare it first to the person or persons concerned, that so the ground of the offense may be removed, or they orderly proceeded against in the way of Truth established among us, to the honor of the Great God, and the joy and mutual comfort one of another.

1727.—Some of our Elders well remember a day of great trouble in these Countries, when one ambitious to become a Sect-Master, covered his pride and destructive designs under the pretense of Religion. If our Adversary now, or at any time hereafter shall assume a different form, and by specious pretences of another kind seek to divide us in our affection and true interest, let us watch against him here also, so as to avoid the snares laid for us.

1775.—And as many Friends have expressed that a religious objection is raised in their minds against receiving or paying certain Paper Bills of credit lately issued expressly for the purpose of carrying on War, apprehending that it is a duty required of them to guard carefully against contributing thereto in any manner, we therefore fervently desire that such as are convinced that it is their duty to refuse those Bills, may be watchful over their own spirits, and abide in true love and charity ; so that no expression or conduct tending to the oppression of tender consciences may appear amongst us. And we likewise affectionately exhort those who have this religious scruple, that they do not admit, or indulge any censure in their minds against

¹ See Extracts of the same nature as these, in INTELLIGENCER AND JOURNAL, Fourth month 6, 1889.

their brethren who have not the same, carefully manifesting by the whole tenor of their conduct, that nothing is done through strife or contention, but that they act from the clear convictions of Truth in their own minds, showing forth by humility that they are followers of the Prince of Peace.

Certificates, 1682.—Agreed, that all young persons that are single and profess the Truth, both male and female do take care to procure certificates from the Monthly Meetings they belong to both of their conversation and clearness from any person relating to Marriage, and the minds of their parents therein.

1769.—As some members of our Religious Society by suffering wrong motives to govern their concussions to remove from one place to another have suffered loss, and divers of them deprived their families of the benefit of attending our religious meetings, it is recommended to the careful attention of Monthly Meetings to enjoin the due observation and practice of the ancient wholesome rule, entered in 1719. And that elders, overseers and other concerned Friends, when they hear of any Friends inclining to remove, be enjoined in Brotherly love to advise them to consult their Monthly Meetings agreeably to this necessary Rule. And where any remove without thus applying for a certificate, the Monthly Meeting within whose limits they may reside, ought, if they are known, or esteemed to be members of our Society, to admonish them to make a suitable acknowledgement of their misconduct to the satisfaction of the Monthly Meeting from whence they removed, in order to obtain a certificate, and lest this care should not be timely taken the Monthly Meeting from which such do remove, should write to the Monthly Meeting where they reside to inform the said Meeting of the manner in which they left them.
